        - name: 'Example TestUser1'
        - email: example@domain.com
```

salt.states.splunk.**absent**(*email*, *profile='splunk'*, ***kwargs*)
Ensure a splunk user is absent

```
ensure example test user 1:
    splunk.absent:
        - email: 'example@domain.com'
        - name: 'exampleuser'
```

The following parameters are required:
email This is the email of the user in splunk
name This is the splunk username used to identify the user.

salt.states.splunk.**present**(*email*, *profile='splunk'*, ***kwargs*)
Ensure a user is present

```
ensure example test user 1:
    splunk.user_present:
        - realname: 'Example TestUser1'
        - name: 'exampleuser'
        - email: 'example@domain.com'
        - roles: ['user']
```

The following parameters are required:
email This is the email of the user in splunk

19.19.230 salt.states.splunk_search

Splunk Search State Module

New in version 2015.5.0.

This state is used to ensure presence of splunk searches.

```
server-warning-message:
  splunk_search.present:
    - name: This is the splunk search name
    - search: index=main sourcetype=
```

salt.states.splunk_search.**absent**(*name*, *profile='splunk'*)

Ensure a search is absent

```
API Error Search:
  splunk_search.absent
```

The following parameters are required:

name This is the name of the search in splunk

salt.states.splunk_search.**present**(*name*, *profile='splunk'*, ***kwargs*)

Ensure a search is present

```
API Error Search:
  splunk_search.present:
    search: index=main sourcetype=blah
    template: alert_5min
```

The following parameters are required:

name This is the name of the search in splunk

19.19.231 salt.states.sqlite3

Management of SQLite3 databases

New in version 2016.3.0.

depends

- SQLite3 Python Module

configuration See *salt.modules.sqlite3* for setup instructions

The sqlite3 module is used to create and manage sqlite3 databases and execute queries

Here is an example of creating a table using sql statements:

```
users:
  sqlite3.table_present:
    - db: /var/www/data/app.sqlite
    - schema: CREATE TABLE `users` (`username` TEXT COLLATE NOCASE UNIQUE NOT NULL,
 ↪`password` BLOB NOT NULL, `salt` BLOB NOT NULL, `last_login` INT)
```

Here is an example of creating a table using yaml/jinja instead of sql:

```
users:
  sqlite3.table_present:
    - db: /var/www/app.sqlite
    - schema:
      - email TEXT COLLATE NOCASE UNIQUE NOT NULL
      - firstname TEXT NOT NULL
      - lastname TEXT NOT NULL
      - company TEXT NOT NULL
      - password BLOB NOT NULL
      - salt BLOB NOT NULL
```

Here is an example of making sure a table is absent:

```
badservers:
  sqlite3.table_absent:
    - db: /var/www/data/users.sqlite
```

Sometimes you would to have specific data in tables to be used by other services Here is an example of making sure rows with specific data exist:

```
user_john_doe_xyz:
  sqlite3.row_present:
    - db: /var/www/app.sqlite
    - table: users
    - where_sql: email='john.doe@companyxyz.com'
    - data:
        email: john.doe@companyxyz.com
        lastname: doe
        firstname: john
        company: companyxyz.com
        password: abcdef012934125
        salt: abcdef012934125
    - require:
      - sqlite3: users
```

Here is an example of removing a row from a table:

```
user_john_doe_abc:
  sqlite3.row_absent:
    - db: /var/www/app.sqlite
    - table: users
    - where_sql: email="john.doe@companyabc.com"
    - require:
      - sqlite3: users
```

Note that there is no explicit state to perform random queries, however, this can be approximated with sqlite3's module functions and module.run:

```
zone-delete:
  module.run:
    - name: sqlite3.modify
    - db: {{ db }}
    - sql: "DELETE FROM records WHERE id > {{ count[0] }} AND domain_id = {{ domain_id }
↪}"
    - watch:
      - sqlite3: zone-insert-12
```

salt.states.sqlite3.**row_absent**(*name*, *db*, *table*, *where_sql*, *where_args=None*)

Makes sure the specified row is absent in db. If multiple rows match where_sql, then the state will fail.
name Only used as the unique ID
db The database file name
table The table name to check
where_sql The sql to select the row to check
where_args The list parameters to substitute in where_sql

salt.states.sqlite3.**row_present**(*name*, *db*, *table*, *data*, *where_sql*, *where_args=None*, *update=False*)
Checks to make sure the given row exists. If row exists and update is True then row will be updated with data. Otherwise it will leave existing row unmodified and check it against data. If the existing data doesn't match data_check the state will fail. If the row doesn't exist then it will insert data into the table. If more than one row matches, then the state will fail.
name Only used as the unique ID
db The database file name
table The table name to check the data
data The dictionary of key/value pairs to check against if row exists, insert into the table if it doesn't
where_sql The sql to select the row to check
where_args The list parameters to substitute in where_sql
update True will replace the existing row with data When False and the row exists and data does not equal the row data then the state will fail

salt.states.sqlite3.**table_absent**(*name*, *db*)
Make sure the specified table does not exist
name The name of the table
db The name of the database file

salt.states.sqlite3.**table_present**(*name*, *db*, *schema*, *force=False*)
Make sure the specified table exists with the specified schema
name The name of the table
db The name of the database file
schema The dictionary containing the schema information
force If the name of the table exists and force is set to False, the state will fail. If force is set to True, the existing table will be replaced with the new table

19.19.232 salt.states.ssh_auth

Control of entries in SSH authorized_key files

The information stored in a user's SSH authorized key file can be easily controlled via the ssh_auth state. Defaults can be set by the enc, options, and comment keys. These defaults can be overridden by including them in the name.

Since the YAML specification limits the length of simple keys to 1024 characters, and since SSH keys are often longer than that, you may have to use a YAML `explicit key', as demonstrated in the second example below.

```
AAAAB3NzaC1kc3MAAACBAL0sQ9fJ5bYTEyY==:
  ssh_auth.present:
    - user: root
    - enc: ssh-dss

? AAAAB3NzaC1kc3MAAACBAL0sQ9fJ5bYTEyY==...
:
  ssh_auth.present:
    - user: root
    - enc: ssh-dss
```

```
thatch:
  ssh_auth.present:
    - user: root
    - source: salt://ssh_keys/thatch.id_rsa.pub
    - config: '%h/.ssh/authorized_keys'

sshkeys:
  ssh_auth.present:
    - user: root
    - enc: ssh-rsa
    - options:
      - option1="value1"
      - option2="value2 flag2"
    - comment: myuser
    - names:
      - AAAAB3NzaC1kc3MAAACBAL0sQ9fJ5bYTEyY==
      - ssh-dss AAAAB3NzaCL0sQ9fJ5bYTEyY== user@domain
      - option3="value3" ssh-dss AAAAB3NzaC1kcQ9J5bYTEyY== other@testdomain
      - AAAAB3NzaC1kcQ9fJFF435bYTEyY== newcomment
```

salt.states.ssh_auth.**absent**(*name*, *user*, *enc='ssh-rsa'*, *comment=''*, *source=''*, *options=None*, *config='.ssh/authorized_keys'*, *fingerprint_hash_type=None*)

Verifies that the specified SSH key is absent

name The SSH key to manage

user The user who owns the SSH authorized keys file to modify

enc Defines what type of key is being used; can be ed25519, ecdsa, ssh-rsa or ssh-dss

comment The comment to be placed with the SSH public key

options The options passed to the key, pass a list object

source The source file for the key(s). Can contain any number of public keys, in standard ``authorized_keys'' format. If this is set, comment, enc and options will be ignored.

New in version 2015.8.0.

config The location of the authorized keys file relative to the user's home directory, defaults to ".ssh/authorized_keys". Token expansion %u and %h for username and home path supported.

fingerprint_hash_type The public key fingerprint hash type that the public key fingerprint was originally hashed with. This defaults to `md5` if not specified.

New in version 2016.11.7.

Note: The default value of the `fingerprint_hash_type` will change to `sha256` in Salt 2017.7.0.

---

salt.states.ssh_auth.**present**(*name*, *user*, *enc='ssh-rsa'*, *comment=''*, *source=''*, *options=None*, *config='.ssh/authorized_keys'*, *fingerprint_hash_type=None*, ***kwargs*)

Verifies that the specified SSH key is present for the specified user

name The SSH key to manage

user The user who owns the SSH authorized keys file to modify

enc Defines what type of key is being used; can be ed25519, ecdsa, ssh-rsa or ssh-dss

comment The comment to be placed with the SSH public key

source The source file for the key(s). Can contain any number of public keys, in standard ``authorized_keys'' format. If this is set, comment and enc will be ignored.

Note: The source file must contain keys in the format `<enc> <key> <comment>`. If you have generated a keypair using PuTTYgen, then you will need to do the following to retrieve an OpenSSH-compatible public key.

1. In PuTTYgen, click `Load`, and select the *private* key file (not the public key), and click `Open`.

2.Copy the public key from the box labeled `Public key for pasting into OpenSSH authorized_keys file`.
3.Paste it into a new file.

---

options The options passed to the key, pass a list object

config The location of the authorized keys file relative to the user's home directory, defaults to ".ssh/authorized_keys". Token expansion %u and %h for username and home path supported.

fingerprint_hash_type The public key fingerprint hash type that the public key fingerprint was originally hashed with. This defaults to `md5` if not specified.

New in version 2016.11.7.

Note: The default value of the `fingerprint_hash_type` will change to `sha256` in Salt 2017.7.0.

19.19.233 salt.states.ssh_known_hosts

Control of SSH known_hosts entries

Manage the information stored in the known_hosts files.

```
github.com:
  ssh_known_hosts:
    - present
    - user: root
    - fingerprint: 16:27:ac:a5:76:28:2d:36:63:1b:56:4d:eb:df:a6:48

example.com:
  ssh_known_hosts:
    - absent
    - user: root
```

`salt.states.ssh_known_hosts.`**`absent`**(*name*, *user=None*, *config=None*)

Verifies that the specified host is not known by the given user

name The host name

user The user who owns the ssh authorized keys file to modify

config The location of the authorized keys file relative to the user's home directory, defaults to ".ssh/known_hosts". If no user is specified, defaults to ``/etc/ssh/ssh_known_hosts". If present, must be an absolute path when a user is not specified.

`salt.states.ssh_known_hosts.`**`present`**(*name*, *user=None*, *fingerprint=None*, *key=None*, *port=None*, *enc=None*, *config=None*, *hash_known_hosts=True*, *timeout=5*, *fingerprint_hash_type=None*)

Verifies that the specified host is known by the specified user

On many systems, specifically those running with openssh 4 or older, the `enc` option must be set, only openssh 5 and above can detect the key type.

name The name of the remote host (e.g. ``github.com")

user The user who owns the ssh authorized keys file to modify

fingerprint The fingerprint of the key which must be present in the known_hosts file (optional if key specified)

key The public key which must be present in the known_hosts file (optional if fingerprint specified)

port optional parameter, port which will be used to when requesting the public key from the remote host, defaults to port 22.

enc Defines what type of key is being used, can be ed25519, ecdsa ssh-rsa or ssh-dss

config The location of the authorized keys file relative to the user's home directory, defaults to ".ssh/known_hosts". If no user is specified, defaults to ``/etc/ssh/ssh_known_hosts". If present, must be an absolute path when a user is not specified.

hash_known_hosts [True] Hash all hostnames and addresses in the known hosts file.

timeout [int] Set the timeout for connection attempts. If `timeout` seconds have elapsed since a connection was initiated to a host or since the last time anything was read from that host, then the connection is closed and the host in question considered unavailable. Default is 5 seconds.

New in version 2016.3.0.

fingerprint_hash_type The public key fingerprint hash type that the public key fingerprint was originally hashed with. This defaults to `sha256` if not specified.

New in version 2016.11.4.

Changed in version 2017.7.0:: default changed from `md5` to `sha256`

19.19.234 salt.states.stateconf

Stateconf System

The stateconf system is intended for use only with the stateconf renderer. This State module presents the set function. This function does not execute any functionality, but is used to interact with the stateconf renderer.

`salt.states.stateconf.`**`context`**(*name*, ***kwargs*)
No-op state to support state config via the stateconf renderer.

`salt.states.stateconf.`**`set`**(*name*, ***kwargs*)
No-op state to support state config via the stateconf renderer.

19.19.235 salt.states.status

Minion status monitoring

Maps to the *status* execution module.

`salt.states.status.`**`loadavg`**(*name*, *maximum=None*, *minimum=None*)
Return the current load average for the specified minion. Available values for name are *1-min*, *5-min* and *15-min*. *minimum* and *maximum* values should be passed in as strings.

`salt.states.status.`**`process`**(*name*)
Return whether the specified signature is found in the process tree. This differs slightly from the services states, in that it may refer to a process that is not managed via the init system.

19.19.236 salt.states.statuspage

StatusPage

Manage the StatusPage configuration.

In the minion configuration file, the following block is required:

```
statuspage:
  api_key: <API_KEY>
  page_id: <PAGE_ID>
```

New in version 2017.7.0.

salt.states.statuspage.**create**(*name*, *endpoint=u'incidents'*, *api_url=None*, *page_id=None*, *api_key=None*, *api_version=None*, ***kwargs*)

Insert a new entry under a specific endpoint.

endpoint: **incidents** Insert under this specific endpoint.

page_id Page ID. Can also be specified in the config file.

api_key API key. Can also be specified in the config file.

api_version: **1** API version. Can also be specified in the config file.

api_url Custom API URL in case the user has a StatusPage service running in a custom environment.

kwargs Other params.

SLS Example:

```
create-my-component:
    statuspage.create:
        - endpoint: components
        - name: my component
        - group_id: 993vgplshj12
```

salt.states.statuspage.**delete**(*name*, *endpoint=u'incidents'*, *id=None*, *api_url=None*, *page_id=None*, *api_key=None*, *api_version=None*)

Remove an entry from an endpoint.

endpoint: **incidents** Request a specific endpoint.

page_id Page ID. Can also be specified in the config file.

api_key API key. Can also be specified in the config file.

api_version: **1** API version. Can also be specified in the config file.

api_url Custom API URL in case the user has a StatusPage service running in a custom environment.

SLS Example:

```
delete-my-component:
    statuspage.delete:
        - endpoint: components
        - id: ftgks51sfs2d
```

salt.states.statuspage.**managed**(*name*, *config*, *api_url=None*, *page_id=None*, *api_key=None*, *api_version=None*, *pace=1*, *allow_empty=False*)

Manage the StatusPage configuration.

config Dictionary with the expected configuration of the StatusPage. The main level keys of this dictionary represent the endpoint name. If a certain endpoint does not exist in this structure, it will be ignored / not configured.

page_id Page ID. Can also be specified in the config file.

api_key API key. Can also be specified in the config file.

api_version: **1** API version. Can also be specified in the config file.

api_url Custom API URL in case the user has a StatusPage service running in a custom environment.

pace: **1** Max requests per second allowed by the API.

allow_empty: **False** Allow empty config.

SLS example:

```
my-statuspage-config:
    statuspage.managed:
        - config:
            components:
                - name: component1
                  group_id: uy4g37rf
                - name: component2
                  group_id: 3n4uyu4gf
            incidents:
```

```
                - name: incident1
                  status: resolved
                  impact: major
                  backfilled: false
                - name: incident2
                  status: investigating
                  impact: minor
```

salt.states.statuspage.**update**(*name*, *endpoint=u'incidents'*, *id=None*, *api_url=None*, *page_id=None*, *api_key=None*, *api_version=None*, ***kwargs*)

Update attribute(s) of a specific endpoint.

id The unique ID of the enpoint entry.

endpoint: **incidents** Endpoint name.

page_id Page ID. Can also be specified in the config file.

api_key API key. Can also be specified in the config file.

api_version: **1** API version. Can also be specified in the config file.

api_url Custom API URL in case the user has a StatusPage service running in a custom environment.

SLS Example:

```
update-my-incident:
    statuspage.update:
        - id: dz959yz2nd4l
        - status: resolved
```

19.19.237 salt.states.stormpath_account

Support for Stormpath.

New in version 2015.8.0.

salt.states.stormpath_account.**absent**(*name*, *directory_id=None*)

Ensure that an account associated with the given email address is absent. Will search all directories for the account, unless a directory_id is specified.

name The email address of the account to delete.

directory_id Optional. The ID of the directory that the account is expected to belong to. If not specified, then a list of directories will be retrieved, and each will be scanned for the account. Specifying a directory_id will therefore cut down on the number of requests to Stormpath, and increase performance of this state.

salt.states.stormpath_account.**present**(*name*, ***kwargs*)

Ensure that an account is present and properly configured

name The email address associated with the Stormpath account

directory_id The ID of a directory which the account belongs to. Required.

password Required when creating a new account. If specified, it is advisable to reference the password in another database using an `sdb://` URL. Will NOT update the password if an account already exists.

givenName Required when creating a new account.

surname Required when creating a new account.

username Optional. Must be unique across the owning directory. If not specified, the username will default to the email field.

middleName Optional.

status `enabled` accounts are able to login to their assigned applications, `disabled` accounts may not login to applications, `unverified` accounts are disabled and have not verified their email address.

customData. Optional. Must be specified as a dict.

19.19.238 salt.states.supervisord

Interaction with the Supervisor daemon

```
wsgi_server:
  supervisord.running:
    - require:
      - pkg: supervisor
    - watch:
      - file: /etc/nginx/sites-enabled/wsgi_server.conf
```

salt.states.supervisord.**dead**(*name*, *user=None*, *conf_file=None*, *bin_env=None*, ***kwargs*)

Ensure the named service is dead (not running).

name Service name as defined in the supervisor configuration file

user Name of the user to run the supervisorctl command

New in version 0.17.0.

conf_file path to supervisorctl config file

bin_env path to supervisorctl bin or path to virtualenv with supervisor installed

salt.states.supervisord.**running**(*name*, *restart=False*, *update=False*, *user=None*, *conf_file=None*, *bin_env=None*, ***kwargs*)

Ensure the named service is running.

name Service name as defined in the supervisor configuration file

restart Whether to force a restart

update Whether to update the supervisor configuration.

user Name of the user to run the supervisorctl command

New in version 0.17.0.

conf_file path to supervisorctl config file

bin_env path to supervisorctl bin or path to virtualenv with supervisor installed

19.19.239 salt.states.svn

Manage SVN repositories

Manage repository checkouts via the svn vcs system. Note that subversion must be installed for these states to be available, so svn states should include a requisite to a pkg.installed state for the package which provides subversion (`subversion` in most cases). Example:

```
subversion:
  pkg.installed

http://unladen-swallow.googlecode.com/svn/trunk/:
  svn.latest:
    - target: /tmp/swallow
```

salt.states.svn.**dirty**(*name*, *target*, *user=None*, *username=None*, *password=None*, *ignore_unversioned=False*)

Determine if the working directory has been changed.

salt.states.svn.**export**(*name*, *target=None*, *rev=None*, *user=None*, *username=None*, *password=None*, *force=False*, *overwrite=False*, *externals=True*, *trust=False*)

Export a file or directory from an SVN repository

name Address and path to the file or directory to be exported.

target Name of the target directory where the checkout will put the working directory

rev [None] The name revision number to checkout. Enable ``force'' if the directory already exists.
user [None] Name of the user performing repository management operations
username [None] The user to access the name repository with. The svn default is the current user
password Connect to the Subversion server with this password

New in version 0.17.0.

force [False] Continue if conflicts are encountered
overwrite [False] Overwrite existing target
externals [True] Change to False to not checkout or update externals
trust [False] Automatically trust the remote server. SVN's --trust-server-cert

`salt.states.svn.`**`latest`**(*name*, *target=None*, *rev=None*, *user=None*, *username=None*, *password=None*, *force=False*, *externals=True*, *trust=False*)

Checkout or update the working directory to the latest revision from the remote repository.
name Address of the name repository as passed to ``svn checkout''
target Name of the target directory where the checkout will put the working directory
rev [None] The name revision number to checkout. Enable ``force'' if the directory already exists.
user [None] Name of the user performing repository management operations
username [None] The user to access the name repository with. The svn default is the current user
password Connect to the Subversion server with this password

New in version 0.17.0.

force [False] Continue if conflicts are encountered
externals [True] Change to False to not checkout or update externals
trust [False] Automatically trust the remote server. SVN's --trust-server-cert

19.19.240 salt.states.sysctl

Configuration of the Linux kernel using sysctl

Control the kernel sysctl system.

```
vm.swappiness:
  sysctl.present:
    - value: 20
```

`salt.states.sysctl.`**`present`**(*name*, *value*, *config=None*)

Ensure that the named sysctl value is set in memory and persisted to the named configuration file. The default sysctl configuration file is /etc/sysctl.conf
name The name of the sysctl value to edit
value The sysctl value to apply
config The location of the sysctl configuration file. If not specified, the proper location will be detected based on platform.

19.19.241 salt.states.syslog_ng

State module for syslog_ng

maintainer Tibor Benke <btibi@sch.bme.hu>

maturity new

depends cmd, ps, syslog_ng

platform all

Users can generate syslog-ng configuration files from YAML format or use plain ones and reload, start, or stop their syslog-ng by using this module.

Details

The service module is not available on all system, so this module includes `syslog_ng.reloaded`, `syslog_ng.stopped`, and `syslog_ng.started` functions. If the service module is available on the computers, users should use that.

Users can generate syslog-ng configuration with `syslog_ng.config` function. For more information see *syslog-ng state usage*.

Syslog-ng configuration file format

The syntax of a configuration snippet in syslog-ng.conf:

```
object_type object_id {<options>};
```

These constructions are also called statements. There are options inside of them:

```
option(parameter1, parameter2); option2(parameter1, parameter2);
```

You can find more information about syslog-ng's configuration syntax in the Syslog-ng Admin guide: http://www.balabit.com/sites/default/files/documents/syslog-ng-ose-3.5-guides/en/syslog-ng-ose-v3.5-guide-admin/html-single/index.html#syslog-ng.conf.5

`salt.states.syslog_ng.`**`config`**(*name*, *config*, *write=True*)
Builds syslog-ng configuration.

name : the id of the Salt document config : the parsed YAML code write : if True, it writes the config into the configuration file, otherwise just returns it

`salt.states.syslog_ng.`**`reloaded`**(*name*)
Reloads syslog-ng.

`salt.states.syslog_ng.`**`started`**(*name=None*, *user=None*, *group=None*, *chroot=None*, *caps=None*, *no_caps=False*, *pidfile=None*, *enable_core=False*, *fd_limit=None*, *verbose=False*, *debug=False*, *trace=False*, *yydebug=False*, *persist_file=None*, *control=None*, *worker_threads=None*, **args*, ***kwargs*)
Ensures, that syslog-ng is started via the given parameters.

Users shouldn't use this function, if the service module is available on their system.

`salt.states.syslog_ng.`**`stopped`**(*name=None*)
Kills syslog-ng.

19.19.242 salt.states.sysrc

`salt.states.sysrc.`**`absent`**(*name*, ***kwargs*)
Ensure a sysrc variable is absent.
name The variable name to set
file (optional) The rc file to add the variable to.
jail (option) the name or JID of the jail to set the value in.

`salt.states.sysrc.`**`managed`**(*name*, *value*, ***kwargs*)
Ensure a sysrc variable is set to a specific value.

name The variable name to set
value Value to set the variable to
file (optional) The rc file to add the variable to.
jail (option) the name or JID of the jail to set the value in.
Example:

```
syslogd:
  sysrc.managed:
    - name: syslogd_flags
    - value: -ss
```

19.19.243 salt.states.telemetry_alert

New in version 2016.3.0..

Manage Telemetry alert configurations

Create, Update and destroy Mongo Telemetry alert configurations.

This module uses requests, which can be installed via package, or pip.

This module accepts explicit credential (telemetry api key) or can also read api key credentials from a pillar. Example:

```
ensure telemetry alert X is defined on deployment Y:
    telemetry_alert.present:
        - deployment_id: "rs-XXXXXX"
        - metric_name: "testMetric"
        - alert_config:
           max: 1
           filter:  SERVER_ROLE_MONGOD_PRIMARY
           escalate_to: "example@pagerduty.com"
        - name: "**MANAGED BY ORCA DO NOT EDIT BY HAND** manages alarm on testMetric"
```

salt.states.telemetry_alert.**absent**(*name*, *deployment_id*, *metric_name*, *api_key=None*, *profile='telemetry'*)

Ensure the telemetry alert config is deleted
name An optional description of the alarms (not currently supported by telemetry API)
deployment_id Specifies the ID of the root deployment resource (replica set cluster or sharded cluster) to which this alert definition is attached
metric_name Specifies the unique ID of the metric to whose values these thresholds will be applied
api_key Telemetry api key for the user
profile A dict with telemetry config data. If present, will be used instead of api_key.

salt.states.telemetry_alert.**present**(*name*, *deployment_id*, *metric_name*, *alert_config*, *api_key=None*, *profile='telemetry'*)

Ensure the telemetry alert exists.
name An optional description of the alarm (not currently supported by telemetry API)
deployment_id Specifies the ID of the root deployment resource (replica set cluster or sharded cluster) to which this alert definition is attached
metric_name Specifies the unique ID of the metric to whose values these thresholds will be applied
alert_config: Is a list of dictionaries where each dict contains the following fields:
filter By default the alert will apply to the deployment and all its constituent resources. If the alert only applies to a subset of those resources, a filter may be specified to narrow this scope.
min the smallest ``ok'' value the metric may take on; if missing or null, no minimum is enforced.
max the largest ``ok'' value the metric may take on; if missing or null, no maximum is enforced.

notify_all Used to indicate if you want to alert both onCallEngineer and apiNotifications
api_key Telemetry api key for the user
profile A dict of telemetry config information. If present, will be used instead of api_key.

19.19.244 salt.states.test

Test States

Provide test case states that enable easy testing of things to do with state calls, e.g. running, calling, logging, output filtering etc.

```
always-passes-with-any-kwarg:
  test.nop:
    - name: foo
    - something: else
    - foo: bar

always-passes:
  test.succeed_without_changes:
    - name: foo

always-fails:
  test.fail_without_changes:
    - name: foo

always-changes-and-succeeds:
  test.succeed_with_changes:
    - name: foo

always-changes-and-fails:
  test.fail_with_changes:
    - name: foo

my-custom-combo:
  test.configurable_test_state:
    - name: foo
    - changes: True
    - result: False
    - comment: bar.baz

is-pillar-foo-present-and-bar-is-int:
  test.check_pillar:
    - present:
        - foo
    - integer:
        - bar
```

salt.states.test.**check_pillar**(*name*, *present=None*, *boolean=None*, *integer=None*, *string=None*, *listing=None*, *dictionary=None*, *verbose=False*)

Checks the presence and, optionally, the type of given keys in Pillar. Supported kwargs for types are: - boolean (bool) - integer (int) - string (str) - listing (list) - dictionary (dict)

Checking for None type pillars is not implemented yet.

```
is-pillar-foo-present-and-bar-is-int:
  test.check_pillar:
    - present:
```

```
        - foo
    - integer:
        - bar
```

salt.states.test.**configurable_test_state**(*name*, *changes=True*, *result=True*, *comment=''*)
A configurable test state which determines its output based on the inputs.

New in version 2014.7.0.
name: A unique string.
changes: Do we return anything in the changes field? Accepts True, False, and `Random' Default is True
result: Do we return successfully or not? Accepts True, False, and `Random' Default is True If test is True and changes is True, this will be None. If test is True and and changes is False, this will be True.
comment: String to fill the comment field with. Default is `'

salt.states.test.**fail_with_changes**(*name*)
Returns failure and changes is not empty.

New in version 2014.7.0.
name: A unique string.

salt.states.test.**fail_without_changes**(*name*)
Returns failure.

New in version 2014.7.0.
name: A unique string.

salt.states.test.**mod_watch**(*name*, *sfun=None*, ***kwargs*)
Call this function via a watch statement

New in version 2014.7.0.

Any parameters in the state return dictionary can be customized by adding the keywords `result`, `comment`, and `changes`.

```
this_state_will_return_changes:
  test.succeed_with_changes

this_state_will_NOT_return_changes:
  test.succeed_without_changes

this_state_is_watching_another_state:
  test.succeed_without_changes:
    - comment: 'This is a custom comment'
    - watch:
      - test: this_state_will_return_changes
      - test: this_state_will_NOT_return_changes

this_state_is_also_watching_another_state:
  test.succeed_without_changes:
    - watch:
      - test: this_state_will_NOT_return_changes
```

salt.states.test.**nop**(*name*, ***kwargs*)
A no-op state that does nothing. Useful in conjunction with the *use* requisite, or in templates which could otherwise be empty due to jinja rendering

New in version 2015.8.1.

salt.states.test.**show_notification**(*name*, *text=None*, ***kwargs*)
Simple notification using text argument.

New in version 2015.8.0.
name A unique string.
text Text to return in the comment.

salt.states.test.**succeed_with_changes**(*name*)
Returns successful and changes is not empty

New in version 2014.7.0.
name: A unique string.

salt.states.test.**succeed_without_changes**(*name*)
Returns successful.

New in version 2014.7.0.
name A unique string.

19.19.245 salt.states.testinframod module

19.19.246 salt.states.timezone

Management of timezones

The timezone can be managed for the system:

```
America/Denver:
  timezone.system
```

The system and the hardware clock are not necessarily set to the same time. By default, the hardware clock is set to localtime, meaning it is set to the same time as the system clock. If *utc* is set to True, then the hardware clock will be set to UTC, and the system clock will be an offset of that.

```
America/Denver:
  timezone.system:
    - utc: True
```

The Ubuntu community documentation contains an explanation of this setting, as it applies to systems that dual-boot with Windows. This is explained in greater detail here.

salt.states.timezone.**system**(*name*, *utc=True*)
Set the timezone for the system.
name The name of the timezone to use (e.g.: America/Denver)
utc Whether or not to set the hardware clock to UTC (default is True)

19.19.247 salt.states.tls

Enforce state for SSL/TLS

salt.states.tls.**valid_certificate**(*name*, *weeks=0*, *days=0*, *hours=0*, *minutes=0*, *seconds=0*)
Verify that a TLS certificate is valid now and (optionally) will be valid for the time specified through weeks, days, hours, minutes, and seconds.

19.19.248 salt.states.tomcat

Manage Apache Tomcat web applications

Note: This state requires the Tomcat Manager webapp to be installed and running.

The following grains/pillars must be set for communication with Tomcat Manager to work:

```
tomcat-manager:
    user: 'tomcat-manager'
    passwd: 'Passw0rd'
```

Configuring Tomcat Manager

To manage webapps via the Tomcat Manager, you'll need to configure a valid user in the file `conf/tomcat-users.xml`.

Listing 19.1: conf/tomcat-users.xml

```
<?xml version='1.0' encoding='utf-8'?>
<tomcat-users>
    <role rolename="manager-script"/>
    <user username="tomcat-manager" password="Passw0rd" roles="manager-script"/>
</tomcat-users>
```

Notes

- Using multiple versions (aka. parallel deployments) on the same context path is not supported.
- More information about the Tomcat Manager: http://tomcat.apache.org/tomcat-7.0-doc/manager-howto.html
- If you use only this module for deployments you might want to restrict access to the manager so it's only accessible via localhost. For more info: http://tomcat.apache.org/tomcat-7.0-doc/manager-howto.html#Configuring_Manager_Application_Access
- **Last tested on**:

  Tomcat Version: Apache Tomcat/7.0.54

  JVM Vendor: Oracle Corporation

  JVM Version: 1.8.0_101-b13

  OS Architecture: amd64

  OS Name: Linux

  OS Version: 3.10.0-327.22.2.el7.x86_64

`salt.states.tomcat.`**`mod_watch`**(*name*, *url='http://localhost:8080/manager'*, *timeout=180*)
The tomcat watcher function. When called it will reload the webapp in question

`salt.states.tomcat.`**`undeployed`**(*name*, *url='http://localhost:8080/manager'*, *timeout=180*)
Enforce that the WAR will be undeployed from the server
name The context path to undeploy.

url [http://localhost:8080/manager] The URL of the server with the Tomcat Manager webapp.
timeout [180] Timeout for HTTP request to the Tomcat Manager.
Example:

```
jenkins:
  tomcat.undeployed:
    - name: /ran
    - require:
      - service: application-service
```

salt.states.tomcat.**wait**(*name*, *url='http://localhost:8080/manager'*, *timeout=180*)
Wait for the Tomcat Manager to load.

Notice that if tomcat is not running we won't wait for it start and the state will fail. This state can be required in the tomcat.war_deployed state to make sure tomcat is running and that the manager is running as well and ready for deployment.
url [http://localhost:8080/manager] The URL of the server with the Tomcat Manager webapp.
timeout [180] Timeout for HTTP request to the Tomcat Manager.
Example:

```
tomcat-service:
  service.running:
    - name: tomcat
    - enable: True

wait-for-tomcatmanager:
  tomcat.wait:
    - timeout: 300
    - require:
      - service: tomcat-service

jenkins:
  tomcat.war_deployed:
    - name: /ran
    - war: salt://jenkins-1.2.4.war
    - require:
      - tomcat: wait-for-tomcatmanager
```

salt.states.tomcat.**war_deployed**(*name*, *war*, *force=False*, *url='http://localhost:8080/manager'*, *timeout=180*, *temp_war_location=None*, *version=True*)
Enforce that the WAR will be deployed and started in the context path, while making use of WAR versions in the filename.

Note: For more info about Tomcats file paths and context naming, please see http://tomcat.apache.org/tomcat-7.0-doc/config/context.html#Naming

---

name The context path to deploy (incl. forward slash) the WAR to.
war Absolute path to WAR file (should be accessible by the user running Tomcat) or a path supported by the `salt.modules.cp.get_url` function.
force [False] Force deployment even if the version strings are the same. Disabled by default.
url [http://localhost:8080/manager] The URL of the Tomcat Web Application Manager.
timeout [180] Timeout for HTTP requests to the Tomcat Manager.
temp_war_location [None] Use another location to temporarily copy the WAR file to. By default the system's temp directory is used.
version [``] Specify the WAR version. If this argument is provided, it overrides the version encoded in the WAR file name, if one is present.

New in version 2015.8.6.

Use `False` or blank value to prevent guessing the version and keeping it blank.

New in version 2016.11.0.

Example:

```
jenkins:
  tomcat.war_deployed:
    - name: /salt-powered-jenkins
    - war: salt://jenkins-1.2.4.war
    - require:
      - service: application-service
```

Note: Be aware that in the above example the WAR `jenkins-1.2.4.war` will be deployed to the context path `salt-powered-jenkins##1.2.4`. To avoid this either specify a version yourself, or set version to `False`.

19.19.249 salt.states.trafficserver

Control Apache Traffic Server

New in version 2015.8.0.

`salt.states.trafficserver.`**`bounce_cluster`**(*name*)

Bounce all Traffic Server nodes in the cluster. Bouncing Traffic Server shuts down and immediately restarts Traffic Server, node-by-node.

```
bounce_ats_cluster:
  trafficserver.bounce_cluster
```

`salt.states.trafficserver.`**`bounce_local`**(*name*, *drain=False*)

Bounce Traffic Server on the local node. Bouncing Traffic Server shuts down and immediately restarts the Traffic Server node.

This option modifies the behavior of traffic_line -b and traffic_line -L such that traffic_server is not shut down until the number of active client connections drops to the number given by the proxy.config.restart.active_client_threshold configuration variable.

```
bounce_ats_local:
  trafficserver.bounce_local

bounce_ats_local:
  trafficserver.bounce_local
    - drain: True
```

`salt.states.trafficserver.`**`clear_cluster`**(*name*)

Clears accumulated statistics on all nodes in the cluster.

```
clear_ats_cluster:
  trafficserver.clear_cluster
```

`salt.states.trafficserver.`**`clear_node`**(*name*)

Clears accumulated statistics on the local node.

```
clear_ats_node:
  trafficserver.clear_node
```

salt.states.trafficserver.**config**(*name*, *value*)

Set Traffic Server configuration variable values.

```
proxy.config.proxy_name:
  trafficserver.config:
    - value: cdn.site.domain.tld

OR

traffic_server_setting:
  trafficserver.config:
    - name: proxy.config.proxy_name
    - value: cdn.site.domain.tld
```

salt.states.trafficserver.**offline**(*name*, *path*)

Mark a cache storage device as offline. The storage is identified by a path which must match exactly a path specified in storage.config. This removes the storage from the cache and redirects requests that would have used this storage to other storage. This has exactly the same effect as a disk failure for that storage. This does not persist across restarts of the traffic_server process.

```
offline_ats_path:
  trafficserver.offline:
    - path: /path/to/cache
```

salt.states.trafficserver.**refresh**(*name*)

Initiate a Traffic Server configuration file reread. Use this command to update the running configuration after any configuration file modification.

The timestamp of the last reconfiguration event (in seconds since epoch) is published in the proxy.node.config.reconfigure_time metric.

```
refresh_ats:
  trafficserver.refresh
```

salt.states.trafficserver.**restart_cluster**(*name*)

Restart the traffic_manager process and the traffic_server process on all the nodes in a cluster.

```
restart_ats_cluster:
  trafficserver.restart_cluster
```

salt.states.trafficserver.**restart_local**(*name*, *drain=False*)

Restart the traffic_manager and traffic_server processes on the local node.

This option modifies the behavior of traffic_line -b and traffic_line -L such that traffic_server is not shut down until the number of active client connections drops to the number given by the proxy.config.restart.active_client_threshold configuration variable.

```
restart_ats_local:
  trafficserver.restart_local

restart_ats_local_drain:
  trafficserver.restart_local
    - drain: True
```

salt.states.trafficserver.**set_var**(*name*, *value*)
Set Traffic Server configuration variable values.

Deprecated since version Fluorine: Use `trafficserver.config` instead.

```
proxy.config.proxy_name:
  trafficserver.set_var:
    - value: cdn.site.domain.tld

OR

traffic_server_setting:
  trafficserver.set_var:
    - name: proxy.config.proxy_name
    - value: cdn.site.domain.tld
```

salt.states.trafficserver.**shutdown**(*name*)
Shut down Traffic Server on the local node.

```
shutdown_ats:
  trafficserver.shutdown
```

salt.states.trafficserver.**startup**(*name*)
Start Traffic Server on the local node.

```
startup_ats:
  trafficserver.startup
```

salt.states.trafficserver.**zero_cluster**(*name*)
Reset performance statistics to zero across the cluster.

```
zero_ats_cluster:
  trafficserver.zero_cluster
```

salt.states.trafficserver.**zero_node**(*name*)
Reset performance statistics to zero on the local node.

```
zero_ats_node:
  trafficserver.zero_node
```

19.19.250 salt.states.tuned

Interface to Red Hat tuned-adm module

maintainer Syed Ali <alicsyed@gmail.com>

maturity new

depends cmd.run

platform Linux

salt.states.tuned.**off**(*name=None*)
Turns `tuned' off. Example tuned.sls file for turning tuned off:
tuned: tuned.off: []
To see a valid list of states call execution module: `tuned.list`

salt.states.tuned.**profile**(*name*)
This state module allows you to modify system tuned parameters

Example tuned.sls file to set profile to virtual-guest
tuned:
    tuned:
        - profile
        - name: virtual-guest
name tuned profile name to set the system to
To see a valid list of states call execution module: `tuned.list`

19.19.251 salt.states.uptime

Monitor Web Server with Uptime

Uptime is an open source remote monitoring application using Node.js, MongoDB, and Twitter Bootstrap.

Warning: This state module is beta. It might be changed later to include more or less automation.

Note: This state module requires a pillar to specify the location of your uptime install

```
uptime:
  application_url: "http://uptime-url.example.org"
```

Example:

```
url:
  uptime.monitored
url/sitemap.xml:
  uptime.monitored:
     - polling: 600 # every hour
```

`salt.states.uptime.`**`monitored`**(*name*, ***params*)
Makes sure an URL is monitored by uptime. Checks if URL is already monitored, and if not, adds it.

19.19.252 salt.states.user

Management of user accounts

The user module is used to create and manage user settings, users can be set as either absent or present

```
fred:
  user.present:
    - fullname: Fred Jones
    - shell: /bin/zsh
    - home: /home/fred
    - uid: 4000
    - gid: 4000
    - groups:
      - wheel
      - storage
      - games
```

```
testuser:
  user.absent
```

salt.states.user.**absent**(*name*, *purge=False*, *force=False*)

Ensure that the named user is absent

name The name of the user to remove

purge Set purge to True to delete all of the user's files as well as the user, Default is `False`.

force If the user is logged in, the absent state will fail. Set the force option to True to remove the user even if they are logged in. Not supported in FreeBSD and Solaris, Default is `False`.

salt.states.user.**present**(*name*, *uid=None*, *gid=None*, *gid_from_name=False*, *groups=None*, *optional_groups=None*, *remove_groups=True*, *home=None*, *createhome=True*, *password=None*, *hash_password=False*, *enforce_password=True*, *empty_password=False*, *shell=None*, *unique=True*, *system=False*, *fullname=None*, *roomnumber=None*, *workphone=None*, *homephone=None*, *loginclass=None*, *date=None*, *mindays=None*, *maxdays=None*, *inactdays=None*, *warndays=None*, *expire=None*, *win_homedrive=None*, *win_profile=None*, *win_logonscript=None*, *win_description=None*, *nologinit=False*)

Ensure that the named user is present with the specified properties

name The name of the user to manage

uid The user id to assign, if left empty then the next available user id will be assigned

gid The default group id. Also accepts group name.

gid_from_name If True, the default group id will be set to the id of the group with the same name as the user. If the group does not exist the state will fail. Default is `False`.

groups A list of groups to assign the user to, pass a list object. If a group specified here does not exist on the minion, the state will fail. If set to the empty list, the user will be removed from all groups except the default group. If unset, salt will assume current groups are still wanted (see issue #28706).

optional_groups A list of groups to assign the user to, pass a list object. If a group specified here does not exist on the minion, the state will silently ignore it.

NOTE: If the same group is specified in both ``groups'' and ``optional_groups'', then it will be assumed to be required and not optional.

remove_groups Remove groups that the user is a member of that weren't specified in the state, Default is `True`.

home The custom login directory of user. Uses default value of underlying system if not set. Notice that this directory does not have to exist. This also the location of the home directory to create if createhome is set to True.

createhome [True] If set to `False`, the home directory will not be created if it doesn't already exist.

> **Warning:** Not supported on Windows or Mac OS.
>
> Additionally, parent directories will *not* be created. The parent directory for `home` must already exist.

nologinit [False] If set to `True`, it will not add the user to lastlog and faillog databases.

> **Note:** Not supported on Windows or Mac OS.

password A password hash to set for the user. This field is only supported on Linux, FreeBSD, NetBSD, OpenBSD, and Solaris. If the `empty_password` argument is set to `True` then `password` is ignored. For Windows this is the plain text password. For Linux, the hash can be generated with `openssl passwd -1`.

Changed in version 0.16.0: BSD support added.

hash_password Set to True to hash the clear text password. Default is `False`.
enforce_password Set to False to keep the password from being changed if it has already been set and the password hash differs from what is specified in the ``password'' field. This option will be ignored if ``password'' is not specified, Default is `True`.
empty_password Set to True to enable password-less login for user, Default is `False`.
shell The login shell, defaults to the system default shell
unique Require a unique UID, Default is `True`.
system Choose UID in the range of FIRST_SYSTEM_UID and LAST_SYSTEM_UID, Default is `False`.
loginclass The login class, defaults to empty (BSD only)
User comment field (GECOS) support (currently Linux, BSD, and MacOS only):

The below values should be specified as strings to avoid ambiguities when the values are loaded. (Especially the phone and room number fields which are likely to contain numeric data)
fullname The user's full name
roomnumber The user's room number (not supported in MacOS)
workphone The user's work phone number (not supported in MacOS)
homephone The user's home phone number (not supported in MacOS) If GECOS field contains more than 3 commas, this field will have the rest of `em
Changed in version 2014.7.0: Shadow attribute support added.

Shadow attributes support (currently Linux only):

The below values should be specified as integers.
date Date of last change of password, represented in days since epoch (January 1, 1970).
mindays The minimum number of days between password changes.
maxdays The maximum number of days between password changes.
inactdays The number of days after a password expires before an account is locked.
warndays Number of days prior to maxdays to warn users.
expire Date that account expires, represented in days since epoch (January 1, 1970).
The below parameters apply to windows only:
win_homedrive (Windows Only) The drive letter to use for the home directory. If not specified the home directory will be a unc path. Otherwise the home directory will be mapped to the specified drive. Must be a letter followed by a colon. Because of the colon, the value must be surrounded by single quotes. ie: - win_homedrive: `U:

Changed in version 2015.8.0.
win_profile (Windows Only) The custom profile directory of the user. Uses default value of underlying system if not set.

Changed in version 2015.8.0.
win_logonscript (Windows Only) The full path to the logon script to run when the user logs in.

Changed in version 2015.8.0.
win_description (Windows Only) A brief description of the purpose of the users account.

Changed in version 2015.8.0.

19.19.253 salt.states.vault module

maintainer SaltStack

maturity new

platform all

New in version 2017.7.0.

States for managing Hashicorp Vault. Currently handles policies. Configuration instructions are documented in the execution module docs.

salt.states.vault.**policy_present**(*name*, *rules*)

Ensure a Vault policy with the given name and rules is present.

name The name of the policy

rules Rules formatted as in-line HCL

```
demo-policy:
  vault.policy_present:
    - name: foo/bar
    - rules: |
        path "secret/top-secret/*" {
          policy = "deny"
        }
        path "secret/not-very-secret/*" {
          policy = "write"
        }
```

19.19.254 salt.states.vbox_guest

VirtualBox Guest Additions installer state

salt.states.vbox_guest.**additions_installed**(*name*, *reboot=False*, *upgrade_os=False*)

Ensure that the VirtualBox Guest Additions are installed. Uses the CD, connected by VirtualBox.

name The name has no functional value and is only used as a tracking reference.

reboot [False] Restart OS to complete installation.

upgrade_os [False] Upgrade OS (to ensure the latests version of kernel and developer tools installed).

salt.states.vbox_guest.**additions_removed**(*name*, *force=False*)

Ensure that the VirtualBox Guest Additions are removed. Uses the CD, connected by VirtualBox.

To connect VirtualBox Guest Additions via VirtualBox graphical interface press `Host+D' (`Host' is usually `Right Ctrl').

name The name has no functional value and is only used as a tracking reference.

force Force VirtualBox Guest Additions removing.

salt.states.vbox_guest.**grant_access_to_shared_folders_to**(*name*, *users=None*)

Grant access to auto-mounted shared folders to the users.

User is specified by it's name. To grant access for several users use argument *users*.

name Name of the user to grant access to auto-mounted shared folders to.

users List of names of users to grant access to auto-mounted shared folders to. If specified, *name* will not be taken into account.

19.19.255 salt.states.victorops

Create an Event in VictorOps

New in version 2015.8.0.

This state is useful for creating events on the VictorOps service during state runs.

```
webserver-warning-message:
  victorops.create_event:
    - message_type: 'CRITICAL'
    - entity_id: 'webserver/diskspace'
    - state_message: 'Webserver diskspace is low.'
```

salt.states.victorops.**create_event**(*name*, *message_type*, *routing_key='everyone'*, ***kwargs*)

Create an event on the VictorOps service

```
webserver-warning-message:
  victorops.create_event:
    - message_type: 'CRITICAL'
    - entity_id: 'webserver/diskspace'
    - state_message: 'Webserver diskspace is low.'

database-server-warning-message:
  victorops.create_event:
    - message_type: 'WARNING'
    - entity_id: 'db_server/load'
    - state_message: 'Database Server load is high.'
    - entity_is_host: True
    - entity_display_name: 'dbdserver.example.com'
```

The following parameters are required:

name This is a short description of the event.

message_type One of the following values: INFO, WARNING, ACKNOWLEDGEMENT, CRITICAL, RECOVERY.

The following parameters are optional:

routing_key The key for where messages should be routed. By default, sent to `everyone' route.

entity_id The name of alerting entity. If not provided, a random name will be assigned.

timestamp Timestamp of the alert in seconds since epoch. Defaults to the time the alert is received at VictorOps.

timestamp_fmt The date format for the timestamp parameter. Defaults to `'%Y-%m-%dT%H:%M:%S'.

state_start_time The time this entity entered its current state (seconds since epoch). Defaults to the time alert is received.

state_start_time_fmt The date format for the timestamp parameter. Defaults to `%Y-%m-%dT%H:%M:%S'.

state_message Any additional status information from the alert item.

entity_is_host Used within VictorOps to select the appropriate display format for the incident.

entity_display_name Used within VictorOps to display a human-readable name for the entity.

ack_message A user entered comment for the acknowledgment.

ack_author The user that acknowledged the incident.

19.19.256 salt.states.virt module

Manage virt

For the key certificate this state uses the external pillar in the master to call for the generation and signing of certificates for systems running libvirt:

```
libvirt_keys:
  virt.keys
```

salt.states.virt.**keys**(*name*, *basepath='/etc/pki'*)

Manage libvirt keys.

name The name variable used to track the execution

basepath Defaults to `/etc/pki`, this is the root location used for libvirt keys on the hypervisor

salt.states.virt.**powered_off**(*name*)

Stops a VM by power off.

New in version 2016.3.0.

```
domain_name:
  virt.stopped
```

salt.states.virt.**rebooted**(*name*)

Reboots VMs

New in version 2016.3.0.

Parameters **name** --

Returns

salt.states.virt.**reverted**(*name*, *snapshot=None*, *cleanup=False*)

Deprecated since version 2016.3.0.

Reverts to the particular snapshot.

New in version 2016.3.0.

```
domain_name:
  virt.reverted:
    - cleanup: True

domain_name_1:
  virt.reverted:
    - snapshot: snapshot_name
    - cleanup: False
```

salt.states.virt.**running**(*name*, ***kwargs*)

Starts an existing guest, or defines and starts a new VM with specified arguments.

New in version 2016.3.0.

```
domain_name:
  virt.running
```

```
domain_name:
  virt.running:
    - cpu: 2
    - mem: 2048
    - eth0_mac: 00:00:6a:53:00:e3
```

salt.states.virt.**saved**(*name*, *suffix=None*)

Deprecated since version 2016.3.0: Use *snapshot()* instead.

Takes a snapshot of a particular VM or by a UNIX-style wildcard.

New in version 2016.3.0.

```
domain_name:
  virt.saved:
    - suffix: periodic

domain*:
  virt.saved:
    - suffix: periodic
```

salt.states.virt.**snapshot**(*name*, *suffix=None*)

Takes a snapshot of a particular VM or by a UNIX-style wildcard.

New in version 2016.3.0.

```
domain_name:
  virt.snapshot:
    - suffix: periodic

domain*:
  virt.snapshot:
    - suffix: periodic
```

salt.states.virt.**stopped**(*name*)

Stops a VM by shutting it down nicely.

New in version 2016.3.0.

```
domain_name:
  virt.stopped
```

salt.states.virt.**unpowered**(*name*)

Deprecated since version 2016.3.0: Use `powered_off()` instead.

Stops a VM by power off.

New in version 2016.3.0.

```
domain_name:
  virt.stopped
```

19.19.257 salt.states.virtualenv

Setup of Python virtualenv sandboxes.

New in version 0.17.0.

salt.states.virtualenv_mod.**managed**(*name*, *venv_bin=None*, *requirements=None*, *system_site_packages=False*, *distribute=False*, *use_wheel=False*, *clear=False*, *python=None*, *extra_search_dir=None*, *never_download=None*, *prompt=None*, *user=None*, *cwd=None*, *index_url=None*, *extra_index_url=None*, *pre_releases=False*, *no_deps=False*, *pip_download=None*, *pip_download_cache=None*, *pip_exists_action=None*, *pip_ignore_installed=False*, *proxy=None*, *use_vt=False*, *env_vars=None*, *no_use_wheel=False*, *pip_upgrade=False*, *pip_pkgs=None*, *pip_no_cache_dir=False*, *pip_cache_dir=None*, *process_dependency_links=False*, *no_binary=None*, ***kwargs*)

Create a virtualenv and optionally manage it with pip

name Path to the virtualenv.

requirements: **None** Path to a pip requirements file. If the path begins with `salt://` the file will be transferred from the master file server.

use_wheel: **False** Prefer wheel archives (requires pip >= 1.4).

python [None] Python executable used to build the virtualenv

user: **None** The user under which to run virtualenv and pip.

cwd: **None** Path to the working directory where *pip install* is executed.

no_deps: **False** Pass *--no-deps* to *pip install*.

pip_exists_action: **None** Default action of pip when a path already exists: (s)witch, (i)gnore, (w)ipe, (b)ackup.

proxy: **None** Proxy address which is passed to *pip install*.

env_vars: **None** Set environment variables that some builds will depend on. For example, a Python C-module may have a Makefile that needs INCLUDE_PATH set to pick up a header file while compiling.
no_use_wheel: **False** Force to not use wheel archives (requires pip>=1.4)
no_binary Force to not use binary packages (requires pip >= 7.0.0) Accepts either :all: to disable all binary packages, :none: to empty the set, or a list of one or more packages
pip_upgrade: **False** Pass *--upgrade* to *pip install*.
pip_pkgs: **None** As an alternative to *requirements*, pass a list of pip packages that should be installed.
process_dependency_links: **False** Run pip install with the --process_dependency_links flag.

New in version 2017.7.0.

Also accepts any kwargs that the virtualenv module will. However, some kwargs, such as the `pip` option, require `-distribute: True`.

```
/var/www/myvirtualenv.com:
  virtualenv.managed:
    - system_site_packages: False
    - requirements: salt://REQUIREMENTS.txt
    - env_vars:
        PATH_VAR: '/usr/local/bin/'
```

19.19.258 salt.states.win_certutil module

Installing of certificates to the Windows Certificate Manager

Install certificates to the Windows Certificate Manager

```
salt://certs/cert.cer:
  certutil.add_store:
    - store: TrustedPublisher
```

`salt.states.win_certutil.`**`add_store`**(*name*, *store*, *saltenv='base'*)
Store a certificate to the given store
name The certificate to store, this can use local paths or salt:// paths
store The store to add the certificate to
saltenv The salt environment to use, this is ignored if a local path is specified

`salt.states.win_certutil.`**`del_store`**(*name*, *store*, *saltenv='base'*)
Remove a certificate in the given store
name The certificate to remove, this can use local paths or salt:// paths
store The store to remove the certificate from
saltenv The salt environment to use, this is ignored if a local path is specified

19.19.259 salt.states.win_dacl

Windows Object Access Control Lists

Ensure an ACL is present

parameters: name - the path of the object objectType - Registry/File/Directory user - user account or SID for the ace permission - permission for the ace (see module win_acl for available permissions for each objectType) acetype - Allow/Deny propagation - how the ACL should apply to child objects (see module win_acl for available propagation types)

```
addAcl:
  win_dacl.present:
    - name: HKEY_LOCAL_MACHINE\SOFTWARE\mykey
    - objectType: Registry
    - user: FakeUser
    - permission: FullControl
    - acetype: ALLOW
    - propagation: KEY&SUBKEYS
```

Ensure an ACL does not exist

parameters: name - the path of the object objectType - Registry/File/Directory user - user account or SID for the ace permission - permission for the ace (see module win_acl for available permissions for each objectType) acetype - Allow/Deny propagation - how the ACL should apply to child objects (see module win_acl for available propagation types)

```
removeAcl:
  win_dacl.absent:
    - name: HKEY_LOCAL_MACHINE\SOFTWARE\mykey
    - objectType: Registry
    - user: FakeUser
    - permission: FulLControl
    - acetype: ALLOW
    - propagation: KEY&SUBKEYS
```

Ensure an object is inheriting permissions

parameters: name - the path of the object objectType - Registry/File/Directory clear_existing_acl - True/False - when inheritance is enabled, should the existing ACL be kept or cleared out

```
eInherit:
  win_dacl.enableinheritance:
    - name: HKEY_LOCAL_MACHINE\SOFTWARE\mykey
    - objectType: Registry
    - clear_existing_acl: True
```

Ensure an object is not inheriting permissions

parameters: name - the path of the object objectType - Registry/File/Directory copy_inherited_acl - True/False - if inheritance is enabled, should the inherited permissions be copied to the ACL when inheritance is disabled

```
dInherit:
  win_dacl.disableinheritance:
    - name: HKEY_LOCAL_MACHINE\SOFTWARE\mykey
    - objectType: Registry
    - copy_inherited_acl: False
```

salt.states.win_dacl.**absent**(*name*, *objectType*, *user*, *permission*, *acetype*, *propagation*)
Ensure an ACL does not exist

salt.states.win_dacl.**disinherit**(*name*, *objectType*, *copy_inherited_acl=True*)
Ensure an object is not inheriting ACLs from its parent

salt.states.win_dacl.**inherit**(*name*, *objectType*, *clear_existing_acl=False*)
Ensure an object is inheriting ACLs from its parent

salt.states.win_dacl.**present**(*name*, *objectType*, *user*, *permission*, *acetype*, *propagation*)
Ensure an ACE is present

19.19.260 salt.states.win_dism module

Installing of Windows features using DISM

Install windows features/capabilties with DISM

```
Language.Basic~~~en-US~0.0.1.0:
  dism.capability_installed

NetFx3:
  dism.feature_installed
```

salt.states.win_dism.**capability_installed**(*name*, *source=None*, *limit_access=False*, *image=None*, *restart=False*)

Install a DISM capability

Parameters

- **name** (*str*) -- The capability to install
- **source** (*str*) -- The optional source of the capability
- **limit_access** (*bool*) -- Prevent DISM from contacting Windows Update for online images
- **image** (*Optional[str]*) -- The path to the root directory of an offline Windows image. If *None* is passed, the running operating system is targeted. Default is None.
- **restart** (*Optional[bool]*) -- Reboot the machine if required by the install

Example

Run `dism.available_capabilities` to get a list of available capabilities. This will help you get the proper name to use.

```
install_dotnet35:
  dism.capability_installed:
    - name: NetFX3~~~~
```

salt.states.win_dism.**capability_removed**(*name*, *image=None*, *restart=False*)

Uninstall a DISM capability

Parameters

- **name** (*str*) -- The capability to uninstall
- **image** (*Optional[str]*) -- The path to the root directory of an offline Windows image. If *None* is passed, the running operating system is targeted. Default is None.
- **restart** (*Optional[bool]*) -- Reboot the machine if required by the install

Example

Run `dism.installed_capabilities` to get a list of installed capabilities. This will help you get the proper name to use.

```
remove_dotnet35:
  dism.capability_removed:
    - name: NetFX3~~~~
```

salt.states.win_dism.**feature_installed**(*name*, *package=None*, *source=None*, *limit_access=False*, *enable_parent=False*, *image=None*, *restart=False*)

Install a DISM feature

Parameters

- **name** (*str*) -- The feature in which to install
- **package** (*Optional[str]*) -- The parent package for the feature. You do not have to specify the package if it is the Windows Foundation Package. Otherwise, use package to specify the parent package of the feature
- **source** (*str*) -- The optional source of the feature
- **limit_access** (*bool*) -- Prevent DISM from contacting Windows Update for online images
- **enable_parent** (*Optional[bool]*) -- True will enable all parent features of the specified feature
- **image** (*Optional[str]*) -- The path to the root directory of an offline Windows image. If *None* is passed, the running operating system is targeted. Default is None.
- **restart** (*Optional[bool]*) -- Reboot the machine if required by the install

Example

Run `dism.available_features` to get a list of available features. This will help you get the proper name to use.

```
install_telnet_client:
  dism.feature_installed:
    - name: TelnetClient
```

salt.states.win_dism.**feature_removed**(*name*, *remove_payload=False*, *image=None*, *restart=False*)

Disables a feature.

Parameters

- **name** (*str*) -- The feature to disable
- **remove_payload** (*Optional[bool]*) -- Remove the feature's payload. Must supply source when enabling in the future.
- **image** (*Optional[str]*) -- The path to the root directory of an offline Windows image. If *None* is passed, the running operating system is targeted. Default is None.
- **restart** (*Optional[bool]*) -- Reboot the machine if required by the install

Example

Run `dism.installed_features` to get a list of installed features. This will help you get the proper name to use.

```
remove_telnet_client:
  dism.feature_removed:
    - name: TelnetClient
    - remove_payload: True
```

salt.states.win_dism.**package_installed**(*name*, *ignore_check=False*, *prevent_pending=False*, *image=None*, *restart=False*)

Install a package.

Parameters

- **name** (*str*) -- The package to install. Can be a .cab file, a .msu file, or a folder
- **ignore_check** (*Optional[bool]*) -- Skip installation of the package if the applicability checks fail
- **prevent_pending** (*Optional[bool]*) -- Skip the installation of the package if there are pending online actions

- **image** (*Optional[str]*) -- The path to the root directory of an offline Windows image. If *None* is passed, the running operating system is targeted. Default is None.
- **restart** (*Optional[bool]*) -- Reboot the machine if required by the install

Example

```
install_KB123123123:
  dism.package_installed:
    - name: C:\Packages\KB123123123.cab
```

salt.states.win_dism.**package_removed**(*name*, *image=None*, *restart=False*)

Uninstall a package

Parameters

- **name** (*str*) -- The full path to the package. Can be either a .cab file or a folder. Should point to the original source of the package, not to where the file is installed. This can also be the name of a package as listed in `dism.installed_packages`
- **image** (*Optional[str]*) -- The path to the root directory of an offline Windows image. If *None* is passed, the running operating system is targeted. Default is None.
- **restart** (*Optional[bool]*) -- Reboot the machine if required by the install

Example

```
# Example using source
remove_KB1231231:
  dism.package_installed:
    - name: C:\Packages\KB1231231.cab

# Example using name from ``dism.installed_packages``
remove_KB1231231:
  dism.package_installed:
    - name: Package_for_KB1231231~31bf3856ad364e35~amd64~~10.0.1.3
```

19.19.261 salt.states.win_dns_client

Module for configuring DNS Client on Windows systems

salt.states.win_dns_client.**dns_dhcp**(*name*, *interface='Local Area Connection'*)

Configure the DNS server list from DHCP Server

salt.states.win_dns_client.**dns_exists**(*name*, *servers=None*, *interface='Local Area Connection'*, *replace=False*)

Configure the DNS server list in the specified interface

Example:

```
config_dns_servers:
  win_dns_client.dns_exists:
    - replace: True #remove any servers not in the "servers" list, default is False
    - servers:
      - 8.8.8.8
      - 8.8.8.9
```

salt.states.win_dns_client.**primary_suffix**(*name*, *suffix=None*, *updates=False*)

New in version 2014.7.0.

Configure the global primary DNS suffix of a DHCP client.

suffix [None] The suffix which is advertised for this client when acquiring a DHCP lease When none is set, the explicitly configured DNS suffix will be removed.

updates [False] Allow syncing the DNS suffix with the AD domain when the client's AD domain membership changes

```
primary_dns_suffix:
    win_dns_client.primary_suffix:
        - suffix: sub.domain.tld
        - updates: True
```

19.19.262 salt.states.win_firewall

State for configuring Windows Firewall

salt.states.win_firewall.**add_rule**(*name*, *localport*, *protocol='tcp'*, *action='allow'*, *dir='in'*, *remoteip='any'*)

Add a new inbound or outbound rule to the firewall policy

Parameters

- **name** (*str*) -- The name of the rule. Must be unique and cannot be ``all''. Required.
- **localport** (*int*) -- The port the rule applies to. Must be a number between 0 and 65535. Can be a range. Can specify multiple ports separated by commas. Required.
- **protocol** (*Optional[str]*) -- The protocol. Can be any of the following:
  - A number between 0 and 255
  - icmpv4
  - icmpv6
  - tcp
  - udp
  - any
- **action** (*Optional[str]*) -- The action the rule performs. Can be any of the following:
  - allow
  - block
  - bypass
- **dir** (*Optional[str]*) -- The direction. Can be in or out.
- **remoteip** (*Optional [str]*) -- The remote IP. Can be any of the following:
  - any
  - localsubnet
  - dns
  - dhcp
  - wins
  - defaultgateway
  - Any valid IPv4 address (192.168.0.12)
  - Any valid IPv6 address (2002:9b3b:1a31:4:208:74ff:fe39:6c43)
  - Any valid subnet (192.168.1.0/24)
  - Any valid range of IP addresses (192.168.0.1-192.168.0.12)
  - A list of valid IP addresses

  Can be combinations of the above separated by commas.

  New in version 2016.11.6.

Example:

```
open_smb_port:
  win_firewall.add_rule:
    - name: SMB (445)
    - localport: 445
    - protocol: tcp
    - action: allow
```

salt.states.win_firewall.**disabled**(*name='allprofiles'*)

Disable all the firewall profiles (Windows only)

Parameters **profile** (*Optional[str]*) -- The name of the profile to disable. Default is `all-profiles`. Valid options are:

- allprofiles
- domainprofile
- privateprofile
- publicprofile

Example:

```
# To disable the domain profile
disable_domain:
  win_firewall.disabled:
    - name: domainprofile

# To disable all profiles
disable_all:
  win_firewall.disabled:
    - name: allprofiles
```

salt.states.win_firewall.**enabled**(*name='allprofiles'*)

Enable all the firewall profiles (Windows only)

Parameters **profile** (*Optional[str]*) -- The name of the profile to enable. Default is `all-profiles`. Valid options are:

- allprofiles
- domainprofile
- privateprofile
- publicprofile

Example:

```
# To enable the domain profile
enable_domain:
  win_firewall.enabled:
    - name: domainprofile

# To enable all profiles
enable_all:
  win_firewall.enabled:
    - name: allprofiles
```

19.19.263 salt.states.win_iis module

Microsoft IIS site management

This module provides the ability to add/remove websites and application pools from Microsoft IIS.

New in version 2016.3.0.

salt.states.win_iis.**container_setting**(*name*, *container*, *settings=None*)

Set the value of the setting for an IIS container.

Parameters

- **name** (*str*) -- The name of the IIS container.
- **container** (*str*) -- The type of IIS container. The container types are: AppPools, Sites, SslBindings
- **settings** (*str*) -- A dictionary of the setting names and their values. Example of usage for the AppPools container:

```
site0-apppool-setting:
    win_iis.container_setting:
        - name: site0
        - container: AppPools
        - settings:
            managedPipelineMode: Integrated
            processModel.maxProcesses: 1
            processModel.userName: TestUser
            processModel.password: TestPassword
            processModel.identityType: SpecificUser
```

Example of usage for the Sites container:

```
site0-site-setting:
    win_iis.container_setting:
        - name: site0
        - container: Sites
        - settings:
            logFile.logFormat: W3C
            logFile.period: Daily
            limits.maxUrlSegments: 32
```

salt.states.win_iis.**create_app**(*name*, *site*, *sourcepath*, *apppool=None*)

Create an IIS application.

Parameters

- **name** (*str*) -- The IIS application.
- **site** (*str*) -- The IIS site name.
- **sourcepath** (*str*) -- The physical path.
- **apppool** (*str*) -- The name of the IIS application pool.

Example of usage with only the required arguments:

```
site0-v1-app:
    win_iis.create_app:
        - name: v1
        - site: site0
        - sourcepath: C:\inetpub\site0\v1
```

Example of usage specifying all available arguments:

```
site0-v1-app:
    win_iis.create_app:
        - name: v1
        - site: site0
        - sourcepath: C:\inetpub\site0\v1
        - apppool: site0
```

salt.states.win_iis.**create_apppool**(*name*)

Create an IIS application pool.

Parameters **name** (*str*) -- The name of the IIS application pool.

Usage:

```
site0-apppool:
    win_iis.create_apppool:
        - name: site0
```

salt.states.win_iis.**create_binding**(*name*, *site*, *hostheader=''*, *ipaddress='*'*, *port=80*, *protocol='http'*, *sslflags=0*)

Create an IIS binding.

Parameters

- **site** (*str*) -- The IIS site name.
- **hostheader** (*str*) -- The host header of the binding.
- **ipaddress** (*str*) -- The IP address of the binding.
- **port** (*str*) -- The TCP port of the binding.
- **protocol** (*str*) -- The application protocol of the binding.
- **sslflags** (*str*) -- The flags representing certificate type and storage of the binding.

Example of usage with only the required arguments:

```
site0-https-binding:
    win_iis.create_binding:
        - site: site0
```

Example of usage specifying all available arguments:

```
site0-https-binding:
    win_iis.create_binding:
        - site: site0
        - hostheader: site0.local
        - ipaddress: '*'
        - port: 443
        - protocol: https
        - sslflags: 0
```

salt.states.win_iis.**create_cert_binding**(*name*, *site*, *hostheader=''*, *ipaddress='*'*, *port=443*, *sslflags=0*)

Assign a certificate to an IIS binding.

Parameters

- **name** (*str*) -- The thumbprint of the certificate.
- **site** (*str*) -- The IIS site name.
- **hostheader** (*str*) -- The host header of the binding.
- **ipaddress** (*str*) -- The IP address of the binding.
- **port** (*str*) -- The TCP port of the binding.
- **sslflags** (*str*) -- Flags representing certificate type and certificate storage of the binding.

Example of usage with only the required arguments:

```
site0-cert-binding:
    win_iis.create_cert_binding:
        - name: 998877665544332211000AAABBBCCCDDDEEEFFF
        - site: site0
```

Example of usage specifying all available arguments:

```
site0-cert-binding:
    win_iis.create_cert_binding:
```

```
        - name: 998877665544332211000AAABBBCCCDDDEEEFFF
        - site: site0
        - hostheader: site0.local
        - ipaddress: 192.168.1.199
        - port: 443
        - sslflags: 1
```

New in version 2016.11.0.

salt.states.win_iis.**create_vdir**(*name*, *site*, *sourcepath*, *app='/'*)

Create an IIS virtual directory.

Parameters

- **name** (*str*) -- The virtual directory name.
- **site** (*str*) -- The IIS site name.
- **sourcepath** (*str*) -- The physical path.
- **app** (*str*) -- The IIS application.

Example of usage with only the required arguments:

```
site0-foo-vdir:
    win_iis.create_vdir:
        - name: foo
        - site: site0
        - sourcepath: C:\inetpub\vdirs\foo
```

Example of usage specifying all available arguments:

```
site0-foo-vdir:
    win_iis.create_vdir:
        - name: foo
        - site: site0
        - sourcepath: C:\inetpub\vdirs\foo
        - app: v1
```

salt.states.win_iis.**deployed**(*name*, *sourcepath*, *apppool=''*, *hostheader=''*, *ipaddress='*'*, *port=80*, *protocol='http'*)

Ensure the website has been deployed.

Parameters

- **name** (*str*) -- The IIS site name.
- **sourcepath** (*str*) -- The physical path of the IIS site.
- **apppool** (*str*) -- The name of the IIS application pool.
- **hostheader** (*str*) -- The host header of the binding.
- **ipaddress** (*str*) -- The IP address of the binding.
- **port** (*str*) -- The TCP port of the binding.
- **protocol** (*str*) -- The application protocol of the binding.

Example of usage with only the required arguments. This will default to using the default application pool assigned by IIS:

```
site0-deployed:
    win_iis.deployed:
        - name: site0
        - sourcepath: C:\inetpub\site0
```

Example of usage specifying all available arguments:

```
site0-deployed:
    win_iis.deployed:
        - name: site0
```

```
        - sourcepath: C:\inetpub\site0
        - apppool: site0
        - hostheader: site0.local
        - ipaddress: '*'
        - port: 443
        - protocol: https
```

salt.states.win_iis.**remove_app**(*name*, *site*)

Remove an IIS application.

Parameters

- **name** (*str*) -- The application name.
- **site** (*str*) -- The IIS site name.

Usage:

```
site0-v1-app-remove:
    win_iis.remove_app:
        - name: v1
        - site: site0
```

salt.states.win_iis.**remove_apppool**(*name*)

Remove an IIS application pool.

Parameters **name** (*str*) -- The name of the IIS application pool.

Usage:

```
defaultapppool-remove:
    win_iis.remove_apppool:
        - name: DefaultAppPool
```

salt.states.win_iis.**remove_binding**(*name*, *site*, *hostheader=''*, *ipaddress='*'*, *port=80*)

Remove an IIS binding.

Parameters

- **site** (*str*) -- The IIS site name.
- **hostheader** (*str*) -- The host header of the binding.
- **ipaddress** (*str*) -- The IP address of the binding.
- **port** (*str*) -- The TCP port of the binding.

Example of usage with only the required arguments:

```
site0-https-binding-remove:
    win_iis.remove_binding:
        - site: site0
```

Example of usage specifying all available arguments:

```
site0-https-binding-remove:
    win_iis.remove_binding:
        - site: site0
        - hostheader: site0.local
        - ipaddress: '*'
        - port: 443
```

salt.states.win_iis.**remove_cert_binding**(*name*, *site*, *hostheader=''*, *ipaddress='*'*, *port=443*)

Remove a certificate from an IIS binding.

Parameters

- **name** (*str*) -- The thumbprint of the certificate.
- **site** (*str*) -- The IIS site name.
- **hostheader** (*str*) -- The host header of the binding.

- **ipaddress** (*str*) -- The IP address of the binding.
- **port** (*str*) -- The TCP port of the binding.

Example of usage with only the required arguments:

```
site0-cert-binding-remove:
    win_iis.remove_cert_binding:
        - name: 9988776655443322111000AAABBBCCCDDDEEEFFF
        - site: site0
```

Example of usage specifying all available arguments:

```
site0-cert-binding-remove:
    win_iis.remove_cert_binding:
        - name: 9988776655443322111000AAABBBCCCDDDEEEFFF
        - site: site0
        - hostheader: site0.local
        - ipaddress: 192.168.1.199
        - port: 443
```

New in version 2016.11.0.

salt.states.win_iis.**remove_site**(*name*)

Delete a website from IIS.

Parameters **name** (*str*) -- The IIS site name.

Usage:

```
defaultwebsite-remove:
    win_iis.remove_site:
        - name: Default Web Site
```

salt.states.win_iis.**remove_vdir**(*name*, *site*, *app='/'*)

Remove an IIS virtual directory.

Parameters

- **name** (*str*) -- The virtual directory name.
- **site** (*str*) -- The IIS site name.
- **app** (*str*) -- The IIS application.

Example of usage with only the required arguments:

```
site0-foo-vdir-remove:
    win_iis.remove_vdir:
        - name: foo
        - site: site0
```

Example of usage specifying all available arguments:

```
site0-foo-vdir-remove:
    win_iis.remove_vdir:
        - name: foo
        - site: site0
        - app: v1
```

salt.states.win_iis.**set_app**(*name*, *site*, *settings=None*)

New in version 2017.7.0.

Set the value of the setting for an IIS web application.

Note: This function only configures existing app. Params are case sensitive.

Parameters

- **name** (*str*) -- The IIS application.
- **site** (*str*) -- The IIS site name.
- **settings** (*str*) -- A dictionary of the setting names and their values.

Available settings:

•`physicalPath` - The physical path of the webapp
•`applicationPool` - The application pool for the webapp
•`userName` ``connectAs'' user
•`password` ``connectAs'' password for user

Return type bool

Example of usage:

```
site0-webapp-setting:
    win_iis.set_app:
        - name: app0
        - site: Default Web Site
        - settings:
            userName: domain\user
            password: pass
            physicalPath: c:\inetpub\wwwroot
            applicationPool: appPool0
```

19.19.264 salt.states.win_lgpo module

Manage Windows Local Group Policy

New in version 2016.11.0.

This state allows configuring local Windows Group Policy

The state can be used to ensure the setting of a single policy or multiple policies in one pass.

Single policies must specify the policy name, the setting, and the policy class (Machine/User/Both)

Example single policy configuration

```
Ensure Account Lockout Duration:
  lgpo.set:
    - name: Account lockout duration
    - setting: 90
    - policy_class: Machine
```

```
Account lockout duration:
  gpo.set:
    - setting: 120
    - policy_class: Machine
```

Multiple policy configuration

```
Company Local Group Policy:
    lgpo.set:
        - computer_policy:
            Deny logon locally: Guest
            Account lockout duration: 120
            Account lockout threshold: 10
```

```
            Reset account lockout counter after: 1440
            Enforce password history: 24
            Maximum password age: 60
            Minimum password age: 1
            Minimum password length: 14
            Password must meet complexity requirements: Enabled
            Store passwords using reversible encryption: Disabled
            Configure Automatic Updates:
                Configure automatic updating: 4 - Auto download and schedule the intsall
                 Scheduled install day: 7 - Every Saturday
                 Scheduled install time: 17:00
            Specify intranet Microsoft update service location:
                Set the intranet update service for detecting updates: http://mywsus
                Set the intranet statistics server: http://mywsus
        - user_policy:
            Do not process the legacy run list: Enabled
```

```
server_policy:
  lgpo.set:
    - computer_policy:
        Maximum password age: 60
        Minimum password age: 1
        Minimum password length: 14
        Account lockout duration: 1440
        Account lockout threshold: 10
        Reset account lockout counter after: 1440
        Manage auditing and security log:
          - "BUILTIN\Administrators"
        Replace a process level token:
          - "NT AUTHORITY\NETWORK SERVICE"
          - "NT AUTHORITY\LOCAL SERVICE"
        "Accounts: Guest account status": Disabled
        "Accounts: Rename guest account": Not_4_U
        "Audit: Audit the use of Backup and Restore privilege": Enabled
        "Interactive logon: Do not display last user name": Enabled
        "Network\DNS Client\Dynamic update": Disabled
        "System\Logon\Do not display the Getting Started welcome screen at logon":
↪Enabled
        "Windows Components\Remote Desktop Services\Remote Desktop Session
↪Host\Connections\Select RDP transport protocols":
            "Select Transport Type": "Use both UDP and TCP"
        "Windows Components\Windows Update\Allow Automatic Updates immediate
↪installation": Enabled
        "Windows Components\Windows Update\Allow non-administrators to receive update
↪notifications": Disabled
        "Windows Components\Windows Update\Always automatically restart at the
↪scheduled time":
            "The restart timer will give users this much time to save their work
↪(minutes)": 15
        "Windows Components\Windows Update\Automatic Updates detection frequency":
            "Check for updates at the following interval (hours)": 1
        "Windows Components\Windows Update\Configure Automatic Updates":
            "Configure automatic updating": 4 - Auto download and schedule the install
            "Install during automatic maintenance": False
            "Scheduled install day": 7 - Every Saturday
            "Scheduled install time": "17:00"
        "Windows Components\Windows Update\Delay Restart for scheduled installations":
            "Wait the following period before proceeding with a scheduled restart
↪(minutes)": 1
```

```
        "Windows Components\Windows Update\No auto-restart with logged on users for
↪scheduled automatic updates installations": Disabled
        "Windows Components\Windows Update\Re-prompt for restart with scheduled
↪installations":
            "Wait the following period before prompting again with a scheduled restart
↪(minutes)": 30
        "Windows Components\Windows Update\Reschedule Automatic Updates scheduled
↪installations": Disabled
        "Windows Components\Windows Update\Specify intranet Microsoft update service
↪location":
            "Set the intranet update service for detecting updates": http://mywsus
            "Set the intranet statistics server": http://mywsus
    - cumulative_rights_assignments: True
```

salt.states.win_lgpo.**set**(*name*, *setting=None*, *policy_class=None*, *computer_policy=None*, *user_policy=None*, *cumulative_rights_assignments=True*, *adml_language='en-US'*)

Ensure the specified policy is set

name the name of a single policy to configure

setting the configuration setting for the single named policy if this argument is used the computer_policy/user_policy arguments will be ignored

policy_class the policy class of the single named policy to configure this can ``machine'', ``user'', or ``both''

computer_policy a dict of policyname: value pairs of a set of computer policies to configure if this argument is used, the name/setting/policy_class arguments will be ignored

user_policy a dict of policyname: value pairs of a set of user policies to configure if this argument is used, the name/setting/policy_class arguments will be ignored

cumulative_rights_assignments determine if any user right assignment policies specified will be cumulative or explicit

adml_language the adml language to use for AMDX policy data/display conversions

19.19.265 salt.states.win_license module

Installation and activation of windows licenses

Install and activate windows licenses

```
XXXXX-XXXXX-XXXXX-XXXXX-XXXXX:
  license.activate
```

salt.states.win_license.**activate**(*name*)

Install and activate the given product key

name The 5x5 product key given to you by Microsoft

19.19.266 salt.states.win_network

Configuration of network interfaces on Windows hosts

New in version 2014.1.0.

This module provides the `network` state(s) on Windows hosts. DNS servers, IP addresses and default gateways can currently be managed.

Below is an example of the configuration for an interface that uses DHCP for both DNS servers and IP addresses:

```
Local Area Connection #2:
  network.managed:
    - dns_proto: dhcp
    - ip_proto: dhcp
```

Note: Both the `dns_proto` and `ip_proto` arguments are required.

Static DNS and IP addresses can be configured like so:

```
Local Area Connection #2:
  network.managed:
    - dns_proto: static
    - dns_servers:
      - 8.8.8.8
      - 8.8.4.4
    - ip_proto: static
    - ip_addrs:
      - 10.2.3.4/24
```

Note: IP addresses are specified using the format `<ip-address>/<subnet-length>`. Salt provides a convenience function called *ip.get_subnet_length* to calculate the subnet length from a netmask.

Optionally, if you are setting a static IP address, you can also specify the default gateway using the `gateway` parameter:

```
Local Area Connection #2:
  network.managed:
    - dns_proto: static
    - dns_servers:
      - 8.8.8.8
      - 8.8.4.4
    - ip_proto: static
    - ip_addrs:
      - 10.2.3.4/24
    - gateway: 10.2.3.1
```

salt.states.win_network.**managed**(*name*, *dns_proto=None*, *dns_servers=None*, *ip_proto=None*, *ip_addrs=None*, *gateway=None*, *enabled=True*, ***kwargs*)

Ensure that the named interface is configured properly.

name The name of the interface to manage

dns_proto [None] Set to `static` and use the `dns_servers` parameter to provide a list of DNS nameservers. set to `dhcp` to use DHCP to get the DNS servers.

dns_servers [None] A list of static DNS servers.

ip_proto [None] Set to `static` and use the `ip_addrs` and (optionally) `gateway` parameters to provide a list of static IP addresses and the default gateway. Set to `dhcp` to use DHCP.

ip_addrs [None] A list of static IP addresses.

gateway [None] A list of static IP addresses.

enabled [True] Set to `False` to ensure that this interface is disabled.

19.19.267 salt.states.win_path

Manage the Windows System PATH

salt.states.win_path.**absent**(*name*)

Remove the directory from the SYSTEM path

index: where the directory should be placed in the PATH (default: 0)

Example:

```
'C:\sysinternals':
  win_path.absent
```

salt.states.win_path.**exists**(*name*, *index=None*)

Add the directory to the system PATH at index location

index: where the directory should be placed in the PATH (default: None). This is 0-indexed, so 0 means to prepend at the very start of the PATH. [Note: Providing no index will append directory to PATH and will not enforce its location within the PATH.]

Example:

```
'C:\python27':
  win_path.exists

'C:\sysinternals':
  win_path.exists:
    - index: 0
```

19.19.268 salt.states.win_pki module

Microsoft certificate management via the Pki PowerShell module.

platform Windows

New in version 2016.11.0.

salt.states.win_pki.**import_cert**(*name*, *cert_format='cer'*, *context='LocalMachine'*, *store='My'*, *exportable=True*, *password=''*, *saltenv='base'*)

Import the certificate file into the given certificate store.

Parameters

- **name** (*str*) -- The path of the certificate file to import.
- **cert_format** (*str*) -- The certificate format. Specify `cer' for X.509, or `pfx' for PKCS #12.
- **context** (*str*) -- The name of the certificate store location context.
- **store** (*str*) -- The name of the certificate store.
- **exportable** (*bool*) -- Mark the certificate as exportable. Only applicable to pfx format.
- **password** (*str*) -- The password of the certificate. Only applicable to pfx format.
- **saltenv** (*str*) -- The environment the file resides in.

Example of usage with only the required arguments:

```
site0-cert-imported:
    win_pki.import_cert:
        - name: salt://win/webserver/certs/site0.cer
```

Example of usage specifying all available arguments:

```
site0-cert-imported:
    win_pki.import_cert:
        - name: salt://win/webserver/certs/site0.pfx
```

```
        - cert_format: pfx
        - context: LocalMachine
        - store: My
        - exportable: True
        - password: TestPassword
        - saltenv: base
```

salt.states.win_pki.**remove_cert**(*name*, *thumbprint*, *context='LocalMachine'*, *store='My'*)

Remove the certificate from the given certificate store.

Parameters

- **thumbprint** (*str*) -- The thumbprint value of the target certificate.
- **context** (*str*) -- The name of the certificate store location context.
- **store** (*str*) -- The name of the certificate store.

Example of usage with only the required arguments:

```
site0-cert-removed:
    win_pki.remove_cert:
        - thumbprint: 9988776655443322111000AAABBBCCCDDDEEEFFF
```

Example of usage specifying all available arguments:

```
site0-cert-removed:
    win_pki.remove_cert:
        - thumbprint: 9988776655443322111000AAABBBCCCDDDEEEFFF
        - context: LocalMachine
        - store: My
```

19.19.269 salt.states.win_powercfg

This module allows you to control the power settings of a windows minion via powercfg.

New in version 2015.8.0.

```
monitor:
    powercfg.set_timeout:
        - value: 30
        - power: dc
```

salt.states.win_powercfg.**set_timeout**(*name*, *value*, *power='ac'*, *scheme=None*)

Set the sleep timeouts of specific items such as disk, monitor.

CLI Example:

```
monitor:
    powercfg.set_timeout:
        - value: 30
        - power: dc

disk:
    powercfg.set_timeout:
        - value: 12
        - power: ac
```

name The setting to change, can be one of the following: monitor, disk, standby, hibernate
timeout The amount of time in minutes before the item will timeout i.e the monitor
power Should we set the value for AC or DC (battery)? Valid options ac,dc.

scheme The scheme to use, leave as None to use the current.

19.19.270 salt.states.win_servermanager

Manage Windows features via the ServerManager powershell module

salt.states.win_servermanager.**installed**(*name*, *recurse=False*, *force=False*, *restart=False*, *source=None*, *exclude=None*)

Install the windows feature

Parameters

- **name** (*str*) -- Short name of the feature (the right column in win_servermanager.list_available)
- **recurse** (*Optional[bool]*) -- install all sub-features as well
- **force** (*Optional[bool]*) -- if the feature is installed but one of its sub-features are not installed set this to True to force the installation of the sub-features
- **source** (*Optional[str]*) -- Path to the source files if missing from the target system. None means that the system will use windows update services to find the required files. Default is None
- **restart** (*Optional[bool]*) -- Restarts the computer when installation is complete, if required by the role/feature installed. Default is False
- **exclude** (*Optional[str]*) -- The name of the feature to exclude when installing the named feature.

restart: Restarts the computer when installation is complete, if restarting is required by the role feature installed.

Note: Some features require reboot after un/installation. If so, until the server is restarted other features can not be installed!

Example

Run `salt MinionName win_servermanager.list_available` to get a list of available roles and features. Use the name in the right column. Do not use the role or feature names mentioned in the PKGMGR documentation. In this example for IIS-WebServerRole the name to be used is Web-Server.

```
ISWebserverRole:
  win_servermanager.installed:
    - force: True
    - recurse: True
    - name: Web-Server
```

salt.states.win_servermanager.**removed**(*name*, *remove_payload=False*, *restart=False*)

Remove the windows feature

Parameters

- **name** (*str*) -- Short name of the feature (the right column in win_servermanager.list_available)
- **remove_payload** (*Optional[bool]*) -- True will case the feature to be removed from the side-by-side store
- **restart** (*Optional[bool]*) -- Restarts the computer when uninstall is complete, if required by the role/feature removed. Default is False

Note: Some features require a reboot after uninstallation. If so the feature will not be completely uninstalled until the server is restarted.

Example

Run `salt MinionName win_servermanager.list_installed` to get a list of all features installed. Use the top name listed for each feature, not the indented one. Do not use the role or feature names mentioned in the PKGMGR documentation.

```
ISWebserverRole:
  win_servermanager.removed:
    - name: Web-Server
```

19.19.271 salt.states.win_smtp_server module

Module for managing IIS SMTP server configuration on Windows servers.

`salt.states.win_smtp_server.`**`active_log_format`**(*name*, *log_format*, *server='SmtpSvc/1'*)

Manage the active log format for the SMTP server.

Parameters

- **`log_format`** (*str*) -- The log format name.
- **`server`** (*str*) -- The SMTP server name.

Example of usage:

```
smtp-log-format:
    win_smtp_server.active_log_format:
        - log_format: Microsoft IIS Log File Format
```

`salt.states.win_smtp_server.`**`connection_ip_list`**(*name*, *addresses=None*, *grant_by_default=False*, *server='SmtpSvc/1'*)

Manage IP list for SMTP connections.

Parameters

- **`addresses`** (*str*) -- A dictionary of IP + subnet pairs.
- **`grant_by_default`** (*bool*) -- Whether the addresses should be a blacklist or whitelist.
- **`server`** (*str*) -- The SMTP server name.

Example of usage for creating a whitelist:

```
smtp-connection-whitelist:
    win_smtp_server.connection_ip_list:
        - addresses:
            127.0.0.1: 255.255.255.255
            172.16.1.98: 255.255.255.255
            172.16.1.99: 255.255.255.255
        - grant_by_default: False
```

Example of usage for creating a blacklist:

```
smtp-connection-blacklist:
    win_smtp_server.connection_ip_list:
        - addresses:
```

```
            172.16.1.100: 255.255.255.255
            172.16.1.101: 255.255.255.255
        - grant_by_default: True
```

Example of usage for allowing any source to connect:

```
smtp-connection-blacklist:
    win_smtp_server.connection_ip_list:
        - addresses: {}
        - grant_by_default: True
```

salt.states.win_smtp_server.**relay_ip_list**(*name*, *addresses=None*, *server='SmtpSvc/1'*)

Manage IP list for SMTP relay connections.

Due to the unusual way that Windows stores the relay IPs, it is advisable to retrieve the existing list you wish to set from a pre-configured server.

For example, setting `127.0.0.1' as an allowed relay IP through the GUI would generate an actual relay IP list similar to the following:

```
['24.0.0.128', '32.0.0.128', '60.0.0.128', '68.0.0.128', '1.0.0.0', '76.0.0.0',
  '0.0.0.0', '0.0.0.0', '1.0.0.0', '1.0.0.0', '2.0.0.0', '2.0.0.0', '4.0.0.0',
  '0.0.0.0', '76.0.0.128', '0.0.0.0', '0.0.0.0', '0.0.0.0', '0.0.0.0',
  '255.255.255.255', '127.0.0.1']
```

Note: Setting the list to None corresponds to the restrictive `Only the list below' GUI parameter with an empty access list configured, and setting an empty list/tuple corresponds to the more permissive `All except the list below' GUI parameter.

Parameters

- **addresses** (*str*) -- A list of the relay IPs. The order of the list is important.
- **server** (*str*) -- The SMTP server name.

Example of usage:

```
smtp-relay-list:
  win_smtp_server.relay_ip_list:
    - addresses:
        - 24.0.0.128
        - 32.0.0.128
        - 60.0.0.128
        - 1.0.0.0
        - 76.0.0.0
        - 0.0.0.0
        - 0.0.0.0
        - 1.0.0.0
        - 1.0.0.0
        - 2.0.0.0
        - 2.0.0.0
        - 4.0.0.0
        - 0.0.0.0
        - 76.0.0.128
        - 0.0.0.0
        - 0.0.0.0
        - 0.0.0.0
        - 0.0.0.0
```

```
        - 255.255.255.255
        - 127.0.0.1
```

Example of usage for disabling relaying:

```
smtp-relay-list:
    win_smtp_server.relay_ip_list:
        - addresses: None
```

Example of usage for allowing relaying from any source:

```
smtp-relay-list:
    win_smtp_server.relay_ip_list:
        - addresses: []
```

salt.states.win_smtp_server.**server_setting**(*name*, *settings=None*, *server='SmtpSvc/1'*)

Ensure the value is set for the specified setting.

Note: The setting names are case-sensitive.

Parameters

- **settings** (*str*) -- A dictionary of the setting names and their values.
- **server** (*str*) -- The SMTP server name.

Example of usage:

```
smtp-settings:
    win_smtp_server.server_setting:
        - settings:
            LogType: 1
            LogFilePeriod: 1
            MaxMessageSize: 16777216
            MaxRecipients: 10000
            MaxSessionSize: 16777216
```

19.19.272 salt.states.win_snmp module

Module for managing SNMP service settings on Windows servers.

salt.states.win_snmp.**agent_settings**(*name*, *contact*, *location*, *services=None*)

Manage the SNMP sysContact, sysLocation, and sysServices settings.

Parameters

- **contact** (*str*) -- The SNMP contact.
- **location** (*str*) -- The SNMP location.
- **services** (*str*) -- A list of selected services.

Example of usage:

```
snmp-agent-settings:
    win_snmp.agent_settings:
        - contact: Test Contact
        - location: Test Location
        - services:
            - Physical
            - Internet
```

salt.states.win_snmp.**auth_traps_enabled**(*name*, *status=True*)

Manage the sending of authentication traps.

Parameters **status** (*bool*) -- The enabled status.

Example of usage:

```
snmp-auth-traps:
    win_snmp.auth_traps_enabled:
        - status: True
```

salt.states.win_snmp.**community_names**(*name*, *communities=None*)

Manage the SNMP accepted community names and their permissions.

Parameters **communities** (*str*) -- A dictionary of SNMP communities and permissions.

Example of usage:

```
snmp-community-names:
    win_snmp.community_names:
        - communities:
            TestCommunity: Read Only
            OtherCommunity: Read Write
```

19.19.273 salt.states.win_system

Management of Windows system information

New in version 2014.1.0.

This state is used to manage system information such as the computer name and description.

```
ERIK-WORKSTATION:
  system.computer_name: []

This is Erik's computer, don't touch!:
  system.computer_desc: []
```

salt.states.win_system.**computer_desc**(*name*)

Manage the computer's description field

name The desired computer description

salt.states.win_system.**computer_name**(*name*)

Manage the computer's name

name The desired computer name

salt.states.win_system.**hostname**(*name*)

New in version 2016.3.0.

Manage the hostname of the computer

name The hostname to set

salt.states.win_system.**join_domain**(*name*, *username=None*, *password=None*, *account_ou=None*, *account_exists=False*, *restart=False*)

Checks if a computer is joined to the Domain. If the computer is not in the Domain, it will be joined.

name: The name of the Domain.

username: Username of an account which is authorized to join computers to the specified domain. Need to be either fully qualified like user@domain.tld or simply user.

password: Password of the account to add the computer to the Domain.

account_ou: The DN of the OU below which the account for this computer should be created when joining the domain, e.g. ou=computers,ou=departm_432,dc=my-company,dc=com.

account_exists: Needs to be set to True to allow re-using an existing computer account.
restart: Needs to be set to True to restart the computer after a successful join.

salt.states.win_system.**reboot**(*name*, *message=None*, *timeout=5*, *force_close=True*, *in_seconds=False*, *only_on_pending_reboot=True*)

Reboot the computer

Parameters

- **message** (*str*) -- An optional message to display to users. It will also be used as a comment in the event log entry.

  The default value is None.
- **timeout** (*int*) -- The number of minutes or seconds before a reboot will occur. Whether this number represents minutes or seconds depends on the value of `in_seconds`.

  The default value is 5.
- **in_seconds** (*bool*) -- If this is True, the value of `timeout` will be treated as a number of seconds. If this is False, the value of `timeout` will be treated as a number of minutes.

  The default value is False.
- **force_close** (*bool*) -- If this is True, running applications will be forced to close without warning. If this is False, running applications will not get the opportunity to prompt users about unsaved data.

  The default value is True.
- **only_on_pending_reboot** (*bool*) -- If this is True, the reboot will only occur if the system reports a pending reboot. If this is False, the reboot will always occur.

  The default value is True.

salt.states.win_system.**shutdown**(*name*, *message=None*, *timeout=5*, *force_close=True*, *reboot=False*, *in_seconds=False*, *only_on_pending_reboot=False*)

Shutdown the computer

Parameters

- **message** (*str*) -- An optional message to display to users. It will also be used as a comment in the event log entry.

  The default value is None.
- **timeout** (*int*) -- The number of minutes or seconds before a shutdown will occur. Whether this number represents minutes or seconds depends on the value of `in_seconds`.

  The default value is 5.
- **in_seconds** (*bool*) -- If this is True, the value of `timeout` will be treated as a number of seconds. If this is False, the value of `timeout` will be treated as a number of minutes.

  The default value is False.
- **force_close** (*bool*) -- If this is True, running applications will be forced to close without warning. If this is False, running applications will not get the opportunity to prompt users about unsaved data.

  The default value is True.
- **reboot** (*bool*) -- If this is True, the computer will restart immediately after shutting down. If False the system flushes all caches to disk and safely powers down the system.

  The default value is False.

- **only_on_pending_reboot** (*bool*) -- If this is True, the shutdown will only occur if the system reports a pending reboot. If this is False, the shutdown will always occur.

  The default value is False.

19.19.274 salt.states.win_update

Management of the windows update agent

This module is being deprecated and will be removed in Salt Fluorine. Please use the `win_wua` state module instead.

New in version 2014.7.0.

Set windows updates to run by category. Default behavior is to install all updates that do not require user interaction to complete.

Optionally set `category` to a category of your choice to only install certain updates. Default is to set to install all available updates.

The following example will install all Security and Critical Updates, and download but not install standard updates.

```
updates:
  win_update.installed:
    - categories:
      - 'Critical Updates'
      - 'Security Updates'
    - skips:
      - downloaded
  win_update.downloaded:
    - categories:
      - 'Updates'
    - skips:
      - downloaded
```

You can also specify a number of features about the update to have a fine grain approach to specific types of updates. These are the following features/states of updates available for configuring:

```
'UI' - User interaction required, skipped by default
'downloaded' - Already downloaded, included by default
'present' - Present on computer, skipped by default
'installed' - Already installed, skipped by default
'reboot' - Reboot required, included by default
'hidden' - Skip updates that have been hidden, skipped by default
'software' - Software updates, included by default
'driver' - driver updates, included by default
```

The following example installs all driver updates that don't require a reboot: .. code-block:: yaml

gryffindor:

win_update.installed:

- skips: - driver: True - software: False - reboot: False

To just update your windows machine, add this your sls:

```
updates:
  win_update.installed
```

salt.states.win_update.**downloaded**(*name*, *categories=None*, *skips=None*, *retries=10*)

Cache updates for later install.

name: if categories is left empty, it will be assumed that you are passing the category option through the name. These are separate because you can only have one name, but can have multiple categories.

categories: the list of categories to be downloaded. These are simply strings in the update's information, so there is no enumeration of the categories available. Some known categories:

```
Updates
Windows 7
Critical Updates
Security Updates
Update Rollups
```

skips: a list of features of the updates to cull by. Available features:

```
'UI' - User interaction required, skipped by default
'downloaded' - Already downloaded, skipped by default (downloading)
'present' - Present on computer, included by default (installing)
'installed' - Already installed, skipped by default
'reboot' - Reboot required, included by default
'hidden' - skip those updates that have been hidden.
'software' - Software updates, included by default
'driver' - driver updates, skipped by default
```

retries Number of retries to make before giving up. This is total, not per step.

salt.states.win_update.**installed**(*name*, *categories=None*, *skips=None*, *retries=10*)

Install specified windows updates.

name: if categories is left empty, it will be assumed that you are passing the category option through the name. These are separate because you can only have one name, but can have multiple categories.

categories: the list of categories to be downloaded. These are simply strings in the update's information, so there is no enumeration of the categories available. Some known categories:

```
Updates
Windows 7
Critical Updates
Security Updates
Update Rollups
```

skips: a list of features of the updates to cull by. Available features:

```
'UI' - User interaction required, skipped by default
'downloaded' - Already downloaded, skipped by default (downloading)
'present' - Present on computer, included by default (installing)
'installed' - Already installed, skipped by default
'reboot' - Reboot required, included by default
'hidden' - skip those updates that have been hidden.
'software' - Software updates, included by default
'driver' - driver updates, skipped by default
```

retries Number of retries to make before giving up. This is total, not per step.

19.19.275 salt.states.win_wua module

Installation of Windows Updates using the Windows Update Agent

New in version 2017.7.0.

Salt can manage Windows updates via the ``wua'' state module. Updates can be installed and removed. Update management declarations are as follows:

For installation:

```
# Install a single update using the KB
KB3194343:
  wua.installed

# Install a single update using the name parameter
install_update:
  wua.installed:
    - name: KB3194343

# Install multiple updates using the updates parameter and a combination of
# KB number and GUID
install_updates:
  wua.installed:
   - updates:
     - KB3194343
     - bb1dbb26-3fb6-45fd-bb05-e3c8e379195c
```

For removal:

```
# Remove a single update using the KB
KB3194343:
  wua.removed

# Remove a single update using the name parameter
remove_update:
  wua.removed:
    - name: KB3194343

# Remove multiple updates using the updates parameter and a combination of
# KB number and GUID
remove_updates:
  wua.removed:
   - updates:
     - KB3194343
     - bb1dbb26-3fb6-45fd-bb05-e3c8e379195c
```

salt.states.win_wua.**installed**(*name*, *updates=None*)

Ensure Microsoft Updates are installed. Updates will be downloaded if needed.

Parameters

- **name** (*str*) -- The identifier of a single update to install.
- **updates** (list) -- A list of identifiers for updates to be installed.
- **name. Default is None.** (*Overrides*) --

Note: Identifiers can be the GUID, the KB number, or any part of the Title of the Microsoft update. GUIDs and KBs are the preferred method to ensure you're installing the correct update.

Warning: Using a partial KB number or a partial Title could result in more than one update being installed.

Returns A dictionary containing the results of the update

Return type dict

CLI Example:

```
# using a GUID
install_update:
  wua.installed:
    - name: 28cf1b09-2b1a-458c-9bd1-971d1b26b211

# using a KB
install_update:
  wua.installed:
    - name: KB3194343

# using the full Title
install_update:
  wua.installed:
    - name: Security Update for Adobe Flash Player for Windows 10 Version 1607
 ↪(for x64-based Systems) (KB3194343)

# Install multiple updates
install_updates:
  wua.installed:
    - name:
      - KB3194343
      - 28cf1b09-2b1a-458c-9bd1-971d1b26b211
```

salt.states.win_wua.**removed**(*name*, *updates=None*)

Ensure Microsoft Updates are uninstalled.

Parameters

- **name** (*str*) -- The identifier of a single update to uninstall.
- **updates** (list) -- A list of identifiers for updates to be removed.
- **name. Default is None.** (*Overrides*) --

Note: Identifiers can be the GUID, the KB number, or any part of the Title of the Microsoft update. GUIDs and KBs are the preferred method to ensure you're uninstalling the correct update.

Warning: Using a partial KB number or a partial Title could result in more than one update being removed.

Returns A dictionary containing the results of the removal

Return type dict

CLI Example:

```
# using a GUID
uninstall_update:
  wua.removed:
    - name: 28cf1b09-2b1a-458c-9bd1-971d1b26b211

# using a KB
uninstall_update:
  wua.removed:
    - name: KB3194343

# using the full Title
uninstall_update:
  wua.removed:
    - name: Security Update for Adobe Flash Player for Windows 10 Version 1607
 ↪(for x64-based Systems) (KB3194343)
```

```
# Install multiple updates
uninstall_updates:
  wua.removed:
    - updates:
      - KB3194343
      - 28cf1b09-2b1a-458c-9bd1-971d1b26b211
```

19.19.276 salt.states.winrepo

Manage Windows Package Repository

`salt.states.winrepo.`**`genrepo`**(*name*, *force=False*, *allow_empty=False*)

Refresh the winrepo.p file of the repository (salt-run winrepo.genrepo)

If `force` is `True` no checks will be made and the repository will be generated if `allow_empty` is `True` then the state will not return an error if there are 0 packages,

Note: This state only loads on minions that have the `roles: salt-master` grain set.

Example:

```
winrepo:
  winrepo.genrepo
```

19.19.277 salt.states.x509

Manage X509 Certificates

New in version 2015.8.0.

depends M2Crypto

This module can enable managing a complete PKI infrastructure including creating private keys, CA's, certificates and CRLs. It includes the ability to generate a private key on a server, and have the corresponding public key sent to a remote CA to create a CA signed certificate. This can be done in a secure manner, where private keys are always generated locally and never moved across the network.

Here is a simple example scenario. In this example `ca` is the ca server, and `www` is a web server that needs a certificate signed by `ca`.

For remote signing, peers must be permitted to remotely call the *`sign_remote_certificate`* function.

/etc/salt/master.d/peer.conf

```
peer:
  .*:
    - x509.sign_remote_certificate
```

/srv/salt/top.sls

```
base:
  '*':
    - cert
  'ca':
```

```
    - ca
  'www':
    - www
```

This state creates the CA key, certificate and signing policy. It also publishes the certificate to the mine where it can be easily retrieved by other minions.

/srv/salt/ca.sls

```
salt-minion:
  service.running:
    - enable: True
    - listen:
      - file: /etc/salt/minion.d/signing_policies.conf

/etc/salt/minion.d/signing_policies.conf:
  file.managed:
    - source: salt://signing_policies.conf

/etc/pki:
  file.directory

/etc/pki/issued_certs:
  file.directory

/etc/pki/ca.crt:
  x509.certificate_managed:
    - signing_private_key: /etc/pki/ca.key
    - CN: ca.example.com
    - C: US
    - ST: Utah
    - L: Salt Lake City
    - basicConstraints: "critical CA:true"
    - keyUsage: "critical cRLSign, keyCertSign"
    - subjectKeyIdentifier: hash
    - authorityKeyIdentifier: keyid,issuer:always
    - days_valid: 3650
    - days_remaining: 0
    - backup: True
    - managed_private_key:
        name: /etc/pki/ca.key
        bits: 4096
        backup: True
    - require:
      - file: /etc/pki

mine.send:
  module.run:
    - func: x509.get_pem_entries
    - kwargs:
        glob_path: /etc/pki/ca.crt
    - onchanges:
      - x509: /etc/pki/ca.crt
```

The signing policy defines properties that override any property requested or included in a CRL. It also can define a restricted list of minons which are allowed to remotely invoke this signing policy.

/srv/salt/signing_policies.conf

```
x509_signing_policies:
  www:
    - minions: 'www'
    - signing_private_key: /etc/pki/ca.key
    - signing_cert: /etc/pki/ca.crt
    - C: US
    - ST: Utah
    - L: Salt Lake City
    - basicConstraints: "critical CA:false"
    - keyUsage: "critical keyEncipherment"
    - subjectKeyIdentifier: hash
    - authorityKeyIdentifier: keyid,issuer:always
    - days_valid: 90
    - copypath: /etc/pki/issued_certs/
```

This state will instruct all minions to trust certificates signed by our new CA. Using jinja to strip newlines from the text avoids dealing with newlines in the rendered yaml, and the `sign_remote_certificate` state will handle properly formatting the text before writing the output.

/srv/salt/cert.sls

```
/usr/local/share/ca-certificates:
  file.directory

/usr/local/share/ca-certificates/intca.crt:
  x509.pem_managed:
    - text: {{ salt['mine.get']('ca', 'x509.get_pem_entries')['ca']['/etc/pki/ca.crt
↪']|replace('\n', '') }}
```

This state creates a private key then requests a certificate signed by ca according to the www policy.

/srv/salt/www.sls

```
/etc/pki/www.crt:
  x509.certificate_managed:
    - ca_server: ca
    - signing_policy: www
    - public_key: /etc/pki/www.key
    - CN: www.example.com
    - days_remaining: 30
    - backup: True
    - managed_private_key:
        name: /etc/pki/www.key
        bits: 4096
        backup: True
```

salt.states.x509.**certificate_managed**(*name*, *days_remaining=90*, *managed_private_key=None*, *append_certs=None*, ***kwargs*)

Manage a Certificate

name Path to the certificate

days_remaining [90] The minimum number of days remaining when the certificate should be recreated. A value of 0 disables automatic renewal.

managed_private_key Manages the private key corresponding to the certificate. All of the arguments supported by *x509.private_key_managed* are supported. If *name* is not speicified or is the same as the name of the certificate, the private key and certificate will be written together in the same file.

append_certs: A list of certificates to be appended to the managed file.

kwargs: Any arguments supported by *x509.create_certificate* or *file.managed* are supported.

Examples:

```
/etc/pki/ca.crt:
  x509.certificate_managed:
    - signing_private_key: /etc/pki/ca.key
    - CN: ca.example.com
    - C: US
    - ST: Utah
    - L: Salt Lake City
    - basicConstraints: "critical CA:true"
    - keyUsage: "critical cRLSign, keyCertSign"
    - subjectKeyIdentifier: hash
    - authorityKeyIdentifier: keyid,issuer:always
    - days_valid: 3650
    - days_remaining: 0
    - backup: True
```

```
/etc/ssl/www.crt:
  x509.certificate_managed:
    - ca_server: pki
    - signing_policy: www
    - public_key: /etc/ssl/www.key
    - CN: www.example.com
    - days_valid: 90
    - days_remaining: 30
    - backup: True
```

salt.states.x509.**crl_managed**(*name*, *signing_private_key*, *signing_private_key_passphrase=None*, *signing_cert=None*, *revoked=None*, *days_valid=100*, *digest=''*, *days_remaining=30*, *include_expired=False*, ***kwargs*)

Manage a Certificate Revocation List

name Path to the certificate

signing_private_key The private key that will be used to sign this crl. This is usually your CA's private key.

signing_private_key_passphrase Passphrase to decrypt the private key.

signing_cert The certificate of the authority that will be used to sign this crl. This is usually your CA's certificate.

revoked A list of certificates to revoke. Must include either a serial number or a the certificate itself. Can optionally include the revocation date and notAfter date from the certificate. See example below for details.

days_valid [100] The number of days the certificate should be valid for.

digest The digest to use for signing the CRL. This has no effect on versions of pyOpenSSL less than 0.14.

days_remaining [30] The crl should be automatically recreated if there are less than `days_remaining` days until the crl expires. Set to 0 to disable automatic renewal.

include_expired [False] If `True`, include expired certificates in the CRL.

kwargs Any arguments supported by *`file.managed`* are supported.

Example:

```
/etc/pki/ca.crl:
  x509.crl_managed:
    - signing_private_key: /etc/pki/myca.key
    - signing_cert: /etc/pki/myca.crt
    - revoked:
      - compromized_Web_key:
        - certificate: /etc/pki/certs/badweb.crt
        - revocation_date: 2015-03-01 00:00:00
        - reason: keyCompromise
      - terminated_vpn_user:
        - serial_number: D6:D2:DC:D8:4D:5C:C0:F4
```

```
        - not_after: 2016-01-01 00:00:00
        - revocation_date: 2015-02-25 00:00:00
        - reason: cessationOfOperation
```

salt.states.x509.**csr_managed**(*name*, ***kwargs*)

Manage a Certificate Signing Request

name: Path to the CSR

properties: The properties to be added to the certificate request, including items like subject, extensions and public key. See above for valid properties.

kwargs: Any arguments supported by *file.managed* are supported.

Example:

```
/etc/pki/mycert.csr:
  x509.csr_managed:
     - private_key: /etc/pki/mycert.key
     - CN: www.example.com
     - C: US
     - ST: Utah
     - L: Salt Lake City
     - keyUsage: 'critical dataEncipherment'
```

salt.states.x509.**pem_managed**(*name*, *text*, *backup=False*, ***kwargs*)

Manage the contents of a PEM file directly with the content in text, ensuring correct formatting.

name: The path to the file to manage

text: The PEM formatted text to write.

kwargs: Any arguments supported by *file.managed* are supported.

salt.states.x509.**private_key_managed**(*name*, *bits=2048*, *passphrase=None*, *cipher='aes_128_cbc'*, *new=False*, *overwrite=False*, *verbose=True*, ***kwargs*)

Manage a private key's existence.

name: Path to the private key

bits: Key length in bits. Default 2048.

passphrase: Passphrase for encrypting the private key.

cipher: Cipher for encrypting the private key.

new: Always create a new key. Defaults to False. Combining new with `prereq`, or when used as part of a *managed_private_key* can allow key rotation whenever a new certificiate is generated.

overwrite: Overwrite an existing private key if the provided passphrase cannot decrypt it.

verbose: Provide visual feedback on stdout, dots while key is generated. Default is True.

New in version 2016.11.0.

kwargs: Any kwargs supported by file.managed are supported.

Example:

The jinja templating in this example ensures a private key is generated if the file doesn't exist and that a new private key is generated whenever the certificate that uses it is to be renewed.

```
/etc/pki/www.key:
  x509.private_key_managed:
    - bits: 4096
    - new: True
    {% if salt['file.file_exists']('/etc/pki/ca.key') -%}
    - prereq:
      - x509: /etc/pki/www.crt
    {%- endif %}
```

19.19.278 salt.states.xmpp

Sending Messages over XMPP

New in version 2014.1.0.

This state is useful for firing messages during state runs, using the XMPP protocol

```
server-warning-message:
  xmpp.send_msg:
    - name: 'This is a server warning message'
    - profile: my-xmpp-account
    - recipient: admins@xmpp.example.com/salt
```

salt.states.xmpp.**send_msg**(*name*, *recipient*, *profile*)

Send a message to an XMPP user

```
server-warning-message:
  xmpp.send_msg:
    - name: 'This is a server warning message'
    - profile: my-xmpp-account
    - recipient: admins@xmpp.example.com/salt
```

name The message to send to the XMPP user

salt.states.xmpp.**send_msg_multi**(*name*, *profile*, *recipients=None*, *rooms=None*)

Send a message to an list of recipients or rooms

```

19.19.279 salt.states.zabbix_host module

Management of Zabbix hosts.

codeauthor Jiri Kotlin <jiri.kotlin@ultimum.io>

salt.states.zabbix_host.**absent**(*name*, ***kwargs*)

Ensures that the host does not exists, eventually deletes host.

New in version 2016.3.0.

Param name: technical name of the host

Parameters

- **_connection_user** -- Optional - zabbix user (can also be set in opts or pillar, see module's docstring)
- **_connection_password** -- Optional - zabbix password (can also be set in opts or pillar, see module's docstring)
- **_connection_url** -- Optional - url of zabbix frontend (can also be set in opts, pillar, see module's docstring)

```
TestHostWithInterfaces:
    zabbix_host.absent
```

salt.states.zabbix_host.**assign_templates**(*host*, *templates*, ***kwargs*)

Ensures that templates are assigned to the host.

New in version 2017.7.0.

Parameters

- **host** -- technical name of the host
- **_connection_user** -- Optional - zabbix user (can also be set in opts or pillar, see module's docstring)
- **_connection_password** -- Optional - zabbix password (can also be set in opts or pillar, see module's docstring)
- **_connection_url** -- Optional - url of zabbix frontend (can also be set in opts, pillar, see module's docstring)

```
add_zabbix_templates_to_host:
    zabbix_host.assign_templates:
        - host: TestHost
        - templates:
            - "Template OS Linux"
            - "Template App MySQL"
```

salt.states.zabbix_host.**present**(*host*, *groups*, *interfaces*, ***kwargs*)

Ensures that the host exists, eventually creates new host. NOTE: please use argument visible_name instead of name to not mess with name from salt sls. This function accepts all standard host properties: keyword argument names differ depending on your zabbix version, see: https://www.zabbix.com/documentation/2.4/manual/api/reference/host/object#host

New in version 2016.3.0.

Parameters

- **host** -- technical name of the host
- **groups** -- groupids of host groups to add the host to
- **interfaces** -- interfaces to be created for the host
- **proxy_host** -- Optional proxy name or proxyid to monitor host
- **_connection_user** -- Optional - zabbix user (can also be set in opts or pillar, see module's docstring)
- **_connection_password** -- Optional - zabbix password (can also be set in opts or pillar, see module's docstring)
- **_connection_url** -- Optional - url of zabbix frontend (can also be set in opts, pillar, see module's docstring)
- **visible_name** -- Optional - string with visible name of the host, use `visible_name' instead of `name' parameter to not mess with value supplied from Salt sls file.

```
create_test_host:
    zabbix_host.present:
        - host: TestHostWithInterfaces
        - proxy_host: 12345
        - groups:
            - 5
            - 6
            - 7
        - interfaces:
            - test1.example.com:
                - ip: '192.168.1.8'
                - type: 'Agent'
```

```
            - port: 92
        - testing2_create:
            - ip: '192.168.1.9'
            - dns: 'test2.example.com'
            - type: 'agent'
            - main: false
        - testovaci1_ipmi:
            - ip: '192.168.100.111'
            - type: 'ipmi'
```

19.19.280 salt.states.zabbix_hostgroup module

Management of Zabbix host groups.

codeauthor Jiri Kotlin <jiri.kotlin@ultimum.io>

`salt.states.zabbix_hostgroup.`**`absent`**(*name*, ***kwargs*)

Ensures that the host group does not exist, eventually delete host group.

New in version 2016.3.0.

Parameters

- **`name`** -- name of the host group
- **`_connection_user`** -- Optional - zabbix user (can also be set in opts or pillar, see module's docstring)
- **`_connection_password`** -- Optional - zabbix password (can also be set in opts or pillar, see module's docstring)
- **`_connection_url`** -- Optional - url of zabbix frontend (can also be set in opts, pillar, see module's docstring)

```
delete_testing_host_group:
    zabbix_hostgroup.absent:
        - name: 'My hostgroup name'
```

`salt.states.zabbix_hostgroup.`**`present`**(*name*, ***kwargs*)

Ensures that the host group exists, eventually creates new host group.

New in version 2016.3.0.

Parameters

- **`name`** -- name of the host group
- **`_connection_user`** -- Optional - zabbix user (can also be set in opts or pillar, see module's docstring)
- **`_connection_password`** -- Optional - zabbix password (can also be set in opts or pillar, see module's docstring)
- **`_connection_url`** -- Optional - url of zabbix frontend (can also be set in opts, pillar, see module's docstring)

```
create_testing_host_group:
    zabbix_hostgroup.present:
        - name: 'My hostgroup name'
```

19.19.281 salt.states.zabbix_mediatype module

Management of Zabbix mediatypes.

codeauthor Raymond Kuiper <qix@the-wired.net>

salt.states.zabbix_mediatype.**absent**(*name*, ***kwargs*)

Ensures that the mediatype does not exist, eventually deletes the mediatype.

Parameters

- **name** -- name of the mediatype
- **_connection_user** -- Optional - zabbix user (can also be set in opts or pillar, see module's docstring)
- **_connection_password** -- Optional - zabbix password (can also be set in opts or pillar, see module's docstring)
- **_connection_url** -- Optional - url of zabbix frontend (can also be set in opts, pillar, see module's docstring)

```
delete_mediatype:
    zabbix_mediatype.absent:
        - name: 'Email'
```

salt.states.zabbix_mediatype.**present**(*name*, *mediatype*, ***kwargs*)

Creates new mediatype. NOTE: This function accepts all standard mediatype properties: keyword argument names differ depending on your zabbix version, see: https://www.zabbix.com/documentation/3.0/manual/api/reference/host/object#host_inventory

Parameters

- **name** -- name of the mediatype
- **_connection_user** -- Optional - zabbix user (can also be set in opts or pillar, see module's docstring)
- **_connection_password** -- Optional - zabbix password (can also be set in opts or pillar, see module's docstring)
- **_connection_url** -- Optional - url of zabbix frontend (can also be set in opts, pillar, see module's docstring)

```
make_new_mediatype:
    zabbix_mediatype.present:
        - name: 'Email'
        - mediatype: 0
        - smtp_server: smtp.example.com
        - smtp_hello: zabbix.example.com
        - smtp_email: zabbix@example.com
```

19.19.282 salt.states.zabbix_user module

Management of Zabbix users.

codeauthor Jiri Kotlin <jiri.kotlin@ultimum.io>

salt.states.zabbix_user.**absent**(*name*, ***kwargs*)

Ensures that the user does not exist, eventually delete user.

New in version 2016.3.0.

Parameters

- **name** -- user alias
- **_connection_user** -- Optional - zabbix user (can also be set in opts or pillar, see module's docstring)
- **_connection_password** -- Optional - zabbix password (can also be set in opts or pillar, see module's docstring)
- **_connection_url** -- Optional - url of zabbix frontend (can also be set in opts, pillar, see module's docstring)

```
George:
    zabbix_user.absent
```

salt.states.zabbix_user.**present**(*alias*, *passwd*, *usrgrps*, *medias*, *password_reset=False*, ***kwargs*)

Ensures that the user exists, eventually creates new user. NOTE: use argument firstname instead of name to not mess values with name from salt sls.

New in version 2016.3.0.

Parameters

- **alias** -- user alias
- **passwd** -- user's password
- **usrgrps** -- user groups to add the user to
- **medias** -- user's medias to create
- **password_reset** -- whether or not to reset password at update
- **_connection_user** -- Optional - zabbix user (can also be set in opts or pillar, see module's docstring)
- **_connection_password** -- Optional - zabbix password (can also be set in opts or pillar, see module's docstring)
- **_connection_url** -- Optional - url of zabbix frontend (can also be set in opts, pillar, see module's docstring)
- **firstname** -- string with firstname of the user, use `firstname' instead of `name' parameter to not mess with value supplied from Salt sls file.

```
make_user:
    zabbix_user.present:
        - alias: George
        - passwd: donottellanyonE@456x
        - password_reset: True
        - usrgrps:
            - 13
            - 7
        - medias:
            - me@example.com:
                - mediatype: mail
                - period: '1-7,00:00-24:00'
                - severity: NIWAHD
            - make_jabber:
                - active: true
                - mediatype: jabber
                - period: '1-5,08:00-19:00'
                - sendto: jabbera@example.com
            - text_me_morning_disabled:
                - active: false
                - mediatype: sms
                - period: '1-5,09:30-10:00'
                - severity: D
                - sendto: '+42032132588568'
```

19.19.283 salt.states.zabbix_usergroup module

Management of Zabbix user groups.

codeauthor Jiri Kotlin <jiri.kotlin@ultimum.io>

salt.states.zabbix_usergroup.**absent**(*name*, ***kwargs*)

Ensures that the user group does not exist, eventually delete user group.

New in version 2016.3.0.

Parameters

- **name** -- name of the user group
- **_connection_user** -- Optional - zabbix user (can also be set in opts or pillar, see module's docstring)
- **_connection_password** -- Optional - zabbix password (can also be set in opts or pillar, see module's docstring)
- **_connection_url** -- Optional - url of zabbix frontend (can also be set in opts, pillar, see module's docstring)

```
delete_thai_monks_usrgrp:
    zabbix_usergroup.absent:
        - name: 'Thai monks'
```

salt.states.zabbix_usergroup.**present**(*name*, ***kwargs*)

Creates new user group. NOTE: This function accepts all standard user group properties: keyword argument names differ depending on your zabbix version, see: https://www.zabbix.com/documentation/2.0/manual/appendix/api/usergroup/definitions#user_group

New in version 2016.3.0.

Parameters

- **name** -- name of the user group
- **_connection_user** -- Optional - zabbix user (can also be set in opts or pillar, see module's docstring)
- **_connection_password** -- Optional - zabbix password (can also be set in opts or pillar, see module's docstring)
- **_connection_url** -- Optional - url of zabbix frontend (can also be set in opts, pillar, see module's docstring)

```
make_new_thai_monks_usergroup:
    zabbix_usergroup.present:
        - name: 'Thai monks'
        - gui_access: 1
        - debug_mode: 0
        - users_status: 0
```

19.19.284 salt.states.zcbuildout

Management of zc.buildout

This module is inspired from minitage's buildout maker (https://github.com/minitage/minitage/blob/master/src/minitage/core/makers/buildout.py)

New in version 2016.3.0.

Note: This state module is beta; the API is subject to change and no promise as to performance or functionality is yet present

---

Available Functions

- built

```
installed1
  buildout.installed:
    - name: /path/to/buildout

installed2
  buildout.installed:
    - name: /path/to/buildout
    - parts:
      - a
      - b
    - python: /path/to/pythonpath/bin/python
    - unless: /bin/test_something_installed
    - onlyif: /bin/test_else_installed
```

salt.states.zcbuildout.**installed**(*name*, *config='buildout.cfg'*, *quiet=False*, *parts=None*, *user=None*, *env=()*, *buildout_ver=None*, *test_release=False*, *distribute=None*, *new_st=None*, *offline=False*, *newest=False*, *python='/usr/bin/python'*, *debug=False*, *verbose=False*, *unless=None*, *onlyif=None*, *use_vt=False*, *loglevel='debug'*, ***kwargs*)

Install buildout in a specific directory

It is a thin wrapper to modules.buildout.buildout

name directory to execute in

quiet

do not output console & logs

config buildout config to use (default: buildout.cfg)

parts specific buildout parts to run

user user used to run buildout as

New in version 2014.1.4.

env environment variables to set when running

buildout_ver force a specific buildout version (1 | 2)

test_release buildout accept test release

new_st Forcing use of setuptools >= 0.7

distribute use distribute over setuptools if possible

offline does buildout run offline

python python to use

debug run buildout with -D debug flag

onlyif Only execute cmd if statement on the host return 0

unless Do not execute cmd if statement on the host return 0

newest run buildout in newest mode

verbose run buildout in verbose mode (-vvvvv)

use_vt Use the new salt VT to stream output [experimental]

loglevel loglevel for buildout commands

19.19.285 salt.states.zenoss

State to manage monitoring in Zenoss.

New in version 2016.3.0.

This state module depends on the `zenoss' Salt execution module.

Allows for setting a state of minions in Zenoss using the Zenoss API. Currently Zenoss 4.x and 5.x are supported.

```
enable_monitoring:
  zenoss.monitored:
    - name: web01.example.com
    - device_class: /Servers/Linux
    - collector: localhost
    - prod_state: 1000
```

salt.states.zenoss.**monitored**(*name*, *device_class=None*, *collector='localhost'*, *prod_state=None*)

Ensure a device is monitored. The `name' given will be used for Zenoss device name and should be resolvable.

```
enable_monitoring:
  zenoss.monitored:
    - name: web01.example.com
    - device_class: /Servers/Linux
    - collector: localhost
    - prod_state: 1000
```

19.19.286 salt.states.zk_concurrency

Control concurrency of steps within state execution using zookeeper

This module allows you to ``wrap'' a state's execution with concurrency control. This is useful to protect against all hosts executing highstate simultaneously if your services don't all HUP restart. The common way of protecting against this is to run in batch mode, but that doesn't protect from another person running the same batch command (and thereby having 2x the number of nodes deploying at once).

This module will bock while acquiring a slot, meaning that however the command gets called it will coordinate with zookeeper to ensure that no more than max_concurrency steps are executing with a single path.

```
acquire_lock:
  zk_concurrency.lock:
    - name: /trafficeserver
    - zk_hosts: 'zookeeper:2181'
    - max_concurrency: 4
    - prereq:
        - service: trafficserver

trafficserver:
  service.running:
    - watch:
      - file: /etc/trafficserver/records.config

/etc/trafficserver/records.config:
  file.managed:
    - source: salt://records.config

release_lock:
  zk_concurrency.unlock:
    - name: /trafficserver
    - require:
        - service: trafficserver
```

This example would allow the file state to change, but would limit the concurrency of the trafficserver service restart to 4.

salt.states.zk_concurrency.**lock**(*name*, *zk_hosts*, *identifier=None*, *max_concurrency=1*, *timeout=None*, *ephemeral_lease=False*)
Block state execution until you are able to get the lock (or hit the timeout)

salt.states.zk_concurrency.**min_party**(*name*, *zk_hosts*, *min_nodes*, *blocking=False*)
Ensure that there are *min_nodes* in the party at *name*, optionally blocking if not available.

salt.states.zk_concurrency.**unlock**(*name*, *zk_hosts=None*, *identifier=None*, *max_concurrency=1*, *ephemeral_lease=False*)
Remove lease from semaphore.

19.19.287 salt.states.zfs

Management zfs datasets

maintainer Jorge Schrauwen <sjorge@blackdot.be>

maturity new

depends zfs

platform smartos, illumos, solaris, freebsd, linux

New in version 2016.3.0.

```
test/shares/yuki:
  zfs.filesystem_present:
    - create_parent: true
    - properties:
        quota: 16G

test/iscsi/haruhi:
  zfs.volume_present:
    - create_parent: true
    - volume_size: 16M
    - sparse: true
    - properties:
        readonly: on

test/shares/yuki@frozen:
  zfs.snapshot_present

moka_origin:
  zfs.hold_present
    - snapshot: test/shares/yuki@frozen

test/shares/moka:
  zfs.filesystem_present:
    - cloned_from: test/shares/yuki@frozen

test/shares/moka@tsukune:
  zfs.snapshot_absent
```

salt.states.zfs.**bookmark_absent**(*name*, *force=False*, *recursive=False*)
ensure bookmark is absent on the system
name [string] name of snapshot
force [boolean] try harder to destroy the dataset (zfs destroy -f)
recursive [boolean] also destroy all the child datasets (zfs destroy -r)

salt.states.zfs.**bookmark_present**(*name*, *snapshot*)
ensure bookmark exists
name [string] name of bookmark
snapshot [string] name of snapshot

salt.states.zfs.**filesystem_absent**(*name*, *force=False*, *recursive=False*)
ensure filesystem is absent on the system
name [string] name of filesystem
force [boolean] try harder to destroy the dataset (zfs destroy -f)
recursive [boolean] also destroy all the child datasets (zfs destroy -r)

> **Warning:** If a volume with `name` exists, this state will succeed without destroying the volume specified by `name`. This module is dataset type sensitive.

salt.states.zfs.**filesystem_present**(*name*, *create_parent=False*, *properties=None*, *cloned_from=None*)
ensure filesystem exists and has properties set
name [string] name of filesystem
create_parent [boolean] creates all the non-existing parent datasets. any property specified on the command line using the -o option is ignored.
cloned_from [string] name of snapshot to clone
properties [dict] additional zfs properties (-o)

Note: `cloned_from` is only use if the filesystem does not exist yet, when `cloned_from` is set after the filesystem exists it will be ignored.

Note: Properties do not get cloned, if you specify the properties in the state file they will be applied on a subsequent run.

---

salt.states.zfs.**hold_absent**(*name*, *snapshot*, *recursive=False*)
ensure hold is absent on the system
name [string] name of holdt
snapshot [string] name of snapshot
recursive [boolean] recursively releases a hold with the given tag on the snapshots of all descendent file systems.

salt.states.zfs.**hold_present**(*name*, *snapshot*, *recursive=False*)
ensure hold is present on the system
name [string] name of holdt
snapshot [string] name of snapshot
recursive [boolean] recursively add hold with the given tag on the snapshots of all descendent file systems.

salt.states.zfs.**promoted**(*name*)
ensure a dataset is not a clone
name [string] name of fileset or volume

> **Warning:** only one dataset can be the origin, if you promote a clone the original will now point to the promoted dataset

salt.states.zfs.**scheduled_snapshot**(*name*, *prefix*, *recursive=True*, *schedule=None*)
maintain a set of snapshots based on a schedule
name [string] name of filesystem or volume

prefix [string] prefix for the snapshots e.g. `test' will result in snapshots being named `test-YYYYMMDD_HHMM'
recursive [boolean] create snapshots for all children also
schedule [dict] dict holding the schedule, the following keys are available (minute, hour, day, month, and year) by default all are set to 0 the value indicated the number of snapshots of that type to keep around.

> **Warning:** snapshots will only be created and pruned every time the state runs. a schedule must be setup to automatically run the state. this means that if you run the state daily the hourly snapshot will only be made once per day!

`salt.states.zfs.`**`snapshot_absent`**(*name*, *force=False*, *recursive=False*)
ensure snapshot is absent on the system
name [string] name of snapshot
force [boolean] try harder to destroy the dataset (zfs destroy -f)
recursive [boolean] also destroy all the child datasets (zfs destroy -r)

`salt.states.zfs.`**`snapshot_present`**(*name*, *recursive=False*, *properties=None*)
ensure snapshot exists and has properties set
name [string] name of snapshot
recursive [boolean] recursively create snapshots of all descendent datasets
properties [dict] additional zfs properties (-o)

`salt.states.zfs.`**`volume_absent`**(*name*, *force=False*, *recursive=False*)
ensure volume is absent on the system
name [string] name of volume
force [boolean] try harder to destroy the dataset (zfs destroy -f)
recursive [boolean] also destroy all the child datasets (zfs destroy -r)

> **Warning:** If a filesystem with `name` exists, this state will succeed without destroying the filesystem specified by `name`. This module is dataset type sensitive.

`salt.states.zfs.`**`volume_present`**(*name*, *volume_size*, *sparse=False*, *create_parent=False*, *properties=None*, *cloned_from=None*)
ensure volume exists and has properties set
name [string] name of volume
volume_size [string] size of volume
sparse [boolean] create sparse volume
create_parent [boolean] creates all the non-existing parent datasets. any property specified on the command line using the -o option is ignored.
cloned_from [string] name of snapshot to clone
properties [dict] additional zfs properties (-o)

Note: `cloned_from` is only use if the volume does not exist yet, when `cloned_from` is set after the volume exists it will be ignored.

Note: Properties do not get cloned, if you specify the properties in the state file they will be applied on a subsequent run.

`volume_size` is considered a property, so the volume's size will be corrected when the properties get updated if it differs from the original volume.

The sparse parameter is ignored when using `cloned_from`.

19.19.288 salt.states.zone

Management of Solaris Zones

maintainer Jorge Schrauwen <sjorge@blackdot.be>

maturity new

depends salt.modules.zoneadm, salt.modules.zonecfg

platform solaris

New in version 2017.7.0.

Below are some examples of how to use this state. Lets start with creating a zone and installing it.

```
omipkg1_configuration:
  zone.present:
    - name: omipkg1
    - brand: ipkg
    - zonepath: /zones/omipkg1
    - properties:
      - autoboot: true
      - ip-type: exclusive
      - cpu-shares: 50
    - resources:
      - attr:
        - name: owner
        - value: Jorge Schrauwen
        - type: string
      - attr:
        - name: description
        - value: OmniOS ipkg zone for testing
        - type: string
      - capped-memory:
        - physical: 64M
omipkg1_installation:
  zone.installed:
    - name: omipkg1
    - require:
        - zone: omipkg1_configuration
omipkg1_running:
  zone.booted:
    - name: omipkg1
    - require:
        - zone: omipkg1_installation
```

A zone without network access is not very useful. We could update the zone.present state in the example above to add a network interface or we could use a separate state for this.

```
omipkg1_network:
  zone.resource_present:
    - name: omipkg1
    - resource_type: net
    - resource_selector_property: mac-addr
    - resource_selector_value: "02:08:20:a2:a3:10"
    - physical: znic1
    - require:
        - zone: omipkg1_configuration
```

Since this is a single tenant system having the owner attribute is pointless. Let's remove that attribute.

Note: The following state run the omipkg1_configuration state will add it again! If the entire configuration is managed it would be better to add resource_prune and optionally the resource_selector_property properties to the resource.

```
omipkg1_strip_owner:
  zone.resource_present:
    - name: omipkg1
    - resource_type: attr
    - resource_selector_property: name
    - resource_selector_value: owner
    - require:
        - zone: omipkg1_configuration
```

Let's bump the zone's CPU shares a bit.

Note: The following state run the omipkg1_configuration state will set it to 50 again. Update the entire zone configuration is managed you should update it there instead.

```
omipkg1_more_cpu:
  zone.property_present:
    - name: omipkg1
    - property: cpu-shares
    - value: 100
```

Or we can remove the limit altogether!

Note: The following state run the omipkg1_configuration state will set it to 50 again. Update the entire zone configuration is managed you should set the property to None (nothing after the :) instead.

```
omipkg1_no_cpu:
  zone.property_absent:
    - name: omipkg1
    - property: cpu-shares
```

salt.states.zone.**absent**(*name*, *uninstall=False*)
Ensure a zone is absent
name [string] name of the zone
uninstall [boolean] when true, uninstall instead of detaching the zone first.

salt.states.zone.**attached**(*name*, *force=False*)
Ensure zone is attached
name [string] name of the zone
force [boolean] force attach the zone

salt.states.zone.**booted**(*name*, *single=False*)
Ensure zone is booted
name [string] name of the zone
single [boolean] boot in single usermode

salt.states.zone.**detached**(*name*)
Ensure zone is detached
name [string] name of the zone

salt.states.zone.**export**(*name*, *path*, *replace=False*)
Export a zones configuration
name [string] name of the zone
path [string] path of file to export too.
replace [boolean] replace the file if it exists

salt.states.zone.**halted**(*name*, *graceful=True*)
Ensure zone is halted
name [string] name of the zone
graceful [boolean] use shutdown instead of halt if true

salt.states.zone.**import**(*name*, *path*, *mode='import'*, *nodataset=False*, *brand_opts=None*)
Import a zones configuration
name [string] name of the zone
path [string] path of the configuration file to import
mode [string] either import, install, or attach
nodataset [boolean] do not create a ZFS file system
brand_opts [boolean] brand specific options to pass

Note: The mode argument can be set to `import`, `install`, or `attach`. `import`: will only import the configuration `install`: will import and then try to install the zone `attach`: will import and then try to attach of the zone

---

salt.states.zone.**installed**(*name*, *nodataset=False*, *brand_opts=None*)
Ensure zone is installed
name [string] name of the zone
nodataset [boolean] do not create a ZFS file system
brand_opts [boolean] brand specific options to pass

salt.states.zone.**present**(*name*, *brand*, *zonepath*, *properties=None*, *resources=None*)
Ensure a zone with certain properties and resources
name [string] name of the zone
brand [string] brand of the zone
zonepath [string] path of the zone
properties [list of key-value pairs] dict of properties
resources [list of key-value pairs] dict of resources

Note: If the zone does not exist it will not be installed. You can use the ``zone.installed`` state for this.

Note:
Default resource selectors:

- fs: dir
- net: mac-addr
- device: match
- rctl: name
- attr: name
- dataset: name
- admin: user

Warning: Properties and resource will not be removed when they are absent from the state!

For properties, simple set them to ``None``.

For resources, add the `resource_prune` property and set it to `True`. Also specify the `resource_selector_property` if the default is not the one you want.

salt.states.zone.**property_absent**(*name*, *property*)

Ensure property is absent
name [string] name of the zone
property [string] name of property

Note: This does a zoneacfg clear call. So the property may be reset to a default value! Does has the side effect of always having to be called.

salt.states.zone.**property_present**(*name*, *property*, *value*)

Ensure property has a certain value
name [string] name of the zone
property [string] name of property
value [string] value of property

salt.states.zone.**resource_absent**(*name*, *resource_type*, *resource_selector_property*, *resource_selector_value*)

Ensure resource is absent
name [string] name of the zone
resource_type [string] type of resource
resource_selector_property [string] unique resource identifier
resource_selector_value [string] value for resource selection

Warning: Both resource_selector_property and resource_selector_value must be provided, some properties like `name` are already reserved by salt in there states.

Note: You can set both resource_selector_property and resource_selector_value to None for resources that do not require them.

salt.states.zone.**resource_present**(*name*, *resource_type*, *resource_selector_property*, *resource_selector_value*, ***kwargs*)

Ensure resource exists with provided properties
name [string] name of the zone
resource_type [string] type of resource
resource_selector_property [string] unique resource identifier
resource_selector_value [string] value for resource selection
kwargs [string|int|...] resource properties

Warning: Both resource_selector_property and resource_selector_value must be provided, some properties like name are already reserved by salt in states.

Note: You can set both resource_selector_property and resource_selector_value to None for resources that do not require them.

salt.states.zone.**uninstalled**(*name*)

Ensure zone is uninstalled

name [string] name of the zone

19.19.289 salt.states.zpool

Management zpool

maintainer Jorge Schrauwen <sjorge@blackdot.be>

maturity new

depends zpool

platform smartos, illumos, solaris, freebsd, linux

New in version 2016.3.0.

```
oldpool:
  zpool.absent:
    - export: true

newpool:
  zpool.present:
    - config:
        import: false
        force: true
    - properties:
        comment: salty storage pool
    - layout:
        mirror-0:
          /dev/disk0
          /dev/disk1
        mirror-1:
          /dev/disk2
          /dev/disk3

partitionpool:
  zpool.present:
    - config:
        import: false
        force: true
    - properties:
        comment: disk partition salty storage pool
        ashift: '12'
        feature@lz4_compress: enabled
    - filesystem_properties:
        compression: lz4
        atime: on
        relatime: on
    - layout:
        - /dev/disk/by-uuid/3e43ce94-77af-4f52-a91b-6cdbb0b0f41b

simplepool:
  zpool.present:
    - config:
        import: false
        force: true
    - properties:
        comment: another salty storage pool
    - layout:
```

```
        - /dev/disk0
        - /dev/disk1
```

Warning: The layout will never be updated, it will only be used at time of creation. It's a whole lot of work to figure out if a devices needs to be detached, removed, ... this is best done by the sysadmin on a case per case basis.

Filesystem properties are also not updated, this should be managed by the zfs state module.

salt.states.zpool.**absent**(*name*, *export=False*, *force=False*)

ensure storage pool is absent on the system

name [string] name of storage pool

export [boolean] export instread of destroy the zpool if present

force [boolean] force destroy or export

salt.states.zpool.**present**(*name*, *properties=None*, *filesystem_properties=None*, *layout=None*, *config=None*)

ensure storage pool is present on the system

name [string] name of storage pool

properties [dict] optional set of properties to set for the storage pool

filesystem_properties [dict] optional set of filesystem properties to set for the storage pool (creation only)

layout: **dict** disk layout to use if the pool does not exist (creation only)

config [dict] fine grain control over this state

Note:

The following configuration properties can be toggled in the config parameter.

- import (true) - try to import the pool before creating it if absent
- import_dirs (None) - specify additional locations to scan for devices on import
- device_dir (None, SunOS=/dev/rdsk) - specify device directory to use if not absolute path
- force (false) - try to force the import or creation

Note: Because ID's inside the layout dict must be unique they need to have a suffix.

```
mirror-0:
  /tmp/vdisk3
  /tmp/vdisk2
mirror-1:
  /tmp/vdisk0
  /tmp/vdisk1
```

The above yaml will always result in the following zpool create:

```
zpool create mypool mirror /tmp/vdisk3 /tmp/vdisk2 mirror /tmp/vdisk0 /tmp/vdisk1
```

Warning: Pay attention to the order of your dict!

```
mirror-0:
  /tmp/vdisk0
  /tmp/vdisk1
/tmp/vdisk2:
```

The above will result in the following zpool create:

```
zpool create mypool mirror /tmp/vdisk0 /tmp/vdisk1 /tmp/vdisk2
```

Creating a 3-way mirror! While you probably expect it to be mirror root vdev with 2 devices + a root vdev of 1 device!

19.20 thorium modules

calc	Used to manage the thorium register.
check	The check Thorium state is used to create gateways to commands, the checks make it easy to make states that watch registers for changes and then just succeed or fail based on the state of the register, this creates the pattern of having a command execution get gated by a check state via a requisite.
file	Writes matches to disk to verify activity, helpful when testing
key	The key Thorium State is used to apply changes to the accepted/rejected/pending keys
local	Run remote execution commands via the local client
reg	Used to manage the thorium register.
runner	React by calling async runners
status	This thorium state is used to track the status beacon events and keep track of
timer	Allow for flow based timers.
wheel	React by calling async runners

19.20.1 salt.thorium.calc module

Used to manage the thorium register. The thorium register is where compound values are stored and computed, such as averages etc.

New in version 2016.11.0.

depends statistics PyPi module

salt.thorium.calc.**add**(*name*, *num*, *minimum=0*, *maximum=0*, *ref=None*)

Adds together the num most recent values. Requires a list.

USAGE:

```
foo:
  calc.add:
    - name: myregentry
    - num: 5
```

salt.thorium.calc.**calc**(*name*, *num*, *oper*, *minimum=0*, *maximum=0*, *ref=None*)

Perform a calculation on the num most recent values. Requires a list. Valid values for oper are:

- add: Add last num values together
- mul: Multiple last num values together
- mean: Calculate mean of last num values
- median: Calculate median of last num values

- median_low: Calculate low median of last num values
- median_high: Calculate high median of last num values
- median_grouped: Calculate grouped median of last num values
- mode: Calculate mode of last num values

USAGE:

```
foo:
  calc.calc:
    - name: myregentry
    - num: 5
    - oper: mean
```

salt.thorium.calc.**mean**(*name*, *num*, *minimum=0*, *maximum=0*, *ref=None*)

Calculates the mean of the num most recent values. Requires a list.

USAGE:

```
foo:
  calc.mean:
    - name: myregentry
    - num: 5
```

salt.thorium.calc.**median**(*name*, *num*, *minimum=0*, *maximum=0*, *ref=None*)

Calculates the mean of the num most recent values. Requires a list.

USAGE:

```
foo:
  calc.median:
    - name: myregentry
    - num: 5
```

salt.thorium.calc.**median_grouped**(*name*, *num*, *minimum=0*, *maximum=0*, *ref=None*)

Calculates the grouped mean of the num most recent values. Requires a list.

USAGE:

```
foo:
  calc.median_grouped:
    - name: myregentry
    - num: 5
```

salt.thorium.calc.**median_high**(*name*, *num*, *minimum=0*, *maximum=0*, *ref=None*)

Calculates the high mean of the num most recent values. Requires a list.

USAGE:

```
foo:
  calc.median_high:
    - name: myregentry
    - num: 5
```

salt.thorium.calc.**median_low**(*name*, *num*, *minimum=0*, *maximum=0*, *ref=None*)

Calculates the low mean of the num most recent values. Requires a list.

USAGE:

```
foo:
  calc.median_low:
```

```
    - name: myregentry
    - num: 5
```

salt.thorium.calc.**mode**(*name*, *num*, *minimum=0*, *maximum=0*, *ref=None*)
Calculates the mode of the num most recent values. Requires a list.

USAGE:

```
foo:
  calc.mode:
    - name: myregentry
    - num: 5
```

salt.thorium.calc.**mul**(*name*, *num*, *minimum=0*, *maximum=0*, *ref=None*)
Multiplies together the num most recent values. Requires a list.

USAGE:

```
foo:
  calc.mul:
    - name: myregentry
    - num: 5
```

19.20.2 salt.thorium.check module

The check Thorium state is used to create gateways to commands, the checks make it easy to make states that watch registers for changes and then just succeed or fail based on the state of the register, this creates the pattern of having a command execution get gated by a check state via a requisite.

salt.thorium.check.**contains**(*name*, *value*)
Only succeed if the value in the given register location contains the given value

USAGE:

```
foo:
  check.contains:
    - value: itni

run_remote_ex:
  local.cmd:
    - tgt: '*'
    - func: test.ping
    - require:
      - check: foo
```

salt.thorium.check.**eq**(*name*, *value*)
Only succeed if the value in the given register location is equal to the given value

USAGE:

```
foo:
  check.eq:
    - value: 42

run_remote_ex:
  local.cmd:
    - tgt: '*'
```

```
    - func: test.ping
    - require:
      - check: foo
```

salt.thorium.check.**event**(*name*)

Chekcs for a specific event match and returns result True if the match happens

USAGE:

```
salt/foo/*/bar:
  check.event

run_remote_ex:
  local.cmd:
    - tgt: '*'
    - func: test.ping
    - require:
      - check: salt/foo/*/bar
```

salt.thorium.check.**gt**(*name*, *value*)

Only succeed if the value in the given register location is greater than the given value

USAGE:

```
foo:
  check.gt:
    - value: 42

run_remote_ex:
  local.cmd:
    - tgt: '*'
    - func: test.ping
    - require:
      - check: foo
```

salt.thorium.check.**gte**(*name*, *value*)

Only succeed if the value in the given register location is greater or equal than the given value

USAGE:

```
foo:
  check.gte:
    - value: 42

run_remote_ex:
  local.cmd:
    - tgt: '*'
    - func: test.ping
    - require:
      - check: foo
```

salt.thorium.check.**lt**(*name*, *value*)

Only succeed if the value in the given register location is less than the given value

USAGE:

```
foo:
  check.lt:
    - value: 42
```

```
run_remote_ex:
  local.cmd:
    - tgt: '*'
    - func: test.ping
    - require:
      - check: foo
```

salt.thorium.check.**lte**(*name*, *value*)

Only succeed if the value in the given register location is less than or equal the given value

USAGE:

```
foo:
  check.lte:
    - value: 42

run_remote_ex:
  local.cmd:
    - tgt: '*'
    - func: test.ping
    - require:
      - check: foo
```

salt.thorium.check.**ne**(*name*, *value*)

Only succeed if the value in the given register location is not equal to the given value

USAGE:

```
foo:
  check.ne:
    - value: 42

run_remote_ex:
  local.cmd:
    - tgt: '*'
    - func: test.ping
    - require:
      - check: foo
```

19.20.3 salt.thorium.file module

Writes matches to disk to verify activity, helpful when testing

Normally this is used by giving the name of the file (without a path) that the data will be saved to. If for instance you use `foo` as the name:

Then the file will be saved to:

You may also provide an absolute path for the file to be saved to:

```
/tmp/foo.save:
    file.save
```

Files will be saved in JSON format. However, JSON does not support `set()``s. If you are saving a register entry that contains a ``set()`, then it will fail to save to JSON format. However, you may pass data through a filter which makes it JSON compliant:

```
foo:
  file.save:
    filter: True
```

Be warned that if you do this, then the file will be saved, but not in a format that can be re-imported into Python.

salt.thorium.file.**save**(*name*, *filter=False*)

Save the register to <salt cachedir>/thorium/saves/<name>, or to an absolute path.

USAGE:

```
foo:
  file.save

/tmp/foo:
  file.save
```

19.20.4 salt.thorium.key module

The key Thorium State is used to apply changes to the accepted/rejected/pending keys

New in version 2016.11.0.

salt.thorium.key.**timeout**(*name*, *delete=0*, *reject=0*)

If any minion's status is older than the timeout value then apply the given action to the timed out key. This example will remove keys to minions that have not checked in for 300 seconds (5 minutes)

USAGE:

```
statreg:
  status.reg

clean_keys:
  key.timeout:
    - require:
      - status: statreg
    - delete: 300
```

19.20.5 salt.thorium.local module

Run remote execution commands via the local client

salt.thorium.local.**cmd**(*name*, *tgt*, *func*, *arg=()*, *tgt_type='glob'*, *ret=''*, *kwarg=None*, ***kwargs*)

Execute a remote execution command

USAGE:

```
run_remote_ex:
  local.cmd:
    - tgt: '*'
    - func: test.ping

run_remote_ex:
  local.cmd:
    - tgt: '*'
    - func: test.sleep
    - arg:
```

```
      - 30

run_remote_ex:
  local.cmd:
    - tgt: '*'
    - func: test.sleep
    - kwarg:
      length: 30
```

19.20.6 salt.thorium.reg module

Used to manage the thorium register. The thorium register is where compound values are stored and computed, such as averages etc.

salt.thorium.reg.**clear**(*name*)

Clear the namespace from the register

USAGE:

```
clearns:
  reg.clear:
    - name: myregister
```

salt.thorium.reg.**delete**(*name*)

Delete the namespace from the register

USAGE:

```
deletens:
  reg.delete:
    - name: myregister
```

salt.thorium.reg.**list**(*name*, *add*, *match*, *stamp=False*, *prune=0*)

Add the specified values to the named list

If `stamp` is True, then the timestamp from the event will also be added if `prune` is set to an integer higher than `0`, then only the last `prune` values will be kept in the list.

USAGE:

```
foo:
  reg.list:
    - add: bar
    - match: my/custom/event
    - stamp: True
```

salt.thorium.reg.**mean**(*name*, *add*, *match*)

Accept a numeric value from the matched events and store a running average of the values in the given register. If the specified value is not numeric it will be skipped

USAGE:

```
foo:
  reg.mean:
    - add: data_field
    - match: my/custom/event
```

salt.thorium.reg.**set**(*name*, *add*, *match*)
Add a value to the named set

USAGE:

```
foo:
  reg.set:
    - add: bar
    - match: my/custom/event
```

19.20.7 salt.thorium.runner module

React by calling async runners

salt.thorium.runner.**cmd**(*name*, *func=None*, *arg=()*, ***kwargs*)
Execute a runner async:

USAGE:

```
run_cloud:
  runner.cmd:
    - func: cloud.create
    - arg:
        - my-ec2-config
        - myinstance

run_cloud:
  runner.cmd:
    - func: cloud.create
    - kwargs:
        provider: my-ec2-config
        instances: myinstance
```

19.20.8 salt.thorium.status module

This thorium state is used to track the status beacon events and keep track of the active status of minions

New in version 2016.11.0.

salt.thorium.status.**reg**(*name*)
Activate this register to turn on a minion status tracking register, this register keeps the current status beacon data and the time that each beacon was last checked in.

19.20.9 salt.thorium.timer module

Allow for flow based timers. These timers allow for a sleep to exist across multiple runs of the flow

salt.thorium.timer.**hold**(*name*, *seconds*)
Wait for a given period of time, then fire a result of True, requiring this state allows for an action to be blocked for evaluation based on time

USAGE:

```
hold_on_a_moment:
  timer.hold:
    - seconds: 30
```

19.20.10 salt.thorium.wheel module

React by calling async runners

salt.thorium.wheel.**cmd**(*name*, *fun=None*, *arg=()*, ***kwargs*)
Execute a runner async:

USAGE:

```
run_cloud:
  wheel.cmd:
    - fun: key.delete
    - match: minion_id
```

19.21 master tops modules

cobbler	Cobbler Tops
ext_nodes	External Nodes Classifier
mongo	Read tops data from a mongodb collection
reclass_adapter	Read tops data from a reclass database
varstack	Use *Varstack <https://github.com/conversis/varstack>* to provide tops data

19.21.1 salt.tops.cobbler

Cobbler Tops

Cobbler Tops is a master tops subsystem used to look up mapping information from Cobbler via its API. The same cobbler.* parameters are used for both the Cobbler tops and Cobbler pillar modules.

```
master_tops:
  cobbler: {}
cobbler.url: https://example.com/cobbler_api #default is http://localhost/cobbler_api
cobbler.user: username # default is no username
cobbler.password: password # default is no password
```

Module Documentation

salt.tops.cobbler.**top**(***kwargs*)
Look up top data in Cobbler for a minion.

19.21.2 salt.tops.ext_nodes

External Nodes Classifier

The External Nodes Classifier is a master tops subsystem that retrieves mapping information from major configuration management systems. One of the most common external nodes classifiers system is provided by Cobbler and is called `cobbler-ext-nodes`.

The cobbler-ext-nodes command can be used with this configuration:

```
master_tops:
  ext_nodes: cobbler-ext-nodes
```

It is noteworthy that the Salt system does not directly ingest the data sent from the `cobbler-ext-nodes` command, but converts the data into information that is used by a Salt top file.

Any command can replace the call to `cobbler-ext-nodes' above, but currently the data must be formatted in the same way that the standard `cobbler-ext-nodes' does.

See (admittedly degenerate and probably not complete) example:

```
classes:
  - basepackages
  - database
```

The above essentially is the same as a top.sls containing the following:

```
base:
  '*':
    - basepackages
    - database

base:
  '*':
    - basepackages
    - database
```

`salt.tops.ext_nodes.`**`top`**`(`*`**kwargs`*`)`
Run the command configured

19.21.3 salt.tops.mongo

Read tops data from a mongodb collection

This module will load tops data from a mongo collection. It uses the node's id for lookups.

Salt Master Mongo Configuration

The module shares the same base mongo connection variables as *`salt.returners.mongo_return`*. These variables go in your master config file.

- `mongo.db` - The mongo database to connect to. Defaults to `'salt'`.
- `mongo.host` - The mongo host to connect to. Supports replica sets by specifying all hosts in the set, comma-delimited. Defaults to `'salt'`.
- `mongo.port` - The port that the mongo database is running on. Defaults to `27017`.
- `mongo.user` - The username for connecting to mongo. Only required if you are using mongo authentication. Defaults to `''`.
- `mongo.password` - The password for connecting to mongo. Only required if you are using mongo authentication. Defaults to `''`.

Configuring the Mongo Tops Subsystem

```
master_tops:
  mongo:
    collection: tops
    id_field: _id
    re_replace: ""
    re_pattern: \.example\.com
    states_field: states
    environment_field: environment
```

Module Documentation

salt.tops.mongo.**top**(***kwargs*)

Connect to a mongo database and read per-node tops data.

Parameters

- **collection** (*) -- The mongodb collection to read data from. Defaults to 'tops'.
- **id_field** (*) -- The field in the collection that represents an individual minion id. Defaults to '_id'.
- **re_pattern** (*) -- If your naming convention in the collection is shorter than the minion id, you can use this to trim the name. *re_pattern* will be used to match the name, and *re_replace* will be used to replace it. Backrefs are supported as they are in the Python standard library. If None, no mangling of the name will be performed - the collection will be searched with the entire minion id. Defaults to None.
- **re_replace** (*) -- Use as the replacement value in node ids matched with *re_pattern*. Defaults to ''. Feel free to use backreferences here.
- **states_field** (*) -- The name of the field providing a list of states.
- **environment_field** (*) -- The name of the field providing the environment. Defaults to environment.

19.21.4 salt.tops.reclass_adapter

Read tops data from a reclass database

This *master_tops* plugin provides access to the **reclass** database, such that state information (top data) are retrieved from **reclass**.

You can find more information about **reclass** at http://reclass.pantsfullofunix.net.

To use the plugin, add it to the master_tops list in the Salt master config and tell **reclass** by way of a few options how and where to find the inventory:

```
master_tops:
  reclass:
    storage_type: yaml_fs
    inventory_base_uri: /srv/salt
```

This would cause **reclass** to read the inventory from YAML files in /srv/salt/nodes and /srv/salt/classes.

If you are also using **reclass** as ext_pillar plugin, and you want to avoid having to specify the same information for both, use YAML anchors (take note of the differing data types for ext_pillar and master_tops):

```
reclass: &reclass
  storage_type: yaml_fs
```

```
  inventory_base_uri: /srv/salt
  reclass_source_path: ~/code/reclass

ext_pillar:
  - reclass: *reclass

master_tops:
  reclass: *reclass
```

If you want to run reclass from source, rather than installing it, you can either let the master know via the PYTHONPATH environment variable, or by setting the configuration option, like in the example above.

`salt.tops.reclass_adapter.`**`top`**`(`*`**kwargs`*`)`
Query **reclass** for the top data (states of the minions).

19.21.5 salt.tops.varstack

Use *Varstack <https://github.com/conversis/varstack>* to provide tops data

This *master_tops* plugin provides access to the **varstack** hierarchical yaml files, so you can user **varstack** as a full *external node classifier* and store state information (top data) in it.

Configuring Varstack

To use varstack as a master top external node classifier, install varstack as documented. Then, add to your master's configuration:

```
master_tops:
  varstack: /path/to/the/config/file/varstack.yaml
```

Varstack will then use /path/to/the/config/file/varstack.yaml (usually /etc/varstack.yaml) to determine which configuration data to return as adapter information. From there you can take a look at the *README <https://github.com/conversis/varstack/blob/master/README.md>* of varstack to learn how this file is evaluated. The ENC part will just return the `states' dictionary for the node.

Ie, if my.fqdn.yaml file contains:

```
---
states:
  - sudo
  - openssh
  - apache
  - salt.minion
```

these will be returned as {`base': ['sudo', `openssh', `apache', `salt.minion']} and managed by salt as if given from a top.sls file.

`salt.tops.varstack.`**`top`**`(`*`**kwargs`*`)`
Query **varstack** for the top data (states of the minions).

19.22 wheel modules

config	Manage the master configuration file
error	Error generator to enable integration testing of salt wheel error handling
file_roots	Read in files from the file_root and save files to the file root
key	Wheel system wrapper for the Salt key system to be used in interactions with the Salt Master programmatically.
minions	Wheel system wrapper for connected minions
pillar_roots	The *pillar_roots* wheel module is used to manage files under the pillar roots directories on the master server.

19.22.1 salt.wheel.config

Manage the master configuration file

`salt.wheel.config.`**`apply`**(*key*, *value*)
Set a single key

> **Note:** This will strip comments from your config file

`salt.wheel.config.`**`update_config`**(*file_name*, *yaml_contents*)
Update master config with `yaml_contents`.

Writes `yaml_contents` to a file named `file_name.conf` under the folder specified by `default_include`. This folder is named `master.d` by default. Please look at `include-configuration` for more information.

Example low data:

```
data = {
    'username': 'salt',
    'password': 'salt',
    'fun': 'config.update_config',
    'file_name': 'gui',
    'yaml_contents': {'id': 1},
    'client': 'wheel',
    'eauth': 'pam',
}
```

`salt.wheel.config.`**`values`**()
Return the raw values of the config file

19.22.2 salt.wheel.error

Error generator to enable integration testing of salt wheel error handling

`salt.wheel.error.`**`error`**(*name=None*, *message=''*)
If name is None Then return empty dict

Otherwise raise an exception with __name__ from name, message from message

CLI Example:

```
salt-wheel error
salt-wheel error.error name="Exception" message="This is an error."
```

19.22.3 salt.wheel.file_roots

Read in files from the file_root and save files to the file root

salt.wheel.file_roots.**find**(*path*, *saltenv='base'*)
Return a dict of the files located with the given path and environment

salt.wheel.file_roots.**list_env**(*saltenv='base'*)
Return all of the file paths found in an environment

salt.wheel.file_roots.**list_roots**()
Return all of the files names in all available environments

salt.wheel.file_roots.**read**(*path*, *saltenv='base'*)
Read the contents of a text file, if the file is binary then

salt.wheel.file_roots.**write**(*data*, *path*, *saltenv='base'*, *index=0*)
Write the named file, by default the first file found is written, but the index of the file can be specified to write to a lower priority file root

19.22.4 salt.wheel.key

Wheel system wrapper for the Salt key system to be used in interactions with the Salt Master programmatically.

The key module for the wheel system is meant to provide an internal interface for other Salt systems to interact with the Salt Master. The following usage examples assume that a WheelClient is available:

```
import salt.config
import salt.wheel
opts = salt.config.master_config('/etc/salt/master')
wheel = salt.wheel.WheelClient(opts)
```

Note that importing and using the `WheelClient` must be performed on the same machine as the Salt Master and as the same user that runs the Salt Master, unless *`external_auth`* is configured and the user is authorized to execute wheel functions.

The function documentation starts with the `wheel` reference from the code sample above and use the `WheelClient` functions to show how they can be called from a Python interpreter.

The wheel key functions can also be called via a `salt` command at the CLI using the *`saltutil execution module`*.

salt.wheel.key.**accept**(*match*, *include_rejected=False*, *include_denied=False*)
Accept keys based on a glob match. Returns a dictionary.
match The glob match of keys to accept.
include_rejected To include rejected keys in the match along with pending keys, set this to `True`. Defaults to `False`.
include_denied To include denied keys in the match along with pending keys, set this to `True`. Defaults to `False`.

```
>>> wheel.cmd('key.accept', ['minion1'])
{'minions': ['minion1']}
```

salt.wheel.key.**accept_dict**(*match*, *include_rejected=False*, *include_denied=False*)

Accept keys based on a dict of keys. Returns a dictionary.

match The dictionary of keys to accept.

include_rejected To include rejected keys in the match along with pending keys, set this to `True`. Defaults to `False`.

New in version 2016.3.4.

include_denied To include denied keys in the match along with pending keys, set this to `True`. Defaults to `False`.

New in version 2016.3.4.

Example to move a list of keys from the `minions_pre` (pending) directory to the `minions` (accepted) directory:

```
>>> wheel.cmd('accept_dict',
{
    'minions_pre': [
        'jerry',
        'stuart',
        'bob',
    ],
})
{'minions': ['jerry', 'stuart', 'bob']}
```

salt.wheel.key.**delete**(*match*)

Delete keys based on a glob match. Returns a dictionary.

match The glob match of keys to delete.

```
>>> wheel.cmd_async({'fun': 'key.delete', 'match': 'minion1'})
{'jid': '20160826201244808521', 'tag': 'salt/wheel/20160826201244808521'}
```

salt.wheel.key.**delete_dict**(*match*)

Delete keys based on a dict of keys. Returns a dictionary.

match The dictionary of keys to delete.

```
>>> wheel.cmd_async({'fun': 'key.delete_dict',
'match': {
    'minions': [
        'jerry',
        'stuart',
        'bob',
    ],
})
{'jid': '20160826201244808521', 'tag': 'salt/wheel/20160826201244808521'}
```

salt.wheel.key.**finger**(*match*, *hash_type=None*)

Return the matching key fingerprints. Returns a dictionary.

match The key for with to retrieve the fingerprint.

hash_type The hash algorithm used to calculate the fingerprint

```
>>> wheel.cmd('key.finger', ['minion1'])
{'minions': {'minion1': '5d:f6:79:43:5e:d4:42:3f:57:b8:45:a8:7e:a4:6e:ca'}}
```

salt.wheel.key.**finger_master**(*hash_type=None*)

Return the fingerprint of the master's public key

hash_type The hash algorithm used to calculate the fingerprint

```
>>> wheel.cmd('key.finger_master')
{'local': {'master.pub': '5d:f6:79:43:5e:d4:42:3f:57:b8:45:a8:7e:a4:6e:ca'}}
```

salt.wheel.key.**gen**(*id_=None*, *keysize=2048*)

Generate a key pair. No keys are stored on the master. A key pair is returned as a dict containing pub and priv keys. Returns a dictionary containing the the pub and priv keys with their generated values.

id_ Set a name to generate a key pair for use with salt. If not specified, a random name will be specified.

keysize The size of the key pair to generate. The size must be 2048, which is the default, or greater. If set to a value less than 2048, the key size will be rounded up to 2048.

```
>>> wheel.cmd('key.gen')
{'pub': '-----BEGIN PUBLIC KEY-----\nMIIBIjANBgkqhkiG9w0BAQEFAAOCAQ8AMIIBC
...
BBPfamX9gGPQTpN9e8HwcZjXQnmg8OrcUl10WHw09SDWLOlnW+ueTWugEQpPt\niQIDAQAB\n
-----END PUBLIC KEY-----',
'priv': '-----BEGIN RSA PRIVATE KEY-----\nMIIEpAIBAAKCAQEA42Kf+w9XeZWgguzv
...
QH3/W74X1+WTBlx4R2KGLYBiH+bCCFEQ/Zvcu4Xp4bIOPtRKozEQ==\n
-----END RSA PRIVATE KEY-----'}
```

salt.wheel.key.**gen_accept**(*id_*, *keysize=2048*, *force=False*)

Generate a key pair then accept the public key. This function returns the key pair in a dict, only the public key is preserved on the master. Returns a dictionary.

id_ The name of the minion for which to generate a key pair.

keysize The size of the key pair to generate. The size must be 2048, which is the default, or greater. If set to a value less than 2048, the key size will be rounded up to 2048.

force If a public key has already been accepted for the given minion on the master, then the gen_accept function will return an empty dictionary and not create a new key. This is the default behavior. If force is set to True, then the minion's previously accepted key will be overwritten.

```
>>> wheel.cmd('key.gen_accept', ['foo'])
{'pub': '-----BEGIN PUBLIC KEY-----\nMIIBIjANBgkqhkiG9w0BAQEFAAOCAQ8AMIIBC
...
BBPfamX9gGPQTpN9e8HwcZjXQnmg8OrcUl10WHw09SDWLOlnW+ueTWugEQpPt\niQIDAQAB\n
-----END PUBLIC KEY-----',
'priv': '-----BEGIN RSA PRIVATE KEY-----\nMIIEpAIBAAKCAQEA42Kf+w9XeZWgguzv
...
QH3/W74X1+WTBlx4R2KGLYBiH+bCCFEQ/Zvcu4Xp4bIOPtRKozEQ==\n
-----END RSA PRIVATE KEY-----'}
```

We can now see that the foo minion's key has been accepted by the master:

```
>>> wheel.cmd('key.list', ['accepted'])
{'minions': ['foo', 'minion1', 'minion2', 'minion3']}
```

salt.wheel.key.**gen_keys**(*keydir=None*, *keyname=None*, *keysize=None*, *user=None*)

Generate minion RSA public keypair

salt.wheel.key.**gen_signature**(*priv*, *pub*, *signature_path*, *auto_create=False*, *keysize=None*)

Generate master public-key-signature

salt.wheel.key.**print**(*match*)

Return information about the key. Returns a dictionary.

match The key to return information about.

```
>>> wheel.cmd('key.key_str', ['minion1'])
{'minions': {'minion1': '-----BEGIN PUBLIC KEY-----\nMIIBIjANBgkqhkiG9w0B
```

```
...
TWugEQpPt\niQIDAQAB\n-----END PUBLIC KEY-----'}}
```

salt.wheel.key.**list**(*match*)

List all the keys under a named status. Returns a dictionary.

match The type of keys to list. The `pre`, `un`, and `unaccepted` options will list unaccepted/unsigned keys. `acc` or `accepted` will list accepted/signed keys. `rej` or `rejected` will list rejected keys. Finally, `all` will list all keys.

```
>>> wheel.cmd('key.list', ['accepted'])
{'minions': ['minion1', 'minion2', 'minion3']}
```

salt.wheel.key.**list_all**()

List all the keys. Returns a dictionary containing lists of the minions in each salt-key category, including `minions`, `minions_rejected`, `minions_denied`, etc. Returns a dictionary.

```
>>> wheel.cmd('key.list_all')
{'local': ['master.pem', 'master.pub'], 'minions_rejected': [],
'minions_denied': [], 'minions_pre': [],
'minions': ['minion1', 'minion2', 'minion3']}
```

salt.wheel.key.**name_match**(*match*)

List all the keys based on a glob match

salt.wheel.key.**reject**(*match*, *include_accepted=False*, *include_denied=False*)

Reject keys based on a glob match. Returns a dictionary.

match The glob match of keys to reject.

include_accepted To include accepted keys in the match along with pending keys, set this to `True`. Defaults to `False`.

include_denied To include denied keys in the match along with pending keys, set this to `True`. Defaults to `False`.

```
>>> wheel.cmd_async({'fun': 'key.reject', 'match': 'minion1'})
{'jid': '20160826201244808521', 'tag': 'salt/wheel/20160826201244808521'}
```

salt.wheel.key.**reject_dict**(*match*, *include_accepted=False*, *include_denied=False*)

Reject keys based on a dict of keys. Returns a dictionary.

match The dictionary of keys to reject.

include_accepted To include accepted keys in the match along with pending keys, set this to `True`. Defaults to `False`.

New in version 2016.3.4.

include_denied To include denied keys in the match along with pending keys, set this to `True`. Defaults to `False`.

New in version 2016.3.4.

```
>>> wheel.cmd_async({'fun': 'key.reject_dict',
'match': {
    'minions': [
        'jerry',
        'stuart',
        'bob',
    ],
})
{'jid': '20160826201244808521', 'tag': 'salt/wheel/20160826201244808521'}
```

19.22.5 salt.wheel.minions

Wheel system wrapper for connected minions

salt.wheel.minions.**connected**()
List all connected minions on a salt-master

19.22.6 salt.wheel.pillar_roots

The *pillar_roots* wheel module is used to manage files under the pillar roots directories on the master server.

salt.wheel.pillar_roots.**find**(*path*, *saltenv='base'*)
Return a dict of the files located with the given path and environment

salt.wheel.pillar_roots.**list_env**(*saltenv='base'*)
Return all of the file paths found in an environment

salt.wheel.pillar_roots.**list_roots**()
Return all of the files names in all available environments

salt.wheel.pillar_roots.**read**(*path*, *saltenv='base'*)
Read the contents of a text file, if the file is binary then

salt.wheel.pillar_roots.**write**(*data*, *path*, *saltenv='base'*, *index=0*)
Write the named file, by default the first file found is written, but the index of the file can be specified to write to a lower priority file root

CHAPTER 20

APIs

20.1 Python client API

Salt provides several entry points for interfacing with Python applications. These entry points are often referred to as `*Client()` APIs. Each client accesses different parts of Salt, either from the master or from a minion. Each client is detailed below.

See also:

There are many ways to access Salt programmatically.

Salt can be used from CLI scripts as well as via a REST interface.

See Salt's *outputter system* to retrieve structured data from Salt as JSON, or as shell-friendly text, or many other formats.

See the *state.event* runner to utilize Salt's event bus from shell scripts.

Salt's netapi module provides access to Salt externally via a REST interface. Review the netapi module documentation for more information.

20.1.1 Salt's `opts` dictionary

Some clients require access to Salt's `opts` dictionary. (The dictionary representation of the *master* or *minion* config files.)

A common pattern for fetching the `opts` dictionary is to defer to environment variables if they exist or otherwise fetch the config from the default location.

`salt.config.`**`client_config`**(*path*, *env_var='SALT_CLIENT_CONFIG'*, *defaults=None*)

Load Master configuration data

Usage:

```
import salt.config
master_opts = salt.config.client_config('/etc/salt/master')
```

Returns a dictionary of the Salt Master configuration file with necessary options needed to communicate with a locally-running Salt Master daemon. This function searches for client specific configurations and adds them to the data from the master configuration.

This is useful for master-side operations like *LocalClient*.

salt.config.**minion_config**(*path*, *env_var='SALT_MINION_CONFIG'*, *defaults=None*, *cache_minion_id=False*, *ignore_config_errors=True*, *minion_id=None*, *role='minion'*)

Reads in the minion configuration file and sets up special options

This is useful for Minion-side operations, such as the *Caller* class, and manually running the loader interface.

```
import salt.config
minion_opts = salt.config.minion_config('/etc/salt/minion')
```

20.1.2 Salt's Loader Interface

Modules in the Salt ecosystem are loaded into memory using a custom loader system. This allows modules to have conditional requirements (OS, OS version, installed libraries, etc) and allows Salt to inject special variables (__salt__, __opts__, etc).

Most modules can be manually loaded. This is often useful in third-party Python apps or when writing tests. However some modules require and expect a full, running Salt system underneath. Notably modules that facilitate master-to-minion communication such as the *mine*, *publish*, and peer execution modules. The error KeyError: 'master_uri' is a likely indicator for this situation. In those instances use the *Caller* class to execute those modules instead.

Each module type has a corresponding loader function.

salt.loader.**minion_mods**(*opts*, *context=None*, *utils=None*, *whitelist=None*, *initial_load=False*, *loaded_base_name=None*, *notify=False*, *static_modules=None*, *proxy=None*)

Load execution modules

Returns a dictionary of execution modules appropriate for the current system by evaluating the __virtual__() function in each module.

Parameters

- **opts** (*dict*) -- The Salt options dictionary
- **context** (*dict*) -- A Salt context that should be made present inside generated modules in __context__
- **utils** (*dict*) -- Utility functions which should be made available to Salt modules in __utils__. See *utils_dirs* in salt.config for additional information about configuration.
- **whitelist** (*list*) -- A list of modules which should be whitelisted.
- **initial_load** (*bool*) -- Deprecated flag! Unused.
- **loaded_base_name** (*str*) -- A string marker for the loaded base name.
- **notify** (*bool*) -- Flag indicating that an event should be fired upon completion of module loading.

```
import salt.config
import salt.loader

__opts__ = salt.config.minion_config('/etc/salt/minion')
__grains__ = salt.loader.grains(__opts__)
__opts__['grains'] = __grains__
__utils__ = salt.loader.utils(__opts__)
__salt__ = salt.loader.minion_mods(__opts__, utils=__utils__)
__salt__['test.ping']()
```

salt.loader.**raw_mod**(*opts*, *name*, *functions*, *mod='modules'*)

Returns a single module loaded raw and bypassing the __virtual__ function

```
import salt.config
import salt.loader

__opts__ = salt.config.minion_config('/etc/salt/minion')
testmod = salt.loader.raw_mod(__opts__, 'test', None)
testmod['test.ping']()
```

salt.loader.**states**(*opts*, *functions*, *utils*, *serializers*, *whitelist=None*, *proxy=None*)

Returns the state modules

Parameters

- **opts** (*dict*) -- The Salt options dictionary
- **functions** (*dict*) -- A dictionary of minion modules, with module names as keys and funcs as values.

```
import salt.config
import salt.loader

__opts__ = salt.config.minion_config('/etc/salt/minion')
statemods = salt.loader.states(__opts__, None, None)
```

salt.loader.**grains**(*opts*, *force_refresh=False*, *proxy=None*)

Return the functions for the dynamic grains and the values for the static grains.

Since grains are computed early in the startup process, grains functions do not have __salt__ or __proxy__ available. At proxy-minion startup, this function is called with the proxymodule LazyLoader object so grains functions can communicate with their controlled device.

```
import salt.config
import salt.loader

__opts__ = salt.config.minion_config('/etc/salt/minion')
__grains__ = salt.loader.grains(__opts__)
print __grains__['id']
```

salt.loader.**grain_funcs**(*opts*, *proxy=None*)

Returns the grain functions

```
import salt.config
import salt.loader

__opts__ = salt.config.minion_config('/etc/salt/minion')
grainfuncs = salt.loader.grain_funcs(__opts__)
```

20.1.3 Salt's Client Interfaces

LocalClient

class salt.client.**LocalClient**(*c_path='/etc/salt/master'*, *mopts=None*, *skip_perm_errors=False*, *io_loop=None*, *keep_loop=False*, *auto_reconnect=False*)

The interface used by the **salt** CLI tool on the Salt Master

`LocalClient` is used to send a command to Salt minions to execute *execution modules* and return the results to the Salt Master.

Importing and using `LocalClient` must be done on the same machine as the Salt Master and it must be done using the same user that the Salt Master is running as. (Unless `external_auth` is configured and

authentication credentials are included in the execution).

Note: The LocalClient uses a Tornado IOLoop, this can create issues when using the LocalClient inside an existing IOLoop. If creating the LocalClient in partnership with another IOLoop either create the IOLoop before creating the LocalClient, or when creating the IOLoop use ioloop.current() which will return the ioloop created by LocalClient.

```
import salt.client

local = salt.client.LocalClient()
local.cmd('*', 'test.fib', [10])
```

cmd(*tgt*, *fun*, *arg=()*, *timeout=None*, *tgt_type='glob'*, *ret=''*, *jid=''*, *full_return=False*, *kwarg=None*, ***kwargs*)
Synchronously execute a command on targeted minions

The cmd method will execute and wait for the timeout period for all minions to reply, then it will return all minion data at once.

```
>>> import salt.client
>>> local = salt.client.LocalClient()
>>> local.cmd('*', 'cmd.run', ['whoami'])
{'jerry': 'root'}
```

With extra keyword arguments for the command function to be run:

```
local.cmd('*', 'test.arg', ['arg1', 'arg2'], kwarg={'foo': 'bar'})
```

Compound commands can be used for multiple executions in a single publish. Function names and function arguments are provided in separate lists but the index values must correlate and an empty list must be used if no arguments are required.

```
>>> local.cmd('*', [
        'grains.items',
        'sys.doc',
        'cmd.run',
    ],
    [
        [],
        [],
        ['uptime'],
    ])
```

Parameters

- **tgt** (*string or list*) -- Which minions to target for the execution. Default is shell glob. Modified by the `tgt_type` option.
- **fun** (*string or list of strings*) -- The module and function to call on the specified minions of the form `module.function`. For example `test.ping` or `grains.items`.

  Compound commands Multiple functions may be called in a single publish by passing a list of commands. This can dramatically lower overhead and speed up the application communicating with Salt.

  This requires that the `arg` param is a list of lists. The `fun` list and the `arg` list must correlate by index meaning a function that does not take

arguments must still have a corresponding empty list at the expected index.

- **arg** (*list or list-of-lists*) -- A list of arguments to pass to the remote function. If the function takes no arguments `arg` may be omitted except when executing a compound command.
- **timeout** -- Seconds to wait after the last minion returns but before all minions return.
- **tgt_type** -- The type of `tgt`. Allowed values:
  - `glob` - Bash glob completion - Default
  - `pcre` - Perl style regular expression
  - `list` - Python list of hosts
  - `grain` - Match based on a grain comparison
  - `grain_pcre` - Grain comparison with a regex
  - `pillar` - Pillar data comparison
  - `pillar_pcre` - Pillar data comparison with a regex
  - `nodegroup` - Match on nodegroup
  - `range` - Use a Range server for matching
  - `compound` - Pass a compound match string
  - `ipcidr` - Match based on Subnet (CIDR notation) or IPv4 address.

  Changed in version 2017.7.0: Renamed from `expr_form` to `tgt_type`
- **ret** -- The returner to use. The value passed can be single returner, or a comma delimited list of returners to call in order on the minions
- **kwarg** -- A dictionary with keyword arguments for the function.
- **full_return** -- Output the job return only (default) or the full return including exit code and other job metadata.
- **kwargs** -- Optional keyword arguments. Authentication credentials may be passed when using *external_auth*.

  For example: `local.cmd('*','test.ping',username='saltdev',password='saltde`
  Or: `local.cmd('*','test.ping',token='5871821ea51754fdcea8153c1c745433')`

Returns A dictionary with the result of the execution, keyed by minion ID. A compound command will return a sub-dictionary keyed by function name.

cmd_async(*tgt*, *fun*, *arg=()*, *tgt_type='glob'*, *ret=''*, *jid=''*, *kwarg=None*, ***kwargs*)

Asynchronously send a command to connected minions

The function signature is the same as `cmd()` with the following exceptions.

Returns A job ID or 0 on failure.

```
>>> local.cmd_async('*', 'test.sleep', [300])
'20131219215921857715'
```

cmd_batch(*tgt*, *fun*, *arg=()*, *tgt_type='glob'*, *ret=''*, *kwarg=None*, *batch='10%'*, ***kwargs*)

Iteratively execute a command on subsets of minions at a time

The function signature is the same as `cmd()` with the following exceptions.

Parameters **batch** -- The batch identifier of systems to execute on

Returns A generator of minion returns

```
>>> returns = local.cmd_batch('*', 'state.highstate', batch='10%')
>>> for ret in returns:
...     print(ret)
{'jerry': {...}}
{'dave': {...}}
{'stewart': {...}}
```

cmd_iter(*tgt*, *fun*, *arg=()*, *timeout=None*, *tgt_type='glob'*, *ret=''*, *kwarg=None*, ***kwargs*)

Yields the individual minion returns as they come in

The function signature is the same as `cmd()` with the following exceptions.

Returns A generator yielding the individual minion returns

```
>>> ret = local.cmd_iter('*', 'test.ping')
>>> for i in ret:
...     print(i)
{'jerry': {'ret': True}}
{'dave': {'ret': True}}
{'stewart': {'ret': True}}
```

cmd_iter_no_block(*tgt*, *fun*, *arg=()*, *timeout=None*, *tgt_type='glob'*, *ret=''*, *kwarg=None*, *show_jid=False*, *verbose=False*, ***kwargs*)

Yields the individual minion returns as they come in, or None when no returns are available.

The function signature is the same as `cmd()` with the following exceptions.

Returns A generator yielding the individual minion returns, or None when no returns are available. This allows for actions to be injected in between minion returns.

```
>>> ret = local.cmd_iter_no_block('*', 'test.ping')
>>> for i in ret:
...     print(i)
None
{'jerry': {'ret': True}}
{'dave': {'ret': True}}
None
{'stewart': {'ret': True}}
```

cmd_subset(*tgt*, *fun*, *arg=()*, *tgt_type='glob'*, *ret=''*, *kwarg=None*, *sub=3*, *cli=False*, *progress=False*, *full_return=False*, ***kwargs*)

Execute a command on a random subset of the targeted systems

The function signature is the same as `cmd()` with the following exceptions.

Parameters

- **sub** -- The number of systems to execute on
- **cli** -- When this is set to True, a generator is returned, otherwise a dictionary of the minion returns is returned

```
>>> SLC.cmd_subset('*', 'test.ping', sub=1)
{'jerry': True}
```

get_cli_returns(*jid*, *minions*, *timeout=None*, *tgt='**', *tgt_type='glob'*, *verbose=False*, *show_jid=False*, ***kwargs*)

Starts a watcher looking at the return data for a specified JID

Returns all of the information for the JID

get_event_iter_returns(*jid*, *minions*, *timeout=None*)

Gather the return data from the event system, break hard when timeout is reached.

run_job(*tgt*, *fun*, *arg=()*, *tgt_type='glob'*, *ret=''*, *timeout=None*, *jid=''*, *kwarg=None*, *listen=False*, ***kwargs*)

Asynchronously send a command to connected minions

Prep the job directory and publish a command to any targeted minions.

Returns A dictionary of (validated) `pub_data` or an empty dictionary on failure. The `pub_data` contains the job ID and a list of all minions that are expected to return data.

```
>>> local.run_job('*', 'test.sleep', [300])
{'jid': '20131219215650131543', 'minions': ['jerry']}
```

Salt Caller

class salt.client.**Caller**(*c_path='/etc/salt/minion'*, *mopts=None*)

Caller is the same interface used by the **salt-call** command-line tool on the Salt Minion.

Changed in version 2015.8.0: Added the cmd method for consistency with the other Salt clients. The existing function and sminion.functions interfaces still exist but have been removed from the docs.

Importing and using Caller must be done on the same machine as a Salt Minion and it must be done using the same user that the Salt Minion is running as.

Usage:

```
import salt.client
caller = salt.client.Caller()
caller.cmd('test.ping')
```

Note, a running master or minion daemon is not required to use this class. Running salt-call --local simply sets *file_client* to 'local'. The same can be achieved at the Python level by including that setting in a minion config file.

New in version 2014.7.0: Pass the minion config as the mopts dictionary.

```
import salt.client
import salt.config
__opts__ = salt.config.minion_config('/etc/salt/minion')
__opts__['file_client'] = 'local'
caller = salt.client.Caller(mopts=__opts__)
```

cmd(*fun*, **args*, ***kwargs*)

Call an execution module with the given arguments and keyword arguments

Changed in version 2015.8.0: Added the cmd method for consistency with the other Salt clients. The existing function and sminion.functions interfaces still exist but have been removed from the docs.

```
caller.cmd('test.arg', 'Foo', 'Bar', baz='Baz')

caller.cmd('event.send', 'myco/myevent/something',
    data={'foo': 'Foo'}, with_env=['GIT_COMMIT'], with_grains=True)
```

RunnerClient

class salt.runner.**RunnerClient**(*opts*)

The interface used by the **salt-run** CLI tool on the Salt Master

It executes *runner modules* which run on the Salt Master.

Importing and using RunnerClient must be done on the same machine as the Salt Master and it must be done using the same user that the Salt Master is running as.

Salt's *external_auth* can be used to authenticate calls. The eauth user must be authorized to execute runner modules: (@runner). Only the master_call() below supports eauth.

async(*fun*, *low*, *user='UNKNOWN'*, *pub=None*)
Execute the function in a multiprocess and return the event tag to use to watch for the return

cmd(*fun*, *arg=None*, *pub_data=None*, *kwarg=None*, *print_event=True*, *full_return=False*)
Execute a function

cmd_async(*low*)
Execute a runner function asynchronously; eauth is respected

This function requires that *external_auth* is configured and the user is authorized to execute runner functions: (`@runner`).

```
runner.eauth_async({
    'fun': 'jobs.list_jobs',
    'username': 'saltdev',
    'password': 'saltdev',
    'eauth': 'pam',
})
```

cmd_sync(*low*, *timeout=None*, *full_return=False*)
Execute a runner function synchronously; eauth is respected

This function requires that *external_auth* is configured and the user is authorized to execute runner functions: (`@runner`).

```
runner.eauth_sync({
    'fun': 'jobs.list_jobs',
    'username': 'saltdev',
    'password': 'saltdev',
    'eauth': 'pam',
})
```

WheelClient

class salt.wheel.**WheelClient**(*opts=None*)
An interface to Salt's wheel modules

Wheel modules interact with various parts of the Salt Master.

Importing and using `WheelClient` must be done on the same machine as the Salt Master and it must be done using the same user that the Salt Master is running as. Unless *external_auth* is configured and the user is authorized to execute wheel functions: (`@wheel`).

Usage:

```
import salt.config
import salt.wheel
opts = salt.config.master_config('/etc/salt/master')
wheel = salt.wheel.WheelClient(opts)
```

async(*fun*, *low*, *user='UNKNOWN'*, *pub=None*)
Execute the function in a multiprocess and return the event tag to use to watch for the return

cmd(*fun*, *arg=None*, *pub_data=None*, *kwarg=None*, *print_event=True*, *full_return=False*)
Execute a function

```
>>> wheel.cmd('key.finger', ['jerry'])
{'minions': {'jerry': '5d:f6:79:43:5e:d4:42:3f:57:b8:45:a8:7e:a4:6e:ca'}}
```

cmd_async(*low*)
Execute a function asynchronously; eauth is respected

This function requires that *external_auth* is configured and the user is authorized

```
>>> wheel.cmd_async({
    'fun': 'key.finger',
    'match': 'jerry',
    'eauth': 'auto',
    'username': 'saltdev',
    'password': 'saltdev',
})
{'jid': '20131219224744416681', 'tag': 'salt/wheel/20131219224744416681'}
```

cmd_sync(*low*, *timeout=None*, *full_return=False*)
Execute a wheel function synchronously; eauth is respected

This function requires that *external_auth* is configured and the user is authorized to execute runner functions: (`@wheel`).

```
>>> wheel.cmd_sync({
'fun': 'key.finger',
'match': 'jerry',
'eauth': 'auto',
'username': 'saltdev',
'password': 'saltdev',
})
{'minions': {'jerry': '5d:f6:79:43:5e:d4:42:3f:57:b8:45:a8:7e:a4:6e:ca'}}
```

CloudClient

class salt.cloud.**CloudClient**(*path=None*, *opts=None*, *config_dir=None*, *pillars=None*)
The client class to wrap cloud interactions

action(*fun=None*, *cloudmap=None*, *names=None*, *provider=None*, *instance=None*, *kwargs=None*)
Execute a single action via the cloud plugin backend

Examples:

```
client.action(fun='show_instance', names=['myinstance'])
client.action(fun='show_image', provider='my-ec2-config',
    kwargs={'image': 'ami-10314d79'}
)
```

create(*provider*, *names*, ***kwargs*)
Create the named VMs, without using a profile

Example:

```
client.create(provider='my-ec2-config', names=['myinstance'],
    image='ami-1624987f', size='t1.micro', ssh_username='ec2-user',
    securitygroup='default', delvol_on_destroy=True)
```

destroy(*names*)
Destroy the named VMs

extra_action(*names*, *provider*, *action*, ***kwargs*)
Perform actions with block storage devices

Example:

```
client.extra_action(names=['myblock'], action='volume_create',
    provider='my-nova', kwargs={'voltype': 'SSD', 'size': 1000}
)
client.extra_action(names=['salt-net'], action='network_create',
    provider='my-nova', kwargs={'cidr': '192.168.100.0/24'}
)
```

full_query(*query_type='list_nodes_full'*)
Query all instance information

list_images(*provider=None*)
List all available images in configured cloud systems

list_locations(*provider=None*)
List all available locations in configured cloud systems

list_sizes(*provider=None*)
List all available sizes in configured cloud systems

low(*fun*, *low*)
Pass the cloud function and low data structure to run

map_run(*path=None*, ***kwargs*)
Pass in a location for a map to execute

min_query(*query_type='list_nodes_min'*)
Query select instance information

profile(*profile*, *names*, *vm_overrides=None*, ***kwargs*)
Pass in a profile to create, names is a list of vm names to allocate
vm_overrides is a special dict that will be per node options overrides
Example:

```
>>> client= salt.cloud.CloudClient(path='/etc/salt/cloud')
>>> client.profile('do_512_git', names=['minion01',])
{'minion01': {u'backups_active': 'False',
        u'created_at': '2014-09-04T18:10:15Z',
        u'droplet': {u'event_id': 31000502,
                     u'id': 2530006,
                     u'image_id': 5140006,
                     u'name': u'minion01',
                     u'size_id': 66},
        u'id': '2530006',
        u'image_id': '5140006',
        u'ip_address': '107.XXX.XXX.XXX',
        u'locked': 'True',
        u'name': 'minion01',
        u'private_ip_address': None,
        u'region_id': '4',
        u'size_id': '66',
        u'status': 'new'}}
```

query(*query_type='list_nodes'*)
Query basic instance information

select_query(*query_type='list_nodes_select'*)
Query select instance information

SSHClient

class salt.client.ssh.client.**SSHClient**(*c_path='/etc/salt/master'*, *mopts=None*, *disable_custom_roster=False*)

Create a client object for executing routines via the salt-ssh backend

New in version 2015.5.0.

cmd(*tgt*, *fun*, *arg=()*, *timeout=None*, *tgt_type='glob'*, *kwarg=None*, ***kwargs*)

Execute a single command via the salt-ssh subsystem and return all routines at once

New in version 2015.5.0.

cmd_iter(*tgt*, *fun*, *arg=()*, *timeout=None*, *tgt_type='glob'*, *ret=''*, *kwarg=None*, ***kwargs*)

Execute a single command via the salt-ssh subsystem and return a generator

New in version 2015.5.0.

20.2 netapi modules

20.2.1 Introduction to netapi modules

netapi modules provide API-centric access to Salt. Usually externally-facing services such as REST or WebSockets, XMPP, XMLRPC, etc.

In general netapi modules bind to a port and start a service. They are purposefully open-ended. A single module can be configured to run as well as multiple modules simultaneously.

netapi modules are enabled by adding configuration to your Salt Master config file and then starting the **salt-api** daemon. Check the docs for each module to see external requirements and configuration settings.

Communication with Salt and Salt satellite projects is done using Salt's own *Python API*. A list of available client interfaces is below.

---

salt-api

Prior to Salt's 2014.7.0 release, netapi modules lived in the separate sister projected `salt-api`. That project has been merged into the main Salt project.

See also:

The full list of netapi modules

20.2.2 Client interfaces

Salt's client interfaces expose executing functions by crafting a dictionary of values that are mapped to function arguments. This allows calling functions simply by creating a data structure. (And this is exactly how much of Salt's own internals work!)

class salt.netapi.**NetapiClient**(*opts*)

Provide a uniform method of accessing the various client interfaces in Salt in the form of low-data data structures. For example:

```
>>> client = NetapiClient(__opts__)
>>> lowstate = {'client': 'local', 'tgt': '*', 'fun': 'test.ping', 'arg': ''}
>>> client.run(lowstate)
```

local(**args*, ***kwargs*)
Run *execution modules* synchronously

See `salt.client.LocalClient.cmd()` for all available parameters.

Sends a command from the master to the targeted minions. This is the same interface that Salt's own CLI uses. Note the `arg` and `kwarg` parameters are sent down to the minion(s) and the given function, `fun`, is called with those parameters.

Returns Returns the result from the execution module

local_async(**args*, ***kwargs*)
Run *execution modules* asynchronously

Wraps `salt.client.LocalClient.run_job()`.

Returns job ID

local_subset(**args*, ***kwargs*)
Run *execution modules* against subsets of minions

New in version 2016.3.0.

Wraps `salt.client.LocalClient.cmd_subset()`

runner(*fun*, *timeout=None*, *full_return=False*, ***kwargs*)
Run *runner modules <all-salt.runners>* synchronously

Wraps `salt.runner.RunnerClient.cmd_sync()`.

Note that runner functions must be called using keyword arguments. Positional arguments are not supported.

Returns Returns the result from the runner module

runner_async(*fun*, ***kwargs*)
Run *runner modules <all-salt.runners>* asynchronously

Wraps `salt.runner.RunnerClient.cmd_async()`.

Note that runner functions must be called using keyword arguments. Positional arguments are not supported.

Returns event data and a job ID for the executed function.

ssh(**args*, ***kwargs*)
Run salt-ssh commands synchronously

Wraps `salt.client.ssh.client.SSHClient.cmd_sync()`.

Returns Returns the result from the salt-ssh command

wheel(*fun*, ***kwargs*)
Run *wheel modules* synchronously

Wraps `salt.wheel.WheelClient.master_call()`.

Note that wheel functions must be called using keyword arguments. Positional arguments are not supported.

Returns Returns the result from the wheel module

wheel_async(*fun*, ***kwargs*)
Run *wheel modules* asynchronously

Wraps `salt.wheel.WheelClient.master_call()`.

Note that wheel functions must be called using keyword arguments. Positional arguments are not supported.

Returns Returns the result from the wheel module

Writing netapi modules

`netapi` modules, put simply, bind a port and start a service. They are purposefully open-ended and can be used to present a variety of external interfaces to Salt, and even present multiple interfaces at once.

See also:

The full list of netapi modules

Configuration

All `netapi` configuration is done in the *Salt master config* and takes a form similar to the following:

```
rest_cherrypy:
  port: 8000
  debug: True
  ssl_crt: /etc/pki/tls/certs/localhost.crt
  ssl_key: /etc/pki/tls/certs/localhost.key
```

The `__virtual__` function

Like all module types in Salt, `netapi` modules go through Salt's loader interface to determine if they should be loaded into memory and then executed.

The `__virtual__` function in the module makes this determination and should return `False` or a string that will serve as the name of the module. If the module raises an `ImportError` or any other errors, it will not be loaded.

The `start` function

The `start()` function will be called for each `netapi` module that is loaded. This function should contain the server loop that actually starts the service. This is started in a multiprocess.

Multiple instances

New in version 2016.11.0.

`rest_cherrypy` and `rest_tornado` support running multiple instances by copying and renaming entire directory of those. To start the copied multiple `netapi` modules, add configuration blocks for the copied `netapi` modules in the Salt Master config. The name of each added configuration block must match with the name of each directory of the copied `netapi` module.

Inline documentation

As with the rest of Salt, it is a best-practice to include liberal inline documentation in the form of a module docstring and docstrings on any classes, methods, and functions in your `netapi` module.

Loader "magic" methods

The loader makes the `__opts__` data structure available to any function in a `netapi` module.

CHAPTER 21

Architecture

If you are used to configuration management tools that require you to plan down to the last detail before you install anything, you are probably wondering why this section doesn't appear before the installation instructions. With Salt, you can switch to a high availability architecture at any time, and add additional components to scale your deployment as you go.

Since a single Salt master can manage thousands of systems, we usually recommend that you start by deploying a single Salt master, and then modifying your deployment as needed for redundancy, geographical distribution, and scale.

21.1 High Availability Features in Salt

Salt supports several features for high availability and fault tolerance. Brief documentation for these features is listed alongside their configuration parameters in *Configuration file examples*.

21.1.1 Multimaster

Salt minions can connect to multiple masters at one time by configuring the *master* configuration parameter as a YAML list of all the available masters. By default, all masters are ``hot'', meaning that any master can direct commands to the Salt infrastructure.

In a multimaster configuration, each master must have the same cryptographic keys, and minion keys must be accepted on all masters separately. The contents of file_roots and pillar_roots need to be kept in sync with processes external to Salt as well

A tutorial on setting up multimaster with ``hot'' masters is here:

Multimaster Tutorial

21.1.2 Multimaster with Failover

Changing the `master_type` parameter from `str` to `failover` will cause minions to connect to the first responding master in the list of masters. Every *`master_alive_interval`* seconds the minions will check to make sure the current master is still responding. If the master does not respond, the minion will attempt to connect to the next master in the list. If the minion runs out of masters, the list will be recycled in case dead masters have been restored. Note that *`master_alive_interval`* must be present in the minion configuration, or else the recurring job to check master status will not get scheduled.

Failover can be combined with PKI-style encrypted keys, but PKI is NOT REQUIRED to use failover.

Multimaster with PKI and Failover is discussed in *this tutorial*

`master_type: failover` can be combined with `master_shuffle: True` to spread minion connections across all masters (one master per minion, not each minion connecting to all masters). Adding Salt Syndics into the mix makes it possible to create a load-balanced Salt infrastructure. If a master fails, minions will notice and select another master from the available list.

21.1.3 Syndic

Salt's Syndic feature is a way to create differing infrastructure topologies. It is not strictly an HA feature, but can be treated as such.

With the syndic, a Salt infrastructure can be partitioned in such a way that certain masters control certain segments of the infrastructure, and ``Master of Masters'' nodes can control multiple segments underneath them.

Syndics are covered in depth in *Salt Syndic*.

21.1.4 Syndic with Multimaster

New in version 2015.5.0.

Syndic with Multimaster lets you connect a syndic to multiple masters to provide an additional layer of redundancy in a syndic configuration.

Syndics are covered in depth in *Salt Syndic*.

21.2 Salt Syndic

The most basic or typical Salt topology consists of a single Master node controlling a group of Minion nodes. An intermediate node type, called Syndic, when used offers greater structural flexibility and scalability in the construction of Salt topologies than topologies constructed only out of Master and Minion node types.

A Syndic node can be thought of as a special passthrough Minion node. A Syndic node consists of a `salt-syndic` daemon and a `salt-master` daemon running on the same system. The `salt-master` daemon running on the Syndic node controls a group of lower level Minion nodes and the `salt-syndic` daemon connects higher level Master node, sometimes called a Master of Masters.

The `salt-syndic` daemon relays publications and events between the Master node and the local `salt-master` daemon. This gives the Master node control over the Minion nodes attached to the `salt-master` daemon running on the Syndic node.

21.2.1 Configuring the Syndic

To setup a Salt Syndic you need to tell the Syndic node and its Master node about each other. If your Master node is located at `10.10.0.1`, then your configurations would be:

On the Syndic node:

```
# /etc/salt/master
syndic_master: 10.10.0.1  # may be either an IP address or a hostname
```

```
# /etc/salt/minion

# id is shared by the salt-syndic daemon and a possible salt-minion daemon
# on the Syndic node
id: my_syndic
```

On the Master node:

```
# /etc/salt/master
order_masters: True
```

The *syndic_master* option tells the Syndic node where to find the Master node in the same way that the *master* option tells a Minion node where to find a Master node.

The *id* option is used by the `salt-syndic` daemon to identify with the Master node and if unset will default to the hostname or IP address of the Syndic just as with a Minion.

The *order_masters* option configures the Master node to send extra information with its publications that is needed by Syndic nodes connected directly to it.

Note: Each Syndic must provide its own `file_roots` directory. Files will not be automatically transferred from the Master node.

21.2.2 Configuring the Syndic with Multimaster

New in version 2015.5.0.

Syndic with Multimaster lets you connect a syndic to multiple masters to provide an additional layer of redundancy in a syndic configuration.

Higher level masters should first be configured in a multimaster configuration. See *Multimaster Tutorial*.

On the syndic, the *syndic_master* option is populated with a list of the higher level masters.

Since each syndic is connected to each master, jobs sent from any master are forwarded to minions that are connected to each syndic. If the `master_id` value is set in the master config on the higher level masters, job results are returned to the master that originated the request in a best effort fashion. Events/jobs without a `master_id` are returned to any available master.

21.2.3 Running the Syndic

The `salt-syndic` daemon is a separate process that needs to be started in addition to the `salt-master` daemon running on the Syndic node. Starting the `salt-syndic` daemon is the same as starting the other Salt daemons.

The Master node in many ways sees the Syndic as an ordinary Minion node. In particular, the Master will need to accept the Syndic's Minion key as it would for any other Minion.

On the Syndic node:

```
# salt-syndic
or
# service salt-syndic start
```

On the Master node:

```
# salt-key -a my_syndic
```

The Master node will now be able to control the Minion nodes connected to the Syndic. Only the Syndic key will be listed in the Master node's key registry but this also means that key activity between the Syndic's Minions and the Syndic does not encumber the Master node. In this way, the Syndic's key on the Master node can be thought of as a placeholder for the keys of all the Minion and Syndic nodes beneath it, giving the Master node a clear, high level structural view on the Salt cluster.

On the Master node:

```
# salt-key -L
Accepted Keys:
my_syndic
Denied Keys:
Unaccepted Keys:
Rejected Keys:

# salt '*' test.ping
minion_1:
    True
minion_2:
    True
minion_4:
    True
minion_3:
    True
```

21.2.4 Topology

A Master node (a node which is itself not a Syndic to another higher level Master node) must run a `salt-master` daemon and optionally a `salt-minion` daemon.

A Syndic node must run `salt-syndic` and `salt-master` daemons and optionally a `salt-minion` daemon.

A Minion node must run a `salt-minion` daemon.

When a `salt-master` daemon issues a command, it will be received by the Syndic and Minion nodes directly connected to it. A Minion node will process the command in the way it ordinarily would. On a Syndic node, the `salt-syndic` daemon will relay the command to the `salt-master` daemon running on the Syndic node, which then propagates the command to the Minions and Syndics connected to it.

When events and job return data are generated by `salt-minion` daemons, they are aggregated by the `salt-master` daemon they are connected to, which `salt-master` daemon then relays the data back through its `salt-syndic` daemon until the data reaches the Master or Syndic node that issued the command.

21.2.5 Syndic wait

`syndic_wait` is a master configuration file setting that specifies the number of seconds the Salt client should wait for additional syndics to check in with their lists of expected minions before giving up. This value defaults to 5 seconds.

The `syndic_wait` setting is necessary because the higher-level master does not have a way of knowing which minions are below the syndics. The higher-level master has its own list of expected minions and the masters below them have their own lists as well, so the Salt client does not how long to wait for all returns. The `syndic_wait` option allows time for all minions to return to the Salt client.

Note: To reduce the amount of time the CLI waits for Minions to respond, install a Minion on the Syndic or tune the value of the `syndic_wait` configuration.

While it is possible to run a Syndic without a Minion installed on the same system, it is recommended, for a faster CLI response time, to do so. Without a Minion installed on the Syndic node, the timeout value of `syndic_wait` increases significantly - about three-fold. With a Minion installed on the Syndic, the CLI timeout resides at the value defined in `syndic_wait`.

Note: If you have a very large infrastructure or many layers of Syndics, you may find that the CLI doesn't wait long enough for the Syndics to return their events. If you think this is the case, you can set the *syndic_wait* value in the Master configs on the Master or Syndic nodes from which commands are executed. The default value is 5, and should work for the majority of deployments.

In order for a Master or Syndic node to return information from Minions that are below their Syndics, the CLI requires a short wait time in order to allow the Syndics to gather responses from their Minions. This value is defined in the *syndic_wait* config option and has a default of five seconds.

21.2.6 Syndic config options

These are the options that can be used to configure a Syndic node. Note that other than `id`, Syndic config options are placed in the Master config on the Syndic node.

- *id*: Syndic id (shared by the `salt-syndic` daemon with a potential `salt-minion` daemon on the same system)
- *syndic_master*: Master node IP address or hostname
- *syndic_master_port*: Master node ret_port
- *syndic_log_file*: path to the logfile (absolute or not)
- *syndic_pidfile*: path to the pidfile (absolute or not)
- *syndic_wait*: time in seconds to wait on returns from this syndic

21.2.7 Minion Data Cache

Beginning with Salt 2016.11.0, the *Pluggable Minion Data Cache* was introduced. The minion data cache contains the Salt Mine data, minion grains, and minion pillar information cached on the Salt Master. By default, Salt uses the `localfs` cache module, but other external data stores can be used instead.

Using a pluggable minion cache modules allows for the data stored on a Salt Master about Salt Minions to be replicated on other Salt Masters the Minion is connected to. Please see the *Minion Data Cache* documentation for more information and configuration examples.

CHAPTER 22

Minion Data Cache

New in version 2016.11.0.

The Minion data cache contains the Salt Mine data, minion grains and minion pillar information cached on the Salt Master. By default, Salt uses the `localfs` cache module to save the data in a `msgpack` file on the Salt Master.

22.1 Pluggable Data Cache

While the default Minion data cache is the `localfs` cache, other external data stores can also be used to store this data such as the `consul` module. To configure a Salt Master to use a different data store, the *cache* setting needs to be established:

```
cache: consul
```

The pluggable data cache streamlines using various Salt topologies such as a *Multi-Master* or *Salt Syndics* configuration by allowing the data stored on the Salt Master about a Salt Minion to be available to other Salt Syndics or Salt Masters that a Salt Minion is connected to.

Additional minion data cache modules can be easily created by modeling the custom data store after one of the existing cache modules.

See *cache modules* for a current list.

22.2 Configuring the Minion Data Cache

The default `localfs` Minion data cache module doesn't require any configuration. External data cache modules with external data stores such as Consul require a configuration setting in the master config.

Here's an example config for Consul:

```
consul.host: 127.0.0.1
consul.port: 8500
consul.token: None
consul.scheme: http
consul.consistency: default
consul.dc: dc1
consul.verify: True

cache: consul
```

CHAPTER 23

Windows

This section contains details on the Windows Package Manager, and specific information you need to use Salt on Windows.

23.1 Windows Software Repository

Note: In 2015.8.0 and later, the Windows Software Repository cache is compiled on the Salt Minion, which enables pillar, grains and other things to be available during compilation time. To support this new functionality, a next-generation (ng) package repository was created. See the *Changes in Version 2015.8.0* for details.

The SaltStack Windows Software Repository provides a package manager and software repository similar to what is provided by yum and apt on Linux. This repository enables the installation of software using the installers on remote Windows systems.

In many senses, the operation is similar to that of the other package managers salt is aware of:

- the `pkg.installed` and similar states work on Windows.
- the `pkg.install` and similar module functions work on Windows.

High level differences to yum and apt are:

- The repository metadata (SLS files) is hosted through either salt or git.
- Packages can be downloaded from within the salt repository, a git repository or from http(s) or ftp urls.
- No dependencies are managed. Dependencies between packages needs to be managed manually.

Requirements:

- GitPython 0.3 or later, or pygit2 0.20.3 with libgit 0.20.0 or later installed on your Salt master. The Windows package definitions are downloaded and updated using Git.

23.1.1 Configuration

Populate the Repository

The SLS files used to install Windows packages are not distributed by default with Salt. Run the following command to initialize the repository on your Salt master:

```
salt-run winrepo.update_git_repos
```

Sync Repo to Windows Minions

Run `pkg.refresh_db` on each of your Windows minions to synchronize the package repository.

```
salt -G 'os:windows' pkg.refresh_db
```

23.1.2 Install Windows Software

After completing the configuration steps, you are ready to manage software on your Windows minions.

Show Installed Packages

```
salt -G 'os:windows' pkg.list_pkgs
```

Install a Package

You can query the available version of a package using the Salt pkg module.

```
salt winminion pkg.list_available firefox

winminion:
    - 15.0.1
    - 16.0.2
    - 17.0.1
```

As you can see, there are three versions of Firefox available for installation. You can refer a software package by its `name` or its `full_name` surround by single quotes.

```
salt winminion pkg.install 'firefox'
```

The above line will install the latest version of Firefox.

```
salt winminion pkg.install 'firefox' version=16.0.2
```

The above line will install version 16.0.2 of Firefox.

If a different version of the package is already installed it will be replaced with the version in the winrepo (only if the package itself supports live updating).

You can also specify the full name:

```
salt winminion pkg.install 'Mozilla Firefox 17.0.1 (x86 en-US)'
```

23.1.3 Uninstall Windows Software

Uninstall software using the pkg module:

```
salt winminion pkg.remove firefox
salt winminion pkg.purge firefox
```

Note: `pkg.purge` just executes `pkg.remove` on Windows. At some point in the future `pkg.purge` may direct the installer to remove all configs and settings for software packages that support that option.

23.1.4 Repository Location

Salt maintains a repository of SLS files to install a large number of Windows packages:

- 2015.8.0 and later minions: https://github.com/saltstack/salt-winrepo-ng
- Earlier releases: https://github.com/saltstack/salt-winrepo

By default, these repositories are mirrored to `/srv/salt/win/repo-ng` and `/srv/salt/win/repo`.

This location can be changed in the master config file by setting the *winrepo_dir_ng* and *winrepo_dir* options.

23.1.5 Maintaining Windows Repo Definitions in Git Repositories

Windows software package definitions can be hosted in one or more Git repositories. The default repositories are hosted on GitHub by SaltStack. These include software definition files for various open source software projects. These software definition files are `.sls` files. There are two default repositories: `salt-winrepo` and `salt-winrepo-ng`. `salt-winrepo` contains software definition files for older minions (older than 2015.8.0). `salt-winrepo-ng` is for newer minions (2015.8.0 and newer).

Each software definition file contains all the information salt needs to install that software on a minion including the HTTP or FTP locations of the installer files, required command-line switches for silent install, etc. Anyone is welcome to send a pull request to this repo to add new package definitions. The repos can be browsed here: salt-winrepo salt-winrepo-ng

Note: The newer software definition files are run through the salt's parser which allows for the use of jinja.

Configure which git repositories the master can search for package definitions by modifying or extending the *winrepo_remotes* and *winrepo_remotes_ng* options.

Important: `winrepo_remotes` was called `win_gitrepos` in Salt versions earlier than 2015.8.0

Package definitions are pulled down from the online repository by running the *winrepo.update_git_repos* runner. This command is run on the master:

```
salt-run winrepo.update_git_repos
```

This will pull down the software definition files for older minions (`salt-winrepo`) and new minions (`salt-winrepo-ng`). They are stored in the `file_roots` under `win/repo/salt-winrepo` and `win/repo-ng/salt-winrepo-ng` respectively.

Important: If you have customized software definition files that aren't maintained in a repository, those should be stored under `win/repo` for older minions and `win/repo-ng` for newer minions. The reason for this is that the

contents of `win/repo/salt-winrepo` and `win/repo-ng/salt-winrepo-ng` are wiped out every time you run a `winrepo.update_git_repos`.

Additionally, when you run `winrepo.genrepo` and `pkg.refresh_db` the entire contents under `win/repo` and `win/repo-ng`, to include all subdirectories, are used to create the msgpack file.

The next step (if you have older minions) is to create the msgpack file for the repo (`winrepo.p`). This is done by running the *winrepo.genrepo* runner. This is also run on the master:

```
salt-run winrepo.genrepo
```

Note: If you have only 2015.8.0 and newer minions, you no longer need to run `salt-run winrepo.genrepo` on the master.

Finally, you need to refresh the minion database by running the *pkg.refresh_db* command. This is run on the master as well:

```
salt '*' pkg.refresh_db
```

On older minions (older than 2015.8.0) this will copy the winrepo.p file down to the minion. On newer minions (2015.8.0 and newer) this will copy all the software definition files (.sls) down to the minion and then create the msgpack file (`winrepo.p`) locally. The reason this is done locally is because the jinja needs to be parsed using the minion's grains.

Important: Every time you modify the software definition files on the master, either by running `salt-run winrepo.update_git_repos`, modifying existing files, or by creating your own, you need to refresh the database on your minions. For older minions, that means running `salt-run winrepo.genrepo` and then `salt '*' pkg.refresh_db`. For newer minions (2015.8.0 and newer) it is just `salt '*' pkg.refresh_db`.

Note: If the `winrepo.genrepo` or the `pkg.refresh_db` fails, it is likely a problem with the jinja in one of the software definition files. This will cause the operations to stop. You'll need to fix the syntax in order for the msgpack file to be created successfully.

To disable one of the repos, set it to an empty list `[]` in the master config. For example, to disable *winrepo_remotes* set the following in the master config file:

```
winrepo_remotes: []
```

23.1.6 Creating a Package Definition SLS File

The package definition file is a yaml file that contains all the information needed to install a piece of software using salt. It defines information about the package to include version, full name, flags required for the installer and uninstaller, whether or not to use the windows task scheduler to install the package, where to find the installation package, etc.

Take a look at this example for Firefox:

```
firefox:
  '17.0.1':
    installer: 'salt://win/repo/firefox/English/Firefox Setup 17.0.1.exe'
```

```
    full_name: Mozilla Firefox 17.0.1 (x86 en-US)
    locale: en_US
    reboot: False
    install_flags: '-ms'
    uninstaller: '%ProgramFiles(x86)%/Mozilla Firefox/uninstall/helper.exe'
    uninstall_flags: '/S'
  '16.0.2':
    installer: 'salt://win/repo/firefox/English/Firefox Setup 16.0.2.exe'
    full_name: Mozilla Firefox 16.0.2 (x86 en-US)
    locale: en_US
    reboot: False
    install_flags: '-ms'
    uninstaller: '%ProgramFiles(x86)%/Mozilla Firefox/uninstall/helper.exe'
    uninstall_flags: '/S'
  '15.0.1':
    installer: 'salt://win/repo/firefox/English/Firefox Setup 15.0.1.exe'
    full_name: Mozilla Firefox 15.0.1 (x86 en-US)
    locale: en_US
    reboot: False
    install_flags: '-ms'
    uninstaller: '%ProgramFiles(x86)%/Mozilla Firefox/uninstall/helper.exe'
    uninstall_flags: '/S'
```

Each software definition file begins with a package name for the software. As in the example above `firefox`. The next line is indented two spaces and contains the version to be defined. As in the example above, a software definition file can define multiple versions for the same piece of software. The lines following the version are indented two more spaces and contain all the information needed to install that package.

> **Warning:** The package name and the `full_name` must be unique to all other packages in the software repository.

The version line is the version for the package to be installed. It is used when you need to install a specific version of a piece of software.

> **Warning:** The version must be enclosed in quotes, otherwise the yaml parser will remove trailing zeros.

Note: There are unique situations where previous versions are unavailable. Take Google Chrome for example. There is only one url provided for a standalone installation of Google Chrome.

(https://dl.google.com/edgedl/chrome/install/GoogleChromeStandaloneEnterprise.msi)

When a new version is released, the url just points to the new version. To handle situations such as these, set the version to *latest*. Salt will install the version of Chrome at the URL and report that version. Here's an example:

```
chrome:
  latest:
    full_name: 'Google Chrome'
    installer: 'https://dl.google.com/edgedl/chrome/install/
 ↪GoogleChromeStandaloneEnterprise.msi'
    install_flags: '/qn /norestart'
    uninstaller: 'https://dl.google.com/edgedl/chrome/install/
 ↪GoogleChromeStandaloneEnterprise.msi'
```

```
    uninstall_flags: '/qn /norestart'
    msiexec: True
    locale: en_US
    reboot: False
```

Available parameters are as follows:

param str full_name The Full Name for the software as shown in ``Programs and Features'' in the control panel. You can also get this information by installing the package manually and then running `pkg.list_pkgs`. Here's an example of the output from `pkg.list_pkgs`:

```
salt 'test-2008' pkg.list_pkgs
test-2008
    ----------
    7-Zip 9.20 (x64 edition):
        9.20.00.0
    Microsoft .NET Framework 4 Client Profile:
        4.0.30319,4.0.30319
    Microsoft .NET Framework 4 Extended:
        4.0.30319,4.0.30319
    Microsoft Visual C++ 2008 Redistributable - x64 9.0.21022:
        9.0.21022
    Mozilla Firefox 17.0.1 (x86 en-US):
        17.0.1
    Mozilla Maintenance Service:
        17.0.1
    NSClient++ (x64):
        0.3.8.76
    Notepad++:
        6.4.2
    Salt Minion 0.16.0:
        0.16.0
```

Notice the Full Name for Firefox: `Mozilla Firefox 17.0.0 (x86 en-US)`. That's exactly what's in the `full_name` parameter in the software definition file.

If any of the software installed on the machine matches one of the software definition files in the repository, the full_name will be automatically renamed to the package name. The example below shows the `pkg.list_pkgs` for a machine that already has Mozilla Firefox 17.0.1 installed.

```
test-2008:
    ----------
    7zip:
        9.20.00.0
    Microsoft .NET Framework 4 Client Profile:
        4.0.30319,4.0.30319
    Microsoft .NET Framework 4 Extended:
        4.0.30319,4.0.30319
    Microsoft Visual C++ 2008 Redistributable - x64 9.0.21022:
        9.0.21022
    Mozilla Maintenance Service:
        17.0.1
    Notepad++:
        6.4.2
    Salt Minion 0.16.0:
        0.16.0
    firefox:
        17.0.1
```

```
nsclient:
    0.3.9.328
```

Important: The version number and `full_name` need to match the output from `pkg.list_pkgs` so that the status can be verified when running a highstate.

Note: It is still possible to successfully install packages using `pkg.install`, even if the `full_name` or the version number don't match. However, this can make troubleshooting issues difficult, so be careful.

Tip: To force salt to display the full name when there's already an existing package definition file on the system, you can pass a bogus `saltenv` parameter to the command like so: `pkg.list_pkgs saltenv=NotARealEnv`

param str installer The path to the `.exe` or `.msi` to use to install the package. This can be a path or a URL. If it is a URL or a salt path (`salt://`), the package will be cached locally and then executed. If it is a path to a file on disk or a file share, it will be executed directly.

Note: If storing software in the same location as the winrepo it is best practice to place each installer in its own directory rather than the root of winrepo. Then you can place your package definition file in the same directory. It is best practice to name the file `init.sls`. This will be picked up by `pkg.refresh_db` and processed properly.

param str install_flags Any flags that need to be passed to the installer to make it perform a silent install. These can often be found by adding `/?` or `/h` when running the installer from the command-line. A great resource for finding these silent install flags can be found on the WPKG project's wiki:

Warning: Salt will not return if the installer is waiting for user input so it is imperative that the software package being installed has the ability to install silently.

param str uninstaller The path to the program used to uninstall this software. This can be the path to the same *exe* or *msi* used to install the software. It can also be a GUID. You can find this value in the registry under the following keys:

- Software\Microsoft\Windows\CurrentVersion\Uninstall
- Software\Wow6432None\Microsoft\Windows\CurrentVersion\Uninstall

param str uninstall_flags Any flags that need to be passed to the uninstaller to make it perform a silent uninstall. These can often be found by adding `/?` or `/h` when running the uninstaller from the command-line. A great resource for finding these silent install flags can be found on the WPKG project's wiki:

Warning: Salt will not return if the uninstaller is waiting for user input so it is imperative that the software package being uninstalled has the ability to uninstall silently.

Here are some examples of installer and uninstaller settings:

```
7zip:
  '9.20.00.0':
    installer: salt://win/repo/7zip/7z920-x64.msi
    full_name: 7-Zip 9.20 (x64 edition)
    reboot: False
    install_flags: '/qn /norestart'
    msiexec: True
    uninstaller: '{23170F69-40C1-2702-0920-000001000000}'
    uninstall_flags: '/qn /norestart'
```

Alternatively the `uninstaller` can also simply repeat the URL of an msi file:

```
7zip:
  '9.20.00.0':
    installer: salt://win/repo/7zip/7z920-x64.msi
    full_name: 7-Zip 9.20 (x64 edition)
    reboot: False
    install_flags: '/qn /norestart'
    msiexec: True
    uninstaller: salt://win/repo/7zip/7z920-x64.msi
    uninstall_flags: '/qn /norestart'
```

param msiexec This tells salt to use `msiexec /i` to install the package and `msiexec /x` to uninstall. This is for `.msi` installations. Possible options are: True, False or the path to `msiexec.exe` on your system

```
7zip:
  '9.20.00.0':
    installer: salt://win/repo/7zip/7z920-x64.msi
    full_name: 7-Zip 9.20 (x64 edition)
    reboot: False
    install_flags: '/qn /norestart'
    msiexec: 'C:\Windows\System32\msiexec.exe'
    uninstaller: salt://win/repo/7zip/7z920-x64.msi
    uninstall_flags: '/qn /norestart'
```

param bool allusers This parameter is specific to `.msi` installations. It tells `msiexec` to install the software for all users. The default is `True`.

param bool cache_dir If `True` and the installer URL begins with `salt://`, the entire directory where the installer resides will be recursively cached. This is useful for installers that depend on other files in the same directory for installation.

> **Warning:** Be aware that all files and directories in the same location as the installer file will be copied down to the minion. If you place your installer file in the root of winrepo (`/srv/salt/win/repo-ng`) and `cache_dir: True` the entire contents of winrepo will be cached to the minion. Therefore, it is best practice to place your installer files in a subdirectory if they are to be stored in winrepo.

param str cache_file When the installer URL begins with `salt://`, this indicates a single file to copy down for use with the installer. It is copied to the same location as the installer. Use this over `cache_dir` if there are many files in the directory and you only need a specific file and don't want to cache additional files that may reside in the installer directory.

Here's an example for a software package that has dependent files:

```
sqlexpress:
  '12.0.2000.8':
    installer: 'salt://win/repo/sqlexpress/setup.exe'
    full_name: Microsoft SQL Server 2014 Setup (English)
    reboot: False
    install_flags: '/ACTION=install /IACCEPTSQLSERVERLICENSETERMS /Q'
    cache_dir: True
```

param bool use_scheduler If `True`, Windows will use the task scheduler to run the installation. This is useful for running the Salt installation itself as the installation process kills any currently running instances of Salt.

param str source_hash This tells Salt to compare a hash sum of the installer to the provided hash sum before execution. The value can be formatted as `<hash_algorithm>=<hash_sum>`, or it can be a URI to a file containing the hash sum.

For a list of supported algorithms, see the hashlib documentation.

Here's an example of source_hash usage:

```
messageanalyzer:
  '4.0.7551.0':
    full_name: 'Microsoft Message Analyzer'
    installer: 'salt://win/repo/messageanalyzer/MessageAnalyzer64.msi'
    install_flags: '/quiet /norestart'
    uninstaller: '{1CC02C23-8FCD-487E-860C-311EC0A0C933}'
    uninstall_flags: '/quiet /norestart'
    msiexec: True
    source_hash: 'sha1=62875ff451f13b10a8ff988f2943e76a4735d3d4'
```

param bool reboot Not implemented

param str local Not implemented

Examples can be found at https://github.com/saltstack/salt-winrepo-ng

23.1.7 Managing Windows Software on a Standalone Windows Minion

The Windows Package Repository functions similar in a standalone environment, with a few differences in the configuration.

To replace the winrepo runner that is used on the Salt master, an *execution module* exists to provide the same functionality to standalone minions. The functions are named the same as the ones in the runner, and are used in the same way; the only difference is that `salt-call` is used instead of `salt-run`:

```
salt-call winrepo.update_git_repos
salt-call winrepo.genrepo
salt-call pkg.refresh_db
```

After executing the previous commands the repository on the standalone system is ready to use.

Custom Location for Repository SLS Files

If *file_roots* has not been modified in the minion configuration, then no additional configuration needs to be added to the minion configuration. The *winrepo.genrepo* function from the *winrepo* execution module will by default look for the filename specified by *winrepo_cachefile* within `C:\salt\srv\salt\win\repo`.

If the *file_roots* parameter has been modified, then *winrepo_dir* must be modified to fall within that path, at the proper relative path. For example, if the `base` environment in *file_roots* points to `D:\foo`, and *winrepo_source_dir* is `salt://win/repo`, then *winrepo_dir* must be set to `D:\foo\win\repo` to ensure that *winrepo.genrepo* puts the cachefile into right location.

23.1.8 Config Options for Minions 2015.8.0 and Later

The *winrepo_source_dir* config parameter (default: `salt://win/repo`) controls where *pkg.refresh_db* looks for the cachefile (default: `winrepo.p`). This means that the default location for the winrepo cachefile would be `salt://win/repo/winrepo.p`. Both *winrepo_source_dir* and *winrepo_cachefile* can be adjusted to match the actual location of this file on the Salt fileserver.

23.1.9 Config Options for Minions Before 2015.8.0

If connected to a master, the minion will by default look for the winrepo cachefile (the file generated by the *winrepo.genrepo runner*) at `salt://win/repo/winrepo.p`. If the cachefile is in a different path on the salt fileserver, then *win_repo_cachefile* will need to be updated to reflect the proper location.

23.1.10 Changes in Version 2015.8.0

Git repository management for the Windows Software Repository has changed in version 2015.8.0, and several master/minion config parameters have been renamed to make their naming more consistent with each other.

For a list of the winrepo config options, see *here* for master config options, and *here* for configuration options for masterless Windows minions.

On the master, the *winrepo.update_git_repos* runner has been updated to use either pygit2 or GitPython to checkout the git repositories containing repo data. If pygit2 or GitPython is installed, existing winrepo git checkouts should be removed after upgrading to 2015.8.0, to allow them to be checked out again by running *winrepo.update_git_repos*.

If neither GitPython nor pygit2 are installed, then Salt will fall back to the pre-existing behavior for *winrepo.update_git_repos*, and a warning will be logged in the master log.

Note: Standalone Windows minions do not support the new GitPython/pygit2 functionality, and will instead use the *git.latest* state to keep repositories up-to-date. More information on how to use the Windows Software Repo on a standalone minion can be found *here*.

Config Parameters Renamed

Many of the legacy winrepo configuration parameters have changed in version 2015.8.0 to make the naming more consistent. The old parameter names will still work, but a warning will be logged indicating that the old name is deprecated.

Below are the parameters which have changed for version 2015.8.0:

Master Config

Old Name	New Name
win_repo	*winrepo_dir*
win_repo_mastercachefile	*winrepo_cachefile*
win_gitrepos	*winrepo_remotes*

Note: `winrepo_cachefile` is no longer used by 2015.8.0 and later minions, and the `winrepo_dir` setting is replaced by `winrepo_dir_ng` for 2015.8.0 and later minions.

See *here* for detailed information on all master config options for the Windows Repo.

Minion Config

Old Name	New Name
win_repo	*winrepo_dir*
win_repo_cachefile	*winrepo_cachefile*
win_gitrepos	*winrepo_remotes*

See *here* for detailed information on all minion config options for the Windows Repo.

pygit2/GitPython Support for Maintaining Git Repos

The *winrepo.update_git_repos* runner (and the corresponding *remote execution function* for standalone minions) now makes use of the same underlying code used by the *Git Fileserver Backend* and *Git External Pillar* to maintain and update its local clones of git repositories. If a compatible version of either pygit2 (0.20.3 and later) or GitPython (0.3.0 or later) is installed, then Salt will use it instead of the old method (which invokes the *git.latest* state).

Note: If compatible versions of both pygit2 and GitPython are installed, then Salt will prefer pygit2, to override this behavior use the *winrepo_provider* configuration parameter:

```
winrepo_provider: gitpython
```

The *winrepo execution module* (discussed above in the *Managing Windows Software on a Standalone Windows Minion* section) does not yet officially support the new pygit2/GitPython functionality, but if either pygit2 or GitPython is installed into Salt's bundled Python then it *should* work. However, it should be considered experimental at this time.

To minimize potential issues, it is a good idea to remove any winrepo git repositories that were checked out by the old (pre-2015.8.0) winrepo code when upgrading the master to 2015.8.0 or later, and run *winrepo.update_git_repos* to clone them anew after the master is started.

Additional added features include the ability to access authenticated git repositories (**NOTE:** pygit2 only), and to set per-remote config settings. An example of this would be the following:

```
winrepo_remotes:
  - https://github.com/saltstack/salt-winrepo.git
  - git@github.com:myuser/myrepo.git:
    - pubkey: /path/to/key.pub
    - privkey: /path/to/key
    - passphrase: myaw3s0m3pa$$phr4$3
```

```
  - https://github.com/myuser/privaterepo.git:
    - user: mygithubuser
    - password: CorrectHorseBatteryStaple
```

Note: Per-remote configuration settings work in the same fashion as they do in gitfs, with global parameters being overridden by their per-remote counterparts (for instance, setting *winrepo_passphrase* would set a global passphrase for winrepo that would apply to all SSH-based remotes, unless overridden by a `passphrase` per-remote parameter).

See *here* for more a more in-depth explanation of how per-remote configuration works in gitfs, the same principles apply to winrepo.

There are a couple other changes in how Salt manages git repos using pygit2/GitPython. First of all, a `clean` argument has been added to the *winrepo.update_git_repos* runner, which (if set to `True`) will tell the runner to dispose of directories under the *winrepo_dir* which are not explicitly configured. This prevents the need to manually remove these directories when a repo is removed from the config file. To clean these old directories, just pass `clean=True`, like so:

```
salt-run winrepo.update_git_repos clean=True
```

However, if a mix of git and non-git Windows Repo definition files are being used, then this should *not* be used, as it will remove the directories containing non-git definitions.

The other major change is that collisions between repo names are now detected, and the *winrepo.update_git_repos* runner will not proceed if any are detected. Consider the following configuration:

```
winrepo_remotes:
  - https://foo.com/bar/baz.git
  - https://mydomain.tld/baz.git
  - https://github.com/foobar/baz
```

The *winrepo.update_git_repos* runner will refuse to update repos here, as all three of these repos would be checked out to the same directory. To work around this, a per-remote parameter called `name` can be used to resolve these conflicts:

```
winrepo_remotes:
  - https://foo.com/bar/baz.git
  - https://mydomain.tld/baz.git:
    - name: baz_junior
  - https://github.com/foobar/baz:
    - name: baz_the_third
```

23.1.11 Troubleshooting

Incorrect name/version

If the package seems to install properly, but salt reports a failure then it is likely you have a version or `full_name` mismatch.

Check the exact `full_name` and version used by the package. Use `pkg.list_pkgs` to check that the names and version exactly match what is installed.

Changes to sls files not being picked up

Ensure you have (re)generated the repository cache file (for older minions) and then updated the repository cache on the relevant minions:

```
salt-run winrepo.genrepo
salt winminion pkg.refresh_db
```

Packages management under Windows 2003

On Windows server 2003, you need to install optional Windows component ``wmi windows installer provider'' to have full list of installed packages. If you don't have this, salt-minion can't report some installed software.

How Success and Failure are Reported

The install state/module function of the Windows package manager works roughly as follows:

1. Execute `pkg.list_pkgs` and store the result
2. Check if any action needs to be taken. (i.e. compare required package and version against `pkg.list_pkgs` results)
3. If so, run the installer command.
4. Execute `pkg.list_pkgs` and compare to the result stored from before installation.
5. Success/Failure/Changes will be reported based on the differences between the original and final `pkg.list_pkgs` results.

If there are any problems in using the package manager it is likely due to the data in your sls files not matching the difference between the pre and post `pkg.list_pkgs` results.

23.2 Windows-specific Behaviour

Salt is capable of managing Windows systems, however due to various differences between the operating systems, there are some things you need to keep in mind.

This document will contain any quirks that apply across Salt or generally across multiple module functions. Any Windows-specific behavior for particular module functions will be documented in the module function documentation. Therefore this document should be read in conjunction with the module function documentation.

23.2.1 Group parameter for files

Salt was originally written for managing Unix-based systems, and therefore the file module functions were designed around that security model. Rather than trying to shoehorn that model on to Windows, Salt ignores these parameters and makes non-applicable module functions unavailable instead.

One of the commonly ignored parameters is the `group` parameter for managing files. Under Windows, while files do have a `primary group' property, this is rarely used. It generally has no bearing on permissions unless intentionally configured and is most commonly used to provide Unix compatibility (e.g. Services For Unix, NFS services).

Because of this, any file module functions that typically require a group, do not under Windows. Attempts to directly use file module functions that operate on the group (e.g. `file.chgrp`) will return a pseudo-value and cause a log message to appear. No group parameters will be acted on.

If you do want to access and change the `primary group' property and understand the implications, use the `file.get_pgid` or `file.get_pgroup` functions or the `pgroup` parameter on the `file.chown` module function.

23.2.2 Dealing with case-insensitive but case-preserving names

Windows is case-insensitive, but however preserves the case of names and it is this preserved form that is returned from system functions. This causes some issues with Salt because it assumes case-sensitive names. These issues generally occur in the state functions and can cause bizarre looking errors.

To avoid such issues, always pretend Windows is case-sensitive and use the right case for names, e.g. specify `user=Administrator` instead of `user=administrator`.

Follow issue #11801 for any changes to this behavior.

23.2.3 Dealing with various username forms

Salt does not understand the various forms that Windows usernames can come in, e.g. username, mydomain\username, username@mydomain.tld can all refer to the same user. In fact, Salt generally only considers the raw username value, i.e. the username without the domain or host information.

Using these alternative forms will likely confuse Salt and cause odd errors to happen. Use only the raw username value in the correct case to avoid problems.

Follow issue #11801 for any changes to this behavior.

23.2.4 Specifying the None group

Each Windows system has built-in _None_ group. This is the default `primary group' for files for users not on a domain environment.

Unfortunately, the word _None_ has special meaning in Python - it is a special value indicating `nothing', similar to `null` or `nil` in other languages.

To specify the None group, it must be specified in quotes, e.g. `./salt '*' file.chpgrp C:\path\to\file "'None'"`.

23.2.5 Symbolic link loops

Under Windows, if any symbolic link loops are detected or if there are too many levels of symlinks (defaults to 64), an error is always raised.

For some functions, this behavior is different to the behavior on Unix platforms. In general, avoid symlink loops on either platform.

CHAPTER 24

Developing Salt

24.1 Overview

In its most typical use, Salt is a software application in which clients, called ``minions'' can be commanded and controlled from a central command server called a ``master''.

Commands are normally issued to the minions (via the master) by calling a client script simply called, `salt'.

Salt features a pluggable transport system to issue commands from a master to minions. The default transport is ZeroMQ.

24.2 Salt Client

24.2.1 Overview

The salt client is run on the same machine as the Salt Master and communicates with the salt-master to issue commands and to receive the results and display them to the user.

The primary abstraction for the salt client is called `LocalClient'.

When LocalClient wants to publish a command to minions, it connects to the master by issuing a request to the master's ReqServer (TCP: 4506)

The LocalClient system listens to responses for its requests by listening to the master event bus publisher (master_event_pub.ipc).

24.3 Salt Master

24.3.1 Overview

The salt-master daemon runs on the designated Salt master and performs functions such as authenticating minions, sending, and receiving requests from connected minions and sending and receiving requests and replies to the `salt' CLI.

24.3.2 Moving Pieces

When a Salt master starts up, a number of processes are started, all of which are called `salt-master' in a process-list but have various role categories.

Among those categories are:

- Publisher
- EventPublisher
- MWorker

24.3.3 Publisher

The Publisher process is responsible for sending commands over the designated transport to connected minions. The Publisher is bound to the following:

- TCP: port 4505
- IPC: publish_pull.ipc

Each salt minion establishes a connection to the master Publisher.

24.3.4 EventPublisher

The EventPublisher publishes events onto the event bus. It is bound to the following:

- IPC: master_event_pull.ipc
- IPC: master_event_pub.ipc

24.3.5 MWorker

Worker processes manage the back-end operations for the Salt Master.

The number of workers is equivalent to the number of `worker_threads' specified in the master configuration and is always at least one.

Workers are bound to the following:

- IPC: workers.ipc

24.3.6 ReqServer

The Salt request server takes requests and distributes them to available MWorker processes for processing. It also receives replies back from minions.

The ReqServer is bound to the following:

- TCP: 4506
- IPC: workers.ipc

Each salt minion establishes a connection to the master ReqServer.

24.3.7 Job Flow

The Salt master works by always publishing commands to all connected minions and the minions decide if the command is meant for them by checking themselves against the command target.

The typical lifecycle of a salt job from the perspective of the master might be as follows:

1. A command is issued on the CLI. For example, `salt my_minion test.ping'.

2) The `salt' command uses LocalClient to generate a request to the salt master by connecting to the ReqServer on TCP:4506 and issuing the job.

3) The salt-master ReqServer sees the request and passes it to an available MWorker over workers.ipc.

4) A worker picks up the request and handles it. First, it checks to ensure that the requested user has permissions to issue the command. Then, it sends the publish command to all connected minions. For the curious, this happens in ClearFuncs.publish().

5) The worker announces on the master event bus that it is about to publish a job to connected minions. This happens by placing the event on the master event bus (master_event_pull.ipc) where the EventPublisher picks it up and distributes it to all connected event listeners on master_event_pub.ipc.

6) The message to the minions is encrypted and sent to the Publisher via IPC on publish_pull.ipc.

7) Connected minions have a TCP session established with the Publisher on TCP port 4505 where they await commands. When the Publisher receives the job over publish_pull, it sends the jobs across the wire to the minions for processing.

8) After the minions receive the request, they decrypt it and perform any requested work, if they determine that they are targeted to do so.

9) When the minion is ready to respond, it publishes the result of its job back to the master by sending the encrypted result back to the master on TCP 4506 where it is again picked up by the ReqServer and forwarded to an available MWorker for processing. (Again, this happens by passing this message across workers.ipc to an available worker.)

10) When the MWorker receives the job it decrypts it and fires an event onto the master event bus (master_event_pull.ipc). (Again for the curious, this happens in AESFuncs._return().

11) The EventPublisher sees this event and re-publishes it on the bus to all connected listeners of the master event bus (on master_event_pub.ipc). This is where the LocalClient has been waiting, listening to the event bus for minion replies. It gathers the job and stores the result.

12) When all targeted minions have replied or the timeout has been exceeded, the salt client displays the results of the job to the user on the CLI.

24.4 Salt Minion

24.4.1 Overview

The salt-minion is a single process that sits on machines to be managed by Salt. It can either operate as a stand-alone daemon which accepts commands locally via `salt-call' or it can connect back to a master and receive commands remotely.

When starting up, salt minions connect _back_ to a master defined in the minion config file. The connect to two ports on the master:

- **TCP: 4505** This is the connection to the master Publisher. It is on this port that the minion receives jobs from the master.

- **TCP: 4506** This is the connection to the master ReqServer. It is on this port that the minion sends job results back to the master.

24.4.2 Event System

Similar to the master, a salt-minion has its own event system that operates over IPC by default. The minion event system operates on a push/pull system with IPC files at minion_event_<unique_id>_pub.ipc and minion_event_<unique_id>_pull.ipc.

The astute reader might ask why have an event bus at all with a single-process daemon. The answer is that the salt-minion may fork other processes as required to do the work without blocking the main salt-minion process and this necessitates a mechanism by which those processes can communicate with each other. Secondarily, this provides a bus by which any user with sufficient permissions can read or write to the bus as a common interface with the salt minion.

24.4.3 Job Flow

When a salt minion starts up, it attempts to connect to the Publisher and the ReqServer on the salt master. It then attempts to authenticate and once the minion has successfully authenticated, it simply listens for jobs.

Jobs normally come either come from the `salt-call' script run by a local user on the salt minion or they can come directly from a master.

24.4.4 Master Job Flow

1) A master publishes a job that is received by a minion as outlined by the master's job flow above.

2) The minion is polling its receive socket that's connected to the master Publisher (TCP 4505 on master). When it detects an incoming message, it picks it up from the socket and decrypts it.

3) A new minion process or thread is created and provided with the contents of the decrypted message. The _thread_return() method is provided with the contents of the received message.

4) The new minion thread is created. The _thread_return() function starts up and actually calls out to the requested function contained in the job.

5. The requested function runs and returns a result. [Still in thread.]

6) The result of the function that's run is encrypted and returned to the master's ReqServer (TCP 4506 on master). [Still in thread.]

7) Thread exits. Because the main thread was only blocked for the time that it took to initialize the worker thread, many other requests could have been received and processed during this time.

24.5 A Note on ClearFuncs vs. AESFuncs

A common source of confusion is determining when messages are passed in the clear and when they are passed using encryption. There are two rules governing this behaviour:

1) ClearFuncs is used for intra-master communication and during the initial authentication handshake between a minion and master during the key exhange.

2. AESFuncs is used everywhere else.

24.6 Contributing

There is a great need for contributions to Salt and patches are welcome! The goal here is to make contributions clear, make sure there is a trail for where the code has come from, and most importantly, to give credit where credit is due!

There are a number of ways to contribute to Salt development.

For details on how to contribute documentation improvements please review *Writing Salt Documentation*.

24.6.1 Salt Coding Style

SaltStack has its own coding style guide that informs contributors on various coding approaches. Please review the *Salt Coding Style* documentation for information about Salt's particular coding patterns.

Within the *Salt Coding Style* documentation, there is a section about running Salt's `.pylintrc` file. SaltStack recommends running the `.pylintrc` file on any files you are changing with your code contribution before submitting a pull request to Salt's repository. Please see the *Linting* documentation for more information.

24.6.2 Sending a GitHub pull request

Sending pull requests on GitHub is the preferred method for receiving contributions. The workflow advice below mirrors GitHub's own guide and is well worth reading.

1. Fork saltstack/salt on GitHub.
2. Make a local clone of your fork.

```
git clone git@github.com:my-account/salt.git
cd salt
```

3. Add saltstack/salt as a git remote.

```
git remote add upstream https://github.com/saltstack/salt.git
```

4. Create a new branch in your clone.

Note: A branch should have one purpose. For example, ``Fix bug X,'' or ``Add feature Y''. Multiple unrelated fixes and/or features should be isolated into separate branches.

If you're working on a bug or documentation fix, create your branch from the oldest **supported** main release branch that contains the bug or requires the documentation update. See *Which Salt Branch?*.

```
git fetch upstream
git checkout -b fix-broken-thing upstream/2016.11
```

If you're working on a feature, create your branch from the develop branch.

```
git fetch upstream
git checkout -b add-cool-feature upstream/develop
```

5. Edit and commit changes to your branch.

```
vim path/to/file1 path/to/file2
git diff
git add path/to/file1 path/to/file2
git commit
```

Write a short, descriptive commit title and a longer commit message if necessary.

Note: If your change fixes a bug or implements a feature already filed in the issue tracker, be sure to reference the issue number in the commit message body.

```
Fix broken things in file1 and file2

Fixes #31337

# Please enter the commit message for your changes. Lines starting
# with '#' will be ignored, and an empty message aborts the commit.
# On branch fix-broken-thing
# Changes to be committed:
#       modified:   path/to/file1
#       modified:   path/to/file2
```

If you get stuck, there are many introductory Git resources on http://help.github.com.

6. Push your locally-committed changes to your GitHub fork.

```
git push -u origin fix-broken-thing
```

or

```
git push -u origin add-cool-feature
```

Note: You may want to rebase before pushing to work out any potential conflicts:

```
git fetch upstream
git rebase upstream/2016.11 fix-broken-thing
git push -u origin fix-broken-thing
```

or

```
git fetch upstream
git rebase upstream/develop add-cool-feature
git push -u origin add-cool-feature
```

If you do rebase, and the push is rejected with a `(non-fast-forward)` comment, then run `git status`. You will likely see a message about the branches diverging:

```
On branch fix-broken-thing
Your branch and 'origin/fix-broken-thing' have diverged,
and have 1 and 2 different commits each, respectively.
  (use "git pull" to merge the remote branch into yours)
nothing to commit, working tree clean
```

Do **NOT** perform a `git pull` or `git merge` here. Instead, add `--force` to the end of the `git push` command to get the changes pushed to your fork. Pulling or merging, while they will resolve the non-fast-

forward issue, will likely add extra commits to the pull request which were not part of your changes.

7. Find the branch on your GitHub salt fork.

   https://github.com/my-account/salt/branches/fix-broken-thing

8. Open a new pull request.

   Click on `Pull Request` on the right near the top of the page,

   https://github.com/my-account/salt/pull/new/fix-broken-thing

   (a) If your branch is a fix for a release branch, choose that as the base branch (e.g. `2016.11`),

   https://github.com/my-account/salt/compare/saltstack:2016.11...fix-broken-thing

   If your branch is a feature, choose `develop` as the base branch,

   https://github.com/my-account/salt/compare/saltstack:develop...add-cool-feature

   (b) Review that the proposed changes are what you expect.

   (c) Write a descriptive comment. Include links to related issues (e.g. `Fixes #31337.') in the comment field.

   (d) Click `Create pull request`.

9. Salt project members will review your pull request and automated tests will run on it.

   If you recognize any test failures as being related to your proposed changes or if a reviewer asks for modifications:

   (a) Make the new changes in your local clone on the same local branch.

   (b) Push the branch to GitHub again using the same commands as before.

   (c) New and updated commits will be added to the pull request automatically.

   (d) Feel free to add a comment to the discussion.

Note: Jenkins

Pull request against saltstack/salt are automatically tested on a variety of operating systems and configurations. On average these tests take 30 minutes. Depending on your GitHub notification settings you may also receive an email message about the test results.

Test progress and results can be found at http://jenkins.saltstack.com/.

24.6.3 Salt's Branch Topology

There are three different kinds of branches in use: develop, main release branches, and dot release branches.

- All feature work should go into the `develop` branch.
- Bug fixes and documentation changes should go into the oldest **supported main** release branch affected by the the bug or documentation change (you can use the blame button in github to figure out when the bug was introduced). Supported releases are the last 2 releases. For example, if the latest release is 2018.3, the last two release are 2018.3 and 2017.7. Main release branches are named after a year and month, such as `2016.11` and `2017.7`.
- Hot fixes, as determined by SaltStack's release team, should be submitted against **dot** release branches. Dot release branches are named after a year, month, and version. Examples include `2016.11.8` and `2017.7.2`.

Note: GitHub will open pull requests against Salt's main branch, `develop`, by default. Be sure to check which branch is selected when creating the pull request.

The Develop Branch

The `develop` branch is unstable and bleeding-edge. Pull requests containing feature additions or non-bug-fix changes should be made against the `develop` branch.

Note: If you have a bug fix or documentation change and have already forked your working branch from `develop` and do not know how to rebase your commits against another branch, then submit it to `develop` anyway. SaltStack's development team will be happy to back-port it to the correct branch.

Please make sure you let the maintainers know that the pull request needs to be back-ported.

Main Release Branches

The current release branch is the most recent stable release. Pull requests containing bug fixes or documentation changes should be made against the oldest supported main release branch that is affected.

The branch name will be a date-based name such as `2016.11`.

Bug fixes are made on this branch so that dot release branches can be cut from the main release branch without introducing surprises and new features. This approach maximizes stability.

Dot Release Branches

Prior to tagging an official release, a branch will be created when the SaltStack release team is ready to tag. The dot release branch is created from a main release branch. The dot release branch will be the same name as the tag minus the `v`. For example, the `2017.7.1` dot release branch was created from the `2017.7` main release branch. The `v2017.7.1` release was tagged at the `HEAD` of the `2017.7.1` branch.

This branching strategy will allow for more stability when there is a need for a re-tag during the testing phase of the release process and further increases stability.

Once the dot release branch is created, the fixes required for a given release, as determined by the SaltStack release team, will be added to this branch. All commits in this branch will be merged forward into the main release branch as well.

Merge Forward Process

The Salt repository follows a ``Merge Forward'' policy. The merge-forward behavior means that changes submitted to older main release branches will automatically be ``merged-forward'' into the newer branches.

For example, a pull request is merged into `2016.11`. Then, the entire `2016.11` branch is merged-forward into the `2017.7` branch, and the `2017.7` branch is merged-forward into the `develop` branch.

This process makes is easy for contributors to make only one pull-request against an older branch, but allows the change to propagate to all **main** release branches.

The merge-forward work-flow applies to all main release branches and the operation runs continuously.

Merge-Forwards for Dot Release Branches

The merge-forward policy applies to dot release branches as well, but has a slightly different behavior. If a change is submitted to a **dot** release branch, the dot release branch will be merged into its parent **main** release branch.

For example, a pull request is merged into the `2017.7.2` release branch. Then, the entire `2017.7.2` branch is merged-forward into the `2017.7` branch. From there, the merge forward process continues as normal.

The only way in which dot release branches differ from main release branches in regard to merge-forwards, is that once a dot release branch is created from the main release branch, the dot release branch does not receive merge forwards.

Note: The merge forward process for dot release branches is one-way: dot release branch --> main release branch.

Closing GitHub issues from commits

This ``merge-forward'' strategy requires that the magic keywords to close a GitHub issue appear in the commit message text directly. Only including the text in a pull request will not close the issue.

GitHub will close the referenced issue once the *commit* containing the magic text is merged into the default branch (`develop`). Any magic text input only into the pull request description will not be seen at the Git-level when those commits are merged-forward. In other words, only the commits are merged-forward and not the pull request text.

Backporting Pull Requests

If a bug is fixed on `develop` and the bug is also present on a currently-supported release branch, it will need to be back-ported to an applicable branch.

Note: Most Salt contributors can skip these instructions

These instructions do not need to be read in order to contribute to the Salt project! The SaltStack team will back-port fixes on behalf of contributors in order to keep the contribution process easy.

These instructions are intended for frequent Salt contributors, advanced Git users, SaltStack employees, or independent souls who wish to back-port changes themselves.

It is often easiest to fix a bug on the oldest supported release branch and then merge that branch forward into `develop` (as described earlier in this document). When that is not possible the fix must be back-ported, or copied, into any other affected branches.

These steps assume a pull request `#1234` has been merged into `develop`. And `upstream` is the name of the remote pointing to the main Salt repo.

1. Identify the oldest supported release branch that is affected by the bug.
2. Create a new branch for the back-port by reusing the same branch from the original pull request.

   Name the branch `bp-<NNNN>` and use the number of the original pull request.

   ```
   git fetch upstream refs/pull/1234/head:bp-1234
   git checkout bp-1234
   ```

3. Find the parent commit of the original pull request.

The parent commit of the original pull request must be known in order to rebase onto a release branch. The easiest way to find this is on GitHub.

Open the original pull request on GitHub and find the first commit in the list of commits. Select and copy the SHA for that commit. The parent of that commit can be specified by appending `~1` to the end.

4. Rebase the new branch on top of the release branch.
   - `<release-branch>` is the branch identified in step #1.
   - `<orig-base>` is the SHA identified in step #3 -- don't forget to add `~1` to the end!

```
git rebase --onto <release-branch> <orig-base> bp-1234
```

Note, release branches prior to `2016.11` will not be able to make use of rebase and must use cherry-picking instead.

5. Push the back-port branch to GitHub and open a new pull request.

Opening a pull request for the back-port allows for the test suite and normal code-review process.

```
git push -u origin bp-1234
```

24.6.4 Keeping Salt Forks in Sync

Salt advances quickly. It is therefore critical to pull upstream changes from upstream into your fork on a regular basis. Nothing is worse than putting hard work into a pull request only to see bunches of merge conflicts because it has diverged too far from upstream.

See also:

GitHub Fork a Repo Guide

The following assumes `origin` is the name of your fork and `upstream` is the name of the main saltstack/salt repository.

1. View existing remotes.

```
git remote -v
```

2. Add the `upstream` remote.

```
# For ssh github
git remote add upstream git@github.com:saltstack/salt.git

# For https github
git remote add upstream https://github.com/saltstack/salt.git
```

3. Pull upstream changes into your clone.

```
git fetch upstream
```

4. Update your copy of the `develop` branch.

```
git checkout develop
git merge --ff-only upstream/develop
```

If Git complains that a fast-forward merge is not possible, you have local commits.

- Run `git pull --rebase origin develop` to rebase your changes on top of the upstream changes.
- Or, run `git branch <branch-name>` to create a new branch with your commits. You will then need to reset your `develop` branch before updating it with the changes from upstream.

If Git complains that local files will be overwritten, you have changes to files in your working directory. Run `git status` to see the files in question.

5. Update your fork.

```
git push origin develop
```

6. Repeat the previous two steps for any other branches you work with, such as the current release branch.

24.6.5 Posting patches to the mailing list

Patches will also be accepted by email. Format patches using git format-patch and send them to the salt-users mailing list. The contributor will then get credit for the patch, and the Salt community will have an archive of the patch and a place for discussion.

24.6.6 Issue and Pull Request Labeling System

SaltStack uses several labeling schemes to help facilitate code contributions and bug resolution. See the *Labels and Milestones* documentation for more information.

24.6.7 Mentionbot

SaltStack runs a mention-bot which notifies contributors who might be able to help review incoming pull-requests based on their past contribution to files which are being changed.

If you do not wish to receive these notifications, please add your GitHub handle to the blacklist line in the `.mention-bot` file located in the root of the Salt repository.

24.6.8 GPG Verification

SaltStack has enabled GPG Probot to enforce GPG signatures for all commits included in a Pull Request.

In order for the GPG verification status check to pass, *every* contributor in the pull request must:

- Set up a GPG key on local machine
- Sign all commits in the pull request with key
- Link key with GitHub account

This applies to all commits in the pull request.

GitHub hosts a number of help articles for creating a GPG key, using the GPG key with `git` locally, and linking the GPG key to your GitHub account. Once these steps are completed, the commit signing verification will look like the example in GitHub's GPG Signature Verification feature announcement.

24.7 Deprecating Code

Salt should remain backwards compatible, though sometimes, this backwards compatibility needs to be broken because a specific feature and/or solution is no longer necessary or required. At first one might think, let me change this code, it seems that it's not used anywhere else so it should be safe to remove. Then, once there's a new release, users complain about functionality which was removed and they where using it, etc. This should, at all costs, be avoided, and, in these cases, *that* specific code should be deprecated.

In order to give users enough time to migrate from the old code behavior to the new behavior, the deprecation time frame should be carefully determined based on the significance and complexity of the changes required by the user.

Salt feature releases are based on the Periodic Table. Any new features going into the develop branch will be named after the next element in the Periodic Table. For example, Beryllium was the feature release name of the develop branch before the 2015.8 branch was tagged. At that point in time, any new features going into the develop branch after 2015.8 was branched were part of the Boron feature release.

A deprecation warning should be in place for at least two major releases before the deprecated code and its accompanying deprecation warning are removed. More time should be given for more complex changes. For example, if the current release under development is `Sodium`, the deprecated code and associated warnings should remain in place and warn for at least `Aluminum`.

To help in this deprecation task, salt provides `salt.utils.warn_until`. The idea behind this helper function is to show the deprecation warning to the user until salt reaches the provided version. Once that provided version is equaled `salt.utils.warn_until` will raise a `RuntimeError` making salt stop its execution. This stoppage is unpleasant and will remind the developer that the deprecation limit has been reached and that the code can then be safely removed.

Consider the following example:

```
def some_function(bar=False, foo=None):
    if foo is not None:
        salt.utils.warn_until(
            'Aluminum',
            'The \'foo\' argument has been deprecated and its '
            'functionality removed, as such, its usage is no longer '
            'required.'
        )
```

Development begins on the `Aluminum` release when the `Magnesium` branch is forked from the develop branch. Once this occurs, all uses of the `warn_until` function targeting `Aluminum`, along with the code they are warning about should be removed from the code.

24.8 Dunder Dictionaries

Salt provides several special ``dunder'' dictionaries as a convenience for Salt development. These include `__opts__`, `__context__`, `__salt__`, and others. This document will describe each dictionary and detail where they exist and what information and/or functionality they provide.

24.8.1 __opts__

Available in

- All loader modules

The `__opts__` dictionary contains all of the options passed in the configuration file for the master or minion.

Note: In many places in salt, instead of pulling raw data from the __opts__ dict, configuration data should be pulled from the salt *get* functions such as config.get, aka - __salt__['config.get'](`foo:bar') The *get* functions also allow for dict traversal via the *:* delimiter. Consider using get functions whenever using __opts__ or __pillar__ and __grains__ (when using grains for configuration data)

The configuration file data made available in the `__opts__` dictionary is the configuration data relative to the running daemon. If the modules are loaded and executed by the master, then the master configuration data is available, if the modules are executed by the minion, then the minion configuration is available. Any additional information passed into the respective configuration files is made available

24.8.2 __salt__

Available in

- Execution Modules
- State Modules
- Returners
- Runners

`__salt__` contains the execution module functions. This allows for all functions to be called as they have been set up by the salt loader.

```
__salt__['cmd.run']('fdisk -l')
__salt__['network.ip_addrs']()
```

Note: When used in runners, `__salt__` references other runner modules, and not execution modules.

24.8.3 __grains__

Available in

- Execution Modules
- State Modules
- Returners
- External Pillar

The `__grains__` dictionary contains the grains data generated by the minion that is currently being worked with. In execution modules, state modules and returners this is the grains of the minion running the calls, when generating the external pillar the `__grains__` is the grains data from the minion that the pillar is being generated for.

24.8.4 __pillar__

Available in

- Execution Modules
- State Modules
- Returners

The `__pillar__` dictionary contains the pillar for the respective minion.

24.8.5 __context__

`__context__` exists in state modules and execution modules.

During a state run the `__context__` dictionary persists across all states that are run and then is destroyed when the state ends.

When running an execution module `__context__` persists across all module executions until the modules are refreshed; such as when *saltutil.sync_all* or `state.apply` are executed.

A great place to see how to use `__context__` is in the cp.py module in salt/modules/cp.py. The fileclient authenticates with the master when it is instantiated and then is used to copy files to the minion. Rather than create a new fileclient for each file that is to be copied down, one instance of the fileclient is instantiated in the `__context__` dictionary and is reused for each file. Here is an example from salt/modules/cp.py:

```
if not 'cp.fileclient' in __context__:
    __context__['cp.fileclient'] = salt.fileclient.get_file_client(__opts__)
```

Note: Because __context__ may or may not have been destroyed, always be sure to check for the existence of the key in __context__ and generate the key before using it.

24.9 External Pillars

Salt provides a mechanism for generating pillar data by calling external pillar interfaces. This document will describe an outline of an ext_pillar module.

24.9.1 Location

Salt expects to find your `ext_pillar` module in the same location where it looks for other python modules. If the `extension_modules` option in your Salt master configuration is set, Salt will look for a `pillar` directory under there and load all the modules it finds. Otherwise, it will look in your Python site-packages `salt/pillar` directory.

24.9.2 Configuration

The external pillars that are called when a minion refreshes its pillars is controlled by the `ext_pillar` option in the Salt master configuration. You can pass a single argument, a list of arguments or a dictionary of arguments to your pillar:

```
ext_pillar:
  - example_a: some argument
  - example_b:
    - argumentA
    - argumentB
  - example_c:
      keyA: valueA
      keyB: valueB
```

24.9.3 The Module

24.9.4 Imports and Logging

Import modules your external pillar module needs. You should first include generic modules that come with stock Python:

```
import logging
```

And then start logging. This is an idiomatic way of setting up logging in Salt:

```
log = logging.getLogger(__name__)
```

Finally, load modules that are specific to what you are doing. You should catch import errors and set a flag that the `__virtual__` function can use later.

```
try:
    import weird_thing
    EXAMPLE_A_LOADED = True
except ImportError:
    EXAMPLE_A_LOADED = False
```

24.9.5 Options

If you define an `__opts__` dictionary, it will be merged into the `__opts__` dictionary handed to the `ext_pillar` function later. This is a good place to put default configuration items. The convention is to name things `modulename.option`.

```
__opts__ = { 'example_a.someconfig': 137 }
```

24.9.6 Initialization

If you define an `__init__` function, it will be called with the following signature:

```
def __init__( __opts__ ):
    # Do init work here
```

Note: The `__init__` function is ran every time a particular minion causes the external pillar to be called, so don't put heavy initialization code here. The `__init__` functionality is a side-effect of the Salt loader, so it may not be as useful in pillars as it is in other Salt items.

24.9.7 __virtual__

If you define a `__virtual__` function, you can control whether or not this module is visible. If it returns `False` then Salt ignores this module. If it returns a string, then that string will be how Salt identifies this external pillar in its `ext_pillar` configuration. If you're not renaming the module, simply return `True` in the `__virtual__` function, which is the same as if this function did not exist, then, the name Salt's `ext_pillar` will use to identify this module is its conventional name in Python.

This is useful to write modules that can be installed on all Salt masters, but will only be visible if a particular piece of software your module requires is installed.

```
# This external pillar will be known as `example_a`
def __virtual__():
    if EXAMPLE_A_LOADED:
        return True
    return False
```

```
# This external pillar will be known as `something_else`
__virtualname__ = 'something_else'

def __virtual__():
    if EXAMPLE_A_LOADED:
        return __virtualname__
    return False
```

24.9.8 ext_pillar

This is where the real work of an external pillar is done. If this module is active and has a function called `ext_pillar`, whenever a minion updates its pillar this function is called.

How it is called depends on how it is configured in the Salt master configuration. The first argument is always the current pillar dictionary, this contains pillar items that have already been added, starting with the data from `pillar_roots`, and then from any already-ran external pillars.

Using our example above:

```
ext_pillar( id, pillar, 'some argument' )                    # example_a
ext_pillar( id, pillar, 'argumentA', 'argumentB' )           # example_b
ext_pillar( id, pillar, keyA='valueA', keyB='valueB' } )     # example_c
```

In the `example_a` case, `pillar` will contain the items from the `pillar_roots`, in `example_b` `pillar` will contain that plus the items added by `example_a`, and in `example_c` `pillar` will contain that plus the items added by `example_b`. In all three cases, `id` will contain the ID of the minion making the pillar request.

This function should return a dictionary, the contents of which are merged in with all of the other pillars and returned to the minion. **Note**: this function is called once for each minion that fetches its pillar data.

```
def ext_pillar( minion_id, pillar, *args, **kwargs ):

    my_pillar = {'external_pillar': {}}

    my_pillar['external_pillar'] = get_external_pillar_dictionary()

    return my_pillar
```

You can call pillar with the dictionary's top name to retrieve its data. From above example, `external_pillar' is the top dictionary name. Therefore:

```
salt-call '*' pillar.get external_pillar
```

You shouldn't just add items to `pillar` and return that, since that will cause Salt to merge data that already exists. Rather, just return the items you are adding or changing. You could, however, use `pillar` in your module to make some decision based on pillar data that already exists.

This function has access to some useful globals:

__opts__ A dictionary of mostly Salt configuration options. If you had an `__opts__` dictionary defined in your module, those values will be included.

__salt__ A dictionary of Salt module functions, useful so you don't have to duplicate functions that already exist. E.g. `__salt__['cmd.run']( 'ls -l' )` **Note**, runs on the *master*

__grains__ A dictionary of the grains of the minion making this pillar call.

24.9.9 Example configuration

As an example, if you wanted to add external pillar via the `cmd_json` external pillar, add something like this to your master config:

```
ext_pillar:
  - cmd_json: 'echo {\"arg\":\"value\"}'
```

24.9.10 Reminder

Just as with traditional pillars, external pillars must be refreshed in order for minions to see any fresh data:

```
salt '*' saltutil.refresh_pillar
```

24.10 Installing Salt for development

Clone the repository using:

```
git clone https://github.com/saltstack/salt
```

Note: tags

Just cloning the repository is enough to work with Salt and make contributions. However, fetching additional tags from git is required to have Salt report the correct version for itself. To do this, first add the git repository as an upstream source:

```
git remote add upstream https://github.com/saltstack/salt
```

Fetching tags is done with the git `fetch' utility:

```
git fetch --tags upstream
```

Create a new virtualenv:

```
virtualenv /path/to/your/virtualenv
```

Avoid making your *virtualenv path too long*.

On Arch Linux, where Python 3 is the default installation of Python, use the `virtualenv2` command instead of `virtualenv`.

On Gentoo you must use `--system-site-packages` to enable pkg and portage_config functionality

---

Note: Using system Python modules in the virtualenv

To use already-installed python modules in virtualenv (instead of having pip download and compile new ones), run `virtualenv --system-site-packages` Using this method eliminates the requirement to install the salt dependencies again, although it does assume that the listed modules are all installed in the system PYTHONPATH at the time of virtualenv creation.

Note: Python development package

Be sure to install python devel package in order to install required Python modules. In Debian/Ubuntu run `sudo apt-get install -y python-dev`. In RedHat based system install `python-devel`

Activate the virtualenv:

```
source /path/to/your/virtualenv/bin/activate
```

Install Salt (and dependencies) into the virtualenv:

```
pip install pyzmq PyYAML pycrypto msgpack-python jinja2 psutil futures tornado
pip install -e ./salt   # the path to the salt git clone from above
```

Note: Installing psutil

Python header files are required to build this module, otherwise the pip install will fail. If your distribution separates binaries and headers into separate packages, make sure that you have the headers installed. In most Linux distributions which split the headers into their own package, this can be done by installing the `python-dev` or `python-devel` package. For other platforms, the package will likely be similarly named.

Note: Installing dependencies on macOS.

You can install needed dependencies on macOS using homebrew or macports. See *macOS Installation*

Warning: Installing on RedHat-based Distros

If installing from pip (or from source using `setup.py install`), be advised that the `yum-utils` package is needed for Salt to manage packages on RedHat-based systems.

24.10.1 Running a self-contained development version

During development it is easiest to be able to run the Salt master and minion that are installed in the virtualenv you created above, and also to have all the configuration, log, and cache files contained in the virtualenv as well.

The `/path/to/your/virtualenv` referenced multiple times below is also available in the variable `$VIRTUAL_ENV` once the virtual environment is activated.

Copy the master and minion config files into your virtualenv:

```
mkdir -p /path/to/your/virtualenv/etc/salt/pki/{master,minion}
cp ./salt/conf/master ./salt/conf/minion /path/to/your/virtualenv/etc/salt/
```

Edit the master config file:

1. Uncomment and change the `user: root` value to your own user.
2. Uncomment and change the `root_dir: /` value to point to `/path/to/your/virtualenv`.
3. Uncomment and change the `pki_dir: /etc/salt/pki/master` value to point to `/path/to/your/virtualenv/etc/salt/pki/master`
4. If you are running version 0.11.1 or older, uncomment, and change the `pidfile: /var/run/salt-master.pid` value to point to `/path/to/your/virtualenv/salt-master.pid`.
5. If you are also running a non-development version of Salt you will have to change the `publish_port` and `ret_port` values as well.

Edit the minion config file:

1. Repeat the edits you made in the master config for the `user` and `root_dir` values as well as any port changes.
2. Uncomment and change the `pki_dir: /etc/salt/pki/minion` value to point to `/path/to/your/virtualenv/etc/salt/pki/minion`
3. If you are running version 0.11.1 or older, uncomment, and change the `pidfile: /var/run/salt-minion.pid` value to point to `/path/to/your/virtualenv/salt-minion.pid`.
4. Uncomment and change the `master: salt` value to point at `localhost`.
5. Uncomment and change the `id:` value to something descriptive like ``saltdev''. This isn't strictly necessary but it will serve as a reminder of which Salt installation you are working with.
6. If you changed the `ret_port` value in the master config because you are also running a non-development version of Salt, then you will have to change the `master_port` value in the minion config to match.

Note: Using *salt-call* with a *Standalone Minion*

If you plan to run *salt-call* with this self-contained development environment in a masterless setup, you should invoke *salt-call* with `-c /path/to/your/virtualenv/etc/salt` so that salt can find the minion config file. Without the `-c` option, Salt finds its config files in */etc/salt*.

Start the master and minion, accept the minion's key, and verify your local Salt installation is working:

```
cd /path/to/your/virtualenv
salt-master -c ./etc/salt -d
salt-minion -c ./etc/salt -d
salt-key -c ./etc/salt -L
salt-key -c ./etc/salt -A
salt -c ./etc/salt '*' test.ping
```

Running the master and minion in debug mode can be helpful when developing. To do this, add `-l debug` to the calls to `salt-master` and `salt-minion`. If you would like to log to the console instead of to the log file, remove the `-d`.

Note: Too long socket path?

Once the minion starts, you may see an error like the following:

```
zmq.core.error.ZMQError: ipc path "/path/to/your/virtualenv/
var/run/salt/minion/minion_event_7824dcbcfd7a8f6755939af70b96249f_pub.ipc"
is longer than 107 characters (sizeof(sockaddr_un.sun_path)).
```

This means that the path to the socket the minion is using is too long. This is a system limitation, so the only workaround is to reduce the length of this path. This can be done in a couple different ways:

1. Create your virtualenv in a path that is short enough.
2. Edit the *sock_dir* minion config variable and reduce its length. Remember that this path is relative to the value you set in *root_dir*.

NOTE: The socket path is limited to 107 characters on Solaris and Linux, and 103 characters on BSD-based systems.

Note: File descriptor limits

Ensure that the system open file limit is raised to at least 2047:

```
# check your current limit
ulimit -n

# raise the limit. persists only until reboot
# use 'limit descriptors 2047' for c-shell
ulimit -n 2047
```

To set file descriptors on macOS, refer to the *macOS Installation* instructions.

Changing Default Paths

Instead of updating your configuration files to point to the new root directory and having to pass the new configuration directory path to all of Salt's CLI tools, you can explicitly tweak the default system paths that Salt expects:

```
GENERATE_SALT_SYSPATHS=1 pip install --global-option='--salt-root-dir=/path/to/your/
↪virtualenv/' \
    -e ./salt   # the path to the salt git clone from above
```

You can now call all of Salt's CLI tools without explicitly passing the configuration directory.

Additional Options

If you want to distribute your virtualenv, you probably don't want to include Salt's clone `.git/` directory, and, without it, Salt won't report the accurate version. You can tell `setup.py` to generate the hardcoded version information which is distributable:

```
GENERATE_SALT_SYSPATHS=1 WRITE_SALT_VERSION=1 pip install --global-option='--salt-root-
↪dir=/path/to/your/virtualenv/' \
    -e ./salt   # the path to the salt git clone from above
```

Instead of passing those two environmental variables, you can just pass a single one which will trigger the other two:

```
MIMIC_SALT_INSTALL=1 pip install --global-option='--salt-root-dir=/path/to/your/
↪virtualenv/' \
    -e ./salt   # the path to the salt git clone from above
```

This last one will grant you an editable salt installation with hardcoded system paths and version information.

24.10.2 Installing Salt from the Python Package Index

If you are installing using `easy_install`, you will need to define a **USE_SETUPTOOLS** environment variable, otherwise dependencies will not be installed:

```
USE_SETUPTOOLS=1 easy_install salt
```

24.10.3 Editing and previewing the documentation

You need `sphinx-build` command to build the docs. In Debian/Ubuntu this is provided in the `python-sphinx` package. Sphinx can also be installed to a virtualenv using pip:

```
pip install Sphinx==1.3.1
```

Change to salt documentation directory, then:

```
cd doc; make html
```

- This will build the HTML docs. Run `make` without any arguments to see the available make targets, which include **html**, **man**, and **text**.
- The docs then are built within the **docs/_build/** folder. To update the docs after making changes, run `make` again.
- The docs use reStructuredText for markup. See a live demo at http://rst.ninjs.org/.
- The help information on each module or state is culled from the python code that runs for that piece. Find them in `salt/modules/` or `salt/states/`.
- To build the docs on Arch Linux, the **python2-sphinx** package is required. Additionally, it is necessary to tell **make** where to find the proper **sphinx-build** binary, like so:

```
make SPHINXBUILD=sphinx-build2 html
```

- To build the docs on RHEL/CentOS 6, the **python-sphinx10** package must be installed from EPEL, and the following make command must be used:

```
make SPHINXBUILD=sphinx-build html
```

Once you've updated the documentation, you can run the following command to launch a simple Python HTTP server to see your changes:

```
cd _build/html; python -m SimpleHTTPServer
```

24.10.4 Running unit and integration tests

Run the test suite with following command:

```
./setup.py test
```

See *here* for more information regarding the test suite.

24.10.5 Issue and Pull Request Labeling System

SaltStack uses several labeling schemes to help facilitate code contributions and bug resolution. See the *Labels and Milestones* documentation for more information.

24.11 GitHub Labels and Milestones

SaltStack uses several label categories, as well as milestones, to triage incoming issues and pull requests in the GitHub issue tracker. Labels are used to sort issues by type, priority, severity, status, functional area, functional group, and targeted release and pull requests by status, functional area, functional group, type of change, and test status. Milestones are used to indicate whether an issue is fully triaged or is scheduled to be fixed by SaltStack in an upcoming sprint.

24.11.1 Milestones

All issues are assigned to a milestone, whereas pull requests are almost never assigned to a milestone as the mean lifetime of pull requests is short enough that there is no need to track them temporally.

SaltStack uses milestones to indicate which issues are blocked on submitter or upstream actions, are approved, or are scheduled to be fixed or implemented in an upcoming sprint. If an issue is not attached to a sprint milestone, you are welcome to work on it at your own desire and convenience. If it is attached to a sprint milestone and you have already begun working on it or have a solution in mind or have other ideas related to the issue, you are encouraged to coordinate with the assignee via the GitHub issue tracker to create the best possible solution or implementation.

- `Approved` - The issue has been validated and has all necessary information.
- `Blocked` - The issue is waiting on actions by parties outside of SaltStack, such as receiving more information from the submitter or resolution of an upstream issue. This milestone is usually applied in conjunction with the labels `Info Needed`, `Question`, `Expected Behavior`, `Won't Fix For Now`, or `Upstream Bug`.
- `Under Review` - The issue is having further validation done by a SaltStack engineer.
- `<Sprint>` - The issue is being actively worked on by a SaltStack engineer. Sprint milestones names are constructed from the chemical symbol of the next release's codename and the number of sprints until that release is made. For example, if the next release codename is `Neon` and there are five sprints until that release, the corresponding sprint milestone will be called `Ne 5`. See here for a discussion of Salt's release codenames.

24.11.2 Labels

Labels are used to sort and describe issues and pull requests. Some labels are usually reserved for one or the other, though most labels may be applied to both.

New issues will receive at least one label and a milestone, and new pull requests will receive at least one label. Except for the *functional area* and *functional group* label categories, issues will generally receive only up to one label per category.

Type

Issues are categorized into one of several types. Type labels are almost never used for pull requests. GitHub treats pull requests like issues in many ways, so a pull request could be considered an issue with an implicit `Pull Request` type label applied.

- `Feature` - The issue is a request for new functionality including changes, enhancements, refactors, etc.
- `Bug` - The issue documents broken, incorrect, or confusing behavior. This label is always accompanied by a *severity label*.
- `Duplicate` - The issue is a duplicate of another feature request or bug report.
- `Upstream Bug` - The issue is a result of an upstream issue.
- `Question` - The issue is more of a question than a request for new features or a report of broken features, but can sometimes lead to further discussion or changes of confusing or incongruous behavior or documentation.
- `Expected Behavior` - The issue is a bug report of intended functionality.

Priority

An issue's priority is relative to its *functional area*. If a bug report, for example, about `gitfs` indicates that all users of `gitfs` will encounter this bug, then a `P1` label will be applied, even though users who are not using `gitfs` will not encounter the bug. If a feature is requested by many users, it may be given a high priority.

- `P1` - The issue will be seen by all users.
- `P2` - The issue will be seen by most users.
- `P3` - The issue will be seen by about half of users.
- `P4` - The issue will not be seen by most users. Usually the issue is a very specific use case or corner case.

Severity

Severity labels are almost always only applied to issues labeled `Bug`.

- `Blocker` - The issue is blocking an impending release.
- `Critical` - The issue causes data loss, crashes or hangs salt processes, makes the system unresponsive, etc.
- `High Severity` - The issue reports incorrect functionality, bad functionality, a confusing user experience, etc.
- `Medium Severity` - The issue reports cosmetic items, formatting, spelling, colors, etc.

Functional Area

Many major components of Salt have corresponding GitHub labels. These labels are applied to all issues and pull requests as is reasonably appropriate. They are useful in organizing issues and pull requests according to the source code relevant to issues or the source code changed by pull requests.

- `Execution Module`
- `File Servers`
- `Grains`
- `Multi-Master`
- `Packaging` Related to packaging of Salt, not Salt's support for package management.
- `Pillar`
- `RAET`
- `Returners`
- `Runners`
- `SPM`
- `Salt-API`
- `Salt-Cloud`
- `Salt-SSH`
- `Salt-Syndic`
- `State Module`
- `Tests`
- `Transport`
- `Windows`
- `ZMQ`

Functional Group

These labels sort issues and pull requests according to the internal SaltStack engineering teams.

- `Core` - The issue or pull request relates to code that is central or existential to Salt itself.
- `Platform` - The issue or pull request relates to support and integration with various platforms like traditional operating systems as well as containers, platform-based utilities like filesystems, command schedulers, etc., and system-based applications like webservers, databases, etc.
- `RIoT` - The issue or pull request relates to support and integration with various abstract systems like cloud providers, hypervisors, API-based services, etc.
- `Console` - The issue or pull request relates to the SaltStack enterprise console.
- `Documentation` - The issue or pull request relates to documentation.

Status

Status labels are used to define and track the state of issues and pull requests. Not all potential statuses correspond to a label, but some statuses are common enough that labels have been created for them. If an issue has not been moved beyond the `Blocked` milestone, it is very likely that it will only have a status label.

- `Bugfix -back-port` The pull request needs to be back-ported to an older release branch. This is done by *recreating the pull request* against that branch. Once the back-port is completed, this label is replaced with a `Bugfix -[Done] back-ported` label. Normally, new features should go into the develop and bug fixes into the oldest supported release branch, see *here*.
- `Bugfix -[Done] back-ported` - The pull request has been back-ported to an older branch.
- `Cannot Reproduce` - The issue is a bug and has been reviewed by a SaltStack engineer, but it cannot be replicated with the provided information and context. Those involved with the bug will need to work through additional ideas until the bug can be isolated and verified.
- `Confirmed` - The issue is a bug and has been confirmed by a SaltStack engineer, who often documents a minimal working example that reproduces the bug.
- `Fixed Pending Verification` - The issue is a bug and has been fixed by one or more pull requests, which should link to the issue. Closure of the issue is contingent upon confirmation of resolution from the submitter. If the submitter reports a negative confirmation, this label is removed. If no response is given after a few weeks, then the issue will be assumed fixed and closed.
- `Info Needed` - The issue needs more information before it can be verified and resolved. For a feature request this may include a description of the use cases. Almost all bug reports need to include at least the versions of salt and its dependencies, the system type and version, commands used, debug logs, error messages, and relevant configs.
- `Pending Changes` - The pull request needs additional changes before it can be merged.
- `Pending Discussion` - The issue or pull request needs more discussion before it can be closed or merged. The status of the issue or pull request is not clear or apparent enough for definite action to be taken, or additional input from SaltStack, the submitter, or another party has been requested.

  If the issue is not a pull request, once the discussion has arrived at a cogent conclusion, this label will be removed and the issue will be accepted. If it is a pull request, the results of the discussion may require additional changes and thus, a `Pending Changes` label.
- `Won't Fix for Now` - The issue is legitimate, but it is not something the SaltStack team is currently able or willing to fix or implement. Issues having this label may be revisited in the future.

Type of Change

Every pull request should receive a change label. These labels measure the quantity of change as well as the significance of the change. The amount of change and the importance of the code area changed are considered, but often the depth of secondary code review required and the potential repercussions of the change may also advise the label choice.

Core code areas include: state compiler, crypto engine, master and minion and syndic daemons, transport, pillar rendering, loader, transport layer, event system, salt.utils, client, cli, logging, netapi, runner engine, templating engine, top file compilation, file client, file server, mine, salt-ssh, test runner, etc.

Non-core code usually constitutes the specific set of plugins for each of the several plugin layers of Salt: execution modules, states, runners, returners, clouds, etc.

- `Minor Change`
  - Less than 64 lines changed, or

  - Less than 8 core lines changed
- `Medium Change`
  - Less than 256 lines changed, or
  - Less than 64 core lines changed
- `Master Change`
  - More than 256 lines changed, or
  - More than 64 core lines changed
- `Expert Change`
  - Needs specialized, in-depth review

Test Status

These labels relate to the status of the automated tests that run on pull requests. If the tests on a pull request fail and are not overridden by one of these labels, the pull request submitter needs to update the code and/or tests so that the tests pass and the pull request can be merged.

- `Lint` - The pull request has passed all tests except for the code lint checker.
- `Tests Passed` - The pull request has passed all tests even though some test results are negative. Sometimes the automated testing infrastructure will encounter internal errors unrelated to the code change in the pull request that cause test runs to fail. These errors can be caused by cloud host and network issues and also Jenkins issues like erroneously accumulating workspace artifacts, resource exhaustion, and bugs that arise from long running Jenkins processes.

Other

These labels indicate miscellaneous issue types or statuses that are common or important enough to be tracked and sorted with labels.

- `Awesome` - The pull request implements an especially well crafted solution, or a very difficult but necessary change.
- `Help Wanted` - The issue appears to have a simple solution. Issues having this label should be a good starting place for new contributors to Salt.
- `Needs Testcase` - The issue or pull request relates to a feature that needs test coverage. The pull request containing the tests should reference the issue or pull request having this label, whereupon the label should be removed.
- `Regression` - The issue is a bug that breaks functionality known to work in previous releases.
- `Story` - The issue is used by a SaltStack engineer to track progress on multiple related issues in a single place.
- `Stretch` - The issue is an optional goal for the current sprint but may not be delivered.
- `ZD` - The issue is related to a Zendesk customer support ticket.
- `<Release>` - The issue is scheduled to be implemented by `<Release>`. See here for a discussion of Salt's release codenames.

24.12 Logging Internals

TODO

24.13 Modular Systems

When first working with Salt, it is not always clear where all of the modular components are and what they do. Salt comes loaded with more modular systems than many users are aware of, making Salt very easy to extend in many places.

The most commonly used modular systems are execution modules and states. But the modular systems extend well beyond the more easily exposed components and are often added to Salt to make the complete system more flexible.

24.13.1 Execution Modules

Execution modules make up the core of the functionality used by Salt to interact with client systems. The execution modules create the core system management library used by all Salt systems, including states, which interact with minion systems.

Execution modules are completely open ended in their execution. They can be used to do anything required on a minion, from installing packages to detecting information about the system. The only restraint in execution modules is that the defined functions always return a JSON serializable object.

For a list of all built in execution modules, click *here*

For information on writing execution modules, see *this page*.

24.13.2 Interactive Debugging

Sometimes debugging with `print()` and extra logs sprinkled everywhere is not the best strategy.

IPython is a helpful debug tool that has an interactive python environment which can be embedded in python programs.

First the system will require IPython to be installed.

```
# Debian
apt-get install ipython

# Arch Linux
pacman -Syu ipython2

# RHEL/CentOS (via EPEL)
yum install python-ipython
```

Now, in the troubling python module, add the following line at a location where the debugger should be started:

```
test = 'test123'
import IPython; IPython.embed_kernel()
```

After running a Salt command that hits that line, the following will show up in the log file:

```
[CRITICAL] To connect another client to this kernel, use:
[IPKernelApp] --existing kernel-31271.json
```

Now on the system that invoked `embed_kernel`, run the following command from a shell:

```
# NOTE: use ipython2 instead of ipython for Arch Linux
ipython console --existing
```

This provides a console that has access to all the vars and functions, and even supports tab-completion.

```
print(test)
test123
```

To exit IPython and continue running Salt, press `Ctrl-d` to logout.

24.13.3 State Modules

State modules are used to define the state interfaces used by Salt States. These modules are restrictive in that they must follow a number of rules to function properly.

Note: State modules define the available routines in sls files. If calling an execution module directly is desired, take a look at the *module* state.

24.13.4 Auth

The auth module system allows for external authentication routines to be easily added into Salt. The *auth* function needs to be implemented to satisfy the requirements of an auth module. Use the `pam` module as an example.

24.13.5 Fileserver

The fileserver module system is used to create fileserver backends used by the Salt Master. These modules need to implement the functions used in the fileserver subsystem. Use the `gitfs` module as an example.

24.13.6 Grains

Grain modules define extra routines to populate grains data. All defined public functions will be executed and MUST return a Python dict object. The dict keys will be added to the grains made available to the minion.

24.13.7 Output

The output modules supply the outputter system with routines to display data in the terminal. These modules are very simple and only require the *output* function to execute. The default system outputter is the `nested` module.

24.13.8 Pillar

Used to define optional external pillar systems. The pillar generated via the filesystem pillar is passed into external pillars. This is commonly used as a bridge to database data for pillar, but is also the backend to the libvirt state used to generate and sign libvirt certificates on the fly.

24.13.9 Renderers

Renderers are the system used to render sls files into salt highdata for the state compiler. They can be as simple as the `py` renderer and as complex as `stateconf` and `pydsl`.

24.13.10 Returners

Returners are used to send data from minions to external sources, commonly databases. A full returner will implement all routines to be supported as an external job cache. Use the `redis` returner as an example.

24.13.11 Runners

Runners are purely master-side execution sequences.

24.13.12 Tops

Tops modules are used to convert external data sources into top file data for the state system.

24.13.13 Wheel

The wheel system is used to manage master side management routines. These routines are primarily intended for the API to enable master configuration.

24.14 Package Providers

This page contains guidelines for writing package providers.

24.14.1 Package Functions

One of the most important features of Salt is package management. There is no shortage of package managers, so in the interest of providing a consistent experience in *pkg* states, there are certain functions that should be present in a package provider. Note that these are subject to change as new features are added or existing features are enhanced.

list_pkgs

This function should declare an empty dict, and then add packages to it by calling *pkg_resource.add_pkg*, like so:

```
__salt__['pkg_resource.add_pkg'](ret, name, version)
```

The last thing that should be done before returning is to execute *pkg_resource.sort_pkglist*. This function does not presently do anything to the return dict, but will be used in future versions of Salt.

```
__salt__['pkg_resource.sort_pkglist'](ret)
```

`list_pkgs` returns a dictionary of installed packages, with the keys being the package names and the values being the version installed. Example return data:

```
{'foo': '1.2.3-4',
 'bar': '5.6.7-8'}
```

latest_version

Accepts an arbitrary number of arguments. Each argument is a package name. The return value for a package will be an empty string if the package is not found or if the package is up-to-date. The only case in which a non-empty string is returned is if the package is available for new installation (i.e. not already installed) or if there is an upgrade available.

If only one argument was passed, this function return a string, otherwise a dict of name/version pairs is returned.

This function must also accept `**kwargs`, in order to receive the `fromrepo` and `repo` keyword arguments from pkg states. Where supported, these arguments should be used to find the install/upgrade candidate in the specified repository. The `fromrepo` kwarg takes precedence over `repo`, so if both of those kwargs are present, the repository specified in `fromrepo` should be used. However, if `repo` is used instead of `fromrepo`, it should still work, to preserve backwards compatibility with older versions of Salt.

version

Like `latest_version`, accepts an arbitrary number of arguments and returns a string if a single package name was passed, or a dict of name/value pairs if more than one was passed. The only difference is that the return values are the currently-installed versions of whatever packages are passed. If the package is not installed, an empty string is returned for that package.

upgrade_available

Deprecated and destined to be removed. For now, should just do the following:

```
return __salt__['pkg.latest_version'](name) != ''
```

install

The following arguments are required and should default to None:

1. name (for single-package pkg states)
2. pkgs (for multiple-package pkg states)
3. sources (for binary package file installation)

The first thing that this function should do is call *pkg_resource.parse_targets* (see below). This function will convert the SLS input into a more easily parsed data structure. *pkg_resource.parse_targets* may need to be modified to support your new package provider, as it does things like parsing package metadata which cannot be done for every package management system.

```
pkg_params, pkg_type = __salt__['pkg_resource.parse_targets'](name,
                                                              pkgs,
                                                              sources)
```

Two values will be returned to the **install** function. The first of them will be a dictionary. The keys of this dictionary will be package names, though the values will differ depending on what kind of installation is being done:

- If **name** was provided (and **pkgs** was not), then there will be a single key in the dictionary, and its value will be None. Once the data has been returned, if the **version** keyword argument was provided, then it should replace the None value in the dictionary.
- If **pkgs** was provided, then **name** is ignored, and the dictionary will contain one entry for each package in the **pkgs** list. The values in the dictionary will be None if a version was not specified for the package, and the desired version if specified. See the **Multiple Package Installation Options** section of the *pkg.installed* state for more info.
- If **sources** was provided, then **name** is ignored, and the dictionary values will be the path/URI for the package.

The second return value will be a string with two possible values: `repository` or `file`. The **install** function can use this value (if necessary) to build the proper command to install the targeted package(s).

Both before and after the installing the target(s), you should run **list_pkgs** to obtain a list of the installed packages. You should then return the output of `salt.utils.compare_dicts()`

```
return salt.utils.compare_dicts(old, new)
```

remove

Removes the passed package and return a list of the packages removed.

24.14.2 Package Repo Functions

There are some functions provided by pkg which are specific to package repositories, and not to packages themselves. When writing modules for new package managers, these functions should be made available as stated below, in order to provide compatibility with the pkgrepo state.

All repo functions should accept a basedir option, which defines which directory repository configuration should be found in. The default for this is dictated by the repo manager that is being used, and rarely needs to be changed.

```
basedir = '/etc/yum.repos.d'
__salt__['pkg.list_repos'](basedir)
```

list_repos

Lists the repositories that are currently configured on this system.

```
__salt__['pkg.list_repos']()
```

Returns a dictionary, in the following format:

```
{'reponame': 'config_key_1': 'config value 1',
             'config_key_2': 'config value 2',
             'config_key_3': ['list item 1 (when appropriate)',
                              'list item 2 (when appropriate)]}
```

get_repo

Displays all local configuration for a specific repository.

```
__salt__['pkg.get_repo'](repo='myrepo')
```

The information is formatted in much the same way as list_repos, but is specific to only one repo.

```
{'config_key_1': 'config value 1',
 'config_key_2': 'config value 2',
 'config_key_3': ['list item 1 (when appropriate)',
                  'list item 2 (when appropriate)]}
```

del_repo

Removes the local configuration for a specific repository. Requires a *repo* argument, which must match the locally configured name. This function returns a string, which informs the user as to whether or not the operation was a success.

```
__salt__['pkg.del_repo'](repo='myrepo')
```

mod_repo

Modify the local configuration for one or more option for a configured repo. This is also the way to create new repository configuration on the local system; if a repo is specified which does not yet exist, it will be created.

The options specified for this function are specific to the system; please refer to the documentation for your specific repo manager for specifics.

```
__salt__['pkg.mod_repo'](repo='myrepo', url='http://myurl.com/repo')
```

24.14.3 Low-Package Functions

In general, the standard package functions as describes above will meet your needs. These functions use the system's native repo manager (for instance, yum or the apt tools). In most cases, the repo manager is actually separate from the package manager. For instance, yum is usually a front-end for rpm, and apt is usually a front-end for dpkg. When possible, the package functions that use those package managers directly should do so through the low package functions.

It is normal and sane for `pkg` to make calls to `lowpkgs`, but `lowpkg` must never make calls to `pkg`. This is affects functions which are required by both `pkg` and `lowpkg`, but the technique in `pkg` is more performant than what is available to `lowpkg`. When this is the case, the `lowpkg` function that requires that technique must still use the `lowpkg` version.

list_pkgs

Returns a dict of packages installed, including the package name and version. Can accept a list of packages; if none are specified, then all installed packages will be listed.

```
installed = __salt__['lowpkg.list_pkgs']('foo', 'bar')
```

Example output:

```
{'foo': '1.2.3-4',
 'bar': '5.6.7-8'}
```

verify

Many (but not all) package management systems provide a way to verify that the files installed by the package manager have or have not changed. This function accepts a list of packages; if none are specified, all packages will be included.

```
installed = __salt__['lowpkg.verify']('httpd')
```

Example output:

```
{'/etc/httpd/conf/httpd.conf': {'mismatch': ['size', 'md5sum', 'mtime'],
                                'type': 'config'}}
```

file_list

Lists all of the files installed by all packages specified. If not packages are specified, then all files for all known packages are returned.

```
installed = __salt__['lowpkg.file_list']('httpd', 'apache')
```

This function does not return which files belong to which packages; all files are returned as one giant list (hence the *file_list* function name. However, This information is still returned inside of a dict, so that it can provide any errors to the user in a sane manner.

```
{'errors': ['package apache is not installed'],
  'files': ['/etc/httpd',
            '/etc/httpd/conf',
            '/etc/httpd/conf.d',
            '...SNIP...']}
```

file_dict

Lists all of the files installed by all packages specified. If not packages are specified, then all files for all known packages are returned.

```
installed = __salt__['lowpkg.file_dict']('httpd', 'apache', 'kernel')
```

Unlike *file_list*, this function will break down which files belong to which packages. It will also return errors in the same manner as *file_list*.

```
{'errors': ['package apache is not installed'],
 'packages': {'httpd': ['/etc/httpd',
                        '/etc/httpd/conf',
                        '...SNIP...'],
              'kernel': ['/boot/.vmlinuz-2.6.32-279.el6.x86_64.hmac',
                         '/boot/System.map-2.6.32-279.el6.x86_64',
                         '...SNIP...']}}
```

24.15 Pull Requests

Salt is a large software project with many developers working together. We encourage all Salt users to contribute new features, bug fixes and documentation fixes. For those who haven't contributed to a large software project

before we encourage you to consider the following questions when preparing a pull request.

This isn't an exhaustive list and these aren't necessarily hard and fast rules, but these are things we consider when reviewing a pull request.

- Does this change work on all platforms? In cases where it does not, is an appropriate and easy-to-understand reason presented to the user? Is it documented as-such? Have we thought about all the possible ways this code might be used and accounted as best we can for them?
- Will this code work on versions of all Python we support? Will it work on future versions?
- Are Python reserved keywords used? Are variables named in a way that will make it easy for the next person to understand what's going on?
- Does this code present a security risk in any way? What is the worst possible thing that an attacker could do with this code? If dangerous cases are possible, is it appropriate to document them? If so, has this been done? Would this change pass muster with a professional security audit? Is it obvious to a person using this code what the risks are?
- Is it readable? Does it conform to our style guide? Is the code documented such that the next person who comes along will be able to read and understand it? Most especially, are edge-cases documented to avoid regressions? Will it be immediately evident to the next person who comes along why this change was made?
- If appropriate, has the person who wrote the code which is being modified been notified and included in the process?
- What are the performance implications of this change? Is there a more efficient way to structure the logic and if so, does making the change balance itself against readability in a sensible way? Do the performance characteristics of the code change based on the way it is being invoked (i.e., through an API or various command-line tools.) Will it be easy to profile this change if it might be a problem?
- Are caveats considered and documented in the change?
- Will the code scale? More critically, will it scale in *both* directions? Salt runs in data-centers and on Raspberry Pi installations in the Sahara. It needs to work on big servers and tiny devices.
- Is appropriate documentation written both in public-facing docs and in-line? How will the user know how to use this? What will they do if it doesn't work as expected? Is this something a new user will understand? Can a user know all they need to about this functionality by reading the public docs?
- Is this a change in behavior? If so, is it in the appropriate branch? Are deprecation warnings necessary? Have those changes been fully documented? Have we fully thought through what implications a change in behavior might have?
- How has the code been tested? If appropriate are there automated tests which cover this? Is it likely to regress? If so, how has the potential of that regression been mitigated? What is the plan for ensuring that this code works going forward?
- If it's asynchronous code, what is the potential for a race condition?
- Is this code an original work? If it's borrowed from another project or found online are the appropriate licensing/attribution considerations handled?
- Is the reason for the change fully explained in the PR? If not for review, this is necessary so that somebody in the future can go back and figure out why it was necessary.
- Is the intended behavior of the change clear? How will that behavior be known to future contributors and to users?
- Does this code handle errors in a reasonable way? Have we gone back through the stack as much as possible to make sure that an error cannot be raised that we do not account for? Are errors tested for as well as proper functionality?

- If the code relies on external libraries, do we properly handle old versions of them? Do we require a specific version and if so is this version check implemented? Is the library available on the same platforms that module in question claims to support? If the code was written and tested against a particular library, have we documented that fact?
- Can this code freeze/hang/crash a running daemon? Can it stall a state run? Are there infinite loops? Are appropriate timeouts implemented?
- Is the function interface well documented? If argument types can not be inferred by introspection, are they documented?
- Are resources such as file-handles cleaned-up after they are used?
- Is it possible that a reference-cycle exists between objects that will leak memory?
- Has the code been linted and does it pass all tests?
- Does the change fully address the problem or is it limited to a small surface area? By this, I mean that it should be clear that the submitter has looked for other cases in the function or module where the given case might also be addressed. If additional changes are necessary are they documented in the code as a FIXME or the PR and in Github as an issue to be tracked?
- Will the code throw errors/warnings/stacktraces to the console during normal operation?
- Has all the debugging been removed?
- Does the code log any sensitive data? Does it show sensitive data in process lists? Does it store sensitive data to disk and if so, does it do so in a secure manner? Are there potential race conditions in between writing the data to disk and setting the appropriate permissions?
- Is it clear from the solution that the problem is well-understood? How can somebody who has never seen the problem feel confident that this proposed change is the best one?
- What's hard-coded that might not need to be? Are we making sensible decisions for the user and allowing them to tune and change things where appropriate?
- Are utility functions used where appropriate? Does this change re-implement something we already have code for?
- Is the right thing being fixed? There are cases where it's appropriate to fix a test and cases where it's appropriate to fix the code that's under test. Which is best for the user? Is this change a shortcut or a solution that will be solid in the months and years to come?
- How will this code react to changes elsewhere in the code base? What is it coupled to and have we fully thought through how best to present a coherent interface to consumers of a given function or method?
- Does this PR try to fix too many bugs/problems at once?
- Should this be split into multiple PRs to make them easier to test and reason about?

24.16 Reporting Bugs

Salt uses GitHub to track open issues and feature requests.

To file a bug, please navigate to the new issue page for the Salt project.

In an issue report, please include the following information:

- The output of `salt --versions-report` from the relevant machines. This can also be gathered remotely by using `salt <my_tgt> test.versions_report`.

- A description of the problem including steps taken to cause the issue to occur and the expected behaviour.
- Any steps taken to attempt to remediate the problem.
- Any configuration options set in a configuration file that may be relevant.
- A reproduceable test case. This may be as simple as an SLS file that illustrates a problem or it may be a link to a repository that contains a number of SLS files that can be used together to re-produce a problem. If the problem is transitory, any information that can be used to try and reproduce the problem is helpful.
- [Optional] The output of each salt component (master/minion/CLI) running with the `-ldebug` flag set.

Note: Please be certain to scrub any logs or SLS files for sensitive data!

24.17 Salt Topology

Salt is based on a powerful, asynchronous, network topology using ZeroMQ. Many ZeroMQ systems are in place to enable communication. The central idea is to have the fastest communication possible.

24.17.1 Servers

The Salt Master runs 2 network services. First is the ZeroMQ PUB system. This service by default runs on port `4505` and can be configured via the `publish_port` option in the master configuration.

Second is the ZeroMQ REP system. This is a separate interface used for all bi-directional communication with minions. By default this system binds to port `4506` and can be configured via the `ret_port` option in the master.

24.17.2 PUB/SUB

The commands sent out via the salt client are broadcast out to the minions via ZeroMQ PUB/SUB. This is done by allowing the minions to maintain a connection back to the Salt Master and then all connections are informed to download the command data at once. The command data is kept extremely small (usually less than 1K) so it is not a burden on the network.

24.17.3 Return

The PUB/SUB system is a one way communication, so once a publish is sent out the PUB interface on the master has no further communication with the minion. The minion, after running the command, then sends the command's return data back to the master via the `ret_port`.

24.18 Translating Documentation

If you wish to help translate the Salt documentation to your language, please head over to the Transifex website and signup for an account.

Once registered, head over to the Salt Translation Project, and either click on **Request Language** if you can't find yours, or, select the language for which you wish to contribute and click **Join Team**.

Transifex provides some useful reading resources on their support domain, namely, some useful articles directed to translators.

24.18.1 Building A Localized Version of the Documentation

While you're working on your translation on Transifex, you might want to have a look at how it's rendering.

Install The Transifex Client

To interact with the Transifex web service you will need to install the transifex-client:

```
pip install transifex-client
```

Configure The Transifex Client

Once installed, you will need to set it up on your computer. We created a script to help you with that:

```
.scripts/setup-transifex-config
```

Download Remote Translations

There's a little script which simplifies the download process of the translations(which isn't that complicated in the first place). So, let's assume you're translating `pt_PT`, Portuguese(Portugal). To download the translations, execute from the `doc/` directory of your Salt checkout:

```
make download-translations SPHINXLANG=pt_PT
```

To download `pt_PT`, Portuguese(Portugal), and `nl`, Dutch, you can use the helper script directly:

```
.scripts/download-translation-catalog pt_PT nl
```

Build Localized Documentation

After the download process finishes, which might take a while, the next step is to build a localized version of the documentation. Following the `pt_PT` example above:

```
make html SPHINXLANG=pt_PT
```

View Localized Documentation

Open your browser, point it to the local documentation path and check the localized output you've just build.

24.19 Developing Salt Tutorial

This tutorial assumes you have:

- a web browser

- a GitHub account (<my_account>)
- a command line (CLI)
- git
- a text editor

24.19.1 Fork

In your browser, navigate to the saltstack/salt GitHub repository.

Click on Fork (https://github.com/saltstack/salt/#fork-destination-box).

Note: If you have more than one GitHub presence, for example if you are a member of a team, GitHub will ask you into which area to clone Salt. If you don't know where, then select your personal GitHub account.

24.19.2 Clone

In your CLI, navigate to the directory into which you want clone the Salt codebase and submit the following command:

```
$ git clone https://github.com/<my_account>/salt.git
```

where <my_account> is the name of your GitHub account. After the clone has completed, add SaltStack as a second remote and fetch any changes from upstream.

```
$ cd salt
$ git remote add upstream https://github.com/saltstack/salt.git
$ git fetch upstream
```

For this tutorial, we will be working off from the develop branch, which is the default branch for the SaltStack GitHub project. This branch needs to track upstream/develop so that we will get all upstream changes when they happen.

```
$ git checkout develop
$ git branch --set-upstream-to upstream/develop
```

24.19.3 Fetch

Fetch any upstream changes on the develop branch and sync them to your local copy of the branch with a single command:

```
$ git pull --rebase
```

Note: For an explanation on pull vs pull --rebase and other excellent points, see this article by Mislav Marohnić.

24.19.4 Branch

Now we are ready to get to work. Consult the sprint beginner bug list and select an execution module whose `__virtual__` function needs to be updated. I'll select the `alternatives` module.

Create a new branch off from `develop`. Be sure to name it something short and descriptive.

```
$ git checkout -b virt_ret
```

24.19.5 Edit

Edit the file you have selected, and verify that the changes are correct.

```
$ vim salt/modules/alternatives.py
$ git diff
```

```
diff --git a/salt/modules/alternatives.py b/salt/modules/alternatives.py
index 1653e5f..30c0a59 100644
--- a/salt/modules/alternatives.py
+++ b/salt/modules/alternatives.py
@@ -30,7 +30,7 @@ def __virtual__():
         '''
         if os.path.isdir('/etc/alternatives'):
                 return True
-        return False
+        return (False, 'Cannot load alternatives module: /etc/alternatives dir not
 ↪found')

 def _get_cmd():
```

24.19.6 Commit

Stage and commit the changes. Write a descriptive commit summary, but try to keep it less than 50 characters. Review your commit.

```
$ git add salt/modules/alternatives.py
$ git commit -m 'modules.alternatives: __virtual__ return err msg'
$ git show
```

Note: If you need more room to describe the changes in your commit, run `git commit` (without the `-m`, message, option) and you will be presented with an editor. The first line is the commit summary and should still be 50 characters or less. The following paragraphs you create are free form and will be preserved as part of the commit.

24.19.7 Push

Push your branch to your GitHub account. You will likely need to enter your GitHub username and password.

```
$ git push origin virt_ret
Username for 'https://github.com': <my_account>
Password for 'https://<my_account>@github.com':
```

Note: If authentication over https does not work, you can alternatively setup ssh keys. Once you have done this, you may need add the keys to your git repository configuration

```
$ git config ssh.key ~/.ssh/<key_name>
```

where <key_name> is the file name of the private key you created.

24.19.8 Merge

In your browser, navigate to the new pull request page on the saltstack/salt GitHub repository and click on compare across forks. Select <my_account> from the list of head forks and the branch you are wanting to merge into develop (virt_ret in this case).

When you have finished reviewing the changes, click Create pull request.

If your pull request contains only a single commit, the title and comment will be taken from that commit's summary and message, otherwise the branch name is used for the title. Edit these fields as necessary and click Create pull request.

Note: Although these instructions seem to be the official pull request procedure on github's website, here are two alternative methods that are simpler.

- If you navigate to your clone of salt, https://github.com/<my_account>/salt, depending on how old your branch is or how recently you pushed updates on it, you may be presented with a button to create a pull request with your branch.
- I find it easiest to edit the following URL:

  https://github.com/saltstack/salt/compare/develop...<my_account>:virt_ret

24.19.9 Resources

GitHub offers many great tutorials on various aspects of the git- and GitHub-centric development workflow:

https://help.github.com/

There are many topics covered by the Salt Developer documentation:

https://docs.saltstack.com/en/latest/topics/development/index.html

The contributing documentation presents more details on specific contributing topics:

https://docs.saltstack.com/en/latest/topics/development/contributing.html

24.20 Salt Extend

salt-extend is a templating tool for extending SaltStack. If you're looking to add a module to SaltStack, then the salt-extend utility can guide you through the process.

You can use Salt Extend to quickly create templated modules for adding new behaviours to some of the module subsystems within Salt.

Salt Extend takes a template directory and merges it into a SaltStack source code directory.

24.20.1 Command line usage

See salt-extend

24.20.2 Choosing a template

The following templates are available:

module

Creates a new execution module within salt/modules/{{module_name}}.py

module_unit

Creates a new execution module unit test suite within tests/unit/modules/test_{{module_name}}.py

state

Creates a new state module within salt/states/{{module_name}}.py

state_unit

Creates a new state module unit test suite within tests/unit/states/test_{{module_name}}.py

24.20.3 Adding templates

1. Create a directory under <src>/templates
2. Create a file `template.yml` containing properties for

- `description` - a description of the template
- `questions` - a collection of additional questions to ask the user, the name of the item will be used as the key in the context dictionary within the jinja template.
  - `question` - The question to ask the user, as a string
  - `default` - (optional) the default value, can contain Jinja2 template syntax and has access to the default context properties

Example template.yml

```
description: "Execution module"
questions:
    depending_libraries:
        question: "What libraries does this module depend upon?"
    virtual_name:
        question: "What module virtual name to use?"
        default: "{{module_name}}"
```

3. Create the files within <src>/templates/<your template> to match the target

Note: File names can contain Jinja 2 template syntax, e.g. *`{{module_name}}.py}}'*

Example file in the template directory

```
print('Hello {{module_name}}')
__virtual__ = '{{__virtual_name__}}'
```

Default context properties

The default context provides the following properties

- `description` - A description of the template
- `short_description` - A short description of the module as entered by the user
- `version` - The version name of the next release
- `module_name` - The module name as entered by the user
- `release_date` - The current date in the format *YYYY-MM-DD*
- `year` - The current year in the format *YYYY*

As well as any additional properties entered from the questions section of `template.yml`

24.20.4 API

salt.utils.extend module

SaltStack Extend

A templating tool for extending SaltStack.

Takes a template directory and merges it into a SaltStack source code directory. This tool uses Jinja2 for templating.

This tool is accessed using *salt-extend*

codeauthor Anthony Shaw <anthonyshaw@apache.org>

`salt.utils.extend.`**`apply_template`**(*template_dir*, *output_dir*, *context*)

Apply the template from the template directory to the output using the supplied context dict.

Parameters

- **`src`** (`str`) -- The source path
- **`dst`** (`str`) -- The destination path
- **`context`** (`dict`) -- The dictionary to inject into the Jinja template as context

`salt.utils.extend.`**`run`**(*extension=None*, *name=None*, *description=None*, *salt_dir=None*, *merge=False*, *temp_dir=None*)

A template factory for extending the salt ecosystem

Parameters

- **`extension`** (`str`) -- The extension type, e.g. `module', `state', if omitted, user will be prompted
- **`name`** (`str`) -- Python-friendly name for the module, if omitted, user will be prompted
- **`description`** (`str`) -- A description of the extension, if omitted, user will be prompted

- **salt_dir** (str) -- The targeted Salt source directory
- **merge** (bool) -- Merge with salt directory, *False* to keep separate, *True* to merge trees.
- **temp_dir** (str) -- The directory for generated code, if omitted, system temp will be used

24.21 Salt's Test Suite

Salt comes with a powerful integration and unit test suite allowing for the fully automated run of integration and/or unit tests from a single interface.

To learn the basics of how Salt's test suite works, be sure to check out the *Salt's Test Suite: An Introduction* tutorial.

24.21.1 Test Directory Structure

Salt's test suite is located in the `tests` directory in the root of Salt's codebase. The test suite is divided into two main groups:

- *Integration Tests*
- *Unit Tests*

Within each of these groups, the directory structure roughly mirrors the structure of Salt's own codebase. Notice that there are directories for `states`, `modules`, `runners`, `output`, and more in each testing group.

The files that are housed in the `modules` directory of either the unit or the integration testing factions contain respective integration or unit test files for Salt execution modules.

Integration Tests

The Integration section of Salt's test suite start up a number of Salt daemons to test functionality in a live environment. These daemons include two Salt Masters, one Syndic, and two Minions. This allows the Syndic interface to be tested and Master/Minion communication to be verified. All of the integration tests are executed as live Salt commands sent through the started daemons.

Integration tests are particularly good at testing modules, states, and shell commands, among other segments of Salt's ecosystem. By utilizing the integration test daemons, integration tests are easy to write. They are also SaltStack's generally preferred method of adding new tests.

The discussion in the *Integration vs. Unit* section of the *testing tutorial* is beneficial in learning why you might want to write integration tests vs. unit tests. Both testing arenas add value to Salt's test suite and you should consider adding both types of tests if possible and appropriate when contributing to Salt.

- *Integration Test Documentation*

Unit Tests

Unit tests do not spin up any Salt daemons, but instead find their value in testing singular implementations of individual functions. Instead of testing against specific interactions, unit tests should be used to test a function's logic as well as any `return` or `raises` statements. Unit tests also rely heavily on mocking external resources.

The discussion in the *Integration vs. Unit* section of the *testing tutorial* is useful in determining when you should consider writing unit tests instead of, or in addition to, integration tests when contributing to Salt.

- *Unit Test Documentation*

24.21.2 Running The Tests

There are requirements, in addition to Salt's requirements, which need to be installed in order to run the test suite. Install one of the lines below, depending on the relevant Python version:

```
pip install -r requirements/dev_python27.txt
pip install -r requirements/dev_python34.txt
```

To be able to run integration tests which utilizes ZeroMQ transport, you also need to install additional requirements for it. Make sure you have installed the C/C++ compiler and development libraries and header files needed for your Python version.

This is an example for RedHat-based operating systems:

```
yum install gcc gcc-c++ python-devel
pip install -r requirements/zeromq.txt
```

On Debian, Ubuntu or their derivatives run the following commands:

```
apt-get install build-essential python-dev
pip install -r requirements/zeromq.txt
```

This will install the latest `pycrypto` and `pyzmq` (with bundled `libzmq`) Python modules required for running integration tests suite.

Once all requirements are installed, use `runtests.py` script to run all of the tests included in Salt's test suite:

```
python tests/runtests.py
```

For more information about options you can pass the test runner, see the `--help` option:

```
python tests/runtests.py --help
```

An alternative way of invoking the test suite is available in `setup.py`:

```
./setup.py test
```

Running Test Subsections

Instead of running the entire test suite all at once, which can take a long time, there are several ways to run only specific groups of tests or individual tests:

- Run *unit tests only*: `python tests/runtests.py --unit-tests`
- Run unit and integration tests for states: `python tests/runtests.py --state`
- Run integration tests for an individual module: `python tests/runtests.py -n integration.modules.virt`
- Run unit tests for an individual module: `python tests/runtests.py -n unit.modules.virt_test`
- Run an individual test by using the class and test name (this example is for the `test_default_kvm_profile` test in the `integration.module.virt`): `python tests/runtests.py -n integration.module.virt.VirtTest.test_default_kvm_profile`

For more specific examples of how to run various test subsections or individual tests, please see the *Test Selection Options* documentation or the *Running Specific Tests* section of the *Salt's Test Suite: An Introduction* tutorial.

Running Unit Tests Without Integration Test Daemons

Since the unit tests do not require a master or minion to execute, it is often useful to be able to run unit tests individually, or as a whole group, without having to start up the integration testing daemons. Starting up the master, minion, and syndic daemons takes a lot of time before the tests can even start running and is unnecessary to run unit tests. To run unit tests without invoking the integration test daemons, simply run the `runtests.py` script with `--unit` argument:

```
python tests/runtests.py --unit
```

All of the other options to run individual tests, entire classes of tests, or entire test modules still apply.

Running Destructive Integration Tests

Salt is used to change the settings and behavior of systems. In order to effectively test Salt's functionality, some integration tests are written to make actual changes to the underlying system. These tests are referred to as ``destructive tests''. Some examples of destructive tests are changes may be testing the addition of a user or installing packages. By default, destructive tests are disabled and will be skipped.

Generally, destructive tests should clean up after themselves by attempting to restore the system to its original state. For instance, if a new user is created during a test, the user should be deleted after the related test(s) have completed. However, no guarantees are made that test clean-up will complete successfully. Therefore, running destructive tests should be done with caution.

Note: Running destructive tests will change the underlying system. Use caution when running destructive tests.

To run tests marked as destructive, set the `--run-destructive` flag:

```
python tests/runtests.py --run-destructive
```

Running Cloud Provider Tests

Salt's testing suite also includes integration tests to assess the successful creation and deletion of cloud instances using *Salt-Cloud* for providers supported by Salt-Cloud.

The cloud provider tests are off by default and run on sample configuration files provided in `tests/integration/files/conf/cloud.providers.d/`. In order to run the cloud provider tests, valid credentials, which differ per provider, must be supplied. Each credential item that must be supplied is indicated by an empty string value and should be edited by the user before running the tests. For example, DigitalOcean requires a client key and an api key to operate. Therefore, the default cloud provider configuration file for DigitalOcean looks like this:

```
digitalocean-config:
  driver: digital_ocean
  client_key: ''
  api_key: ''
  location: New York 1
```

As indicated by the empty string values, the `client_key` and the `api_key` must be provided:

```
digitalocean-config:
  driver: digital_ocean
  client_key: wFGEwgregeqw3435gDger
```

```
  api_key: GDE43t43REGTrkilg43934t34qT43t4dgegerGEgg
  location: New York 1
```

Note: When providing credential information in cloud provider configuration files, do not include the single quotes.

Once all of the valid credentials for the cloud provider have been supplied, the cloud provider tests can be run by setting the `--cloud-provider-tests` flag:

```
./tests/runtests.py --cloud-provider-tests
```

Running The Tests In A Docker Container

The test suite can be executed under a docker container using the `--docked` option flag. The docker container must be properly configured on the system invoking the tests and the container must have access to the internet.

Here's a simple usage example:

```
python tests/runtests.py --docked=ubuntu-12.04 -v
```

The full docker container repository can also be provided:

```
python tests/runtests.py --docked=salttest/ubuntu-12.04 -v
```

The SaltStack team is creating some containers which will have the necessary dependencies pre-installed. Running the test suite on a container allows destructive tests to run without making changes to the main system. It also enables the test suite to run under a different distribution than the one the main system is currently using.

The current list of test suite images is on Salt's docker repository.

Custom docker containers can be provided by submitting a pull request against Salt's docker Salt test containers repository.

24.21.3 Automated Test Runs

SaltStack maintains a Jenkins server to allow for the execution of tests across supported platforms. The tests executed from Salt's Jenkins server create fresh virtual machines for each test run, then execute destructive tests on the new, clean virtual machine.

SaltStack's Jenkins server continuously runs the entire test suite, including destructive tests, on an array of various supported operating systems throughout the day. Each actively supported branch of Salt's repository runs the tests located in the respective branch's code. Each set of branch tests also includes a pylint run. These branch tests help ensure the viability of Salt code at any given point in time as pull requests are merged into branches throughout the day.

In addition to branch tests, SaltStack's Jenkins server also runs tests on pull requests. These pull request tests include a smaller set of virtual machines that run on the branch tests. The pull request tests, like the branch tests, include a pylint test as well.

When a pull request is submitted to Salt's repository on GitHub, the suite of pull request tests are started by Jenkins. These tests are used to gauge the pull request's viability to merge into Salt's codebase. If these initial tests pass, the pull request can then merged into the Salt branch by one of Salt's core developers, pending their discretion. If the initial tests fail, core developers may request changes to the pull request. If the failure is unrelated to the changes in question, core developers may merge the pull request despite the initial failure.

As soon as the pull request is merged, the changes will be added to the next branch test run on Jenkins.

For a full list of currently running test environments, go to http://jenkins.saltstack.com.

Using Salt-Cloud on Jenkins

For testing Salt on Jenkins, SaltStack uses *Salt-Cloud* to spin up virtual machines. The script using Salt-Cloud to accomplish this is open source and can be found here: https://github.com/saltstack/salt/blob/develop/tests/jenkins.py

24.21.4 Writing Tests

The salt testing infrastructure is divided into two classes of tests, integration tests and unit tests. These terms may be defined differently in other contexts, but for Salt they are defined this way:

- Unit Test: Tests which validate isolated code blocks and do not require external interfaces such as `salt-call` or any of the salt daemons.
- Integration Test: Tests which validate externally accessible features.

Salt testing uses unittest2 from the python standard library and MagicMock.

- *Writing integration tests*
- *Writing unit tests*

Naming Conventions

Any function in either integration test files or unit test files that is doing the actual testing, such as functions containing assertions, must start with `test_`:

```
def test_user_present(self):
```

When functions in test files are not prepended with `test_`, the function acts as a normal, helper function and is not run as a test by the test suite.

Submitting New Tests

Which branch of the Salt codebase should new tests be written against? The location of where new tests should be submitted depends largely on the reason you're writing the tests.

Tests for New Features

If you are adding new functionality to Salt, please write the tests for this new feature in the same pull request as the new feature. New features should always be submitted to the `develop` branch.

If you have already submitted the new feature, but did not write tests in the original pull request that has already been merged, please feel free to submit a new pull request containing tests. If the feature was recently added to Salt's `develop` branch, then the tests should be added there as well. However, if the feature was added to `develop` some time ago and is already present in one or more release branches, please refer to the *Tests for Entire Files or Functions* section below for more details about where to submit tests for functions or files that do not already have tests.

Tests to Accompany a Bugfix

If you are writing tests for code that fixes a bug in Salt, please write the test in the same pull request as the bugfix. If you're unsure of where to submit your bugfix and accompanying test, please review the *Which Salt Branch?* documentation in Salt's *Contributing* guide.

Tests for Entire Files or Functions

Sometimes entire files in Salt are completely untested. If you are writing tests for a file that doesn't have any tests written for it, write your test against the earliest supported release branch that contains the file or function you're testing.

Once your tests are submitted in a pull request and is merged into the branch in question, the tests you wrote will be merged-forward by SaltStack core engineers and the new tests will propagate to the newer release branches. That way the tests you wrote will apply to all current and relevant release branches, and not just the `develop` branch, for example. This methodology will help protect against regressions on older files in Salt's codebase.

There may be times when the tests you write against an older branch fail in the merge-forward process because functionality has changed in newer release branches. In these cases, a Salt core developer may reach out to you for advice on the tests in question if the path forward is unclear.

Note: If tests are written against a file in an older release branch and then merged forward, there may be new functionality in the file that is present in the new release branch that is untested.It would be wise to see if new functionality could use additional testing once the test file has propagated to newer release branches.

Test Helpers

Several Salt-specific helpers are available. A full list is available by inspecting functions exported in *tests.support.helpers*.

@expensiveTest -- Designates a test which typically requires a relatively costly external resource, like a cloud virtual machine. This decorator is not normally used by developers outside of the Salt core team.

@destructiveTest -- Marks a test as potentially destructive. It will not be run by the test runner unless the `--run-destructive` test is expressly passed.

@requires_network -- Requires a network connection for the test to operate successfully. If a network connection is not detected, the test will not run.

@requires_salt_modules -- Requires all the modules in a list of modules in order for the test to be executed. Otherwise, the test is skipped.

@requires_system_grains -- Loads and passes the grains on the system as an keyword argument to the test function with the name *grains*.

@skip_if_binaries_missing(['list', `of', `binaries']) -- If called from inside a test, the test will be skipped if the binaries are not all present on the system.

@skip_if_not_root -- If the test is not executed as root, it will be skipped.

@with_system_user -- Creates and optionally destroys a system user within a test case. See implementation details in *tests.support.helpers* for details.

@with_system_group -- Creates and optionally destroys a system group within a test case. See implementation details in *tests.support.helpers* for details.

@with_system_user_and_group -- Creates and optionally destroys a system user and group within a test case. See implementation details in *tests.support.helpers* for details.

24.22 Integration Tests

The Salt integration tests come with a number of classes and methods which allow for components to be easily tested. These classes are generally inherited from and provide specific methods for hooking into the running integration test environment created by the integration tests.

It is noteworthy that since integration tests validate against a running environment that they are generally the preferred means to write tests.

The integration system is all located under `tests/integration` in the Salt source tree. Each directory within `tests/integration` corresponds to a directory in Salt's tree structure. For example, the integration tests for the `test.py` Salt module that is located in `salt/modules` should also be named `test.py` and reside in `tests/integration/modules`.

24.22.1 Preparing to Write Integration Tests

This guide assumes that your Salt development environment is already configured and that you have a basic understanding of contributing to the Salt codebase. If you're unfamiliar with either of these topics, please refer to the *Installing Salt for Development* and the *Contributing* pages, respectively.

This documentation also assumes that you have an understanding of how to *run Salt's test suite*, including running the *test subsections*, and running a single integration test file, class, or individual test.

24.22.2 Best Practices

Integration tests should be written to the following specifications.

What to Test?

Since integration tests are used to validate against a running Salt environment, integration tests should be written with the Salt components, and their various interactions, in mind.

- Isolate testing functionality. Don't rely on the pass or failure of other, separate tests.
- Individual tests should test against a single behavior.
- Since it occasionally takes some effort to ``set up'' an individual test, it may be necessary to call several functions within a single test. However, be sure that once the work has been done to set up a test, make sure you are clear about the functionality that is being tested.

Naming Conventions

Test names and docstrings should indicate what functionality is being tested. Test functions are named `test_<fcn>_<test-name>` where `<fcn>` is the function being tested and `<test-name>` describes the behavior being tested.

In order for integration tests to get picked up during a run of the test suite, each individual test must be prepended with the `test_` naming syntax, as described above.

If a function does not start with `test_`, then the function acts as a ``normal'' function and is not considered a testing function. It will not be included in the test run or testing output.

The setUp and tearDown Functions

There are two special functions that can be utilized in the integration side of Salt's test suite: `setUp` and `tearDown`. While these functions are not required in all test files, there are many examples in Salt's integration test suite illustrating the broad usefulness of each function.

The `setUp` function is used to set up any repetitive or useful tasks that the tests in a test class need before running. For example, any of the `mac_*` integration tests should only run on macOS machines. The `setUp` function can be used to test for the presence of the `Darwin` kernel. If the `Darwin` kernel is not present, then the test should be skipped.

```
def setUp(self):
    '''
    Sets up test requirements
    '''
    os_grain = self.run_function('grains.item', ['kernel'])
    if os_grain['kernel'] not in 'Darwin':
        self.skipTest(
            'Test not applicable to \'{kernel}\' kernel'.format(
                **os_grain
            )
        )
```

The `setUp` function can be used for many things. The above code snippet is only one example. Another example might be to ensure that a particular setting is present before running tests that would require the setting.

The `tearDown` function is used to clean up after any tests. This function is useful for restoring any settings that might have been changed during the test run.

Note: The `setUp` and `tearDown` functions run before and after each test in the test class that the `setUp` and `tearDown` functions are defined.

Be sure to read the *Destructive vs Non-Destructive Tests* section when using any kind of destructive functions that might alter the system running the test suite in either the `setUp` or `tearDown` function definitions.

Testing Order

The test functions within a test class do not run in the order they were defined, but instead run in lexicographical order.

Note that if any `setUp` or `tearDown` functions are defined in the class, those functions will run before (for `setUp`) or after (for `tearDown`) each test case.

24.22.3 Integration Classes

The integration classes are located in `tests/integration/__init__.py` and can be extended therein. There are four classes available to extend:

- *ModuleCase*
- *ShellCase*

- *SSHCase*
- *SyndicCase*

ModuleCase

Used to define executions run via the master to minions and to call single modules and states. The available testing functions are:

run_function

Run a single salt function and condition the return down to match the behavior of the raw function call. This will run the command and only return the results from a single minion to verify.

run_state

Run the state.single command and return the state return structure.

minion_run

Run a single salt function on the `minion' target and condition the return down to match the behavior of the raw function call.

ShellCase

Shell out to the scripts which ship with Salt. The testing functions are:

run_cp

Execute salt-cp. Pass in the argument string as it would be passed on the command line.

run_call

Execute salt-call, pass in the argument string as it would be passed on the command line.

run_cloud

Execute the salt-cloud command. Pass in the argument string as it would be passed on the command line.

run_key

Execute the salt-key command. Pass in the argument string as it would be passed on the command line.

run_run

Execute the salt-run command. Pass in the argument string as it would be passed on the command line.

run_run_plus

Execute the runner function the and return the return data and output in a dict

run_salt

Execute the salt command. Pass in the argument string as it would be passed on the command line.

run_script

Execute a salt script with the given argument string.

run_ssh

Execute the salt-ssh. Pass in the argument string as it would be passed on the command line.

SSHCase

Used to execute remote commands via salt-ssh. The available methods are as follows:

run_function

Run a single salt function via salt-ssh and condition the return down to match the behavior of the raw function call. This will run the command and only return the results from a single minion to verify.

SyndicCase

Used to execute remote commands via a syndic and is only used to verify the capabilities of the Salt Syndic. The available methods are as follows:

run_function

Run a single salt function and condition the return down to match the behavior of the raw function call. This will run the command and only return the results from a single minion to verify.

24.22.4 Examples

The following sections define simple integration tests present in Salt's integration test suite for each type of testing class.

Module Example via ModuleCase Class

Import the integration module, this module is already added to the python path by the test execution. Inherit from the `integration.ModuleCase` class.

Now the workhorse method `run_function` can be used to test a module:

```
import os
import tests.integration as integration

class TestModuleTest(integration.ModuleCase):
    '''
    Validate the test module
    '''
    def test_ping(self):
        '''
        test.ping
        '''
        self.assertTrue(self.run_function('test.ping'))

    def test_echo(self):
        '''
        test.echo
        '''
        self.assertEqual(self.run_function('test.echo', ['text']), 'text')
```

The fist example illustrates the testing master issuing a `test.ping` call to a testing minion. The test asserts that the minion returned with a `True` value to the master from the `test.ping` call.

The second example similarly verifies that the minion executed the `test.echo` command with the `text` argument. The `assertEqual` call maintains that the minion ran the function and returned the data as expected to the master.

Shell Example via ShellCase

Validating the shell commands can be done via shell tests:

```
import sys
import shutil
import tempfile

import tests.integration as integration

class KeyTest(integration.ShellCase):
    '''
    Test salt-key script
    '''

    _call_binary_ = 'salt-key'

    def test_list(self):
        '''
        test salt-key -L
        '''
        data = self.run_key('-L')
        expect = [
                'Unaccepted Keys:',
```

```
                'Accepted Keys:',
                'minion',
                'sub_minion',
                'Rejected:', '']
        self.assertEqual(data, expect)
```

This example verifies that the `salt-key` command executes and returns as expected by making use of the `run_key` method.

SSH Example via SSHCase

Testing salt-ssh functionality can be done using the SSHCase test class:

```
import tests.integration as integration

class SSHGrainsTest(integration.SSHCase):
'''
Test salt-ssh grains functionality
Depend on proper environment set by integration.SSHCase class
'''

def test_grains_id(self):
    '''
    Test salt-ssh grains id work for localhost.
    '''
    cmd = self.run_function('grains.get', ['id'])
    self.assertEqual(cmd, 'localhost')
```

Testing Event System via SaltMinionEventAssertsMixin

The fundamentially asynchronous nature of Salt makes testing the event system a challenge. The `SaltMinionEventAssertsMixin` provides a facility for testing that events were received on a minion event bus.

```
import tests.integration as integration

class TestEvent(integration.SaltEventAssertsMixin):
    '''
    Example test of firing an event and receiving it
    '''

    def test_event(self):
        e = salt.utils.event.get_event('minion', sock_dir=self.minion_opts['sock_dir
↪'], opts=self.minion_opts)

        e.fire_event({'a': 'b'}, '/test_event')

        self.assertMinionEventReceived({'a': 'b'})
```

Syndic Example via SyndicCase

Testing Salt's Syndic can be done via the SyndicCase test class:

```
import tests.integration as integration

class TestSyndic(integration.SyndicCase):
    '''
    Validate the syndic interface by testing the test module
    '''
    def test_ping(self):
        '''
        test.ping
        '''
        self.assertTrue(self.run_function('test.ping'))
```

This example verifies that a `test.ping` command is issued from the testing master, is passed through to the testing syndic, down to the minion, and back up again by using the `run_function` located with in the `SyndicCase` test class.

24.22.5 Integration Test Files

Since using Salt largely involves configuring states, editing files, and changing system data, the integration test suite contains a directory named `files` to aid in testing functions that require files. Various Salt integration tests use these example files to test against instead of altering system files and data.

Each directory within `tests/integration/files` contain files that accomplish different tasks, based on the needs of the integration tests using those files. For example, `tests/integration/files/ssh` is used to bootstrap the test runner for salt-ssh testing, while `tests/integration/files/pillar` contains files storing data needed to test various pillar functions.

The `tests/integration/files` directory also includes an integration state tree. The integration state tree can be found at `tests/integration/files/file/base`.

The following example demonstrates how integration files can be used with ModuleCase to test states:

```
# Import python libs
from __future__ import absolute_import
import os
import shutil

# Import Salt Testing libs
from tests.support.case import ModuleCase
from tests.support.paths import FILES, TMP
from tests.support.mixins import SaltReturnAssertsMixin

# Import salt libs
import salt.utils

HFILE = os.path.join(TMP, 'hosts')

class HostTest(ModuleCase, SaltReturnAssertsMixin):
    '''
    Validate the host state
    '''

    def setUp(self):
        shutil.copyfile(os.path.join(FILES, 'hosts'), HFILE)
        super(HostTest, self).setUp()
```

```
    def tearDown(self):
        if os.path.exists(HFILE):
            os.remove(HFILE)
        super(HostTest, self).tearDown()

    def test_present(self):
        '''
        host.present
        '''
        name = 'spam.bacon'
        ip = '10.10.10.10'
        ret = self.run_state('host.present', name=name, ip=ip)
        self.assertSaltTrueReturn(ret)
        with salt.utils.fopen(HFILE) as fp_:
            output = fp_.read()
            self.assertIn('{0}\t\t{1}'.format(ip, name), output)
```

To access the integration files, a variable named `FILES` points to the `tests/integration/files` directory. This is where the referenced `host.present` sls file resides.

In addition to the static files in the integration state tree, the location `TMP` can also be used to store temporary files that the test system will clean up when the execution finishes.

24.22.6 Destructive vs Non-Destructive Tests

Since Salt is used to change the settings and behavior of systems, one testing approach is to run tests that make actual changes to the underlying system. This is where the concept of destructive integration tests comes into play. Tests can be written to alter the system they are running on. This capability is what fills in the gap needed to properly test aspects of system management like package installation.

Any test that changes the underlying system in any way, such as creating or deleting users, installing packages, or changing permissions should include the `@destructive` decorator to signal system changes and should be written with care. System changes executed within a destructive test should also be restored once the related tests have completed. For example, if a new user is created to test a module, the same user should be removed after the test is completed to maintain system integrity.

To write a destructive test, import, and use the destructiveTest decorator for the test method:

```
import tests.integration as integration
from tests.support.helpers import destructiveTest, skip_if_not_root

class DestructiveExampleModuleTest(integration.ModuleCase):
    '''
    Demonstrate a destructive test
    '''

    @destructiveTest
    @skip_if_not_root
    def test_user_not_present(self):
        '''
        This is a DESTRUCTIVE TEST it creates a new user on the minion.
        And then destroys that user.
        '''
        ret = self.run_state('user.present', name='salt_test')
        self.assertSaltTrueReturn(ret)
        ret = self.run_state('user.absent', name='salt_test')
        self.assertSaltTrueReturn(ret)
```

24.22.7 Cloud Provider Tests

Cloud provider integration tests are used to assess *Salt-Cloud*`s ability to create and destroy cloud instances for various supported cloud providers. Cloud provider tests inherit from the ShellCase Integration Class.

Any new cloud provider test files should be added to the `tests/integration/cloud/providers/` directory. Each cloud provider test file also requires a sample cloud profile and cloud provider configuration file in the integration test file directory located at `tests/integration/files/conf/cloud.*.d/`.

The following is an example of the default profile configuration file for Digital Ocean, located at: `tests/integration/files/conf/cloud.profiles.d/digital_ocean.conf`:

```
digitalocean-test:
  provider: digitalocean-config
  image: Ubuntu 14.04 x64
  size: 512MB
```

Each cloud provider requires different configuration credentials. Therefore, sensitive information such as API keys or passwords should be omitted from the cloud provider configuration file and replaced with an empty string. The necessary credentials can be provided by the user by editing the provider configuration file before running the tests.

The following is an example of the default provider configuration file for Digital Ocean, located at: `tests/integration/files/conf/cloud.providers.d/digital_ocean.conf`:

```
digitalocean-config:
  driver: digital_ocean
  client_key: ''
  api_key: ''
  location: New York 1
```

In addition to providing the necessary cloud profile and provider files in the integration test suite file structure, appropriate checks for if the configuration files exist and contain valid information are also required in the test class's `setUp` function:

```
from tests.support.case import ShellCase
from tests.support.paths import FILES

class LinodeTest(ShellCase):
'''
Integration tests for the Linode cloud provider in Salt-Cloud
'''

def setUp(self):
    '''
    Sets up the test requirements
    '''
    super(LinodeTest, self).setUp()

    # check if appropriate cloud provider and profile files are present
    profile_str = 'linode-config:'
    provider = 'linode'
    providers = self.run_cloud('--list-providers')
    if profile_str not in providers:
        self.skipTest(
            'Configuration file for {0} was not found. Check {0}.conf files '
            'in tests/integration/files/conf/cloud.*.d/ to run these tests.'
            .format(provider)
        )
```

```
    # check if apikey and password are present
    path = os.path.join(FILES,
                        'conf',
                        'cloud.providers.d',
                        provider + '.conf')
    config = cloud_providers_config(path)
    api = config['linode-config']['linode']['apikey']
    password = config['linode-config']['linode']['password']
    if api == '' or password == '':
        self.skipTest(
            'An api key and password must be provided to run these tests. Check '
            'tests/integration/files/conf/cloud.providers.d/{0}.conf'.format(
                provider
            )
        )
```

Repeatedly creating and destroying instances on cloud providers can be costly. Therefore, cloud provider tests are off by default and do not run automatically. To run the cloud provider tests, the `--cloud-provider-tests` flag must be provided:

```
./tests/runtests.py --cloud-provider-tests
```

Since cloud provider tests do not run automatically, all provider tests must be preceded with the `@expensiveTest` decorator. The expensive test decorator is necessary because it signals to the test suite that the `--cloud-provider-tests` flag is required to run the cloud provider tests.

To write a cloud provider test, import, and use the expensiveTest decorator for the test function:

```
from tests.support.helpers import expensiveTest

@expensiveTest
def test_instance(self):
    '''
    Test creating an instance on Linode
    '''
    name = 'linode-testing'

    # create the instance
    instance = self.run_cloud('-p linode-test {0}'.format(name))
    str = '        {0}'.format(name)

    # check if instance with salt installed returned as expected
    try:
        self.assertIn(str, instance)
    except AssertionError:
        self.run_cloud('-d {0} --assume-yes'.format(name))
        raise

    # delete the instance
    delete = self.run_cloud('-d {0} --assume-yes'.format(name))
    str = '            True'
    try:
        self.assertIn(str, delete)
    except AssertionError:
        raise
```

24.22.8 Adding New Directories

If the corresponding Salt directory does not exist within `tests/integration`, the new directory must be created along with the appropriate test file to maintain Salt's testing directory structure.

In order for Salt's test suite to recognize tests within the newly created directory, options to run the new integration tests must be added to `tests/runtests.py`. Examples of the necessary options that must be added can be found here: https://github.com/saltstack/salt/blob/develop/tests/runtests.py. The functions that need to be edited are `setup_additional_options`, `validate_options`, and `run_integration_tests`.

24.23 Writing Unit Tests

24.23.1 Introduction

Like many software projects, Salt has two broad-based testing approaches -- integration testing and unit testing. While integration testing focuses on the interaction between components in a sandboxed environment, unit testing focuses on the singular implementation of individual functions.

Unit tests should be used specifically to test a function's logic. Unit tests rely on mocking external resources.

While unit tests are good for ensuring consistent results, they are most useful when they do not require more than a few mocks. Effort should be made to mock as many external resources as possible. This effort is encouraged, but not required. Sometimes the isolation provided by completely mocking the external dependencies is not worth the effort of mocking those dependencies.

In these cases, requiring an external library to be installed on the system before running the test file is a useful way to strike this balance. For example, the unit tests for the MySQL execution module require the presence of the MySQL python bindings on the system running the test file before proceeding to run the tests.

Overly detailed mocking can also result in decreased test readability and brittleness as the tests are more likely to fail when the code or its dependencies legitimately change. In these cases, it is better to add dependencies to the test runner dependency state.

24.23.2 Preparing to Write a Unit Test

This guide assumes that your Salt development environment is already configured and that you have a basic understanding of contributing to the Salt codebase. If you're unfamiliar with either of these topics, please refer to the *Installing Salt for Development* and the *Contributing* pages, respectively.

This documentation also assumes that you have an understanding of how to *run Salt's test suite*, including running the *unit test subsection*, running the unit tests *without testing daemons* to speed up development wait times, and running a unit test file, class, or individual test.

24.23.3 Best Practices

Unit tests should be written to the following specifications.

What to Test?

Since unit testing focuses on the singular implementation of individual functions, unit tests should be used specifically to test a function's logic. The following guidelines should be followed when writing unit tests for Salt's test suite:

- Each `raise` and `return` statement needs to be independently tested.
- Isolate testing functionality. Don't rely on the pass or failure of other, separate tests.
- Test functions should contain only one assertion.
- Many Salt execution modules are merely wrappers for distribution-specific functionality. If there isn't any logic present in a simple execution module, consider writing an *integration test* instead of heavily mocking a call to an external dependency.

Mocking Test Data

A reasonable effort needs to be made to mock external resources used in the code being tested, such as APIs, function calls, external data either globally available or passed in through function arguments, file data, etc.

- Test functions should contain only one assertion and all necessary mock code and data for that assertion.
- External resources should be mocked in order to ``block all of the exits''. If a test function fails because something in an external library wasn't mocked properly (or at all), this test is not addressing all of the ``exits'' a function may experience. We want the Salt code and logic to be tested, specifically.
- Consider the fragility and longevity of a test. If the test is so tightly coupled to the code being tested, this makes a test unnecessarily fragile.
- Make sure you are not mocking the function to be tested so vigorously that the test return merely tests the mocked output. The test should always be testing a function's logic.

Mocking Loader Modules

Salt loader modules use a series of globally available dunder variables, `__salt__`, `__opts__`, `__pillar__`, etc. To facilitate testing these modules a mixin class was created, `LoaderModuleMockMixin` which can be found in `tests/support/mixins.py`. The reason for the existence of this class is because historiclly and because it was easier, one would add these dunder variables directly on the imported module. This however, introduces unexpected behavior when running the full test suite since those attributes would not be removed once we were done testing the module and would therefore leak to other modules being tested with unpredictable results. This is the kind of work that should be deferred to mock, and that's exactly what this mixin class does.

As an example, if one needs to specify some options which should be available to the module being tested one should do:

```
import salt.modules.somemodule as somemodule

class SomeModuleTest(TestCase, LoaderModuleMockMixin):

    def setup_loader_modules(self):
        return {
            somemodule: {
                '__opts__': {'test': True}
            }
        }
```

Consider this more extensive example from `tests/unit/modules/test_libcloud_dns.py`:

```
# Import Python Libs
from __future__ import absolute_import

# Import Salt Testing Libs
from tests.support.mixins import LoaderModuleMockMixin
```

```
from tests.support.unit import TestCase, skipIf
from tests.support.mock import (
    patch,
    MagicMock,
    NO_MOCK,
    NO_MOCK_REASON
)
import salt.modules.libcloud_dns as libcloud_dns

class MockDNSDriver(object):
    def __init__(self):
        pass

def get_mock_driver():
    return MockDNSDriver()

@skipIf(NO_MOCK, NO_MOCK_REASON)
@patch('salt.modules.libcloud_dns._get_driver',
       MagicMock(return_value=MockDNSDriver()))
class LibcloudDnsModuleTestCase(TestCase, LoaderModuleMockMixin):

    def setup_loader_modules(self):
        module_globals = {
            '__salt__': {
                'config.option': MagicMock(return_value={
                    'test': {
                        'driver': 'test',
                        'key': '2orgk34kgk34g'
                    }
                })
            }
        }
        if libcloud_dns.HAS_LIBCLOUD is False:
            module_globals['sys.modules'] = {'libcloud': MagicMock()}

        return {libcloud_dns: module_globals}
```

What happens in the above example is we mock a call to *__salt__['config.option']* to return the configuration needed for the execution of the tests. Additionally, if the `libcloud` library is not available, since that's not actually part of what's being tested, we mocked that import by patching `sys.modules` when tests are running.

Naming Conventions

Test names and docstrings should indicate what functionality is being tested. Test functions are named `test_<fcn>_<test-name>` where `<fcn>` is the function being tested and `<test-name>` describes the `raise` or `return` being tested.

Unit tests for `salt/.../<module>.py` are contained in a file called `tests/unit/.../test_<module>.py`, e.g. the tests for `salt/modules/fib.py` are in `tests/unit/modules/test_fib.py`.

In order for unit tests to get picked up during a run of the unit test suite, each unit test file must be prefixed with `test_` and each individual test must be prepended with the `test_` naming syntax, as described above.

If a function does not start with `test_`, then the function acts as a ``normal'' function and is not considered a testing function. It will not be included in the test run or testing output. The same principle applies to unit test files that do not have the `test_*.py` naming syntax. This test file naming convention is how the test runner recognizes that a test file contains unit tests.

Imports

Most commonly, the following imports are necessary to create a unit test:

```
# Import Salt Testing libs
from tests.support.unit import skipIf, TestCase
```

If you need mock support to your tests, please also import:

```
from tests.support.mock import NO_MOCK, NO_MOCK_REASON, MagicMock, patch, call
```

24.23.4 Evaluating Truth

A longer discussion on the types of assertions one can make can be found by reading Python's documentation on unit testing.

24.23.5 Tests Using Mock Objects

In many cases, the purpose of a Salt module is to interact with some external system, whether it be to control a database, manipulate files on a filesystem or something else. In these varied cases, it's necessary to design a unit test which can test the function whilst replacing functions which might actually call out to external systems. One might think of this as ``blocking the exits'' for code under tests and redirecting the calls to external systems with our own code which produces known results during the duration of the test.

To achieve this behavior, Salt makes heavy use of the MagicMock package.

To understand how one might integrate Mock into writing a unit test for Salt, let's imagine a scenario in which we're testing an execution module that's designed to operate on a database. Furthermore, let's imagine two separate methods, here presented in pseduo-code in an imaginary execution module called `db.py'.

```
def create_user(username):
    qry = 'CREATE USER {0}'.format(username)
    execute_query(qry)

def execute_query(qry):
    # Connect to a database and actually do the query...
```

Here, let's imagine that we want to create a unit test for the *create_user* function. In doing so, we want to avoid any calls out to an external system and so while we are running our unit tests, we want to replace the actual interaction with a database with a function that can capture the parameters sent to it and return pre-defined values. Therefore, our task is clear -- to write a unit test which tests the functionality of *create_user* while also replacing `execute_query' with a mocked function.

To begin, we set up the skeleton of our class much like we did before, but with additional imports for MagicMock:

```
# Import Salt Testing libs
from tests.support.unit import TestCase

# Import Salt execution module to test
```

```
from salt.modules import db

# Import Mock libraries
from tests.support.mock import NO_MOCK, NO_MOCK_REASON, MagicMock, patch, call

# Create test case class and inherit from Salt's customized TestCase
# Skip this test case if we don't have access to mock!
@skipIf(NO_MOCK, NO_MOCK_REASON)
class DbTestCase(TestCase):
    def test_create_user(self):
        # First, we replace 'execute_query' with our own mock function
        with patch.object(db, 'execute_query', MagicMock()) as db_exq:

            # Now that the exits are blocked, we can run the function under test.
            db.create_user('testuser')

            # We could now query our mock object to see which calls were made
            # to it.
            ## print db_exq.mock_calls

            # Construct a call object that simulates the way we expected
            # execute_query to have been called.
            expected_call = call('CREATE USER testuser')

            # Compare the expected call with the list of actual calls.  The
            # test will succeed or fail depending on the output of this
            # assertion.
            db_exq.assert_has_calls(expected_call)
```

24.23.6 Modifying `__salt__` In Place

At times, it becomes necessary to make modifications to a module's view of functions in its own `__salt__` dictionary. Luckily, this process is quite easy.

Below is an example that uses MagicMock's `patch` functionality to insert a function into `__salt__` that's actually a MagicMock instance.

```
def show_patch(self):
    with patch.dict(my_module.__salt__,
                    {'function.to_replace': MagicMock()}):
        # From this scope, carry on with testing, with a modified __salt__!
```

24.23.7 A Simple Example

Let's assume that we're testing a very basic function in an imaginary Salt execution module. Given a module called `fib.py` that has a function called `calculate(num_of_results)`, which given a `num_of_results`, produces a list of sequential Fibonacci numbers of that length.

A unit test to test this function might be commonly placed in a file called `tests/unit/modules/test_fib.py`. The convention is to place unit tests for Salt execution modules in `test/unit/modules/` and to name the tests module prefixed with `test_*.py`.

Tests are grouped around test cases, which are logically grouped sets of tests against a piece of functionality in the tested software. Test cases are created as Python classes in the unit test module. To return to our example, here's how we might write the skeleton for testing `fib.py`:

```
# Import Salt Testing libs
from tests.support.unit import TestCase

# Import Salt execution module to test
import salt.modules.fib as fib

# Create test case class and inherit from Salt's customized TestCase
class FibTestCase(TestCase):
    '''
    This class contains a set of functions that test salt.modules.fib.
    '''
    def test_fib(self):
        '''
        To create a unit test, we should prefix the name with `test_' so
        that it's recognized by the test runner.
        '''
        fib_five = (0, 1, 1, 2, 3)
        self.assertEqual(fib.calculate(5), fib_five)
```

At this point, the test can now be run, either individually or as a part of a full run of the test runner. To ease development, a single test can be executed:

```
tests/runtests.py -v -n unit.modules.test_fib
```

This will report the status of the test: success, failure, or error. The `-v` flag increases output verbosity.

```
tests/runtests.py -n unit.modules.test_fib -v
```

To review the results of a particular run, take a note of the log location given in the output for each test:

```
Logging tests on /var/folders/nl/d809xbq577l3qrbj3ymtpbq80000gn/T/salt-runtests.log
```

24.23.8 A More Complete Example

Consider the following function from salt/modules/linux_sysctl.py.

```
def get(name):
    '''
    Return a single sysctl parameter for this minion

    CLI Example:

    .. code-block:: bash

        salt '*' sysctl.get net.ipv4.ip_forward
    '''
    cmd = 'sysctl -n {0}'.format(name)
    out = __salt__['cmd.run'](cmd)
    return out
```

This function is very simple, comprising only four source lines of code and having only one return statement, so we know only one test is needed. There are also two inputs to the function, the `name` function argument and the call to `__salt__['cmd.run']()`, both of which need to be appropriately mocked.

Mocking a function parameter is straightforward, whereas mocking a function call will require, in this case, the use of MagicMock. For added isolation, we will also redefine the `__salt__` dictionary such that it only contains

'cmd.run'.

```
# Import Salt Libs
import salt.modules.linux_sysictl as linux_sysctl

# Import Salt Testing Libs
from tests.support.mixins import LoaderModuleMockMixin
from tests.support.unit import skipIf, TestCase
from tests.support.mock import (
    MagicMock,
    patch,
    NO_MOCK,
    NO_MOCK_REASON
)

@skipIf(NO_MOCK, NO_MOCK_REASON)
class LinuxSysctlTestCase(TestCase, LoaderModuleMockMixin):
    '''
    TestCase for salt.modules.linux_sysctl module
    '''

    def test_get(self):
        '''
        Tests the return of get function
        '''
        mock_cmd = MagicMock(return_value=1)
        with patch.dict(linux_sysctl.__salt__, {'cmd.run': mock_cmd}):
            self.assertEqual(linux_sysctl.get('net.ipv4.ip_forward'), 1)
```

Since `get()` has only one raise or return statement and that statement is a success condition, the test function is simply named `test_get()`. As described, the single function call parameter, `name` is mocked with `net.ipv4.ip_forward` and `__salt__['cmd.run']` is replaced by a MagicMock function object. We are only interested in the return value of `__salt__['cmd.run']`, which MagicMock allows us by specifying via `return_value=1`. Finally, the test itself tests for equality between the return value of `get()` and the expected return of `1`. This assertion is expected to succeed because `get()` will determine its return value from `__salt__['cmd.run']`, which we have mocked to return `1`.

24.23.9 A Complex Example

Now consider the `assign()` function from the same salt/modules/linux_sysctl.py source file.

```
def assign(name, value):
    '''
    Assign a single sysctl parameter for this minion

    CLI Example:

    .. code-block:: bash

        salt '*' sysctl.assign net.ipv4.ip_forward 1
    '''
    value = str(value)
    sysctl_file = '/proc/sys/{0}'.format(name.replace('.', '/'))
    if not os.path.exists(sysctl_file):
        raise CommandExecutionError('sysctl {0} does not exist'.format(name))
```

```
    ret = {}
    cmd = 'sysctl -w {0}="{1}"'.format(name, value)
    data = __salt__['cmd.run_all'](cmd)
    out = data['stdout']
    err = data['stderr']

    # Example:
    #    # sysctl -w net.ipv4.tcp_rmem="4096 87380 16777216"
    #    net.ipv4.tcp_rmem = 4096 87380 16777216
    regex = re.compile(r'^{0}\s+=\s+{1}$'.format(re.escape(name),
                                                 re.escape(value)))

    if not regex.match(out) or 'Invalid argument' in str(err):
        if data['retcode'] != 0 and err:
            error = err
        else:
            error = out
        raise CommandExecutionError('sysctl -w failed: {0}'.format(error))
    new_name, new_value = out.split(' = ', 1)
    ret[new_name] = new_value
    return ret
```

This function contains two raise statements and one return statement, so we know that we will need (at least) three tests. It has two function arguments and many references to non-builtin functions. In the tests below you will see that MagicMock's `patch()` method may be used as a context manager or as a decorator. When patching the salt dunders however, please use the context manager approach.

There are three test functions, one for each raise and return statement in the source function. Each function is self-contained and contains all and only the mocks and data needed to test the raise or return statement it is concerned with.

```
# Import Salt Libs
import salt.modules.linux_sysctl as linux_sysctl
from salt.exceptions import CommandExecutionError

# Import Salt Testing Libs
from tests.support.mixins import LoaderModuleMockMixin
from tests.support.unit import skipIf, TestCase
from tests.support.mock import (
    MagicMock,
    patch,
    NO_MOCK,
    NO_MOCK_REASON
)

@skipIf(NO_MOCK, NO_MOCK_REASON)
class LinuxSysctlTestCase(TestCase, LoaderModuleMockMixin):
    '''
    TestCase for salt.modules.linux_sysctl module
    '''

    @patch('os.path.exists', MagicMock(return_value=False))
    def test_assign_proc_sys_failed(self):
        '''
        Tests if /proc/sys/<kernel-subsystem> exists or not
        '''
        cmd = {'pid': 1337, 'retcode': 0, 'stderr': '',
```

```
                'stdout': 'net.ipv4.ip_forward = 1'}
        mock_cmd = MagicMock(return_value=cmd)
        with patch.dict(linux_sysctl.__salt__, {'cmd.run_all': mock_cmd}):
            self.assertRaises(CommandExecutionError,
                              linux_sysctl.assign,
                              'net.ipv4.ip_forward', 1)

    @patch('os.path.exists', MagicMock(return_value=True))
    def test_assign_cmd_failed(self):
        '''
        Tests if the assignment was successful or not
        '''
        cmd = {'pid': 1337, 'retcode': 0, 'stderr':
               'sysctl: setting key "net.ipv4.ip_forward": Invalid argument',
               'stdout': 'net.ipv4.ip_forward = backward'}
        mock_cmd = MagicMock(return_value=cmd)
        with patch.dict(linux_sysctl.__salt__, {'cmd.run_all': mock_cmd}):
            self.assertRaises(CommandExecutionError,
                              linux_sysctl.assign,
                              'net.ipv4.ip_forward', 'backward')

    @patch('os.path.exists', MagicMock(return_value=True))
    def test_assign_success(self):
        '''
        Tests the return of successful assign function
        '''
        cmd = {'pid': 1337, 'retcode': 0, 'stderr': '',
               'stdout': 'net.ipv4.ip_forward = 1'}
        ret = {'net.ipv4.ip_forward': '1'}
        mock_cmd = MagicMock(return_value=cmd)
        with patch.dict(linux_sysctl.__salt__, {'cmd.run_all': mock_cmd}):
            self.assertEqual(linux_sysctl.assign(
                'net.ipv4.ip_forward', 1), ret)
```

24.24 raet

RAET # Reliable Asynchronous Event Transport Protocol

See also:

RAET Overview

24.24.1 Protocol

Layering:

OSI Layers

7: Application: Format: Data (Stack to Application interface buffering etc) 6: Presentation: Format: Data (Encrypt-Decrypt convert to machine independent format) 5: Session: Format: Data (Interhost communications. Authentication. Groups) 4: Transport: Format: Segments (Reliable delivery of Message, Transactions, Segmentation, Error checking) 3: Network: Format: Packets/Datagrams (Addressing Routing) 2: Link: Format: Frames (Reliable per frame communications connection, Media access controller) 1: Physical: Bits (Transceiver communication connection not reliable)

Link is hidden from Raet Network is IP host address and Udp Port Transport is Raet transactions, service kind, tail error checking, Could include header signing as part of transport reliable delivery serialization of header Session is session id key exchange for signing. Grouping is Road (like 852 channel) Presentation is Encrypt Decrypt body Serialize Deserialize Body Application is body data dictionary

Header signing spans both the Transport and Session layers.

24.24.2 Header

JSON Header (Tradeoff some processing speed for extensibility, ease of use, readability)

Body initially JSON but support for ``packed'' binary body

24.24.3 Packet

Header ASCII Safe JSON Header termination: Empty line given by double pair of carriage return linefeed /r/n/r/n 10 13 10 13 ADAD 1010 1101 1010 1101

In json carriage return and newline characters cannot appear in a json encoded string unless they are escaped with backslash, so the 4 byte combination is illegal in valid json that does not have multi-byte unicode characters.

These means the header must be ascii safe so no multibyte utf-8 strings allowed in header.

Following Header Terminator is variable length signature block. This is binary and the length is provided in the header.

Following the signature block is the packet body or data. This may either be JSON or packed binary. The format is given in the json header

Finally is an optional tail block for error checking or encryption details

24.24.4 Header Fields

In UDP header

sh = source host sp = source port dh = destination host dp = destination port

In RAET Header

hk = header kind hl = header length

vn = version number

sd = Source Device ID dd = Destination Device ID cf = Corresponder Flag mf = Multicast Flag

si = Session ID ti = Transaction ID

sk = Service Kind pk = Packet Kind bf = Burst Flag (Send all Segments or Ordered packets without interleaved acks)

oi = Order Index dt = DateTime Stamp

sn = Segment Number sc = Segment Count

pf = Pending Segment Flag af = All Flag (Resent all Segments not just one)

nk = Auth header kind nl = Auth header length

bk = body kind bl = body length

tk = tail kind tl = tail length

fg = flags packed (Flags) Default `00' hex string 2 byte Hex string with bits (0, 0, af, pf, 0, bf, mf, cf) Zeros are TBD flags

24.24.5 Session Bootstrap

Minion sends packet with SID of Zero with public key of minions Public Private Key pair Master acks packet with SID of Zero to let minion know it received the request

Some time later Master sends packet with SID of zero that accepts the Minion

Minion

24.24.6 Session

Session is important for security. Want one session opened and then multiple transactions within session.

Session ID SID sid

GUID hash to guarantee uniqueness since no guarantee of nonvolatile storage or require file storage to keep last session ID used.

24.24.7 Service Types or Modular Services

Four Service Types

1. One or more maybe (unacknowledged repeat) maybe means no guarantee
2. **Exactly one at most (ack with retries) (duplicate detection idempotent)** at most means fixed number of retries has finite probability of failing B1) finite retries B2) infinite retries with exponential back-off up to a maximum delay
3. **Exactly one of sequence at most (sequence numbered)** Receiver requests retry of missing packet with same B1 or B2 retry type
4. **End to End (Application layer Request Response)** This is two B sub transactions

Initially unicast messaging Eventually support for Multicast

The use case for C) is to fragment large packets as once a UDP packet exceeds the frame size its reliability goes way down So its more reliable to fragment large packets.

Better approach might be to have more modularity. Services Levels

1. **Maybe one or more**
   (a) **Fire and forget** no transaction either side
   (b) **Repeat, no ack, no dupdet** repeat counter send side, no transaction on receive side
   (c) **Repeat, no Ack, dupdet** repeat counter send side, dup detection transaction receive side
2. **More or Less Once**
   (a) **retry finite, ack no dupdet** retry timer send side, finite number of retires ack receive side no dupdet
3. **At most Once**
   (a) **retry finite, ack, dupdet** retry timer send side, finite number of retires ack receive side dupdet
4. **Exactly once**

(a) **ack retry** retry timer send side, ack and duplicate detection receive side Infinite retries with exponential backoff

5. **Sequential sequence number**

   (a) reorder escrow

   (b) Segmented packets

6. request response to application layer

Service Features

1. repeats
2. ack retry transaction id
3. sequence number duplicate detection out of order detection sequencing
4. rep-req

Always include transaction id since multiple transactions on same port So get duplicate detection for free if keep transaction alive but if use

A) Maybe one or more B1) At Least One B2) Exactly One C) One of sequence D) End to End

A) Sender creates transaction id for number of repeats but receiver does not keep transaction alive

B1) Sender creates transaction id keeps it for retries. Receiver keeps it to send ack then kills so retry could be duplicate not detected

B2) Sender creates transaction id keeps for retries Receiver keeps tid for acks on any retires so no duplicates.

C) Sender creates TID and Sequence Number. Receiver checks for out of order sequence and can request retry.

D) Application layer sends response. So question is do we keep transaction open or have response be new transaction. No because then we need a rep-req ID so might as well use the same transaction id. Just keep alive until get response.

Little advantage to B1 vs B2 not having duplicates.

So 4 service types

1. Maybe one or more (unacknowledged repeat)
2. Exactly One (At most one) (ack with retry) (duplicate detection idempotent)
3. One of Sequence (sequence numbered)
4. End to End

Also multicast or unicast

Modular Transaction Table

Sender Side: Transaction ID plus transaction source sender or receiver generated transaction id Repeat Counter Retry Timer Retry Counter (finite retries) Redo Timer (infinite redos with exponential backoff) Sequence number without acks (look for resend requests) Sequence with ack (wait for ack before sending next in sequence) Segmentation

Receiver Side: Nothing just accept packet Acknowledge (can delete transaction after acknowledge) No duplicate detection Transaction timeout (keep transaction until timeout) Duplicate detection save transaction id duplicate detection timeout Request resend of missing packet in sequence Sequence reordering with escrow timeout wait escrow before requesting resend Unsegmentation (request resends of missing segment)

24.25 SaltStack Git Policy

The SaltStack team follows a git policy to maintain stability and consistency with the repository.

The git policy has been developed to encourage contributions and make contributing to Salt as easy as possible. Code contributors to SaltStack projects DO NOT NEED TO READ THIS DOCUMENT, because all contributions come into SaltStack via a single gateway to make it as easy as possible for contributors to give us code.

The primary rule of git management in SaltStack is to make life easy on contributors and developers to send in code. Simplicity is always a goal!

24.25.1 New Code Entry

All new SaltStack code should be submitted against either the `develop` branch or a point release branch, depending on the nature of the submission. Please see the *Which Salt Branch?* section of Salt's *Contributing* documentation or the Release Branching section below for more information.

24.25.2 Release Branching

SaltStack maintains two types of releases, `Feature Releases` and `Point Releases` (also commonly referred to as `Bugfix Releases`. A feature release is managed by incrementing the first or second release point number, so 2015.5.5 -> 2015.8.0 signifies a feature release and 2015.8.0 -> 2015.8.1 signifies a point release.

Feature Release Branching

Each feature release is maintained in a dedicated git branch derived from the last applicable release commit on develop. All file changes relevant to the feature release will be completed in the develop branch prior to the creation of the feature release branch. The feature release branch will be named after the relevant numbers to the feature release, which constitute the first two numbers. This means that the release branch for the 2015.8.0 series is named 2015.8.

A feature release branch is created with the following command:

```
# git checkout -b 2015.8 # From the develop branch
# git push origin 2015.8
```

Point Releases

Each point release is derived from its parent release branch. Constructing point releases is a critical aspect of Salt development and is managed by members of the core development team. Point releases comprise bug and security fixes. Bug fixes can be made against a point release branch in one of two ways: the bug fix can be submitted directly against the point release branch, or an attempt can be made to back-port the fix to the point release branch.

Bug fixes should be made against the earliest supported release branch on which the bug is present. The Salt development team regularly merges older point release branches forward into newer point release branches. That way, the bug fixes that are submitted to older release branches can cascade up through all related release branches.

For more information, please see the *Which Salt Branch?* section of Salt's *Contributing* documentation.

Determining when a point release is going to be made is up to the project leader (Thomas Hatch). Generally point releases are made every 2-4 weeks or if there is a security fix they can be made sooner.

The point release is only designated by tagging the commit on the release branch with a release number using the existing convention (version 2015.8.1 is tagged with v2015.8.1). From the tag point a new source tarball is generated and published to PyPI, and a release announcement is made.

24.26 Salt Conventions

24.26.1 Writing Salt Documentation

Salt's documentation is built using the Sphinx documentation system. It can be built in a large variety of output formats including HTML, PDF, ePub, and manpage.

All the documentation is contained in the main Salt repository. Speaking broadly, most of the narrative documentation is contained within the https://github.com/saltstack/salt/blob/develop/doc subdirectory and most of the reference and API documentation is written inline with Salt's Python code and extracted using a Sphinx extension.

Style

The Salt project recommends the IEEE style guide as a general reference for writing guidelines. Those guidelines are not strictly enforced but rather serve as an excellent resource for technical writing questions. The NCBI style guide is another very approachable resource.

Point-of-view

Use third-person perspective and avoid ``I'', ``we'', ``you'' forms of address. Identify the addressee specifically e.g., ``users should'', ``the compiler does'', etc.

Active voice

Use active voice and present-tense. Avoid filler words.

Title capitalization

Document titles and section titles within a page should follow normal sentence capitalization rules. Words that are capitalized as part of a regular sentence should be capitalized in a title and otherwise left as lowercase. Punctuation can be omitted unless it aids the intent of the title (e.g., exclamation points or question marks).

For example:

```
This is a main heading
======================

Paragraph.

This is an exciting sub-heading!
--------------------------------

Paragraph.
```

Serial Commas

According to Wikipedia: In English punctuation, a serial comma or series comma (also called Oxford comma and Harvard comma) is a comma placed immediately before the coordinating conjunction (usually ``and'', ``or'', or ``nor'') in a series of three or more terms. For example, a list of three countries might be punctuated either as ``France, Italy, and Spain'' (with the serial comma), or as ``France, Italy and Spain'' (without the serial comma).''

When writing a list that includes three or more items, the serial comma should always be used.

Documenting modules

Documentation for Salt's various module types is inline in the code. During the documentation build process it is extracted and formatted into the final HTML, PDF, etc format.

Inline documentation

Python has special multi-line strings called docstrings as the first element in a function or class. These strings allow documentation to live alongside the code and can contain special formatting. For example:

```
def my_function(value):
    '''
    Upper-case the given value

    Usage:

    .. code-block:: python

        val = 'a string'
        new_val = myfunction(val)
        print(new_val) # 'A STRING'

    :param value: a string
    :return: a copy of ``value`` that has been upper-cased
    '''
    return value.upper()
```

Specify a release for additions or changes

New functions or changes to existing functions should include a marker that denotes what Salt release will be affected. For example:

```
def my_function(value):
    '''
    Upper-case the given value

    .. versionadded:: 2014.7.0

    <...snip...>
    '''
    return value.upper()
```

For changes to a function:

```
def my_function(value, strip=False):
    '''
    Upper-case the given value

    .. versionchanged:: 2016.3.0
        Added a flag to also strip whitespace from the string.

    <...snip...>
    '''
    if strip:
        return value.upper().strip()
    return value.upper()
```

Adding module documentation to the index

Each module type has an index listing all modules of that type. For example: *execution modules*, *state modules*, *renderer modules*. New modules must be added to the index manually.

1. Edit the file for the module type: execution modules, state modules, renderer modules, etc.
2. Add the new module to the alphebetized list.
3. *Build the documentation* which will generate an `.rst` file for the new module in the same directory as the `index.rst`.
4. Commit the changes to `index.rst` and the new `.rst` file and send a pull request.

Cross-references

The Sphinx documentation system contains a wide variety of cross-referencing capabilities.

Glossary entries

Link to *glossary entries* using the term role. A cross-reference should be added the first time a Salt-specific term is used in a document.

```
A common way to encapsulate master-side functionality is by writing a
custom :term:`Runner Function`. Custom Runner Functions are easy to write.
```

Index entries

Sphinx automatically generates many kinds of index entries, but it is occasionally useful to manually add items to the index.

One method is to use the index directive above the document or section that should appear in the index.

```
.. index:: ! Event, event bus, event system
    see: Reactor; Event
```

Another method is to use the index role inline with the text that should appear in the index. The index entry is created and the target text is left otherwise intact.

```
Information about the :index:`Salt Reactor`
-------------------------------------------

Paragraph.
```

Documents and sections

Each document should contain a unique top-level label of the form:

```
.. _my-page:

My page
=======

Paragraph.
```

Unique labels can be linked using the ref role. This allows cross-references to survive document renames or movement.

```
For more information see :ref:`my-page`.
```

Note, the `:doc:` role should *not* be used to link documents together.

Modules

Cross-references to Salt modules can be added using Sphinx's Python domain roles. For example, to create a link to the *test.ping* function:

```
A useful execution module to test active communication with a minion is the
:py:func:`test.ping <salt.modules.test.ping>` function.
```

Salt modules can be referenced as well:

```
The :py:mod:`test module <salt.modules.test>` contains many useful
functions for inspecting an active Salt connection.
```

The same syntax works for all modules types:

```
One of the workhorse state module functions in Salt is the
:py:func:`file.managed <salt.states.file.managed>` function.
```

Settings

Individual settings in the Salt Master or Salt Minion configuration files are cross-referenced using two custom roles, `conf_master`, and `conf_minion`.

```
The :conf_minion:`minion ID <id>` setting is a unique identifier for a
single minion.
```

Documentation Changes and Fixes

Documentation changes and fixes should be made against the earliest supported release branch that the update applies to. The practice of updating a release branch instead of making all documentation changes against Salt's main, default branch, `develop`, is necessary in order for the docs to be as up-to-date as possible when the docs are built.

The workflow mentioned above is also in line with the recommendations outlined in Salt's *Contributing* page. You can read more about how to choose where to submit documentation fixes by reading the *Salt's Branch Topology* section.

For an explanation of how to submit changes against various branches, see the *Sending a GitHub pull request* section. Specifically, see the section describing how to `Create a new branch` and the steps that follow.

Building the documentation

1. Install Sphinx using a system package manager or pip. The package name is often of the form `python-sphinx`. There are no other dependencies.
2. Build the documentation using the provided Makefile or `.bat` file on Windows.

```
cd /path/to/salt/doc
make html
```

3. The generated documentation will be written to the `doc/_build/<format>` directory.
4. A useful method of viewing the HTML documentation locally is to start Python's built-in HTTP server:

```
cd /path/to/salt/doc/_build/html
python -m SimpleHTTPServer
```

Then pull up the documentation in a web browser at http://localhost:8000/.

24.26.2 Salt Formulas

Formulas are pre-written Salt States. They are as open-ended as Salt States themselves and can be used for tasks such as installing a package, configuring, and starting a service, setting up users or permissions, and many other common tasks.

All official Salt Formulas are found as separate Git repositories in the ``saltstack-formulas'' organization on GitHub:

https://github.com/saltstack-formulas

As a simple example, to install the popular Apache web server (using the normal defaults for the underlying distro) simply include the apache-formula from a top file:

```
base:
  'web*':
    - apache
```

Installation

Each Salt Formula is an individual Git repository designed as a drop-in addition to an existing Salt State tree. Formulas can be installed in the following ways.

Adding a Formula as a GitFS remote

One design goal of Salt's GitFS fileserver backend was to facilitate reusable States. GitFS is a quick and natural way to use Formulas.

1. *Install and configure GitFS*.
2. Add one or more Formula repository URLs as remotes in the `gitfs_remotes` list in the Salt Master configuration file:

```
gitfs_remotes:
  - https://github.com/saltstack-formulas/apache-formula
  - https://github.com/saltstack-formulas/memcached-formula
```

   We strongly recommend forking a formula repository into your own GitHub account to avoid unexpected changes to your infrastructure.

   Many Salt Formulas are highly active repositories so pull new changes with care. Plus any additions you make to your fork can be easily sent back upstream with a quick pull request!

3. Restart the Salt master.

Adding a Formula directory manually

Formulas are simply directories that can be copied onto the local file system by using Git to clone the repository or by downloading and expanding a tarball or zip file of the repository. The directory structure is designed to work with `file_roots` in the Salt master configuration.

1. Clone or download the repository into a directory:

```
mkdir -p /srv/formulas
cd /srv/formulas
git clone https://github.com/saltstack-formulas/apache-formula.git

# or

mkdir -p /srv/formulas
cd /srv/formulas
wget https://github.com/saltstack-formulas/apache-formula/archive/master.tar.gz
tar xf apache-formula-master.tar.gz
```

2. Add the new directory to `file_roots`:

```
file_roots:
  base:
    - /srv/salt
    - /srv/formulas/apache-formula
```

3. Restart the Salt Master.

Usage

Each Formula is intended to be immediately usable with sane defaults without any additional configuration. Many formulas are also configurable by including data in Pillar; see the `pillar.example` file in each Formula repository for available options.

Including a Formula in an existing State tree

Formula may be included in an existing `sls` file. This is often useful when a state you are writing needs to `require` or `extend` a state defined in the formula.

Here is an example of a state that uses the epel-formula in a `require` declaration which directs Salt to not install the `python26` package until after the EPEL repository has also been installed:

```
include:
  - epel

python26:
  pkg.installed:
    - require:
      - pkg: epel
```

Including a Formula from a Top File

Some Formula perform completely standalone installations that are not referenced from other state files. It is usually cleanest to include these Formula directly from a Top File.

For example the easiest way to set up an OpenStack deployment on a single machine is to include the openstack-standalone-formula directly from a `top.sls` file:

```
base:
  'myopenstackmaster':
    - openstack
```

Quickly deploying OpenStack across several dedicated machines could also be done directly from a Top File and may look something like this:

```
base:
  'controller':
    - openstack.horizon
    - openstack.keystone
  'hyper-*':
    - openstack.nova
    - openstack.glance
  'storage-*':
    - openstack.swift
```

Configuring Formula using Pillar

Salt Formulas are designed to work out of the box with no additional configuration. However, many Formula support additional configuration and customization through *Pillar*. Examples of available options can be found in a file named `pillar.example` in the root directory of each Formula repository.

Using Formula with your own states

Remember that Formula are regular Salt States and can be used with all Salt's normal state mechanisms. Formula can be required from other States with *require* declarations, they can be modified using `extend`, they can made to watch other states with *The _in versions of requisites*.

The following example uses the stock apache-formula alongside a custom state to create a vhost on a Debian/Ubuntu system and to reload the Apache service whenever the vhost is changed.

```
# Include the stock, upstream apache formula.
include:
  - apache

# Use the watch_in requisite to cause the apache service state to reload
# apache whenever the my-example-com-vhost state changes.
my-example-com-vhost:
  file:
    - managed
    - name: /etc/apache2/sites-available/my-example-com
    - watch_in:
      - service: apache
```

Don't be shy to read through the source for each Formula!

Reporting problems & making additions

Each Formula is a separate repository on GitHub. If you encounter a bug with a Formula please file an issue in the respective repository! Send fixes and additions as a pull request. Add tips and tricks to the repository wiki.

Writing Formulas

Each Formula is a separate repository in the saltstack-formulas organization on GitHub.

Note: Get involved creating new Formulas

The best way to create new Formula repositories for now is to create a repository in your own account on GitHub and notify a SaltStack employee when it is ready. We will add you to the contributors team on the saltstack-formulas organization and help you transfer the repository over. Ping a SaltStack employee on IRC (`#salt` on Freenode), join the `#formulas` channel on the salt-slack or send an email to the salt-users mailing list.

There are a lot of repositories in that organization! Team members can manage which repositories they are subscribed to on GitHub's watching page: https://github.com/watching.

Style

Maintainability, readability, and reusability are all marks of a good Salt sls file. This section contains several suggestions and examples.

```
# Deploy the stable master branch unless version overridden by passing
# Pillar at the CLI or via the Reactor.

deploy_myapp:
  git.latest:
    - name: git@github.com/myco/myapp.git
    - version: {{ salt.pillar.get('myapp:version', 'master') }}
```

Use a descriptive State ID

The ID of a state is used as a unique identifier that may be referenced via other states in *requisites*. It must be unique across the whole state tree (*it is a key in a dictionary*, after all).

In addition a state ID should be descriptive and serve as a high-level hint of what it will do, or manage, or change. For example, `deploy_webapp`, or `apache`, or `reload_firewall`.

Use `module.function` notation

So-called ``short-declaration'' notation is preferred for referencing state modules and state functions. It provides a consistent pattern of `module.function` shared between Salt States, the Reactor, Salt Mine, the Scheduler, as well as with the CLI.

```
# Do
apache:
  pkg.installed:
    - name: httpd

# Don't
apache:
  pkg:
    - installed
    - name: httpd
```

Salt's state compiler will transform ``short-decs'' into the longer format *when compiling the human-friendly highstate structure into the machine-friendly lowstate structure*.

Specify the `name` parameter

Use a unique and permanent identifier for the state ID and reserve `name` for data with variability.

The *name declaration* is a required parameter for all state functions. The state ID will implicitly be used as `name` if it is not explicitly set in the state.

In many state functions the `name` parameter is used for data that varies such as OS-specific package names, OS-specific file system paths, repository addresses, etc. Any time the ID of a state changes all references to that ID must also be changed. Use a permanent ID when writing a state the first time to future-proof that state and allow for easier refactors down the road.

Comment state files

YAML allows comments at varying indentation levels. It is a good practice to comment state files. Use vertical whitespace to visually separate different concepts or actions.

```
# Start with a high-level description of the current sls file.
# Explain the scope of what it will do or manage.

# Comment individual states as necessary.
update_a_config_file:
  # Provide details on why an unusual choice was made. For example:
  #
  # This template is fetched from a third-party and does not fit our
  # company norm of using Jinja. This must be processed using Mako.
```

```
  file.managed:
    - name: /path/to/file.cfg
    - source: salt://path/to/file.cfg.template
    - template: mako

  # Provide a description or explanation that did not fit within the state
  # ID. For example:
  #
  # Update the application's last-deployed timestamp.
  # This is a workaround until Bob configures Jenkins to automate RPM
  # builds of the app.
  cmd.run:
    # FIXME: Joe needs this to run on Windows by next quarter. Switch these
    # from shell commands to Salt's file.managed and file.replace state
    # modules.
    - name: |
        touch /path/to/file_last_updated
        sed -e 's/foo/bar/g' /path/to/file_environment
    - onchanges:
      - file: a_config_file
```

Be careful to use Jinja comments for commenting Jinja code and YAML comments for commenting YAML code.

```
# BAD EXAMPLE
# The Jinja in this YAML comment is still executed!
# {% set apache_is_installed = 'apache' in salt.pkg.list_pkgs() %}

# GOOD EXAMPLE
# The Jinja in this Jinja comment will not be executed.
{# {% set apache_is_installed = 'apache' in salt.pkg.list_pkgs() %} #}
```

Easy on the Jinja!

Jinja templating provides vast flexibility and power when building Salt sls files. It can also create an unmaintainable tangle of logic and data. Speaking broadly, Jinja is best used when kept apart from the states (as much as is possible).

Below are guidelines and examples of how Jinja can be used effectively.

Know the evaluation and execution order

High-level knowledge of how Salt states are compiled and run is useful when writing states.

The default `renderer` setting in Salt is Jinja piped to YAML. Each is a separate step. Each step is not aware of the previous or following step. Jinja is not YAML aware, YAML is not Jinja aware; they cannot share variables or interact.

- Whatever the Jinja step produces must be valid YAML.
- Whatever the YAML step produces must be a valid *highstate data structure*. (This is also true of the final step for *any of the alternate renderers* in Salt.)
- Highstate can be thought of as a human-friendly data structure; easy to write and easy to read.
- Salt's state compiler validates the *highstate* and compiles it to low state.
- Low state can be thought of as a machine-friendly data structure. It is a list of dictionaries that each map directly to a function call.

- Salt's state system finally starts and executes on each ``chunk'' in the low state. Remember that requisites are evaluated at runtime.
- The return for each function call is added to the ``running'' dictionary which is the final output at the end of the state run.

The full evaluation and execution order:

```
Jinja -> YAML -> Highstate -> low state -> execution
```

Avoid changing the underlying system with Jinja

Avoid calling commands from Jinja that change the underlying system. Commands run via Jinja do not respect Salt's dry-run mode (`test=True`)! This is usually in conflict with the idempotent nature of Salt states unless the command being run is also idempotent.

Inspect the local system

A common use for Jinja in Salt states is to gather information about the underlying system. The `grains` dictionary available in the Jinja context is a great example of common data points that Salt itself has already gathered. Less common values are often found by running commands. For example:

```
{% set is_selinux_enabled = salt.cmd.run('sestatus') == '1' %}
```

This is usually best done with a variable assignment in order to separate the data from the state that will make use of the data.

Gather external data

One of the most common uses for Jinja is to pull external data into the state file. External data can come from anywhere like API calls or database queries, but it most commonly comes from flat files on the file system or Pillar data from the Salt Master. For example:

```
{% set some_data = salt.pillar.get('some_data', {'sane default': True}) %}

{# or #}

{% import_yaml 'path/to/file.yaml' as some_data %}

{# or #}

{% import_json 'path/to/file.json' as some_data %}

{# or #}

{% import_text 'path/to/ssh_key.pub' as ssh_pub_key %}

{# or #}

{% from 'path/to/other_file.jinja' import some_data with context %}
```

This is usually best done with a variable assignment in order to separate the data from the state that will make use of the data.

Light conditionals and looping

Jinja is extremely powerful for programmatically generating Salt states. It is also easy to overuse. As a rule of thumb, if it is hard to read it will be hard to maintain!

Separate Jinja control-flow statements from the states as much as is possible to create readable states. Limit Jinja within states to simple variable lookups.

Below is a simple example of a readable loop:

```
{% for user in salt.pillar.get('list_of_users', []) %}

{# Ensure unique state IDs when looping. #}
{{ user.name }}-{{ loop.index }}:
  user.present:
    - name: {{ user.name }}
    - shell: {{ user.shell }}

{% endfor %}
```

Avoid putting a Jinja conditionals within Salt states where possible. Readability suffers and the correct YAML indentation is difficult to see in the surrounding visual noise. Parametrization (discussed below) and variables are both useful techniques to avoid this. For example:

```
{# ---- Bad example ---- #}

apache:
  pkg.installed:
    {% if grains.os_family == 'RedHat' %}
    - name: httpd
    {% elif grains.os_family == 'Debian' %}
    - name: apache2
    {% endif %}

{# ---- Better example ---- #}

{% if grains.os_family == 'RedHat' %}
{% set name = 'httpd' %}
{% elif grains.os_family == 'Debian' %}
{% set name = 'apache2' %}
{% endif %}

 apache:
  pkg.installed:
    - name: {{ name }}

{# ---- Good example ---- #}

{% set name = {
    'RedHat': 'httpd',
    'Debian': 'apache2',
}.get(grains.os_family) %}

 apache:
  pkg.installed:
    - name: {{ name }}
```

Dictionaries are useful to effectively ``namespace'' a collection of variables. This is useful with parametrization

(discussed below). Dictionaries are also easily combined and merged. And they can be directly serialized into YAML which is often easier than trying to create valid YAML through templating. For example:

```
{# ---- Bad example ---- #}

haproxy_conf:
  file.managed:
    - name: /etc/haproxy/haproxy.cfg
    - template: jinja
    {% if 'external_loadbalancer' in grains.roles %}
    - source: salt://haproxy/external_haproxy.cfg
    {% elif 'internal_loadbalancer' in grains.roles %}
    - source: salt://haproxy/internal_haproxy.cfg
    {% endif %}
    - context:
        {% if 'external_loadbalancer' in grains.roles %}
        ssl_termination: True
        {% elif 'internal_loadbalancer' in grains.roles %}
        ssl_termination: False
        {% endif %}

{# ---- Better example ---- #}

{% load_yaml as haproxy_defaults %}
common_settings:
  bind_port: 80

internal_loadbalancer:
  source: salt://haproxy/internal_haproxy.cfg
  settings:
    bind_port: 8080
    ssl_termination: False

external_loadbalancer:
  source: salt://haproxy/external_haproxy.cfg
  settings:
    ssl_termination: True
{% endload %}

{% if 'external_loadbalancer' in grains.roles %}
{% set haproxy = haproxy_defaults['external_loadbalancer'] %}
{% elif 'internal_loadbalancer' in grains.roles %}
{% set haproxy = haproxy_defaults['internal_loadbalancer'] %}
{% endif %}

{% do haproxy.settings.update(haproxy_defaults.common_settings) %}

haproxy_conf:
  file.managed:
    - name: /etc/haproxy/haproxy.cfg
    - template: jinja
    - source: {{ haproxy.source }}
    - context: {{ haproxy.settings | yaml() }}
```

There is still room for improvement in the above example. For example, extracting into an external file or replacing the if-elif conditional with a function call to filter the correct data more succinctly. However, the state itself is simple and legible, the data is separate and also simple and legible. And those suggested improvements can be made at some future date without altering the state at all!

Avoid heavy logic and programming

Jinja is not Python. It was made by Python programmers and shares many semantics and some syntax but it does not allow for abitrary Python function calls or Python imports. Jinja is a fast and efficient templating language but the syntax can be verbose and visually noisy.

Once Jinja use within an sls file becomes slightly complicated -- long chains of if-elif-elif-else statements, nested conditionals, complicated dictionary merges, wanting to use sets -- instead consider using a different Salt renderer, such as the Python renderer. As a rule of thumb, if it is hard to read it will be hard to maintain -- switch to a format that is easier to read.

Using alternate renderers is very simple to do using Salt's ``she-bang'' syntax at the top of the file. The Python renderer must simply return the correct *highstate data structure*. The following example is a state tree of two sls files, one simple and one complicated.

`/srv/salt/top.sls`:

```
base:
  '*':
    - common_configuration
    - roles_configuration
```

`/srv/salt/common_configuration.sls`:

```
common_users:
  user.present:
    - names:
      - larry
      - curly
      - moe
```

`/srv/salt/roles_configuration`:

```
#!py
def run():
    list_of_roles = set()

    # This example has the minion id in the form 'web-03-dev'.
    # Easily access the grains dictionary:
    try:
        app, instance_number, environment = __grains__['id'].split('-')
        instance_number = int(instance_number)
    except ValueError:
        app, instance_number, environment = ['Unknown', 0, 'dev']

    list_of_roles.add(app)

    if app == 'web' and environment == 'dev':
        list_of_roles.add('primary')
        list_of_roles.add('secondary')
    elif app == 'web' and environment == 'staging':
        if instance_number == 0:
            list_of_roles.add('primary')
        else:
            list_of_roles.add('secondary')

    # Easily cross-call Salt execution modules:
    if __salt__['myutils.query_valid_ec2_instance']():
```

```
        list_of_roles.add('is_ec2_instance')

    return {
        'set_roles_grains': {
            'grains.present': [
                {'name': 'roles'},
                {'value': list(list_of_roles)},
            ],
        },
    }
```

Jinja Macros

In Salt sls files Jinja macros are useful for one thing and one thing only: creating mini templates that can be reused and rendered on demand. Do not fall into the trap of thinking of macros as functions; Jinja is not Python (see above).

Macros are useful for creating reusable, parameterized states. For example:

```
{% macro user_state(state_id, user_name, shell='/bin/bash', groups=[]) %}
{{ state_id }}:
  user.present:
    - name: {{ user_name }}
    - shell: {{ shell }}
    - groups: {{ groups | json() }}
{% endmacro %}

{% for user_info in salt.pillar.get('my_users', []) %}
{{ user_state('user_number_' ~ loop.index, **user_info) }}
{% endfor %}
```

Macros are also useful for creating one-off ``serializers'' that can accept a data structure and write that out as a domain-specific configuration file. For example, the following macro could be used to write a php.ini config file:

`/srv/salt/php.sls`:

```
php_ini:
  file.managed:
    - name: /etc/php.ini
    - source: salt://php.ini.tmpl
    - template: jinja
    - context:
        php_ini_settings: {{ salt.pillar.get('php_ini', {}) | json() }}
```

`/srv/pillar/php.sls`:

```
php_ini:
  PHP:
    engine: 'On'
    short_open_tag: 'Off'
    error_reporting: 'E_ALL & ~E_DEPRECATED & ~E_STRICT'
```

`/srv/salt/php.ini.tmpl`:

```
{% macro php_ini_serializer(data) %}
{% for section_name, name_val_pairs in data.items() %}
[{{ section_name }}]
{% for name, val in name_val_pairs.items() -%}
```

```
{{ name }} = "{{ val }}"
{% endfor %}
{% endfor %}
{% endmacro %}

; File managed by Salt at <{{ source }}>.
; Your changes will be overwritten.

{{ php_ini_serializer(php_ini_settings) }}
```

Abstracting static defaults into a lookup table

Separate data that a state uses from the state itself to increases the flexibility and reusability of a state.

An obvious and common example of this is platform-specific package names and file system paths. Another example is sane defaults for an application, or common settings within a company or organization. Organizing such data as a dictionary (aka hash map, lookup table, associative array) often provides a lightweight namespacing and allows for quick and easy lookups. In addition, using a dictionary allows for easily merging and overriding static values within a lookup table with dynamic values fetched from Pillar.

A strong convention in Salt Formulas is to place platform-specific data, such as package names and file system paths, into a file named `map.jinja` that is placed alongside the state files.

The following is an example from the MySQL Formula. The *`grains.filter_by`* function performs a lookup on that table using the `os_family` grain (by default).

The result is that the `mysql` variable is assigned to a *subset* of the lookup table for the current platform. This allows states to reference, for example, the name of a package without worrying about the underlying OS. The syntax for referencing a value is a normal dictionary lookup in Jinja, such as `{{ mysql['service'] }}` or the shorthand `{{ mysql.service }}`.

`map.jinja`:

```
{% set mysql = salt['grains.filter_by']({
    'Debian': {
        'server': 'mysql-server',
        'client': 'mysql-client',
        'service': 'mysql',
        'config': '/etc/mysql/my.cnf',
        'python': 'python-mysqldb',
    },
    'RedHat': {
        'server': 'mysql-server',
        'client': 'mysql',
        'service': 'mysqld',
        'config': '/etc/my.cnf',
        'python': 'MySQL-python',
    },
    'Gentoo': {
        'server': 'dev-db/mysql',
        'client': 'dev-db/mysql',
        'service': 'mysql',
        'config': '/etc/mysql/my.cnf',
        'python': 'dev-python/mysql-python',
    },
}, merge=salt['pillar.get']('mysql:lookup')) %}
```

Values defined in the map file can be fetched for the current platform in any state file using the following syntax:

```
{% from "mysql/map.jinja" import mysql with context %}

mysql-server:
  pkg.installed:
    - name: {{ mysql.server }}
  service.running:
    - name: {{ mysql.service }}
```

Organizing Pillar data

It is considered a best practice to make formulas expect **all** formula-related parameters to be placed under second-level `lookup` key, within a main namespace designated for holding data for particular service/software/etc, managed by the formula:

```
mysql:
  lookup:
    version: 5.7.11
```

Collecting common values

Common values can be collected into a *base* dictionary. This minimizes repetition of identical values in each of the `lookup_dict` sub-dictionaries. Now only the values that are different from the base must be specified by the alternates:

`map.jinja`:

```
{% set mysql = salt['grains.filter_by']({
    'default': {
        'server': 'mysql-server',
        'client': 'mysql-client',
        'service': 'mysql',
        'config': '/etc/mysql/my.cnf',
        'python': 'python-mysqldb',
    },
    'Debian': {
    },
    'RedHat': {
        'client': 'mysql',
        'service': 'mysqld',
        'config': '/etc/my.cnf',
        'python': 'MySQL-python',
    },
    'Gentoo': {
        'server': 'dev-db/mysql',
        'client': 'dev-db/mysql',
        'python': 'dev-python/mysql-python',
    },
},
merge=salt['pillar.get']('mysql:lookup'), base='default') %}
```

Overriding values in the lookup table

Allow static values within lookup tables to be overridden. This is a simple pattern which once again increases flexibility and reusability for state files.

The `merge` argument in *`filter_by`* specifies the location of a dictionary in Pillar that can be used to override values returned from the lookup table. If the value exists in Pillar it will take precedence.

This is useful when software or configuration files is installed to non-standard locations or on unsupported platforms. For example, the following Pillar would replace the `config` value from the call above.

```
mysql:
  lookup:
    config: /usr/local/etc/mysql/my.cnf
```

Note: Protecting Expansion of Content with Special Characters

When templating keep in mind that YAML does have special characters for quoting, flows, and other special structure and content. When a Jinja substitution may have special characters that will be incorrectly parsed by YAML care must be taken. It is a good policy to use the `yaml_encode` or the `yaml_dquote` Jinja filters:

```
{%- set foo = 7.7 %}
{%- set bar = none %}
{%- set baz = true %}
{%- set zap = 'The word of the day is "salty".' %}
{%- set zip = '"The quick brown fox . . ."' %}

foo: {{ foo|yaml_encode }}
bar: {{ bar|yaml_encode }}
baz: {{ baz|yaml_encode }}
zap: {{ zap|yaml_encode }}
zip: {{ zip|yaml_dquote }}
```

The above will be rendered as below:

```
foo: 7.7
bar: null
baz: true
zap: "The word of the day is \"salty\"."
zip: "\"The quick brown fox . . .\""
```

The *`filter_by`* function performs a simple dictionary lookup but also allows for fetching data from Pillar and overriding data stored in the lookup table. That same workflow can be easily performed without using `filter_by`; other dictionaries besides data from Pillar can also be used.

```
{% set lookup_table = {...} %}
{% do lookup_table.update(salt.pillar.get('my:custom:data')) %}
```

When to use lookup tables

The `map.jinja` file is only a convention within Salt Formulas. This greater pattern is useful for a wide variety of data in a wide variety of workflows. This pattern is not limited to pulling data from a single file or data source. This pattern is useful in States, Pillar and the Reactor, for example.

Working with a data structure instead of, say, a config file allows the data to be cobbled together from multiple sources (local files, remote Pillar, database queries, etc), combined, overridden, and searched.

Below are a few examples of what lookup tables may be useful for and how they may be used and represented.

Platform-specific information

An obvious pattern and one used heavily in Salt Formulas is extracting platform-specific information such as package names and file system paths in a file named `map.jinja`. The pattern is explained in detail above.

Sane defaults

Application settings can be a good fit for this pattern. Store default settings along with the states themselves and keep overrides and sensitive settings in Pillar. Combine both into a single dictionary and then write the application config or settings file.

The example below stores most of the Apache Tomcat `server.xml` file alongside the Tomcat states and then allows values to be updated or augmented via Pillar. (This example uses the BadgerFish format for transforming JSON to XML.)

`/srv/salt/tomcat/defaults.yaml`:

```
Server:
  '@port': '8005'
  '@shutdown': SHUTDOWN
  GlobalNamingResources:
    Resource:
      '@auth': Container
      '@description': User database that can be updated and saved
      '@factory': org.apache.catalina.users.MemoryUserDatabaseFactory
      '@name': UserDatabase
      '@pathname': conf/tomcat-users.xml
      '@type': org.apache.catalina.UserDatabase
  # <...snip...>
```

`/srv/pillar/tomcat.sls`:

```
appX:
  server_xml_overrides:
    Server:
      Service:
        '@name': Catalina
        Connector:
          '@port': '8009'
          '@protocol': AJP/1.3
          '@redirectPort': '8443'
          # <...snip...>
```

`/srv/salt/tomcat/server_xml.sls`:

```
{% import_yaml 'tomcat/defaults.yaml' as server_xml_defaults %}
{% set server_xml_final_values = salt.pillar.get(
    'appX:server_xml_overrides',
    default=server_xml_defaults,
    merge=True)
%}
```

```
appX_server_xml:
  file.serialize:
    - name: /etc/tomcat/server.xml
    - dataset: {{ server_xml_final_values | json() }}
    - formatter: xml_badgerfish
```

The *file.serialize* state can provide a shorthand for creating some files from data structures. There are also many examples within Salt Formulas of creating one-off ``serializers'' (often as Jinja macros) that reformat a data structure to a specific config file format. For example, look at the`Nginx vhosts`_ states or the php.ini file template.

Environment specific information

A single state can be reused when it is parameterized as described in the section below, by separating the data the state will use from the state that performs the work. This can be the difference between deploying *Application X* and *Application Y*, or the difference between production and development. For example:

/srv/salt/app/deploy.sls:

```
{# Load the map file. #}
{% import_yaml 'app/defaults.yaml' as app_defaults %}

{# Extract the relevant subset for the app configured on the current
   machine (configured via a grain in this example). #}
{% app = app_defaults.get(salt.grains.get('role') %}

{# Allow values from Pillar to (optionally) update values from the lookup
   table. #}
{% do app_defaults.update(salt.pillar.get('myapp', {}) %}

deploy_application:
  git.latest:
    - name: {{ app.repo_url }}
    - version: {{ app.version }}
    - target: {{ app.deploy_dir }}

myco/myapp/deployed:
  event.send:
    - data:
        version: {{ app.version }}
    - onchanges:
      - git: deploy_application
```

/srv/salt/app/defaults.yaml:

```
appX:
  repo_url: git@github.com/myco/appX.git
  target: /var/www/appX
  version: master
appY:
  repo_url: git@github.com/myco/appY.git
  target: /var/www/appY
  version: v1.2.3.4
```

Single-purpose SLS files

Each sls file in a Formula should strive to do a single thing. This increases the reusability of this file by keeping unrelated tasks from getting coupled together.

As an example, the base Apache formula should only install the Apache httpd server and start the httpd service. This is the basic, expected behavior when installing Apache. It should not perform additional changes such as set the Apache configuration file or create vhosts.

If a formula is single-purpose as in the example above, other formulas, and also other states can `include` and use that formula with *Requisites and Other Global State Arguments* without also including undesirable or unintended side-effects.

The following is a best-practice example for a reusable Apache formula. (This skips platform-specific options for brevity. See the full apache-formula for more.)

```
# apache/init.sls
apache:
  pkg.installed:
    [...]
  service.running:
    [...]

# apache/mod_wsgi.sls
include:
  - apache

mod_wsgi:
  pkg.installed:
    [...]
    - require:
      - pkg: apache

# apache/conf.sls
include:
  - apache

apache_conf:
  file.managed:
    [...]
    - watch_in:
      - service: apache
```

To illustrate a bad example, say the above Apache formula installed Apache and also created a default vhost. The mod_wsgi state would not be able to include the Apache formula to create that dependency tree without also installing the unneeded default vhost.

Formulas should be reusable. Avoid coupling unrelated actions together.

Parameterization

Parameterization is a key feature of Salt Formulas and also for Salt States. Parameterization allows a single Formula to be reused across many operating systems; to be reused across production, development, or staging environments; and to be reused by many people all with varying goals.

Writing states, specifying ordering and dependencies is the part that takes the longest to write and to test. Filling those states out with data such as users or package names or file locations is the easy part. How many users, what

those users are named, or where the files live are all implementation details that **should be parameterized**. This separation between a state and the data that populates a state creates a reusable formula.

In the example below the data that populates the state can come from anywhere -- it can be hard-coded at the top of the state, it can come from an external file, it can come from Pillar, it can come from an execution function call, or it can come from a database query. The state itself doesn't change regardless of where the data comes from. Production data will vary from development data will vary from data from one company to another, however the state itself stays the same.

```
{% set user_list = [
    {'name': 'larry', 'shell': 'bash'},
    {'name': 'curly', 'shell': 'bash'},
    {'name': 'moe', 'shell': 'zsh'},
] %}

{# or #}

{% set user_list = salt['pillar.get']('user_list') %}

{# or #}

{% load_json "default_users.json" as user_list %}

{# or #}

{% set user_list = salt['acme_utils.get_user_list']() %}

{% for user in list_list %}
{{ user.name }}:
  user.present:
    - name: {{ user.name }}
    - shell: {{ user.shell }}
{% endfor %}
```

Configuration

Formulas should strive to use the defaults of the underlying platform, followed by defaults from the upstream project, followed by sane defaults for the formula itself.

As an example, a formula to install Apache **should not** change the default Apache configuration file installed by the OS package. However, the Apache formula **should** include a state to change or override the default configuration file.

Pillar overrides

Pillar lookups must use the safe *get()* and must provide a default value. Create local variables using the Jinja `set` construct to increase readability and to avoid potentially hundreds or thousands of function calls across a large state tree.

```
{% from "apache/map.jinja" import apache with context %}
{% set settings = salt['pillar.get']('apache', {}) %}

mod_status:
  file.managed:
    - name: {{ apache.conf_dir }}
```

```
    - source: {{ settings.get('mod_status_conf', 'salt://apache/mod_status.conf') }}
    - template: {{ settings.get('template_engine', 'jinja') }}
```

Any default values used in the Formula must also be documented in the `pillar.example` file in the root of the repository. Comments should be used liberally to explain the intent of each configuration value. In addition, users should be able copy-and-paste the contents of this file into their own Pillar to make any desired changes.

Scripting

Remember that both State files and Pillar files can easily call out to Salt *execution modules* and have access to all the system grains as well.

```
{% if '/storage' in salt['mount.active']() %}
/usr/local/etc/myfile.conf:
  file:
    - symlink
    - target: /storage/myfile.conf
{% endif %}
```

Jinja macros to encapsulate logic or conditionals are discouraged in favor of *writing custom execution modules* in Python.

Repository structure

A basic Formula repository should have the following layout:

```
foo-formula
|-- foo/
|   |-- map.jinja
|   |-- init.sls
|   `-- bar.sls
|-- CHANGELOG.rst
|-- LICENSE
|-- pillar.example
|-- README.rst
`-- VERSION
```

See also:

template-formula

The template-formula repository has a pre-built layout that serves as the basic structure for a new formula repository. Just copy the files from there and edit them.

`README.rst`

The README should detail each available `.sls` file by explaining what it does, whether it has any dependencies on other formulas, whether it has a target platform, and any other installation or usage instructions or tips.

A sample skeleton for the `README.rst` file:

```
===
foo
===
```

```
Install and configure the FOO service.

**NOTE**

See the full `Salt Formulas installation and usage instructions
<https://docs.saltstack.com/en/latest/topics/development/conventions/formulas.html>`_.

Available states
================

.. contents::
    :local:

``foo``
-------

Install the ``foo`` package and enable the service.

``foo.bar``
-----------

Install the ``bar`` package.
```

CHANGELOG.rst

The `CHANGELOG.rst` file should detail the individual versions, their release date and a set of bullet points for each version highlighting the overall changes in a given version of the formula.

A sample skeleton for the *CHANGELOG.rst* file:

`CHANGELOG.rst`:

```
foo formula
===========

0.0.2 (2013-01-01)

- Re-organized formula file layout
- Fixed filename used for upstart logger template
- Allow for pillar message to have default if none specified
```

Versioning

Formula are versioned according to Semantic Versioning, http://semver.org/.

Note: Given a version number MAJOR.MINOR.PATCH, increment the:

1. MAJOR version when you make incompatible API changes,
2. MINOR version when you add functionality in a backwards-compatible manner, and
3. PATCH version when you make backwards-compatible bug fixes.

Additional labels for pre-release and build metadata are available as extensions to the MAJOR.MINOR.PATCH format.

Formula versions are tracked using Git tags as well as the `VERSION` file in the formula repository. The `VERSION` file should contain the currently released version of the particular formula.

Testing Formulas

A smoke-test for invalid Jinja, invalid YAML, or an invalid Salt state structure can be performed by with the *`state.show_sls`* function:

```
salt '*' state.show_sls apache
```

Salt Formulas can then be tested by running each `.sls` file via `state.apply` and checking the output for the success or failure of each state in the Formula. This should be done for each supported platform.

24.26.3 SaltStack Packaging Guide

Since Salt provides a powerful toolkit for system management and automation, the package can be spit into a number of sub-tools. While packaging Salt as a single package containing all components is perfectly acceptable, the split packages should follow this convention.

Patching Salt For Distributions

The occasion may arise where Salt source and default configurations may need to be patched. It is preferable if Salt is only patched to include platform specific additions or to fix release time bugs. It is preferable that configuration settings and operations remain in the default state, as changes here lowers the user experience for users moving across distributions.

In the event where a packager finds a need to change the default configuration it is advised to add the files to the master.d or minion.d directories.

Source Files

Release packages should always be built from the source tarball distributed via pypi. Release packages should *NEVER* use a git checkout as the source for distribution.

Single Package

Shipping Salt as a single package, where the minion, master, and all tools are together is perfectly acceptable and practiced by distributions such as FreeBSD.

Split Package

Salt Should always be split in a standard way, with standard dependencies, this lowers cross distribution confusion about what components are going to be shipped with specific packages. These packages can be defined from the Salt Source as of Salt 2014.1.0:

Salt Common

The *salt-common* or *salt* package should contain the files provided by the salt python package, or all files distributed from the `salt/` directory in the source distribution packages. The documentation contained under the `doc/` directory can be a part of this package but splitting out a doc package is preferred. Since salt-call is the entry point to utilize the libs and is useful for all salt packages it is included in the salt-common package.

Name

- *salt* OR *salt-common*

Files

- *salt/**
- *man/salt.7*
- *scripts/salt-call*
- *tests/**
- *man/salt-call.1*

Depends

- *Python 2.6-2.7*
- *PyYAML*
- *Jinja2*

Salt Master

The *salt-master* package contains the applicable scripts, related man pages and init information for the given platform.

Name

- *salt-master*

Files

- *scripts/salt-master*
- *scripts/salt*
- *scripts/salt-run*
- *scripts/salt-key*
- *scripts/salt-cp*
- *pkg/<master init data>*

- *man/salt.1*
- *man/salt-master.1*
- *man/salt-run.1*
- *man/salt-key.1*
- *man/salt-cp.1*
- *conf/master*

Depends

- *Salt Common*
- *ZeroMQ* >= 3.2
- *PyZMQ* >= 2.10
- *PyCrypto*
- *M2Crypto*
- *Python MessagePack* (Messagepack C lib, or msgpack-pure)

Salt Syndic

The Salt Syndic package can be rolled completely into the Salt Master package. Platforms which start services as part of the package deployment need to maintain a separate *salt-syndic* package (primarily Debian based platforms).

The Syndic may optionally not depend on the anything more than the Salt Master since the master will bring in all needed dependencies, but fall back to the platform specific packaging guidelines.

Name

- *salt-syndic*

Files

- *scripts/salt-syndic*
- *pkg/<syndic init data>*
- *man/salt-syndic.1*

Depends

- *Salt Common*
- *Salt Master*
- *ZeroMQ* >= 3.2
- *PyZMQ* >= 2.10
- *PyCrypto*

- *M2Crypto*
- *Python MessagePack* (Messagepack C lib, or msgpack-pure)

Salt Minion

The Minion is a standalone package and should not be split beyond the *salt-minion* and *salt-common* packages.

Name

- *salt-minion*

Files

- *scripts/salt-minion*
- *pkg/<minion init data>*
- *man/salt-minion.1*
- *conf/minion*

Depends

- *Salt Common*
- *ZeroMQ* >= 3.2
- *PyZMQ* >= 2.10
- *PyCrypto*
- *M2Crypto*
- *Python MessagePack* (Messagepack C lib, or msgpack-pure)

Salt SSH

Since Salt SSH does not require the same dependencies as the minion and master, it should be split out.

Name

- *salt-ssh*

Files

- *scripts/salt-ssh*
- *man/salt-ssh.1*
- *conf/cloud**

Depends

- *Salt Common*
- *Python MessagePack* (Messagepack C lib, or msgpack-pure)

Salt Cloud

As of Salt 2014.1.0 Salt Cloud is included in the same repo as Salt. This can be split out into a separate package or it can be included in the salt-master package.

Name

- *salt-cloud*

Files

- *scripts/salt-cloud*
- *man/salt-cloud.1*

Depends

- *Salt Common*
- *apache libcloud* >= 0.14.0

Salt Doc

The documentation package is very distribution optional. A completely split package will split out the documentation, but some platform conventions do not prefer this. If the documentation is not split out, it should be included with the *Salt Common* package.

Name

- *salt-doc*

Files

- *doc/**

Optional Depends

- *Salt Common*
- *Python Sphinx*
- *Make*

24.26.4 Salt Release Process

The goal for Salt projects is to cut a new feature release every four to six months. This document outlines the process for these releases, and the subsequent bug fix releases which follow.

Feature Release Process

When a new release is ready to be cut, the person responsible for cutting the release will follow the following steps (written using the 0.16 release as an example):

1. All open issues on the release milestone should be moved to the next release milestone. (e.g. from the `0.16` milestone to the `0.17` milestone)
2. Release notes should be created documenting the major new features and bugfixes in the release.
3. Create an annotated tag with only the major and minor version numbers, preceded by the letter `v`. (e.g. `v0.16`) This tag will reside on the `develop` branch.
4. Create a branch for the new release, using only the major and minor version numbers. (e.g. `0.16`)
5. On this new branch, create an annotated tag for the first revision release, which is generally a release candidate. It should be preceded by the letter `v`. (e.g. `v0.16.0rc1`)
6. The release should be packaged from this annotated tag and uploaded to PyPI as well as the GitHub releases page for this tag.
7. The packagers should be notified on the salt-packagers mailing list so they can create packages for all the major operating systems. (note that release candidates should go in the testing repositories)
8. After the packagers have been given a few days to compile the packages, the release is announced on the salt-users mailing list.
9. Log into RTD and add the new release there. (Have to do it manually)

Maintenance and Bugfix Releases

Once a feature release branch has been cut from `develop`, the branch moves into a ``feature freeze'' state. The new release branch enters the `merge-forward` chain and only bugfixes should be applied against the new branch. Once major bugs have been fixed, a bugfix release can be cut:

1. On the release branch (i.e. `0.16`), create an annotated tag for the revision release. It should be preceded by the letter `v`. (e.g. `v0.16.2`) Release candidates are unnecessary for bugfix releases.
2. The release should be packaged from this annotated tag and uploaded to PyPI.
3. The packagers should be notified on the salt-packagers mailing list so they can create packages for all the major operating systems.
4. After the packagers have been given a few days to compile the packages, the release is announced on the salt-users mailing list.

For more information about the difference between the `develop` branch and bugfix release branches, please refer to the *Which Salt Branch?* section of Salt's *Contributing* documentation.

24.26.5 Salt Coding Style

Salt is developed with a certain coding style, while the style is dominantly PEP 8 it is not completely PEP 8. It is also noteworthy that a few development techniques are also employed which should be adhered to. In the end, the code is made to be ``Salty''.

Most importantly though, we will accept code that violates the coding style and KINDLY ask the contributor to fix it, or go ahead and fix the code on behalf of the contributor. Coding style is NEVER grounds to reject code contributions, and is never grounds to talk down to another member of the community (There are no grounds to treat others without respect, especially people working to improve Salt)‼

Linting

Most Salt style conventions are codified in Salt's `.pylintrc` file. Salt's pylint file has two dependencies: pylint and saltpylint. You can install these dependencies with `pip`:

```
pip install pylint
pip install saltpylint
```

The `.pylintrc` file is found in the root of the Salt project and can be passed as an argument to the pylint program as follows:

```
pylint --rcfile=/path/to/salt/.pylintrc salt/dir/to/lint
```

Variables

Variables should be a minimum of three characters and should provide an easy-to-understand name of the object being represented.

When keys and values are iterated over, descriptive names should be used to represent the temporary variables.

Multi-word variables should be separated by an underscore.

Variables which are two-letter words should have an underscore appended to them to pad them to three characters.

Strings

Salt follows a few rules when formatting strings:

Single Quotes

In Salt, all strings use single quotes unless there is a good reason not to. This means that docstrings use single quotes, standard strings use single quotes etc.:

```
def foo():
    '''
    A function that does things
    '''
    name = 'A name'
    return name
```

Formatting Strings

All strings which require formatting should use the *.format* string method:

```
data = 'some text'
more = '{0} and then some'.format(data)
```

Make sure to use indices or identifiers in the format brackets, since empty brackets are not supported by python 2.6.

Please do NOT use printf formatting.

Docstring Conventions

Docstrings should always add a newline, docutils takes care of the new line and it makes the code cleaner and more vertical:

GOOD:

```
def bar():
    '''
    Here lies a docstring with a newline after the quotes and is the salty
    way to handle it! Vertical code is the way to go!
    '''
    return
```

BAD:

```
def baz():
    '''This is not ok!'''
    return
```

When adding a new function or state, where possible try to use a `versionadded` directive to denote when the function or state was added.

```
def new_func(msg=''):
    '''
    .. versionadded:: 0.16.0

    Prints what was passed to the function.

    msg : None
        The string to be printed.
    '''
    print msg
```

If you are uncertain what version should be used, either consult a core developer in IRC or bring this up when opening your *pull request* and a core developer will add the proper version once your pull request has been merged. Bugfixes will be available in a bugfix release (i.e. 0.17.1, the first bugfix release for 0.17.0), while new features are held for feature releases, and this will affect what version number should be used in the `versionadded` directive.

Similar to the above, when an existing function or state is modified (for example, when an argument is added), then under the explanation of that new argument a `versionadded` directive should be used to note the version in which the new argument was added. If an argument's function changes significantly, the `versionchanged` directive can be used to clarify this:

```
def new_func(msg='', signature=''):
    '''
    .. versionadded:: 0.16.0

    Prints what was passed to the function.

    msg : None
        The string to be printed. Will be prepended with 'Greetings! '.
```

```
    .. versionchanged:: 0.17.1

    signature : None
        An optional signature.

    .. versionadded 0.17.0
    '''
    print 'Greetings! {0}\n\n{1}'.format(msg, signature)
```

Dictionaries

Dictionaries should be initialized using *{}* instead of *dict()*.

See here for an in-depth discussion of this topic.

Imports

Salt code prefers importing modules and not explicit functions. This is both a style and functional preference. The functional preference originates around the fact that the module import system used by pluggable modules will include callable objects (functions) that exist in the direct module namespace. This is not only messy, but may unintentionally expose code python libs to the Salt interface and pose a security problem.

To say this more directly with an example, this is *GOOD*:

```
import os

def minion_path():
    path = os.path.join(self.opts['cachedir'], 'minions')
    return path
```

This on the other hand is *DISCOURAGED*:

```
from os.path import join

def minion_path():
    path = join(self.opts['cachedir'], 'minions')
    return path
```

The time when this is changed is for importing exceptions, generally directly importing exceptions is preferred:

This is a good way to import exceptions:

```
from salt.exceptions import CommandExecutionError
```

Absolute Imports

Although absolute imports seems like an awesome idea, please do not use it. Extra care would be necessary all over salt's code in order for absolute imports to work as supposed. Believe it, it has been tried before and, as a tried example, by renaming `salt.modules.sysmod` to `salt.modules.sys`, all other salt modules which needed to import `sys` would have to also import `absolute_import`, which should be avoided.

Note: An exception to this rule is the `absolute_import` from `__future__` at the top of each file within the Salt project. This import is necessary for Py3 compatibility. This particular import looks like this:

```
from __future__ import absolute_import
```

This import is required for all new Salt files and is a good idea to add to any custom states or modules. However, the practice of avoiding absolute imports still applies to all other cases as to avoid a name conflict.

Vertical is Better

When writing Salt code, vertical code is generally preferred. This is not a hard rule but more of a guideline. As PEP 8 specifies, Salt code should not exceed 79 characters on a line, but it is preferred to separate code out into more newlines in some cases for better readability:

```
import os

os.chmod(
        os.path.join(self.opts['sock_dir'],
            'minion_event_pub.ipc'),
        448
        )
```

Where there are more line breaks, this is also apparent when constructing a function with many arguments, something very common in state functions for instance:

```
def managed(name,
        source=None,
        source_hash='',
        user=None,
        group=None,
        mode=None,
        template=None,
        makedirs=False,
        context=None,
        replace=True,
        defaults=None,
        saltenv=None,
        backup='',
        **kwargs):
```

Note: Making function and class definitions vertical is only required if the arguments are longer then 80 characters. Otherwise, the formatting is optional and both are acceptable.

Line Length

For function definitions and function calls, Salt adheres to the PEP-8 specification of at most 80 characters per line.

Non function definitions or function calls, please adopt a soft limit of 120 characters per line. If breaking the line reduces the code readability, don't break it. Still, try to avoid passing that 120 characters limit and remember, **vertical is better... unless it isn't**

Indenting

Some confusion exists in the python world about indenting things like function calls, the above examples use 8 spaces when indenting comma-delimited constructs.

The confusion arises because the pep8 program INCORRECTLY flags this as wrong, where PEP 8, the document, cites only using 4 spaces here as wrong, as it doesn't differentiate from a new indent level.

Right:

```
def managed(name,
        source=None,
        source_hash='',
        user=None)
```

WRONG:

```
def managed(name,
    source=None,
    source_hash='',
    user=None)
```

Lining up the indent is also correct:

```
def managed(name,
            source=None,
            source_hash='',
            user=None)
```

This also applies to function calls and other hanging indents.

pep8 and Flake8 (and, by extension, the vim plugin Syntastic) will complain about the double indent for hanging indents. This is a known conflict between pep8 (the script) and the actual PEP 8 standard. It is recommended that this particular warning be ignored with the following lines in `~/.config/flake8`:

```
[flake8]
ignore = E226,E241,E242,E126
```

Make sure your Flake8/pep8 are up to date. The first three errors are ignored by default and are present here to keep the behavior the same. This will also work for pep8 without the Flake8 wrapper -- just replace all instances of `flake8' with `pep8', including the filename.

Code Churn

Many pull requests have been submitted that only churn code in the name of PEP 8. Code churn is a leading source of bugs and is strongly discouraged. While style fixes are encouraged they should be isolated to a single file per commit, and the changes should be legitimate, if there are any questions about whether a style change is legitimate please reference this document and the official PEP 8 (http://legacy.python.org/dev/peps/pep-0008/) document before changing code. Many claims that a change is PEP 8 have been invalid, please double check before committing fixes.

24.27 Salt code and internals

Reference documentation on Salt's internal code.

24.27.1 Contents

salt.aggregation

salt.utils.aggregation

This library makes it possible to introspect dataset and aggregate nodes when it is instructed.

Note: The following examples with be expressed in YAML for convenience's sake:

- !aggr-scalar will refer to Scalar python function
- !aggr-map will refer to Map python object
- !aggr-seq will refer for Sequence python object

How to instructs merging

This yaml document has duplicate keys:

```
foo: !aggr-scalar first
foo: !aggr-scalar second
bar: !aggr-map {first: foo}
bar: !aggr-map {second: bar}
baz: !aggr-scalar 42
```

but tagged values instruct Salt that overlapping values they can be merged together:

```
foo: !aggr-seq [first, second]
bar: !aggr-map {first: foo, second: bar}
baz: !aggr-seq [42]
```

Default merge strategy is keep untouched

For example, this yaml document still has duplicate keys, but does not instruct aggregation:

```
foo: first
foo: second
bar: {first: foo}
bar: {second: bar}
baz: 42
```

So the late found values prevail:

```
foo: second
bar: {second: bar}
baz: 42
```

Limitations

Aggregation is permitted between tagged objects that share the same type. If not, the default merge strategy prevails.

For example, these examples:

```
foo: {first: value}
foo: !aggr-map {second: value}

bar: !aggr-map {first: value}
bar: 42

baz: !aggr-seq [42]
baz: [fail]

qux: 42
qux: !aggr-scalar fail
```

are interpreted like this:

```
foo: !aggr-map{second: value}

bar: 42

baz: [fail]

qux: !aggr-seq [fail]
```

Introspection

TODO: write this part

salt.utils.aggregation.**aggregate**(*obj_a*, *obj_b*, *level=False*, *map_class=<class 'salt.utils.aggregation.Map'>*, *sequence_class=<class 'salt.utils.aggregation.Sequence'>*)

Merge obj_b into obj_a.

```
>>> aggregate('first', 'second', True) == ['first', 'second']
True
```

class salt.utils.aggregation.**Aggregate**

Aggregation base.

class salt.utils.aggregation.**Map**(**args*, ***kwds*)

Map aggregation.

salt.utils.aggregation.**Scalar**(*obj*)

Shortcut for Sequence creation

```
>>> Scalar('foo') == Sequence(['foo'])
True
```

class salt.utils.aggregation.**Sequence**

Sequence aggregation.

Exceptions

Salt-specific exceptions should be thrown as often as possible so the various interfaces to Salt (CLI, API, etc) can handle those errors appropriately and display error messages appropriately.

salt.exceptions	This module is a central location for all salt exceptions

salt.exceptions

This module is a central location for all salt exceptions

exception salt.exceptions.**AuthenticationError**(*message=''*)
If sha256 signature fails during decryption

exception salt.exceptions.**AuthorizationError**(*message=''*)
Thrown when runner or wheel execution fails due to permissions

exception salt.exceptions.**CommandExecutionError**(*message=''*, *info=None*)
Used when a module runs a command which returns an error and wants to show the user the output gracefully instead of dying

exception salt.exceptions.**CommandNotFoundError**(*message=''*)
Used in modules or grains when a required binary is not available

exception salt.exceptions.**EauthAuthenticationError**(*message=''*)
Thrown when eauth authentication fails

exception salt.exceptions.**FileLockError**(*msg*, *time_start=None*, **args*, ***kwargs*)
Used when an error occurs obtaining a file lock

exception salt.exceptions.**FileserverConfigError**(*message=''*)
Used when invalid fileserver settings are detected

exception salt.exceptions.**GitLockError**(*errno*, *strerror*, **args*, ***kwargs*)
Raised when an uncaught error occurs in the midst of obtaining an update/checkout lock in salt.utils.gitfs.

NOTE: While this uses the errno param similar to an OSError, this exception class is *not* as subclass of OSError. This is done intentionally, so that this exception class can be caught in a try/except without being caught as an OSError.

exception salt.exceptions.**GitRemoteError**(*message=''*)
Used by GitFS to denote a problem with the existence of the ``origin'' remote or part of its configuration

exception salt.exceptions.**LoaderError**(*message=''*)
Problems loading the right renderer

exception salt.exceptions.**MasterExit**
Rise when the master exits

exception salt.exceptions.**MinionError**(*message=''*)
Minion problems reading uris such as salt:// or http://

exception salt.exceptions.**NotImplemented**(*message=''*)
Used when a module runs a command which returns an error and wants to show the user the output gracefully instead of dying

exception salt.exceptions.**PkgParseError**(*message=''*)
Used when of the pkg modules cannot correctly parse the output from the CLI tool (pacman, yum, apt, aptitude, etc)

exception salt.exceptions.**PublishError**(*message=''*)
Problems encountered when trying to publish a command

exception salt.exceptions.**SaltCacheError**(*message=''*)
Thrown when a problem was encountered trying to read or write from the salt cache

exception salt.exceptions.**SaltClientError**(*message=''*)
Problem reading the master root key

exception salt.exceptions.**SaltClientTimeout**(*msg*, *jid=None*, **args*, ***kwargs*)
Thrown when a job sent through one of the Client interfaces times out

Takes the `jid` as a parameter

exception salt.exceptions.**SaltCloudConfigError**(*message=''*)
Raised when a configuration setting is not found and should exist.

exception salt.exceptions.**SaltCloudException**(*message=''*)
Generic Salt Cloud Exception

exception salt.exceptions.**SaltCloudExecutionFailure**(*message=''*)
Raised when too much failures have occurred while querying/waiting for data.

exception salt.exceptions.**SaltCloudExecutionTimeout**(*message=''*)
Raised when too much time has passed while querying/waiting for data.

exception salt.exceptions.**SaltCloudNotFound**(*message=''*)
Raised when some cloud provider function cannot find what's being searched.

exception salt.exceptions.**SaltCloudPasswordError**(*message=''*)
Raise when virtual terminal password input failed

exception salt.exceptions.**SaltCloudSystemExit**(*message*, *exit_code=1*)
This exception is raised when the execution should be stopped.

exception salt.exceptions.**SaltConfigurationError**(*message=''*)
Configuration error

exception salt.exceptions.**SaltDaemonNotRunning**(*message=''*)
Throw when a running master/minion/syndic is not running but is needed to perform the requested operation (e.g., eauth).

exception salt.exceptions.**SaltException**(*message=''*)
Base exception class; all Salt-specific exceptions should subclass this

pack()
Pack this exception into a serializable dictionary that is safe for transport via msgpack

exception salt.exceptions.**SaltInvocationError**(*message=''*)
Used when the wrong number of arguments are sent to modules or invalid arguments are specified on the command line

exception salt.exceptions.**SaltMasterError**(*message=''*)
Problem reading the master root key

exception salt.exceptions.**SaltNoMinionsFound**(*message=''*)
An attempt to retrieve a list of minions failed

exception salt.exceptions.**SaltRenderError**(*message*, *line_num=None*, *buf=''*, *marker='<======================'*, *trace=None*)
Used when a renderer needs to raise an explicit error. If a line number and buffer string are passed, get_context will be invoked to get the location of the error.

exception salt.exceptions.**SaltReqTimeoutError**(*message=''*)
Thrown when a salt master request call fails to return within the timeout

exception salt.exceptions.**SaltRunnerError**(*message=''*)
Problem in runner

exception salt.exceptions.**SaltSyndicMasterError**(*message=''*)
Problem while proxying a request in the syndication master

exception salt.exceptions.**SaltSystemExit**(*code=0*, *msg=None*)
This exception is raised when an unsolvable problem is found. There's nothing else to do, salt should just exit.

exception salt.exceptions.**SaltWheelError**(*message=''*)
Problem in wheel

exception salt.exceptions.**TimedProcTimeoutError**(*message=''*)
Thrown when a timed subprocess does not terminate within the timeout, or if the specified timeout is not an int or a float

exception salt.exceptions.**TimeoutError**(*message=''*)
Thrown when an opration cannot be completet within a given time limit.

exception salt.exceptions.**TokenAuthenticationError**(*message=''*)
Thrown when token authentication fails

exception salt.exceptions.**VMwareApiError**(*message=''*, *info=None*)
Used when representing a generic VMware API error

exception salt.exceptions.**VMwareConnectionError**(*message=''*, *info=None*)
Used when the client fails to connect to a either a VMware vCenter server or to a ESXi host

exception salt.exceptions.**VMwareObjectRetrievalError**(*message=''*, *info=None*)
Used when a VMware object cannot be retrieved

exception salt.exceptions.**VMwareRuntimeError**(*message=''*, *info=None*)
Used when a runtime error is encountered when communicating with the vCenter

exception salt.exceptions.**VMwareSaltError**(*message=''*, *info=None*)
Used when a VMware object cannot be retrieved

exception salt.exceptions.**VMwareSystemError**(*message=''*, *info=None*)
Used when representing a generic VMware system error

salt.exceptions.**get_error_message**(*error*)
Get human readable message from Python Exception

The Salt Fileserver and Client

Introduction

Salt has a modular fileserver, and multiple client classes which are used to interact with it. This page serves as a developer's reference, to help explain how the fileserver and clients both work.

Fileserver

The fileserver is not a daemon, so the fileserver and client are not a true server and client in the traditional sense. Instead, the fileserver is simply a class (`salt.fileserver.Fileserver`), located in salt/fileserver/__init__.py. This class has access to the configured fileserver backends via a loader instance, referenced as `self.servers`. When a request comes in from the fileclient, it will ultimately result in a `Fileserver` class function being run.

The functions in this class will run corresponding functions in the configured fileserver backends to perform the requested action. So, in summary:

1. A fileclient class makes a request...

2. which triggers the fileserver to run a function...
3. which runs a named function in each of the configured backends.

Not all of the functions will always execute on every configured backend. For instance, the `find_file` function in the fileserver will stop when it finds a match, so if it finds a match for the desired path in the first configured backend, it won't proceed and try to find the file in the next backend in the list.

Additionally, not all backends implement all functions in the `salt.fileserver.Fileserver` class. For instance, there is a function called `update`, which exists to update remote fileservers such as the `git`, `hg`, and `svn` backends. This action has no use however in the `roots` backend, so it is simply not implemented there, and thus the `roots` backend will be skipped if the `update` function is run on the fileserver.

Backends for the fileserver are located in salt/fileserver/ (the files not named `__init__.py`).

Fileclient

There are three fileclient classes:

salt.fileclient.RemoteClient

This client is used when *`file_client`* is set to `remote`. This is how minions request files from the master.

Functions in this client will craft a payload and send it to the master via the transport channel. This is the same way that the minion asks the minion to do other things, such as updating and requesting data from the mine. The payload will be a dictionary with a key called `cmd`, and other values as needed.

Payloads sent via the transport channel are processed my an MWorker instance on the master, and the MWorker's `_handle_aes()` function will execute the command. The command will be a function attribute of the `salt.master.AESFuncs` class. The AESFuncs class' `__setup_fileserver()` function instantiates a `salt.fileserver.Fileserver` instance and maps its member functions to AESFuncs attributes. This is what makes the fileserver functions available remotely. The result of the function is returned back through the transport channel to the minion.

Transporting files is done in chunks, the size of which is decided by the `file_buffer_size` config option. If you look at the `serve_file()` function in any of the fileserver backends, you can see how the `loc` value in the payload determines the offset so that an intermediate chunk of the file can be served. The RemoteClient's `get_file()` function will loop until the end of the file is reached, retrieving one chunk at a time.

salt.fileclient.FSClient

This client is used when *`file_client`* is set to `local`. This is how masterless minions request files.

This class inherits from the RemoteClient, but instead of using a transport channel (zmq, tcp, etc.), it uses a ``fake'' transport channel (`salt.fileserver.FSChan`), which implements its own `send()` function. Thus, when a function that the FSClient inherits from the RemoteClient runs `self.channel.send()`, it's actually calling `salt.fileserver.FSChan.send()`, which calls corresponding functions in the `salt.fileserver.Fileserver()` class. The result is that local file requests use the same code as remote file requests, they just bypass sending them through an actual transport channel and instead call them on the FSChan's Fileserver instance.

salt.fileclient.LocalClient

This client is now used exclusively by Pillar. This used to be used when *file_client* was set to `local`, but the `FSChan` class was written to allow minions with `file_client: local` to access the full set of backends. This class will probably be renamed at some point as it is often confused with `salt.client.LocalClient`.

The `cp` Module

Most of the user-facing interaction with the fileclient happens via the *cp* module. The functions in this module instantiate a fileclient instance (if one is not already saved to the `__context__` dunder) and run fileclient functions.

Updating the Fileserver

The master daemon spawns a process dedicated to routine maintenance tasks upon startup. This process runs an instance of `salt.master.Maintenance`, which loops forever, running a series of functions and then sleeping for a length of time determined by the *loop_interval* config option. One of the maintenance tasks is to update the fileserver, and it essentially runs `salt.fileserver.Fileserver.update()`, which as we know from above will run all configured backends' `update()` functions, if present. This is now remote fileservers like `git`, `hg`, and `svn` stay up-to-date.

For the local file_client (FSClient), since it does not interact with the master, upon spawning of its FSChan it will update the fileserver.

Salt opts dictionary

It is very common in the Salt codebase to see *opts* referred to in a number of contexts.

For example, it can be seen as *__opts__* in certain cases, or simply as *opts* as an argument to a function in others.

Simply put, this data structure is a dictionary of Salt's runtime configuration information that's passed around in order for functions to know how Salt is configured.

When writing Python code to use specific parts of Salt, it may become necessary to initialize a copy of *opts* from scratch in order to have it available for a given function.

To do so, use the utility functions available in *salt.config*.

As an example, here is how one might generate and print an options dictionary for a minion instance:

```
import salt.config
opts = salt.config.minion_config('/etc/salt/minion')
print(opts)
```

To generate and display *opts* for a master, the process is similar:

```
import salt.config
opts = salt.config.master_config('/etc/salt/master')
print(opts)
```

Unicode in Salt

Though Unicode handling in large projects can often be complex, Salt adheres to several basic rules to help developers handle Unicode correctly.

(For a basic introduction to this problem, see Ned Batchelder's *excellent intoroduction to the topic <http://nedbatchelder.com/text/unipain/unipain.html>*.

Salt's basic workflow for Unicode handling is as follows:

1. Salt should convert whatever data is passed on CLI/API to Unicode. Internally, everything that Salt does should be Unicode unless it is printing to the screen or writing to storage.
2. Modules and various Salt pluggable systems use incoming data assuming Unicode.

   2.1) **For Salt modules that query an API; the module should convert the data** received from the API into Unicode.

   2.2) **For Salt modules that shell out to get output; the module should** convert data received into Unicode. (This does not apply if using the *cmd* execution module, which should handle this for you.

   2.3) **For Salt modules which print directly to the console (not via an** outputter) or which write directly to disk, a string should be encoded when appropriate. To handle this conversion, the global variable `__salt_system_encoding__` is available, which declares the locale of the system that Salt is running on.
3. When a function in a Salt module returns a string, it should return a `unicode` type in Python 2.
4. When Salt delivers the data to an outputter or a returner, it is the job of the outputter or returner to encode the Unicode before displaying it on the console or writing it to storage.

24.28 Salt Community Projects

This page contains links to Salt-related projects created by community members. If you come across a useful project please add it to the list!

24.28.1 Hubblestack

Hubble is a modular, open-source security compliance framework built on top of SaltStack. The project provides on-demand profile-based auditing, real-time security event notifications, automated remediation, alerting and reporting.

http://hubblestack.io/

24.28.2 alkali

alkali is a collections of SaltStack states and pillar data that provide just the basics for provisioning Linux instances that may be built upon. alkali is a starter kit of sorts, to help new users to SaltStack get up-and-running quickly with the most commonly used, core packages.

https://github.com/zulily/alkali

24.28.3 buoyant

buoyant leverages docker to provide an alternative to VM-centric SaltStack development environments. buoyant containers may be spun up nearly instantly, once an initial docker image has been built.

https://github.com/zulily/buoyant

24.28.4 Salt Sandbox

Salt Sandbox is a multi-VM Vagrant-based Salt development environment used for creating and testing new Salt state modules outside of your production environment. It's also a great way to learn firsthand about Salt and its remote execution capabilities.

https://github.com/elasticdog/salt-sandbox

24.28.5 Salt Vagrant Demo

A Salt Demo using Vagrant.

https://github.com/UtahDave/salt-vagrant-demo

CHAPTER 25

Release Notes

See the version numbers page for more information about the version numbering scheme.

25.1 Latest Branch Release

Release Candidate

25.2 Previous Releases

25.2.1 Salt 2017.7.0 Release Notes - Codename Nitrogen

25.2.2 Python 3

The 2017.7 Salt Release adds initial Python 3 support.

The default Python version of Salt will remain Python 2, although Python 3 packages will be supplied for users who want to help test this new feature.

25.2.3 Python 2.6 Deprecation

Salt will no longer support Python 2.6. We will provide python2.7 packages on our repo for RedHat and CentOS 6 to ensure users can still run Salt on these platforms.

As this will impact the installation of additional dependencies for salt modules please use pip packages if there is not a package available in a repository. You will need to install the python27-pip package to get access to the correct pip27 executable: `yum install python27-pip`

25.2.4 Known Issues

The following salt-cloud drivers have known issues running with Python 3. These drivers will not work with Python 3, and Python 2.7 should be used instead:

- Joyent
- When running under Python 3, users who require Unicode support should ensure that a locale is set on their machines. Users using the *C* locale are advised to switch to a UTF-aware locale to ensure proper functionality with Salt with Python 3.

Remember to update the Salt Master first

Salt's policy has always been that when upgrading, the minion should never be on a newer version than the master. Specifically with this update, because of changes in the fileclient, the 2017.7 minion requires a 2017.7 master.

Backwards compatibility is still maintained, so older minions can still be used.

More information can be found in the *Salt FAQ*

States Added for Management of systemd Unit Masking

The *service.masked* and *service.umasked* states have been added to allow Salt to manage masking of systemd units.

Additionally, the following functions in the *systemd* execution module have changed to accommodate the fact that indefinite and runtime masks can co-exist for the same unit:

- *service.masked* - The return from this function has changed from previous releases. Before, `False` would be returned if the unit was not masked, and the output of `systemctl is-enabled <unit name>` would be returned if the unit was masked. However, since indefinite and runtime masks can exist for the same unit at the same time, this function has been altered to accept a `runtime` argument. If `True`, the minion will be checked for a runtime mask assigned to the named unit. If `False`, then the minion will be checked for an indefinite mask. If one is found, `True` will be returned. If not, then `False` will be returned.
- *service.masked* - This function used to just run `systemctl is-enabled <unit name>` and based on the return from this function the corresponding mask type would be removed. However, if both runtime and indefinite masks are set for the same unit, then `systemctl is-enabled <unit name>` would show just the indefinite mask. The indefinite mask would be removed, but the runtime mask would remain. The function has been modified to accept a `runtime` argument, and will attempt to remove a runtime mask if that argument is set to `True`. If set to `False`, it will attempt to remove an indefinite mask.

These new `runtime` arguments default to `False`.

Pillar Encryption

Beginning in 2016.3.0 the CLI pillar data passed to several functions could conditionally be passed through a renderer to be decrypted. This functionality has now been extended to pillar SLS files as well. See *here* for detailed documentation on this feature.

Grains Changes

- The `osmajorrelease` grain has been changed from a string to an integer. State files, especially those using a templating language like Jinja, may need to be adjusted to account for this change.
- Add ability to specify disk backing mode in the VMWare salt cloud profile.

State Module Changes

- The *service.running* and *service.dead* states now support a `no_block` argument which, when set to `True` on systemd minions, will start/stop the service using the `--no-block` flag in the `systemctl` command. On non-systemd minions, a warning will be issued.
- The `module.run` state has dropped its previous syntax with `m_` prefix for reserved keywords. Additionally, it allows running several functions in a batch.

Note: It is necessary to explicitly turn on the new behavior (see below)

```
# Before
run_something:
  module.run:
    - name: mymodule.something
    - m_name: 'some name'
    - kwargs: {
      first_arg: 'one',
      second_arg: 'two',
      do_stuff: 'True'
    }

# After
run_something:
  module.run:
    - mymodule.something:
      - name: some name
      - first_arg: one
      - second_arg: two
      - do_stuff: True
```

Since a lot of users are already using `module.run` states, this new behavior must currently be explicitly turned on, to allow users to take their time updating their SLS files. However, please keep in mind that the new syntax will take effect in the next feature release of Salt (Oxygen) and the old usage will no longer be supported at that time.

Another feature of the new `module.run` is that it allows calling many functions in a single batch, such as:

```
run_something:
  module.run:
    - mymodule.function_without_parameters:
    - mymodule.another_function:
      - myparam
      - my_other_param
```

In a rare case that you have a function that needs to be called several times but with the different parameters, an additional feature of ``tagging'' is to the rescue. In order to tag a function, use a colon delimiter. For example:

```
run_something:
  module.run:
    - mymodule.same_function:1:
    - mymodule.same_function:2:
      - myparam
      - my_other_param
    - mymodule.same_function:3:
      - foo: bar
```

The example above will run *mymodule.same_function* three times with the different parameters.

To enable the new behavior for `module.run`, add the following to the minion config file:

```
use_superseded:
  - module.run
```

- The default for the `fingerprint_hash_type` option used in the `present` function in the `ssh` state changed from `md5` to `sha256`.

Execution Module Changes

- Several functions in the *systemd* execution module have gained a `no_block` argument, which when set to `True` will use `--no-block` in the `systemctl` command.
- In the *solarisips* `pkg` module, the default value for the `refresh` argument to the `list_upgrades` function has been changed from `False` to `True`. This makes the function more consistent with all of the other `pkg` modules (The other `pkg.list_upgrades` functions all defaulted to `True`).
- The functions which handle masking in the *systemd* module have changed. These changes are described above alongside the information on the new states which have been added to manage masking of systemd units.
- The *pkg.list_repo_pkgs* function for yum/dnf-based distros has had its default output format changed. In prior releases, results would be organized by repository. Now, the default for each package will be a simple list of versions. To get the old behavior, pass `byrepo=True` to the function.
- A `pkg.list_repo_pkgs` function has been added for both *Debian/Ubuntu* and *Arch Linux*-based distros.
- The *system* module changed its return format from ``HH:MM AM/PM'' to ``HH:MM:SS AM/PM'' for *get_system_time*.
- The default for the `fingerprint_hash_type` option used in the *ssh* execution module changed from `md5` to `sha256`.

Proxy Module Changes

The *proxy_merge_grains_in_module* configuration variable introduced in 2016.3, has been changed, defaulting to `True`.

The connection with the remote device is kept alive by default, when the module implements the `alive` function and *proxy_keep_alive* is set to `True`. The polling interval is set using the *proxy_keep_alive_interval* option which defaults to 1 minute.

The developers are also able to use the *proxy_always_alive*, when designing a proxy module flexible enough to open the connection with the remote device only when required.

Wildcard Versions in `pkg.installed` States

- The *pkg.installed* state now supports wildcards in package versions, for the following platforms:
  - SUSE/openSUSE Leap/Thumbleweed
  - Debian/Ubuntu
  - RHEL/CentOS
  - Arch Linux

  This support also extends to any derivatives of these distros, which use the *aptpkg*, *yumpkg*, or *pacman* providers for the `pkg` virtual module.

  Using wildcards can be useful for packages where the release name is built into the version in some way, such as for RHEL/CentOS which typically has version numbers like `1.2.34-5.el7`. An example of the usage for this would be:

```
mypkg:
  pkg.installed:
    - version: '1.2.34*'
```

Master Configuration Additions

- *syndic_forward_all_events* - Option on multi-syndic or single when connected to multiple masters to be able to send events to all connected masters.
- *eauth_acl_module* - In case external auth is enabled master can get authenticate and get the authorization list from different auth modules.
- *keep_acl_in_token* - Option that allows master to build ACL once for each user being authenticated and keep it in the token.

Minion Configuration Additions

- *pillarenv_from_saltenv* - When set to `True` (default is `False`), the *pillarenv* option will take the same value as the effective saltenv when running states. This would allow a user to run `salt '*' state.apply mysls saltenv=dev`, and the SLS for both the state and pillar data would be sourced from the `dev` environment, essentially the equivalent of running `salt '*' state.apply mysls saltenv=dev pillarenv=dev`. Note that if *pillarenv* is set in the minion config file, or if `pillarenv` is provided on the CLI, it will override this option.

salt-api Changes

The `rest_cherrypy` netapi module has received a few minor improvements:

- A CORS bugfix.
- A new `/token` convenience endpoint to generate Salt eauth tokens.
- A proof-of-concept JavaScript single-page application intended to demonstrate how to use the Server-Sent Events stream in an application. It is available in a default install by visiting the `/app` URL in a browser.

Python API Changes

`expr_form` Deprecation

The *LocalClient*`s `expr_form` argument has been deprecated and renamed to `tgt_type`. This change was made due to numerous reports of confusion among community members, since the targeting method is published to minions as `tgt_type`, and appears as `tgt_type` in the job cache as well.

While `expr_form` will continue to be supported until the **Fluorine** release cycle (two major releases after this one), those who are using the *LocalClient* (either directly, or implictly via a *netapi module*) are encouraged to update their code to use `tgt_type`.

`full_return` Argument in `LocalClient` and `RunnerClient`

An `full_return` argument has been added to the `cmd` and `cmd_sync` methods in `LocalClient` and `RunnerClient` which causes the return data structure to include job meta data such as `retcode`.

This is useful at the Python API:

```
>>> import salt.client
>>> client = salt.client.LocalClient()
>>> client.cmd('*', 'cmd.run', ['return 1'], full_return=True)
{'jerry': {'jid': '20170520151213898053', 'ret': '', 'retcode': 1}}
```

As well as from salt-api:

```
% curl -b /tmp/cookies.txt -sS http://localhost:8000 \
    -H 'Content-type: application/json' \
    -d '[{
        "client": "local",
        "tgt": "*",
        "fun": "cmd.run",
        "arg": ["return 1"],
        "full_return": true
    }]'

{"return": [{"jerry": {"jid": "20170520151531477653", "retcode": 1, "ret": ""}}]}
```

Jinja

Filters

New filters in 2017.7.0:

- *to_bool*
- *exactly_n_true*
- *exactly_one_true*
- *quote*
- *regex_search*
- *regex_match*
- *uuid*
- *is_list*
- *is_iter*
- *min*
- *max*
- *avg*
- *union*
- *intersect*
- *difference*
- *symmetric_difference*
- *is_sorted*
- *compare_lists*
- *compare_dicts*

- *is_hex*
- *contains_whitespace*
- *substring_in_list*
- *check_whitelist_blacklist*
- *date_format*
- *str_to_num*
- *to_bytes*
- *json_decode_list*
- *json_decode_dict*
- *rand_str*
- *md5*
- *sha256*
- *sha512*
- *base64_encode*
- *base64_decode*
- *hmac*
- *http_query*
- *is_ip*
- *is_ipv4*
- *is_ipv6*
- *ipaddr*
- *ipv4*
- *ipv6*
- *network_hosts*
- *network_size*
- *gen_mac*
- *mac_str_to_bytes*
- *dns_check*
- *is_text_file*
- *is_binary_file*
- *is_empty_file*
- *file_hashsum*
- *list_files*
- *path_join*
- *which*

Logs

Another new feature - although not limited to Jinja only - is being able to log debug messages directly from the template:

```
{%- do salt.log.error('logging from jinja') -%}
```

See the *logs* paragraph.

Network Automation

NAPALM

Introduced in 2016.11, the modules for cross-vendor network automation have been improved, enhanced and widenened in scope:

- Manage network devices like servers: the NAPALM modules have been transformed so they can run in both proxy and regular minions. That means, if the operating system allows, the salt-minion package can be installed directly on the network gear. Examples of such devices (also covered by NAPALM) include: Arista, Cumulus, Cisco IOS-XR or Cisco Nexus.
- Not always alive: in certain less dynamic environments, maintaining the remote connection permanently open with the network device is not always beneficial. In those particular cases, the user can select to initialize the connection only when needed, by specifying the field `always_alive: false` in the *proxy configuration* or using the *proxy_always_alive* option.
- Proxy keepalive: due to external factors, the connection with the remote device can be dropped, e.g.: packet loss, idle time (no commands issued within a couple of minutes or seconds), or simply the device decides to kill the process. In 2017.7.0 we have introduced the functionality to re-establish the connection. One can disable this feature through the *proxy_keep_alive* option and adjust the polling frequency speciying a custom value for *proxy_keep_alive_interval*, in minutes.

New modules:

- *Netconfig state module* - Manage the configuration of network devices using arbitrary templates and the Salt-specific advanced templating methodologies.
- *Network ACL execution module* - Generate and load ACL (firewall) configuration on network devices.
- *Network ACL state* - Manage the firewall configuration. It only requires writing the pillar structure correctly!
- *NAPALM YANG execution module* - Parse, generate and load native device configuration in a standard way, using the OpenConfig/IETF models. This module contains also helpers for the states.
- *NAPALM YANG state module* - Manage the network device configuration according to the YANG models (OpenConfig or IETF).
- *NET finder* - Runner to find details easily and fast. It's smart enough to know what you are looking for. It will search in the details of the network interfaces, IP addresses, MAC address tables, ARP tables and LLDP neighbors.
- *BGP finder* - Runner to search BGP neighbors details.
- *NAPALM syslog* - Engine to import events from the napalm-logs library into the Salt event bus. The events are based on the syslog messages from the network devices and structured following the OpenConfig/IETF YANG models.

- *NAPALM Helpers* - Generic helpers for NAPALM-related operations. For example, the *Compliance report* function can be used inside the state modules to compare the expected and the existing configuration.

New functions:

- *Configuration getter* - Return the whole configuration of the network device.
- *Optics getter* - Fetches the power usage on the various transceivers installed on the network device (in dBm).

New grains: *Host*, *Host DNS*, *Username* and *Optional args*.

Custom Refspecs in GitFS / git_pillar / winrepo

It is now possible to specify the refspecs to use when fetching from remote repositories for GitFS, git_pillar, and winrepo. More information on how this feature works can be found *here* in the GitFS Walkthrough. The git_pillar and winrepo versions of this feature work the same as their GitFS counterpart.

git_pillar ``mountpoints'' Feature Added

See *here* for detailed documentation.

Big Improvements to Docker Support

The old `docker` state and execution modules have been moved to salt-contrib. The `dockerng` execution module has been renamed to `docker` and now serves as Salt's official Docker execution module.

The old `dockerng` state module has been split into 4 state modules:

- *docker_container* - States to manage Docker containers
- *docker_image* - States to manage Docker images
- *docker_volume* - States to manage Docker volumes
- *docker_network* - States to manage Docker networks

The reason for this change was to make states and requisites more clear. For example, imagine this SLS:

```
myuser/appimage:
  docker.image_present:
    - sls: docker.images.appimage

myapp:
  docker.running:
    - image: myuser/appimage
    - require:
      - docker: myuser/appimage
```

The new syntax would be:

```
myuser/appimage:
  docker_image.present:
    - sls: docker.images.appimage

myapp:
  docker_container.running:
    - image: myuser/appimage
```

```
    - require:
      - docker_image: myuser/appimage
```

This is similar to how Salt handles MySQL, MongoDB, Zabbix, and other cases where the same execution module is used to manage several different kinds of objects (users, databases, roles, etc.).

Note: With the Moby announcement coming at this year's DockerCon, Salt's *docker* execution module (as well as the state modules) work interchangeably when **docker** is replaced with **moby** (e.g. *moby_container.running*, *moby_image.present*, *moby.inspect_container*, etc.)

The old syntax will continue to work until the **Fluorine** release of Salt. The old `dockerng` naming will also continue to work until that release, so no immediate changes need to be made to your SLS files (unless you were still using the old docker states that have been moved to salt-contrib).

The *docker_container.running* state has undergone a significant change in how it determines whether or not a container needs to be replaced. Rather than comparing individual arguments to their corresponding values in the named container, a temporary container is created (but not started) using the passed arguments. The two containers are then compared to each other to determine whether or not there are changes, and if so, the old container is stopped and destroyed, and the temporary container is renamed and started.

Salt still needs to translate arguments into the format which docker-py expects, but if it does not properly do so, the *skip_translate* argument can be used to skip input translation on an argument-by-argument basis, and you can then format your SLS file to pass the data in the format that the docker-py expects. This allows you to work around any changes in Docker's API or issues with the input translation, and continue to manage your Docker containers using Salt. Read the documentation for *skip_translate* for more information.

Note: When running the *docker_container.running* state for the first time after upgrading to 2017.7.0, your container(s) may be replaced. The changes may show diffs for certain parameters which say that the old value was an empty string, and the new value is `None`. This is due to the fact that in prior releases Salt was passing empty strings for these values when creating the container if they were undefined in the SLS file, where now Salt simply does not pass any arguments not explicitly defined in the SLS file. Subsequent runs of the state should not replace the container if the configuration remains unchanged.

New SSH Cache Roster

The *SSH cache Roster* has been rewritten from scratch to increase its usefulness. The new roster supports all minion matchers, so it is now possible to target minions identically through *salt* and *salt-ssh*.

Using the new `roster_order` configuration syntax it's now possible to compose a roster out of any combination of grains, pillar and mine data and even Salt SDB URLs. The new release is also fully IPv4 and IPv6 enabled and even has support for CIDR ranges.

Salt-SSH Default Options

Defaults for rosters can now be set, so that they don't have to be set on every entry in a roster or specified from the commandline.

The new option is *roster_defaults* and is specified in the master config file:

```
roster_defaults:
  user: daniel
  sudo: True
```

```
  priv: /root/.ssh/id_rsa
  tty: True
```

Blacklist or Whitelist Extmod Sync

The modules that are synced to minions can now be limited.

The following configuration options have been added for the master:

- *extmod_whitelist*
- *extmod_blacklist*

and for the minion:

- *extmod_whitelist*
- *extmod_blacklist*

Additional Features

- The *mine.update* function has a new optional argument `mine_functions` that can be used to refresh mine functions at a more specific interval than scheduled using the `mine_interval` option. However, this argument can be used by explicit schedule. For example, if we need the mines for `net.lldp` to be refreshed every 12 hours:

```
schedule:
  lldp_mine_update:
    function: mine.update
    kwargs:
      mine_functions:
        net.lldp: []
    hours: 12
```

- The `salt` runner has a new function: *salt.execute*. It is mainly a shortcut to facilitate the execution of various functions from other runners, e.g.:

```
ret1 = __salt__['salt.execute']('*', 'mod.fun')
```

Deprecations

General Deprecations

- Removed support for aliasing `cmd.run` to `cmd.shell`.
- Removed support for Dulwich from *GitFS*.
- Beacon configurations should be lists instead of dictionaries.
- The `PidfileMixin` has been removed. Please use `DaemonMixIn` instead.
- The `use_pending` argument was removed from the `salt.utils.event.get_event` function.

- The `pending_tags` argument was removed from the `salt.utils.event.get_event` function.

Configuration Option Deprecations

- The `client_acl` configuration option has been removed. Please use `publisher_acl` instead.
- The `client_acl_blacklist` configuration option has been removed. Please use `publisher_acl_blacklist` instead.
- The `win_gitrepos` configuration option has been removed. Please use the `winrepo_remotes` option instead.
- The `win_repo` configuration option has been removed. Please use `winrepo_dir` instead.
- The `win_repo_mastercachefile` configuration option has been removed. Please use the `winrepo_cachefile` option instead.

Module Deprecations

The `git` execution module had the following changes:

- The `fmt` argument was removed from the `archive` function. Please use `format` instead.
- The `repository` argument was removed from the `clone` function. Please use `url` instead.
- The `is_global` argument was removed from the `config_set` function. Please use `global` instead.
- The `branch` argument was removed from the `merge` function. Please use `rev` instead.
- The `branch` argument was removed from the `push` function. Please use `rev` instead.

The `glusterfs` execution module had the following functions removed:

- `create`: Please use `create_volume` instead.
- `delete`: Please use `delete_volume` instead.
- `list_peers`: Please use `peer_status` instead.

The `htpasswd` execution module had the following function removed:

- `useradd_all`: Please use `useradd` instead.

The `img` execution module has been removed. All of its associated functions were marked for removal in the 2017.7.0 release. The functions removed in this module are mapped as follows:

- `mount_image`/`mnt_image`: Please use `mount.mount` instead.
- `umount_image`: Please use `mount.umount` instead.
- `bootstrap`: Please use `genesis.bootstrap` instead.

The `smartos_virt` execution module had the following functions removed:

- `create`: Please use `start` instead.
- `destroy` Please use `stop` instead.
- `list_vms`: Please use `list_domains` instead.

The `virt` execution module had the following functions removed:

- `create`: Please use `start` instead.
- `destroy` Please use `stop` instead.

- `list_vms`: Please use `list_domains` instead.

The `virtualenv_mod` execution module had the following changes:

- The `package_or_requirement` argument was removed from both the `get_resource_path` and the `get_resource_content` functions. Please use `package` instead.
- The `resource_name` argument was removed from both the `get_resource_path` and `get_resource_content` functions. Please use `resource` instead.

The `win_repo` execution module had the following changes:

- The `win_repo_source_dir` option was removed from the `win_repo` module. Please use `win-repo_source_dir` instead.

The `xapi` execution module had the following functions removed:

- `create`: Please use `start` instead.
- `destroy`: Please use `stop` instead.
- `list_vms`: Please use `list_domains` instead.

The `zypper` execution module had the following function removed:

- `info`: Please use `info_available` instead.

Pillar Deprecations

- Support for the `raw_data` argument for the file_tree ext_pillar has been removed. Please use `keep_newline` instead.
- SQLite3 database connection configuration previously had keys under pillar. This legacy compatibility has been removed.

Proxy Minion Deprecations

- The `proxy_merge_grains_in_module` default has been switched from `False` to `True`.

Salt-API Deprecations

- The `SaltAPI.run()` function has been removed. Please use the `SaltAPI.start()` function instead.

Salt-Cloud Deprecations

- Support for using the keyword `provider` in salt-cloud provider config files has been removed. Please use `driver` instead. The `provider` keyword should now only be used in cloud profile config files.

Salt-SSH Deprecations

- The `wipe_ssh` option for `salt-ssh` has been removed. Please use the `ssh_wipe` option instead.

State Deprecations

The `apache_conf` state had the following functions removed:

- `disable`: Please use `disabled` instead.
- `enable`: Please use `enabled` instead.

The `apache_module` state had the following functions removed:

- `disable`: Please use `disabled` instead.
- `enable`: Please use `enabled` instead.

The `apache_site` state had the following functions removed:

- `disable`: Please use `disabled` instead.
- `enable`: Please use `enabled` instead.

The `chocolatey` state had the following functions removed:

- `install`: Please use `installed` instead.
- `uninstall`: Please use `uninstalled` instead.

The `git` state had the following changes:

- The `config` function was removed. Please use `config_set` instead.
- The `is_global` option was removed from the `config_set` function. Please use `global` instead.
- The `always_fetch` option was removed from the `latest` function, as it no longer has any effect. Please see the *2015.8.0* release notes for more information.
- The `force` option was removed from the `latest` function. Please use `force_clone` instead.
- The `remote_name` option was removed from the `latest` function. Please use `remote` instead.

The `glusterfs` state had the following function removed:

- `created`: Please use `volume_present` instead.

The `openvswitch_port` state had the following change:

- The `type` option was removed from the `present` function. Please use `tunnel_type` instead.

Build Notes

Windows Installer Packages

Windows Installer packages have been patched with the following PR: 42347

25.2.5 Salt 2017.7.1 Release Notes

Version 2017.7.1 is a bugfix release for *2017.7.0*.

Statistics

- Total Merges: **16**
- Total Issue References: **12**
- Total PR References: **31**
- Contributors: **11** (Ch3LL, TiteiKo, garethgreenaway, gtmanfred, llua, rallytime, seedickcode, skizunov, terminalmage, twangboy, whiteinge)

Security Fix

CVE-2017-12791 Maliciously crafted minion IDs can cause unwanted directory traversals on the Salt-master

Correct a flaw in minion id validation which could allow certain minions to authenticate to a master despite not having the correct credentials. To exploit the vulnerability, an attacker must create a salt-minion with an ID containing characters that will cause a directory traversal. Credit for discovering the security flaw goes to: Vernhk@qq.com

Changelog for v2017.7.0..v2017.7.1

Generated at: 2018-05-26 20:28:44 UTC

- **ISSUE** saltstack/salt-jenkins#460: (Ch3LL) decorator tests failing on python3 (refs: #42548)
- **PR** #42595: (gtmanfred) make sure to pass arg as well @ *2017-07-28 16:21:58 UTC*
  - **PR** #42548: (gtmanfred) pass in empty kwarg for reactor (refs: #42595)
  - a50fe5433a Merge pull request #42595 from gtmanfred/2017.7.1
  - 8f73804b24 make sure to pass arg as well
- **PR** #42597: (rallytime) Back-port #42590 to 2017.7.1 @ *2017-07-28 00:20:01 UTC*
  - **PR** #42590: (TiteiKo) Fix missing tornado import (refs: #42597)
  - 3b583330de Merge pull request #42597 from rallytime/bp-42590
  - 8818b06f22 Fix missing tornado import
- **ISSUE** #42404: (gabekahen) [2017.7] file.managed with cmd_check ``No such file or directory'' (refs: #42411)
- **ISSUE** #33708: (pepinje) visudo check command leaves cache file in /tmp (refs: #38063, #42411)
- **PR** #42598: (rallytime) Back-port #42411 to 2017.7.1 @ *2017-07-28 00:19:13 UTC*
  - **PR** #42411: (seedickcode) Fix file.managed check_cmd file not found - Issue #42404 (refs: #42598)
  - **PR** #38063: (llua) tmp file clean up in file.manage - fix for #33708 (refs: #42411)
  - 76f1e53e10 Merge pull request #42598 from rallytime/bp-42411
  - 190cdb8693 Fix file.managed check_cmd file not found - Issue #42404
- **PR** #42564: (rallytime) Back-port #42555 to 2017.7.1 @ *2017-07-26 17:32:02 UTC*
  - **PR** #42555: (Ch3LL) add changelog to 2017.7.1 release notes (refs: #42564)
  - 5c7def9a43 Merge pull request #42564 from rallytime/bp-42555
  - 7bcaa5a4cc small markup fix for title
  - d066b599ca add changelog to 2017.7.1 release notes

- **ISSUE** saltstack/salt-jenkins#460: (Ch3LL) decorator tests failing on python3 (refs: #42548)
- **PR** #42548: (gtmanfred) pass in empty kwarg for reactor (refs: #42595) @ *2017-07-26 00:41:20 UTC*
  - 711b742c54 Merge pull request #42548 from gtmanfred/2017.7.1
  - 0257c1dc32 pass in empty kwarg for reactor
  - b948e980d2 update chunk, not kwarg in chunk
- **ISSUE** #42519: (xuhcc) Error when installing package from file under Arch Linux (refs: #42522)
- **PR** #42522: (gtmanfred) pacman wildcard is only for repository installs @ *2017-07-24 20:51:05 UTC*
  - 50c1635dcc Merge pull request #42522 from gtmanfred/2017.7.1
  - 7787fb9e1b pacman wildcard is only for repository installs
- **PR** #42508: (rallytime) Back-port #42474 to 2017.7.1 @ *2017-07-24 20:49:51 UTC*
  - **PR** #42474: (whiteinge) Cmd arg kwarg parsing test (refs: #42508)
  - **PR** #39646: (terminalmage) Handle deprecation of passing string args to load_args_and_kwargs (refs: #42474)
  - 05c07ac049 Merge pull request #42508 from rallytime/bp-42474
  - 76fb074433 Add a test.arg variant that cleans the pub kwargs by default
  - 624f63648e Lint fixes
  - d246a5fc61 Add back support for string kwargs
  - 854e098aa0 Add LocalClient.cmd test for arg/kwarg parsing
- **ISSUE** #42427: (grichmond-salt) Issue Passing Variables created from load_json as Inline Pillar Between States (refs: #42435)
- **PR** #42472: (rallytime) Back-port #42435 to 2017.7.1 @ *2017-07-24 15:11:13 UTC*
  - **PR** #42435: (terminalmage) Modify our custom YAML loader to treat unicode literals as unicode strings (refs: #42472)
  - 95fe2558e4 Merge pull request #42472 from rallytime/bp-42435
  - 5c47af5b98 Modify our custom YAML loader to treat unicode literals as unicode strings
- **ISSUE** #42374: (tyhunt99) [2017.7.0] salt-run mange.versions throws exception if minion is offline or unresponsive (refs: #42436)
- **PR** #42473: (rallytime) Back-port #42436 to 2017.7.1 @ *2017-07-24 15:10:29 UTC*
  - **PR** #42436: (garethgreenaway) Fixes to versions function in manage runner (refs: #42473)
  - 5b99d45f54 Merge pull request #42473 from rallytime/bp-42436
  - 82ed919803 Updating the versions function inside the manage runner to account for when a minion is offline and we are unable to determine it's version.
- **ISSUE** #42381: (zebooka) Git.detached broken in 2017.7.0 (refs: #42399)
- **ISSUE** #38878: (tomlaredo) [Naming consistency] git.latest ``rev'' option VS git.detached ``ref'' option (refs: #38898)
- **PR** #42471: (rallytime) Back-port #42399 to 2017.7.1 @ *2017-07-24 15:09:50 UTC*
  - **PR** #42399: (rallytime) Update old ``ref'' references to ``rev'' in git.detached state (refs: #42471)
  - **PR** #38898: (terminalmage) git.detached: rename ref to rev for consistency (refs: #42399)

  - 3d1a2d3f9f Merge pull request #42471 from rallytime/bp-42399
  - b9a4669e5a Update old ``ref'' references to ``rev'' in git.detached state
- **ISSUE** #42400: (Enquier) Conflict in execution of passing pillar data to orch/reactor event executions 2017.7.0 (refs: #42031)
- **PR** #42470: (rallytime) Back-port #42031 to 2017.7.1 @ *2017-07-24 15:09:30 UTC*
  - **PR** #42031: (skizunov) Fix: Reactor emits critical error (refs: #42470)
  - 09766bccbc Merge pull request #42470 from rallytime/bp-42031
  - 0a0c6287a4 Fix: Reactor emits critical error
- **ISSUE** #41949: (jrporcaro) Event returner doesn't work with Windows Master (refs: #42027)
- **PR** #42469: (rallytime) Back-port #42027 to 2017.7.1 @ *2017-07-21 22:41:02 UTC*
  - **PR** #42027: (gtmanfred) import salt.minion for EventReturn for Windows (refs: #42469)
  - d7b172a15b Merge pull request #42469 from rallytime/bp-42027
  - ed612b4ee7 import salt.minion for EventReturn for Windows
- **PR** #42466: (rallytime) Back-port #42452 to 2017.7.1 @ *2017-07-21 19:41:24 UTC*
  - **PR** #42452: (Ch3LL) update windows urls to new py2/py3 naming scheme (refs: #42466)
  - 8777b1a825 Merge pull request #42466 from rallytime/bp-42452
  - c10196f68c update windows urls to new py2/py3 naming scheme
- **PR** #42439: (rallytime) Back-port #42409 to 2017.7.1 @ *2017-07-21 17:38:10 UTC*
  - **PR** #42409: (twangboy) Add Scripts to build Py3 on Mac (refs: #42439)
  - fceaaf41d0 Merge pull request #42439 from rallytime/bp-42409
  - 8176964b41 Remove build and dist, sign pkgs
  - 2c14d92a07 Fix hard coded pip path
  - 82fdd7c2e1 Add support for Py3
  - 2478447246 Update Python and other reqs
- **ISSUE** #42403: (astronouth7303) [2017.7] Pillar empty when state is applied from orchestrate (refs: #42433)
- **PR** #42441: (rallytime) Back-port #42433 to 2017.7.1 @ *2017-07-21 17:37:01 UTC*
  - **PR** #42433: (terminalmage) Only force saltenv/pillarenv to be a string when not None (refs: #42441)
  - 660400560b Merge pull request #42441 from rallytime/bp-42433
  - 17f347123a Only force saltenv/pillarenv to be a string when not None

25.2.6 Salt 2017.7.2 Release Notes

Version 2017.7.2 is a bugfix release for *2017.7.0*.

Statistics

- Total Merges: **329**
- Total Issue References: **73**
- Total PR References: **236**
- Contributors: **47** (Ch3LL, CorvinM, DmitryKuzmenko, Giandom, Mapel88, Mareo, SuperPommeDeTerre, The-Loeki, abulford, amendlik, blarghmatey, brejoc, cachedout, carsonoid, cro, damon-atkins, darcoli, dmurphy18, frankiexyz, garethgreenaway, gtmanfred, hibbert, isbm, ixs, jettero, jmarinaro, justincbeard, kkoppel, llua, lomeroe, m03, mcalmer, mirceaulinic, morganwillcock, nhavens, pabloh007, rallytime, seedickcode, shengis, skizunov, terminalmage, the-glu, thusoy, twangboy, vitaliyf, vutny, whiteinge)

Security Fix

CVE-2017-14695 Directory traversal vulnerability in minion id validation in SaltStack. Allows remote minions with incorrect credentials to authenticate to a master via a crafted minion ID. Credit for discovering the security flaw goes to: Julian Brost (julian@0x4a42.net)

CVE-2017-14696 Remote Denial of Service with a specially crafted authentication request. Credit for discovering the security flaw goes to: Julian Brost (julian@0x4a42.net)

Changelog for v2017.7.1..v2017.7.2

Generated at: 2018-05-26 21:06:12 UTC

- **PR** #43868: (rallytime) Back-port #43847 to 2017.7.2 @ *2017-10-03 12:00:52 UTC*
  - **PR** #43847: (cachedout) Fix to module.run (refs: #43868)
  - dd0b3388cf Merge pull request #43868 from rallytime/bp-43847
  - e21d8e9583 Use six.iterkeys() instead of dict.keys()
  - c297ae5557 Improve failures for module.run states
  - 782e67c199 Lint
  - a6c2d78518 Fix typo found by @s0undt3ch
  - 0cac15e502 Fix to module.run [WIP]
- **PR** #43871: (rallytime) Add updated release notes to 2017.7.2 branch @ *2017-10-03 11:59:29 UTC*
  - 47af4ae38a Merge pull request #43871 from rallytime/update-release-notes
  - 2337904656 Add updated release notes to 2017.7.2 branch
- **PR** #43756: (gtmanfred) split build and install for pkg osx @ *2017-09-26 20:51:28 UTC*
  - 88414d5f73 Merge pull request #43756 from gtmanfred/2017.7.2
  - f7df41fa94 split build and install for pkg osx
- **ISSUE** #43077: (Manoj2087) Issue with deleting key via wheel (refs: #43330)
- **PR** #43585: (rallytime) Back-port #43330 to 2017.7.2 @ *2017-09-19 17:33:34 UTC*
  - **PR** #43330: (terminalmage) Fix reactor regression + unify reactor config schema (refs: #43585)
  - 89f629233f Merge pull request #43585 from rallytime/bp-43330
  - c4f693bae8 Merge branch `2017.7.2' into bp-43330

- **ISSUE** #43447: (UtahDave) When using Syndic with Multi Master the top level master doesn't reliably get returns from lower minion. (refs: #43526)
- **PR** #43586: (rallytime) Back-port #43526 to 2017.7.2 @ *2017-09-19 15:36:27 UTC*
  - **PR** #43526: (DmitryKuzmenko) Forward events to all masters syndic connected to (refs: #43586)
  - abb7fe4422 Merge pull request #43586 from rallytime/bp-43526
  - e076e9b634 Forward events to all masters syndic connected to.
  - 7abd07fa07 Simplify client logic
  - b5f10696c2 Improve the reactor documentation
  - 7a2f12b96a Include a better example for reactor in master conf file
  - 531cac610e Rewrite the reactor unit tests
  - 2a35ab7f39 Unify reactor configuration, fix caller reactors
  - 4afb179bad Un-deprecate passing kwargs outside of `kwarg' param
- **PR** #43551: (twangboy) Fix preinstall script on OSX for 2017.7.2 @ *2017-09-18 18:35:35 UTC*
  - 3d3b09302d Merge pull request #43551 from twangboy/osx_fix_preinstall_2017.7.2
  - c3d9fb63f0 Merge branch `2017.7.2' into osx_fix_preinstall_2017.7.2
- **PR** #43509: (rallytime) Back-port #43333 to 2017.7.2 @ *2017-09-15 21:21:40 UTC*
  - **PR** #43333: (damon-atkins) Docs are wrong cache_dir (bool) and cache_file (str) cannot be passed as params + 1 bug (refs: #43509)
  - 24691da888 Merge pull request #43509 from rallytime/bp-43333-2017.7.2
  - b3dbafb035 Update doco
  - 5cdcdbf428 Update win_pkg.py
  - c3e16661c3 Docs are wrong cache_dir (bool) and cache_file (str) cannot be passed on the cli (#2)
  - f33395f1ee Fix logic in */etc/paths.d/salt* detection
- **PR** #43440: (rallytime) Back-port #43421 to 2017.7.2 @ *2017-09-11 20:59:53 UTC*
  - **PR** #43421: (gtmanfred) Revert ``Reduce fileclient.get_file latency by merging _file_find and ... (refs: #43440)
  - 8964cacbf8 Merge pull request #43440 from rallytime/bp-43421
  - ea6e661755 Revert ``Reduce fileclient.get_file latency by merging _file_find and _file_hash''
- **PR** #43377: (rallytime) Back-port #43193 to 2017.7.2 @ *2017-09-11 15:32:23 UTC*
  - **PR** #43193: (jettero) Prevent spurious ``Template does not exist'' error (refs: #43377)
  - **PR** #39516: (jettero) Prevent spurious ``Template does not exist'' error (refs: #43193)

- **PR** #43091: (blarghmatey) Fixed issue with silently passing all tests in Testinfra module @ *2017-08-21 22:06:22 UTC*
  - 83e528f0b3 Merge pull request #43091 from mitodl/2017.7
  - b502560e61 Fixed issue with silently passing all tests in Testinfra module
- **PR** #41994: (twangboy) Fix *unit.modules.test_cmdmod* on Windows @ *2017-08-21 21:53:01 UTC*
  - 5482524270 Merge pull request #41994 from twangboy/win_unit_test_cmdmod
  - a5f7288ad9 Skip test that uses pwd, not available on Windows
- **ISSUE** #42873: (TheVakman) osquery Data Empty Upon Return / Reporting Not Installed (refs: #42933)
- **PR** #42933: (garethgreenaway) Fixes to osquery module @ *2017-08-21 20:48:31 UTC*
  - b33c4abc15 Merge pull request #42933 from garethgreenaway/42873_2017_7_osquery_fix
  - 8915e62bd9 Removing an import that is not needed.
  - 74bc377eb4 Updating the other function that uses cmd.run_all
  - e6a4619ec1 Better approach without using python_shell=True.
  - 5ac41f496d When running osquery commands through cmd.run we should pass python_shell=True to ensure everything is formatted right. #42873
- **PR** #43093: (gtmanfred) Fix ec2 list_nodes_full to work on 2017.7 @ *2017-08-21 20:21:21 UTC*
  - 53c2115769 Merge pull request #43093 from gtmanfred/ec2
  - c7cffb5a04 This block isn't necessary
  - b7283bcc6f _vm_provider_driver isn't needed anymore
- **ISSUE** #43085: (brejoc) Patch for Kubernetes module missing from 2017.7 and 2017.7.1 (refs: #43087)
- **PR** #43087: (rallytime) Back-port #42174 to 2017.7 @ *2017-08-21 18:40:18 UTC*
  - **PR** #42174: (mcalmer) kubernetes: provide client certificate authentication (refs: #43087)
  - 32f9ade4db Merge pull request #43087 from rallytime/bp-42174
  - cf6563645b add support for certificate authentication to kubernetes module
- **PR** #43029: (terminalmage) Normalize the salt caching API @ *2017-08-21 16:54:58 UTC*
  - 882fcd846f Merge pull request #43029 from terminalmage/fix-func-alias
  - f8f74a310c Update localfs cache tests to reflect changes to func naming
  - c4ae79b229 Rename other refs to cache.ls with cache.list
  - ee59d127e8 Normalize the salt caching API

- **ISSUE** #42843: (brejoc) Kubernetes module won't work with Kubernetes Python client > 1.0.2 (refs: #42845)
- **PR** #43039: (gtmanfred) catch ImportError for kubernetes.client import @ *2017-08-21 14:32:38 UTC*
  - **PR** #42845: (brejoc) API changes for Kubernetes version 2.0.0 (refs: #43039)
  - dbee735f6e Merge pull request #43039 from gtmanfred/kube
  - 7e269cb368 catch ImportError for kubernetes.client import
- **PR** #43058: (rallytime) Update release version number for jenkins.run function @ *2017-08-21 14:13:34 UTC*
  - c56a8499b3 Merge pull request #43058 from rallytime/fix-release-num
  - d7eef70df0 Update release version number for jenkins.run function
- **PR** #43051: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ *2017-08-18 17:05:57 UTC*
  - 7b0c94768a Merge pull request #43051 from rallytime/merge-2017.7
  - 153a463b86 Lint: Add missing blank line
  - 84829a6f8c Merge branch `2016.11' into `2017.7'
  - 43aa46f512 Merge pull request #43048 from rallytime/bp-43031
    - 35e45049e2 use a ruby gem that doesn't have dependencies
  - ad89ff3104 Merge pull request #43023 from terminalmage/fix-jenkins-xml-caching
    - 33fd8ff939 Update jenkins.py
    - fc306fc8c3 Add missing colon in *if* statement
    - 822eabcc81 Catch exceptions raised when making changes to jenkins
    - 91b583b493 Improve and correct execption raising
    - f096917a0e Raise an exception if we fail to cache the config xml
  - 2957467ed7 Merge pull request #43026 from rallytime/bp-43020
    - 0eb15a1f67 test with gem that appears to be abandoned
  - 4150b094fe Merge pull request #43033 from rallytime/bp-42760
    - 3e3f7f5d8e Catch TypeError thrown by m2crypto when parsing missing subjects in certificate files.
  - b124d3667e Merge pull request #43032 from rallytime/bp-42547
    - ea4d7f4176 Updated testinfra modules to work with more recent versions
  - a88386ad44 Merge pull request #43027 from pabloh007/fix-docker-save-push-2016-11
    - d0fd949f85 Fixes ignore push flag for docker.push module issue #42992
  - 51d16840bb Merge pull request #42890 from DSRCorporation/bugs/42627_salt-cp
    - cfddbf1c75 Apply code review: update the doc
    - afedd3b654 Typos and version fixes in the doc.
    - 9fedf6012e Fixed `test_valid_docs' test.
    - 999388680c Make chunked mode in salt-cp optional (disabled by default).
  - b3c253cdfa Merge pull request #43009 from rallytime/merge-2016.11
    - 566ba4fe76 Merge branch `2016.3' into `2016.11'

            - 13b8637d53 Merge pull request #42942 from Ch3LL/2016.3.6_follow_up
            - f281e1795f move additional minion config options to 2016.3.8 release notes
            - 168604ba6b remove merge conflict
            - 8a07d95212 update release notes with cve number
            - 149633fdca Add release notes for 2016.3.7 release
            - 7a4cddcd95 Add clean_id function to salt.utils.verify.py
            - bbb1b29ccb Merge pull request #42954 from Ch3LL/latest_2016.3
            - b551e66744 [2016.3] Bump latest and previous versions
            - 5d5edc54b7 Merge pull request #42949 from Ch3LL/2016.3.7_docs
            - d75d3741f8 Add Security Notice to 2016.3.7 Release Notes
        - 37c63e7cf2 Merge pull request #43021 from terminalmage/fix-network-test
            * 4089b7b1bc Use socket.AF_INET6 to get the correct value instead of doing an OS check
        - 8f6423247c Merge pull request #43019 from rallytime/bootstrap_2017.08.17
            * 2f762b3a17 Update bootstrap script to latest stable: v2017.08.17
        - ff1caeee68 Merge pull request #43014 from Ch3LL/fix_network_mac
            * b8eee4401e Change AF_INET6 family for mac in test_host_to_ips
- **PR** #43035: (rallytime) [2017.7] Merge forward from 2017.7.1 to 2017.7 @ *2017-08-18 12:58:17 UTC*
    - **PR** #42948: (Ch3LL) [2017.7.1] Add clean_id function to salt.utils.verify.py (refs: #43035)
    - **PR** #42945: (Ch3LL) [2017.7] Add clean_id function to salt.utils.verify.py (refs: #43035)
    - d15b0ca937 Merge pull request #43035 from rallytime/merge-2017.7
    - 756128a896 Merge branch `2017.7.1' into `2017.7'
        * ab1b099730 Merge pull request #42948 from Ch3LL/2017.7.0_follow_up
- **ISSUE** #42989: (blbradley) GitFS GitPython performance regression in 2017.7.1 (refs: #43002)
- **PR** #43034: (rallytime) Back-port #43002 to 2017.7 @ *2017-08-17 23:18:16 UTC*
    - **PR** #43002: (the-glu) Try to fix #42989 (refs: #43034)
    - bcbb973a71 Merge pull request #43034 from rallytime/bp-43002
    - 350c0767dc Try to fix #42989 by doing sslVerify and refspecs for origin remote only if there is no remotes
- **ISSUE** #42375: (dragonpaw) salt.modules.*.__virtualname__ doens't work as documented. (refs: #42523, #42958)
- **PR** #42958: (gtmanfred) runit module should also be loaded as runit @ *2017-08-17 22:30:23 UTC*
    - 9182f55bbb Merge pull request #42958 from gtmanfred/2017.7
    - fd6874668b runit module should also be loaded as runit
- **PR** #43031: (gtmanfred) use a ruby gem that doesn't have dependencies (refs: #43048) @ *2017-08-17 22:26:25 UTC*
    - 5985cc4e8e Merge pull request #43031 from gtmanfred/test_gem
    - ba80a7d4b5 use a ruby gem that doesn't have dependencies
- **PR** #43030: (rallytime) Small cleanup to dockermod.save @ *2017-08-17 22:26:00 UTC*

  - 246176b1a6 Merge pull request #43030 from rallytime/dockermod-minor-change
  - d6a5e85632 Small cleanup to dockermod.save
- **ISSUE** #42992: (pabloh007) docker.save flag push does is ignored (refs: #42993, #43027)
- **PR** #42993: (pabloh007) Fixes ignored push flag for docker.push module issue #42992 @ *2017-08-17 18:50:37 UTC*
  - 160001120b Merge pull request #42993 from pabloh007/fix-docker-save-push
  - fe7554cfeb Fixes ignored push flag for docker.push module issue #42992
- **ISSUE** #42941: (danlsgiga) pkg.installed fails on installing from HTTPS rpm source (refs: #42967)
- **PR** #42967: (terminalmage) Fix bug in on_header callback when no Content-Type is found in headers @ *2017-08-17 18:48:52 UTC*
  - 9009a971b1 Merge pull request #42967 from terminalmage/issue42941
  - b838460816 Fix bug in on_header callback when no Content-Type is found in headers
- **ISSUE** #43008: (evelineraine) states.service.running always succeeds when watched state has changes (refs: #43016)
- **PR** #43016: (gtmanfred) service should return false on exception @ *2017-08-17 18:08:05 UTC*
  - 58f070d7a7 Merge pull request #43016 from gtmanfred/service
  - 21c264fe55 service should return false on exception
- **PR** #43020: (gtmanfred) test with gem that appears to be abandoned (refs: #43026) @ *2017-08-17 16:40:41 UTC*
  - 973d288eca Merge pull request #43020 from gtmanfred/test_gem
  - 0a1f40a664 test with gem that appears to be abandoned
- **PR** #42999: (garethgreenaway) Fixes to slack engine @ *2017-08-17 15:46:24 UTC*
  - 9cd0607fd4 Merge pull request #42999 from garethgreenaway/slack_engine_allow_editing_messages
  - 0ece2a8f0c Fixing a bug that prevented editing Slack messages and having the commands resent to the Slack engine.
- **PR** #43010: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ *2017-08-17 15:10:29 UTC*
  - 31627a9163 Merge pull request #43010 from rallytime/merge-2017.7
  - 8a0f948e4a Merge branch `2016.11' into `2017.7'
  - 1ee9499d28 Merge pull request #42968 from vutny/doc-salt-cloud-ref
    * 44ed53b1df [DOCS] Fix link to Salt Cloud Feature Matrix
  - 923f9741fe Merge pull request #42291 from vutny/fix-38839
    * 5f8f98a01f Fix #38839: remove *state* from Reactor runner kwags
  - c20bc7d515 Merge pull request #42940 from gtmanfred/2016.11
    * 253e216a8d fix IP address spelling
    * bd63074e7a create new ip address before checking list of allocated ips
  - d6496eca72 Merge pull request #42959 from rallytime/bp-42883
    * c6b9ca4b9e Lint fix: add missing space
    * 5597b1a30e Skip 2 failing tests in Python 3 due to upstream bugs

        * a0b19bdc27 Update account id value in boto_secgroup module unit test
        * 60b406e088 @mock_elb needs to be changed to @mock_elb_deprecated as well
        * 6ae1111295 Replace @mock_ec2 calls with @mock_ec2_deprecated calls
    - 6366e05d0d Merge pull request #42944 from Ch3LL/2016.11.6_follow_up
        * 7e0a20afca Add release notes for 2016.11.7 release
        * 63823f8c3e Add clean_id function to salt.utils.verify.py
    - 49d339c976 Merge pull request #42952 from Ch3LL/latest_2016.11
        * 74e7055d54 [2016.11] Bump latest and previous versions
    - b0d2e05a79 Merge pull request #42950 from Ch3LL/2016.11.7_docs
        * a6f902db40 Add Security Notice to 2016.11.77 Release Notes
    - c0ff69f88c Merge pull request #42836 from lyft/backport-utils.versions-to-2016.11
        * 86ce7004a2 Backport salt.utils.versions from develop to 2016.11
    - 64a79dd5ac Merge pull request #42919 from rallytime/bp-42871
        * 4e46c968e6 Update joyent.rst
    - bea8ec1098 Merge pull request #42918 from rallytime/bp-42848
        * cdb48126f7 Make lint happier.
        * 62eca9b00b Execute fire_master asynchronously in the main minion thread.
    - 52bce329cb Merge pull request #42861 from twangboy/win_pkg_install_salt
        * 0d3789f0c6 Fix pkg.install salt-minion using salt-call
    - b9f4f87aa5 Merge pull request #42798 from s-sebastian/2016.11
        * 1cc86592ed Update return data before calling returners

- **ISSUE** #42842: (Giandom) retreive kwargs passed with slack engine (refs: #42884)
- **PR** #42884: (Giandom) Convert to dict type the pillar string value passed from slack @ *2017-08-16 22:30:43 UTC*
    - 82be9dceb6 Merge pull request #42884 from Giandom/2017.7.1-fix-slack-engine-pillar-args
    - 80fd733c99 Update slack.py
- **PR** #42963: (twangboy) Fix *unit.test_fileclient* for Windows @ *2017-08-16 14:18:18 UTC*
    - 42bd553b98 Merge pull request #42963 from twangboy/win_unit_test_fileclient
    - e9febe4893 Fix unit.test_fileclient
- **PR** #42964: (twangboy) Fix *salt.utils.recursive_copy* for Windows @ *2017-08-16 14:17:27 UTC*
    - 7dddeeea8d Merge pull request #42964 from twangboy/win_fix_recursive_copy
    - 121cd4ef81 Fix *salt.utils.recursive_copy* for Windows
- **ISSUE** #42943: (mirceaulinic) *extension_modules* defaulting to */var/cache/minion* although running under proxy minion (refs: #42946)
- **PR** #42946: (mirceaulinic) extension_modules should default to $CACHE_DIR/proxy/extmods @ *2017-08-15 21:26:36 UTC*
    - 6da4d1d95e Merge pull request #42946 from cloudflare/px_extmods_42943

  - 73f9135340 extension_modules should default to /proxy/extmods

- **PR** #42945: (Ch3LL) [2017.7] Add clean_id function to salt.utils.verify.py (refs: #43035) @ *2017-08-15 18:04:20 UTC*
  - 95645d49f9 Merge pull request #42945 from Ch3LL/2017.7.0_follow_up
  - dcd92042e3 remove extra doc
  - 693a504ef0 update release notes with cve number
- **ISSUE** #42427: (grichmond-salt) Issue Passing Variables created from load_json as Inline Pillar Between States (refs: #42435)
- **PR** #42812: (terminalmage) Update custom YAML loader tests to properly test unicode literals @ *2017-08-15 17:50:22 UTC*
  - **PR** #42435: (terminalmage) Modify our custom YAML loader to treat unicode literals as unicode strings (refs: #42812)
  - 47ff9d5627 Merge pull request #42812 from terminalmage/yaml-loader-tests
  - 9d8486a894 Add test for custom YAML loader with unicode literal strings
  - a0118bcece Remove bytestrings and use textwrap.dedent for readability
- **PR** #42953: (Ch3LL) [2017.7] Bump latest and previous versions @ *2017-08-15 17:23:28 UTC*
  - 5d0c2198ac Merge pull request #42953 from Ch3LL/latest_2017.7
  - cbecf65823 [2017.7] Bump latest and previous versions
- **PR** #42951: (Ch3LL) Add Security Notice to 2017.7.1 Release Notes @ *2017-08-15 16:49:56 UTC*
  - 730e71db17 Merge pull request #42951 from Ch3LL/2017.7.1_docs
  - 1d8f827c58 Add Security Notice to 2017.7.1 Release Notes
- **PR** #42868: (carsonoid) Stub out required functions in redis_cache @ *2017-08-15 14:33:54 UTC*
  - c1c8cb9bfa Merge pull request #42868 from carsonoid/redisjobcachefix
  - 885bee2a7d Stub out required functions for redis cache
- **PR** #42810: (amendlik) Ignore error values when listing Windows SNMP community strings @ *2017-08-15 03:55:15 UTC*
  - e192d6e0af Merge pull request #42810 from amendlik/win-snmp-community
  - dc20e4651b Ignore error values when listing Windows SNMP community strings
- **PR** #42920: (cachedout) pid_race @ *2017-08-15 03:49:10 UTC*
  - a1817f1de3 Merge pull request #42920 from cachedout/pid_race
  - 5e930b8cbd If we catch the pid file in a transistory state, return None
- **PR** #42925: (terminalmage) Add debug logging to troubleshoot test failures @ *2017-08-15 03:47:51 UTC*
  - 11a33fe692 Merge pull request #42925 from terminalmage/f26-debug-logging
  - 8165f46165 Add debug logging to troubleshoot test failures
- **PR** #42913: (twangboy) Change service shutdown timeouts for salt-minion service (Windows) @ *2017-08-14 20:55:24 UTC*
  - a537197030 Merge pull request #42913 from twangboy/win_change_timeout
  - ffb23fbe47 Remove the line that wipes out the cache

  - a3becf8342 Change service shutdown timeouts

- **PR** #42800: (skizunov) Fix exception when master_type=disable @ *2017-08-14 20:53:38 UTC*
  - ca0555f616 Merge pull request #42800 from skizunov/develop6
  - fa5822009f Fix exception when master_type=disable
- **PR** #42679: (mirceaulinic) Add multiprocessing option for NAPALM proxy @ *2017-08-14 20:45:06 UTC*
  - 3af264b664 Merge pull request #42679 from cloudflare/napalm-multiprocessing
  - 9c4566db0c multiprocessing option tagged for 2017.7.2
  - 37bca1b902 Add multiprocessing option for NAPALM proxy
  - a2565ba8e5 Add new napalm option: multiprocessing
- **ISSUE** #42611: (nhavens) selinux.boolean state does not return changes (refs: #42612)
- **PR** #42657: (nhavens) back-port #42612 to 2017.7 @ *2017-08-14 19:42:26 UTC*
  - **PR** #42612: (nhavens) fix for issue #42611 (refs: #42657)
  - 4fcdab3ae9 Merge pull request #42657 from nhavens/2017.7
  - d73c4b55b7 back-port #42612 to 2017.7
- **PR** #42709: (whiteinge) Add token_expire_user_override link to auth runner docstring @ *2017-08-14 19:03:06 UTC*
  - d2b6ce327a Merge pull request #42709 from whiteinge/doc-token_expire_user_override
  - c7ea631558 Add more docs on the token_expire param
  - 4a9f6ba44f Add token_expire_user_override link to auth runner docstring
- **ISSUE** #42803: (gmcwhistler) master_type: str, not working as expected, parent salt-minion process dies. (refs: #42848)
- **ISSUE** #42753: (grichmond-salt) SaltReqTimeout Error on Some Minions when One Master in a Multi-Master Configuration is Unavailable (refs: #42848)
- **PR** #42848: (DmitryKuzmenko) Execute fire_master asynchronously in the main minion thread. (refs: #42918) @ *2017-08-14 18:28:38 UTC*
  - c6a7bf02e9 Merge pull request #42848 from DSRCorporation/bugs/42753_mmaster_timeout
  - 7f5412c19e Make lint happier.
  - ff66b7aaf0 Execute fire_master asynchronously in the main minion thread.
- **PR** #42911: (gtmanfred) cloud driver isn't a provider @ *2017-08-14 17:47:16 UTC*
  - 6a3279ea50 Merge pull request #42911 from gtmanfred/2017.7
  - 99046b441f cloud driver isn't a provider
- **PR** #42860: (skizunov) hash_and_stat_file should return a 2-tuple @ *2017-08-14 15:44:54 UTC*
  - 4456f7383d Merge pull request #42860 from skizunov/develop7
  - 5f85a03636 hash_and_stat_file should return a 2-tuple
- **PR** #42889: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ *2017-08-14 14:16:20 UTC*
  - c6ca7d639f Merge pull request #42889 from rallytime/merge-2017.7
  - fb7117f2ac Use salt.utils.versions.LooseVersion instead of distutils

    - 29ff19c587 Merge branch `2016.11' into `2017.7'
        * c15d0034fe Merge pull request #41977 from redmatter/fix-dockerng-network-ignores-test
            · 1cc2aa503a Fix dockerng.network_* ignoring of tests=True
        * 3b9c3c5671 Merge pull request #42886 from sarcasticadmin/adding_docs_salt_outputs
            · 744bf954ff Adding missing output flags to salt cli
        * e5b98c8a88 Merge pull request #42882 from gtmanfred/2016.11
            · da3402a53d make sure cmd is not run when npm isn't installed
        * 5962c9588b Merge pull request #42788 from amendlik/saltify-timeout
            · 928b523797 Remove waits and retries from Saltify deployment
        * 227ecddd13 Merge pull request #42877 from terminalmage/add-cron-state-virtual
            · f1de196740 Add virtual func for cron state module
        * ab9f6cef33 Merge pull request #42859 from terminalmage/gitpython-git-cli-note
            · 35e05c9515 Add note about git CLI requirement for GitPython to GitFS tutorial
        * 682b4a8d14 Merge pull request #42856 from gtmanfred/2016.11
            · b458b89fb8 skip cache_clean test if npm version is >= 5.0.0
        * 01ea854029 Merge pull request #42864 from whiteinge/syndic-log-root_dir
            · 4b1f55da9c Make syndic_log_file respect root_dir setting
- **PR** #42898: (mirceaulinic) Minor eos doc correction @ *2017-08-14 13:42:21 UTC*
    - 4b6fe2ee59 Merge pull request #42898 from mirceaulinic/patch-11
    - 93be79a135 Index eos under the installation instructions list
    - f903e7bc39 Minor eos doc correction
- **PR** #42883: (rallytime) Fix failing boto tests (refs: #42959) @ *2017-08-11 20:29:12 UTC*
    - 1764878754 Merge pull request #42883 from rallytime/fix-boto-tests
    - 6a7bf99848 Lint fix: add missing space
    - 43643227c6 Skip 2 failing tests in Python 3 due to upstream bugs
    - 7f46603e9c Update account id value in boto_secgroup module unit test
    - 7c1d493fdd @mock_elb needs to be changed to @mock_elb_deprecated as well
    - 3055e17ed5 Replace @mock_ec2 calls with @mock_ec2_deprecated calls
- **PR** #42885: (terminalmage) Move weird tearDown test to an actual tearDown @ *2017-08-11 19:14:42 UTC*
    - b21778efac Merge pull request #42885 from terminalmage/fix-f26-tests
    - 462d653082 Move weird tearDown test to an actual tearDown
- **ISSUE** #42870: (boltronics) webutil.useradd marked as deprecated:: 2016.3.0 by mistake? (refs: #42887)
- **PR** #42887: (rallytime) Remove extraneous ``deprecated'' notation @ *2017-08-11 18:34:25 UTC*
    - 9868ab6f3b Merge pull request #42887 from rallytime/fix-42870
    - 71e7581a2d Remove extraneous ``deprecated'' notation
- **PR** #42881: (gtmanfred) fix vmware for python 3.4.2 in salt.utils.vmware @ *2017-08-11 17:52:29 UTC*

  - da71f2a11b Merge pull request #42881 from gtmanfred/vmware
  - 05ecc6ac8d fix vmware for python 3.4.2 in salt.utils.vmware
- **ISSUE** #42843: (brejoc) Kubernetes module won't work with Kubernetes Python client > 1.0.2 (refs: #42845)
- **PR** #42845: (brejoc) API changes for Kubernetes version 2.0.0 (refs: #43039) @ *2017-08-11 14:04:30 UTC*
  - c7750d5717 Merge pull request #42845 from brejoc/updates-for-kubernetes-2.0.0
  - 81674aa88a Version info in :optdepends: not needed anymore
  - 71995505bc Not depending on specific K8s version anymore
  - d8f7d7a7c0 API changes for Kubernetes version 2.0.0
- **PR** #42678: (frankiexyz) Add eos.rst in the installation guide @ *2017-08-11 13:58:37 UTC*
  - 459fdedc67 Merge pull request #42678 from frankiexyz/2017.7
  - 1598571f52 Add eos.rst in the installation guide
- **ISSUE** #42646: (gmacon) SPM fails to install multiple packages (refs: #42778)
- **PR** #42778: (gtmanfred) make sure to use the correct out_file @ *2017-08-11 13:44:48 UTC*
  - 4ce96eb1a1 Merge pull request #42778 from gtmanfred/spm
  - 7ef691e8da make sure to use the correct out_file
- **ISSUE** saltstack/salt-jenkins#480: (rallytime) [2017.7] PY3 Debian 8 has several vmware unit tests failing (refs: #42857)
- **PR** #42857: (gtmanfred) use older name if _create_unverified_context is unavailable @ *2017-08-11 13:37:59 UTC*
  - 3d05d89e09 Merge pull request #42857 from gtmanfred/vmware
  - c1f673eca4 use older name if _create_unverified_context is unavailable
- **PR** #42866: (twangboy) Change to GitPython version 2.1.1 @ *2017-08-11 13:23:52 UTC*
  - 7e8cfff21c Merge pull request #42866 from twangboy/osx_downgrade_gitpython
  - 28053a84a6 Change GitPython version to 2.1.1
- **PR** #42855: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ *2017-08-10 21:40:39 UTC*
  - 3ce18637be Merge pull request #42855 from rallytime/merge-2017.7
  - 08bbcf5790 Merge branch `2016.11' into `2017.7'
  - 2dde1f77e9 Merge pull request #42851 from terminalmage/bp-42651
    * a3da86eea8 fix syntax
    * 6ecdbcec1d make sure names are correct
    * f83b553d6e add py3 for versionlock
    * 21934f61bb python2- prefix for fedora 26 packages
  - c746f79a3a Merge pull request #42806 from rallytime/fix-42683
    * 8c8640d6b8 Update doc references in glusterfs.volume_present
  - 27a8a2695a Merge pull request #42829 from twangboy/win_pkg_fix_install
    * 83b9b230cd Add winrepo to docs about supporting versions in pkgs
    * 81fefa6e67 Add ability to pass version in pkgs list

  - 3c3ac6aeb2 Merge pull request #42838 from twangboy/win_doc_pki
    * f0a1d06b46 Standardize PKI Client
    * 7de687aa57 Document requirements for win_pki
  - b3e2ae3c58 Merge pull request #42805 from rallytime/bp-42552
    * 5a91c1f2d1 update consul module following this documentation https://www.consul.io/api/acl.html
  - d2ee7934ed Merge pull request #42804 from rallytime/bp-42784
    * dbd29e4aaa only read file if it is not a string
  - 4cbf8057b3 Merge pull request #42826 from terminalmage/fix-spelling
    * 00f93142e4 Fix misspelling of ``versions''
  - de997edd90 Merge pull request #42786 from Ch3LL/fix_typo
    * 90a2fb66a2 Fix typo for template_dict in http docs
  - bf6153ebe5 Merge pull request #42795 from lomeroe/bp-42744_201611
    * 695f8c1ae4 fix #42600 in develop
  - 61fad97286 Merge pull request #42748 from whiteinge/save-before-output
    * de60b77c82 Workaround Orchestrate problem that highstate outputter mutates data
  - a4e3e7e786 Merge pull request #42764 from amendlik/cloud-win-loop
    * f3dcfca4e0 Fix infinite loops on failed Windows deployments
  - da85326ad4 Merge pull request #42694 from gtmanfred/2016.11
    * 1a0457af51 allow adding extra remotes to a repository

- **ISSUE** #42774: (rossengeorgiev) pkg.installed succeeds, but fails when you specify package version (refs: #42808)
- **PR** #42808: (terminalmage) Fix regression in yum/dnf version specification @ *2017-08-10 15:59:22 UTC*
  - f954f4f33a Merge pull request #42808 from terminalmage/issue42774
  - c69f17dd18 Add integration test for #42774
  - 78d826dd14 Fix regression in yum/dnf version specification
- **ISSUE** #42639: (amnonbc) k8s module needs a way to manage configmaps (refs: #42807)
- **PR** #42807: (rallytime) Update modules --> states in kubernetes doc module @ *2017-08-10 14:10:40 UTC*
  - d9b0f44885 Merge pull request #42807 from rallytime/fix-42639
  - 152eb88d9f Update modules --> states in kubernetes doc module
- **ISSUE** #42818: (Mapel88) Bug in win_iis module - ``create_cert_binding'' (refs: #42841)
- **PR** #42841: (Mapel88) Fix bug #42818 in win_iis module @ *2017-08-10 13:44:21 UTC*
  - b8c7bda68d Merge pull request #42841 from Mapel88/patch-1
  - 497241fbcb Fix bug #42818 in win_iis module
- **ISSUE** #42697: (Ch3LL) [Python3] NameError when running salt-run manage.versions (refs: #42782)
- **PR** #42782: (rallytime) Add a cmp compatibility function utility @ *2017-08-09 22:37:29 UTC*
  - 135f9522d0 Merge pull request #42782 from rallytime/fix-42697

  - d707f94863 Update all other calls to ``cmp'' function
  - 5605104285 Add a cmp compatibility function utility

- **PR** #42784: (gtmanfred) only read file if ret is not a string in http.query (refs: #42804) @ *2017-08-08 17:20:13 UTC*
  - ac752223ad Merge pull request #42784 from gtmanfred/http
  - d397c90e92 only read file if it is not a string
- **ISSUE** #42600: (twangboy) Unable to set `Not Configured' using win_lgpo execution module (refs: #42744, #42794, #42795)
- **PR** #42794: (lomeroe) Backport #42744 to 2017.7 @ *2017-08-08 17:16:31 UTC*
  - **PR** #42744: (lomeroe) fix #42600 in develop (refs: #42794, #42795)
  - 44995b1abf Merge pull request #42794 from lomeroe/bp-42744
  - 0acffc6df5 fix #42600 in develop
- **ISSUE** #42707: (cro) Service module and state fails on FreeBSD (refs: #42708)
- **PR** #42708: (cro) Do not change the arguments of the function when memoizing @ *2017-08-08 13:47:01 UTC*
  - dcf474c47c Merge pull request #42708 from cro/dont_change_args_during_memoize
  - a260e913b5 Do not change the arguments of the function when memoizing
- **PR** #42783: (rallytime) Sort lists before comparing them in python 3 unit test @ *2017-08-08 13:25:15 UTC*
  - **PR** #42206: (rallytime) [PY3] Fix test that is flaky in Python 3 (refs: #42783)
  - ddb671b8fe Merge pull request #42783 from rallytime/fix-flaky-py3-test
  - 998834fbac Sort lists before compairing them in python 3 unit test
- **PR** #42721: (hibbert) Allow no ip sg @ *2017-08-07 22:07:18 UTC*
  - d69822fe93 Merge pull request #42721 from hibbert/allow_no_ip_sg
  - f58256802a allow_no_ip_sg: Allow user to not supply ipaddress or securitygroups when running boto_efs.create_mount_target
- **ISSUE** #42538: (marnovdm) docker_container.running issue since 2017.7.0: passing domainname gives Error 500: json: cannot unmarshal array into Go value of type string (refs: #42769)
- **PR** #42769: (terminalmage) Fix domainname parameter input translation @ *2017-08-07 20:46:07 UTC*
  - bf7938fbe0 Merge pull request #42769 from terminalmage/issue42538
  - 665de2d1f9 Fix domainname parameter input translation
- **PR** #42388: (The-Loeki) pillar.items pillar_env & pillar_override are never used @ *2017-08-07 17:51:48 UTC*
  - 7bf2cdb363 Merge pull request #42388 from The-Loeki/patch-1
  - 664f4b577b pillar.items pillar_env & pillar_override are never used
- **PR** #42770: (rallytime) [2017.7] Merge forward from 2017.7.1 to 2017.7 @ *2017-08-07 16:21:45 UTC*
  - 9a8c9ebffc Merge pull request #42770 from rallytime/merge-2017.7.1-into-2017.7
  - 6d17c9d227 Merge branch `2017.7.1' into `2017.7'
- **PR** #42768: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ *2017-08-07 16:21:17 UTC*
  - c765e528d0 Merge pull request #42768 from rallytime/merge-2017.7

- 0f75482c37 Merge branch `2016.11' into `2017.7'
  - 7b2119feee Merge pull request #42669 from garethgreenaway/42642_2016_11_augeas_module_fix
    - 24413084e2 Updating the call to shlex_split to pass the posix=False argument so that quotes are preserved.
  - 30725769ed Merge pull request #42629 from xiaoanyunfei/tornadoapi
    - 1e13383b95 tornado api
  - f0f00fcee1 Merge pull request #42655 from whiteinge/rest_cherrypy-reenable-stats
    - deb6316d67 Fix lint errors
    - 6bd91c8b03 Reenable cpstats for rest_cherrypy
  - 21cf15f9c3 Merge pull request #42693 from gilbsgilbs/fix-rabbitmq-tags
    - 78fccdc7e2 Cast to list in case tags is a tuple.
    - 287b57b5c5 Fix RabbitMQ tags not properly set.
  - f2b0c9b4fa Merge pull request #42574 from sbojarski/boto-cfn-error-reporting
    - 5c945f10c2 Fix debug message in ``boto_cfn._validate'' function.
    - 181a1beecc Fixed error reporting in ``boto_cfn.present'' function.
  - bc1effc4f2 Merge pull request #42623 from terminalmage/fix-unicode-constructor
    - fcf45889dd Fix unicode constructor in custom YAML loader

- **PR** #42651: (gtmanfred) python2- prefix for fedora 26 packages (refs: #42851) @ *2017-08-07 14:35:04 UTC*
  - 3f5827f61e Merge pull request #42651 from gtmanfred/2017.7
  - 8784899942 fix syntax
  - 178cc1bd81 make sure names are correct
  - f179b97b52 add py3 for versionlock
  - 1958d18634 python2- prefix for fedora 26 packages
- **ISSUE** #42688: (hibbert) salt.modules.boto_efs module Invalid type for parameter Tags - type: <type `dict'>, valid types: <type `list'>, <type `tuple'> (refs: #42689)
- **PR** #42689: (hibbert) boto_efs_fix_tags: Fix #42688 invalid type for parameter tags @ *2017-08-06 17:47:07 UTC*
  - 791248e398 Merge pull request #42689 from hibbert/boto_efs_fix_tags
  - 157fb28851 boto_efs_fix_tags: Fix #42688 invalid type for parameter tags
- **ISSUE** #42705: (hbruch) salt.states.docker_container.running replaces container on subsequent runs if oom_kill_disable unsupported (refs: #42745)
- **PR** #42745: (terminalmage) docker.compare_container: treat null oom_kill_disable as False @ *2017-08-05 15:28:20 UTC*
  - 1b3407649b Merge pull request #42745 from terminalmage/issue42705
  - 710bdf6115 docker.compare_container: treat null oom_kill_disable as False
- **ISSUE** #42649: (tehsu) local_batch no longer working in 2017.7.0, 500 error (refs: #42704)
- **PR** #42704: (whiteinge) Add import to work around likely multiprocessing scoping bug @ *2017-08-04 23:03:13 UTC*

  - 5d5b22021b Merge pull request #42704 from whiteinge/expr_form-warn-scope-bug
  - 03b675a618 Add import to work around likely multiprocessing scoping bug

- **ISSUE** #42741: (kkoppel) docker_container.running keeps re-creating containers with links to other containers (refs: #42743)
- **PR** #42743: (kkoppel) Fix docker.compare_container for containers with links @ *2017-08-04 16:00:33 UTC*
  - 888e954e73 Merge pull request #42743 from kkoppel/fix-issue-42741
  - de6d3cc0cf Update dockermod.py
  - 58b997c67f Added a helper function that removes container names from container HostConfig:Links values to enable compare_container() to make the correct decision about differences in links.
- **ISSUE** #42668: (UtahDave) Minions under syndics don't respond to MoM (refs: #42710)
- **ISSUE** #42545: (paul-mulvihill) Salt-api failing to return results for minions connected via syndics. (refs: #42710)
- **PR** #42710: (gtmanfred) use subtraction instead of or @ *2017-08-04 15:14:14 UTC*
  - 03a7f9bbee Merge pull request #42710 from gtmanfred/syndic
  - 683561a711 use subtraction instead of or
- **PR** #42670: (gtmanfred) render kubernetes docs @ *2017-08-03 20:30:56 UTC*
  - 005182b6a1 Merge pull request #42670 from gtmanfred/kube
  - bca17902f5 add version added info
  - 4bbfc751ae render kubernetes docs
- **PR** #42712: (twangboy) Remove master config file from minion-only installer @ *2017-08-03 20:25:02 UTC*
  - df354ddabf Merge pull request #42712 from twangboy/win_build_pkg
  - 8604312a7b Remove master conf in minion install
- **PR** #42714: (cachedout) Set fact gathering style to `old' for test_junos @ *2017-08-03 13:39:40 UTC*
  - bb1dfd4a42 Merge pull request #42714 from cachedout/workaround_jnpr_test_bug
  - 834d6c605e Set fact gathering style to `old' for test_junos
- **PR** #42481: (twangboy) Fix *unit.test_crypt* for Windows @ *2017-08-01 18:10:50 UTC*
  - 4c1d931654 Merge pull request #42481 from twangboy/win_unit_test_crypt
  - 102509029e Remove chown mock, fix path seps
- **PR** #42654: (morganwillcock) Disable ZFS in the core grain for NetBSD @ *2017-08-01 17:52:36 UTC*
  - 8bcefb5e67 Merge pull request #42654 from morganwillcock/zfsgrain
  - 49023deb94 Disable ZFS grain on NetBSD
- **ISSUE** #42421: (bfilipek) archive.extracted on Windows failed when dir not exist (refs: #42453)
- **PR** #42453: (gtmanfred) don't pass user to makedirs on windows @ *2017-07-31 19:57:57 UTC*
  - 5baf2650fc Merge pull request #42453 from gtmanfred/makedirs
  - 559d432930 fix tests
  - afa7a13ce3 use logic from file.directory for makedirs
- **PR** #42603: (twangboy) Add runas_passwd as a global for states @ *2017-07-31 19:49:49 UTC*

  - fb81e78f71 Merge pull request #42603 from twangboy/win_fix_runas
  - 0c9e40012b Remove deprecation, add logic to state.py
  - 464ec34713 Fix another instance of runas_passwd
  - 18d6ce4d55 Add global vars to cmd.call
  - 6c71ab6f80 Remove runas and runas_password after state run
  - 4ea264e3db Change to runas_password in docs
  - 61aba35718 Deprecate password, make runas_password a named arg
  - 41f0f75a06 Add new var to list, change to runas_password
  - b9c91eba60 Add runas_passwd as a global for states
- **PR** #42541: (Mareo) Avoid confusing warning when using file.line @ *2017-07-31 19:41:58 UTC*
  - 75ba23c253 Merge pull request #42541 from epita/fix-file-line-warning
  - 2fd172e07b Avoid confusing warning when using file.line
- **PR** #42625: (twangboy) Fix the list function in the win_wua execution module @ *2017-07-31 19:27:16 UTC*
  - 3d328eba80 Merge pull request #42625 from twangboy/fix_win_wua
  - 1340c15ce7 Add general usage instructions
  - 19f34bda55 Fix docs, formatting
  - b17495c9c8 Fix problem with list when install=True
- **ISSUE** #42514: (rickh563) *module.run* does not work as expected in 2017.7.0 (refs: #42602)
- **PR** #42602: (garethgreenaway) Use superseded and deprecated configuration from pillar @ *2017-07-31 18:53:06 UTC*
  - 25094ad9b1 Merge pull request #42602 from garethgreenaway/42514_2017_7_superseded_deprecated_from_pillar
  - 2e132daa73 Slight update to formatting
  - 74bae13939 Small update to something I missed in the first commit. Updating tests to also test for pillar values.
  - 928a4808dd Updating the superseded and deprecated decorators to work when specified as pillar values.
- **PR** #42621: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ *2017-07-28 19:45:51 UTC*
  - b7cd30d3ee Merge pull request #42621 from rallytime/merge-2017.7
  - 58dcb58a47 Merge branch `2016.11' into `2017.7'
    * cbf752cd73 Merge pull request #42515 from gtmanfred/backslash
      · cc4e45656d Allow not interpreting backslashes in the repl
    * 549495831f Merge pull request #42586 from gdubroeucq/2016.11
      · 9c0b5cc1d6 Remove extra newline
      · d2ef4483e4 yumpkg.py: clean
      · a96f7c09e0 yumpkg.py: add option to the command ``check-update''
    * 6b45debf28 Merge pull request #41988 from redmatter/fix-dockerng-network-matching
      · 9eea796da8 Add regression tests for #41982
      · 3369f0072f Fix broken unit test test_network_absent

                - 0ef6cf634c Add trace logging of dockerng.networks result
                - 515c612808 Fix dockerng.network_* name matching
- **ISSUE** #34245: (Talkless) ini.options_present always report state change (refs: #41690)
- **PR** #42618: (rallytime) Back-port #41690 to 2017.7 @ *2017-07-28 19:27:11 UTC*
    - **PR** #41690: (m03) Fix issue #34245 with ini.options_present reporting changes (refs: #42618)
    - d48749b476 Merge pull request #42618 from rallytime/bp-41690
    - 22c6a7c7ff Improve output precision
    - ee4ea6b860 Fix #34245 ini.options_present reporting changes
- **ISSUE** #42588: (ixs) salt-ssh fails when using scan roster and detected minions are uncached (refs: #42589)
- **PR** #42619: (rallytime) Back-port #42589 to 2017.7 @ *2017-07-28 19:26:36 UTC*
    - **PR** #42589: (ixs) Fix ssh-salt calls with scan roster for uncached clients (refs: #42619)
    - e671242a4f Merge pull request #42619 from rallytime/bp-42589
    - cd5eb93903 Fix ssh-salt calls with scan roster for uncached clients
- **ISSUE** #41982: (abulford) dockerng.network_* matches too easily (refs: #42006, #41988)
- **PR** #42006: (abulford) Fix dockerng.network_* name matching @ *2017-07-28 15:52:52 UTC*
    - **PR** #41988: (abulford) Fix dockerng.network_* name matching (refs: #42006)
    - 7d385f8bdc Merge pull request #42006 from redmatter/fix-dockerng-network-matching-2017.7
    - f83960c02a Lint: Remove extra line at end of file.
    - c7d364ec56 Add regression tests for #41982
    - d31f2913bd Fix broken unit test test_network_absent
    - d42f781c64 Add trace logging of docker.networks result
    - 8c00c63b55 Fix dockerng.network_* name matching
- **ISSUE** #12587: (Katafalkas) salt-cloud custom functions/actions (refs: #42616)
- **PR** #42616: (amendlik) Sync cloud modules @ *2017-07-28 15:40:36 UTC*
    - ee8aee1496 Merge pull request #42616 from amendlik/sync-clouds
    - ab21bd9b5b Sync cloud modules when saltutil.sync_all is run
- **PR** #42601: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ *2017-07-27 22:32:07 UTC*
    - e2dd443002 Merge pull request #42601 from rallytime/merge-2017.7
    - 36a1bcf8c5 Merge branch `2016.11' into `2017.7'
        * 4b16109122 Merge pull request #42339 from isbm/isbm-jobs-scheduled-in-a-future-bsc1036125
            · bbba84ce2d Bugfix: Jobs scheduled to run at a future time stay pending for Salt minions (bsc#1036125)
        * 6c5a7c604a Merge pull request #42077 from vutny/fix-jobs-scheduled-with-whens
            · b1960cea44 Fix scheduled job run on Master if *when* parameter is a list

  - 994d3dc74a Merge pull request #42454 from terminalmage/jinja-docs-2017.7
  - 98b661406e Document future renaming of new rand_str jinja filter
- **PR** #42452: (Ch3LL) update windows urls to new py2/py3 naming scheme @ *2017-07-21 17:20:47 UTC*
  - 4480075129 Merge pull request #42452 from Ch3LL/fix_url_windows
  - 3f4a918f73 update windows urls to new py2/py3 naming scheme
- **ISSUE** #42404: (gabekahen) [2017.7] file.managed with cmd_check ``No such file or directory'' (refs: #42411)
- **ISSUE** #33708: (pepinje) visudo check command leaves cache file in /tmp (refs: #42411, #38063)
- **PR** #42411: (seedickcode) Fix file.managed check_cmd file not found - Issue #42404 @ *2017-07-20 21:59:17 UTC*
  - **PR** #38063: (llua) tmp file clean up in file.manage - fix for #33708 (refs: #42411)
  - 33e90be1fe Merge pull request #42411 from seedickcode/check_cmd_fix
  - 4ae3911f01 Fix file.managed check_cmd file not found - Issue #42404
- **PR** #42409: (twangboy) Add Scripts to build Py3 on Mac @ *2017-07-20 21:36:34 UTC*
  - edde31376a Merge pull request #42409 from twangboy/mac_py3_scripts
  - ac0e04af72 Remove build and dist, sign pkgs
  - 9d66e273c4 Fix hard coded pip path
  - 7b8d6cbbd2 Add support for Py3
  - aa4eed93c8 Update Python and other reqs
- **ISSUE** #42403: (astronouth7303) [2017.7] Pillar empty when state is applied from orchestrate (refs: #42433)
- **PR** #42433: (terminalmage) Only force saltenv/pillarenv to be a string when not None (refs: #42573) @ *2017-07-20 21:32:24 UTC*
  - 82982f940d Merge pull request #42433 from terminalmage/issue42403
- **PR** #42408: (CorvinM) Fix documentation misformat in salt.states.file.replace @ *2017-07-20 00:45:43 UTC*
  - a71938cefe Merge pull request #42408 from CorvinM/file-replace-doc-fix
  - 246a2b3e74 Fix documentation misformat in salt.states.file.replace
- **PR** #42347: (twangboy) Fixes problem with Version and OS Release related grains on certain versions of Python @ *2017-07-19 17:05:43 UTC*
  - d385dfd19d Merge pull request #42347 from twangboy/win_fix_ver_grains
  - ef1f663fc9 Detect server OS with a desktop release name
- **PR** #42366: (twangboy) Remove build and dist directories before install @ *2017-07-19 16:37:41 UTC*
  - eb9e4206c9 Merge pull request #42366 from twangboy/win_fix_build
  - 0946002713 Add blank line after delete
  - f7c0bb4f46 Remove build and dist directories before install
- **PR** #42373: (Ch3LL) Add initial 2017.7.1 Release Notes File @ *2017-07-19 16:28:46 UTC*
  - af7820f25d Merge pull request #42373 from Ch3LL/add_2017.7.1
  - ce1c1b6d28 Add initial 2017.7.1 Release Notes File

- **PR** #42150: (twangboy) Fix *unit.modules.test_pip* for Windows @ *2017-07-19 16:01:17 UTC*
  - 59e012b485 Merge pull request #42150 from twangboy/win_unit_test_pip
  - 4ee24202fc Fix unit tests for test_pip
- **PR** #42154: (twangboy) Fix *unit.modules.test_reg_win* for Windows @ *2017-07-19 16:00:38 UTC*
  - ade25c6b34 Merge pull request #42154 from twangboy/win_unit_test_reg
  - 00d9a52802 Fix problem with handling REG_QWORD in list values
- **PR** #42182: (twangboy) Fix *unit.modules.test_useradd* for Windows @ *2017-07-19 15:55:33 UTC*
  - 07593675e2 Merge pull request #42182 from twangboy/win_unit_test_useradd
  - 8260a71c07 Disable tests that require pwd in Windows
- **PR** #42364: (twangboy) Windows Package notes for 2017.7.0 @ *2017-07-18 19:24:45 UTC*
  - a175c40c1d Merge pull request #42364 from twangboy/release_notes_2017.7.0
  - 96517d1355 Add note about patched windows packages
- **PR** #42361: (Ch3LL) [2017.7] Update version numbers in doc config for 2017.7.0 release @ *2017-07-18 19:23:22 UTC*
  - 4dfe50e558 Merge pull request #42361 from Ch3LL/doc-update-2017.7
  - dc5bb301f7 [2017.7] Update version numbers in doc config for 2017.7.0 release
- **PR** #42363: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ *2017-07-18 18:40:48 UTC*
  - 587138d771 Merge pull request #42363 from rallytime/merge-2017.7
  - 7aa31ff030 Merge branch `2016.11' into `2017.7'
    * b256001760 Merge pull request #42353 from terminalmage/fix-git-test
      · 14cf6ce322 is_windows is a function, not a propery/attribute

Windows Changes

pkg Execution Module`

Significate changes (PR #43708 & #45390, damon-atkins) have been made to the pkg execution module. Users should test this release against their existing package sls definition files.

- *pkg.list_available* no longer defaults to refreshing the winrepo meta database.
- *pkg.install* without a `version` parameter no longer upgrades software if the software is already installed. Use `pkg.install version=latest` (or simply use a *pkg.latest* state to get the old behavior.
- *pkg.list_pkgs* now returns multiple versions if software installed more than once.
- *pkg.list_pkgs* now returns `Not Found` when the version is not found instead of `(value not set)` which matches the contents of the sls definitions.
- *pkg.remove* will wait up to 3 seconds (normally about a second) to detect changes in the registry after removing software, improving reporting of version changes.
- *pkg.remove* can remove `latest` software, if `latest` is defined in sls definition.
- Documentation was update for the execution module to match the style in new versions, some corrections as well.
- All install/remove commands are prefix with cmd.exe shell and cmdmod is called with a command line string instead of a list. Some sls files in saltstack/salt-winrepo-ng expected the commands to be prefixed with cmd.exe (i.e. the use of &).
- Some execution module functions results, now behave more like their Unix/Linux versions.

cmd Execution Module

Due to a difference in how Python's `subprocess.Popen()` spawns processes on Windows, passing the command as a list of arguments can result in problems. This is because Windows' *CreateProcess* requires the command to be passed as a single string. Therefore, `subprocess` will attempt to re-assemble the list of arguments into as string. Some escaped characters and quotes can cause the resulting string to be incorrectly-assembled, resulting in a failure to execute the command.

Salt now deals with these cases by joining the list of arguments correctly and ensuring that the command is passed to `subprocess.Popen()` as a string.

Changelog for v2017.7.2..v2017.7.3

  - 1c78fc23ea Add different service name for Mac 10.13 test
- **PR** #45654: (twangboy) Merge forward #45638 @ *2018-01-24 14:59:14 UTC*
  - **PR** #45638: (twangboy) Win fix shell info (refs: #45654)
  - 770f0c4664 Merge pull request #45654 from twangboy/win_fix_shell_info_2017.7.3
  - 5bb01aeb8c Merge forward #45638
- **PR** #45653: (rallytime) Back-port #45611 to 2017.7.3 @ *2018-01-24 05:20:11 UTC*
  - **PR** #45611: (terminalmage) Fix unnecessary/incorrect usage of six.binary_type (refs: #45653)
  - 6fc293da46 Merge pull request #45653 from rallytime/bp-45611
  - 0a6b06d8ea Fix unnecessary/incorrect usage of six.binary_type
- **PR** #45642: (rallytime) Back-port #45636 to 2017.7.3 @ *2018-01-23 22:00:30 UTC*
  - **PR** #45636: (Ch3LL) Fix mac service and pkg tests for 10.13 (refs: #45642)
  - 0a07e0d259 Merge pull request #45642 from rallytime/bp-45636
  - df0ad54c9a remove unnecessary variable for test
  - acb14fd43d fix pylint
  - a9b12cd1ea Fix mac service and pkg tests for 10.13
- **PR** #45645: (rallytime) Back-port #45606 to 2017.7.3 @ *2018-01-23 21:54:45 UTC*
  - **PR** #45606: (terminalmage) Fix bug affecting salt-ssh when root_dir differs from the default (refs: #45645)
  - f37a5b6d8d Merge pull request #45645 from rallytime/bp-45606
  - d52d96f30a Fix bug affecting salt-ssh when root_dir differs from the default
- **PR** #45641: (rallytime) Back-port #45508 to 2017.7.3 @ *2018-01-23 21:18:39 UTC*
  - **PR** #45508: (frogunder) fix test_archive test for mac on 2017.7 branch (refs: #45641)
  - e659793c09 Merge pull request #45641 from rallytime/bp-45508
  - e6917a291e fix test_archive test for mac on 2017.7 branch
- **PR** #45604: (rallytime) Back-port #45582 to 2017.7.3 @ *2018-01-22 16:54:15 UTC*
  - **PR** #45582: (terminalmage) Two salt-ssh fixes (refs: #45604)
  - ced3269ae8 Merge pull request #45604 from rallytime/bp-45582
  - bc8a450cc7 Remove state.py utils file from thin list
  - 629e6c9674 Further fixes to for salt-ssh test under heavy load
  - 0dff596b59 Add salt/utils/state.py to thin tarball
  - a61afda100 Pass on OSError if thin tarball already removed
- **PR** #45591: (gtmanfred) mark minion_blackout tests as flaky @ *2018-01-22 00:14:31 UTC*
  - 4672baa6c8 Merge pull request #45591 from gtmanfred/2017.7.3
  - f7fd35fc4a test updating the minion blackout timeout to 10 seconds
- **PR** #45585: (rallytime) Back-port #45579 to 2017.7.3 @ *2018-01-22 00:13:59 UTC*

  - **PR** #45579: (terminalmage) Test suite stability fixes (refs: #45585)
  - 2a992f9017 Merge pull request #45585 from rallytime/bp-45579
  - 0292c8345b Lint fix: use six's map
  - 108d8cbeef Use correct utils path for 2017.7
  - a38f4cb6d6 Restrict pyzmq optimizations to pyzmq >= 14.3.0
  - 58ad558346 Fix event unpack
- **PR** #45573: (gtmanfred) update 2017.7.3 tests @ *2018-01-20 20:05:13 UTC*
  - 19cd97ed3b Merge pull request #45573 from gtmanfred/2017.7.3
  - bd3cb47fa7 fix mock for opensuse
  - 808e26e69a test simple website
- **PR** #45570: (gtmanfred) Fix tests for 2017.7.3 @ *2018-01-20 15:01:21 UTC*
  - e72d81ef22 Merge pull request #45570 from gtmanfred/2017.7.3
  - 1f71f301ba specify checking man page path
  - 2ddbcb45c1 fix pkg_resources for usage with testing pip
  - 0ba39a7108 switch systemd-journald for sshd for arch service test
- **PR** #45538: (gtmanfred) Backport test fixes to 2017.7.3 @ *2018-01-19 14:39:44 UTC*
  - 7bc60c56d4 Merge pull request #45538 from gtmanfred/2017.7.3
  - 801e0639b6 Merge branch `2017.7.3' into 2017.7.3
- **PR** #45533: (rallytime) Back-port #45529 to 2017.7.3 @ *2018-01-18 22:52:29 UTC*
  - **PR** #45529: (Ch3LL) Fix UnboundLocalError for pacman pkg installs (refs: #45533)
  - 8ad65e3359 Merge pull request #45533 from rallytime/bp-45529
  - 6d56c64d88 Fix UnboundLocalError for pacman pkg installs
    * 8d907ee1a0 fix moto version
    * 1241ab5fc6 fix test boto imports
    * f4b6367cf9 fix fedora pkg test
- **ISSUE** #45394: (dmurphy18) git.latest fails when ``depth'' is used with a non-default branch (refs: #45399)
- **PR** #45442: (rallytime) Back-port #45399 to 2017.7.3 @ *2018-01-17 17:20:48 UTC*
  - **PR** #45399: (terminalmage) Fix git.latest failure when rev is not the default branch (refs: #45442)
  - 7379f9e3e5 Merge pull request #45442 from rallytime/bp-45399
  - 590a6db626 Lint: use support TMP path instead of integration TMP path
  - c081b2c62c Fix git.latest failure when rev is not the default branch
- **PR** #45468: (twangboy) Fix some issues with reg.py @ *2018-01-16 22:23:47 UTC*
  - ee5090f69b Merge pull request #45468 from twangboy/win_reg
  - a0d21c6354 Fix some issues with reg.py
- **ISSUE** #44913: (ari) FreeBSD packaging install performance regression (refs: #45174)
- **PR** #45434: (rallytime) Back-port #45174 to 2017.7.3 @ *2018-01-14 12:43:16 UTC*

  - **PR** #45174: (eradman) Do not force pkg reinstall on FreeBSD (refs: #45434)
  - ef7a896eb6 Merge pull request #45434 from rallytime/bp-45174
  - b310ff7ab8 Do not force pkg reinstall on FreeBSD
- **PR** #45395: (rallytime) Back-port #45380 to 2017.7.3 @ *2018-01-12 18:49:20 UTC*
  - **PR** #45380: (twangboy) Backport changes from #45308 (refs: #45395)
  - **PR** #45308: (twangboy) Fix *integration.modules.test_state* for Windows (refs: #45380)
  - c3fdd1dcc4 Merge pull request #45395 from rallytime/bp-45380
  - 0356b3d56f Backport changes from #45308
- **ISSUE** #44107: (anlutro) salt-ssh 2017.7 doesn't work with Python 3, missing backports_abc (refs: #45294)
- **PR** #45294: (gtmanfred) include backports_abc @ *2018-01-11 18:18:16 UTC*
  - f7da716d32 Merge pull request #45294 from gtmanfred/2017.7
  - 3633ceeaa7 Merge branch `2017.7' into 2017.7
  - 29806e4496 ignore salt.ext in pylint
  - 8b597a4890 include backports_abc
- **ISSUE** #43130: (boltronics) module.run documentation issues (refs: #45381)
- **PR** #45381: (gtmanfred) fix module.run docs @ *2018-01-11 18:02:38 UTC*
  - f77a3e9cd4 Merge pull request #45381 from gtmanfred/module.run
  - 230e899192 fix module.run docs
- **ISSUE** #43995: (dragonpaw) Using zmq built with --enable-draft breaks Salt (refs: #45368)
- **PR** #45368: (DmitryKuzmenko) Fixes to work with pyzmq with --enable-drafts @ *2018-01-11 17:53:16 UTC*
  - 8efd29f4d9 Merge pull request #45368 from DSRCorporation/bugs/zmq_draft
  - 7622e355cf Minor: removed a stale comment.
  - 00f31bf9b5 Fixes to work with pyzmq with --enable-drafts
- **PR** #45371: (rallytime) Back-port #45158 to 2017.7 @ *2018-01-11 17:51:38 UTC*
  - **PR** #45158: (terminalmage) Fix integration.modules.test_state.StateModuleTest.test_exclude (refs: #45371)
  - 22c3efda06 Merge pull request #45371 from rallytime/bp-45158
  - 3565bc2bf2 Don't use include-test SLS in orch tests
  - 8bc17e0d7a Fix integration.modules.test_state.StateModuleTest.test_exclude
- **PR** #45387: (renner) Set SHELL environment variable @ *2018-01-11 16:23:21 UTC*
  - **PR** #40630: (mateiw) develop: SUSE specific changes to salt-api.service (refs: #45387)
  - **PR** #40620: (mateiw) SUSE specific changes to salt-api.service (refs: #40630, #45387)
  - 3a0e2de995 Merge pull request #45387 from renner/patch-2
  - 530ddd2d29 Set SHELL environment variable
- **PR** #45388: (terminalmage) Fix loader error in 2017.7 tests @ *2018-01-11 16:13:53 UTC*
  - dcf98a2260 Merge pull request #45388 from terminalmage/fix-test-loader-error

  - 5473c085d9 Fix loader error in 2017.7 tests

- **PR** #45382: (terminalmage) Skip flaky test on 2017.7 branch @ *2018-01-11 14:23:05 UTC*
  - d15f9e1020 Merge pull request #45382 from terminalmage/salt-jenkins-686
  - ff3039db6c Skip flaky test on 2017.7 branch
- **PR** #45369: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ *2018-01-10 22:14:05 UTC*
  - dbe21b2c0d Merge pull request #45369 from rallytime/merge-2017.7
  - f65e091df8 Merge branch `2016.11' into `2017.7'
    * 0959ae4ea3 Merge pull request #45327 from lomeroe/bp-44861_2016.11
      · 784139f734 Check for values other than 0 or 1
    * a6db5f95f0 Merge pull request #45268 from damon-atkins/2016.11_win_pkg_pkg_install_latest
      · 325a9f0f66 Update 2016.11.9.rst

      · 126aee36ac Update 2016.11.9.rst
      · 1c01967943 Update 2016.11.9.rst
      · a0d89882b8 Fix pkg.install packagename version=latest i.e. if on an old version upgrade to the latest
- **PR** #45379: (rhoths) Minor spelling/grammar fixes in the highstate returner documentation @ *2018-01-10 20:09:52 UTC*
  - 55979b3a48 Merge pull request #45379 from rhoths/rhoths-doc-highstate-1
  - afbbd492cd Minor spelling/grammar fixes in highstate returner
- **PR** #45358: (UtahDave) gate the minion data cache refresh events. @ *2018-01-10 17:21:05 UTC*
  - **PR** #45299: (garethgreenaway) [2017.7] config gate auth_events (refs: #45358)
  - 541e59fa75 Merge pull request #45358 from UtahDave/gate_data_cache_refresh
  - 379b6cd23e should be *self*, not *salt*
  - a82e158f2d gate the minion data cache refresh events.
- **PR** #45297: (Ch3LL) Allow macosx service state tests to check for pid return @ *2018-01-09 20:47:24 UTC*
  - fb87010461 Merge pull request #45297 from Ch3LL/mac_service_state
  - 4e569b5802 Allow macosx service state tests to check for pid return
- **PR** #45351: (dmurphy18) Update debbuild to explicitly include source code for Debian, Ubuntu @ *2018-01-09 17:21:51 UTC*
  - beedf6e815 Merge pull request #45351 from dmurphy18/upd_debbuild
  - 478dc70092 Update debbuild flags
- **PR** #45299: (garethgreenaway) [2017.7] config gate auth_events (refs: #45358) @ *2018-01-09 15:00:30 UTC*
  - 66da9b47bc Merge pull request #45299 from garethgreenaway/config_gate_auth_events
  - 9a15ec3430 Updating versionadded string. Fixing typo.
  - edfc3dc078 Adding in documention for *auth_events* configuration option
  - 3ee4eabffd Fixing small typo

  - 6a28bddcc9 Adding some code to config gate if auth_events are sent
- **PR** #44856: (Ch3LL) Add state.running ssh integration test @ *2018-01-08 21:40:50 UTC*
  - 8d04c2b3d4 Merge pull request #44856 from Ch3LL/running_test
  - 9a35a73711 add time limit to while loop
  - aeb5f4e248 Add state.running ssh integration test
- **ISSUE** saltstack/salt-jenkins#675: (rallytime) [2017.7] unit.states.test_file.TestFileState.test_directory is failing on Fedora 27 and CentOS 6 (refs: #45295)
- **PR** #45295: (gtmanfred) test directory that doesn't exist @ *2018-01-08 20:59:53 UTC*
  - d0e5e70277 Merge pull request #45295 from gtmanfred/test_directory
  - e6178fe6d4 Merge branch `2017.7' into test_directory
  - 24114e91c1 test was different slightly on 2017.7
  - d20fc93625 test directory that doesn't exist
- **ISSUE** saltstack/salt-jenkins#678: (rallytime) [2017.7] Proxy Minion Tests for Py3 are failing (refs: #45302)
- **PR** #45302: (gtmanfred) fix proxy tests for py3 on 2017.7 @ *2018-01-08 17:41:58 UTC*
  - f49b204b75 Merge pull request #45302 from gtmanfred/proxyp3
  - b295ec0429 make dummy proxy module py3 compatible
  - 8736e21f65 fix starting proxy minion on py3
  - e2824a7253 fix py3 tests
- **PR** #45279: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ *2018-01-08 17:26:49 UTC*
  - eea7158e82 Merge pull request #45279 from rallytime/merge-2017.7
  - 8025b14584 Merge branch `2016.11' into `2017.7'
    * 1c5e905b61 Merge pull request #45256 from rallytime/bp-45034
      · 68f971b38f Apply test fixes from #45034 to parsers_test.py
      · 9454236694 Fix for pidfile removal logging
- **PR** #44853: (gtmanfred) remove not from vault utils @ *2018-01-05 17:43:18 UTC*
  - dab4a8cff3 Merge pull request #44853 from gtmanfred/vault
  - bfee1cead6 set role for loading minion config
  - c5af2e5048 if utils is not loaded, load it
  - 6a5e0f9ac1 remove not from vault utils
- **PR** #45277: (rallytime) Back-port #45025 to 2017.7 @ *2018-01-05 15:35:53 UTC*
  - **PR** #45025: (steverweber) Fix pillar include merge order (refs: #45277)
  - f09d0e5fdb Merge pull request #45277 from rallytime/bp-45025
  - 942c14bb29 pillar body overrides includes
  - 1152202fdc fix pillar includes from merging over the current sls defines
- **PR** #45276: (rallytime) Back-port #45260 to 2017.7 @ *2018-01-05 14:45:40 UTC*
  - **PR** #45260: (gtmanfred) Make some kitchen-salt tests blue (refs: #45276)

  - fc84f1104f Merge pull request #45276 from rallytime/bp-45260
  - 9ab1af738f switch kitchen-salt to use rsync transport to preserve symlinks
  - cf98ed472e fix up symlinks
- **ISSUE** #43340: (syphernl) Upgrading Salt via Salt results in dying minions and broken dpkg (refs: #45255)
- **PR** #45255: (rallytime) Back-port #44427 to 2017.7 @ *2018-01-04 21:46:17 UTC*
  - **PR** #44427: (samodid) use KillMode=process for salt-minion.service (refs: #45255)
  - ff9880c498 Merge pull request #45255 from rallytime/bp-44427
  - 6ceafbbf3a use KillMode=process for salt-minion.service
- **ISSUE** #23454: (HontoNoRoger) SLS rendering error with Salt-SSH (pydsl) (refs: #45251)
- **PR** #45251: (forksaber) Fix #23454 : make pydsl work with salt-ssh @ *2018-01-04 21:33:09 UTC*
  - e715eb603f Merge pull request #45251 from forksaber/salt-ssh-pydsl
  - b3660d5190 [#23454] make pydsl work with salt-ssh
- **PR** #45254: (Ch3LL) Add darwin value for ssh grain items tests on MacOSX @ *2018-01-04 21:31:35 UTC*
  - 2934b60d53 Merge pull request #45254 from Ch3LL/fix_mac_grain_ssh
  - b4b59b89cd remove platform from salt.utils call for 2017.7
  - 85e853a63d Add darwin value for ssh grain items tests on MacOSX
- **PR** #45135: (twangboy) Fix win_dacl problems with SIDs @ *2018-01-04 21:01:48 UTC*
  - af2d880303 Merge pull request #45135 from twangboy/win_fix_dacl
  - b31e08946a Merge branch `2017.7' into win_fix_dacl
  - 35a417f510 Fix win_dacl problems with SIDs
- **ISSUE** #43806: (Ch3LL) Add spm man Test to Auto Test Suite (refs: #44930)
- **PR** #44930: (frogunder) man_spm_test @ *2018-01-04 20:58:02 UTC*
  - d0a3770035 Merge pull request #44930 from frogunder/man_spm
  - 48e6953e1f fix_string_error
  - c9fa4ed2a7 man_spm_test
- **PR** #45259: (Ch3LL) Fix MacOSX Service Status Check and integration test @ *2018-01-04 14:25:01 UTC*
  - 543eebf411 Merge pull request #45259 from Ch3LL/fix-mac-service-test
  - 74e6ed60ea Fix MacOSX Service Status Check and integration test
- **PR** #45263: (sumeetisp) Updating python version for 2017.7 @ *2018-01-04 14:16:26 UTC*
  - bbbd1872a7 Merge pull request #45263 from sumeetisp/2017.7
  - e3a5ee3a08 Merge branch `2017.7' into 2017.7
  - 71aea9a3bc Merge pull request #1 from sumeetisp/sumeetisp-python-version
    * 1b4806e2b9 Updating python version
- **PR** #45244: (twangboy) Fix search/replace in Py3 @ *2018-01-04 14:02:22 UTC*
  - d46e1197be Merge pull request #45244 from twangboy/win_fix_portable.py
  - e3a8279c01 Get path to python binary based on executable

  - 03aec37040 Fix search/replace in Py3
- **PR** #45233: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ *2018-01-03 15:34:00 UTC*
  - eba360870a Merge pull request #45233 from rallytime/merge-2017.7
  - a3d251b2cd Merge branch `2016.11' into `2017.7'
    * b75f50afe3 Merge pull request #45235 from rallytime/bp-45209
      · 2d0a9bbf7e enable UsePAM for ssh tests
  - 5d9a1e91e9 Merge branch `2016.11' into `2017.7'
    * 3ab962b01a Merge pull request #44965 from gtmanfred/2016.11
      · a5d8a6340e check if VALUE is a string_type
    * 40fb30f63f Merge pull request #45232 from rasathus/2016.11
      · 7a2bd8f49b Merge branch `2016.11' into 2016.11
      · de53c45c29 Backport #27160 to 2016.11
- **PR** #45175: (amendlik) Pkg uptodate @ *2018-01-02 17:38:36 UTC*
  - 693cc807e8 Merge pull request #45175 from amendlik/pkg-uptodate
  - 4f514a29a7 Merge branch `2017.7' into pkg-uptodate
- **PR** #45226: (gtmanfred) Update kitchen to use runtests verifier on 2017.7 @ *2017-12-31 18:13:28 UTC*
  - 1b3f3ba1be Merge pull request #45226 from gtmanfred/2017.7
  - 4f3b089e0e fix copying back
  - f56f062a6a download xml for junit
  - 7cc342a5d6 use new runtests verifier
- **PR** #45221: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ *2017-12-30 18:08:29 UTC*
  - 7d3a6cbc65 Merge pull request #45221 from rallytime/merge-2017.7
  - 508599e159 Merge branch `2016.11' into `2017.7'
  - 707ef55175 Merge pull request #45161 from lomeroe/bp-44944_2016.11
    * 0a4c6b5a83 remove references to six.unichr
    * f3196d795d lint fixes for static regexes
    * 11b637d108 lint fixes
    * c14d6282ad do not decode registry.pol file wholesale, but instead decode individual elements of the file
  - 6f52034e08 Merge pull request #45199 from gtmanfred/status
    * fb07f9ea7d status.pid returns pid ids not process names
- **ISSUE** #45176: (thuhak) osquery execution module does't work with attrs parameter (refs: #45204)
- **PR** #45204: (garethgreenaway) [2017.7] Fixes to osquery module & addition of unit tests @ *2017-12-30 13:25:38 UTC*
  - abed378981 Merge pull request #45204 from garethgreenaway/45176_fixes_to_osquery_module
  - dc933e9e24 Fixing typo
  - d834bd1b6f Fixing some minor lint issues.

  - 4738205154 Fixing a bug when attributes are passed to various osquery module functions.
    * 66884334d9 Update states.pkg for Python3 compatibility
    * 2a7d76ad6e Fail pkg.uptodate if expected packages are not upgraded
    * 29ef67bac2 Test pkg.uptodate with failed upgrades
    * 23ab93353b Produce changes dict for pkg.uptodate dry-run mode
    * 7c67ec39d9 Add tests for pkg.uptodate state
- **PR** #45203: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ *2017-12-29 01:11:03 UTC*
  - 5991d8ca15 Merge pull request #45203 from rallytime/merge-2017.7
  - 430c913c8c Merge branch `2016.11' into `2017.7'
    * d3381e27d0 Merge pull request #45118 from garethgreenaway/44728_nodegroups_seq
      · 0ff811de70 Swapping import to be the old path for 2016.11
      · b3e2f388f5 Fix to allow nodegroups to include sequences
    * f969aca3a3 Merge pull request #45127 from twangboy/win_fix_pkg
      · 14639739f2 Fix issue with 1641 return code
    * dc357b39f0 Merge pull request #45137 from twangboy/win_fix_reg_tests
      · b6f4ef8d73 Catch correct error type in list_keys and list_values
    * 0aa1662731 Merge pull request #45130 from rallytime/api-groups
      · 2dcc8df845 Resolve groups for salt api
    * 7dc3cc4641 Merge pull request #45114 from twangboy/win_fix_pam
      · cf5eae1f77 Move pam library load to try/except block
- **PR** #45201: (rallytime) [2017.7] Check for running on python3 before decoding bytes @ *2017-12-28 22:59:14 UTC*
  - **PR** #45090: (angeloudy) fix TypeError in python 3 (refs: #45201)
  - 882267314f Merge pull request #45201 from rallytime/fix-jinja-template-test-failure
  - b4af3bdff8 Check for running on python3 before decoding bytes
- **PR** #45200: (rallytime) [2017.7] Fix docstring integration test failure @ *2017-12-28 22:58:34 UTC*
  - **PR** #44552: (Da-Juan) pip_state: Check if available upgrades fulfill version requirements. (refs: #45200)
  - 2e18398f12 Merge pull request #45200 from rallytime/fix-docstring-test-failure
  - a26d4795bd [2017.7] Fix docstring integration test failure
- **PR** #45186: (rallytime) Back-port #44922 to 2017.7 @ *2017-12-28 19:02:51 UTC*
  - **PR** #44922: (dincamihai) Fix salt-master for old psutil (refs: #45186)
  - 67d97303b5 Merge pull request #45186 from rallytime/bp-44922
  - 6970fe8103 Fix salt-master for old psutil
- **PR** #44624: (eliasp) Fix Traceback when using the *service.enabled* state on non-booted systems @ *2017-12-28 10:58:43 UTC*
  - 30d7f7257a Merge pull request #44624 from eliasp/fix-upstart-utmp-exception

  - 43d44e051a Do not blindly assume presence of either */var/run/utmp* or */run/utmp*, none of both might be available (e.g. on non-booted systems).

- **PR** #45183: (twangboy) Add libnacl dependency @ *2017-12-27 22:08:32 UTC*
  - 3832e7b227 Merge pull request #45183 from twangboy/win_add_libnacl_2017.7
  - b46845888d Add libnacl dependency
- **ISSUE** #44928: (rcallphin) Duplicating master token when no match for Minion policy (Vault Module) (refs: #44966)
- **PR** #44966: (rcallphin) Fix bug with vault runner creating token on empty policy @ *2017-12-22 20:30:37 UTC*
  - fbbf33574e Merge pull request #44966 from rcallphin/fix-bug-vault-empty-policy
  - 7f327ab760 Lint: Remove extra whitespace

  - 7572982419 Merge pull request #44943 from mvivaldi/filters-doc

  - d23ac4eabc Fix for the jinja documentation

- **ISSUE** #43417: (damon-atkins) win_pkg: pkg.install and pkg.remove general issues (refs: #44832, #43708)
- **PR** #44832: (damon-atkins) win_pkg: Merge full copy of 2016.11 with many fixes and improvements to 2017.7 @ *2017-12-12 18:30:06 UTC*
  - 465cacad83 Merge pull request #44832 from damon-atkins/2017.7_replace_with_newer_2016.11_win_pkg
  - a4f0b41ba2 Should be a smaller change set since recent update from 2016.11
  - 695334b201 Merge branch `2017.7_replace_with_newer_2016.11_win_pkg' of github.com:damon-atkins/salt into 2017.7_replace_with_newer_2016.11_win_pkg
    * 843e204582 Merge branch `2017.7' into 2017.7_replace_with_newer_2016.11_win_pkg
  - 4b60b1ec84 Merge remote branch `refs/remotes/upstream/2017.7' into 2017.7_replace_with_newer_2016.11_win_pkg
  - b46f818a57 Raise a PR to fix 2016 issues commited here, fixed issues with merge.
  - 32ef1e12ae Merge branch `2017.7' into 2017.7_replace_with_newer_2016.11_win_pkg
  - 494835c3f2 I backported develop and applied a long list of fixes to 2016.11 this brings these fixes into 2017.7 - Software was not always being removed, general if & was in the string or msi was downloaded to uninstall the software - pkg.list_upgrades failed. Added support for `latest' and `Not Found' for version_cmp() to fix this. - output fixes - pkg.list_available no longer forces a pkg.refresh_db this is no longer required, as by default it will update if older than 6 hours - cmd /s /c is prefixed for all commands i.e. installs and removes. - cmd are now strings, instead of a list when using cmd.run. As windows only supports strings. And the '' were being broken
- **PR** #44754: (twangboy) Fix inet_pton for Windows on Py3 @ *2017-12-12 14:04:20 UTC*
  - a811a92b17 Merge pull request #44754 from twangboy/win_fix_inet_pton
  - 25a20109fe Merge branch `2017.7' into win_fix_inet_pton
  - 849b99eb34 Merge branch `2017.7' into win_fix_inet_pton
  - df1e6a202b Use salt.ext.six
  - 5ac8112585 Use six to ensure unicode value
  - 9b5d8c421b Handle unicode values
- **PR** #44931: (pkruk) add missing parenthis to keep integration with python3 @ *2017-12-12 13:49:39 UTC*
  - 53b34e24cd Merge pull request #44931 from pkruk/fix-missing-parenthis
  - b1ed739b44 Merge branch `2017.7' into fix-missing-parenthis
  - 4f1b1f12d2 Merge branch `fix-missing-parenthis' of https://github.com/pkruk/salt into fix-missing-parenthis
    * 3475d3fa01 add missing parenthis to keep integration with python3
  - adf38cacfb add missing parenthis to keep integration with python3
    * ad55e33f57 libcloud_dns: fix state output
    * a68d594e3a libcloud_dns: copy args before deleting from them
- **PR** #44891: (twangboy) Fix issue with unsafe path in Windows jenkins tests @ *2017-12-11 21:10:43 UTC*
  - ba6146250a Merge pull request #44891 from twangboy/win_fix_verify
  - 7232579167 Allow test suite file_roots as a safe path

- **PR** #44921: (Ch3LL) Add test to ensure log files are created @ *2017-12-11 18:24:16 UTC*
  - 85160fd297 Merge pull request #44921 from Ch3LL/log_test
  - 3bb58fb577 skip salt-key log creation test
  - 6a379195bc Add test to ensure log files are created
- **PR** #44787: (rallytime) GroupAdd test: Add destructive test decorator to entire class @ *2017-12-11 18:14:18 UTC*
  - 54d29a61cb Merge pull request #44787 from rallytime/groupadd-destructive-clean
  - 817ac002b0 Add destructive test decorator to test class
- **ISSUE** #44665: (mvivaldi) Documentation of salt renders jinja (refs: #44943, #44895)
- **PR** #44895: (mvivaldi) Jinja Filters doc @ *2017-12-11 15:32:07 UTC*
  - 0292e3612a Merge pull request #44895 from mvivaldi/filters-doc
  - 62409d608a Added Escape Filters and Set Theory Filters in jinja documentation
- **PR** #44879: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ *2017-12-10 16:53:44 UTC*
  - **PR** #44855: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 (refs: #44879)
  - df28f312ac Merge pull request #44879 from rallytime/merge-2017.7
  - 23c5a4ca3e Merge branch `2016.11' into `2017.7'
    * bb1f8dceaf Merge pull request #44579 from roaldnefs/fix-cron-identifier
      · df73a4c051 Merge branch `2016.11' into fix-cron-identifier
    * af0131fa1f Merge pull request #44852 from damon-atkins/2016.11_win_pkg_typo_n_fix
      · 0e7c19084f Lint: Remove extra whitespace
      · 7c7e21f94d Fix spelling typo, and fix backwards campatible minion option for repo location
    * 88c0d66b4e Merge pull request #44794 from terminalmage/issue44365
      · 3b8b6f25e6 Remove debugging line
      · 153bf45b03 Fix regression in file.managed when source_hash used with local file
    * c8bb9dfbbb Merge pull request #44738 from rallytime/bump-oxygen-warnings
      · ead3c569e1 Bump deprecation warnings from Oxygen to Fluorine
    * 88e3aab00d Merge pull request #44741 from gtmanfred/rhip
      · 439dc8dce6 if gateway is not specified use iface
      · 3ec4329307 Merge branch `2016.11' into fix-cron-identifier
      · 99fa05a456 Fix for bug in cron state
      · 97328faeac Fix for bug in cron module
- **PR** #44880: (UtahDave) Determine windows hardware arch correctly @ *2017-12-08 22:24:09 UTC*
  - 8e14bc3941 Merge pull request #44880 from UtahDave/2017.7local
  - 6e3c7ac1ac Merge branch `2017.7' into 2017.7local
- **PR** #44861: (twangboy) Fix win_lgpo for unknown values (refs: #45327) @ *2017-12-08 18:52:05 UTC*
  - dc51174670 Merge pull request #44861 from twangboy/win_fix_lgpo_invalid_value

  - 89f65e19ff Check for values other than 0 or 1

- **PR** #44621: (isbm) Bugfix: errors in external pillar causes crash, instead of report of them @ *2017-12-08 18:46:56 UTC*
  - f5a143f8c5 Merge pull request #44621 from isbm/isbm-bsc1068446-2017.7
  - 0d2675c4fe Use variable, instead of direct value
  - 1ddc47da0a Add unit test for _get_pillar_errors when external pillar is clean and internal contains errors
  - 68480d5dc9 Add unit test for _get_pillar_errors when both external and internal pillars contains errors
  - 218a59e93b Add unit test for _get_pillar_errors when external pillar has errors and internal is clean
  - 3ce19356c2 Add unit test for _get_pillar_errors when external and internal pillars are clean
  - 67034139d9 Fix unit test: wrong error types in side effect
  - d9359bca13 Bugfix: unit test mistakenly expects pillar errors as a string, while it is a list
  - 8c2bdc696b Bugfix: do not pull `_errors' from unchecked objects
  - d5e30999c7 Remove unused variable (no exception, within the try/finally block)
  - aad668d559 Fix and clarify docstring.
  - c2c47e4e71 Rename function from ambiguous name
  - 265de8e61c Bugfix the logic according to the exact described purpose of the function.
    * dae9c6aa5c Determine windows hardware arch correctly
- **PR** #43379: (twangboy) Fix file.managed on Windows with test=True @ *2017-12-07 21:10:43 UTC*
  - abe089ad54 Merge pull request #43379 from twangboy/win_fix_file.managed
  - edcd581ca5 Merge branch `2017.7' into win_fix_file.managed
  - a27bb6993a Fix py3 error
  - 0ff9fa498a Fix test_directory
  - 187bc1e61e Add back the try/finally blocks
  - d7241d004f Fix 2 more tests
  - d5dd42aebe Fix integration tests for Windows
  - d56bc9aae9 Fix typo
  - af5565859e Use file functions for symlink and remove
  - 72ac59c991 Fix some more integration tests for Linux
  - 3f0499cbc4 Fix some integration tests
  - a24b964ea5 Fix unit test to handle new Exception
  - e3c3845f73 Raise CommandExecutionError when file doesn't exist
  - 4602f499a2 Remove loader module mixin, add linux paths
  - 99b27c037f Add tests to avoid future regression
  - 5c215ed8c2 Fix documentation formatting
  - 6a4e77e4b9 Return empty or unmodified dict on file not found
- **ISSUE** #44565: (arthurlogilab) NameError: global name `__jid_event__' is not defined when running a runner in the scheduler (refs: #44570)

- **PR** #44570: (gtmanfred) Include client mixin globals in scheduler for runner modules @ *2017-12-07 20:23:33 UTC*
  - cf4cbcd340 Merge pull request #44570 from gtmanfred/2017.7
  - 7b17f9f63c Merge branch `2017.7' into 2017.7
- **PR** #44494: (skizunov) Fix broken *beacons_before_connect* feature @ *2017-12-07 18:24:49 UTC*
  - **PR** #38289: (skizunov) Add config options for running beacons/scheduler before connect (refs: #44494)
  - febb913743 Merge pull request #44494 from skizunov/develop2
  - 7adcfbf8ec Merge branch `2017.7' into develop2
- **ISSUE** #44298: (skjaro) ipset state check problem (refs: #44356)
- **ISSUE** #39552: (Xiami2012) ipset.check new implementation by @lingonl has countless critical bugs (refs: #44356)
- **PR** #44512: (rallytime) Back-port #44356 to 2017.7 @ *2017-12-07 14:44:50 UTC*
  - **PR** #44356: (skjaro) Fix ipset state with multiple entries and subtypes separated with comma (refs: #44512)
  - 284a817565 Merge pull request #44512 from rallytime/bp-44356
  - 6f92c71834 Merge branch `2017.7' into bp-44356
  - 9a325146df Fix lint violation
  - 5aac729855 Fix check multiple entries with subtypes separated with comma
- **PR** #44748: (twangboy) Fix auto login support for OSX @ *2017-12-07 14:22:23 UTC*
  - 74ee7ce541 Merge pull request #44748 from twangboy/osx_fix_auto_login
  - 068e463870 Fix lint, add integration tests
  - 3df886df75 Fix lint, add gtmanfreds change
  - 16cb24614f Add kcpassword functionality
- **PR** #44842: (twangboy) Win fix lgpo unicode on Py3 issue @ *2017-12-07 14:21:14 UTC*
  - b60cca174c Merge pull request #44842 from twangboy/win_fix_lgpo
  - efe77999d1 Gate log.debug statement behind successful pop
  - 1c0ec79cd1 Fix py3 issue
- **PR** #44843: (twangboy) Fix 2 typos in lgpo module @ *2017-12-06 17:56:44 UTC*
  - bb58e2fec0 Merge pull request #44843 from twangboy/win_fix_lgpo_typo
  - c8f93e6dd7 Fix 2 types, shorten line lengths for spellchecking
- **PR** #44827: (mz-bmcqueen) add more clone options to virtualbox and add better dhcp handling @ *2017-12-06 15:02:23 UTC*
  - d6c37ea19c Merge pull request #44827 from mz-bmcqueen/2017.7
  - 4ead3014b7 Merge branch `2017.7' into 2017.7
  - b7ce154014 Merge branch `2017.7' of https://github.com/mz-bmcqueen/salt into 2017.7
    - 2f80f431b3 Merge branch `2017.7' into 2017.7
  - c2018c9021 fix pylint complaints

  - c38ff74261 add more clone options to virtualbox and add better dhcp handling
- **PR** #44824: (Ch3LL) Add spm -y and -f arg integration tests @ *2017-12-05 21:49:32 UTC*
  - 019169ed61 Merge pull request #44824 from Ch3LL/spm_args
  - d8f81d2e4d fix pylint
  - 61ac5cf157 Add spm -y and -f arg integration tests
- **PR** #44742: (Ch3LL) Add salt-cloud action rename integration test @ *2017-12-05 17:44:50 UTC*
  - 59b930668c Merge pull request #44742 from Ch3LL/cloud_action_test
  - 951d09ca2f remove unnecessary try/except block
  - c329ced7ee Add salt-cloud action rename integration test
- **ISSUE** #42676: (mind-code) Changes in Pillar defined Beacons only apply after Minion restart (refs: #44771)
- **PR** #44771: (garethgreenaway) [2017.7] Back porting #44071 @ *2017-12-05 17:16:06 UTC*
  - **PR** #44071: (garethgreenaway) [develop] Various fixes to beacons (refs: #44771)
  - 10442d9211 Merge pull request #44771 from garethgreenaway/42676_backport_44071
  - ec2a8b2032 Merge branch `2017.7' into 42676_backport_44071
  - 180971203e Updating minion to respond to list_available events for beacons
  - db6fcefe62 Adding list_available which is used by the add function to verify that a becaon exists.
  - e9e0318bc6 Backporting fixes related to having beacons in pillar from #44071
- **PR** #44784: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ *2017-12-05 17:13:49 UTC*
  - **PR** #44732: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 (refs: #44784)
  - 23d151b40a Merge pull request #44784 from rallytime/merge-2017.7-1
  - 3d9eafc4bd Lint: Remove extra empty lines at end of files
  - 239f3511bf Merge branch `2016.11' into `2017.7'
    * 97e0cf569c Merge pull request #44699 from jfindlay/attr_file
      · 9e5a40ea7c Merge branch `2016.11' into attr_file

    - a0d08598bf dco fix
    - 9467899fc6 Merge remote branch `upstream/2016.11' into 2016.11_43417_Backport_and_Fixes
    - 6dc180fd0e doco fixes
    - 2496a42ea4 lint fix
    - 2c937fbe19 Merge remote branch `upstream/2016.11' into 2016.11_43417_Backport_and_Fixes
    - c9c8c48a4d all remove/install commands are passed to cmd.exe /s /c and commands are passed as strings to cmdmod

        - 350244bd93 typo in comments and doc strings.
        - ec31f5a9bd 2017.11/develop version() was ignoring saltenv setting.
        - b314549a32 Backport of devlop to 2016.11 with additional bug fixes
    * 68ea22188e Merge pull request #44477 from rallytime/bp-44424
        - 4a9f8dcc96 Fix #44423: Handle index=None and index=0 distinctly
    * 2c89050a24 Merge pull request #44483 from terminalmage/issue44034
        - a9db8becea salt-call: account for instances where __pillar__ is empty
    * b5c2028680 Merge pull request #44489 from whytewolf/1956_log-granular-levels
        - 9cdeb4e903 update log-granular-levels to describe what they are filtering on
    * ea07f9c54c Merge pull request #44193 from twangboy/win_fix_reg
        - 44d6d9f46d Remove unused import (lint)
        - f7502436bd Fix various issues
        - 221e6e3b91 make salt.utils.to_unicode return none when passed none
        - ce41acc788 Fix many issues with reg.py
        - 4a19df1f7f Use six.text_type instead of str
        - 1b12acd303 Check type before casting
        - 03fa37b445 Cast vdata to it's proper type
    * ed8da2450b Merge pull request #43863 from nicholasmhughes/fix-atomicfile-permission-copy
        - ea852ec5d3 remove index use with stat module attributes
        - dbeeb0e917 fixes #38452 atomicfile only copies mode and not user/group perms

- **PR** #44788: (kris-anderson) Example yaml of influxdb_user state @ *2017-12-04 14:28:45 UTC*
  - 4643a112e7 Merge pull request #44788 from kris-anderson/example-yaml-of-influxdb-user-state
  - afd23d058c converted yaml example to use 2 spaces
  - 29e410c1ea added a code-block example of how the yaml should be formatted
- **ISSUE** #42713: (boltronics) 2017.7.0 master upgrade breaks mine data on non-glob matching on minions (refs: #44735)
- **PR** #44735: (gracinet) Backported issue #42713 to 2017.7 @ *2017-12-04 01:43:23 UTC*
  - 4ebac09f60 Merge pull request #44735 from gracinet/42713_backport_2017.7
  - 6806d83314 Merge branch `2017.7' into 42713_backport_2017.7
  - fb586c6dce Backported issue #42713 to 2017.7
- **PR** #44766: (twangboy) Fix *unit.utils.test_process* for Windows @ *2017-12-02 13:15:53 UTC*
  - 06ce7b7328 Merge pull request #44766 from twangboy/win_fix_test_process
  - a5737e8fc3 Fix lint errors
  - be96de09cc Fix pickling error by decorating
- **ISSUE** #44083: (ari) timezone.system fails when /etc/localtime is missing on FreeBSD (refs: #44605)
- **PR** #44716: (rallytime) Back-port #44605 to 2017.7 @ *2017-12-01 23:12:24 UTC*

  - **PR** #44605: (campbellmc) Add handling for FreeBSD in timezone.zone_compare (refs: #44716)
  - f8b8a8966d Merge pull request #44716 from rallytime/bp-44605
  - 9d43221422 Correct indentation
  - d6e28ebed1 Add handling for FreeBSD in method zone_compare to avoid exception when /etc/localtime file does is absent. This is valid configuration on FreeBSD and represents UTC.
- **ISSUE** #41869: (mirceaulinic) Thorium: unable to execute runners (refs: #44781)
- **PR** #44781: (mirceaulinic) Correct the thorium runner @ *2017-12-01 22:55:52 UTC*
  - 8ed6287762 Merge pull request #44781 from cloudflare/thorium-fix-41869
  - 83c73a69cb Instance the Runner class instead of the RunnerClient as we're running on the Master
  - b72b7c5402 Correct the thorium runner
- **PR** #44466: (twangboy) Fix *unit.modules.test_disk* for Windows @ *2017-12-01 22:31:42 UTC*
  - 52596be102 Merge pull request #44466 from twangboy/win_fix_test_disk
  - 5615862f23 Fix some lint
  - 627d5ab0c9 Mock *salt.utils.which*
  - e5a96fe00f Skip test_fstype on Windows
- **ISSUE** #42763: (xuhcc) acme.cert state falsely reports about renewed certificate (refs: #44667)
- **PR** #44719: (rallytime) Back-port #44667 to 2017.7 @ *2017-12-01 15:20:49 UTC*
  - **PR** #44667: (oarmstrong) Fix acme.cert to run certbot non-interactively (refs: #44719)
  - b9ad4bba2d Merge pull request #44719 from rallytime/bp-44667
  - 3d85a260c4 Fix acme.cert to run certbot non-interactively
- **ISSUE** #44744: (brmzkw) roster_defaults breaks salt-ssh globbing (refs: #44747)
- **PR** #44747: (gtmanfred) use a copy so roster_defaults doesn't mangle @ *2017-12-01 15:13:48 UTC*
  - d23192c492 Merge pull request #44747 from gtmanfred/roster_defaults
  - 911411ed8f add unit test
  - eefcfc719c use a copy so roster_defaults doesn't mangle
- **ISSUE** #44694: (thuhak) state module at.absent does't work (refs: #44717)
- **PR** #44717: (garethgreenaway) [2017.7] Fixes to at module @ *2017-12-01 14:37:05 UTC*
  - 20f20ad9e1 Merge pull request #44717 from garethgreenaway/44694_at_absent_failing_to_find_jobs
  - 1f2b3c5f46 Merge branch `2017.7' into 44694_at_absent_failing_to_find_jobs
  - 3bb385b44e removing debugging logging
  - 7f0ff5a8b0 When passing IDs on the command line convert them all the strings for later comparision.
  - 99e436add4 When looking for job ids to remove based on the tag_name the comparision was comparing an INT to a STR, so the correct job id was not being returned.
- **ISSUE** #44136: (dupsatou) KeyError: `runas' after updating to latest salt in yum repo. (refs: #44695)
- **PR** #44695: (gtmanfred) pop None for runas and runas_password @ *2017-12-01 14:35:01 UTC*
  - 6e61aa787f Merge pull request #44695 from gtmanfred/pop
  - 0efb90b6f7 Merge branch `2017.7' into pop

- **PR** #44725: (whytewolf) document note suggesting systemd-run --scope with cmd.run_bg @ *2017-11-30 19:18:06 UTC*
  - 20391c54c0 Merge pull request #44725 from whytewolf/1919_cmd.run_no_daemons
  - 4b11f8d66d add quick documentation suggesting systemd-run --scope if using cmd.run_bg with systemd
- **ISSUE** #42300: (mirceaulinic) Grains state doesn't work (fine) with proxy minions (refs: #44760)
- **ISSUE** #42074: (mirceaulinic) How to configure static grains for proxy minions (refs: #44549)
- **PR** #44760: (mirceaulinic) Fix the grains.setvals execution function when working with proxy minions @ *2017-11-30 18:27:02 UTC*
  - **PR** #44549: (mirceaulinic) Allow proxy minions to load static grains (refs: #44760)
  - 85451ae977 Merge pull request #44760 from cloudflare/px-grains-set-42300
  - 655139d01c Different path to the static grains file when running under a proxy minion
  - 3eec8dbc63 Dummy proxy: catch EOFError instead of IOError
- **ISSUE** #44583: (creideiki) Using splay in cron schedule throws exception ``unsupported operand type(s) for +: `NoneType' and `int'" (refs: #44640)
- **PR** #44640: (vutny) Fix #44583: splay with cron-like scheduled jobs @ *2017-11-30 15:30:41 UTC*
  - 06fb80b69c Merge pull request #44640 from vutny/fix-cron-schedule-splay
  - d1f247e49e Add basic unit tests for schedule util eval func
  - 6ff8e75ac6 Fix #44583: splay with cron-like scheduled jobs
- **PR** #44712: (Ch3LL) Add pillar ssh integration tests @ *2017-11-30 15:29:33 UTC*
  - e5a1401b82 Merge pull request #44712 from Ch3LL/ssh_pillar_items
  - 97ec0e6ea0 Merge branch `2017.7' into ssh_pillar_items
  - c7f5af1274 Add pillar ssh integration tests
- **PR** #44763: (mirceaulinic) Just a small improvement to the Thorium documentation @ *2017-11-30 14:38:03 UTC*
  - 2e1c946990 Merge pull request #44763 from cloudflare/thorium-doc
  - f8d69dd0ba Add thorium_roots configuration example
  - 4610fb4e62 thorium_roots not thorium_roots_dir
- **PR** #44531: (mirceaulinic) Add deprecation notes for the NAPALM native templates @ *2017-11-30 14:18:56 UTC*
  - 8ba2df1ea0 Merge pull request #44531 from cloudflare/deprecate-napalm-tpl
  - b462776d8b Add deprecation notes for the NAPALM native templates
- **PR** #44737: (twangboy) Skip *unit.transport.test_ipc* for Windows @ *2017-11-29 19:18:21 UTC*
  - 7bde48282e Merge pull request #44737 from twangboy/win_skip_test_ipc
  - 4e0359b603 Skip IPC transport tests in Windows, not supported
- **PR** #44629: (Ch3LL) Add masterless state.highstate integration test @ *2017-11-29 19:05:23 UTC*
  - c5206113ce Merge pull request #44629 from Ch3LL/high_masterless
  - 9b7421b261 Change check to the state id

  - 9cc853e3d5 Add masterless state.highstate integration test
- **PR** #44613: (Ch3LL) Add pillar.items test for masterless @ *2017-11-29 14:43:11 UTC*
  - 2dc3e5c42a Merge pull request #44613 from Ch3LL/pillar_masterless
  - 2c2e1e2332 Merge branch `2017.7' into pillar_masterless
  - 69134e83ca Change order of local kwarg in run_call method
  - b3b5ecc6ff Add pillar.items test for masterless
- **PR** #44659: (Ch3LL) Add state.sls_id to ssh wrapper and tests @ *2017-11-29 14:41:47 UTC*
  - cc05481026 Merge pull request #44659 from Ch3LL/ssh_sls_id
  - 04b5a3dd4e Add state.sls_id to ssh wrapper and tests
- **PR** #44698: (Ch3LL) Add salt-ssh mine.get integration test @ *2017-11-28 22:15:29 UTC*
  - 642eed11e1 Merge pull request #44698 from Ch3LL/mine_ssh
  - f6a72acfe3 Merge branch `2017.7' into mine_ssh
  - 9e67babf85 Add teardown to remove ssh dir
  - f90b4f7653 Add salt-ssh mine.get integration test
- **PR** #44697: (Ch3LL) Sort the show_top results for test_state_show_top test @ *2017-11-28 20:35:41 UTC*
  - 5d82df5667 Merge pull request #44697 from Ch3LL/show_top_test
  - 974db59dc1 convert the assert to a union set instead
  - add43c4cfe Sort the show_top results for test_state_show_top test
- **PR** #44608: (Ch3LL) Add jinja to ssh sls test file @ *2017-11-27 22:00:28 UTC*
  - f2f6817e86 Merge pull request #44608 from Ch3LL/ssh_jinja
  - df669b551d Merge branch `2017.7' into ssh_jinja
  - ca97517795 Add jinja to ssh sls test file
- **ISSUE** #33957: (ghost) grains.setval doesn't setval if set in /etc/salt/minion (refs: #44663)
- **PR** #44663: (whytewolf) Update notes around grains topic, and salt.modules.grains and salt.state.grains @ *2017-11-27 21:33:38 UTC*
  - 04b97bcfad Merge pull request #44663 from whytewolf/ZD1777_ensure_understanding_of_minion_config_over_grains_fi
  - c9122e4b85 fixed pylint error, and updated description on at the top the the module and state.
  - 7fb208b5ad Update note in topics/grains to reflect that not all grains are ignored. only those set in the minion config
- **PR** #44332: (mirceaulinic) Improve the net.load_config execution function @ *2017-11-27 21:22:18 UTC*
  - 364deee6ac Merge pull request #44332 from cloudflare/improve-net-load
  - cd0bac87e6 Merge branch `2017.7' into improve-net-load
  - 6d861f9a74 Disable pylint warning
  - 3a0945ce3d Merge pull request #11 from tonybaloney/gh_44332_clone
    * 88ef9f18fc ignore lint error on import
    * 25427d845e convert key iterator to list as python 3 wont index an iterator
  - bce50154e5 Merge branch `2017.7' into improve-net-load

    - ba4a62769c Fix trailing spaces
    - 0a47a7acbf Merge pull request #10 from tonybaloney/gh_44332_clone
        * ba0280e727 linting updates
        * 78b90f3d0c add remaining tests
        * 386c4e5791 add tests for all the getters
    - f3d2d1aaaa Merge pull request #9 from tonybaloney/gh_44332_clone
        * c63222358b update tests with correct assertions and mock methods on device instance
        * b69c559c52 fix kwargs typo
    - edea76d3f3 Improve the net.load_config function
- **PR** #44664: (mvivaldi) Patch 1 @ *2017-11-27 21:17:20 UTC*
    - b6a1ed06b8 Merge pull request #44664 from mvivaldi/patch-1
    - 4551999ec7 Update jinja.py
    - ae13d57307 Update file.py
- **ISSUE** #42074: (mirceaulinic) How to configure static grains for proxy minions (refs: #44549)
- **PR** #44549: (mirceaulinic) Allow proxy minions to load static grains (refs: #44760) @ *2017-11-27 20:57:09 UTC*
    - 9ea4ee1479 Merge pull request #44549 from cloudflare/fix-proxy-grains
    - 7b03574ab6 Merge branch `2017.7' into fix-proxy-grains
    - 0320174ea4 Add doc note regarding static grains on proxy minions
    - 509d1af832 Allow proxy minions to load static grains
- **PR** #44572: (Ch3LL) Add watch_in integration test @ *2017-11-27 20:52:31 UTC*
    - 5ec7ea0bb5 Merge pull request #44572 from Ch3LL/watchin_test
    - 0a54584ddb Merge branch `2017.7' into watchin_test
    - 898c28e6d9 Merge branch `2017.7' into watchin_test
    - 3df70f3fed remove iter for watch_in failure test
    - ac437ddf90 add order check and remove iter
    - 5f2b4f434e Add watch_in integration test
        * c6733ac1ee pop None
- **PR** #44616: (Ch3LL) Add Non Base Environement salt:// source integration test @ *2017-11-22 16:13:54 UTC*
    - d6ccf4bb30 Merge pull request #44616 from Ch3LL/nonbase_test
    - 80b71652e3 Merge branch `2017.7' into nonbase_test
    - c9ba33432e Add Non Base Environement salt:// source integration test
- **PR** #44617: (Ch3LL) Add ssh thin_dir integration test @ *2017-11-22 16:12:51 UTC*
    - 3ace504c8c Merge pull request #44617 from Ch3LL/thindir_ssh
    - 071a1bd65b Merge branch `2017.7' into thindir_ssh
- **PR** #44625: (Ch3LL) Add salt-key -d integration test @ *2017-11-22 03:15:23 UTC*
    - 2cd618f99b Merge pull request #44625 from Ch3LL/delete_key_test

  - 443dc1e16b Merge branch `2017.7' into delete_key_test

- **ISSUE** #44601: (rallytime) CherryPy 12.0 removed support for ``engine.timeout_monitor.on'' config option (refs: #44602)
- **PR** #44614: (rallytime) [2017.7] Move PR #44602 forward to 2017.7 @ *2017-11-21 21:21:06 UTC*
  - **PR** #44602: (rallytime) Handle timeout_monitor attribute error for new versions of CherryPy (refs: #44614)
  - 4f30e845ee Merge pull request #44614 from rallytime/44602-2017.7
  - 628f015c1b Move TimoutError check lower down in exception list
  - d26d9ff5e4 Handle timeout_monitor/TimeoutError issues for new versions of CherryPy
  - 359a59dd64 Add salt-key -d integration test
  - 74ededafa7 Add ssh thin_dir integration test
    * 4d0806e28c Merge branch `2017.7' into develop2
    * 4d0d023115 Fix broken *beacons_before_connect* feature
      · 98536110d9 Merge branch `2017.7' into 2017.7
- **PR** #44571: (rallytime) Back-port #43822 to 2017.7 @ *2017-11-20 19:01:26 UTC*
  - **PR** #43822: (chnrxn) check_result: Correctly check the __extend__ state. (refs: #44571)
  - 136b9e3bc4 Merge pull request #44571 from rallytime/bp-43822
  - f81bb61f2d check_result: Correctly check the __extend__ state.
- **PR** #44588: (rallytime) Add documentation about logging before modules are loaded @ *2017-11-20 18:43:18 UTC*
  - **PR** #44576: (rallytime) Remove logging from top of napalm util file (refs: #44588)
  - **PR** #44439: (mirceaulinic) Adapt napalm modules to the new library structure (refs: #44576)
  - bea7f65291 Merge pull request #44588 from rallytime/logging-in-virtual-funcs
  - 90d1cb221d Add documentation about logging before modules are loaded
- **PR** #44513: (rallytime) Back-port #44472 to 2017.7 @ *2017-11-20 16:09:02 UTC*
  - **PR** #44472: (mephi42) nova: fix endpoint URL determination in _v3_setup() (refs: #44513)
  - a8044b73c3 Merge pull request #44513 from rallytime/bp-44472
  - 6e00e415d3 nova: fix endpoint URL determination in _v3_setup()
- **PR** #44596: (roaldnefs) Fixed Mattermost module documentation @ *2017-11-19 23:30:53 UTC*
  - f55b9daa63 Merge pull request #44596 from roaldnefs/fix-mattermost-doc
  - 549f4806ce Fixed documentation in Mattermost module
- **PR** #44528: (tkwilliams) INFRA-5978 - fix for https://github.com/saltstack/salt/issues/44290 @ *2017-11-17 17:35:44 UTC*
  - f84a2b5ab1 Merge pull request #44528 from bodhi-space/infra5978
  - ba1d57f5eb Merge branch `2017.7' into infra5978
  - 021692b6c9 INFRA-5978 - pylint / whitespace fix
  - c2210aaf7c INFRA-5978 - fix for https://github.com/saltstack/salt/issues/44290

- **PR** #44537: (Ch3LL) Add multiple salt-ssh state integration tests @ *2017-11-17 17:17:48 UTC*
  - 7f2dd0382c Merge pull request #44537 from Ch3LL/ssh_highlow
  - b98df6de24 Add known_hosts_file to salt-ssh opts_pkg in wfuncs
  - 913eedc699 Add multiple salt-ssh state integration tests
- **PR** #44576: (rallytime) Remove logging from top of napalm util file (refs: #44588) @ *2017-11-17 14:55:13 UTC*
  - **PR** #44439: (mirceaulinic) Adapt napalm modules to the new library structure (refs: #44576)
  - 1975fb41bc Merge pull request #44576 from rallytime/remove-napalm-logging
  - eb91af999e Remove logging from top of napalm util file
- **PR** #44575: (Ch3LL) Add service.running integration state test @ *2017-11-16 22:27:57 UTC*
  - c2c3048f46 Merge pull request #44575 from Ch3LL/ser_run_test
  - 7536150567 Add service.running integration state test
- **PR** #44518: (twangboy) Pass root_dir to the win_verify_env function @ *2017-11-16 20:57:49 UTC*
  - 24b1d7af31 Merge pull request #44518 from twangboy/win_fix_verify_env
  - 47114fdb30 Pass root_dirs to the win_verify_env function
    - 3385f7faf3 fix pylint
    - a2af3cb857 Include client mixin globals in scheduler for runner modules
- **PR** #44551: (mirceaulinic) Removes proxy minions false alarms and security risks @ *2017-11-16 15:09:14 UTC*
  - 1643bb7fd4 Merge pull request #44551 from cloudflare/annoying-tmpnam
  - ce1882943d Use salt.utils.files.mkstemp() instead
  - 6689bd3b2d Dont use dangerous os.tmpnam
  - 2d6176b0bc Fx2 proxy minion: clean return, like all the other modules
- **ISSUE** #30454: (favoretti) Using yaml serializer inside jinja template results in unicode being prepended by `!!python/unicode' (refs: #30481, #42064, #38554)
- **PR** #44541: (terminalmage) Fix test to reflect changes in YAML dumper @ *2017-11-15 13:23:58 UTC*
  - **PR** #42064: (The-Loeki) utils.jinja: use utils.yamldumper for safe yaml dumping (refs: #44541)
  - **PR** #38554: (multani) Fix YAML deserialization of unicode (refs: #42064)
  - **PR** #30481: (basepi) Add yaml_safe jinja filter (refs: #38554)
  - 60083ac27b Merge pull request #44541 from terminalmage/fix-yaml-test
  - 5b8f54084b Merge branch `2017.7' into fix-yaml-test
- **PR** #44538: (gtmanfred) Fix up some test kitchen stuff @ *2017-11-14 20:36:56 UTC*
  - 5c123eb551 Merge pull request #44538 from gtmanfred/kitchen
  - 3e04d2d44c use kitchen-sync for copying files
  - 9bc70fd31b back up to 2017.7.1 for kitchen tests
  - 3b93ea058b ubuntu 14 and centos 6 should not have py3 tests
  - 958e1aeb8d Fix test to reflect changes in YAML dumper
- **ISSUE** #30454: (favoretti) Using yaml serializer inside jinja template results in unicode being prepended by `!!python/unicode' (refs: #30481, #42064, #38554)

- **PR** #42064: (The-Loeki) utils.jinja: use utils.yamldumper for safe yaml dumping (refs: #44541) @ *2017-11-13 19:45:14 UTC*
  - **PR** #38554: (multani) Fix YAML deserialization of unicode (refs: #42064)
  - **PR** #30481: (basepi) Add yaml_safe jinja filter (refs: #38554)
  - 27a7b607b1 Merge pull request #42064 from The-Loeki/jinja_unicode
  - b1cf43c02d Merge branch `2017.7' into jinja_unicode
  - 8c2ac58523 Merge branch `2017.7' into jinja_unicode
  - 57dc6226a2 Merge branch `2017.7' into jinja_unicode
  - 0a8346b585 Merge branch `2017.7' into jinja_unicode
  - 393fe061b2 jinja utils: yaml import still necessary
  - 3c9130f9f0 utils.jinja: use utils.yamldumper for safe yaml dumping
- **PR** #43692: (mirceaulinic) Addressing a bug in the network find runner @ *2017-11-13 19:42:24 UTC*
  - b1f14c7518 Merge pull request #43692 from cloudflare/fix-net-runner
  - 02ffb4f38e Merge branch `2017.7' into fix-net-runner
  - 4b2f791bd2 Check if addr is short IPv6
  - 765504c137 Add all the possible keys to the result
- **ISSUE** #42393: (The-Loeki) pillarenv ignored with Salt Master pillar_cache: True (refs: #43689)
- **ISSUE** #36153: (krcroft) Pillarenv doesn't allow using separate pillar environments (refs: #43689)
- **PR** #43689: (The-Loeki) make cached pillars use pillarenv rather than saltenv @ *2017-11-13 19:30:00 UTC*
  - 1e94a5bd5f Merge pull request #43689 from The-Loeki/cached_pilarenv
  - 395c0c424d Merge branch `2017.7' into cached_pilarenv
  - 60e001733b make cached pillars use pillarenv rather than saltenv
- **PR** #43837: (twangboy) Fix *unit.states.test_archive* for Windows @ *2017-11-13 19:12:19 UTC*
  - f9b273a894 Merge pull request #43837 from twangboy/win_unit_test_archive
  - 5505a8819a Merge branch `2017.7' into win_unit_test_archive
  - b1dfe9c3c8 Format patching with statements for easier reading
  - ba2f2eb788 Add Erik's changes
  - 4ef1e3eb97 Fix *unit.states.test_archive* for Windows
- **PR** #44507: (Ch3LL) Increase sleep timeout for pillar refresh test @ *2017-11-13 18:29:06 UTC*
  - caa81728a0 Merge pull request #44507 from Ch3LL/pillar_time
  - ffa4bddcad Increase sleep timeout for pillar refresh test
- **PR** #44302: (morganwillcock) Fix traceback and incorrect message when resolving an unresolvable SID @ *2017-11-13 18:19:01 UTC*
  - cffea5ac71 Merge pull request #44302 from morganwillcock/badsid
  - f3af106e33 Merge branch `badsid' of https://github.com/morganwillcock/salt into badsid
    * 95733fbb3b Merge branch `2017.7' into badsid
    * facc2cd16e Merge branch `2017.7' into badsid

  - c7cf5f6f70 Format pywintypes.error
  - 9572aabb67 Fix traceback and incorrect message when resolving an unresolvable SID

- **PR** #44439: (mirceaulinic) Adapt napalm modules to the new library structure (refs: #44576) @ *2017-11-13 17:43:24 UTC*
  - 32fc952000 Merge pull request #44439 from cloudflare/fix-napalm
  - f45378af04 Lint: remove extra spaces
  - c6a38258a3 Add napalm>2.0.0 note and update URLs
  - 52f73835b8 Adapt napalm modules to the new library structure
- **PR** #44457: (twangboy) Remove wmi monkeypatching @ *2017-11-13 17:38:52 UTC*
  - ebbe5949ea Merge pull request #44457 from twangboy/win_remove_wmi_monkeypatching
  - 6c872e95e6 Add back the setup_loader_modules function
  - 20273e3697 No need for setup_loader_modules since we're actually importing wmi
  - 8c107873cd Remove wmi monkeypatching
- **PR** #44490: (Ch3LL) Enable test_deploy ssh test @ *2017-11-13 17:12:48 UTC*
  - 1da1a97d7d Merge pull request #44490 from Ch3LL/ssh_ping
  - e952cd6712 Enable test_deploy ssh test
- **PR** #44491: (Ch3LL) Add salt-ssh raw integration tests @ *2017-11-13 15:47:12 UTC*
  - 18624d6798 Merge pull request #44491 from Ch3LL/ssh_raw
  - 3dc8673417 change class name to raw
  - 308596ac8d Add salt-ssh raw integration tests
- **PR** #44492: (twangboy) Fix *unit.utils.test_cloud* for Windows @ *2017-11-13 15:44:31 UTC*
  - aa17bfa8e7 Merge pull request #44492 from twangboy/win_skip_mode_check
  - 2f30ad93b1 Skips mode check in Windows
- **PR** #44484: (Ch3LL) Add orchestration tests when target exists or not @ *2017-11-10 19:24:22 UTC*
  - 5b95495e75 Merge pull request #44484 from Ch3LL/orch_test
  - f3ec6df76e Add orchestration tests when target exists or not
- **PR** #44480: (Ch3LL) Add integration pillar command line test @ *2017-11-10 19:14:31 UTC*
  - 62c42ca6fb Merge pull request #44480 from Ch3LL/override_pillar
  - 12fed1b4d8 Add integration pillar command line test
- **PR** #44317: (Ch3LL) Add state tests and state request system to salt-ssh @ *2017-11-10 18:28:43 UTC*
  - cc08ad2edc Merge pull request #44317 from Ch3LL/ssh_test
  - 46bce3bd5e add additional parser argument for ssh integration tests
  - e9231430b5 remove logic similar to cloud/proxy tests
  - c731eb8ea6 add ssh dir to test runner when --ssh-tests set
  - 8089a885c2 add wipe function to other run_ssh method
  - 200b12ae6a change versionadded salt version

  - e3ebb5e9b3 fix comment and variables
  - faef0886a7 Add state tests and state request system to salt-ssh
- **PR** #44478: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ *2017-11-10 18:00:56 UTC*
  - 6669035a30 Merge pull request #44478 from rallytime/merge-2017.7
  - 9fcc2a70b5 Merge branch `2016.11' into `2017.7'
    * a66cd67d15 Merge pull request #44260 from seanjnkns/issue-39901
      · ed8cccf457 #39901: Fix pylint
      · 43c81dfdee #39901: Add unit tests
      · 613d500876 Merge branch `2016.11' into issue-39901
      · b97e8046ca Utilize salt.utils.validate.net.* and _raise_error_iface
      · 6818f3631d Fixes #39901 for RH/CentOS 7
- **PR** #44444: (twangboy) LGPO: Issue with Maximum Password Age @ *2017-11-10 17:26:53 UTC*
  - 60719d0683 Merge pull request #44444 from twangboy/win_lgpo_non_zero
  - de6b394445 Remove unneeded functions
  - ee0914f7e9 Fix some lint, remove unnecessary function
  - d52a7c12db Fix typo in PasswordComplexity policy
  - 44f8f43812 Fix problem where 0 isn't 0
- **PR** #44467: (twangboy) Fix *unit.test_doc* for Windows @ *2017-11-10 15:21:58 UTC*
  - 4f3a79df07 Merge pull request #44467 from twangboy/win_fix_test_doc
  - 0a9e862bf4 Use regex to split
- **PR** #44443: (Ch3LL) Add salt-ssh grains.items test @ *2017-11-09 00:42:11 UTC*
  - ff4f13877f Merge pull request #44443 from Ch3LL/ssh_grains
  - 5d1a9af4b5 Add salt-ssh grains.items test
- **PR** #44429: (Ch3LL) Fix orch doc from pillat.get to pillar.get @ *2017-11-07 23:06:38 UTC*
  - dcdf2d4c90 Merge pull request #44429 from Ch3LL/orch_doc
  - 38ca5520f0 Fix orch doc from pillat.get to pillar.get
- **ISSUE** #42568: (clallen) Orchestration runner doesn't populate __pillar__ based on pillarenv (refs: #43817)
- **PR** #43817: (The-Loeki) Orchestrate runner forces pillarenv and saltenv to None @ *2017-11-07 06:00:16 UTC*
  - 62c4addef8 Merge pull request #43817 from The-Loeki/orch-pillarenv
  - 3fd652623c orchestrate runner: retain default envs
- **PR** #44408: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ *2017-11-06 15:53:00 UTC*
  - 9e4708b7b9 Merge pull request #44408 from rallytime/merge-2017.7
  - edbbd5fc2b Merge branch `2016.11' into `2017.7'
  - 5e289f42ba Merge pull request #44383 from gtmanfred/2016kitchen
    * b65f4ea4ea switch salt-jenkins over to saltstack
  - cab54e34b5 Merge pull request #44173 from twangboy/win_system_docs

        * 8e111b413d Fix some of the wording and grammer errors
        * a12bc5ae41 Use google style docstrings
    - 7aaea1d179 Merge pull request #44304 from jfindlay/cron_id
        * cc038c5bec states.cron identifier defaults to name
    - e4dbbde734 Merge pull request #44322 from rossengeorgiev/saltssh-docs-update
        * b18f2e5a6d fix program name and description for --static
        * 5b10918f02 updated CLI docs for salt-ssh
- **PR** #44358: (The-Loeki) Kubernetes client certificate file usage fix @ *2017-11-03 21:51:27 UTC*
    - b11da0d2da Merge pull request #44358 from The-Loeki/kube-client-cert-file
    - 35a8b0bb38 Kubernetes client certificate file usage fix
- **PR** #44347: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ *2017-11-03 21:48:21 UTC*
    - 1974e52c06 Merge pull request #44347 from rallytime/merge-2017.7
    - 9bad04b94b Merge branch `2016.11' into `2017.7'
        * 4e6f09e3eb Merge pull request #44345 from gtmanfred/2016kitchen
            · 79b8b2d0bf remove binding
        * 209847c8c2 Merge pull request #44342 from gtmanfred/2016kitchen
            · c50508f0b7 render template files platforms.yml and driver.yml
        * 1be65224cb Merge pull request #44339 from corywright/issue-44336-fix-archive-tar-docs-2016-11
            · 9c1c35a59f Remove leading dash (-) from options in archive.tar documentation
        * bebc33daf5 Merge pull request #44295 from HeinleinSupport/issue44272
            · f972715a45 fixes issue #44272
        * e7ca9f8407 Merge pull request #44286 from gtmanfred/2016.11
            · 193e715e37 use our git repo for kitchen-salt
- **PR** #44364: (Ch3LL) Include disk size check for test_spm_build_big_file test @ *2017-11-01 13:57:24 UTC*
    - aea9f4a115 Merge pull request #44364 from Ch3LL/fix_size_test
    - 952c6bfea4 Include file size check for test_spm_build_big_file test
- **ISSUE** #44239: (boltronics) --progress fails when hosts routed via syndic (refs: #44273)
- **PR** #44273: (DmitryKuzmenko) Workaround progressbar failure if minion is behind syndic. @ *2017-10-31 17:07:17 UTC*
    - 609de9367a Merge pull request #44273 from DSRCorporation/bugs/44239_syndic_progress
    - e1a7605623 Workaround progressbar failure if minion is behind syndic.
- **PR** #44350: (gtmanfred) update salt-jenkins repo to 2017.7 @ *2017-10-30 21:31:30 UTC*
    - eef6dbfa58 Merge pull request #44350 from gtmanfred/2017.7
    - cf71e3d9f2 update salt-jenkins repo to 2017.7
- **PR** #44346: (gtmanfred) remove binding from erb template rendering (2017.7) @ *2017-10-30 20:57:19 UTC*
    - d586b3bf97 Merge pull request #44346 from gtmanfred/2017.7

  - bf577c3d8b remove binding

- **PR** #44343: (gtmanfred) render template files platforms.yml and driver.yml (2017.7) @ *2017-10-30 20:04:22 UTC*
  - 547aac6658 Merge pull request #44343 from gtmanfred/2017.7
  - ec24fbc0c2 render template files platforms.yml and driver.yml
- **ISSUE** #44336: (corywright) Docs for archive.tar should not use leading dash for tar options (refs: #44339, #44338)
- **PR** #44338: (corywright) Remove leading dash from options in archive.tar docs (2017.7 and develop) @ *2017-10-30 18:59:33 UTC*
  - 6e2a74c18b Merge pull request #44338 from corywright/issue-44336-fix-archive-tar-docs-2017-7-and-newer
  - 49b0abc284 Remove leading dash (-) from options in archive.tar documentation
- **PR** #44265: (Ch3LL) Add service.status integration test @ *2017-10-30 15:00:12 UTC*
  - 71923bed97 Merge pull request #44265 from Ch3LL/service_test
  - 716aabc0bf Merge branch `2017.7' into service_test
  - dd5c823210 remove skipIf import
  - ff92f31cbe remove skipif for docker
  - c13f37eee4 change service name depending on os
  - 980c43ebc9 change skip message check to docker
  - 3955537609 change skip if check to docker
  - aa8875a0e2 change service name to docker
  - 654071028b change service to crond
  - 7911b4b3eb Add service.status integration test
- **PR** #44294: (nasenbaer13) Boto asg fixes, Backport of #43858 @ *2017-10-30 14:48:52 UTC*
  - **PR** #43858: (nasenbaer13) Boto_ASG fixes for scaling policy rate limiting and tag conversion (refs: #44294)
  - 8ae9769bfb Merge pull request #44294 from eyj/boto_asg
  - f5ad6aeb70 Debug log added when throttled by API
  - c05d9aeced Encode tags as utf-8, retry policy readout
- **PR** #44312: (rallytime) Back-port #44287 to 2017.7 @ *2017-10-30 14:25:56 UTC*
  - **PR** #44287: (jf) Fix utils.files.guess_archive_type to recognize the ``tbz'' extension as well (refs: #44312)
  - 68a9bebf90 Merge pull request #44312 from rallytime/bp-44287
  - 4d02e61f97 Merge branch `2017.7' into bp-44287
  - ba0eaae95e Fix utils.files.guess_archive_type to recognize the ``tbz'' extension as well (also tidy up list of extensions)
- **ISSUE** #44258: (oarmstrong) docker_container.running recreates containers with multiple links (refs: #44262)
- **PR** #44311: (rallytime) Back-port #44262 to 2017.7 @ *2017-10-30 14:25:35 UTC*
  - **PR** #44262: (oarmstrong) docker_container.running sort list of links (refs: #44311)
  - b8854e27c0 Merge pull request #44311 from rallytime/bp-44262

  - 72d617cfbe Merge branch `2017.7' into bp-44262
  - ae34a15503 docker_container.running sort list of links
- **PR** #44314: (gtmanfred) update .kitchen.yml to run py3 tests too @ *2017-10-30 14:23:15 UTC*
  - 48df79ef77 Merge pull request #44314 from gtmanfred/2017.7
  - 54265769c4 Merge branch `2017.7' into 2017.7
- **PR** #44316: (rallytime) Fix lint failure on 2017.7 branch @ *2017-10-27 18:36:08 UTC*
  - dbc5e224e9 Merge pull request #44316 from rallytime/fix-lint
  - 6d2490f6a0 Fix lint failure on 2017.7 branch
  - 39262b625e update .kitchen.yml to run py3 tests too
- **PR** #44279: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ *2017-10-27 16:17:19 UTC*
  - b2b0c770a4 Merge pull request #44279 from rallytime/merge-2017.7
  - 8237f45a46 Add print_function to __future__ import list
  - 055b0701de Lint fix from sloppy merge conflict resolution
  - 1c3cb5c6a4 Merge branch `2016.11' into `2017.7'
    * 8a1ea165af Merge pull request #44259 from gtmanfred/2016.11
      · 56a3ad8f68 fix pylint comments
      · 4add666db1 add comment to Gemfile and move copyartifacts
      · b4c8f7eb57 fix pylint
      · 392fd4f837 try newest salttesting

  - 64d2e4f732 Fix pickling errors on Windows
- **ISSUE** #44181: (jonans) Scheduler with multiple when values doesn't run (refs: #44186)
- **PR** #44186: (garethgreenaway) [2017.7] scheduler fixes @ *2017-10-19 20:36:04 UTC*
  - 7a89cd8697 Merge pull request #44186 from garethgreenaway/44181_scheduler_multiple_whens
  - 7eef3b3571 Adding a copy.deepcopy to the for loop that looks for old jobs to avoid stale jobs ending up in the list.
- **PR** #43896: (twangboy) Fix win_lgpo execution module @ *2017-10-19 20:13:18 UTC*
  - 1d16ae8ba7 Merge pull request #43896 from twangboy/win_fix_lgpo_scom
  - 648d1b8d99 Catch CommandExecutionError
  - 0040082d0a Fix pylint error
  - 91258cd6a8 Fix typo
  - 261dba347d Put the file.remove in a try/except/else block
  - 020c2a2b85 Fix syntax error
  - d5bec99126 Fix some lint
  - b96186d60d Fix INSTALL_LANGUAGE
  - 5471bd521f Fix problem with file handle
  - 5ec58c6200 Use System Install Language as default fallback
  - f9ad446019 Fix win_lgpo execution module
- **PR** #44080: (twangboy) Fix a regression in *group.present* in Windows @ *2017-10-19 20:10:44 UTC*
  - 98356b86af Merge pull request #44080 from twangboy/win_fix_group.present
  - 29bc80ff87 Improve get_sam_name
  - ef759a3875 Fix example in function docs for get_sam_name
  - 43740c5fed Document 15 character limit
  - 83f36cc2ef Account for 15 character limit in hostname

  - aa278966de Remove *args, pass gid as a keyword
  - 5230ecd7e1 Accept *args
- **PR** #44171: (Ch3LL) Add SPM Build Integration Tests @ *2017-10-19 19:49:14 UTC*
  - 5ef124bf2d Merge pull request #44171 from Ch3LL/spm_int
  - cd79e9444e remove unneded kwarg
  - 1541376c4f Add spm build test
- **PR** #44157: (benediktwerner) Added `versionadded' tags to sensehat modules @ *2017-10-19 14:13:31 UTC*
  - 34a843252d Merge pull request #44157 from benediktwerner/2017.7
  - bd825b51cc Changed sensehat versionadded from 2017.7 to 2017.7.0
  - f1d3c5bbcf Added `versionadded' tags to sensehat modules
- **PR** #44164: (terminalmage) Fix examples in docker_container.{stopped,absent} docstrings @ *2017-10-19 14:12:37 UTC*
  - 1427c72e1e Merge pull request #44164 from terminalmage/fix-docker-docstring
  - 7b46489e33 Fix examples in docker_container.{stopped,absent} docstrings
- **PR** #44168: (twangboy) Fix *unit.test_auth* for Windows @ *2017-10-19 14:12:22 UTC*
  - 77969c4161 Merge pull request #44168 from twangboy/win_skip_pam_eath
  - bb1d2eb85b Skip tests that are failing on PAM eauth
- **PR** #44151: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ *2017-10-18 16:52:30 UTC*
  - 88a776d9d2 Merge pull request #44151 from rallytime/merge-2017.7
  - 6aa8f03a4a Merge branch `2016.11' into `2017.7'
    * 0cd493b691 Merge pull request #44131 from rallytime/bp-44029
      · bebf301976 fixed test addressing issue #43307, disk.format_ to disk.format
      · b4ba7ae2fc addresses issue #43307, disk.format_ to disk.format
    * 3a68e356f8 Merge pull request #44093 from gtmanfred/fix-44087
      · 5455c5053b fix pylint
      · f749cafa25 don't filter if return is not a dict
    * c785d7a847 Merge pull request #44122 from cachedout/gpg_pr_template
      · e41e3d76be Typo fix
      · 37c7980880 Add note about GPG signing to PR template
    * bf90ea1f51 Merge pull request #44124 from rallytime/merge-2016.11
      · 59861291c8 Merge branch `2016.11.8' into `2016.11'
      · 57623e2abe Merge pull request #44028 from rallytime/bp-44011
      · 89e084bda3 Do not allow IDs with null bytes in decoded payloads
      · 206ae23f15 Don't allow path separators in minion ID
    * 13f3ffa83a Merge pull request #44097 from gtmanfred/openneb
      · c29655b2c2 Merge branch `2016.11' into openneb

        - bd2490b149 OpenNebula does not require the template_id to be specified
    * ac3e4df964 Merge pull request #44110 from roaldnefs/fix-doc-local-returner
        - efd58f7594 Merge branch `2016.11' into fix-doc-local-returner
        - 881f1822f2 Format fix code example local returner doc

- **ISSUE** #43918: (mwerickso) subset argument does not work with saltmod.state (refs: #43933)
- **PR** #43933: (gtmanfred) if expect_minions is passed use that instead @ *2017-10-18 16:43:39 UTC*
  - 0b47eb7242 Merge pull request #43933 from gtmanfred/2017.7
  - 272dcc6ba5 add inline comment about popping expect_minions
  - b615ce1762 if expect_minions is passed use that instead
- **PR** #44081: (skizunov) Windows: Fix usage of pkgrepo state @ *2017-10-18 16:16:46 UTC*
  - 36da1a7fac Merge pull request #44081 from skizunov/develop3
  - 351d16840b Move strip_uri to salt/utils/pkg/deb.py
  - f54c7a6f01 Windows: Fix usage of pkgrepo state

- **PR** #43415: (mattLLVW) Fix env_order in state.py (refs: #43672) @ *2017-09-11 15:18:08 UTC*
  - 47d982fd37 Merge pull request #43415 from mattLLVW/fix-env-order
  - f6313a1b2c Merge branch `2017.7' into fix-env-order
  - e93a962980 Fix env_order in state.py
- **PR** #43422: (twangboy) Fix *unit.cloud.clouds.test_ec2* for Windows @ *2017-09-11 15:17:20 UTC*
  - e89e23a32e Merge pull request #43422 from twangboy/win_unit_cloud_ec2
  - 1379627334 Fix *unit.cloud.clouds.test_ec2* for Windows
- **PR** #43423: (twangboy) Fix *unit.modules.test_gem* for Windows @ *2017-09-11 15:15:28 UTC*
  - 54f833ac59 Merge pull request #43423 from twangboy/win_unit_test_gem
  - b2cea18d13 Fix *unit.modules.test_gem* for Windows
- **PR** #43419: (gtmanfred) make cache dirs when spm starts (refs: #43432) @ *2017-09-11 13:42:50 UTC*
  - b3116109e5 Merge pull request #43419 from gtmanfred/2017.7
  - 58378866e5 make cache dirs when spm starts
- **PR** #43371: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ *2017-09-08 15:39:12 UTC*
  - 9b27473763 Merge pull request #43371 from rallytime/merge-2017.7
  - 7b07b58396 Merge branch `2016.11' into `2017.7'
    * 0c986f5eba Merge pull request #43361 from rallytime/bp-43329
      · b09e5b4379 Fix #43295, better handling of consul initialization issues
    * 22287439e6 Merge pull request #42903 from junovitch/issue-35840-fix-preserve-minion-cache-2016.11
      · c9d4fdbd45 Merge branch `2016.11' into issue-35840-fix-preserve-minion-cache-2016.11
      · 93a68e32a5 Merge branch `2016.11' into issue-35840-fix-preserve-minion-cache-2016.11
      · 079f097985 Fix `preserve_minion_cache: True' functionality (fixes #35840)
    * 4860e10757 Merge pull request #43360 from terminalmage/sj-496

        - 433bca14b1 Fix KeyError in yumpkg configparser code on Python 3
        - f6c16935d8 Move --showduplicates before repository-packages
    * 4ba2dbe41e Merge pull request #43244 from rallytime/release-branch-clarifications
        - 0d5a46dbaa Update release branch section with a few more details
    * 1a012eb3d7 Merge pull request #43359 from gtmanfred/ipaddr
        - 23d9abb560 ipaddr_start ipaddr_end for el7
    * 8f88111be8 Merge pull request #43247 from rallytime/mentionbot-backports
        - 2b85757d73 Always notify tkwilliams when changes occur on boto files
        - 40b5a29f90 Add basepi to userBlacklist for mention bot
        - bad8f56969 Always notify ryan-lane when changes occur on boto files

- **PR** #43398: (twangboy) Fix *unit.modules.test_mount* for Windows @ *2017-09-08 13:39:29 UTC*
  - 97f05ff603 Merge pull request #43398 from twangboy/win_fix_test_mount
  - 4a8d7e522c Fix tests, Use full path to salt.utils.which
- **PR** #43399: (twangboy) Fix *unit.modules.test_pam* for Windows @ *2017-09-08 13:37:50 UTC*
  - 6a4cc5c1b0 Merge pull request #43399 from twangboy/win_fix_test_pam
  - 6257aa964a Fix *unit.modules.test_pam* for Windows
- **PR** #43400: (twangboy) Fix *unit.modules.test_parted* for Windows @ *2017-09-08 13:37:00 UTC*
  - 2b5cfae3f8 Merge pull request #43400 from twangboy/win_unit_test_parted
  - 8e3e897ee2 Fix *unit.modules.test_parted* for Windows
- **PR** #43401: (twangboy) Fix *unit.modules.test_pw_group* for Windows @ *2017-09-08 13:35:45 UTC*
  - 332deeb013 Merge pull request #43401 from twangboy/win_unit_test_pw_group
  - 78e39a1b9d Fix *unit.modules.test_pw_group* for Windows
- **PR** #43402: (twangboy) Fix *unit.modules.test_qemu_nbd* for Windows @ *2017-09-08 13:34:58 UTC*
  - c0f54bfef1 Merge pull request #43402 from twangboy/win_unit_test_qemu_nbd
  - 531ce8022b Fix *unit.modules.test_qemu_nbd* for Windows
- **PR** #43404: (twangboy) Fix *unit.modules.test_seed* for Windows @ *2017-09-08 13:32:41 UTC*
  - be88fbb45f Merge pull request #43404 from twangboy/win_unit_test_seed
  - 6ceb895a84 Use os.path.join for paths
- **PR** #43301: (twangboy) Fix *unit.test_spm* for Windows @ *2017-09-08 13:24:35 UTC*
  - 612c6a8756 Merge pull request #43301 from twangboy/win_fix_unit_test_spm
  - 8608a6b303 Merge branch `2017.7' into win_fix_unit_test_spm
  - b8da04c04d Add Mike's changes
  - f36efbd6a7 Fix *unit.test_spm* for Windows
- **PR** #43372: (skizunov) Fix system.set_system_time when no hw clock is present @ *2017-09-07 17:45:33 UTC*
  - f959113694 Merge pull request #43372 from skizunov/develop5
  - 281e471853 Fix system.set_system_time when no hw clock is present

- **PR** #43193: (jettero) Prevent spurious ``Template does not exist'' error @ *2017-09-06 20:16:58 UTC*
  - **PR** #39516: (jettero) Prevent spurious ``Template does not exist'' error (refs: #43193)
  - 6d13535ed0 Merge pull request #43193 from jettero/template-dne-again
  - cde8aed2cf Merge branch `2017.7' into template-dne-again
- **ISSUE** #42706: (blarghmatey) Parallel Cache Failure (refs: #43018, #43159)
- **PR** #43159: (jubrad) Bp 43018 @ *2017-09-05 22:29:16 UTC*
  - **PR** #43056: (damon-atkins) safe_filename_leaf(file_basename) and safe_filepath(file_path_name) (refs: #43159, #43172)
  - **PR** #43018: (jubrad) Update state.py (refs: #43159, #43727)
  - 015cbc57d9 Merge pull request #43159 from jubrad/bp-43018
  - 25419a56db Merge branch `2017.7' into bp-43018
  - 971b4c0890 Merge branch `2017.7' into bp-43018
  - 4f8e6c65e5 access safe_filename_leaf through utils.files, changed in #43172
  - 42064883ea state.py remove unused urllib import
  - 4957268b37 update state.py to use safe_filename_leaf
  - b8ead879ed Fixing lint issues
  - 446457d017 Swapping *from* for *import*
  - fb80e17400 state.py: fix import and utf8 encode before quote
  - 1dcf167bb7 Update state.py
- **PR** #43232: (terminalmage) Improve inheritance in salt.utils.gitfs @ *2017-09-05 20:37:06 UTC*
  - 6e1b541b46 Merge pull request #43232 from terminalmage/gitfs-inheritance
  - 53bd3a3e23 Improve inheritance in salt.utils.gitfs
- **PR** #43238: (s0undt3ch) Include the line number by default on the log file format @ *2017-09-05 20:31:54 UTC*
  - 086b220091 Merge pull request #43238 from s0undt3ch/2017.7
  - 630a1db3ab Include the line number by default on the log file format
- **PR** #43294: (twangboy) Win build scripts @ *2017-09-05 20:12:54 UTC*
  - 09dc58cde5 Merge pull request #43294 from twangboy/win_build_scripts
  - 9979ccb613 Remove Py2 and Py3 in the same run
  - a5d9f85db6 Modifications to build scripts
- **PR** #43322: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ *2017-09-05 18:21:26 UTC*
  - 21ab306ef4 Merge pull request #43322 from rallytime/merge-2017.7
  - b1062f8c15 Merge branch `2016.11' into `2017.7'
    * 02867fdcd2 Merge pull request #43277 from rallytime/owners-file
      · 2b4da0f0e7 Add CODEOWNERS file

            · 14a4591854 file.py docs: correct group and mode
            · d4214ca283 file.py docs: specify absolute paths
        * 26ff89539e Merge pull request #43274 from terminalmage/fix-int-types
            · d533877743 Use six.integer_types instead of int
        * cf21f91fb2 Merge pull request #43271 from twangboy/win_fix_pkg.install
            · 91b062f564 Fix formatting issue, spaces surrounding +

- **PR** #43324: (twangboy) Fix *unit.modules.test_chef* for Windows @ *2017-09-05 16:40:11 UTC*
  - 62429c547d Merge pull request #43324 from twangboy/fix_unit.modules.test_chef
  - 5bd5ea042a Fix *unit.modules.test_chef* for Windows
- **PR** #43268: (rallytime) Back-port #43237 to 2017.7 @ *2017-09-01 18:17:13 UTC*
  - **PR** #43237: (timka) .utils.aws.get_location() expects a dict (refs: #43268)
  - 367668a0a3 Merge pull request #43268 from rallytime/bp-43237
  - 047ad07da4 .utils.aws.get_location() expects a dict
- **PR** #43270: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ *2017-09-01 18:09:46 UTC*
  - 02504dd363 Merge pull request #43270 from rallytime/merge-2017.7
  - f8b025f6dc Merge branch `2016.11' into `2017.7'
  - 3a0b02f3ae Merge pull request #43228 from twangboy/win_fix_pkg.install
    * 13dfabb1ce Fix regex statement, add .
    * 31ff69f0ad Add underscore to regex search
    * 3cf2b6575c Fix spelling
    * ed030a35a5 Use regex to detect salt-minion install
    * e5daff495a Fix pkg.install
  - b4c689dff5 Merge pull request #43191 from viktorkrivak/fix-apache-config-multi-entity
    * c15bcbe1cc Merge remote-tracking branch `upstream/2016.11' into fix-apache-config-multi-entity
    * 4164047951 Fix apache.config with multiple statement At this moment when you post more than one statement in config only last is used. Also file is rewrited multiple times until last statement is written. Example: salt `*' apache.config /etc/httpd/conf.d/ports.conf config="[{`Listen': `8080'}, {`Proxy': ``Something''}]" Ends only with Proxy Something and ignore Listen 8080, This patch fix this issue.
  - b90e59ede9 Merge pull request #43154 from lomeroe/bp-43116-2016.11
  - 8f593b0b02 verify that files exist before trying to remove them, win_file.remove raises an exception if the file does not exist
  - 33a30bac06 correcting bad format statement in search for policy to be disabled
  - acc3d7ac82 correct fopen calls from salt.utils for 2016.11's utils function
  - 2da1cdd109 lint fix
  - 61bd12c0de track xml namespace to ensure policies w/duplicate IDs or Names do not conflict

  - f232bed9f9 add additional checks for ADM policies that have the same ADMX policy ID (#42279)
- **ISSUE** #42459: (iavael) Broken ldap groups retrieval in salt.auth.ldap after upgrade to 2017.7 (refs: #43283)
- **PR** #43283: (DmitryKuzmenko) Fix ldap token groups auth. @ *2017-09-01 17:49:46 UTC*
  - ece0e393ef Merge pull request #43283 from DSRCorporation/bugs/42459_broken_ldap_groups
  - 3ad6911210 Fix for tests: don't require `groups' in the eauth token.
  - 1f104cf85b Fix ldap token groups auth.
- **PR** #43149: (BenoitKnecht) Fix iptables.get_rules when rules contain --nfmask or --ctmask @ *2017-09-01 15:57:05 UTC*
  - 4f023c4cb6 Merge pull request #43149 from BenoitKnecht/2017.7.1
  - 3c1ddc9bde modules: iptables: correctly parse *--nfmask*/*--ctmask*
- **ISSUE** #43258: (nomeelnoj) metadata_server_grains problems (refs: #43265)
- **PR** #43265: (gtmanfred) make sure meta-data grains work on ec2 @ *2017-09-01 15:31:12 UTC*
  - cf2b75bb86 Merge pull request #43265 from gtmanfred/2017.7
  - 04dd8ebedb make sure meta-data grains work on ec2
- **PR** #43299: (twangboy) Fix *unit.netapi.rest_cherrypy.test_tools* for Windows @ *2017-09-01 15:13:43 UTC*
  - 618b221895 Merge pull request #43299 from twangboy/win_fix_netapi_cherrypy
  - fd74acb603 Merge branch `2017.7' into win_fix_netapi_cherrypy
- **PR** #43300: (twangboy) Fix *unit.netapi.rest_tornado.test_handlers* for Windows @ *2017-09-01 13:10:11 UTC*
  - aee654da92 Merge pull request #43300 from twangboy/win_fix_netapi_rest_tornado
  - c93d2ed386 Use os.sep instead of `/'
  - 3fbf24b91a Use os.sep instead of `/'
- **ISSUE** #43259: (mahesh21) NameError: global name `__opts__' is not defined (refs: #43266)
- **PR** #43278: (gtmanfred) bootstrap can come from dunders @ *2017-08-31 13:31:20 UTC*
  - **PR** #43266: (gtmanfred) switch virtualbox cloud driver to use __utils__ (refs: #43278)
  - aed2975979 Merge pull request #43278 from gtmanfred/virtualbox
  - c4ae2de30f bootstrap can come from dunders
- **PR** #42975: (brejoc) Added unit tests for Kubernetes module @ *2017-08-30 20:30:16 UTC*
  - 479e0e06ac Merge pull request #42975 from brejoc/tests-for-kubernetes-module
  - fdad9177b5 Merge branch `2017.7' into tests-for-kubernetes-module
  - c227cb25ad Skipping test on ImportError
  - bd76a870ce Dunder vars are now defined via setup_loader_modules
  - 3c99e61637 Renamed test to match new convention
  - caf78d206d Fixed imports for pytest
  - c8e98c8d8a Added unit tests for Kubernetes module
- **ISSUE** #42935: (BenjaminSchubert) docker_image.present always ends up failing even on correct result. (refs: #43176)

- **PR** #43176: (terminalmage) docker_image states: Handle Hub images prefixed with ``docker.io/'' @ *2017-08-30 20:08:13 UTC*
  - ca7df1d4cf Merge pull request #43176 from terminalmage/issue42935
  - df18a89836 Lint: Remove unused import
  - 7279f98e92 docker_image states: Handle Hub images prefixed with ``docker.io/''
  - f7c945f6e4 Prevent spurious ``Template does not exist'' error

25.2.8 Salt 2017.7.4 Release Notes

Version 2017.7.4 is a bugfix release for *2017.7.0*.

Statistics

- Total Merges: **8**
- Total Issue References: **4**
- Total PR References: **11**
- Contributors: **6** (Ch3LL, garethgreenaway, gtmanfred, marccardinal, rallytime, terminalmage)

Changelog for v2017.7.3..v2017.7.4

Generated at: 2018-05-26 21:48:28 UTC

- **PR** #46074: (Ch3LL) Update 2017.7.4 Release Notes with new fixes @ *2018-02-16 16:47:56 UTC*
  - b5b083fd26 Merge pull request #46074 from Ch3LL/update-7.4
  - 8d0eeeb059 Update 2017.7.4 Release Notes with new fixes
- **ISSUE** #45790: (bdarnell) Test with Tornado 5.0b1 (refs: #46066)
- **PR** #46066: (rallytime) Pin tornado version in requirements file @ *2018-02-16 16:40:05 UTC*
  - 32f3d00e44 Merge pull request #46066 from rallytime/pin-tornado
  - 6dc1a3b9dc Pin tornado version in requirements file
- **PR** #46036: (terminalmage) git.latest: Fix regression with identity file usage @ *2018-02-16 13:57:23 UTC*
  - 85761ee650 Merge pull request #46036 from terminalmage/issue43769
  - e2140d9a84 Mock the ssh.key_is_encrypted utils func
  - 169924b3fe Move ssh.key_is_encrypted to a utils module temporarily
  - 54f4d78f7a Only keep ssh.py in the Windows installer
  - 5f04531e1b Keep ssh state and execution modules in the installer
  - f2b69f703d git.latest: Fix regression with identity file usage
- **PR** #46009: (Ch3LL) Add 2017.7.4 Release Notes with PRs @ *2018-02-13 16:40:30 UTC*
  - 6d534c6e7e Merge pull request #46009 from Ch3LL/rn_7.4
  - ac0baf4b34 Add 2017.7.4 Release Notes with PRs

- **ISSUE** #45976: (ghost) 6a5e0f9 introduces regression that breaks Vault module for salt masterless (refs: #45981)
- **PR** #45981: (gtmanfred) use local config for vault when masterless @ *2018-02-13 15:22:01 UTC*
  - ca76a0b328 Merge pull request #45981 from gtmanfred/2017.7.3
  - 0d448457dc apparently local is not set by default
  - 2a92f4bc16 use local config for vault when masterless
- **ISSUE** #45915: (MatthiasKuehneEllerhold) 2017.7.3: Salt-SSH & Vault Pillar: Permission denied ``minion.pem'' (refs: #45928)
- **PR** #45953: (rallytime) Back-port #45928 to 2017.7.3 @ *2018-02-09 22:29:10 UTC*
  - **PR** #45928: (garethgreenaway) [2017.7] Fixing vault when used with pillar over salt-ssh (refs: #45953)
  - 6530649dbc Merge pull request #45953 from rallytime/bp-45928-2017.7.3
  - 85363189d1 Fixing vault when used with pillar over salt-ssh
- **ISSUE** #45893: (CrackerJackMack) archive.extracted ValueError ``No path specified'' in 2017.7.3 (refs: #45902)
- **PR** #45934: (rallytime) Back-port #45902 to 2017.7.3 @ *2018-02-09 16:31:08 UTC*
  - **PR** #45902: (terminalmage) Check the effective saltenv for cached archive (refs: #45934)
  - fb378cebb0 Merge pull request #45934 from rallytime/bp-45902
  - bb83e8b345 Add regression test for issue 45893
  - cdda66d759 Remove duplicated section in docstring and fix example
  - 4b6351cda6 Check the effective saltenv for cached archive
- **PR** #45935: (rallytime) Back-port #45742 to 2017.7.3 @ *2018-02-09 14:02:26 UTC*
  - **PR** #45742: (marccardinal) list.copy() is not compatible with python 2.7 (refs: #45935)
  - 0d74151c71 Merge pull request #45935 from rallytime/bp-45742
  - 6a0b5f7af3 Removed the chained copy
  - ad1150fad4 list.copy() is not compatible with python 2.7

25.2.9 Salt 2017.7.5 Release Notes

Version 2017.7.5 is a bugfix release for *2017.7.0*.

Statistics

- Total Merges: **213**

- **PR** #46612: (Ch3LL) Add changelog to 2017.7.5 release notes @ *2018-03-19 20:47:38 UTC*
  - 19bb725698 Merge pull request #46612 from Ch3LL/7.5_rn
  - 6076bfa2ee Add changelog to 2017.7.5 release
- **PR** #46572: (dmurphy18) Addition of -sa flag to allow for revision numbers other than -0 or -1 @ *2018-03-19 20:07:26 UTC*
  - 31c78aef11 Merge pull request #46572 from dmurphy18/update_xxxbuild
  - c87511570d Merge branch `2017.7.5' into update_xxxbuild
- **ISSUE** saltstack/salt-jenkins#884: (gtmanfred) [2017.7.5][Fedora 27][py2/py3] integration.states.test_npm.NpmStateTest.test_npm_install_url_referenced_package (refs: #46577)
- **PR** #46577: (gtmanfred) Fix npm issue @ *2018-03-19 11:51:04 UTC*
  - cdd768fa4d Merge pull request #46577 from gtmanfred/2017.7.5
  - 78cbf7b5cd Fix npm issue
  - c76f7eb028 enable debug logging on the minionlog
- **PR** #46551: (terminalmage) Fix failing pkg integration test on OpenSUSE @ *2018-03-19 11:50:12 UTC*
  - e6682c660c Merge pull request #46551 from terminalmage/salt-jenkins-885
  - 703b5e7e65 Change versionadded to show that 2018.3.0 will not have this function
  - 010d260d06 Rewrite failing Suse pkg integration test
  - f3f5dec239 zypper.py: fix version argument being ignored
  - 214f2d6ad3 Add pkg.list_repo_pkgs to zypper.py
    - 0a541613f2 Additon of -sa flag to allow for revision numbers other than -0 or -1
- **ISSUE** saltstack/salt-jenkins#886: (gtmanfred) [2017.7.5][Fedora 26/Ubuntu 17.10][py3] integration.states.test_pip.PipStateTest.test_46127_pip_env_vars (refs: #46563)
- **PR** #46563: (gtmanfred) virtualenv version too old for python3.6 @ *2018-03-15 20:17:16 UTC*
  - bd62699ccb Merge pull request #46563 from gtmanfred/2017.7.5
  - 8d5ab72983 virtualenv version too old for python3.6
- **PR** #46561: (gtmanfred) disable verbose @ *2018-03-15 16:36:41 UTC*
  - 2916708124 Merge pull request #46561 from gtmanfred/2017.7.5
  - 2c39ac6dfb disable verbose
- **PR** #46537: (rallytime) Back-port #46529 to 2017.7.5 @ *2018-03-14 14:47:28 UTC*
  - **PR** #46529: (gtmanfred) retry if there is a segfault (refs: #46537)
  - ee3bff6e32 Merge pull request #46537 from rallytime/bp-46529
  - 289c7a228f retry if there is a segfault
- **PR** #46519: (rallytime) Update man pages for 2017.7.5 @ *2018-03-13 20:00:51 UTC*
  - 1271536a89 Merge pull request #46519 from rallytime/man-pages-2017.7.5
  - 782a5584f5 Update man pages for 2017.7.5

- **ISSUE** #46207: (seanjnkns) Issue #44034 still unresolved (refs: #46493)
- **ISSUE** #44034: (seanjnkns) salt-call pillar overrides broken in 2016.11.8 and 2017.7.2 (refs: #44483)
- **PR** #46493: (terminalmage) salt-call: don't re-use initial pillar if CLI overrides passed @ *2018-03-12 20:41:52 UTC*
  - **PR** #44483: (terminalmage) salt-call: account for instances where __pillar__ is empty (refs: #46493)
  - 0e90c8ca6f Merge pull request #46493 from terminalmage/issue46207
  - f06ff68f10 salt-call: don't re-use initial pillar if CLI overrides passed
- **PR** #46450: (gtmanfred) load grains for salt.cmd runner @ *2018-03-12 18:52:22 UTC*
  - b11a8fc8e0 Merge pull request #46450 from gtmanfred/salt_runner
  - 7974ff7264 load grains for salt.cmd runner
- **ISSUE** #30115: (gtmanfred) [BUG] listen does not appear to respect the special names directive (refs: #46337)
- **PR** #46337: (gtmanfred) Fix using names with listen and listen_in @ *2018-03-12 18:50:00 UTC*
  - 22d753364b Merge pull request #46337 from gtmanfred/2017.7
  - d6d9e36359 add tests for names and listen/listen_in
  - 3f8e0db572 let listen_in work with names
  - 7161f4d4df fix listen to be able to handle names
- **PR** #46413: (meaksh) Explore `module.run' state module output in depth to catch ``result'' properly @ *2018-03-12 18:49:07 UTC*
  - b7191b8782 Merge pull request #46413 from meaksh/2017.7-explore-result-in-depth
  - 885751634e Add new unit test to check state.apply within module.run
  - 9f19ad5264 Rename and fix recursive method
  - 1476ace558 Fix Python3 and pylint issue
  - 726ca3044d Explore `module.run' response to catch the `result' in depth
- **PR** #46496: (gtmanfred) more test kitchen clean up @ *2018-03-12 18:28:34 UTC*
  - 02a79a2014 Merge pull request #46496 from gtmanfred/kitchen
  - da002f78d0 include virtualenv path for py3 windows
  - fe2efe03ea remove duplicate setup
- **ISSUE** #46329: (bdrung) test_create_deployments fails with python-kubernetes 4.0.0 (refs: #46330)
- **PR** #46330: (bdrung) Fix ValueError for template in AppsV1beta1DeploymentSpec @ *2018-03-12 16:56:18 UTC*
  - 5c4c182d75 Merge pull request #46330 from bdrung/fix_kubernetes_test_create_deployments
  - 5008c53c44 Fix ValueError for template in AppsV1beta1DeploymentSpec
- **ISSUE** #46479: (rongshengfang) boto_ec2.instance_present throwing KeyError exception when associating EIP to an existing instance (refs: #46482)
- **PR** #46482: (rongshengfang) Fix KeyError in salt/states/boto_ec2.py @ *2018-03-12 15:13:13 UTC*
  - c7e05d3ff4 Merge pull request #46482 from rongshengfang/fix-keyerror-in-instance_present
  - ed8c83e89a Fix KeyError in salt/states/boto_ec2.py when an EIP is being associated to an existing instance with the instance_present state.

- **PR** #46463: (terminalmage) Update requirements files to depend on mock>=2.0.0 @ *2018-03-09 19:24:41 UTC*
  - 573d51afec Merge pull request #46463 from terminalmage/mock-2.0
  - b958b4699c Update requirements files to depend on mock>=2.0.0
- **ISSUE** #46299: (gclinch) debconf module fails on Python 3 (refs: #46300)
- **PR** #46422: (rallytime) Back-port #46300 to 2017.7 @ *2018-03-09 19:19:25 UTC*
  - **PR** #46300: (gclinch) Python 3 support for debconfmod (fixes #46299) (refs: #46422)
  - a154d35fc7 Merge pull request #46422 from rallytime/bp-46300
  - 829dfde8e8 Change stringutils path to old utils path for 2017.7
  - 91db2e0782 Python 3 support
- **PR** #46320: (mcalmer) add warning about future config option change @ *2018-03-09 17:48:29 UTC*
  - 2afaca17a1 Merge pull request #46320 from mcalmer/warn-kubernetes
  - c493ced415 add warning about future config option change
- **PR** #46449: (bdrung) Make documentation theme configurable @ *2018-03-09 17:47:15 UTC*
  - c7f95581e3 Merge pull request #46449 from bdrung/make-doc-theme-configurable
  - 4a5da2d144 Make documentation theme configurable
- **PR** #46162: (rallytime) Add team-suse to CODEOWNERS file for zypper files @ *2018-03-09 17:46:13 UTC*
  - 10ce0e9e20 Merge pull request #46162 from rallytime/team-suse-zypper-owner
  - 13a295a3b7 Add *pkg* and *snapper* to team-suse
  - 35c7b7b0d3 Add btrfs, xfs, yumpkg, and kubernetes file to team-suse
  - 485d777ac0 Add team-suse to CODEOWNERS file for zypper files
- **PR** #46434: (gtmanfred) split return key value correctly @ *2018-03-09 17:45:21 UTC*
  - cac096b311 Merge pull request #46434 from gtmanfred/highstate_return
  - d18f1a55a7 fix pylint
  - 9e2c3f7991 split return key value correctly
- **ISSUE** #44452: (konstest) salt-cloud can't create snapshots, because there is a bug in the Unicode name of the virtual machine (refs: #46455)
- **PR** #46455: (whytewolf) .format remove fix for #44452 @ *2018-03-09 17:37:19 UTC*
  - 7dd71101ce Merge pull request #46455 from whytewolf/Issue_44452_unicode_cloud
  - 5fe474b1a8 .format remove fix for #44452
- **PR** #46428: (twangboy) Fix issue with dev env install on Windows @ *2018-03-09 14:52:46 UTC*
  - 4c8d9026d3 Merge pull request #46428 from twangboy/win_fix_reqs
  - e7ab97cc17 Remove six as a hard dep for Salt
  - cc67e5c2ef Set six to 1.11.0
- **PR** #46454: (gtmanfred) fix windows for kitchen @ *2018-03-08 21:19:31 UTC*
  - e834d9a63b Merge pull request #46454 from gtmanfred/kitchen
  - b8ab8434a5 fix windows for kitchen

- **ISSUE** #46451: (gmacon) SPM fails to start with customized cache location (refs: #46452)
- **PR** #46452: (gtmanfred) make spm cache_dir instead of all cachedirs @ *2018-03-08 21:12:20 UTC*
  - 2886dca88f Merge pull request #46452 from gtmanfred/spm_cache_dir
  - 169cf7a4e2 make spm cache_dir instead of all cachedirs
- **PR** #46446: (bdrung) Fix various typos @ *2018-03-08 21:11:47 UTC*
  - a188984cd9 Merge pull request #46446 from bdrung/fix-typos
  - 7e6e80be87 heat: Fix spelling mistake of environment
  - a3c54b50f6 Fix various spelling mistakes
- **ISSUE** #20581: (notpeter) Many environments: one pillar_root (all your envs are belong to base) (refs: #46309)
- **PR** #46309: (bdrung) Support dynamic pillar_root environment @ *2018-03-08 19:15:35 UTC*
  - e35fc5263c Merge pull request #46309 from bdrung/dynamic-pillarenv
  - 584b451fd1 Support dynamic pillar_root environment
- **ISSUE** #44032: (PhilippeAB) blockreplace marker_end isn't applied with newline (refs: #46430)
- **PR** #46430: (terminalmage) Improve reliability/idempotence of file.blockreplace state @ *2018-03-08 15:41:38 UTC*
  - 35fe9827fe Merge pull request #46430 from terminalmage/issue44032
  - f9f187e915 Improve reliability/idempotence of file.blockreplace state
- **PR** #46429: (twangboy) Fix problem with __virtual__ in win_snmp @ *2018-03-07 23:26:46 UTC*
  - 2bad0a21c0 Merge pull request #46429 from twangboy/win_fix_snmp
  - 8995a9b8de Fix problem with __virtual__ in win_snmp
- **PR** #46100: (jfindlay) Handle IPv6 scope parameter in resolv.conf @ *2018-03-07 19:51:20 UTC*
  - 93a572f229 Merge pull request #46100 from jfindlay/resolv_scope
  - d5561bedaf tests.unit.grains.core add scoped IPv6 nameserver
  - 4e2e62d508 salt.utils.dns parse scope param for ipv6 servers
- **PR** #46420: (bdrung) Fix SSH client exception if SSH is not found @ *2018-03-07 17:49:00 UTC*
  - 5acc1d5c54 Merge pull request #46420 from bdrung/2017.7
  - e48c13d9e0 Fix SSH client exception if SSH is not found
- **PR** #46379: (angeloudy) TypeError: a bytes-like object is required, not `str' @ *2018-03-07 15:00:47 UTC*
  - ca6a76e317 Merge pull request #46379 from angeloudy/2017.7
  - 3acb59c74c Merge branch `2017.7' into 2017.7
  - d971e0c08b Fix indent
  - 269514683f Update http.py
  - 908c040ac3 Update http.py
  - 51ba3c135b Update http.py
  - 14aba24111 fix bytes-object required error in python 3
- **PR** #46404: (gtmanfred) get 2017.7 ready to switch over to the new jenkins @ *2018-03-07 14:29:30 UTC*

  - 73f9233557 Merge pull request #46404 from gtmanfred/kitchen
  - c56baa95a8 clone .git for the version tests
  - 3620611b5b fix unhold package for debian
  - 5219f7d2ba fix minion log path
- **ISSUE** #46192: (asymetrixs) salt-log-setup: AttributeError `NoneType' object has no attribute `flush' (refs: #46310)
- **PR** #46310: (twangboy) Update the Windows installer build scripts @ *2018-03-06 20:21:58 UTC*
  - ca28cfd4e4 Merge pull request #46310 from twangboy/win_update_installer_build
  - bcf8b19566 Update the installer build
- **PR** #46316: (twangboy) Fix issues with the DSC module @ *2018-03-06 20:16:18 UTC*
  - decccbeca3 Merge pull request #46316 from twangboy/win_fix_dsc
  - 2042d33d59 Fix issues with the DSC module
- **PR** #46394: (Ch3LL) Add mac py2 and py3 packages to mac installation docs @ *2018-03-06 16:45:30 UTC*
  - 95586678c3 Merge pull request #46394 from Ch3LL/mac_doc
  - 158add6661 change oxdownload to oxdownload-{python_version}
  - 21aa848c89 Add mac py2 and py3 packages to mac installation docs
- **ISSUE** #44831: (kivoli) cmd.wait deprecated but cannot replicate conditional execution with onchanges (refs: #46338)
- **PR** #46338: (rallytime) Remove cmd.wait deprecation reference in docs @ *2018-03-05 21:48:52 UTC*
  - 07b5d09ac1 Merge pull request #46338 from rallytime/fix-44831
  - 90771da999 Remove cmd.wait deprecation reference in docs
- **ISSUE** #42438: (ajoaugustine) Failed to send message: hipchat-message (refs: #46333)
- **PR** #46333: (danlsgiga) Fixes color parameter mismatch and handles 204 responses correctly @ *2018-03-05 19:42:26 UTC*
  - 3849e7a085 Merge pull request #46333 from danlsgiga/issue-42438
  - 3b13f37b44 Revert changes in the code and change docs instead
  - 38114a65d8 Fixes color parameter mismatch and handles 204 responses correctly
- **ISSUE** #44935: (grinapo) module.file.replace string seems to be mutated into arrays (refs: #46322)
- **PR** #46322: (terminalmage) yamlify_arg: don't treat leading dashes as lists @ *2018-03-05 15:40:17 UTC*
  - a8f2f1b063 Merge pull request #46322 from terminalmage/issue44935
  - 85ac6a9893 yamlify_arg: don't treat leading dashes as lists
- **PR** #46327: (samilaine) Modify the way a FQDN is handled in the vmware cloud provider. @ *2018-03-05 15:35:37 UTC*
  - da5c282cb2 Merge pull request #46327 from samilaine/fix-vmware-cloud-fqdn
  - 4b8dfb326f Modify the way a FQDN is handled in the vmware cloud provider.
- **PR** #46318: (terminalmage) Skip type-checking for several gitfs/git_pillar/winrepo params @ *2018-03-05 15:04:27 UTC*
  - 78c45d3786 Merge pull request #46318 from terminalmage/squelch-warnings

  - 5889b36646 Skip type-checking for several gitfs/git_pillar/winrepo params

- **ISSUE** #45535: (whytewolf) module_dirs left out salt-ssh, leaving custom ext_pillars and modules out of salt-ssh (refs: #46312)
- **PR** #46312: (gtmanfred) add module_dirs to salt ssh thin tarball @ *2018-03-05 15:00:48 UTC*
  - bb0d6fc263 Merge pull request #46312 from gtmanfred/2017.7
  - 749ae580ed add module_dirs to salt ssh thin tarball
- **ISSUE** #46127: (redbaron4) pip.installed does not pass env_vars when calling freeze to check if package is already installed (refs: #46242)
- **PR** #46242: (redbaron4) Pass env_vars to pip.freeze @ *2018-03-05 14:53:13 UTC*
  - 88b5f7383d Merge pull request #46242 from redbaron4/fix-46127
  - 06dba51617 Make changes from review
  - 727ebe1056 Merge branch `2017.7' into fix-46127
  - 08d1ee8baf Fix Python3 test errors
  - aa9d709015 Pass env_vars to pip.freeze
- **PR** #46265: (Ch3LL) Add username/password to profitbricks conf for cloud tests @ *2018-03-02 21:40:22 UTC*
  - a0716643e4 Merge pull request #46265 from Ch3LL/profit_cloud
  - d4893eab4c Add username/password to profitbricks conf for cloud tests
- **PR** #46306: (rallytime) Back-port #46256 to 2017.7 @ *2018-03-02 21:37:26 UTC*
  - **PR** #46256: (rallytime) Don't install msgpack 0.5.5 (refs: #46306)
  - ed7bffa7e0 Merge pull request #46306 from rallytime/bp-46256
  - 6439bce4a8 Don't install msgpack 0.5.5
- **PR** #46208: (terminalmage) Blacklist os.umask @ *2018-03-02 18:46:07 UTC*
  - 8c2c4e3316 Merge pull request #46208 from terminalmage/audit-umask-usage
  - 9c92aadce8 Disable blacklisted-function check for legitimate uses
  - 58a11aaa26 Disable pylint check in salt-ssh shim
  - ecadf67659 Blacklist os.umask
  - 31b1d98fcb Replace direct use of os.umask with use of existing context manager
  - 82ce546e18 Prevent failed os.makedirs from leaving modified umask in place
- **PR** #46293: (eliasp) Fix Python3 comparison *TypeError* in *salt.modules.upstart* @ *2018-03-02 16:36:10 UTC*
  - **PR** #44624: (eliasp) Fix Traceback when using the *service.enabled* state on non-booted systems (refs: #46293)
  - 978e869490 Merge pull request #46293 from eliasp/2017.7-44624-py3-compat
  - 2e08b0d9c8 Fix Python3 comparison *TypeError* in *salt.modules.upstart*
- **ISSUE** #46128: (Boulet-) Mountpoint in git_pillar (refs: #46264)
- **PR** #46264: (terminalmage) Fix incorrect merge conflict resolution @ *2018-03-02 14:21:13 UTC*
  - bee4a66d0c Merge pull request #46264 from terminalmage/issue46128
  - 68000b7211 Fix incorrect merge conflict resolution

- **PR** #46296: (vutny) [DOC] Add missing params to *pillar.get* docstring @ *2018-03-02 14:19:41 UTC*
  - 1e0b3aa348 Merge pull request #46296 from vutny/doc-pillar-get
  - 1faa8331e1 [DOC] Add missing params to *pillar.get* docstring
- **PR** #45874: (GwiYeong) fix for local client timeout bug @ *2018-03-01 19:39:35 UTC*
  - c490a50452 Merge pull request #45874 from GwiYeong/2017.7-local-client-hotfix
  - 949aefc82b Merge branch `2017.7' into 2017.7-local-client-hotfix
  - 45d663f435 fix for local client timeout bug
- **PR** #46261: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ *2018-03-01 17:55:23 UTC*
  - 8e8a3a2897 Merge pull request #46261 from rallytime/merge-2017.7
  - 8256ae5ee5 Merge branch `2016.11' into `2017.7'
    * 140ef4d6b9 Merge pull request #46253 from rallytime/doc-banners
      · 07ed8c7db3 Update docbanner for SaltConf18
    * 9fe86ee520 Merge pull request #46179 from wedge-jarrad/cifs-remount-fix
      · 9ca25c4313 Add credentials and secretfile to mount.mounted mount_invisible_keys
- **ISSUE** #44046: (t2b) docker_container.running states fail if the argument ulimits is set and a watch requisite is triggered (refs: #46276)
- **PR** #46276: (terminalmage) salt.utils.docker.translate_input: operate on deepcopy of kwargs @ *2018-03-01 15:37:44 UTC*
  - 88a3166589 Merge pull request #46276 from terminalmage/issue44046
  - a14d4daf8c salt.utils.docker.translate_input: operate on deepcopy of kwargs
- **ISSUE** #46182: (oeuftete) docker_container.running is sensitive to HostConfig Ulimits ordering (refs: #46183)
- **PR** #46183: (oeuftete) Fix docker_container.running HostConfig Ulimits comparison @ *2018-02-28 22:22:11 UTC*
  - da60399b8f Merge pull request #46183 from oeuftete/fix-docker-container-running-host-config-ulimits
  - 5b09644429 Sort lists from Ulimits before comparing
  - 0b80f02226 Update old dockerng doc ref
- **ISSUE** #46259: (terminalmage) git_pillar_branch overrides branch defined in git_pillar configuration (refs: #46260)
- **ISSUE** #46258: (terminalmage) git_pillar_base doesn't work for values when PyYAML loads them as int/float (refs: #46260)
- **PR** #46260: (terminalmage) Normalize global git_pillar/winrepo config items @ *2018-02-28 22:05:26 UTC*
  - 509429f08c Merge pull request #46260 from terminalmage/git_pillar
  - b1ce2501fd Normalize global git_pillar/winrepo config items
- **PR** #46101: (jfindlay) In OpenRC exec module, make sure to ignore retcode on status @ *2018-02-28 20:01:37 UTC*
  - a97a3e6fb0 Merge pull request #46101 from jfindlay/openrc_ret
  - 2eef3c65a6 tests.unit.modules.gentoo_service add retcode arg
  - 81ec66fd8b modules.gentoo_service handle stopped retcode

- **PR** #46254: (rallytime) Update enterprise banner @ *2018-02-28 19:54:03 UTC*
  - 1a17593c05 Merge pull request #46254 from rallytime/enterprise-banner
  - f5fae3dedf Update enterprise banner
- **PR** #46250: (terminalmage) Add documentation to the fileserver runner @ *2018-02-28 18:53:49 UTC*
  - 8c50ff32bd Merge pull request #46250 from terminalmage/runner-docs
  - 91b4895087 Add documentation to the fileserver runner
- **ISSUE** #46215: (racker-markh) salt-cloud will only intermittently build rackspace cloud instances with purely private networks (refs: #46243)
- **PR** #46243: (racker-markh) Don't ignore `private_ips' unnecessarily @ *2018-02-28 15:28:29 UTC*
  - 53067cca43 Merge pull request #46243 from racker-markh/fix-openstack-private-network-issue
  - 50c1e140f0 Don't check deny private_ips already in the original list of private_ips
- **ISSUE** #46109: (rombert) archive.extracted takes a long time (> 4 minutes) even though directory exists (refs: #46239)
- **PR** #46239: (terminalmage) archive.extracted: don't check source file when if_missing path exists @ *2018-02-28 15:01:36 UTC*
  - 15405c8760 Merge pull request #46239 from terminalmage/issue46109
  - 586d8b0dcf archive.extracted: don't check source file when if_missing path exists
- **PR** #46221: (terminalmage) Fix hanging tests in integration suite @ *2018-02-27 21:32:25 UTC*
  - 633e1208e4 Merge pull request #46221 from terminalmage/salt-jenkins-854
  - 0eb012659c Fix hanging tests in integration suite
- **PR** #46214: (vutny) [DOC] Replace *note* rST block for GitHub @ *2018-02-27 17:42:37 UTC*
  - 7917277345 Merge pull request #46214 from vutny/formulas-readme-formatting
  - d702846961 [DOC] Replace *note* rST block for GitHub
- **PR** #46203: (Ch3LL) Add 2017.7.5 Release Notes File @ *2018-02-26 21:17:48 UTC*
  - a2e099b744 Merge pull request #46203 from Ch3LL/7.5_release
  - 6ddf3246ce Add 2017.7.5 Release Notes File
- **PR** #46201: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ *2018-02-26 18:56:47 UTC*
  - 973b227818 Merge pull request #46201 from rallytime/merge-2017.7
  - 9ac2101baa Merge branch `2016.11' into `2017.7'
  - a4c5417d23 Merge pull request #46132 from rallytime/2016.11_update_version_doc
    - d2196b6df3 Update release versions for the 2016.11 branch
- **ISSUE** #34423: (bdrung) oscodename wrong on Debian 8 (jessie) (refs: #46139)
- **PR** #46139: (bdrung) Add os grains test cases for Debian/Ubuntu and fix oscodename on Ubuntu @ *2018-02-26 16:44:04 UTC*
  - 89cf2e5061 Merge pull request #46139 from bdrung/os-grains
  - 0b445f2a37 tests: Add unit tests for _parse_os_release()
  - f6069b77ed Fix osfinger grain on Debian

  - 8dde55a761 tests: Add os_grains test cases for Debian
  - ff02ab9937 tests: Add Ubuntu 17.10 (artful) os_grains test case
  - 77d5356aba Fix incorrect oscodename grain on Ubuntu
  - 7e62dc9fd2 tests: Support reading os-release files from disk
  - a92ec0db1b Make _parse_os_release() always callable
  - eee1fe5b38 tests: Dissolve _run_ubuntu_os_grains_tests
  - 1d6ef731fe tests: Deduplicate _run_os_grains_tests()
- **PR** #46133: (rallytime) Update release versions for the 2017.7 branch @ *2018-02-26 16:42:43 UTC*
  - c8c71e75ca Merge pull request #46133 from rallytime/2017.7_update_version_doc
  - 0ed338e643 Update release versions for the 2017.7 branch
- **ISSUE** #46124: (moremo) GitFS saltenv ref won't pick up multiple of the same ref (refs: #46185)
- **PR** #46185: (terminalmage) gitfs: Fix detection of base env when its ref is also mapped to a different env @ *2018-02-26 14:52:16 UTC*
  - 390d592aa6 Merge pull request #46185 from terminalmage/issue46124
  - 3b58dd0da0 gitfs: Fix detection of base env when its ref is also mapped to a different env
- **PR** #46148: (rallytime) [2017.7] Merge forward from 2017.7.3 to 2017.7 @ *2018-02-23 19:21:38 UTC*
  - 705caa8cca Merge pull request #46148 from rallytime/merge-2017.7
  - 25deebf7a6 Merge branch `2017.7.3' into `2017.7'
- **PR** #46137: (damon-atkins) [2017.7] update ec2 pillar arguments with better names @ *2018-02-23 13:32:04 UTC*
  - **PR** #45878: (damon-atkins) ec2_pillar update to fix finding instance-id (refs: #46137)
  - 10a47dcbc4 Merge pull request #46137 from damon-atkins/2017.7_fix_ec2_pillar2
  - 99e7f6a7d3 update ec2 pillar arguments with better names
- **ISSUE** #46004: (github-abcde) opts file_roots gets overwritten with pillar_roots in orchestration run (refs: #46145)
- **PR** #46145: (terminalmage) 3 small fixes for runners/orchestration @ *2018-02-22 22:11:11 UTC*
  - d74cb14557 Merge pull request #46145 from terminalmage/issue46004
  - 467ff841cd pillarenv argument should default to None and not the value from opts
  - 2a185855ea Better solution for fixing the opts munging in pillar.show_pillar runner
  - e2c4702e0c Update tests to reflect changes to the SaltCacheLoader
  - f9301fcc34 Document behavior when orchestration runnner invoked with non-orch states
  - 9644579cd0 Instantiate the SaltCacheLoader's fileclient in the __init__
  - f9a6c86e21 salt.runners.pillar.show_pillar: don't modify master opts
  - e0940a9fc4 Properly detect use of the state.orch alias and add orch jid to kwargs
- **PR** #46135: (rallytime) Back-port #46088 to 2017.7 @ *2018-02-22 15:11:14 UTC*
  - **PR** #46088: (rongzeng54) fix kernel subpackages install bug (refs: #46135)
  - 0398ce0482 Merge pull request #46135 from rallytime/bp-46088
  - 57a60f62a3 fix kernel subpackages install bug

- **ISSUE** #45837: (johje349) Salt Cloud does not recognise all Digitalocean sizes (refs: #46115)
- **PR** #46136: (rallytime) Back-port #46115 to 2017.7 @ *2018-02-21 19:17:23 UTC*
  - **PR** #46115: (samodid) update digitalocean salt-cloud driver (refs: #46136)
  - 1fcbbd1e02 Merge pull request #46136 from rallytime/bp-46115
  - 0a481d707f update digitalocean salt-cloud driver
- **PR** #45911: (twangboy) LGPO Module: Convert reg values to unicode for debug @ *2018-02-21 19:02:17 UTC*
  - 11e5e8eb86 Merge pull request #45911 from twangboy/win_fix_lgpo_unicode
  - bcde5cc625 Update log statement
  - e9fa53d3b7 Change the Invalid Data Message
  - c818d4b791 Convert reg values to unicode for debug
- **ISSUE** #46085: (zmedico) 2017.7.3 salt master with ``open_mode: True'' becomes unresponsive if minion submits empty public key (refs: #46123)
- **PR** #46123: (gtmanfred) If no pubkey is passed in openmode fail @ *2018-02-21 19:01:47 UTC*
  - 524a6a72a0 Merge pull request #46123 from gtmanfred/2017.7
  - 8d36730ef7 If no pubkey is passed in openmode fail
- **PR** #46131: (vutny) [DOC] Fix code-blocks for reStructuredText @ *2018-02-21 15:47:05 UTC*
  - e48fa58012 Merge pull request #46131 from vutny/doc-formula-formatting
  - d8fb051e44 [DOC] Fix code-blocks for reStructuredText
- **ISSUE** #42763: (xuhcc) acme.cert state falsely reports about renewed certificate (refs: #44603)
- **ISSUE** #40208: (bewing) Inconsistent state return when test=True (refs: #44603)
- **PR** #46118: (rallytime) Back-port #44603 to 2017.7 @ *2018-02-21 15:21:42 UTC*
  - **PR** #44603: (oarmstrong) Fix acme state to correctly return on test (refs: #46118)
  - 6cea44ee95 Merge pull request #46118 from rallytime/bp-44603
  - 2a2c23c66b Fix acme state to correctly return on test
- **PR** #46121: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ *2018-02-21 10:07:18 UTC*
  - 16c382b55b Merge pull request #46121 from rallytime/merge-2017.7
  - 4c2f504a85 Merge branch `2016.11' into `2017.7'
    * e197a0fbc5 Merge pull request #46076 from rallytime/bp-46066
      · b94d73c53e Pin tornado version in requirements file
    * c72c1bde5f Merge pull request #46093 from wedge-jarrad/contributing-doc-typo
      · 5a0fe104f7 Fix contributing doc typo
    * 3cb83ea87e Merge pull request #45992 from bgridley/fix-routes-present-state
      · 679787699c Add vpc_peering_connection_id to describe_route_tables route_keys
    * 8a60635da0 Merge pull request #46000 from terminalmage/issue45910
      · 8cf13325ee salt.states.reg.present: Prevent traceback when reg data is binary
    * 1f44e285dc Merge pull request #46011 from terminalmage/fix-solaris-runas

        - 8ee0a3a28b Move Solaris USER workaround up a bit
        - 13cdb52690 cmdmod.py: runas workaround for platforms that don't set a USER env var
    * 30fb8f7be0 Merge pull request #45467 from twangboy/win_exclude_hidden
        - ea41215646 Make the regex pattern less greedy
        - 6d223cffa7 Add tip about passing bogus saltenv
        - 1282ae3a93 Skip hidden first
        - 437a457911 Skip hidden dirs in genrepo
        - 87dc554dc3 Add final updates to docs
        - 3646d5c897 Fix some docs formatting, add some warnings
        - 35c81faf5a Log the source_dir when caching the files
        - 91c3da8dfd Improve docs for pkg.refresh_db
        - 4803d92707 Add some documentation
        - 08b82e0875 Fix lint error, use raw
        - 2f712691cf Exclude hidden directories in pkg.refresh_db
- **ISSUE** #46106: (amendlik) yumpkg.refresh_db hangs (refs: #46107)
- **PR** #46107: (amendlik) Add --assumeyes on YUM/DNF commands @ *2018-02-20 22:52:06 UTC*
    - b92346645b Merge pull request #46107 from amendlik/yumpkg-assumeyes
    - 8d9a432fb2 Add --assumeyes to yum/dnf commands in yumpkg.refresh_db
- **PR** #46094: (kstreee) Fix memory leak @ *2018-02-20 21:36:02 UTC*
    - 14fe423e0c Merge pull request #46094 from kstreee/fix-memory-leak
    - 48080a1bae Fixes memory leak, saltclients should be cleaned after used.
    - aba00805f4 Adds set_close_callback function to removes stream instance after closed from a set streams.
- **ISSUE** #13: (thatch45) Expand the stats module (refs: #46097)
- **PR** #46097: (vutny) [DOC] Put https link to the formulas doc page @ *2018-02-20 17:07:39 UTC*
    - 320c2037e1 Merge pull request #46097 from vutny/fix-https-link
    - 2062fd0e5c [DOC] Put https link to the formulas doc page
- **PR** #46103: (bdrung) Fix skipping Kubernetes tests if client is not installed @ *2018-02-20 16:33:42 UTC*
    - 0eb137fb4e Merge pull request #46103 from bdrung/2017.7
    - dd3f936557 Fix skipping Kubernetes tests if client is not installed
- **PR** #46070: (Ch3LL) add required arg to dns_check jinja doc example @ *2018-02-16 20:00:44 UTC*
    - c3a938e994 Merge pull request #46070 from Ch3LL/fix-doc-dns
    - 2a5d855d97 add required arg to dns_check jinja doc example
- **PR** #46067: (rallytime) Back-port #45994 to 2017.7 @ *2018-02-16 19:55:27 UTC*
    - **PR** #45994: (nullify005) Fix hosted zone Comment updates & quote TXT entries correctly (refs: #46067)
    - 01042e9d77 Merge pull request #46067 from rallytime/bp-45994
    - a07bb48726 Correct formatting for lint

  - e8678f633d Fix Comment being None not `' and inject quotes into the TXT ChangeRecords

- **ISSUE** #42932: (bobrik) cmd.run with bg: true doesn't fail properly (refs: #45932)
- **PR** #45932: (The-Loeki) Fix cmd run_all bg error @ *2018-02-16 14:53:15 UTC*
  - **PR** #39980: (vutny) [2016.3] Allow to use *bg* kwarg for *cmd.run* state function (refs: #45932)
  - 5e0e2a30e2 Merge pull request #45932 from The-Loeki/fix_cmd_run_all_bg
  - f83da27ca5 Merge branch `2017.7' into fix_cmd_run_all_bg
  - 771758fbca Merge branch `2017.7' into fix_cmd_run_all_bg
  - c54fcf7a2d cmd: move separate DRY logging blocks into _run, prevent logging on bg=True, don't use_vt on bg
  - ebb1f81a9b cmd run: when running in bg, force ignore_retcode=True
- **PR** #46062: (vutny) Fix typo in postgres_user.present state function @ *2018-02-16 14:44:29 UTC*
  - 45ace39961 Merge pull request #46062 from vutny/pg-user-state-fix-typo
  - a5fbe4e95e Fix typo in postgres_user.present state function
- **PR** #45763: (twangboy) Fix rehash function in win_path.py @ *2018-02-15 20:05:16 UTC*
  - edcb64de76 Merge pull request #45763 from twangboy/win_fix_path_rehash
  - b9a2bc7b29 Fix hyperlinks
  - 29912adc15 Move the test_rehash test to test_win_functions
  - adc594c183 Remove duplicate link
  - e84628c1eb Add some comments to the code
  - d50d5f582f Add additional info to docs for *broadcast_setting_change*
  - 3a54e09cd9 Rename setting to message
  - a3f9e99bc0 Change to a generic function to broadcast change
  - 79299361c3 Create refresh_environment salt util
  - 967b83940c Fix rehash function
- **PR** #46042: (jfindlay) Revise file_tree pillar module documentation @ *2018-02-15 19:29:52 UTC*
  - **PR** #46027: (jfindlay) Revise file_tree pillar module documentation (refs: #46042)
  - a46fbc546c Merge pull request #46042 from jfindlay/file_tree_doc
  - 0ba4954a4b salt.pillar.file_tree revise module documentation
  - 3c6a5bf967 salt.pillar.file_tree provide better debug info
  - bb1cdc451e salt.pillar.file_tree no stack trace when nodegroups undefined
- **PR** #46013: (rallytime) Back-port #45598 to 2017.7 @ *2018-02-15 16:11:05 UTC*
  - **PR** #45598: (nullify005) Patch around ResourceRecords needing to be present for AliasTarget (refs: #46013)
  - de86126dd8 Merge pull request #46013 from rallytime/bp-45598
  - 2ea3fef543 No lazy logging
  - f427b0febc Change formatting style of logging lines per review
  - ebb244396b Patch around ResourceRecords needing to be present for AliasTarget entries to work

- **ISSUE** #45825: (philpep) selinux.fcontext_policy_present doesn't work on Centos 6 with filetype = all files (refs: #45826)
- **PR** #46016: (rallytime) Back-port #45826 to 2017.7 @ *2018-02-14 18:16:24 UTC*
  - **PR** #45826: (philpep) Fix selinux.fcontext_policy_present for Centos 6 (refs: #46016)
  - 07e5735471 Merge pull request #46016 from rallytime/bp-45826
  - 1916e5c4a4 Fix selinux.fcontext_policy_present for Centos 6
- **ISSUE** #45784: (oarmstrong) SELinux module fcontext_get_policy fails with long regex (refs: #45785)
- **PR** #46015: (rallytime) Back-port #45785 to 2017.7 @ *2018-02-14 18:16:09 UTC*
  - **PR** #45785: (oarmstrong) m/selinux.fcontext_get_policy allow long filespecs (refs: #46015)
  - a1f4092811 Merge pull request #46015 from rallytime/bp-45785
  - ef6ffb1492 Resolve linting errors
  - 8047066c46 Remove unused import
  - 8f7c45935a Add tests for salt.modules.selinux.fcontext_get_policy
  - bafb7b4e6e Ensure parsed fields are stripped
  - a830a6e819 m/selinux.fcontext_get_policy allow long filespecs
- **PR** #46012: (rallytime) Back-port #45462 to 2017.7 @ *2018-02-14 18:14:56 UTC*
  - **PR** #45462: (aphor) emit port cli version, variants as separate args (refs: #46012)
  - 96097c037e Merge pull request #46012 from rallytime/bp-45462
  - 9f76836a6c emit port cli version, variants as separate args
- **PR** #45991: (terminalmage) yumpkg: Fix a couple issues with _get_extra_opts @ *2018-02-14 16:48:28 UTC*
  - 1279924f5f Merge pull request #45991 from terminalmage/fix-duplicate-extra-opts
  - 916766f651 yumpkg: Fix a couple issues with _get_extra_opts
- **PR** #46017: (rallytime) [2017.7] Merge forward from 2017.7.3 to 2017.7 @ *2018-02-13 21:43:15 UTC*
  - 8b9adc258e Merge pull request #46017 from rallytime/merge-2017.7
  - a06645ce71 Merge branch `2017.7.3' into `2017.7'
- **ISSUE** #45796: (L4rS6) aliases module doesn't follow symlinks (refs: #45797)
- **PR** #45988: (rallytime) Back-port #45797 to 2017.7 @ *2018-02-13 17:49:02 UTC*
  - **PR** #45797: (L4rS6) follow symlinks in aliases module (close #45796) (refs: #45988)
  - d20ff89414 Merge pull request #45988 from rallytime/bp-45797
  - 953a400d79 follow symlinks
- **PR** #45711: (bdrung) Fix Unicode tests when run with LC_ALL=POSIX @ *2018-02-13 17:42:07 UTC*
  - b18087cee0 Merge pull request #45711 from bdrung/fix-unicode-tests
  - b6181b5ed6 Fix Unicode tests when run with LC_ALL=POSIX
- **PR** #45878: (damon-atkins) ec2_pillar update to fix finding instance-id (refs: #46137) @ *2018-02-13 17:34:14 UTC*
  - 5271fb1d40 Merge pull request #45878 from damon-atkins/2017.7_fix_ec2_pillar
  - 0e74025714 Merge branch `2017.7' into 2017.7_fix_ec2_pillar

  - b4d0b23891 py3 fix
  - 75d9e20d8a Add ignoring `terminated', `stopped' instances, to improve changes of a single match
  - 0093472a37 added tag_key_list and tag_key_sep to create ec2_tags_list
  - afb3968aa7 ec2_pillar could not find instance-id, resolved. add support to use any tag to compare minion id against.

- **PR** #45942: (terminalmage) Fix incorrect translation of docker port_bindings -> ports (2017.7 branch) @ *2018-02-13 16:10:03 UTC*
  - cf367dbd04 Merge pull request #45942 from terminalmage/issue45679-2017.7
  - 89cbd72a0d Don't try to sort ports when translating docker input
  - 9cd47b39dd Fix incorrect translation of docker port_bindings -> ports
- **PR** #45959: (rallytime) A couple of grammar updates for the state compiler docs @ *2018-02-12 22:17:49 UTC*
  - dae41de7a8 Merge pull request #45959 from rallytime/state-doc-update
  - 6f781cb95d A couple of grammar updates for the state compiler docs
- **ISSUE** saltstack/salt#45884: (tintoy) ``TypeError: can't serialize <NodeImage'' when calling salt-cloud with the dimensiondata driver (refs: #45908)
- **ISSUE** #45884: (tintoy) ``TypeError: can't serialize <NodeImage'' when calling salt-cloud with the dimensiondata driver (refs: #45908)
- **PR** #45908: (tintoy) Fix for #45884 (``TypeError: can't serialize <NodeImage'' when calling salt-cloud with the dimensiondata driver) @ *2018-02-12 22:05:29 UTC*
  - 007214f7bf Merge pull request #45908 from DimensionDataResearch/fix/issue/45884
  - 1a75786b5a Fix linter warnings.
  - 82ec0b589c Revert to using salt.utils.cloud.is_public_ip.
  - 9b6b01873b Fix violations reported by flake8.
  - a2bc155c73 Use __utils__['cloud.'] instead of salt.cloud.utils.
  - 98907a32cb Ensure `auth' parameter is correctly passed to dimensiondata driver.
  - de26b03e2c Fix copy/paste bug in dimensiondata provider integration test.
  - 6b1b6be427 Add integration tests for dimensiondata cloud provider.
  - f6ea9fed7d Ensure that event data provided by the dimensiondata driver is serialisable.
- **PR** #45985: (garethgreenaway) [2017.7] Backport #45894 - Missing *format* in the call to write. @ *2018-02-12 20:22:31 UTC*
  - **PR** #45894: (while0pass) Fix inconcistencies in param description (refs: #45985)
  - efcbfa868c Merge pull request #45985 from garethgreenaway/2017_7_fixing_mac_tests_again
  - 7b8dc14433 Missing *format* in the call to write.
- **PR** #45958: (garethgreenaway) Backporting #45935 to 2017.7 @ *2018-02-12 16:25:07 UTC*
  - **PR** #45936: (garethgreenaway) [oxygen] Fix to log/handlers/__init__.py (refs: #45958)
  - **PR** #45935: (rallytime) Back-port #45742 to 2017.7.3 (refs: #45958)
  - **PR** #45742: (marccardinal) list.copy() is not compatible with python 2.7 (refs: #45935)
  - bf03abd07c Merge pull request #45958 from garethgreenaway/backport-fixing_mactests_queue_full

  - 25dffaae91 Backporting #45935

- **PR** #45949: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ *2018-02-09 22:32:09 UTC*
  - bab365d6c6 Merge pull request #45949 from rallytime/merge-2017.7
  - f51687e903 Merge branch `2016.11' into `2017.7'
  - 7779fea7ba Merge pull request #45940 from dmurphy18/fix_aix_cmdmod
    * dd2788419b Fix use of `su' for AIX to use `-`
- **ISSUE** #45915: (MatthiasKuehneEllerhold) 2017.7.3: Salt-SSH & Vault Pillar: Permission denied ``minion.pem'' (refs: #45928)
- **PR** #45928: (garethgreenaway) [2017.7] Fixing vault when used with pillar over salt-ssh @ *2018-02-09 16:32:35 UTC*
  - 7fd00ec752 Merge pull request #45928 from garethgreenaway/45915_fixing_vault_pillar_for_salt_ssh
  - 259e60e5d4 Fixing vault when used with pillar over salt-ssh
- **PR** #45925: (terminalmage) Fix spelling error in docstring @ *2018-02-08 21:52:35 UTC*
  - 9d14ad9ccf Merge pull request #45925 from terminalmage/fix-spelling
  - 7a143fe454 Fix spelling error in docstring
- **PR** #45920: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ *2018-02-08 15:43:49 UTC*
  - 0cbe93cd69 Merge pull request #45920 from rallytime/merge-2017.7
  - e4e4744218 Merge branch `2016.11' into `2017.7'
  - 27ff82f996 Merge pull request #45864 from rallytime/release-note-fix
    * 104a24f244 Remove extraneous] in release notes for 2016.11.9
  - 5fa010de2b Merge pull request #45787 from rallytime/2016.11.9_docs
    * a38d4d44fa [2016.11] Bump latest and previous versions
- **ISSUE** #45805: (bgridley) Execution module victorops throws an error ``RuntimeError: dictionary changed size during iteration'' (refs: #45814)
- **PR** #45814: (gtmanfred) fix cookies dict size changing in http.query @ *2018-02-08 15:35:30 UTC*
  - 643a8a5278 Merge pull request #45814 from gtmanfred/2017.7
  - d8eec9aa97 fix cookies dict size changing in http.query
- **PR** #45877: (rallytime) Add release notes file for 2017.7.4 release @ *2018-02-08 14:07:43 UTC*
  - 3a3f87c16d Merge pull request #45877 from rallytime/new-release-notes
  - f937e8ba81 Add release notes file for 2017.7.4 release
- **PR** #45904: (rallytime) Back-port #41017 to 2017.7 @ *2018-02-08 13:57:45 UTC*
  - **PR** #41017: (cebe) Fixed typo in pkg state documentation (refs: #45904)
  - 1c3cc00670 Merge pull request #45904 from rallytime/bp-41017
  - 80c56cdcea Fixed typo in pkg state documentation
- **PR** #45907: (terminalmage) Fix backport of grains fix @ *2018-02-08 13:57:26 UTC*
  - 317d35bd15 Merge pull request #45907 from terminalmage/fix-grains-backport
  - 6cf7e50cc4 Fix backport of grains fix

- **PR** #45906: (rallytime) Back-port #45548 to 2017.7 @ *2018-02-08 13:57:07 UTC*
  - **PR** #45548: (viktordaniel) Update x509.py - documentation fix (refs: #45906)
  - dade5f0cab Merge pull request #45906 from rallytime/bp-45548
  - 1befa7386c Update x509.py
- **ISSUE** #45893: (CrackerJackMack) archive.extracted ValueError ``No path specified'' in 2017.7.3 (refs: #45902)
- **PR** #45902: (terminalmage) Check the effective saltenv for cached archive @ *2018-02-08 13:42:00 UTC*
  - 82c473a1fe Merge pull request #45902 from terminalmage/issue45893
  - 9d200efc26 Add regression test for issue 45893
  - 1468f1d0ff Remove duplicated section in docstring and fix example
  - 6cc5cd9b8a Check the effective saltenv for cached archive
- **PR** #45862: (rallytime) Back-port #45830 to 2017.7 @ *2018-02-08 13:22:26 UTC*
  - **PR** #45830: (garethgreenaway) [oxygen] Catch exception when logging queue is full (refs: #45862)
  - fdedde3cfb Merge pull request #45862 from rallytime/bp-45830
  - 1024856f9a Wrapping the put_nowait in a try...except and catching the exception when the multiprocessing queue is full. This situation is happening when running the full testing suite on MacOS where the queue limit is 32767 vs on Linux where the queue limit is unlimited.
- **PR** #45779: (The-Loeki) SSH shell shim: Don't use $() for optimal support @ *2018-02-05 18:35:21 UTC*
  - 43a45b42c3 Merge pull request #45779 from The-Loeki/patch-3
  - 8575ae3d52 Merge branch `2017.7' into patch-3
  - 47cf00d88e SSH shell shim: Don't use $() for optimal support
- **PR** #45788: (rallytime) [2017.7] Bump latest and previous versions @ *2018-02-05 15:30:46 UTC*
  - cca997d0da Merge pull request #45788 from rallytime/2017.7.3_docs
  - d5faf6126b [2017.7] Bump latest and previous versions
- **PR** #45842: (rallytime) Back-port #45827 to 2017.7 @ *2018-02-05 15:04:11 UTC*
  - **PR** #45827: (terminalmage) Fix traceback in disks grains when /sys/block not available (refs: #45842)
  - 746206cebe Merge pull request #45842 from rallytime/bp-45827
  - c631598a87 Fix traceback in disks grains when /sys/block not available
- **ISSUE** #44978: (doesitblend) State duration not always calculated (refs: #45721)
- **PR** #45721: (garethgreenaway) [2017.7] Ensure duration and start time exist @ *2018-02-05 14:59:33 UTC*
  - 900aadcd67 Merge pull request #45721 from garethgreenaway/44978_show_duration_when_no_state_run
  - 359265869f Adding a couple tests to ensure that duration is included in state run results even when states do not run.
  - 912347abc3 Include the duration when a state does not run, for example when the *onchanges* requisite is not met.
- **PR** #45517: (kstreee) Fixes base dir making logic to ensure not raising the exception when base directory already exists. @ *2018-02-05 14:56:23 UTC*
  - 80a2d009b4 Merge pull request #45517 from kstreee/fix-mkdir

  - 24d41f2451 Fixes base dir making logic to ensure not raising the exception when base directory already exists.

- **PR** #45835: (kstreee) Adds a missing return statement. @ *2018-02-02 22:51:41 UTC*
  - 7a4b1b2e77 Merge pull request #45835 from kstreee/fix-missing-return-statement
  - 68c7f3dcba Adds a missing return statement.
- **PR** #45840: (rallytime) Back-port #45603 to 2017.7 @ *2018-02-02 20:17:32 UTC*
  - **PR** #45603: (andreaspe) Fix for duplicate entries with pkrepo.managed (refs: #45840)
  - 0a04f118c2 Merge pull request #45840 from rallytime/bp-45603
  - 9653363131 Fix for duplicate entries with pkrepo.managed
- **ISSUE** #44315: (whytewolf) cmd.* cwd does not escape spaces. 2017.7.2 (refs: #45134)
- **PR** #45716: (ciiqr) fixed quoting of script path in cmd.script @ *2018-02-02 14:36:49 UTC*
  - **PR** #45134: (garethgreenaway) [2017.7] fix to cmd.script for cwd with space (refs: #45716)
  - bd2178cd5f Merge pull request #45716 from ciiqr/fix_cmd_script_quoting
  - 217791079b some code cleanup (lint errors and escape_argument as _cmd_quote)
  - 1c29bc5a3d fixed quoting of script path in cmd.script
- **ISSUE** #45684: (bdrung) salt documentation fails to build with Python 3 version of sphinx (refs: #45719)
- **PR** #45719: (bdrung) Fix python3 sphinx build @ *2018-02-02 14:20:37 UTC*
  - 272f912c7c Merge pull request #45719 from bdrung/fix-python3-sphinx-build
  - 179e8fbe73 doc: Do not mock non-existing __qualname__ attribute
  - 971e59ebe2 Drop enforcing new-style object for SaltYamlSafeLoader
- **PR** #45764: (mchugh19) support amazon linux 2 for service module @ *2018-02-02 14:12:07 UTC*
  - **PR** #45758: (mchugh19) support amazon linux 2 for service module (refs: #45764)
  - fc04336c3b Merge pull request #45764 from mchugh19/2017.7
  - 0a7f1a4d75 English better
  - 37e067c7b5 support amazon linux 2 for service module
- **PR** #45756: (roaldnefs) Fix Grafana4 states documentation @ *2018-01-31 19:01:33 UTC*
  - f234bf52f4 Merge pull request #45756 from roaldnefs/fix-grafana4-documentation
  - 92979c0b57 Fix grafana4 states documentation
- **PR** #45801: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ *2018-01-31 18:55:52 UTC*
  - 685b683db5 Merge pull request #45801 from rallytime/merge-2017.7
  - 26e992e011 Merge branch `2016.11' into `2017.7'
    * 746386d04c Merge pull request #45794 from vutny/doc-file-state-examples
      · ddfeae6a29 [DOC] Fix code-block rST directive in file state module
    * abc9ece214 Merge pull request #45780 from vutny/doc-pkgrepo-zypper
      · f80c7d8d69 [DOC] Add missing gpgautoimport for pkgrepo.managed
- **PR** #45802: (rallytime) [2017.7] Merge forward from 2017.7.3 to 2017.7 @ *2018-01-31 18:55:35 UTC*

    - c7d319f3bc Merge pull request #45802 from rallytime/merge-2017.7-from-2017.7.3
    - eb48513ba0 Merge branch `2017.7.3' into `2017.7'
- **ISSUE** #45738: (UtahCampusD) minion cache overwritten for scheduled jobs (refs: #45761)
- **PR** #45761: (gtmanfred) generate a jid for cache_jobs on the minion @ *2018-01-31 18:01:53 UTC*
    - 96e9232cc2 Merge pull request #45761 from gtmanfred/2017.7
    - 280767ed57 generate a jid for cache_jobs on the minion
- **ISSUE** #45301: (twangboy) Ctl+C causes stack trace on Windows (refs: #45707)

25.2.10 In Progress: Salt 2017.7.6 Release Notes

Version 2017.7.6 is an **unreleased** bugfix release for *2017.7.0*. This release is still in progress and has not been released yet.

Statistics

- Total Merges: **182**
- Total Issue References: **60**
- Total PR References: **217**
- Contributors: **47** (Ch3LL, DmitryKuzmenko, GwiYeong, Quarky9, RichardW42, UtahDave, amaclean199, arif-ali, baniobloom, bdrung, benediktwerner, bmiguel-teixeira, cachedout, dafenko, damon-atkins, dwoz, ezh, folti, fpicot, frogunder, garethgreenaway, gtmanfred, isbm, jeroennijhof, jfindlay, jfoboss, kstreee, lomeroe, mattp-, meaksh, mirceaulinic, myinitialsarepm, mzbroch, nages13, paclat, pcjeff, pruiz, psyer, rallytime, s0undt3ch, skizunov, smitty42, terminalmage, twangboy, vutny, yagnik, yannj-fr)

Option to Return to Previous Pillar Include Behavior

Prior to version 2017.7.3, keys from *pillar includes* would be merged on top of the pillar SLS. Since 2017.7.3, the includes are merged together and then the pillar SLS is merged on top of that.

The `pillar_includes_override_sls` option has been added allow users to switch back to the pre-2017.7.3 behavior.

Changelog for v2017.7.5..v2017.7.6

Generated at: 2018-05-29 14:05:53 UTC

- **PR** #47632: (gtmanfred) handle new _create_stream in tornado 5.0 @ *2018-05-18 14:25:17 UTC*
    - 266749420f Merge pull request #47632 from gtmanfred/2017.7.6
    - 2c50c0d2f5 fix pylint
    - 4a29057b16 Fix last test for tornado
    - 550ef2e272 allow using tornado 5.0
    - 62e468448b handle new _create_stream in tornado 5.0
- **PR** #47720: (rallytime) Back-port #47692 to 2017.7.6 @ *2018-05-18 13:23:03 UTC*
    - **PR** #47692: (dwoz) Default windows to m1.small for ec2-classic (refs: #47720)
    - 2643c356af Merge pull request #47720 from rallytime/bp-47692-2017.7.6
    - 6e5cb36839 Default windows to m1.small for ec2-classic
        * 20d9785244 fix roots modification time check
    - aef37dd1ce fix roots modification time check
    - d51662e053 Ensure targeted_pkgs always contains value for non-windows.
    - 83b4224cf8 Adjusted based on feed back.
    - 12f983ce9f Whitespace lint issues
    - 075d3d3c49 pkg.install execution module on windows ensures the software package is installed when no version is specified, it does not upgrade the software to the latest. This is per the design. pkg.latest must provide the versions to install to pkg.install
- **PR** #47667: (Ch3LL) Update test_mac_user_enable_auto_login to test both py2 and py3 @ *2018-05-16 15:54:49 UTC*
    - 16c2153385 Merge pull request #47667 from Ch3LL/mac_user_enable
    - ba40d3d1a1 Update test_mac_user_enable_auto_login to test both py2 and py3
- **PR** #47645: (Ch3LL) query the pip path for test test_issue_2087_missing_pip @ *2018-05-15 17:16:10 UTC*
    - a4921e86c9 Merge pull request #47645 from Ch3LL/py3_rm_pip
    - 225d90ad4c query the pip path for test test_issue_2087_missing_pip
- **PR** #47646: (rallytime) Back-port #47601 and #47643 to 2017.7.6 @ *2018-05-15 14:04:45 UTC*
    - **PR** #47643: (dwoz) Remove unwanted file (refs: #47646)
    - **PR** #47601: (dwoz) Skip tests when we can not use runas (refs: #47646)
    - e441733ac1 Merge pull request #47646 from rallytime/bp-47601-and-47643
    - 9e1d1a5ef8 Fix typo
    - 4e94609136 Remove unwanted file
    - 0109249c78 use ignore-undefined-variable
    - 37caecb7f4 Ignore pylint WindowsError
    - c1135d90c7 Better doc string
    - e53d6b9ed9 Skip tests when we can not use runas

- **PR** #47570: (gtmanfred) Update dependency to msgpack @ *2018-05-10 13:23:09 UTC*
  - 6f178ca908 Merge pull request #47570 from gtmanfred/2017.7.6
  - 84aa034e03 Update dependency to msgpack
- **PR** #47523: (rallytime) [2017.7.6] Update man pages @ *2018-05-08 13:31:19 UTC*
  - 98bd598701 Merge pull request #47523 from rallytime/man-pages
  - 48ecb78dec [2017.7.6] Update man pages
- **ISSUE** #47443: (skylerberg) Input validation does not raise SaltInvocationError in win_dsc.py (refs: #47505)
- **PR** #47517: (rallytime) Back-port #47505 to 2017.7.6 @ *2018-05-07 19:42:37 UTC*
  - **PR** #47505: (dwoz) Raise proper invocation errors (refs: #47517)
  - e608ea9617 Merge pull request #47517 from rallytime/bp-47505-2017.7.6
  - 0734578533 Raise proper invocation errors
- **PR** #47476: (gtmanfred) Specify the cache directory for newer virtualenv modules @ *2018-05-04 19:20:45 UTC*
  - 611ca1fc03 Merge pull request #47476 from gtmanfred/2017.7
  - 1f91a85587 specify cache dir for pip install
  - 99e150e09c check for kitchen-vagrant gem before loading windows tests
- **PR** #47412: (twangboy) Fix issue where the cwd was being removed @ *2018-05-04 17:28:11 UTC*
  - 7c3f2c56da Merge pull request #47412 from twangboy/fix_47125
  - c9bab0b8e3 Merge branch `2017.7' into fix_47125
  - 2600e404d5 Fix overly long line
  - 5c8db05769 Fix issue where the cwd was being removed
- **PR** #47467: (twangboy) Remove unused settings, update NSIS @ *2018-05-04 17:11:37 UTC*
  - 4846e957c4 Merge pull request #47467 from twangboy/cleanup_settings
  - 9d498293b1 Remove unused settings, update NSIS
- **PR** #47196: (twangboy) Fix issues with pip @ *2018-05-04 14:23:04 UTC*
  - da9871d36b Merge pull request #47196 from twangboy/fix_47024
  - 14ee5537b9 Add @with_tempdir helper
  - 6c3b5fa6fa Fix typo
  - f031710af2 Merge branch `2017.7' into fix_47024
  - 7c46d9d0d4 Fix integration.modules.test_pip
  - 22ac81df63 Fix integration.modules.test_pip
  - 57d98224d4 Merge pull request #9 from terminalmage/twangboy/fix_47024
    - 37a13d8004 Update pip unit tests to reflect changes
    - 7f86779be0 Lint fix
  - c48d8f4f61 DRY and other fixes in pip module
  - b1117896a0 Change from global variable to __context__``
  - 3e6e524eca Fix some tests``

  - c94f0f20e4 Fix lint error
  - fd47b21530 Fix merge conflict
- **PR** #47455: (Ch3LL) Add In Progress Warning for 2017.7.6 Release Notes @ *2018-05-04 13:44:54 UTC*
  - e8c4524bae Merge pull request #47455 from Ch3LL/unreleased_rn
  - b6d0cc2ab7 Add In Progress Warning for 2017.7.6 Release Notes
- **PR** #47459: (gtmanfred) update ubuntu-rolling to 18.04 @ *2018-05-03 20:39:20 UTC*
  - 2c7a4b6179 Merge pull request #47459 from gtmanfred/2017.7
  - d228e72477 update ubuntu-rolling to 18.04
- **PR** #47462: (terminalmage) Fix docs build on Sphinx 1.7+ @ *2018-05-03 20:06:57 UTC*
  - 64a64c0ed7 Merge pull request #47462 from terminalmage/docs
  - 6d7803ece0 Fix docs build on Sphinx 1.7+
- **ISSUE** #47436: (lomeroe) Some Administrative Template policies are not properly set by lgpo (refs: #47438)
- **ISSUE** #44516: (doesitblend) Windows PY3 Minion Returns UTF16 UnicodeError (refs: #44944)
- **PR** #47438: (lomeroe) lgpo fix for issue #47436 @ *2018-05-03 14:40:27 UTC*
  - **PR** #44944: (lomeroe) win_lgpo registry.pol encoding updates (refs: #46913, #47438)
  - 6cd0d31c03 Merge pull request #47438 from lomeroe/double_admx_test
  - 4902f1e2ba check if a policy has either an enabled value or enabled list entry or a disabled value or disabled list entry when determining the state of the policy
- **ISSUE** #45790: (bdarnell) Test with Tornado 5.0b1 (refs: #47106, #47433)
- **PR** #47433: (s0undt3ch) Add missing requirements files not commited in #47106 @ *2018-05-02 20:57:14 UTC*
  - **PR** #47106: (DmitryKuzmenko) Tornado50 compatibility fixes (refs: #47433)
  - ed69821d19 Merge pull request #47433 from s0undt3ch/2017.7
  - 5abadf25d6 Add missing requirements files not commited in #47106
- **ISSUE** #47424: (bcharron) ``salt-cloud -m'' fails with nova driver: ``There was a query error: u'state'" (refs: #47429)
- **PR** #47429: (gtmanfred) server_list_min should use state, not status @ *2018-05-02 16:27:56 UTC*
  - 7ae3497b0c Merge pull request #47429 from gtmanfred/2017.7
  - 8ae32033cc server_list_min should use state, not status
- **PR** #47399: (isbm) zeromq 17 deprecation warning backport from 2018.3 + tornado 5 fixes @ *2018-05-02 15:11:16 UTC*
  - 2f5fc4ecc5 Merge pull request #47399 from isbm/isbm-zeromq17-deprecationwarning-2017.7.2-v2
  - a36e49fd27 fix pylint
  - 98b5629b36 Fix imports
  - d94c0f0152 Remove unnecessary variable
  - 8e377b5653 Lintfix: E0203 and attribute access
  - 2aab70b1b8 Install ZMQ handler if <15 version
  - 296c589f4b Use ZMQ switch utility in the integration tests

  - ab5fa34d7c Use ZMQ_VERSION_INFO constant everywhere
  - 43b5558b82 Add trace logging on ZMQ sockets communication
  - 164204a9fe Remove duplicate code for ZMQ monitor handling
  - 834b1e4ff0 Remove obsolete ZMQIOLoop direct instance
  - 1c90cbdb3c Remove an empty line
  - ef2e0acd66 Add logging on ZMQ socket exception
  - 38ceed371d Lintfix: ident
  - 1ece6a5f52 Lintfix: line too long
  - 4e650c0b44 Remove code duplicate by reusing utilities functions
  - 57da54b676 Fix imports
  - 948368e9a1 Add libzmq version info builder
  - 0b4a17b859 Update log exception message
  - 116e1809fc Put a message alongside the exception to the logs
  - 4bc43124b7 Remove unnecessary ZMQ import and check for its presence
  - 05f4d40269 Use utility for ZMQ import handling in SSH client
  - 457ef7d9a5 Use utility for ZMQ import handling in flo/zero
  - 08dee6f5bd Use utility for ZMQ import handling
  - e2a353cfb0 Remove unnecessary ZMQ extra-check for cache utils
  - c8f2cc271d Remove unnecessary ZMQ extra-check for master utils
  - 3940667bb9 Remove old ZMQ import handling
  - f34a53e029 Use ZMQ utility for version check
  - cbb26dcb28 Use ZMQ installer for master
  - 453e83210a Add ZMQ version build
  - af9601e21d Use ZMQ importer utility in async
  - d50b2b2023 Incorporate tornado-5 fixes
  - 1fd9af0655 Add ZMQ backward-compatibility tornado installer for older versions
  - ad4b40415c Add one place for handling various ZMQ versions and IOLoop classes

- **PR** #47343: (Ch3LL) Add additional service module integration tests and enable for windows @ *2018-05-02 13:39:46 UTC*
  - b14e974b5f Merge pull request #47343 from Ch3LL/win_srv_test
  - 2173b6f549 ensure we are enabling/disabling before test
  - d58be06751 Add additionatl service module integration tests and enable for windows
- **PR** #47375: (terminalmage) Warn on use of virtual packages in pkg.installed state @ *2018-05-01 21:12:18 UTC*
  - b0f3fb577f Merge pull request #47375 from terminalmage/issue47310
  - fa2bea52bb Remove extra blank line to appease linter
  - f8ab2be81c Add debug logging if we fail to detect virtual packages

  - 67c4fc56ac Warn on use of virtual packages in pkg.installed state

- **PR** #47415: (kstreee) Fixes a bug of rest_tornado's `local' client, complement fix of #46326 @ *2018-05-01 21:11:25 UTC*
  - **PR** #47200: (kstreee) Resolve a conflict with syndic timeout and bug fixes of the local client in rest_tornado (refs: #47415)
  - **PR** #47123: (rallytime) [develop] Merge forward from 2018.3 to develop (refs: #47200)
  - **PR** #47110: (kstreee) Fixes misusing of the timeout option. (refs: #47200)
  - **PR** #46692: (mattp-) saltnado bugfixes for ldap & syndics (refs: #47123, #47200)
  - **PR** #46326: (kstreee) Fixes a timing bug of saltnado's client local. (refs: #47110, #47123, #47200, #47415)
  - **PR** #45874: (GwiYeong) fix for local client timeout bug (refs: #46326)
  - 56235032f4 Merge pull request #47415 from kstreee/fix-local-client-tgt-bug
  - b8d37e0a1e To add a test case for the syndic environment, copies the test case which was written by @mattp- that was already merged into develop branch, related pr is #46692.
  - 4627bad1fd Realizes `tgt' field into actual minions using ckminions to subscribe results of the minions before publishing a payload.
- **PR** #47286: (baniobloom) fixed vpc_peering_connection_name option @ *2018-05-01 19:02:10 UTC*
  - d65ceaee03 Merge pull request #47286 from baniobloom/vpc_peering_connection_name_fix
  - a968965087 Merge branch `2017.7' into vpc_peering_connection_name_fix
- **PR** #47270: (meaksh) Fix minion scheduler to return `retcode' from executed functions @ *2018-04-30 18:21:55 UTC*
  - 8a5d4437bb Merge pull request #47270 from meaksh/2017.7-fix-retcode-on-schedule-utils
  - d299cf3385 Merge branch `2017.7' into 2017.7-fix-retcode-on-schedule-utils
  - b6da600fff Initialize __context__ retcode for functions handled via schedule util module
- **ISSUE** #47264: (jf) doc: https://docs.saltstack.com/en/latest/ref/modules/all/salt.modules.grains.html#salt.modules.grains.delval s/of pass/or pass/ (refs: #47371)
- **PR** #47371: (rallytime) Fix ``of pass'' typo in grains.delval docs: change to ``or pass'' @ *2018-04-30 18:18:46 UTC*
  - 5b51075384 Merge pull request #47371 from rallytime/fix-47264
  - a43485b49c Fix ``of pass'' typo in grains.delval docs: change to ``or pass''
- **PR** #47389: (dwoz) Older GitPython versions will not have close @ *2018-04-29 16:42:06 UTC*
  - a86e53be66 Merge pull request #47389 from dwoz/moregittestfix
  - 67745c1362 Older GitPython versions will not have close
- **PR** #47388: (dwoz) Fix missing import @ *2018-04-28 18:33:14 UTC*
  - a5367eaf63 Merge pull request #47388 from dwoz/test_pip_fix
  - eb26321e8b Fix missing import
- **PR** #47380: (gtmanfred) add io_loop handling to runtests engine @ *2018-04-28 17:25:28 UTC*
  - 9b59b991c2 Merge pull request #47380 from gtmanfred/2017.7
  - 93d1445ec1 add io_loop handling to runtests engine

- **PR** #47384: (dwoz) Fix py2 version of pip test @ *2018-04-28 15:13:28 UTC*
  - 37822c0cbb Merge pull request #47384 from dwoz/test_pip_fix
  - a37a9da1fb Fix py2 version of pip test
- **PR** #47382: (dwoz) Close the repo and fix multiple tests @ *2018-04-28 15:09:17 UTC*
  - eefd96732e Merge pull request #47382 from dwoz/gitfs_tests
  - 1570708fac Close the repo and fix multiple tests
- **PR** #47369: (terminalmage) Return an empty dict if no search_order in ldap ext_pillar config file @ *2018-04-27 20:58:52 UTC*
  - 57c75ff660 Merge pull request #47369 from terminalmage/ldap_pillar
  - 085883ae2d Return an empty dict if no search_order in ldap ext_pillar config file
- **PR** #47363: (DmitryKuzmenko) Tornado5.0: Future.exc_info is dropped @ *2018-04-27 18:30:18 UTC*
  - bcc66dd9bf Merge pull request #47363 from DSRCorporation/bugs/replace_exc_info_with_exception
  - 3f7b93a23c Tornado5.0: Future.exc_info is dropped
- **PR** #47334: (terminalmage) pillar_ldap: Fix cryptic errors when config file fails to load @ *2018-04-27 17:53:51 UTC*
  - bcef34f7e1 Merge pull request #47334 from terminalmage/ldap_pillar
  - 0175a8687c pillar_ldap: Fix cryptic errors when config file fails to load
  - 65c3ba7ff1 Remove useless documentation
  - 5d67cb27de Remove unncessary commented line
- **PR** #47347: (dwoz) Proper fix for mysql tests @ *2018-04-27 17:27:53 UTC*
  - 31db8ca7ad Merge pull request #47347 from dwoz/test_mysql_fix_again
  - add78fb618 Fix linter warnings
  - 2644cc7553 Fix linter nits
  - 799c601184 Proper fix for mysql tests
- **PR** #47359: (gtmanfred) add mention of the formulas channel to the formulas docs @ *2018-04-27 16:56:13 UTC*
  - e573236848 Merge pull request #47359 from gtmanfred/2017.7
  - 6214ed8133 add mention of the formulas channel to the formulas docs
- **PR** #47317: (dwoz) Do not join a thread that is stopped @ *2018-04-27 13:15:09 UTC*
  - **PR** #47279: (dwoz) Gracefully shutdown worker threads (refs: #47317)
  - 629503b2a8 Merge pull request #47317 from dwoz/threadshutdown
  - 6db2a0e4d3 Log exceptions at exception level
  - d4ae787595 Do not join a thread that is stopped
- **PR** #47304: (cachedout) Pass timeout to salt CLI for tests @ *2018-04-27 13:11:58 UTC*
  - aacd5cefe3 Merge pull request #47304 from cachedout/test_cli_timeout_arg
  - 85025af83c Pass timeout to salt CLI for tests
- **PR** #47311: (Ch3LL) Add firewall execution modules tests for windows @ *2018-04-27 13:10:54 UTC*
  - 55534fb659 Merge pull request #47311 from Ch3LL/firewall_windows

  - 4e16c18c16 Add firewall module windows tests to whitelist
  - 4b2fc4ec66 Add windows firewall execution modules integration tests
- **PR** #47348: (dwoz) Ignore gitfs tests when symlinks not enabled @ *2018-04-27 13:08:27 UTC*
  - 1667375a80 Merge pull request #47348 from dwoz/no_symlinks
  - 94a70e847a Ignore gitfs tests when symlinks not enabled
- **PR** #47342: (dwoz) Fix mysql test cases @ *2018-04-27 00:50:53 UTC*
  - dac04261b5 Merge pull request #47342 from dwoz/test_mysql_fix
  - 7496f4c5a8 Fix mysql test cases
- **PR** #47341: (dwoz) Fix python 3 support for inet_pton function @ *2018-04-26 23:35:45 UTC*
  - 34e78ef564 Merge pull request #47341 from dwoz/inet_pton_fix
  - 85451f48d4 Fix python 3 support for inet_pton function
- **PR** #47339: (dwoz) Use salt.utils.fopen for line ending consistancy @ *2018-04-26 22:39:56 UTC*
  - e4779f3246 Merge pull request #47339 from dwoz/ssh_key_test_fix
  - e37a93a1ca Remove redundent close call
  - b2ae5889b7 Close the temporary file handle
  - 9f7f83a975 Use salt.utils.fopen for line ending consistancy
- **PR** #47335: (dwoz) Remove un-needed string-escape @ *2018-04-26 21:49:27 UTC*
  - b221860151 Merge pull request #47335 from dwoz/pip_test_fix
  - dcb6a22c00 Remove un-needed string-escape
- **PR** #47331: (dwoz) Do not encode usernames @ *2018-04-26 19:57:28 UTC*
  - 1c527bfd3a Merge pull request #47331 from dwoz/py3_wingroup_fix
  - cc154ef857 Do not encode usernames
- **PR** #47329: (cachedout) Credit Frank Spierings @ *2018-04-26 16:37:59 UTC*
  - 708078b152 Merge pull request #47329 from cachedout/frank_credit
  - 33c0644ac4 Credit Frank Spierings
- **PR** #47281: (Ch3LL) Add win_system integration module tests @ *2018-04-26 16:07:41 UTC*
  - a545e55543 Merge pull request #47281 from Ch3LL/system_test
  - c9181a75a6 Add destructivetest decorator on tests
  - 0d0c8987fc Add win_system integration module tests
- **PR** #47283: (Ch3LL) Add windows ntp integration module tests @ *2018-04-26 16:04:44 UTC*
  - b64d930df0 Merge pull request #47283 from Ch3LL/ntp_test
  - ced7f86546 Add windows ntp integration module tests
- **PR** #47314: (Ch3LL) Skip netstat test on macosx as its not supported @ *2018-04-26 16:00:37 UTC*
  - 910aff910f Merge pull request #47314 from Ch3LL/net_mac_test
  - 67beb1451c Skip netstat test on macosx as its not supported
- **PR** #47307: (rallytime) Back-port #47257 to 2017.7 @ *2018-04-26 15:16:23 UTC*

  - **PR** #47257: (jeroennijhof) Role is not a list but a dictionary (refs: #47307)
  - 0549ef7c16 Merge pull request #47307 from rallytime/bp-47257
  - 6c5b2f92bc Role is not a list but a dictionary
- **PR** #47312: (rallytime) Update bootstrap script to latest release: 2018.04.25 @ *2018-04-26 15:15:13 UTC*
  - d6ff4689f6 Merge pull request #47312 from rallytime/update-bootstrap-release
  - 765cce06a2 Update bootstrap script to latest release: 2018.04.25
- **PR** #47279: (dwoz) Gracefully shutdown worker threads (refs: #47317) @ *2018-04-25 21:15:43 UTC*
  - e0765f5719 Merge pull request #47279 from dwoz/py3_build_fix
  - 21dc1bab91 Pep-8 line endings
  - 717abedaf7 Fix comman wart
  - 4100dcd64c Close might get called more than once
  - dbe671f943 Stop socket before queue on delete
  - 9587f5c69e Silence pylint import-error for six.moves
  - 4b0c7d3b34 Fix typo
  - 05adf7c2b1 Use six.moves for queue import
  - fe340778fa Gracefully shutdown worker threads
- **PR** #47113: (jfindlay) Support proto for IPSec policy extension in iptables state @ *2018-04-25 18:01:19 UTC*
  - 44f19b2f94 Merge pull request #47113 from jfindlay/iptables_state
  - 8bd08012ee modules,states.iptables support proto for policy ext
- **PR** #47302: (Ch3LL) Remove unnecessary code from core grains and add test @ *2018-04-25 17:58:48 UTC*
  - b7a6206330 Merge pull request #47302 from Ch3LL/dead_code
  - daa68b4877 Add virtual grains test for core grains
  - a59dd2785d Remove dead code in core grains file for virt-what
- **PR** #47303: (baniobloom) Added clarity on oldest supported main release branch @ *2018-04-25 17:52:39 UTC*
  - e29362acfc Merge pull request #47303 from baniobloom/bug_fix_doc
  - b97c9df5f3 added clarity on how to figure out what is the oldest supported main release branch
- **ISSUE** #45790: (bdarnell) Test with Tornado 5.0b1 (refs: #47106, #47433)
- **PR** #47106: (DmitryKuzmenko) Tornado50 compatibility fixes (refs: #47433) @ *2018-04-25 15:32:37 UTC*
  - 0d9d55e013 Merge pull request #47106 from DSRCorporation/bugs/tornado50
  - 39e403b18d Merge branch `2017.7' into bugs/tornado50
  - 6706b3a2d1 Run off of a temporary config
  - d6873800d5 Allow running pytest>=3.5.0
  - 2da3983740 Tornado 5.0 compatibility fixes
- **ISSUE** #47258: (drewmat) service state no longer working after kernel upgrade (refs: #47271)
- **PR** #47271: (gtmanfred) load rh_service for amazon linux not booted with systemd @ *2018-04-25 14:47:06 UTC*
  - 2e014f4746 Merge pull request #47271 from gtmanfred/amazon

  - 8a53908908 Do not load rh_service module when booted with systemd
  - e4d1d5bf11 Revert ``support amazon linux 2 for service module''

- **ISSUE** #44847: (malbertus) netconfig.managed state.apply unexpected behaviour of test & debug variables (refs: #47246)
- **PR** #47246: (mirceaulinic) Attempting to fix #44847: allow a different way to get the test and debug flags into the netconfig state @ *2018-04-25 14:44:02 UTC*
  - 599b0ed1e9 Merge pull request #47246 from cloudflare/fix-44847-2017.7
  - ad80028104 This way, we can pass flags such as `debug` into the state, but also `test`.
- **PR** #47220: (benediktwerner) Fix pip.installed when no changes occurred with pip >= 1.0.0 @ *2018-04-25 14:23:50 UTC*
  - **PR** #47207: (benediktwerner) Fix pip_state with pip3 if no changes occourred (refs: #47220)
  - **PR** #47102: (gtmanfred) dont allow using no_use_wheel for pip 10.0.0 or newer (refs: #47220)
  - 4e2e1f0719 Merge pull request #47220 from benediktwerner/fix-pip-2017.7
  - 0197c3e973 Fix pip test
  - 34bf66c09f Fix pip.installed with pip>=10.0.0
- **PR** #47272: (rallytime) Add windows tests and reg module/state to CODEOWNERS file for team-windows @ *2018-04-25 13:25:29 UTC*
  - 92e606251f Merge pull request #47272 from rallytime/reg-windows-codeowners
  - 9445af0185 Add windows tests and reg module/state to CODEOWNERS file for team-windows
    * 8de3d41adb fixed vpc_peering_connection_name option
- **PR** #47252: (rallytime) Fix the matching patterns in the CODEOWNERS file to use fnmatch patterns @ *2018-04-24 14:10:42 UTC*
  - 9dca5c0221 Merge pull request #47252 from rallytime/codeowners-fixes
  - 204b6af92b Fix the matching patterns in the CODEOWNERS file to use fnmatch patterns
- **ISSUE** #47173: (fpicot) pkg.installed ignores normalize parameter (refs: #47177)
- **PR** #47177: (fpicot) fix normalize parameter in pkg.installed @ *2018-04-24 13:37:54 UTC*
  - 3de1bb49c8 Merge pull request #47177 from fpicot/fix_47173_pkg_normalize
  - 149f846f34 fix normalize parameter in pkg.installed
- **PR** #47251: (Ch3LL) Update Docs to remove unnecessary + sign @ *2018-04-23 19:37:04 UTC*
  - 10e30515dc Merge pull request #47251 from Ch3LL/pub_fix_rn
  - fa4c2e6575 Update Docs to remove unnecessary + sign
- **PR** #47249: (Ch3LL) Add CVE number to 2016.3.6 Release @ *2018-04-23 19:05:42 UTC*
  - bb7850a431 Merge pull request #47249 from Ch3LL/pub_fix_rn
  - 24dea24b7e Add CVE number to 2016.3.6 Release
- **ISSUE** #47225: (pruiz) zfs.filesystem_present takes forever on a dataset with lots (10k+) of snapshots (refs: #47226, #47227)
- **PR** #47227: (pruiz) Fix issue #47225: avoid zfs.filesystem_present slowdown when dataset has lots of snapshots (2017.7 branch) @ *2018-04-23 14:05:58 UTC*

  - **PR** #47226: (pruiz) Fix issue #47225: avoid zfs.filesystem_present slowdown when dataset has lots of snapshots (refs: #47227)
  - 56933eb0b2 Merge pull request #47227 from pruiz/pruiz/zfs-dataset-present-slow-2017.7
  - fded61f19b Fix issue #47225: avoid zfs.filesystem_present slowdown when dataset has lots of snapshots

- **PR** #47167: (smitty42) Adding updates for python3 compatibility and new virtualbox SDK versi... @ *2018-04-23 13:20:42 UTC*
  - 9825065048 Merge pull request #47167 from smitty42/vbox-skd-fix
  - 5de53139cd Merge branch `2017.7' into vbox-skd-fix
- **PR** #47213: (dwoz) Fix coverage on py3 windows builds @ *2018-04-20 22:09:57 UTC*
  - 976f031170 Merge pull request #47213 from dwoz/py3win
  - ad9c7f63f0 Fix coverate on py3 windows builds
  - 91252bac95 Adding updates for python3 compatibility and new virtualbox SDK version support.
- **PR** #47197: (dwoz) Move process target to top level module namespace @ *2018-04-20 15:41:06 UTC*
  - cebcd6d069 Merge pull request #47197 from dwoz/testfix
  - 25803c9176 Move process target to top level module namespace
- **PR** #47193: (Ch3LL) Add network module integration tests @ *2018-04-20 13:37:19 UTC*
  - d4269c2b70 Merge pull request #47193 from Ch3LL/network_test
  - bbf9987c19 Add network module integration tests
- **PR** #47189: (Ch3LL) Add autoruns.list integration test for Windows @ *2018-04-19 21:16:34 UTC*
  - c777248a78 Merge pull request #47189 from Ch3LL/autoruns
  - 6a88bedb7a Add autoruns to windows whitelist
  - e9e4d4af70 Add autoruns.list integration test for Windows
- **PR** #47184: (Ch3LL) Add status module integration modules tests for Windows @ *2018-04-19 19:38:56 UTC*
  - 65f344e371 Merge pull request #47184 from Ch3LL/status_test
  - 25a84428b8 Add status module integration modules tests for Windows
- **PR** #47163: (rallytime) Updage jenkins module autodocs to use jenkinsmod name instead @ *2018-04-19 19:35:00 UTC*
  - **PR** #46801: (yagnik) rename jenkins to jenkinsmod (refs: #46900, #47163)
  - 965600ad6c Merge pull request #47163 from rallytime/jenkins-autodoc
  - 0039395017 Updage jenkins module autodocs to use jenkinsmod name instead
- **PR** #47185: (twangboy) Add additional integration tests to whitelist @ *2018-04-19 18:20:25 UTC*
  - 0a43dde5fc Merge pull request #47185 from twangboy/add_tests
  - 345daa0423 Add additional integration tests to whitelist
- **PR** #47172: (dwoz) Allow non admin name based runs on windows @ *2018-04-19 17:26:42 UTC*
  - 1a600bb9a4 Merge pull request #47172 from dwoz/cover_without_admin
  - cadd759727 Use warnings to warn user
  - 144c68e214 Allow non admin name based runs on windows

- **PR** #47110: (kstreee) Fixes misusing of the timeout option. (refs: #47200) @ *2018-04-18 17:16:20 UTC*
  - **PR** #46326: (kstreee) Fixes a timing bug of saltnado's client local. (refs: #47110, #47123, #47200, #47415)
  - **PR** #45874: (GwiYeong) fix for local client timeout bug (refs: #46326)
  - d5997d2301 Merge pull request #47110 from kstreee/fix-misusing-of-timeout
  - 0624aee0ed Fixes misusing of the timeout option.
- **ISSUE** #40948: (ScoreUnder) salt-call falsely reports a master as down if it does not have PKI directories created (refs: #40961)
- **PR** #40961: (terminalmage) Make error more explicit when PKI dir not present for salt-call @ *2018-04-18 16:08:17 UTC*
  - 87ca2b4003 Merge pull request #40961 from terminalmage/issue40948
  - 6ba66cca41 Fix incorrect logic in exception check
  - fed5041c5f Make error more specific to aid in troubleshooting
  - 8c67ab53b4 Fix path in log message
  - 3198ca8b19 Make error more explicit when PKI dir not present for salt-call
- **PR** #47134: (Ch3LL) Add user integration tests for windows OS @ *2018-04-18 14:29:40 UTC*
  - f5e63584d4 Merge pull request #47134 from Ch3LL/user_win_test
  - e7c9bc4038 Add user integration tests for windows OS
- **PR** #47131: (gtmanfred) add __cli opts variable for master processes @ *2018-04-17 21:33:57 UTC*
  - da2f6a3fac Merge pull request #47131 from gtmanfred/cli
  - 1b1c29bf62 add __cli for master processes
- **ISSUE** #47116: (pcjeff) pip 10.0.0 can not import pip.req (refs: #47121)
- **PR** #47129: (rallytime) Back-port #47121 to 2017.7 @ *2018-04-17 20:45:11 UTC*
  - **PR** #47121: (pcjeff) fix pip import error in pip 10.0.0 (refs: #47129)
  - 9b8e6ffb8c Merge pull request #47129 from rallytime/bp-47121
  - 11da526b21 add ImportError
  - bd0c23396c fix pip.req import error in pip 10.0.0
- **PR** #47102: (gtmanfred) dont allow using no_use_wheel for pip 10.0.0 or newer (refs: #47220) @ *2018-04-17 20:44:58 UTC*
  - eb5ac51a48 Merge pull request #47102 from gtmanfred/2017.7
  - 3dc93b310b fix tests
  - 8497e08f8e fix pip module for 10.0.0
  - 4c07a3d1e9 fix other tests
  - b71e3d8a04 dont allow using no_use_wheel for pip 10.0.0 or newer
- **PR** #47037: (twangboy) Fix build_env scripts @ *2018-04-17 18:54:17 UTC*
  - c1dc42e67e Merge pull request #47037 from twangboy/fix_dev_scripts
  - 990a24d7ed Fix build_env scripts

- **PR** #47108: (dwoz) Fix unit.utils.test_event.TestAsyncEventPublisher.test_event_subscription @ *2018-04-17 00:25:07 UTC*
  - 6a4c0b8a1a Merge pull request #47108 from dwoz/async_test_fix
  - 3d85e30ce5 AsyncTestCase is required for AsyncEventPublisher
- **PR** #47068: (cachedout) Catch an operation on a closed socket in a test @ *2018-04-16 19:56:03 UTC*
  - 03892eaf0b Merge pull request #47068 from cachedout/catch_value_error_socket_test
  - 7db5625632 Catch an operation on a closed socket in a test
- **PR** #47065: (dwoz) Jinja test fix @ *2018-04-16 16:16:42 UTC*
  - 1ea2885ec2 Merge pull request #47065 from dwoz/jinja_test_fix
  - 673cd31c65 Merge branch `2017.7' into jinja_test_fix
- **PR** #47077: (dwoz) Fix failing state test by normalizing line endings @ *2018-04-16 15:48:39 UTC*
  - 5293b5b5ca Merge pull request #47077 from dwoz/test_state_fix
  - 444da3f893 Fix py3 wart (chr vs bytesstring)
  - e8acca01c2 Fix failing state test by normalizing line endings
- **ISSUE** #46538: (HenriWahl) salt-cloud gives ``FutureWarning: The behavior of this method will change in future versions.'' (refs: #47067)
- **PR** #47067: (gtmanfred) use the recommended opennebula lookup method @ *2018-04-16 15:48:15 UTC*
  - ca967de5da Merge pull request #47067 from gtmanfred/2017.7
  - f913a7859c use the recommended opennebula lookup method
- **PR** #47064: (dwoz) Fix fileserver roots tests @ *2018-04-14 21:30:23 UTC*
  - 7fddad6cd9 Merge pull request #47064 from dwoz/roots_tests_fix
  - 25fd7c0694 fix py3 wart, encode os.linesep
  - d79f1a1961 Fix fileserver roots tests
- **PR** #47069: (cachedout) Pass the timeout variable to the CLI when calling salt in tests @ *2018-04-14 15:20:25 UTC*
  - 977c6939c4 Merge pull request #47069 from cachedout/match_timeout_arg
  - b8990f5258 Pass the timeout variable to the CLI when calling salt in tests
- **PR** #47074: (dwoz) Kitchn should ignore artifacts directory @ *2018-04-14 13:06:19 UTC*
  - 2c4c19c622 Merge pull request #47074 from dwoz/ignore_artifacts
  - c3941efad0 Kitchn should ignore artifacts directory
- **ISSUE** #47000: (mvintila) Client API: full_return paramenter missing from cmd_subset function (refs: #47055)
- **PR** #47055: (mattp-) #47000 - add proper handling of full_return in cmd_subset @ *2018-04-13 20:17:10 UTC*
  - c484c0bd71 Merge pull request #47055 from bloomberg/GH-47000
  - 8af3f5b874 GH-47000: add proper handling of full_return in cmd_subset
- **PR** #47039: (twangboy) Fix winrm powershell script @ *2018-04-13 18:09:56 UTC*
  - f3496030cc Merge pull request #47039 from twangboy/win_fix_winrm_script
  - 6635b9003f Fix winrm powershell script

        * 46fa2c04de Fix py3 os.linesep wart
        * 3c565d7e54 Use salt.utils.fopen
        * aa965310f1 Clean up cruft
        * efc9866580 Jinja test fixes
- **PR** #46326: (kstreee) Fixes a timing bug of saltnado's client local. (refs: #47110, #47123, #47200, #47415) @ *2018-04-13 13:59:28 UTC*
  - **PR** #45874: (GwiYeong) fix for local client timeout bug (refs: #46326)
  - 1700a10ebe Merge pull request #46326 from kstreee/fix-client-local
  - 0f358a9c9e Fixes a timing bug of saltnado's client local.
- **ISSUE** #46877: (trudesea) Unable to apply GPO (Windows 2016) (refs: #46913)
- **ISSUE** #44516: (doesitblend) Windows PY3 Minion Returns UTF16 UnicodeError (refs: #44944)
- **PR** #46913: (lomeroe) 2017.7 Fix #46877 -- win_lgpo start/shutdown script reading @ *2018-04-12 15:10:50 UTC*
  - **PR** #44944: (lomeroe) win_lgpo registry.pol encoding updates (refs: #46913, #47438)
  - c3c00316c5 Merge pull request #46913 from lomeroe/2017_7-fix46877
  - 369a0645ed move exception for clarity
  - 32ce5bfda5 Use configparser serializer object to read psscript.ini and script.ini startup/shutdown script files.
- **PR** #47025: (terminalmage) Fix server_id grain in PY3 on Windows @ *2018-04-12 15:08:00 UTC*
  - 9e37cfc9d6 Merge pull request #47025 from terminalmage/fix-server_id-windows
  - cb0cf89ed3 Fix server_id grain in PY3 on Windows
- **PR** #47027: (rallytime) Back-port #44508 to 2017.7 @ *2018-04-12 15:05:51 UTC*
  - **PR** #44508: (mzbroch) Capirca integration (refs: #47027)
  - 2e193cfb45 Merge pull request #47027 from rallytime/bp-44508
  - 8e72f362f4 Add priority field to support the latest capirca.
  - 112f92baab Add priority field to support the latest capirca.
- **PR** #47020: (rallytime) Back-port #46970 to 2017.7 @ *2018-04-11 21:48:25 UTC*
  - **PR** #46970: (garethgreenaway) [2017.7] fix to pkgrepo comments test (refs: #47020)
  - 385fe2bc1e Merge pull request #47020 from rallytime/bp-46970
  - 9373dff52b Update test_pkgrepo.py
  - 13cf9eb5b1 Removing debugging.
  - a61a8593e5 Removing suse from pkgrepo comments tests. the pkgrepo functions in SUSE pkg module do not support comments.
- **ISSUE** #46504: (jfoboss) ntp.managed fails on non-english systems (refs: #46539)
- **PR** #46539: (jfoboss) #46504 Fix @ *2018-04-11 14:13:24 UTC*
  - 8f994e7cf9 Merge pull request #46539 from jfoboss/patch-1
  - 6890122e41 Merge pull request #1 from twangboy/pull_46539
    * 19c3fadbe5 Fix unit test for win_ntp

  - 826a8d3099 Fixing #46504
- **PR** #46999: (gtmanfred) switch pip test package @ *2018-04-10 21:18:33 UTC*
  - 74d70e95a5 Merge pull request #46999 from gtmanfred/2017.7
  - 791af8f6ce switch pip test package
- **PR** #46023: (mattp-) add parallel support for orchestrations @ *2018-04-10 19:26:04 UTC*
  - 8adaf7f526 Merge pull request #46023 from bloomberg/parallel-orch
  - 0ac0b3ca29 Merge branch `2017.7' into parallel-orch
- **ISSUE** #46581: (qcpeter) puppet.fact tries to parse output to stderr (refs: #46613)
- **PR** #46613: (myinitialsarepm) Fix puppet.fact and puppet.facts to use stdout. @ *2018-04-10 15:18:07 UTC*
  - 39d65a39cf Merge pull request #46613 from myinitialsarepm/fix_puppet.fact_and_puppet.facts
  - 44ecd13abc Update tests to use cmd.run_all
  - 7d7d40f541 Merge branch `2017.7' into fix_puppet.fact_and_puppet.facts
  - 0ce1520bd0 Merge branch `2017.7' into fix_puppet.fact_and_puppet.facts
  - 69e1f6f681 Fix puppet.fact and puppet.facts to use stdout.
- **PR** #46991: (gtmanfred) use saltstack salt-jenkins @ *2018-04-10 14:19:00 UTC*
  - ba5421d988 Merge pull request #46991 from gtmanfred/windows
  - 98588c1dc5 use saltstack salt-jenkins
- **PR** #46975: (gtmanfred) Make windows work for test runs in jenkinsci @ *2018-04-10 13:41:18 UTC*
  - 00c4067585 Merge pull request #46975 from gtmanfred/windows
  - 1f69c0d7f8 make sure windows outputs xml junit files
  - 4a2ec1bbb3 support new versions of winrm-fs
  - b9efec8526 remove libnacl on windows
  - 2edd5eaf9e fix path
  - b03e272e44 windows work
- **PR** #46945: (vutny) [DOC] Fix Jinja block in FAQ page @ *2018-04-09 13:05:28 UTC*
  - 3cf2353e41 Merge pull request #46945 from vutny/doc-faq-fix-jinja
  - bfdf54e61d [DOC] Fix Jinja block in FAQ page
- **PR** #46925: (terminalmage) Remove reference to directory support in file.patch state @ *2018-04-06 13:54:47 UTC*
  - fc2f728665 Merge pull request #46925 from terminalmage/fix-file.patch-docstring
  - 97695657f0 Remove reference to directory support in file.patch state
- **PR** #46900: (rallytime) Back-port #46801 to 2017.7 @ *2018-04-06 13:47:44 UTC*
  - **PR** #46801: (yagnik) rename jenkins to jenkinsmod (refs: #46900, #47163)
  - eef6c518e1 Merge pull request #46900 from rallytime/bp-46801
  - 6a41e8b457 rename jenkins to jenkinsmod
- **PR** #46899: (rallytime) Back-port #45116 to 2017.7 @ *2018-04-06 13:47:17 UTC*

    - **PR** #45116: (arif-ali) fix adding parameters to http.query from sdb yaml (refs: #46899)
    - 71839b0303 Merge pull request #46899 from rallytime/bp-45116
    - b92f908da4 fix adding parameters to http.query from sdb yaml
        * 3d5e69600b address lint issues raised by @isbm
        * a9866c7a03 fix parallel mode py3 compatibility
        * 6d7730864a removing prereq from test orch
        * 6c8a25778f add integration test to runners/test_state to exercise parallel
        * 2c86f16b39 cherry-pick cdata KeyError prevention from #39832
        * 26a96e8933 record start/stop duration for parallel processes separately
        * e4844bdf2b revisit previous join() behavior in check_requisites
        * f00a359cdf join() parallel process instead of a recursive sleep
        * 6e7007a4dc add parallel support for orchestrations
- **ISSUE** #43529: (Ch3LL) Add publisher_acl Test to Auto Test Suite (refs: #44926)
- **PR** #44926: (frogunder) whitelist_acl_test @ *2018-04-05 15:09:26 UTC*
    - d0f5b43753 Merge pull request #44926 from frogunder/whitelisted_acl
    - 18e460fc30 Merge branch `2017.7' into whitelisted_acl
    - 1ad4d7d988 fix assert errors
    - e6a56016df update test
    - 19a2244cb7 whitelist_acl_test
- **ISSUE** #46456: (vitaliyf) ``ValueError'' when running orch with ``subset'' (refs: #46464)
- **PR** #46464: (gtmanfred) fix salt subset in orchestrator @ *2018-04-05 14:52:01 UTC*
    - 7d822f9cec Merge pull request #46464 from gtmanfred/orchestration
    - 637cdc6b7b fix pylint
    - 0151013ddb document *cli* option for cmd_subset
    - 4a3ed6607d add test for subset in orchestration
    - 3112359dd6 fix salt subset in orchestrator
- **ISSUE** #46523: (dwoz) Add a test to the cloud suite for Windows minion on EC2 (refs: #46879)
- **PR** #46879: (dwoz) Fix multiple typos causing tests to fail @ *2018-04-05 13:59:28 UTC*
    - 805ed1c964 Merge pull request #46879 from dwoz/cloudtestfix
    - dc54fc53c3 Fix multiple typos causing tests to fail
- **PR** #46647: (twangboy) Fix the tear down function in integration.modules.test_grains @ *2018-04-04 21:14:06 UTC*
    - f70f6de282 Merge pull request #46647 from twangboy/win_fix_test_grains
    - c179388b0e Fix the tear down function in integration.modules.test_grains.GrainsAppendTestCase
- **ISSUE** #46754: (nages13) grain item virtual_subtype shows `Xen PV DomU' on Docker containers (refs: #46756)
- **ISSUE** #43405: (kfix) LXD-created LXC container is detected as a Xen domU (refs: #46756)

- **PR** #46756: (nages13) fix grains['virtual_subtype'] to show Docker on xen kernels @ *2018-04-04 20:53:49 UTC*
  - 91c078ce12 Merge pull request #46756 from nages13/bugfix-grain-virtual_subtype
  - 781f5030a4 Merge branch `bugfix-grain-virtual_subtype' of https://github.com/nages13/salt into bugfix-grain-virtual_subtype
    - cd1ac4b7f9 Merge branch `2017.7' into bugfix-grain-virtual_subtype
    - 0ace76c0e7 Merge branch `2017.7' into bugfix-grain-virtual_subtype
    - 9eb6f5c0d0 Merge branch `2017.7' into bugfix-grain-virtual_subtype
    - 73d6d9d365 Merge branch `2017.7' into bugfix-grain-virtual_subtype
    - a4a17eba6a Merge branch `2017.7' into bugfix-grain-virtual_subtype
    - bf5034dbdb Merge branch `2017.7' into bugfix-grain-virtual_subtype
    - 8d12770951 Merge branch `2017.7' into bugfix-grain-virtual_subtype
  - 7e704c0e81 Moved down container check code below hypervisors to validate containers type running in virtual environment. Fixes #46754 & #43405
  - 710f74c4a6 fix grains['virtual_subtype'] to show Docker on xen kernels
- **ISSUE** #46762: (ScoreUnder) prereq stack overflow (refs: #46788, #46799)
- **PR** #46799: (garethgreenaway) [2017.7] Adding test for PR #46788 @ *2018-04-04 20:41:23 UTC*
  - **PR** #46788: (garethgreenaway) [2017.7] Ensure failed tags are added to self.pre (refs: #46799)
  - 058bbed221 Merge pull request #46799 from garethgreenaway/46762_prereq_shenanigans_tests
  - 13875e78cf Fixing documention string for test.
  - 3d288c44d4 Fixing test documentation
  - 6cff02ef6a Adding tests for #46788
- **PR** #46867: (terminalmage) Backport string arg normalization to 2017.7 branch @ *2018-04-04 18:06:57 UTC*
  - d9770bf3f8 Merge pull request #46867 from terminalmage/unicode-logging-normalization
  - 7652688e83 Backport string arg normalization to 2017.7 branch
- **PR** #46770: (twangboy) Change the order of SID Lookup @ *2018-04-04 17:33:10 UTC*
  - 9eb98b1f6e Merge pull request #46770 from twangboy/fix_46433
  - 89af0a6222 Merge branch `2017.7' into fix_46433
  - 67b4697578 Remove unused import (ling)
  - 9302fa5ab0 Clean up code comments
  - b383b9b330 Change the order of SID Lookup
- **ISSUE** #46826: (robgott) grain modules using tuples affect targeting (refs: #46839)
- **PR** #46839: (gtmanfred) match tuple for targets as well @ *2018-04-04 14:07:12 UTC*
  - 9c776cffb7 Merge pull request #46839 from gtmanfred/tupletarget
  - 3b7208ce27 match tuple for targets as well
- **ISSUE** #40245: (czhong111) salt-api automatically restart caused by ``opening too many files'' (refs: #46817)
- **ISSUE** #36374: (szjur) Descriptor leaks in multithreaded environment (refs: #46817)
- **ISSUE** #20639: (GrizzlyV) salt.client.LocalClient leaks connections to local salt master (refs: #46817)

- **PR** #46845: (rallytime) Back-port #46817 to 2017.7 @ *2018-04-03 19:52:29 UTC*
  - **PR** #46817: (mattp-) address filehandle/event leak in async run_job invocations (refs: #46845)
  - **PR** #32145: (paclat) fixes 29817 (refs: #46817)
  - 7db251dc11 Merge pull request #46845 from rallytime/bp-46817
  - 36a0f6d8ca address filehandle/event leak in async run_job invocations
- **PR** #46847: (dwoz) strdup from libc is not available on windows @ *2018-04-03 19:51:33 UTC*
  - e3d17ab7bc Merge pull request #46847 from dwoz/missing-strdup
  - 55845f4846 strdup from libc is not available on windows
- **ISSUE** #46765: (roskens) pkg.mod_repo fails with a python error when removing a dictionary key (refs: #46776)
- **PR** #46776: (gtmanfred) fix shrinking list in for loop bug @ *2018-04-03 17:32:16 UTC*
  - f2dd79f9c4 Merge pull request #46776 from gtmanfred/2017.7
  - edc1059ee0 fix shrinking list in for loop bug
- **PR** #46838: (gtmanfred) use http registry for npm @ *2018-04-03 17:02:32 UTC*
  - 1941426218 Merge pull request #46838 from gtmanfred/npm
  - bff61dd291 use http registry for npm
- **ISSUE** #42312: (frogunder) salt-call --local sys.doc none gives error/traceback in raspberry pi (refs: #46823)
- **PR** #46823: (rallytime) Improve __virtual__ checks in sensehat module @ *2018-04-03 16:56:08 UTC*
  - e544254e7b Merge pull request #46823 from rallytime/fix-42312
  - dafa820f93 Improve __virtual__ checks in sensehat module
- **PR** #46641: (skizunov) Make LazyLoader thread safe @ *2018-04-03 16:09:17 UTC*
  - 37f6d2de35 Merge pull request #46641 from skizunov/develop3
  - c624aa4827 Make LazyLoader thread safe
- **PR** #46837: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ *2018-04-03 14:54:10 UTC*
  - 989508b100 Merge pull request #46837 from rallytime/merge-2017.7
  - 8522c1d634 Merge branch `2016.11' into `2017.7'
  - 3e844ed1df Merge pull request #46739 from rallytime/2016.11_update_version_doc
  - 4d9fc5cc0f Update release versions for the 2016.11 branch
- **PR** #46740: (rallytime) Update release versions for the 2017.7 branch @ *2018-04-03 14:36:07 UTC*
  - 307e7f35f9 Merge pull request #46740 from rallytime/2017.7_update_version_doc
  - 7edf98d224 Update 2018.3.0 information and move branch from ``latest'' to ``previous''
  - 5336e866ac Update release versions for the 2017.7 branch
- **PR** #46783: (twangboy) Fix network.managed test=True on Windows @ *2018-04-03 12:54:56 UTC*
  - ebf5dd276f Merge pull request #46783 from twangboy/fix_46680
  - da5ce25ef3 Fix unit tests on Linux
  - b7f4f377cd Add space I removed

  - f1c68a09b5 Fix network.managed test=True on Windows

- **PR** #46821: (rallytime) Fix the new test failures from the mantest changes @ *2018-04-03 12:40:51 UTC*
  - **PR** #46778: (terminalmage) Replace flaky SPM man test (refs: #46821)
  - f652f25cc1 Merge pull request #46821 from rallytime/fix-mantest-failures
  - 209a8029c3 Fix the new test failures from the mantest changes
- **ISSUE** #46627: (vangourd) Win_LGPO fails on writing Administrative Template for Remote Assistance (refs: #46800)
- **PR** #46800: (lomeroe) fix win_lgpo to correctly create valuenames of list item types @ *2018-04-03 12:38:45 UTC*
  - c460f62081 Merge pull request #46800 from lomeroe/2017_7-46627
  - 2bee383e9d correct create list item value names if the valuePrefix attribute does not exist on the list item, the value is the value name, other wise, the valuename a number with the valuePrefix prepended to it
- **ISSUE** #46347: (twangboy) Buid 449: unit.modules.test_inspect_collector (refs: #46675)
- **PR** #46675: (dwoz) Skip test when git symlinks are not configured @ *2018-04-03 12:19:19 UTC*
  - df26f2641e Merge pull request #46675 from dwoz/inspectlib-tests
  - d39f4852d8 Handle non-zero status exception
  - 83c005802b Handle cases where git can not be found
  - 628b87d5c4 Skip test when git symlinks are not configured
- **ISSUE** #46808: (ezh) Sharedsecret authentication is broken (refs: #46809)
- **PR** #46815: (terminalmage) Backport #46809 to 2017.7 @ *2018-04-02 20:05:15 UTC*
  - **PR** #46809: (ezh) Fix sharedsecret authentication (refs: #46815)
  - 4083e7c460 Merge pull request #46815 from terminalmage/bp-46809
  - 71d5601507 Fix sharedsecret authentication
- **PR** #46769: (dwoz) Adding windows minion tests for salt cloud @ *2018-04-02 18:51:49 UTC*
  - 3bac9717f4 Merge pull request #46769 from dwoz/wincloudtest
  - eabc234e5d Fix config override name
  - 5c22a0f88d Use aboslute imports
  - 810042710d Set default cloud test timeout back to 500 seconds
  - 5ac89ad307 Use winrm_verify_ssl option causing tests to pass
  - 71858a709c allow not verifying ssl winrm saltcloud
  - ba5f11476c Adding windows minion tests for salt cloud
- **PR** #46786: (twangboy) Return int(-1) when pidfile contains invalid data @ *2018-04-02 18:42:12 UTC*
  - f1be939763 Merge pull request #46786 from twangboy/fix_46757
  - b0053250ff Remove int(), just return -1
  - 7d56126d74 Fixes some lint
  - 49b3e937da Return int(-1) when pidfile contains invalid data
- **PR** #46814: (terminalmage) Backport #46772 to 2017.7 @ *2018-04-02 18:39:37 UTC*

  - **PR** #46772: (bmiguel-teixeira) fix container removal if auto_remove was enabled (refs: #46814)
  - 89bf24b15c Merge pull request #46814 from terminalmage/bp-46772
  - a9f26f2ab8 avoid breaking if AutoRemove is not found
  - 97779c965d fix container removal if auto_remove was enabled
- **PR** #46813: (terminalmage) Get rid of confusing debug logging @ *2018-04-02 18:19:27 UTC*
  - 5ea4ffbdb6 Merge pull request #46813 from terminalmage/event-debug-log
  - 5d6de3a2eb Get rid of confusing debug logging
- **PR** #46766: (twangboy) Change the way we're cleaning up after some tests @ *2018-03-30 18:01:03 UTC*
  - e533b7182d Merge pull request #46766 from twangboy/win_fix_test_git
  - 5afc66452c Remove unused/redundant imports
  - 88fd72c52c Use with_tempfile decorator where possible
- **PR** #46778: (terminalmage) Replace flaky SPM man test (refs: #46821) @ *2018-03-30 17:55:14 UTC*
  - 69d450db84 Merge pull request #46778 from terminalmage/salt-jenkins-906
  - bbfd35d3ea Replace flaky SPM man test
- **ISSUE** #46762: (ScoreUnder) prereq stack overflow (refs: #46788, #46799)
- **PR** #46788: (garethgreenaway) [2017.7] Ensure failed tags are added to self.pre (refs: #46799) @ *2018-03-30 17:11:38 UTC*
  - c935ffb740 Merge pull request #46788 from garethgreenaway/46762_prereq_shenanigans
  - fa7aed6424 Ensure failed tags are added to self.pre.
- **ISSUE** #46354: (twangboy) Build 449: unit.test_state (refs: #46655)

- **ISSUE** #46349: (twangboy) Build 449: unit.test_pydsl (refs: #46655)
- **ISSUE** #46345: (twangboy) Build 449: unit.test_pyobjects.MapTests (Manual Pass) (refs: #46655)
- **PR** #46655: (dwoz) Fixing cleanUp method to restore environment @ *2018-03-29 18:31:48 UTC*
  - 395b7f8fdc Merge pull request #46655 from dwoz/pyobjects-46350
  - 5aabd442f2 Fix up import and docstring syntax
  - 62d64c9230 Fix missing import
  - 18b1730320 Skip test that requires pywin32 on *nix platforms
  - 45dce1a485 Add reg module to globals
  - 09f9322981 Fix pep8 wart
  - 73d06f664b Fix linter error
  - 009a8f56ea Fix up environ state tests for Windows
  - b4be10b8fc Fixing cleanUp method to restore environment
- **ISSUE** #36802: (rmarcinik) using clean=True parameter in file.recurse causes python process to spin out of control (refs: #46632)
- **PR** #46632: (dwoz) Fix file.recurse w/ clean=True #36802 @ *2018-03-29 18:30:42 UTC*
  - af45c49c42 Merge pull request #46632 from dwoz/file-recurse-36802

  - 44db77ae79 Fix lint errors and typo
  - cb5619537f Only change what is essential for test fix
  - eb822f5a12 Fix file.recurse w/ clean=True #36802
- **ISSUE** #46660: (mruepp) top file merging same does produce conflicting ids with gitfs (refs: #46751)
- **PR** #46751: (folti) top file merging strategy `same' works again @ *2018-03-28 21:12:27 UTC*
  - 6e9f504ed1 Merge pull request #46751 from folti/2017.7
  - 7058f10381 same top merging strategy works again
- **PR** #46691: (Ch3LL) Add groupadd module integration tests for Windows @ *2018-03-28 18:01:46 UTC*
  - d3623e0815 Merge pull request #46691 from Ch3LL/win_group_test
  - 7cda825e90 Add groupadd module integration tests for Windows
- **ISSUE** #46352: (twangboy) Build 449: unit.test_client (refs: #46696)
- **PR** #46696: (dwoz) Windows *unit.test_client* fixes @ *2018-03-28 17:55:47 UTC*
  - 14ab50d3f4 Merge pull request #46696 from dwoz/win_test_client
  - ec4634fc06 Better explanation in doc strings
  - d9ae2abb34 Fix splling in docstring
  - b40efc5db8 Windows test client fixes
- **ISSUE** #45956: (frogunder) CTRL-C gives traceback on py3 setup (refs: #46032)
- **PR** #46732: (rallytime) Back-port #46032 to 2017.7 @ *2018-03-28 13:43:17 UTC*
  - **PR** #46032: (DmitryKuzmenko) Workaroung python bug in traceback.format_exc() (refs: #46732)
  - 1222bdbc00 Merge pull request #46732 from rallytime/bp-46032
  - bf0b962dc0 Workaroung python bug in traceback.format_exc()
- **ISSUE** #28142: (zmalone) Deprecate or update the copr repo (refs: #46749)
- **PR** #46749: (vutny) [DOC] Remove mentions of COPR repo from RHEL installation page @ *2018-03-28 13:20:50 UTC*
  - 50fe1e9480 Merge pull request #46749 from vutny/doc-deprecate-copr
  - a1cc55da3d [DOC] Remove mentions of COPR repo from RHEL installation page
- **PR** #46734: (terminalmage) Make busybox image builder work with newer busybox releases @ *2018-03-27 21:14:28 UTC*
  - bd1e8bcc7d Merge pull request #46734 from terminalmage/busybox
  - 6502b6b4ff Make busybox image builder work with newer busybox releases
- **ISSUE** saltstack/salt-jenkins#902: (rallytime) [2017.7/.5] Test failures for NPM on CentOS 6/7, Ubuntu 14, and OpenSUSE (refs: #46742)
- **PR** #46742: (gtmanfred) only use npm test work around on newer versions @ *2018-03-27 21:13:28 UTC*
  - c09c6f819c Merge pull request #46742 from gtmanfred/2017.7
  - fd0e649d1e only use npm test work around on newer versions
- **PR** #46743: (Ch3LL) Workaround getpwnam in auth test for MacOSX @ *2018-03-27 21:10:47 UTC*
  - 3b6d5eca88 Merge pull request #46743 from Ch3LL/mac_auth

    - 4f1c42c0e3 Workaround getpwnam in auth test for MacOSX
- **ISSUE** #26920: (david-fairbanks42) MySQL grant with underscore and wildcard (refs: #46171)
- **PR** #46171: (amaclean199) Fix mysql grant comparisons @ *2018-03-27 17:54:48 UTC*
    - b548a3e742 Merge pull request #46171 from amaclean199/fix_mysql_grants_comparison
    - 97db3d9766 Merge branch `2017.7' into fix_mysql_grants_comparison
    - 0565b3980e Merge branch `2017.7' into fix_mysql_grants_comparison
    - 8af407173d Merge branch `2017.7' into fix_mysql_grants_comparison
    - 00d13f05c4 Fix mysql grant comparisons by stripping both of escape characters and quotes. Fixes #26920
- **ISSUE** #5721: (ozgurakan) salt-minion can't restart itself (refs: #46709)
- **PR** #46709: (vutny) [DOC] Update FAQ about Salt self-restarting @ *2018-03-27 14:34:58 UTC*
    - 554400e067 Merge pull request #46709 from vutny/doc-faq-minion-master-restart
    - d0929280fc [DOC] Update FAQ about Salt self-restarting
- **PR** #46503: (psyer) Fixes stdout user environment corruption @ *2018-03-27 14:20:15 UTC*
    - 3f21e9cc65 Merge pull request #46503 from psyer/fix-cmd-run-env-corrupt
    - e8582e80f2 Python 3-compatibility fix to unit test
    - 27f651906d Merge pull request #1 from terminalmage/fix-cmd-run-env-corrupt
        * 172d3b2e04 Allow cases where no marker was found to proceed without raising exception
        * 35ad828ab8 Simplify the marker parsing logic
    - a09f20ab45 fix repr for the linter
    - 4ee723ac0f Rework how errors are output
    - dc283940e0 Merge branch `2017.7' into fix-cmd-run-env-corrupt
    - a91926561f Fix linting problems
    - e8d3d017f9 fix bytes or str in find command
    - 0877cfc38f Merge branch `2017.7' into fix-cmd-run-env-corrupt
    - 86176d1252 Merge branch `2017.7' into fix-cmd-run-env-corrupt
    - 3a7cc44ade Add python3 support for byte encoded markers
    - 09048139c7 Do not show whole env in error
    - ed94700255 fix missing raise statement
    - 15868bc88c Fixes stdout user environment corruption
- **PR** #46432: (twangboy) Default to UTF-8 for templated files @ *2018-03-26 19:02:14 UTC*
    - ac2a6616a7 Merge pull request #46432 from twangboy/win_locales_utf8
    - affa35c30d Revert passing encoding
    - a0ab27ef15 Merge remote-tracking branch `dw/win_locales_utf8' into win_locales_utf8
        * 9f95c50061 Use default SLS encoding, fall back to system encoding
        * 6548d550d0 Use salt.utils.to_unicode
        * 8c0164fb63 Add ability to specify encoding in sdecode

        * 2e7985a81c Default to utf-8 on Windows
    - 8017860dcc Use salt.utils.to_unicode
    - c10ed26eab Add ability to specify encoding in sdecode
    - 8d7e2d0058 Default to utf-8 on Windows
- **PR** #46669: (terminalmage) Add option to return to pre-2017.7.3 pillar include merge order @ *2018-03-26 19:00:28 UTC*
    - fadc5e4ba4 Merge pull request #46669 from terminalmage/pillar-merge-order
    - b4a1d34b47 Add option to return to pre-2017.7.3 pillar include merge order
- **PR** #46711: (terminalmage) Add performance reminder for wildcard versions @ *2018-03-26 18:07:31 UTC*
    - b90f0d1364 Merge pull request #46711 from terminalmage/wildcard-versions-info
    - fc7d16f1af Add performance reminder for wildcard versions
- **ISSUE** #46353: (twangboy) Build 449: unit.returners.test_smtp_return (refs: #46693)
- **PR** #46693: (dwoz) File and Pillar roots are dictionaries @ *2018-03-26 15:15:38 UTC*
    - 6c80d90bb6 Merge pull request #46693 from dwoz/test_smtp_return
    - 5bf850c67f File and Pillar roots are dictionaries
- **ISSUE** #36153: (krcroft) Pillarenv doesn't allow using separate pillar environments (refs: #46543)
- **PR** #46543: (dafenko) Fix missing saltenv and pillarenv in pillar.item @ *2018-03-26 15:05:13 UTC*
    - 9a6bc1418c Merge pull request #46543 from dafenko/fix-add-saltenv-pillarenv-to-pillar-item
    - 6d5b2068aa Merge branch `2017.7' into fix-add-saltenv-pillarenv-to-pillar-item

    - b7d39caa86 Merge branch `2017.7' into fix-add-saltenv-pillarenv-to-pillar-item
    - 25f1074a85 Add docstring for added parameters
    - 973bc13955 Merge branch `2017.7' into fix-add-saltenv-pillarenv-to-pillar-item
    - 164314a859 Merge branch `2017.7' into fix-add-saltenv-pillarenv-to-pillar-item
    - 267ae9f633 Fix missing saltenv and pillarenv in pillar.item
- **PR** #46679: (vutny) [DOC] Correct examples in *pkg* state module @ *2018-03-26 14:40:07 UTC*
    - f776040e25 Merge pull request #46679 from vutny/doc-state-pkg
    - 4a730383bf [DOC] Correct examples in *pkg* state module
- **PR** #46646: (twangboy) Fix *unit.returners.test_local_cache* for Windows @ *2018-03-26 14:16:23 UTC*
    - 47409eaa6e Merge pull request #46646 from twangboy/win_fix_test_local_cache
    - 8d93156604 Fix *unit.returners.test_local_cache* for Windows
- **ISSUE** #46595: (aboe76) saltstack server_id changes with each run on python3 (refs: #46649)
- **PR** #46649: (terminalmage) Make server_id consistent on Python 3 @ *2018-03-26 13:58:59 UTC*
    - 0c2dce0416 Merge pull request #46649 from terminalmage/issue46595
    - e82a1aa1ec Make server_id consistent on Python 3
- **PR** #46588: (UtahDave) Don't crash when saltwinshell is missing @ *2018-03-21 20:26:31 UTC*

  - 4e7466a21c Merge pull request #46588 from UtahDave/no_crash_winshell
  - b7842a1777 Update error message.
  - 95dfdb91ca Don't stacktrace when salt-ssh w/o saltwinshell
- **ISSUE** #22063: (jeanpralo) Wildcard inside top.sls file for pillar (refs: #41423)
- **ISSUE** #20581: (notpeter) Many environments: one pillar_root (all your envs are belong to base) (refs: #46309)
- **PR** #46631: (rallytime) Fix pillar unit test failures: file_roots and pillar_roots environments should be lists @ *2018-03-21 19:22:49 UTC*
  - **PR** #46629: (terminalmage) Fix symlink loop when file_roots/pillar_roots is a string instead of a list (refs: #46631)
  - **PR** #46569: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 (refs: #46631)
  - **PR** #46309: (bdrung) Support dynamic pillar_root environment (refs: #46631)
  - **PR** #41423: (RichardW42) pillar: target's state list support wildcard in top.sls (refs: #46631)
  - 33af3cfc7c Merge pull request #46631 from rallytime/update-pillar-unit-tests
  - 0f728186aa Fix pillar unit test failures: file_roots and pillar_roots environments should be lists
- **ISSUE** #26450: (typeshige) file.copy: source file is not present. (refs: #46640)
- **PR** #46640: (terminalmage) Clarify the docs for the file.copy state @ *2018-03-21 19:14:50 UTC*
  - d329e7af78 Merge pull request #46640 from terminalmage/file.copy-docs
  - 480c5f8faa Clarify the docs for the file.copy state
- **PR** #46642: (vutny) [DOC] Unify cloud modules index header @ *2018-03-21 19:13:28 UTC*
  - ff40590c06 Merge pull request #46642 from vutny/doc-cloud-index
  - 51e6aa54a1 [DOC] Unify cloud modules index header
- **PR** #46619: (rallytime) [2017.7] Merge forward from 2017.7.5 to 2017.7 @ *2018-03-20 19:03:30 UTC*
  - 83ed40c06a Merge pull request #46619 from rallytime/merge-2017.7
  - bcbddf5d07 Merge branch `2017.7.5' into `2017.7'
- **PR** #46584: (twangboy) Fix issue LGPO issue @ *2018-03-20 17:48:33 UTC*
  - df12135439 Merge pull request #46584 from twangboy/lgpo-46568
  - 661017104b Detect disabled reg_multi_sz elements properly
- **PR** #46624: (twangboy) Fix a few inconsitencies in the installer script @ *2018-03-20 17:47:44 UTC*
  - 2fd3aa487c Merge pull request #46624 from twangboy/win_fix_installer
  - fa0b0efe46 Fix some installer script inconsistencies
- **ISSUE** #46552: (JeffLee123) State with require requisite executes despite onfail requisite on another state. (refs: #46571)
- **PR** #46571: (garethgreenaway) [2017.7] fixes to state.py @ *2018-03-20 13:40:04 UTC*
  - f038e3c452 Merge pull request #46571 from garethgreenaway/46552_onfail_and_require
  - 152c43c843 Accounting for a case when multiple onfails are used along with requires. Previously if you have multiple states using `onfail' and two of those states using a `require' against the first one state, the last two will run even if the `onfail' isn't met because the `require' is met because the first state

returns true even though it didn't excute. This change adds an additional hidden variable that is used when checking requisities to determine if the state actually ran.

- **ISSUE** #46512: (blarghmatey) git.pull failing when run from the salt scheduler (refs: #46520)

  - **PR** #45769: (Quarky9) Surpress boto WARNING during SQS msg decode in sqs_engine (refs: #46511)
  - 5cc11129f1 Merge pull request #46511 from rallytime/bp-45769
  - a8ffceda53 Surpress boto WARNING during decode, reference: https://github.com/boto/boto/issues/2965

25.2.11 In Progress: Salt 2017.7.7 Release Notes

Version 2017.7.7 is an **unreleased** bugfix release for *2017.7.0*. This release is still in progress and has not been released yet.

New win_snmp behavior

- `win_snmp.get_community_names` now returns the SNMP settings actually in effect on the box. If settings are managed via GroupPolicy, those settings will be returned. Otherwise, normal settings are returned.
- `win_snmp.set_community_names` now raises an error when SNMP settings are being managed by GroupPolicy.

25.2.12 Salt 2016.11.0 Release Notes - Codename Carbon

New Features

Docker Introspection and Configuration

Major additions have been made to the Docker support in 2016.11.0. The new addition allows Salt to be executed within a Docker container without a minion running or installed in the container. This allows states to be run inside a container, but also all of Salt's remote execution commands to be run inside docker containers as well. This makes container introspection simple and powerful. See the tutorial on using this new feature here:

See *Salt in Docker Containers*.

Advanced Ceph Control

Our friends over at SUSE have delivered a powerful new tool to make the deployment of Ceph storage systems using Salt very easy. These new Ceph tools allow for a storage system to be easily defined using the new *ceph.quorum* state.

Thorium Additions and Improvements

The Thorium advanced reactor has undergone extensive testing and updates. These updates include many more Thorium states, a system for automating key management, the ability to use Thorium to easily replace old reactors and a great deal of stability and bug fixes.

State Rollback Using Snapper

Rollback has been one of the most prevalent requests for Salt. We have researched it extensively and concluded that the only way to accomplish truly reliable rollback would be to execute it at the filesystem layer. To accomplish this we have introduced Snapper integration into Salt States.

Snapper is a tool which allows for simple and reliable snapshots of the filesystem to be made. With the new *snapper_states* option set to *True* in the minion config a snapshot will be made before and after every Salt State run.

These snapshots can be viewed, managed and rolled back to via the *snapper* execution module.

Preserve File Perms in File States

This feature has been requested for years, the ability to set a flag and use the same file permissions for files deployed to a minion as the permissions set to the file on the master. Just set the *keep_mode* option on any file management state to *True*.

Ponies!

We all agreed that cowsay was just not good enough, install the *ponysay* command and the new *pony* outputter will work. Fun for the whole family!

Additional Features

- Minions can run in stand-alone mode to use beacons and engines without having to connect to a master. (Thanks @adelcast!)
- Added a `salt` runner to allow running salt modules via salt-run.

```
salt-run salt.cmd test.ping
# call functions with arguments and keyword arguments
salt-run salt.cmd test.arg 1 2 3 a=1
```

- Added SSL support to Cassandra CQL returner. SSL can be enabled by setting `ssl_options` for the returner. Also added support for specifying `protocol_version` when establishing cluster connection.
- The `mode` parameter in the *`file.managed`* state, and the `file_mode` parameter in the *`file.recurse`* state, can both now be set to `keep` and the minion will keep the mode of the file from the Salt fileserver. This works only with files coming from sources prefixed with `salt://`, or files local to the minion (i.e. those which are absolute paths, or are prefixed with `file://`). For example:

```
/etc/myapp/myapp.conf:
  file.managed:
    - source: salt://conf/myapp/myapp.conf
    - mode: keep

/var/www/myapp:
```

```
file.recurse:
  - source: salt://path/to/myapp
  - dir_mode: 755
  - file_mode: keep
```

- The `junos` state module is now available. It has all the functions that are present in the `junos` execution module.
- The `junos` state module is now available. It has all the functions that are present in the `junos` execution module.
- The minion data cache is a pluggable data store now. It's configurable with *`cache`* option. Default is `localfs`.
- User names in `client_acl` support glob matching now.

New Top File Merging Strategy for States

A new strategy called `merge_all` has been added to provide a new way of merging top file matches when executing a *highstate*. See the *`top_file_merging_strategy`* documentation for further information.

In addition, the `same` merging strategy was not functioning as documented. This has now been corrected. While this is technically a bugfix, we decided to hold a change in top file merging until a feature release to minimize user impact.

Improved Archive Extraction Support

The *`archive.extracted`* state has been overhauled. Notable changes include the following:

- When enforcing ownership (with the `user` and/or `group` arguments), the `if_missing` argument no longer has any connection to which path(s) have ownership enforced. Instead, the paths are determined using the either the newly-added `archive.list` function, or the newly-added `enforce_ownership_on` argument.
- `if_missing` also is no longer required to skip extraction, as Salt is now able to tell which paths would be present if the archive were extracted. It should, in most cases, only be necessary in cases where a semaphore file is used to conditionally skip extraction of the archive.
- Password-protected ZIP archives are now detected before extraction, and the state fails without attempting to extract the archive if no password was specified.
- By default, a single top-level directory is enforced, to guard against `tar-bombs'. This enforcement can be disabled by setting `enforce_toplevel` to `False`.
- The `tar_options` and `zip_options` arguments have been deprecated in favor of a single `options` argument.
- The `archive_format` argument is now optional. The ending of the `source` argument is used to guess whether it is a tar, zip or rar file. If the `archive_format` cannot be guessed, then it will need to be specified, but in many cases it can now be omitted.
- Ownership enforcement is now performed irrespective of whether or not the archive needed to be extracted. This means that the state can be re-run after the archive has been fully extracted to repair changes to ownership.

A number of new arguments were also added. See the docs py:func:*docs for the archive.extracted state <salt.states.archive.extracted>* for more information.

Additionally, the following changes have been made to the *`archive`* execution module:

- A new function (`archive.list`) has been added. This function lists the files/directories in an archive file, and supports a `verbose` argument that gives a more detailed breakdown of which paths are files, which are directories, and which paths are at the top level of the archive.
- A new function (*archive.is_encrypted*) has been added. This function will return `True` if the archive is a password-protected ZIP file, `False` if not. If the archive is not a ZIP file, an error will be raised.
- *archive.cmd_unzip* now supports passing a password, bringing it to feature parity with *archive.unzip*. Note that this is still not considered to be secure, and *archive.unzip* is recommended for dealing with password-protected ZIP archives.
- The default value for the `extract_perms` argument to *archive.unzip* has been changed to `True`.

Improved Checksum Handling in `file.managed`, `archive.extracted` States

When the `source_hash` argument for these states refers to a file containing checksums, Salt now looks for checksums matching the name of the source URI, as well as the file being managed. Prior releases only looked for checksums matching the filename being managed. Additionally, a new argument (`source_hash_name`) has been added, which allows the user to disambiguate ambiguous matches when more than one matching checksum is found in the `source_hash` file.

A more detailed explanation of this functionality can be found in the *file.managed* documentation, in the section for the new `source_hash_name` argument.

Note: This improved functionality is also available in the `2016.3` (Boron) release cycle, starting with the 2016.3.5 release.

Config Changes

The following default config values were changed:

- `gitfs_ssl_verify`: Changed from `False` to `True`
- `git_pillar_ssl_verify`: Changed from `False` to `True`
- `winrepo_ssl_verify`: Changed from `False` to `True`

Grains Changes

- All core grains containing `VMWare` have been changed to `VMware`, which is the official capitalization. Additionally, all references to `VMWare` in the documentation have been changed to `VMware` issue #30807. Environments using versions of Salt before and after Salt 2016.11.0 should employ case-insensitive grain matching on these grains.

```
{% set on_vmware = grains['virtual'].lower() == 'vmware' %}
```

- On Windows the `cpu_model` grain has been changed to provide the actual cpu model name and not the cpu family.

  Old behavior:

```
root@master:~# salt 'testwin200' grains.item cpu_model
testwin200:
    ----------
```

```
    cpu_model:
        Intel64 Family 6 Model 58 Stepping 9, GenuineIntel
```

New behavior:

```
root@master:~# salt 'testwin200' grains.item cpu_model
testwin200:
    ----------
    cpu_model:
        Intel(R) Core(TM) i7-3520M CPU @ 2.90GHz
```

Beacons Changes

- The `loadavg` beacon now outputs averages as integers instead of strings. (Via issue #31124.)

Runner Changes

- Runners can now call out to *utility modules* via `__utils__`.
- ref:*Utility modules <writing-utility-modules>* (placed in `salt://_utils/`) are now able to be synced to the master, making it easier to use them in custom runners. A `saltutil.sync_utils` function has been added to the `saltutil runner` to facilitate the syncing of utility modules to the master.

Pillar Changes

- Thanks to the new `saltutil.sync_utils` runner, it is now easier to get ref:*utility modules <writing-utility-modules>* synced to the correct location on the Master so that they are available in execution modules called from Pillar SLS files.

Junos Module Changes

- The following new functionalities were added to the junos module
  - facts - Displays the facts gathered during the connection.
  - shutdown - Shut down or reboot a device running Junos OS.
  - install_config - Modify the configuration of a Junos device.
  - install_os - Install Junos OS software package.
  - zeroize - Remove all configuration information on the Routing Engines and reset all key values on a device.
  - file_copy - Copy file from proxy to the Junos device.

Network Automation: NAPALM

Beginning with 2016.11.0, network automation is included by default in the core of Salt. It is based on a the NAPALM library and provides facilities to manage the configuration and retrieve data from network devices running widely used operating systems such: JunOS, IOS-XR, eOS, IOS, NX-OS etc. - see the complete list of supported devices.

The connection is established via the `NAPALM proxy`.

In the current release, the following modules were included:

- *NAPALM grains* - Select network devices based on their characteristics
- *NET execution module* - Networking basic features
- *NTP execution module*
- *BGP execution module*
- *Routes execution module*
- *SNMP execution module*
- *Users execution module*
- *Probes execution module*
- *NTP peers management state*
- *SNMP configuration management state*
- *Users management state*

Cisco NXOS Proxy Minion

Beginning with 2016.11.0, there is a proxy minion that can be used to configure nxos cisco devices over ssh.

- *Proxy Minion*
- *Execution Module*
- *State Module*

Cisco Network Services Orchestrator Proxy Minion

Beginning with 2016.11.0, there is a proxy minion to use the Cisco Network Services Orchestrator as a proxy minion.

- *Proxy Minion*
- *Execution Module*
- *State Module*

Junos Module Changes

- The following new functionalities were added to the junos module
  - facts - Displays the facts gathered during the connection.
  - shutdown - Shut down or reboot a device running Junos OS.
  - install_config - Modify the configuration of a Junos device.
  - install_os - Install Junos OS software package.
  - zeroize - Remove all configuration information on the Routing Engines and reset all key values on a device.
  - file_copy - Copy file from proxy to the Junos device.

Returner Changes

- Any returner which implements a *save_load* function is now required to accept a *minions* keyword argument. All returners which ship with Salt have been modified to do so.

Renderer Changes

Added the ability to restrict allowed renderers. Two new config parameters, `renderer_whitelist` and `renderer_blacklist` are introduced for this purpose.

eAuth Changes

- External auth modules' `auth` method can return an ACL list for the given username instead of `True`. This list should be in the same format as described in the *eAuth documentation*. It will be used for the user instead of one set in master config.

  Example of the `auth` method return that allows a user to execute functions in the `test` and `network` modules on the minions that match the `web*` target and allow access to `wheel` and `runner` modules:

```
[{'web*': ['test.*',
           'network.*']},
 '@wheel',
 '@runner']
```

- External auth is supported by *salt-run* and *salt-key* now. Note that master must be started to use them with eAuth.

External Module Packaging

Modules may now be packaged via entry-points in setuptools. See *external module packaging* tutorial for more information.

Functionality Changes

- The `onfail` requisite now uses OR logic instead of AND logic. issue #22370
- The consul external pillar now strips leading and trailing whitespace. issue #31165
- The win_system.py state is now case sensitive for computer names. Previously computer names set with a state were converted to all caps. If you have a state setting computer names with lower case letters in the name that has been applied, the computer name will be changed again to apply the case sensitive name.
- The `mac_user.list_groups` function in the `mac_user` execution module now lists all groups for the specified user, including groups beginning with an underscore. In previous releases, groups beginning with an underscore were excluded from the list of groups.
- The `junos.call_rpc` function in the `junos` execution module can now be used to call any valid rpc. Earlier it used to call only ``get_software_information''.
- A new option for minions called `master_tries` has been added. This specifies the number of times a minion should attempt to contact a master to attempt a connection. This allows better handling of occasional master downtime in a multi-master topology.
- The default hash_type is now sha256 instead of md5. You will need to make sure both your master and minion share the same hash_type.

- Nodegroups consisting of a simple list of minion IDs can now also be declared as a yaml list. The below two examples are equivalent:

```
# Traditional way
nodegroups:
  - group1: L@host1,host2,host3

# New way (optional)
nodegroups:
  - group1:
    - host1
    - host2
    - host3
```

New Azure ARM Cloud Driver

A new cloud driver has been added for Azure ARM, aka, the Azure Resource Manager. The older Azure driver is still required to work with the older Azure API. This new driver works with the newer ARM API, which is managed via the newer Azure Portal website.

New Modules

Beacons

- *salt.beacons.avahi_announce*
- *salt.beacons.bonjour_announce*
- *salt.beacons.haproxy*
- *salt.beacons.status*

Clouds

- *salt.cloud.clouds.azurearm*

Engines

- *salt.engines.hipchat*
- *salt.engines.http_logstash*

Modules

- *salt.modules.boto_cloudwatch_event*
- *salt.modules.celery*
- *salt.modules.ceph*
- *salt.modules.influx08*
- *salt.modules.inspectlib.entities*

- *salt.modules.inspectlib.fsdb*
- *salt.modules.inspectlib.kiwiproc*
- *salt.modules.inspector*
- *salt.modules.libcloud_dns*
- *salt.modules.openstack_mng*
- *salt.modules.servicenow*
- *salt.modules.testinframod*
- *salt.modules.win_lgpo*
- *salt.modules.win_pki*
- *salt.modules.win_psget*
- *salt.modules.win_snmp*
- *salt.modules.xbpspkg*

Outputters

- *salt.output.pony*

Pillar

- *salt.pillar.csvpillar*
- *salt.pillar.http_json*
- *salt.pillar.makostack*

Returners

- *salt.returners.zabbix_return*

Runners

- *salt.runners.auth*
- *salt.runners.event*
- *salt.runners.smartos_vmadm*
- *salt.runners.vistara*

SDB

- *salt.sdb.env*

States

- *salt.states.boto_cloudwatch_event*
- *salt.states.csf*
- *salt.states.ethtool*
- *salt.states.influxdb08_database*
- *salt.states.influxdb08_user*
- *salt.states.libcloud_dns*
- *salt.states.snapper*
- *salt.states.testinframod*
- *salt.states.win_lgpo*
- *salt.states.win_pki*
- *salt.states.win_snmp*

Thorium

- *salt.thorium.calc*
- *salt.thorium.key*
- *salt.thorium.runner*
- *salt.thorium.status*
- *salt.thorium.wheel*

Deprecations

General Deprecations

- env to saltenv

  All occurrences of env and some occurrences of __env__ marked for deprecation in Salt 2016.11.0 have been removed. The new way to use the salt environment setting is with a variable called saltenv:

```
def fcn(msg='', env='base', refresh=True, saltenv='base', **kwargs):
```

  has been changed to

```
def fcn(msg='', refresh=True, saltenv='base', **kwargs):
```

  - If env (or __env__) is supplied as a keyword argument to a function that also accepts arbitrary keyword arguments, then a new warning informs the user that env is no longer used if it is found. This new warning will be removed in Salt 2017.7.0.

```
def fcn(msg='', refresh=True, saltenv='base', **kwargs):
```

```
# will result in a warning log message
fcn(msg='add more salt', env='prod', refresh=False)
```

  - If `env` (or `__env__`) is supplied as a keyword argument to a function that does not accept arbitrary keyword arguments, then python will issue an error.

```
def fcn(msg='', refresh=True, saltenv='base'):
```

```
# will result in a python TypeError
fcn(msg='add more salt', env='prod', refresh=False)
```

  - If `env` (or `__env__`) is supplied as a positional argument to a function, then undefined behavior will occur, as the removal of `env` and `__env__` from the function's argument list changes the function's signature.

```
def fcn(msg='', refresh=True, saltenv='base'):
```

```
# will result in refresh evaluating to True and saltenv likely not being a
 ↪string at all
fcn('add more salt', 'prod', False)
```

- Deprecations in `minion.py`:
  - The `salt.minion.parse_args_and_kwargs` function has been removed. Please use the `salt.minion.load_args_and_kwargs` function instead.

Cloud Deprecations

- The `vsphere` cloud driver has been removed. Please use the `vmware` cloud driver instead.
- The `private_ip` option in the `linode` cloud driver is deprecated and has been removed. Use the `assign_private_ip` option instead.
- The `create_dns_record` and `delete_dns_record` functions are deprecated and have been removed from the `digital_ocean` driver. Use the `post_dns_record` function instead.

Execution Module Deprecations

- The `blockdev` execution module had four functions removed:
  - dump
  - tune
  - resize2fs
  - wipe

  The `disk` module should be used instead with the same function names.
- The `boto_vpc` execution module had two functions removed, `boto_vpc.associate_new_dhcp_options_to_vpc` and `boto_vpc.associate_new_network_acl_to_subnet` in favor of more concise function names, `boto_vpc.create_dhcp_options` and `boto_vpc.create_network_acl`, respectively.
- The `data` execution module had `getval` and `getvals` functions removed in favor of one function, `get`, which combines the functionality of the removed functions.
- File module deprecations:
  - The `contains_regex_multiline` function was removed. Use `file.search` instead.

  - Additional command line options for `file.grep` should be passed one at a time. Please do not pass more than one in a single argument.

- The `lxc` execution module has the following changes:
  - The `run_cmd` function was removed. Use `lxc.run` instead.
  - The `nic` argument was removed from the `lxc.init` function. Use `network_profile` instead.
  - The `clone` argument was removed from the `lxc.init` function. Use `clone_from` instead.
  - passwords passed to the `lxc.init` function will be assumed to be hashed, unless `password_encrypted=False`.
  - The `restart` argument for `lxc.start` was removed. Use `lxc.restart` instead.
  - The old style of defining lxc containers has been removed. Please use keys under which LXC profiles should be configured such as `lxc.container_profile.profile_name`.
- The `env` and `activate` keyword arguments have been removed from the `install` function in the `pip` execution module. The use of `bin_env` replaces both of these options.
- `reg` execution module

  Functions in the `reg` execution module had misleading and confusing names for dealing with the Windows registry. They failed to clearly differentiate between hives, keys, and name/value pairs. Keys were treated like value names. There was no way to delete a key.

  New functions were added in 2015.5 to properly work with the registry. They also made it possible to edit key default values as well as delete an entire key tree recursively. With the new functions in place, the following functions have been deprecated:
  - read_key
  - set_key
  - create_key
  - delete_key

  Use the following functions instead:
  - for `read_key` use `read_value`
  - for `set_key` use `set_value`
  - for `create_key` use `set_value` with no `vname` and no `vdata`
  - for `delete_key` use `delete_key_recursive`. To delete a value, use `delete_value`.
- The `hash_hostname` option was removed from the `salt.modules.ssh` execution module. The `hash_known_hosts` option should be used instead.
- The `human_readable` option was removed from the `uptime` function in the `status` execution module. The function was also updated in 2015.8.9 to return a more complete offering of uptime information, formatted as an easy-to-read dictionary. This updated function replaces the need for the `human_readable` option.
- The `persist` kwarg was removed from the `win_useradd` execution module. This option is no longer supported for Windows. `persist` is only supported as part of user management in UNIX/Linux.
- The `zpool_list` function in the `zpool` execution module was removed. Use `list` instead.

Outputter Module Deprecations

- The `compact` outputter has been removed. Set `state_verbose` to `False` instead.

Runner Module Deprecations

- The `grains.cache` runner no longer accepts `outputter` or `minion` as keyword arguments. Users will need to specify an outputter using the `--out` option. `tgt` is replacing the `minion` kwarg.
- The `fileserver` runner no longer accepts the `outputter` keyword argument. Users will need to specify an outputter using the `--out` option.
- The `jobs` runner no longer accepts the `outputter` keyword argument. Users will need to specify an outputter using the `--out` option.
- `virt` runner module:
  - The `hyper` kwarg was removed from the `init`, `list`, and `query` functions. Use the `host` option instead.
  - The `next_hyper` function was removed. Use the `next_host` function instead.
  - The `hyper_info` function was removed. Use the `host_info` function instead.

State Module Deprecations

- The `env` and `activate` keyword arguments were removed from the `installed` function in the `pip` state module. The use of `bin_env` replaces both of these options.
- `reg` state module

  The `reg` state module was modified to work with the new functions in the execution module. Some logic was left in the `reg.present` and the `reg.absent` functions to handle existing state files that used the final key in the name as the value name. That logic has been removed so you now must specify value name (`vname`) and, if needed, value data (`vdata`).

  For example, a state file that adds the version value/data pair to the Software\Salt key in the HKEY_LOCAL_MACHINE hive used to look like this:

```
HKEY_LOCAL_MACHINE\\Software\\Salt\\version:
  reg.present:
    - value: 2016.3.1
```

  Now it should look like this:

```
HKEY_LOCAL_MACHINE\\Software\\Salt
  reg.present:
    - vname: version
    - vdata: 2016.3.1
```

  A state file for removing the same value added above would have looked like this:

```
HKEY_LOCAL_MACHINE\\Software\\Salt\\version:
  reg.absent:
```

  Now it should look like this:

```
HKEY_LOCAL_MACHINE\\Software\\Salt
  reg.absent:
    - vname: version
```

  This new structure is important as it allows salt to deal with key default values which was not possible before. If vname is not passed, salt will work with the default value for that hivekey.

Additionally, since you could only delete a value from a the state module, a new function (`key_absent`) has been added to allow you to delete a registry key and all subkeys and name/value pairs recursively. It uses the new `delete_key_recursive` function.

For additional information see the documentation for the `reg` execution and state modules.

- `lxc` state module: The following functions were removed from the `lxc` state module:
  - `created`: replaced by the `present` state.
  - `started`: replaced by the `running` state.
  - `cloned`: replaced by the `present` state. Use the `clone_from` argument to set the name of the clone source.
- The `hash_hostname` option was removed from the `salt.states.ssh_known_hosts` state. The `hash_known_hosts` option should be used instead.
- The `always` kwarg used in the `built` function of the `pkgbuild` state module was removed. Use `force` instead.

Utils Module Deprecations

- The use of `jid_dir` and `jid_load` were removed from the `salt.utils.jid`. `jid_dir` functionality for job_cache management was moved to the `local_cache` returner. `jid_load` data is now retrieved from the `master_job_cache`.
- `ip_in_subnet` function in `salt.utils.network.py` has been removed. Use the `in_subnet` function instead.
- The `iam` utils module had two functions removed: `salt.utils.iam.get_iam_region` and `salt.utils.iam.get_iam_metadata` in favor of the aws utils functions `salt.utils.aws.get_region_from_metadata` and `salt.utils.aws.creds`, respectively.

25.2.13 Salt 2016.11.1 Release Notes

Version 2016.11.1 is a bugfix release for *2016.11.0*.

Changelog for v2016.11.0..v2016.11.1

Generated at: 2018-05-27 14:25:03 UTC

- **PR** #38186: (Ch3LL) add 2016.11.1 changelog to release notes
- **PR** #38182: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2016-12-09 21:25:47 UTC*

  - 23c039347e Merge pull request #38182 from rallytime/merge-2016.11
  - 627242ab5d Merge branch `2016.3' into `2016.11'
    * 65b2ad7b14 Merge pull request #38163 from Ch3LL/enabled_ec2_cloud
      · be74c45463 enabled ec2 cloud tests
    * b63f74e034 Merge pull request #38177 from vutny/fix-cp-get-file-str
      · a449980672 Correct *cp.get_file_str* docstring and add integration tests
    * 7596313be0 Merge pull request #38153 from vutny/master-includes-error-tolerance
      · cd0154ee93 Master config includes may contain errors and be safely skipped

- **ISSUE** #38094: (bfilipek) TypeError: object of type `float' has no len() in grains.filter_by (refs: #38158)
- **PR** #38158: (cachedout) Fix type problem in grains.filter_by @ *2016-12-09 21:24:40 UTC*
  - 8355adc535 Merge pull request #38158 from cachedout/issue_38094
  - e8196e23c2 Lint, remove set literal
  - 9f4ebb3c18 Fix type problem in grains.filter_by
- **ISSUE** #38090: (jf) pkg.installed does not seem to refresh the repo database, no matter what (refs: #38113, #38156)
- **PR** #38156: (terminalmage) Remove rtag when windows minion refreshes early in state @ *2016-12-09 21:15:01 UTC*
  - 31a157d902 Merge pull request #38156 from terminalmage/fix-windows-refresh
  - 258bd4c2aa Remove rtag when windows minion refreshes early in state
- **ISSUE** #37981: (tazaki) Salt-cloud ec2 vpc securitygroupid always returning default (refs: #38183)
- **PR** #38183: (cro) Fix bad set operations when setting up securitygroups in AWS. @ *2016-12-09 21:12:10 UTC*
  - c638952684 Merge pull request #38183 from cro/fix_37891
  - 0527d6f25e Fix bad set operations when setting up securitygroups in AWS. Fixes #37891.
  - **PR** #38181: (rallytime) Reset socket default timeout to None (fixes daemons_tests failures)
- **PR** #38148: (whiteinge) Remove ssh_async from NetapiClient clients; it is not implemented @ *2016-12-09 18:49:42 UTC*
  - 7ccbedd2cc Merge pull request #38148 from whiteinge/no-ssh-async-client
  - cb58cd4795 Remove ssh_async from NetapiClient clients; it is not implemented
- **PR** #38160: (terminalmage) Update information about xz-utils in archive state/module docs @ *2016-12-09 18:34:03 UTC*
  - 8d4e194400 Merge pull request #38160 from terminalmage/update-archive-docs
  - 8e4ad3cff3 Update information about xz-utils in archive state/module docs
- **ISSUE** #38024: (Ch3LL) 2016.11.0 release notes missing azure arm reference (refs: #38164)
- **PR** #38164: (techhat) Add Azure ARM docs for 2016.11.0 @ *2016-12-09 18:00:22 UTC*
  - 05136f0d8c Merge pull request #38164 from techhat/azuredocs
  - 71b787e250 Add Azure ARM docs for 2016.11.0
- **PR** #38173: (rallytime) Bump some win* module deprecations from Nitrogen to Oxygen @ *2016-12-09 16:57:29 UTC*

  - e3c858cc28 Merge pull request #38173 from rallytime/update-win-deprecation-versions
  - 09a50b25e7 Bump some win* module deprecations from Nitrogen to Oxygen
- **PR** #38036: (terminalmage) archive.extracted: fix problems with overwrite arg @ *2016-12-08 19:08:41 UTC*
  - **PR** #37889: (isbm) Allow overwrite archives extraction (refs: #38036)
  - 827bf59999 Merge pull request #38036 from terminalmage/archive-extracted-override
  - a1c70c7b95 archive.extracted: fix problems with overwrite arg
- **PR** #38133: (terminalmage) Fix edge case in creation of trans tar for salt-thin @ *2016-12-08 17:47:26 UTC*
  - 50773a5f96 Merge pull request #38133 from terminalmage/zd1067
  - 71e0bd023f Fix edge case in creation of trans tar for salt-thin
- **PR** #38138: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2016-12-07 20:15:56 UTC*
  - 6026cb23b2 Merge pull request #38138 from rallytime/merge-2016.11
  - 28b56ea3b4 Merge branch `2016.3' into `2016.11'
  - 86091db647 Skip daemon unit tests when running on Python 2.6 (#38134)
- **PR** #38130: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2016-12-07 20:11:19 UTC*
  - 90478ef25e Merge pull request #38130 from rallytime/merge-2016.11
  - 4d7d9abb41 Merge branch `2016.3' into `2016.11'
    * d3d98fd4eb Merge pull request #38102 from rallytime/fix-38091
      · 4f79d5a0d1 Add False + msg tuple return if requests is missing for zenoss module
    * 8c8cbc2734 Merge pull request #38104 from rallytime/bp-36794
      · c906c8a0d5 Pylint fixes
      · da3ebf83e6 FreeBSD sysctl module now handels config_file parameter in show method
  - **PR** #38129: (Ch3LL) Fix beacon index
  - **PR** #38127: (rallytime) Add versionadded tags for network module funcs
- **ISSUE** #38042: (MTecknology) [2016.11.0] Invalid interfaces file produced by debian_ip module (refs: #38043)
- **PR** #38043: (MTecknology) Debian networking fix @ *2016-12-07 17:32:18 UTC*
  - fd06bab673 Merge pull request #38043 from MTecknology/2016.11
  - 6d5e132e44 Removing trailing whitespace from previous commit
  - f882674acf Adding some options that are valid for inet6 blocks.
  - 81cb688d4c Better check for dual stack.
  - 525c746274 May Cthulhu take mercy on my soul for this commit.
  - 300ca6047e I guess this makes the previous commit a bit redundant, but I'm not sure if I want to remove it.
  - 6e7fc39c68 This now seems absurdly obvious, but I'm not ruling out that I'll break everything.
  - 82d2b89e0c Rolling back unit test.
  - b3edbcfd05 Adding larger and more complete debian_ip unit test.
  - 3afd7b6cf4 Adding the valid/documented `slaves' option.

  - b6b1adc091 Typo: missing closing parenthesis
  - 756e41caf2 Fixing a typo; line should not be commented
  - 32a1374748 Corrects expected return value
  - 88f9d9f22c Mostly whitespace & comment changes
  - 41ffb8d805 Removing redundant line
  - 3a8168667b Ensure iface_dict not being populated will not produce a stacktrace
  - 4de2cb2805 Corrects regression in debian_ip/debian_eth.jinja
- **PR** #38107: (cachedout) Status beacon should raise proper exception @ *2016-12-07 17:21:49 UTC*
  - **PR** #38088: (dmurphy18) Updated to match formulas and allow for missing functions (refs: #38107)
  - 4b9a7f2295 Merge pull request #38107 from cachedout/supercede_38088
  - 73d724845d Change to log.debug per Tom
  - da135b1b59 Fix docs
  - 792b422dc2 Pylint fix
  - 88e03bba6d Fix typo
  - a8ce153252 Status beacon should raise proper exception
- **PR** #38101: (lorengordon) Clarifies file.replace behavior on symlinks @ *2016-12-07 13:27:11 UTC*
  - da8f5ac0c6 Merge pull request #38101 from lorengordon/file-replace-note
  - 345990f2b0 Clarifies file.replace behavior on symlinks
- **ISSUE** #38090: (jf) pkg.installed does not seem to refresh the repo database, no matter what (refs: #38113, #38156)
- **PR** #38113: (terminalmage) Revert changes to refresh tag for pkg states @ *2016-12-07 13:11:14 UTC*
  - d47761f349 Merge pull request #38113 from terminalmage/issue38090
  - 9f347df012 Revert changes to refresh tag for pkg states
- **ISSUE** #37976: (t0nyhays) Error when status beacon fires (2016.11.0) (refs: #38120)
- **PR** #38120: (Da-Juan) Fix status beacon config default values @ *2016-12-07 13:08:33 UTC*
  - d4c34e0a58 Merge pull request #38120 from Da-Juan/2016.11
  - 7e4a35e8ad Fix status beacon config default values
- **PR** #38114: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2016-12-07 12:45:04 UTC*
  - 6868089a87 Merge pull request #38114 from rallytime/merge-2016.11
  - fec9dec23a Merge branch `2016.3' into `2016.11'
    * fbc87769b9 Merge pull request #38083 from twangboy/fix_refresh_db
      · 978af6d83c Remove only .sls files from the cached winrepo-ng
    * 9dcfdeef6b Merge pull request #38059 from rallytime/daemons-test-fix
      · eb372b27d8 Add missing ``not'' statement: The last syndic test should assertFalse()
      · 4e10f8e018 Call exec_test for the Syndic daemon in tests.unit.daemons_test.py
    * 9cd42b9b3f Merge pull request #38039 from rallytime/fix-37939

            - 1da7aacfbe Update unit tests to account for additional file.search call
            - 8a685b1820 Check to see if a line is already commented before moving on
            - f2c045520d Write an integration test demonstrating the issue
        * a34a763984 Merge pull request #38045 from terminalmage/issue38037
            - 65289503d9 Simplify logic for matching desired pkg arch with actual pkg arch
            - 3babbcda94 yumpkg.py: don't include non-upgrade versions found by ``yum list available''

- **PR** #38109: (gtmanfred) mode needs to be an integer @ *2016-12-07 11:58:24 UTC*
  - b9920e54ee Merge pull request #38109 from gtmanfred/2016.11
  - 7546760eb3 mode needs to be an integer
- **PR** #38103: (rallytime) Back-port #37283 to 2016.11 @ *2016-12-06 23:12:59 UTC*
  - **PR** #37283: (jeanpralo) Handle docker-compose up to version 1.9.0 (refs: #38103)
  - **PR** #37215: (mschneider82) removed version check (refs: #37283)
  - fd77dcbd0f Merge pull request #38103 from rallytime/bp-37283
  - 11944df69b handle up to version 1.9.0
- **PR** #38057: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 (refs: #38059) @ *2016-12-06 23:11:41 UTC*
  - 5d9d6b9280 Merge pull request #38057 from rallytime/merge-2016.11
  - 342884018b Fix SaltKeyOptionParserTestCase test failures
  - 186e2d0d03 Don't allow libcloud mock module injection in unit/states/libcloud_dns_test.py either
  - d513a60189 Do not allow libcloud to be injected as a mock value in the libcloud_dns_test
  - 74a417e527 Update the mocked cloud configs to also include master configs
  - f2c8cb13d0 Better merge conflict resolution from the initial merge
  - 8fd53a4808 Merge branch `2016.3' into `2016.11'
    * 6724fe4871 Modify daemons test to use multiprocessing (#38034)
    * 6942d5d95b Merge pull request #37995 from rallytime/merge-2016.3
        - b44e17921c Merge branch `2015.8' into `2016.3'
        - 7a7e36728f Merge pull request #37978 from terminalmage/ext_pillar_first-docs
        - 61ed9a8657 Add clarifying language to ext_pillar_first docs
    * cd66c179cb fix broken yaml code block (#38002)
    * 3dd45fbedf Merge pull request #37912 from attiasr/fix_aws_response_encoding
        - ba4ec4e7f1 use Requests result encoding to encode the text
        - abe4eb3b98 fix encoding problem aws responses
    * 69a74a4d2d Merge pull request #37950 from vutny/fix-starting-up-syndic
        - 7d9bc9abce syndic_master: correct default value, documentation and example config
        - 92a7c7ed1b Set default Salt Master address for a Syndic (like for a Minion)
    * 7f269bc7f9 Add clarification on expr_form usage and future deprecation (#37964)

* 1001987f64 Catch possible exception from lsb_release (#37962)
* 330021cd8b Handle empty tokens safely (#37961)
* ea46639ce7 Merge pull request #37272 from vutny/fix-getting-default-logging-opts
    - e5ce52388a Fix description in the Salt Syndic usage info
    - 518a3dd7ee Add unit tests for Salt parsers processing logging options
    - 83d6a44254 Add *ssh_log_file* option to master config and documentation
    - c8a0915460 Fix configuration example and documentation for *syndic_log_file* option
    - e64dd3ed6b Correct default attributes for various parser classes
    - 82a2e216b3 Fix default usage string for Salt command line programs
    - 45dffa292f Fix readding and updating logfile and pidfile config options for Salt API
    - f47253c21b Fix reading and applying Salt Cloud default configuration
    - fad5bec936 Work with a copy of default opts dictionaries
    - b7c24811e5 Fix *log_level_logfile* config value type
    - 1bd76a1d96 Fix setting temporary log level if CLI option omitted
    - 121848cc77 Fix obtaining *log_granular_levels* config setting
    - 44cf07fec2 Make CLI options take precedence for setting up logfile_logger
    - 61afaf1792 Fix setting option attributes when processing *log_level* and *log_file*
    - 3c60e2388e Fix processing of *log_level_logfile* config setting
    - 55a0af5bbd Use attribute functions for getting/setting options and config values
    - c25f2d091e Fix getting Salt API default logfile option
    - f2422373c1 Remove processing of unused and undocumented *cli_*_log_** config options
    - 2065e8311c Get default logging level and file from default opts dict
* f2f957da6c Merge pull request #37925 from kontrolld/add-ipv6-centos-network
    - ac2b477412 Adding IPv6 functionality for CentOS /etc/sysconfig/network
* c07ad11279 Merge pull request #37899 from DSRCorporation/bugs/37059_schedule_task_hang
    - 9497748546 Clear functions context in schedule tasks for ZeroMQ.
* a55519db40 Merge pull request #37928 from techhat/issue37737
    - a09a60e89b Don't modify self.opts directly
* 9d17f1ce90 Merge pull request #37929 from gtmanfred/2016.3
    - c7d2c73503 add list_nodes_min to nova driver
* 3bb743b59f Merge pull request #37926 from kontrolld/fix-ipv6-centos-network
    - 3ed42e5b44 updated
    - 3b3bc4f239 Fixes no IPv6 functionality in /etc/sysconfig/network
* 271170a9f3 Merge pull request #37921 from rallytime/merge-2016.3
    - 523a67c422 Merge branch `2015.8' into `2016.3'
    - 4cdc6cf5ec Update earlier release channels' docs with Carbon release notes (#37914)

· d31491a7fe [2015.8] Update version numbers in doc config for 2016.11.0 release (#37918)

* 6cd6429ac0 Merge pull request #37924 from cachedout/fix_gem_states

· 894cca3427 Update test for new gem ver

- **PR** #38112: (rallytime) Account for case where vim install already exists and is at an older version

- **ISSUE** #19502: (kt97679) salt-ssh fails to run state.highstate with custom master_tops (refs: #38021)
- **PR** #38021: (mateiw) Add master_tops support in salt-ssh @ *2016-12-06 14:26:22 UTC*
  - f8c67a9598 Merge pull request #38021 from mateiw/salt-ssh_master_tops
  - 65a0f102fd Add/remove newlines
  - 7037fa116d Add master_tops support in salt-ssh
  - **PR** #38084: (rallytime) Start release notes file for 2016.11.1 release
- **PR** #37878: (kstreee) Makes threads avoid blocking waiting while communicating using Zeromq. @ *2016-12-05 19:50:46 UTC*
  - 78295516e7 Merge pull request #37878 from kstreee/2016.11
  - 9103878c4f Fixes blocking waiting through implementing a socket pool class.
- **PR** #37987: (rbjorklin) consul_pillar support for limiting pillar exposure via minion targeting @ *2016-12-05 19:48:20 UTC*
  - **PR** #37985: (rbjorklin) consul_pillar support for limiting pillar exposure via minion targeting (refs: #37987)
  - 0809ccd429 Merge pull request #37987 from rbjorklin/consul-pillar-target
  - 5d0454a7ca Ignore W1401 (anomalous-backslash-in-string)
  - 2e929a5ecc Linting fixes
  - 171cab1726 Fixed possible incorrect behavior if target wasn't on start/end of str
  - 7440582ce8 consul_pillar support for limiting pillar exposure via minion targeting
- **ISSUE** #38062: (UtahDave) archive execution module not loading on Windows in 2016.11.0 (refs: #38067)
- **PR** #38067: (terminalmage) Remove virtual funcs for archive state/module @ *2016-12-05 16:37:23 UTC*
  - 83dcfe81ea Merge pull request #38067 from terminalmage/issue38062
  - 2e0f26a084 Remove virtual funcs for archive state/module
- **ISSUE** #38001: (tomlaredo) Regression on postgres_group.present (`postgres_group' __virtual__ returned False) (refs: #38023)
- **ISSUE** #37986: (marek-obuchowicz) Module postgres - wrong docs, doesn't work with debian 8.5 (refs: #38023)
- **ISSUE** #37935: (ipmb) Postgres module regression on 2016.11 (refs: #37946, #37993, #38023, #38058)
- **PR** #38058: (rallytime) Remove initdb dependency in postgres module @ *2016-12-04 04:19:02 UTC*
  - **PR** #38023: (gtmanfred) Expand error message for postgres states (refs: #38058)
  - **PR** #37993: (ticosax) Remove initdb dependency to consume postgres module. (refs: #38058)
  - c9933670f9 Merge pull request #38058 from rallytime/remove-init-db-dep
  - c1ceeca3d3 Remove initdb dependency in postgres module
- **ISSUE** #37969: (lordcirth) Archive.extracted fails if -user: root is specified (refs: #38004)

- **PR** #38004: (terminalmage) Fix regression in user/group mgmt for archive.extracted @ *2016-12-02 18:28:49 UTC*
  - 1ac53e5196 Merge pull request #38004 from terminalmage/issue37969
  - 23bb90a7ce Add integration test for archive.extracted with user/group set to root
  - e5ee721696 Don't use simple boolean check on uid/gid
- **ISSUE** #37941: (L4rS6) Outdated documentation for 2016.11.x (refs: #38051)
- **PR** #38051: (Ch3LL) add docs for hash_type change to sha256 @ *2016-12-02 18:11:36 UTC*
  - e90cbbef08 Merge pull request #38051 from Ch3LL/fix_hash_docs
  - e95f88fbe3 add docs for hash_type change to sha256
- **ISSUE** #38000: (morganwillcock) 2016.11.0: saltutil.runner returns a different dict structure and breaks template rendering (refs: #38028)
- **PR** #38028: (terminalmage) Pass full_return to saltutil.runner @ *2016-12-02 09:49:31 UTC*
  - 1b52289508 Merge pull request #38028 from terminalmage/issue38000
  - 9bf13d55b4 Pass full_return to saltutil.runner
- **ISSUE** #37980: (tveastman) Having `git' in fileserver_backends and no gitfs_remotes defined causes a crash (refs: #38044)
- **PR** #38044: (terminalmage) Remove debugging code @ *2016-12-02 09:43:44 UTC*
  - 41c44ff684 Merge pull request #38044 from terminalmage/issue37980
  - f70a0409b3 Remove debugging code
- **PR** #38035: (dmurphy18) Updated to return status from make_repo similar to rpmbuild.py @ *2016-12-01 22:30:53 UTC*
  - 9661258f22 Merge pull request #38035 from dmurphy18/fix_debbuild
  - 3bca96e7f2 Updated to return status from make_repo similar to rpmbuild.py
- **ISSUE** #38001: (tomlaredo) Regression on postgres_group.present (`postgres_group' __virtual__ returned False) (refs: #38023)
- **ISSUE** #37986: (marek-obuchowicz) Module postgres - wrong docs, doesn't work with debian 8.5 (refs: #38023)
- **ISSUE** #37935: (ipmb) Postgres module regression on 2016.11 (refs: #37946, #37993, #38023, #38058)
- **PR** #38023: (gtmanfred) Expand error message for postgres states (refs: #38058) @ *2016-12-01 22:05:06 UTC*
  - 141b5c5656 Merge pull request #38023 from gtmanfred/2016.11
  - 1aa43eba80 Expand error message for postgres states
  - ac72ee600e Revert ``Updated the bins_dir to default to pg_bin #37935``
- **PR** #38026: (rallytime) Back-port #38015 to 2016.11 @ *2016-12-01 19:16:15 UTC*
  - **PR** #38015: (morsik) Typo fix (refs: #38026)
  - 79486421f5 Merge pull request #38026 from rallytime/bp-38015
  - 11becf3e68 Typo fix
  - **PR** #38022: (DmitryKuzmenko) Added Carbon release notes. Fixed sphinx errors in the file.
  - **PR** #38011: (rallytime) Adjust code examples to use the actual bootstrap-salt.sh file name
- **ISSUE** #37940: (alex-zel) dockerng.sls_build fails on some distributions (refs: #37954)

- **PR** #37954: (gtmanfred) use sleep from path for docker.sls_build @ *2016-11-30 18:08:45 UTC*
  - 0a041277ea Merge pull request #37954 from gtmanfred/2016.11
  - 9caf0b406d use sleep from path for docker.sls_build
- **ISSUE** #37935: (ipmb) Postgres module regression on 2016.11 (refs: #37946, #37993, #38023, #38058)
- **PR** #37993: (ticosax) Remove initdb dependency to consume postgres module. (refs: #38058) @ *2016-11-30 18:08:13 UTC*
  - 4ef5c98845 Merge pull request #37993 from ticosax/remove-initdb-requirement
  - c5c7a53d72 Remove initdb dependency to consume postgres module.
- **PR** #37997: (cachedout) Update gem test for 2016.11 @ *2016-11-30 17:13:45 UTC*
  - 2e5565685c Merge pull request #37997 from cachedout/gem_test_carbon
  - 1d221aa91c Update gem test for 2016.11
- **ISSUE** #36723: (white-hat) ext_pillar_first option is broken in 2016.3 (refs: #36807)
- **ISSUE** #24501: (astehlik) Order in top.sls file is not respected for pillar data in local mode (refs: #31316)
- **ISSUE** #19332: (QuinnyPig) Nondeterminism in Pillar (refs: #31316)
- **PR** #37979: (terminalmage) Revert addition of pillar_roots_override_ext_pillar @ *2016-11-30 14:34:24 UTC*
  - **PR** #36807: (terminalmage) Fix pillar merging when ext_pillar_first is enabled (refs: #37979)
  - **PR** #31316: (kraney) Let ext_pillar_first determine the override order (refs: #37979)
  - ca3a9488f1 Merge pull request #37979 from terminalmage/revert-pillar-change
  - 6135dfa4dd Revert addition of pillar_roots_override_ext_pillar
  - **PR** #37970: (rallytime) Back-port #37958 to 2016.11
  - **PR** #37958: (mirceaulinic) Fix RST link format in Carbon release notes (refs: #37970)
  - **PR** #37971: (rallytime) Lint 2016.11 sooner rather than later
  - **PR** #37955: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 (refs: #37971)
- **ISSUE** #37935: (ipmb) Postgres module regression on 2016.11 (refs: #37946, #37993, #38023, #38058)
- **PR** #37946: (scott-w) Updated the bins_dir to default to pg_bin @ *2016-11-29 16:48:27 UTC*
  - 36f91408c5 Merge pull request #37946 from scott-w/37935-fix-bin-dir
  - d33d403969 Restored missing initdb #37935
  - a041b9f8e8 Use Salt deprecation warning #37935
  - a96789353f Updated the bins_dir to default to pg_bin #37935
- **PR** #37889: (isbm) Allow overwrite archives extraction (refs: #38036) @ *2016-11-29 16:18:57 UTC*
  - d8650c5474 Merge pull request #37889 from isbm/isbm-states-archive-fix
  - e67706bd29 Document the behaviour.
  - 1970814111 Prevent crash during externally changed archive permissions
  - 91b42578b2 Add overwrite option so the extraction of the archive can be always performed.
  - e6958f7f15 Remove nonsense comment and react on generally absent path name
- **PR** #37869: (isbm) Input sanitation (16.11) @ *2016-11-29 16:17:16 UTC*

  - e2b9e58d30 Merge pull request #37869 from isbm/isbm-input-sanitation-16.11
  - f9ec5d68af Use six instead of builtins
  - 203dfcb238 Use American spelling instead
  - 91ed307af9 Sanitise input for the keys and IDs
  - 86623f913d Add a stub for ID sanitiser (at the moment same as hostname)
  - 637144c841 Rename ``general.py'' to ``sanitisers.py''
  - f2571fc8bf Add hostname sanitiser
  - 3ae086aff4 Add filename sanitiser
  - 816b1d1977 Add general sanitisers
- **PR** #37884: (isbm) Do not include ``gpg-pubkey'' packages, filtering by their name @ *2016-11-28 21:11:37 UTC*
  - e539a94a56 Merge pull request #37884 from isbm/isbm-zypper-gpgkey-pkg-filter
  - 038374a586 Do not include ``gpg-pubkey'' packages, filtering by their name
- **PR** #37882: (attiasr) multiple issues in boto_rds state and module @ *2016-11-28 21:09:11 UTC*
  - eb3d81a1de Merge pull request #37882 from attiasr/fix_missing_tags
  - 73b3c5fa1a Add newline
  - 166c42bc51 fix boto_rds.describe
  - ddd88ba047 fix boto_rds.describe parameters and subnetgroup_present
  - bfe7f92cb4 fix missing tags in call to boto_rds.exists
  - **PR** #37931: (rallytime) Remove release candidate doc ref from 2016.11.0 release notes
- **PR** #37930: (cachedout) Remove dictionary comprehension in netusers @ *2016-11-28 20:27:06 UTC*
  - 3d2dabc7b7 Merge pull request #37930 from cachedout/fix_comp
  - 670e83200b Remove dictionary comprehension in netusers
- **PR** #37923: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2016-11-28 19:55:03 UTC*
  - 0f8b187d15 Merge pull request #37923 from rallytime/merge-2016.11
  - da7f5518eb Don't let 2016.3 doc config changes overwrite the 2016.11 changes
  - dfedd1185a Merge branch `2016.3' into `2016.11'
    * c35ba1f390 Merge pull request #37916 from rallytime/doc-update-2016.3
      · bd40592289 [2016.3] Update version numbers in doc config for 2016.11.0 release
    * e13a2488c8 Merge pull request #37785 from Cloudtek/ddns-respect-trailing-dot
      · 262e3b3697 respect trailing dot in ddns name parameter
    * c03b389422 Merge pull request #37895 from fj40crawler/fix-augeas-return-for-test
      · ddc238df36 Fixed augeas_test.py to match True v.s. None for test_change_in_test_mode
      · ef75c459c0 Merge branch `2016.3' of github.com:saltstack/salt into fix-augeas-return-for-test
      · b0fe0cd256 Change return value for salt/states/augeas.py to be True instead of None for cases where salt is run with test=True. Fixes #37870
    * fdbc31e8d8 Merge pull request #37907 from Talkless/patch-2

  - 628c4a3d27 Merge pull request #37815 from rallytime/merge-2016.11
  - c6b5fd3715 Merge branch `2016.3' into `2016.11'
    - 7de784411d Add nodegroup check to ckminions (#37763)
    - d674369efc Fix ip/port issue with salt-call (#37766)
- **ISSUE** #37449: (thatch45) Allow TLS connections in the Tornado TCP transport (refs: #37776, #37859)
- **PR** #37776: (DmitryKuzmenko) Full TLS/SSL options support as provided by Tornado TCPServer. (refs: #37849) *@ 2016-11-21 20:11:52 UTC*

  - 0b30b93dbb Merge pull request #37776 from DSRCorporation/features/37449_tls
  - 6857b9b8b1 Documented new TLS/SSL settings.
  - e42898f2e3 Full TLS/SSL options support as provided by Tornado TCPServer.
- **PR** #37773: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2016-11-18 19:18:42 UTC*
  - 3835f91d99 Merge pull request #37773 from rallytime/merge-2016.11
  - c859fc9ec1 Merge branch `2016.3' into `2016.11'
  - c62ff6b023 Add thorium path to syspaths (#37767)
  - bff949f4e9 Merge pull request #37760 from hu-dabao/fix_cb_returner
    * de372f277e 1. returner no need to check whether the jid exists for external job cache setup 2. add full_ret to return doc so that the document will be informative 3. make ttl as a config attribute because salt-minion does not have keep_jobs attribute 4. add password into config attribute 5. update the documents accordingly
  - 1f976ac212 Merge pull request #37738 from terminalmage/issue36629
    * da46678c51 Allow pillar.get to retrieve fresh pillar data when saltenv passed
  - 7aee7fc63c Switch default filter tag for ONE resources from user only to all resources (#37745)
- **PR** #37764: (mirceaulinic) Doc fixes and *replace* feature @ *2016-11-18 03:15:31 UTC*
  - 6f0f70c9a3 Merge pull request #37764 from cloudflare/NET-UPDATE
  - c3f0202fdd Replace feature and doc fixes

25.2.14 Salt 2016.11.2 Release Notes

Version 2016.11.2 is a bugfix release for *2016.11.0*.

Statistics

- Total Merges: **157**
- Total Issue References: **34**
- Total PR References: **116**
- Contributors: **45** (Ch3LL, Cybolic, DmitryKuzmenko, UtahDave, Vaelatern, alex-zel, alxwr, amendlik, anlutro, aosagie, basdusee, bbinet, benediktwerner, cachedout, clinta, cro, dereckson, disaster123, ewapptus, ezh, folti, gmacon, gqgunhed, gtmanfred, kkoppel, lorengordon, martintamare, mcalmer, meaksh, mirceaulinic, mostafahussein, mvdwalle, rallytime, rbjorklin, scthi, sjorge, techhat, terminalmage, tsaridas, twangboy, vutny, wolfpackmars2, yhekma, yopito, yue9944882)

Security Fixes

CVE-2017-5192 local_batch client external authentication not respected

The `LocalClient.cmd_batch()` method client does not accept `external_auth` credentials and so access to it from salt-api has been removed for now. This vulnerability allows code execution for already-authenticated users and is only in effect when running salt-api as the `root` user.

CVE-2017-5200 Salt-api allows arbitrary command execution on a salt-master via Salt's ssh_client

Users of Salt-API and salt-ssh could execute a command on the salt master via a hole when both systems were enabled.

We recommend everyone upgrade to 2016.11.2 as soon as possible.

Changelog for v2016.11.1..v2016.11.2

      · db81afc035 Munge retcode into return data for batching
      · a642a995dc Return the ret data from batch execution instead of raw data
    * c6a19a9e5a Merge pull request #38789 from rallytime/fix-38622
      · af41fe0c6e Update some saltenv refs to environment in salt.modules.state docs

        * e0bf700020 Merge pull request #38790 from cachedout/fix_pyobjects_test_typo
            · a66afb5f0f Fix typo in pyobjects test
        * 6e9785edea Merge pull request #38792 from rallytime/fix-38629
            · 1e125e2844 Update pillar tutorial lanuage regarding pillar_opts settings

- **PR** #38832: (terminalmage) archive.extracted: Identify symlinks when checking for incorrect types @ *2017-01-20 18:36:15 UTC*
  - efe1bf10e8 Merge pull request #38832 from terminalmage/issue38711
  - d10c068e25 Update archive state unit tests to reflect symlinks in archive.list
  - d6adfb6d12 Identify symlinks when looking for incorrect types
  - 09b9e95f7c archive.list: organize symlinks separately from files in verbose mode
  - e6483f096d Support removing symlinks in salt.utils.rm_rf
- **PR** #38726: (twangboy) Add VC Redist 2008 SP1 MFC to installer @ *2017-01-19 19:13:42 UTC*
  - 10a3d8b8dd Merge pull request #38726 from twangboy/vcredist
  - f00a65355d change extensions .ext to .exe
  - 98c40e278c Add VC Redist 2008 SP1 MFC to installer
- **PR** #38810: (UtahDave) Fix beacon doc @ *2017-01-18 21:37:21 UTC*
  - d5f2d92a4e Merge pull request #38810 from UtahDave/fix_beacon_doc_zd1035
  - dbe9edb806 fix reactor example.
- **PR** #38811: (techhat) Show a lot less data when requesting a VM @ *2017-01-18 21:08:03 UTC*
  - 88faf08a71 Merge pull request #38811 from techhat/sanvm
  - 47c19325cf Show a lot less data when requesting a VM
  - **PR** #38807: (Ch3LL) refine the os detection in archive test
- **PR** #38799: (aosagie) Parse ansible dynamic inventory output correctly @ *2017-01-18 15:32:47 UTC*
  - e3ca6881c8 Merge pull request #38799 from aosagie/fix-ansible-dynamic-roster
  - 26d6f699a7 Parse ansible dynamic inventory output correctly
- **PR** #38787: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2017-01-18 08:39:08 UTC*
  - 76df6a43f3 Merge pull request #38787 from rallytime/merge-2016.11
  - 2aad54c49f Merge branch `2016.3' into `2016.11'
    * 3417adc617 Merge pull request #38796 from saltstack/revert-38707-root_dir_fix-gh
      · cb080f3bbe Revert ``Fixed prepending of root_dir override to the other paths''
  - 64d866f7ab Merge branch `2016.3' into `2016.11'
  - bab3479a3c Merge pull request #38585 from rallytime/follow-up-38527
    * 05587201b6 Pylint fix: add line at end of file
    * fa01367599 Keep a copy of the DEFAULT_API_OPTS and restore them after the test run
    * 2ad07634d9 Test clean up
    * fd2ee7db30 Add some simple unit tests for salt.config.api_config function

        * 3d2fefc83b Make sure the pidfile and log_file values are overriden by api opts
        * 1f6b540e46 Make sure the pidfile and log_file values are overriden by api opts
        * 04d307f917 salt-api no longer forces the default timeout
    - 0fb6bb7b77 Merge pull request #38707 from alexbleotu/root_dir_fix-gh
        * 0bac8c8be3 Fixed prepending of root_dir override to the other paths
    - 96c9dc10f7 Merge pull request #38774 from vutny/dev-test-docs
        * 4620dc4afa DOCS: add C++ compiler installation on RHEL required for bundled 0mq
    - aedfbb7a43 Merge pull request #38749 from vutny/pkg-build-better-exception-msg
        * 53f2be5b21 pkg build modules throw better exception message if keyid wasn't found
- **PR** #38660: (techhat) Don't force salt.cache to use cachedir from opts @ *2017-01-17 18:38:35 UTC*
    - 4e6146f65f Merge pull request #38660 from techhat/cachedir
    - be55b57abf One last fix
    - fc24b24998 Add correct function name
    - 9bbecf7960 Typo fix
    - 436ba28f08 Change getlist back to list (using _list)
    - ff734fe93b Default to CACHE_DIR in syspaths
    - 380abd3744 Add cachedir args to tests
    - deb08c0587 Not every module will need cachedir
    - 4489f7cac0 Don't force salt.cache to use cachedir from opts
- **ISSUE** #37948: (djacobs2016) ssh_known_hosts.present is failing when checking key/host (refs: #37982)
- **ISSUE** #33932: (folti) ssh_known_hosts.present: hashing global known hosts file makes it readable by root only (refs: #33933)
- **PR** #38667: (rallytime) Back-port #37982 to 2016.11 @ *2017-01-17 15:42:13 UTC*
    - **PR** #37982: (wolfpackmars2) Update ssh.py (refs: #38667)
    - **PR** #33933: (folti) ssh: keep original permissions, when hashing known_hosts (refs: #38667)
    - 89dc86e2bc Merge pull request #38667 from rallytime/bp-37982
    - be91e46a93 Update ssh.py
- **PR** #38759: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2017-01-17 15:22:01 UTC*
    - 751e14c523 Merge pull request #38759 from rallytime/merge-2016.11
    - 30e8a66fb0 Merge branch `2016.3' into `2016.11'
        * 8466b34e82 Merge pull request #38743 from rallytime/merge-2016.3
            · d24776f5e9 Merge branch `2015.8' into `2016.3'
            · 6869621ed1 Merge pull request #38731 from rallytime/merge-2015.8
            · 9eb191b6ac Pylint fix
            · b910499dbe Various follow up fixes
            · e8309a6bbf Add release notes for 2015.8.13

        - f881f366b7 Merge pull request #20 from rallytime/2015.8.12_follow_up-batch-tests
        - 34282322c0 Clean up tests and docs for batch execution
        - c80b20b957 Merge pull request #19 from whiteinge/batchclient
        - 3d8f3d18f6 Remove batch execution from NetapiClient and Saltnado
        - 97b0f64923 Lintfix
        - d1516664f7 Add explanation comment
        - 62f2c87080 Add docstring
        - 9b0a786aeb Explain what it is about and how to configure that
        - 5ea3579e10 Pick up a specified roster file from the configured locations
        - 3a8614c5df Disable custom rosters in API
        - c0e5a1171d Add roster disable flag
        - e9c59e9b8f Merge pull request #38602 from terminalmage/fix-boto-test
        - 3424a108ac Fix failing unit.states.boto_vpc_test.BotoVpcRouteTableTestCase.test_present_with_routes
    * a642cdef79 Merge pull request #38723 from rallytime/fix-38674
        - 706c885f55 Remove ``event_publisher_pub_hwm'' and ``salt_event_pub_hwm'' from config/__init__.py
    * fc545af10b Merge pull request #38669 from rallytime/update-bootstrap-script
        - 78ba76e34c Update bootstrap script verstion to latest release
    * 50d417f267 Merge pull request #38693 from twangboy/update_jinja
        - e0c7e5549b Update jinja2 to 2.9.4

- **PR** #38664: (clinta) X509 Improvements. Expose setting permissions, encrypted private keys, and combined key and cert management in one state @ *2017-01-17 02:20:18 UTC*
    - 6663107021 Merge pull request #38664 from clinta/x509-passphrase2
    - 77c78723fe pep8
    - a2b20ee518 No mutable default args, remove unneeded import
    - b48b85cc70 bug fixes

    - f62393b864 pep8
    - c8613243a1 change documentation
    - 9a0abde9ac expose passphrase functionality to state
    - e47a93d496 add passphrase to execution module
    - a4d6598f1e preserve detailed change reports
    - d0ad251778 combine private key and cert management
    - 3d1474d911 cross call file.managed to get permissions options
- **PR** #38682: (mirceaulinic) [2016.11.2/napalm] Better error message when NotImplementedError raised @ *2017-01-15 18:34:25 UTC*
    - bf6d74c98e Merge pull request #38682 from cloudflare/NotImplementedError-MSG
    - f847639dee Better error message when NotImplementedError raised
- **ISSUE** #37996: (stefan-as) influxdb_user.present does not pass client_args (refs: #38695)
- **PR** #38695: (rallytime) Pass in client_args when calling influxdb execution module funcs @ *2017-01-15 18:33:48 UTC*
    - df12e49d80 Merge pull request #38695 from rallytime/fix-37996
    - 05b0975888 Pass in client_args when calling influxdb execution module funcs
- **ISSUE** #38521: (vladvasiliu) State cloud.present on AWS: TypeError: `NoneType' object is not iterable (refs: #38651)
- **ISSUE** #37981: (tazaki) Salt-cloud ec2 vpc securitygroupid always returning default (refs: #38183)
- **PR** #38651: (rallytime) Don't lose the set reference for ec2 securitygroup ids @ *2017-01-15 18:06:25 UTC*
    - **PR** #38183: (cro) Fix bad set operations when setting up securitygroups in AWS. (refs: #38651)
    - 834e5469fc Merge pull request #38651 from rallytime/fix-38521
    - 830c03cec6 Don't lose the set reference for ec2 securitygroup ids
- **ISSUE** #38216: (pgrishin) salt-run: can't get cache.grains (refs: #38659)
- **PR** #38659: (techhat) Turn None into an empty string (for minion matching) @ *2017-01-15 18:02:03 UTC*
    - 8b38cfea8d Merge pull request #38659 from techhat/issue38216
    - 4073c91584 Turn None into an empty string (for minion matching)
- **PR** #38703: (yhekma) The *test* option is only valid for the minion, not the master @ *2017-01-15 17:56:22 UTC*
    - 0ad5d22ad4 Merge pull request #38703 from yhekma/docfix
    - 57df3bf148 The *test* option is only valid for the minion, not the master
- **PR** #38718: (terminalmage) Fix for dynamic git_pillar when pillarenv is used @ *2017-01-15 14:37:30 UTC*
    - 8c1222e7db Merge pull request #38718 from terminalmage/zd909
    - 12bbea5a24 Fix for dynamic git_pillar when pillarenv is used
- **ISSUE** #38677: (yhekma) consul cache backend broken (refs: #38676)
- **PR** #38676: (yhekma) Removed overloading of list() @ *2017-01-15 05:42:13 UTC*
    - aae8b54860 Merge pull request #38676 from yhekma/2016.11
    - 3237d23e1c Localfs should also be changed of course

  - 9d9de67219 We do not want to overload the list() type because if we do, we turn this function into a recursive one, which results in an exception because set() cannot be concatenated with str (`/')

- **ISSUE** #38684: (rukender) 2016.11.1 :[ERROR][11182] Failed to import beacons avahi_announce (refs: #38713)
- **PR** #38713: (rallytime) Add NameError to exception in avahi_announce beacon @ *2017-01-15 05:33:04 UTC*
  - c246ab41c5 Merge pull request #38713 from rallytime/fix-38684
  - db60bed24c Add NameError to exception in avahi_announce beacon
- **PR** #38729: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2017-01-13 23:15:33 UTC*
  - 6c14774c04 Merge pull request #38729 from rallytime/merge-2016.11
  - 4e1e45d640 Merge branch `2016.3' into `2016.11'
  - 7b850d472d Merge pull request #38647 from gtmanfred/nova
    * 5be9b60851 add documentation about using keystoneauth for v3
    * 7b657ca4ae add the ability to use keystone v2 and v3
    * 5646ae1b34 add ability to use keystoneauth to authenitcate in nova driver
  - 383768d838 Merge pull request #38650 from rallytime/remove-ubuntu-ppa-docs
    * 30429b2e44 Remove the installation instructions for out-of-date community ppa

- **PR** #38444: (lorengordon) Adds new import required for *extract_hash* @ *2016-12-27 15:37:20 UTC*
  - **PR** #37368: (terminalmage) Overhaul archive.extracted state (refs: #38444)
  - f5984d0f81 Merge pull request #38444 from lorengordon/issue-38443
  - b2925ad7b7 Adds new import required for *extract_hash*
- **ISSUE** #38071: (luochun-95) remote execute is very slow (refs: #38167)
- **PR** #38167: (cachedout) Kill pkg_resources for CLI tools [DO NOT MERGE] @ *2016-12-22 22:11:22 UTC*
  - 4c4f07ca4c Merge pull request #38167 from cachedout/no_pkg_resources
  - ec6901720a Remove debugging
  - f28e33b9b6 Remove from all but salt cli
  - bb3af72317 Remove from salt-call
  - c676846066 Kill pkg_resources for CLI tools
- **PR** #38417: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2016-12-22 19:00:44 UTC*
  - 2fc8c154af Merge pull request #38417 from rallytime/merge-2016.11
  - efb8a8ddf5 Merge branch `2016.3' into `2016.11'
  - 27253522c8 Improve pillar documentation (#38407)
  - 423b1fddff Merge pull request #38398 from terminalmage/issue38372
    * c80dbaa914 Fix call to file.get_managed in cron.file state
  - 5a33d1e697 Fix http.query when result has no text (#38382)
  - b74b5c7d38 Merge pull request #38390 from meaksh/2016.3-fix-try-restart-for-autorestarting-on-SUSE-systems
    * de6ec05ec0 add try-restart to fix autorestarting on SUSE systems
  - 2c3a39760a Merge pull request #38221 from UtahDave/fix_default_returner
    * 385640765b remove a blank line to satisfy linter
    * 9c248aa14c validate return opt, remove default.
    * 8bb37f9fe7 specify allowed types and default for ``returner''
    * 11863a4bfe add examples of default minion returners
    * e7c6012655 add support for default returners using *return*
- **PR** #38342: (scthi) Bugfix ext pillar nodegroups @ *2016-12-22 16:47:42 UTC*
  - bbc149c67f Merge pull request #38342 from scthi/bugfix-ext-pillar-nodegroups
  - dba315c4b6 ext-pillar nodegroups works for all minions now.
- **PR** #38403: (terminalmage) git_pillar: Document the transition from env to saltenv in the jinja context @ *2016-12-22 16:34:48 UTC*
  - 453476d982 Merge pull request #38403 from terminalmage/document-saltenv

  - 0a72e0f0be git_pillar: Document the transition from env to saltenv in the jinja context

- **ISSUE** #38253: (gmacon) There was no error installing package `setuptools' although it does not show when calling `pip.freeze'. (refs: #38354)
- **PR** #38354: (gmacon) Use --all when calling pip.py @ *2016-12-20 20:40:21 UTC*
  - 12436efb54 Merge pull request #38354 from gmacon/pip-freeze-all
  - dca24b270e Use --all when calling pip.py
- **PR** #38348: (rallytime) Update autodoc topics for new modules added in 2016.11 @ *2016-12-20 20:36:20 UTC*
  - 68430b1fa6 Merge pull request #38348 from rallytime/mod-docs-2016.11
  - b31c2412ca Add __iter__ and next options to doc/conf.py
  - b8c16094c4 Revert ``Move import/error messaging logic for snapper module into __virtual__()"
  - 640db5b5ac Move import/error messaging logic for snapper module into __virtual__()
  - 366271f459 Add snapper to state index doc module list
  - 135d254c80 Remove netapi autodoc files: they should not be added as their doc structure is different
  - 0006139aca Update autodoc topics for new modules added in 2016.11
- **PR** #38377: (DmitryKuzmenko) Implementation and docs for Consul key-value store plugin for minion data cache. @ *2016-12-20 20:36:02 UTC*
  - 6ee7b2bae7 Merge pull request #38377 from DSRCorporation/features/consul_cache
  - 6fb4430ae3 Configuration options and documentation for Consul data cache plugin.
  - dad748f57a Data cache plugin configuration documentation.
  - c7209cd90c Consul data cache plugin.
- **PR** #38373: (rallytime) Back-port #38212 to 2016.11 @ *2016-12-20 20:35:09 UTC*
  - **PR** #38212: (disaster123) ZMQ: add an option for zmq.BACKLOG to salt master (zmq_backlog) (refs: #38373)
  - f6d1b559bc Merge pull request #38373 from rallytime/bp-38212
  - 52fc6daac0 ZMQ: add an option for zmq.BACKLOG to salt master (zmq_backlog)
- **PR** #38374: (mirceaulinic) NAPALM proxy module: Fix optional_args key issue @ *2016-12-20 20:34:59 UTC*
  - 69c3f19fc1 Merge pull request #38374 from cloudflare/FIX-NAPALM-PROXY
  - 44169315d8 Fix optional_args key issue
- **ISSUE** #38048: (ezh) [2016.11.0] Salt-cloud throws TypeError exception (refs: #38073)
- **PR** #38073: (ezh) 2016.11 @ *2016-12-20 14:51:11 UTC*
  - 530f495955 Merge pull request #38073 from doublescoring/2016.11
  - 42d3d26f28 [38073] Fix test assertion
  - 9b37ead913 Fix broken os.write without string.encode
- **PR** #38344: (bbinet) Fix influxdb_database.present state @ *2016-12-20 13:57:45 UTC*
  - 67908d5aba Merge pull request #38344 from bbinet/fix-influx-createdb
  - c6b075d6f4 Fix influxdb_database.present state
- **PR** #38358: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2016-12-20 00:11:48 UTC*

- 04d6898958 Merge pull request #38358 from rallytime/merge-2016.11
- c6e191ad0d Remove doc markup references from 2016.11 branch
- 513058945c Merge branch `2016.3' into `2016.11'
- 09d9cff992 Merge pull request #38288 from terminalmage/archive-extracted-local-source-2016.3
  - 845e3d0e75 Update tests to reflect change in cache behavior
  - 5a08d7c70a archive.extracted: don't try to cache local sources (2016.3 branch)
- bf37667f8a Merge pull request #38312 from cro/proxy_config_in_cfg
  - 2006c4000e Typo
  - 689d95b10f Backport feature allowing proxy config to live in pillar OR /etc/salt/proxy.
- c83db5a785 Merge pull request #38320 from rallytime/cleanup-doc-refs
  - 62978cb7a0 Don't check the doc/conf.py file for doc markup refs
  - 770e732d76 Add a unit test to search for new doc markup refs
  - 5c42a361a0 Remove ":doc:" references from all doc/topics/installation/* files
  - 23bce1c929 Remove ":doc:" references from all doc/topics/releases/* files
  - 4aafa41d22 Remove ":doc:" references from a bunch of doc/* files
  - 02bfe7912c Remove more ":doc:" references from doc/* files
  - 6e32267d0c Remove ":doc:" references in salt/* files
- **PR** #38285: (terminalmage) archive.extracted: don't try to cache local sources

- **PR** #37947: (vutny) Fix *salt-minion* initscript for RHEL5 (SysV) to pick up proper python version @ *2016-12-19 21:03:50 UTC*
  - 13414949e3 Merge pull request #37947 from vutny/fix-rhel5-minion-init
  - c94e798b8a SysV init script for rpm: get and show unique PIDs only
  - 8ff68c4128 Fix initscript for RHEL5 (SysV) to pick up proper python version
- **PR** #38106: (techhat) ``test'' is not necessarily in opts, for thorium @ *2016-12-19 14:40:32 UTC*
  - 4d072ca689 Merge pull request #38106 from techhat/stateget
  - 5edc16f606 ``test'' is not necessarily in opts, for thorium
- **PR** #38333: (amendlik) Suppress errors when checking if an alternative exists @ *2016-12-19 13:40:49 UTC*
  - a01fade604 Merge pull request #38333 from amendlik/states-alternatives
  - 8bfcd5bcd5 Adjust alternatives test for updated error message
  - 09dee3c611 Suppress errors when checking if an alternative exists
- **PR** #38340: (ewapptus) Backport PR #38251: Fixed nested orchestrate not respecting failures @ *2016-12-19 13:31:16 UTC*
  - **PR** #38251: (ewapptus) Fixed nested orchestrate not respecting failures (refs: #38340)
  - 15d3b476e9 Merge pull request #38340 from ewapptus/bp-38251
  - 266e0a465c Fixed nested orchestrate not respecting failures
- **PR** #38229: (mcalmer) provide kwargs of sls_build to dockerng.create @ *2016-12-18 13:13:10 UTC*
  - ecd441d090 Merge pull request #38229 from mcalmer/dockerng-sls_build-kwargs

  - e7292fabb7 make it explicit that we want to delete these keys
  - 4c710139b5 use default values for pop() to prevent KeyError raised
  - 455c18325c provide kwargs to dockerng.create to provide all features to sls_build as well
- **ISSUE** #36204: (stanvarlamov) Salt-Cloud: salt.runners.cloud.create exits with True on Python process (ec2.py) exception (refs: #37333)
- **PR** #38309: (ewapptus) Backport PR #37333: Fixed state.salt.runner() reporting success on exceptions @ *2016-12-18 12:39:53 UTC*
  - **PR** #37333: (benediktwerner) Fixed state.salt.runner() reporting success on exceptions (refs: #38309)
  - d2ce9c3e71 Merge pull request #38309 from ewapptus/bp-37333
  - a2b1259671 Fixed display of errors
  - 14a39f914e Fixed state.salt.runner return value on exceptions
- **PR** #38323: (rallytime) Update the Cloud Provider Specifics links in cloud docs @ *2016-12-18 12:30:49 UTC*
  - ebb9f6cbbc Merge pull request #38323 from rallytime/update-cloud-provider-links
  - 022caf23e9 Update the Cloud Provider Specifics links in cloud docs
- **PR** #38324: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2016-12-18 12:30:26 UTC*
  - 5bd7471e30 Merge pull request #38324 from rallytime/merge-2016.11
  - 5940db5b3f Merge branch `2016.3' into `2016.11'
    * 6367ca7d2a Add nick to args for create_multi (#38281)
    * 235682b1e6 Merge pull request #38313 from dragon788/2016.3-chocolatey-fix
      · 1f5fc17551 Use machine readable output for list
      · cdbd2fbe3c Added limit-output to eliminate false packages
    * 9e78ddc80e Merge pull request #38279 from rallytime/fix-38174
      · 4a62d01577 Add docs for syndic_wait setting
- **ISSUE** #38246: (martintamare) Windows Minion unable to start via nssm (refs: #38247)
- **PR** #38325: (rallytime) Back-port #38247 to 2016.11 @ *2016-12-18 12:28:41 UTC*
  - **PR** #38247: (martintamare) fix(win_function): handle other language (refs: #38325)
  - 83523d2f73 Merge pull request #38325 from rallytime/bp-38247
  - 4b6c5438e3 fix(win_functions): syntax
  - e602f17e3d fix(win_function): handle other language
- **ISSUE** #30195: (Vaelatern) Add Void Linux support in Salt (refs: #31262, #38326)
- **PR** #38326: (yopito) fix runit init support (grain init) in 2016.11 @ *2016-12-18 12:07:25 UTC*
  - **PR** #31262: (Vaelatern) Add support for Void Linux (refs: #38326)
  - 54a2bb95de Merge pull request #38326 from yopito/fix-runit-init-support
  - 25b91bb686 fix detection of runit as init system (grain init)
  - **PR** #38322: (rallytime) Add azurearm module to doc index
- **PR** #38305: (dereckson) Avoid normalization call for normalized mode value @ *2016-12-16 17:31:25 UTC*
  - 1e4f299e7d Merge pull request #38305 from dereckson/fix-mode-extraneous-normalization

    - 573ac3565e Avoid normalization call for normalized mode value
    - **PR** #38291: (terminalmage) Improve documentation for archive.extracted in 2016.11
- **ISSUE** #37966: (Cybolic) salt-cloud EC2 instance can't be initiated (refs: #37967)
- **PR** #38298: (rallytime) Back-port #37967 to 2016.11 @ *2016-12-16 15:20:04 UTC*
    - **PR** #37967: (Cybolic) Fixed faulty logic preventing instance initialisation. (refs: #38298)
    - 3cf0135d50 Merge pull request #38298 from rallytime/bp-37967
    - 42d367f39d Fixed faulty logic preventing instance initialisation.
- **ISSUE** #38070: (ezh) [2016.11.0] Salt-cloud throws UnicodeDecodeError exception (refs: #38076)
- **PR** #38076: (ezh) Fix decoding of broken string from remote sources @ *2016-12-15 19:05:25 UTC*
    - f4f0036f30 Merge pull request #38076 from doublescoring/fix-2016.11-38070
    - 70c8db5489 Fix decoding of broken string from remote sources
- **PR** #38278: (rallytime) Back-port #38207 to 2016.11 @ *2016-12-15 18:09:27 UTC*
    - **PR** #38207: (tsaridas) remove empty strings from list but not ones with one empty space char (refs: #38278)
    - **PR** #38188: (tsaridas) fix for push_dir in different OS (refs: #38203, #38207)
    - 2ccab22c19 Merge pull request #38278 from rallytime/bp-38207
    - 5e8bf571d8 python3 compatibility and fix pylint
    - e0df047000 remove empty strings from list but not ones with one empty space char
- **PR** #38277: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2016-12-15 18:09:10 UTC*
    - a748e842a8 Merge pull request #38277 from rallytime/merge-2016.11
    - 49a3355915 Merge branch `2016.3' into `2016.11'
    - fc9e1dff35 Merge pull request #38248 from meaksh/salt-api-successfully-close-child-processes
        * ee6eae9855 Successfully exit of salt-api child processes when SIGTERM.
    - 3c718ed35e Merge pull request #38254 from terminalmage/check-pillarenv
        * fa9ad311c6 Also check if pillarenv is in opts
    - 6b9060c38f [2016.3] Bump latest release version to 2016.11.1 (#38256)
- **ISSUE** #38231: (tjuup) Typo: salt-key deleteed (refs: #38232)
- **PR** #38232: (rallytime) Strip final `e' in key cmd to correct ``deleteed'' misspelling @ *2016-12-15 10:38:49 UTC*
    - 0af343e71f Merge pull request #38232 from rallytime/fix-38231
    - 26e1ee3650 Strip final `e' in key cmd to correct ``deleteed'' misspelling
- **ISSUE** #38200: (sebw) selinux.mode doesn't return any output and doesn't persist (refs: #38236)
- **PR** #38236: (gtmanfred) SELINUXTYPE should not be changed @ *2016-12-15 10:37:06 UTC*
    - 6c1ca9dae7 Merge pull request #38236 from gtmanfred/2016.11
    - d1b070c894 clean up selinux unit test
    - 96eabd4939 SELINUXTYPE should not be changed
- **ISSUE** #38228: (vquiering) archive.extracted with options and user/group (refs: #38262)

- **PR** #38262: (terminalmage) Fix archive.extracted when --strip or --strip-components is in the options @ *2016-12-15 08:57:18 UTC*
  - fd32dc3e9b Merge pull request #38262 from terminalmage/issue38228
  - 6442f8a7b5 Add tests for --strip/--strip-components
  - c502e68f12 Detect --strip/--strip-components in tar options and handle properly
  - e95770594d Add strip_components arg to archive.list
- **PR** #38264: (mirceaulinic) Port #37862 into 2016.11 @ *2016-12-15 08:51:20 UTC*
  - **PR** #37862: (mirceaulinic) [2016.11.1] Docstring fixes and new features for napalm_network (refs: #38264)
  - b232bd8ce8 Merge pull request #38264 from cloudflare/PORT-37862
  - 28bbb73151 Import from napalm_base instead of napalm
  - 0a675afc40 Vice-versa docstring
  - 09c50176e2 More docfix
  - 215b8f38e2 Lint cleanup
  - **PR** #38260: (rallytime) Add 2016.11.2 release notes
  - **PR** #38257: (rallytime) [2016.11] Bump latest release version to 2016.11.1
  - **PR** #38233: (terminalmage) Correct an inaccurate warning when top_file_merging_strategy == merge_all
- **PR** #38234: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2016-12-13 18:28:02 UTC*
  - ba62fcf2ec Merge pull request #38234 from rallytime/merge-2016.11
  - 6a327d1367 Merge branch `2016.3' into `2016.11'
  - 004e46afe7 Merge pull request #38198 from vutny/unit-tests-require-libcloud-boto3
    - a6098bac1a Remove note about SaltTesting installation, now it is in the requirements
    - 004bff113e Add missing requirements for running unit tests: libcloud and boto3
  - 9d497bc74c Merge pull request #38213 from rallytime/skip-tls-test
    - bdb807fc7c Skip test_cert_info tls unit test on pyOpenSSL upstream errors
  - 203109dd17 Merge pull request #38224 from whiteinge/cors-options-unauthed
    - de4d3227ab Allow CORS OPTIONS requests to be unauthenticated
  - 721a5feccd Merge pull request #38223 from whiteinge/salt-api-root_dirs
    - bfbf390c0e Add root_dir to salt-api file paths
- **PR** #38205: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2016-12-12 18:13:18 UTC*
  - 7ead1ed336 Merge pull request #38205 from rallytime/merge-2016.11
  - e31f97cf71 Merge branch `2016.3' into `2016.11'
  - 70f7d22ad6 Merge pull request #38191 from terminalmage/issue38162
    - 1ae543a98a Clarify the fact that git_pillar.update does not fast-forward
  - 28171cbfc5 Merge pull request #38194 from vutny/integration-test-requirements-doc
    - e9f419ff64 Document the requirements for running ZeroMQ-based integration tests

  - a4ef037ab1 Merge pull request #38185 from rallytime/bp-38181
  - 609f814454 Reset socket default timeout to None (fixes daemons_tests failures)
- **PR** #38203: (rallytime) Back-port #38188 to 2016.11 @ *2016-12-12 17:48:51 UTC*
  - **PR** #38188: (tsaridas) fix for push_dir in different OS (refs: #38203, #38207)
  - 669409d681 Merge pull request #38203 from rallytime/bp-38188
  - 50d3200b12 removing not needed join
  - 7af708e1e7 fix for push_dir in different OS

25.2.15 Salt 2016.11.3 Release Notes

Version 2016.11.3 is a bugfix release for *2016.11.0*.

Changelog for v2016.11.2..v2016.11.3

Generated at: 2018-05-27 19:39:56 UTC

- **PR** #39536: (twangboy) Namespace `status' functions in `win_status' @ *2017-02-21 23:45:31 UTC*
  - **PR** #39005: (cro) Ungate the status.py module and raise unsupported errors in functions not executable on Windows. (refs: #39536)
  - 40f72db53e Merge pull request #39536 from twangboy/fix_win_status
  - d5453e2f9e Remove unused import (lint)
  - 837c32e673 Remove list2cmdline
  - c258cb3f73 Streamline wmic command returns for easier parsing
  - 6d2cf8171e Fix `ping_master' function
  - d946d10597 Namespace `status' functions in `win_status'
- **PR** #39534: (rallytime) Fix breakage in aptpkg and dpkg execution modules @ *2017-02-21 20:31:15 UTC*
  - **PR** #39418: (anlutro) Allow aptpkg.info_installed on package names that aren't installed (refs: #39534)
  - dc8f578447 Merge pull request #39534 from rallytime/fix-pkg-function-specs
  - d34a8fe9dc Fix breakage in aptpkg and dpkg execution modules
- **ISSUE** #34712: (richardscollin) Salt Test Suite Error - develop (refs: #37366)

  - **PR** #39521: (vutny) Upgrade SaltTesting to run test suite for 2016.11 and add SaltPyLint
  - **PR** #37366: (eradman) dev_python*.txt: use current SaltTesting and SaltPyLint modules (refs: #39521)
- **PR** #39370: (twangboy) Gate win_osinfo and winservice @ *2017-02-17 23:53:58 UTC*
  - e4c71683d9 Merge pull request #39370 from twangboy/gate_win_utils
  - 167cdb3447 Gate windows specific imports, add __virtual__
  - e67387deb7 Add option to return a Non instantiated class
  - 315b0cc105 Clarify return value for win_osinfo
  - 994314ed3d Fix more docs
  - 2bbe3cbf49 Fix some docs
  - 4103563ee1 Merge branch `gate_win_utils' of https://github.com/twangboy/salt into gate_win_utils
    * 24c1bd079d Remove extra newlines
  - 82a86ced55 Add helper function for winservice
  - 0051b5a5e2 Put the win_osinfo classes in a helper function
  - 4e08534877 Gate win_osinfo and winservice better
- **PR** #39486: (twangboy) Remove orphaned function list_configurable_policies @ *2017-02-17 22:21:50 UTC*
  - a3e71b6cce Merge pull request #39486 from twangboy/win_remove_orphaned
  - 1328055c4d Remove orphaned function list_configurable_policies
- **PR** #39418: (anlutro) Allow aptpkg.info_installed on package names that aren't installed (refs: #39534) @ *2017-02-17 18:34:19 UTC*
  - 87b269fc80 Merge pull request #39418 from alprs/fix-aptpkg_info_nonexistent_pkg
  - 246bf1e938 add failhard argument to various apt pkg functions
- **PR** #39438: (mirceaulinic) file.get_managed: refetch source when file hashsum is changed @ *2017-02-17 17:58:29 UTC*
  - e816d6c23e Merge pull request #39438 from cloudflare/fix_39422
  - 8453800639 file.get_managed: refetch cached file when hashsum chnaged
- **ISSUE** #39203: (dmaziuk) salt.users gecos field (refs: #39432)
- **PR** #39432: (dmaziuk) Quick and dirty fix for GECOS fields with more than 3 commas @ *2017-02-17 17:57:30 UTC*
  - a5fe8f0fa6 Merge pull request #39432 from dmaziuk/issue39203
  - 41c046308c Remove #
  - 4f877c6b6f Quick and dirty fix for GECOS fields with more than 3 commas
- **PR** #39484: (corywright) The Reactor docs should use pillar='{}' instead of `pillar={}' @ *2017-02-17 17:50:57 UTC*
  - 3665229a5a Merge pull request #39484 from corywright/fix-reactor-docs-pillar-keyword-args
  - cc90d0d53f The Reactor docs should use pillar='{}' instead of `pillar={}'
- **PR** #39456: (twangboy) Add salt icon to buildenv directory @ *2017-02-16 22:47:58 UTC*
  - 2e3a9c5e58 Merge pull request #39456 from twangboy/win_fix_icon
  - 8dd915dae4 Add salt icon to buildenv directory

- **PR** #39462: (twangboy) Use url_path instead of url_data.path @ *2017-02-16 22:44:18 UTC*
  - 63adc03484 Merge pull request #39462 from twangboy/win_fix_fileclient
  - a96bc13133 Use url_path instead of url_data.path
- **PR** #39458: (rallytime) Fix more warnings in doc build @ *2017-02-16 21:45:52 UTC*
  - e9b034f02f Merge pull request #39458 from rallytime/fixup-more-doc-build-warnings
  - e698bc3508 Fix more warnings in doc build
- **PR** #39437: (sakateka) Fixes about saltfile @ *2017-02-16 20:32:15 UTC*
  - e4f8c2bfb0 Merge pull request #39437 from sakateka/fixes_about_saltfile
  - ab68524d7a less pylint: salt/utils/parsers.py
  - 9e7d9dcc78 Revert ``pylint: salt/utils/parsers.py''
  - f3f129c8f1 document ~/.salt/Saltfile
  - 33f3614b1e pylint: salt/utils/parsers.py
  - 0f36e10e7d expand config_dir and `~/.salt/Saltfile' as last resort
  - **PR** #39451: (Ch3LL) add 2016.11.3 changelog to release notes
- **ISSUE** #38032: (meggiebot) Add missing Carbon docs (refs: #39448)
- **PR** #39448: (gtmanfred) Add release notes for cisco proxy minions added in Carbon @ *2017-02-16 17:29:48 UTC*
  - 8e2cbd2307 Merge pull request #39448 from gtmanfred/2016.11
  - 3172e88700 Add release notes for cisco proxy minions added in Carbon
- **PR** #39428: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2017-02-16 00:01:15 UTC*
  - 070904b719 Merge pull request #39428 from rallytime/merge-2016.11
  - 2acb188ac9 Change `path` value from a tuple to a list
  - 6d78adbf08 Merge branch `2016.3' into `2016.11'
    - 4ff13acf8b salt.fileserver.roots: Fix regression in symlink_list (#39409)
    - 8b8ab8ef8e Merge pull request #39362 from dincamihai/cp-push-test-2016.3
      - 91383c5a19 Add cp.push test
    - 4b726f955b Merge pull request #39380 from joe-niland/quote-numeric-usernames
      - c2edfdd464 Quote numeric user names so pwd.getpwnam handles them properly
    - 1116d32df9 Merge pull request #39400 from meaksh/2016.3-fix-local-cache-issue
      - e7e559ef5c Prevents `OSError' exception in case path doesn't exist
    - 6c854da1d4 Merge pull request #39300 from terminalmage/loader-optimization
      - d3e5d1525e Replace more usage of str.format in the loader
    - 5286b5ff1b Merge pull request #39337 from terminalmage/issue34428
      - a7d2135dc2 Don't re-walk the roots fileserver in symlink_list()
    - ce781deeb5 Merge pull request #39339 from cro/pillar_filetree_doc
      - 410810cea2 Clarification on external pillar usage.

    * fa3014393c Document the upstream RedHat bug with their pygit2 package (#39316)

- **ISSUE** #39360: (bbinet) file.symlink should not try to set ownership to root:root (refs: #39364)
- **PR** #39429: (rallytime) Back-port #39364 to 2016.11 @ *2017-02-15 21:27:21 UTC*
  - **PR** #39364: (gtmanfred) set default user variable to the user cmd runs as (refs: #39429)
  - 54a572e50c Merge pull request #39429 from rallytime/bp-39364
  - 157f4dcdf9 set default user variable to the user cmd runs as
- **PR** #39424: (twangboy) Fix problem with too many connection attempts in Windows @ *2017-02-15 18:51:35 UTC*
  - 881ebf2e93 Merge pull request #39424 from twangboy/win_fix_dos
  - d3f7dd7f50 Add sleep to eval_master
- **ISSUE** #30561: (jfindlay) salt-ssh fails with IPv6 address (refs: #39419, #38831)
- **ISSUE** #22984: (tomasfejfar) salt-ssh problem possibly related to ipv6 (refs: #39419, #38831)
- **PR** #39419: (The-Loeki) Backport Salt-SSH IPv6 fixes to 2016.11 @ *2017-02-15 17:33:13 UTC*
  - **PR** #38877: (The-Loeki) Salt-SSH client: Don't overwrite self.host w/IPv6 brackets (refs: #39419)
  - **PR** #38831: (The-Loeki) Salt-SSH deal with raw IPv6 addresses (refs: #39419, #38877)
  - 47872355a8 Merge pull request #39419 from The-Loeki/bp-ssh-ipv6
  - 4fc5626f16 Don't overwrite self.host w/IPv6 brackets
  - dd1223468b Salt-SSH deal with raw IPv6 addresses
- **PR** #39379: (terminalmage) win_pkg: remove all installed versions when no explicit version passed @ *2017-02-14 18:41:28 UTC*
  - 878946d0f8 Merge pull request #39379 from terminalmage/issue34821
  - fd9ab8e4e3 Remove extra newline
  - 5871825b9e win_pkg: remove all installed versions when no explicit version passed
- **PR** #39392: (anlutro) Make sure OrderedDict order is preserved in nested output @ *2017-02-14 17:50:15 UTC*
  - caffef88cf Merge pull request #39392 from alprs/fix-nested_output_ordered_dict
  - 625a770a23 make sure OrderedDict order is preserved in output
- **PR** #39378: (dmurphy18) Update make_repo in debbuild.py execution module to utilize timeout @ *2017-02-14 17:10:15 UTC*
  - f2459e3ce8 Merge pull request #39378 from dmurphy18/deb_pkg_fix
  - 4bd47cc18a Updated all make_repo loops to use timeout value for retries
- **ISSUE** #39358: (Kimamisa) Backport the RDS fix in Carbon (refs: #39369)
- **PR** #39369: (rallytime) Back-port #37338 to 2016.11 @ *2017-02-13 21:41:19 UTC*
  - **PR** #37338: (bailsman) Fix wait_status in boto_rds.create() (refs: #39369)
  - 99554d9d72 Merge pull request #39369 from rallytime/bp-37338
  - 2e7f6e8e37 Fix wait_status in boto_rds.create()
- **PR** #39303: (kstreee) Removes a redundant test case after removed `batch' in `netapi'. @ *2017-02-13 19:55:46 UTC*

  - 03ab8b1b5a Merge pull request #39303 from kstreee/fix-testcase-rm-batch-in-netapi
  - 51972d0724 Removes a redundant test case after removed `batch' in `netapi'.
- **PR** #39315: (Ch3LL) improve salt-run salt.cmd test @ *2017-02-13 19:00:14 UTC*
  - 60640f77d7 Merge pull request #39315 from Ch3LL/fix_run_salt_test
  - b3cbc5a408 improve salt-run salt.cmd test
- **ISSUE** #39243: (morganwillcock) win_system.reboot: can return True without rebooting (refs: #39311)
- **PR** #39311: (morganwillcock) win_system: return False from a skipped reboot @ *2017-02-13 18:59:11 UTC*
  - 2ca63a93cd Merge pull request #39311 from morganwillcock/skip-reboot
  - 0f3abb613d Clarify success for shutdown function
  - dcb4d05275 win_system: return False from a skipped reboot
- **PR** #39346: (joe-niland) Ignore non-HTTP IIS bindings @ *2017-02-13 18:18:36 UTC*
  - 082105fa84 Merge pull request #39346 from joe-niland/handle-iis-bindings
  - 8d5afdb0ae win_iis module: list_sites - when retrieving bindings, ignore bindigs whose protocols do not have host headers
- **ISSUE** #39321: (mgresser) Grain matching failing where grain value is an INT (refs: #39361)
- **PR** #39361: (gtmanfred) make sure both variables are strings. @ *2017-02-13 17:20:17 UTC*
  - a3a9a8e1ed Merge pull request #39361 from gtmanfred/2016.11
  - ee2275ad67 make sure both variables are strings.
  - **PR** #39341: (eliasp) Add creation/configuration of Salt PKI dirs to hacking docs
- **PR** #39317: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2017-02-10 23:07:32 UTC*
  - ce1f01f81a Merge pull request #39317 from rallytime/merge-2016.11
  - c1df446b7a Merge branch `2016.3' into `2016.11'
  - 9de559ff4e Merge pull request #39313 from rallytime/merge-2016.3

  - **PR** #36336: (lomeroe) add additional static policies to computer configuration policy class (refs: #39083)
  - 91c25bd651 Merge pull request #39083 from lomeroe/bp-36336
  - 03e5319124 Merge branch `2016.11' into bp-36336
  - 981ec89a4d update command line example to correct policy name
  - e2574da0b8 Fix/Add documentation, 80 char line lengths
  - 5e94a30a34 add additional static policies to computer configuration policy class duplicate code cleanup/misc code efficiencies
- **PR** #39153: (nicholasmhughes) Fix selinux.mode state config file handling @ *2017-02-06 18:37:34 UTC*
  - 30455079fe Merge pull request #39153 from nicholasmhughes/fix-selinux.mode-config-predictability
  - 8d8ba9c7d2 added the new getconfig function to the test
  - a6a24e1a1b Addressed edge case when attempting to set the config file to `Disabled'. The state should only check the file, since the in-memory setting won't disappear until after reboot.

  - 6858658cc2 The selinux.mode state only checked the current status of SELinux in memory (getenforce) when determining if changes needed to be made. The /etc/selinux/config file could have a different value, and it would not be changed. This commit enhances idempotency of the state in regards to both the in-memory and configuration file enforcement of SELinux.

- **ISSUE** #38081: (haraldrudell) x509 state or module cannot generate password protected private keys (refs: #39159)
- **PR** #39159: (clinta) Csr crl passphrase @ *2017-02-06 18:36:05 UTC*
  - 7b5eb17cbe Merge pull request #39159 from clinta/csr-crl-passphrase
  - cf548ac717 Remove unnecessary pass
  - 4ebf7a3df4 Remove unnecessary pass statement
  - 6a8046970e fix csr bugs and pep8
  - 36dcf5f3da only overwrite if overwrite option is specified
  - 403000d375 recreate cert on bad password
  - 6497094ba7 passphrase for crl
  - 3ef809fb0f passphrase for csr
- **PR** #39162: (meaksh) Adding more function to Snapper module @ *2017-02-06 18:33:53 UTC*
  - b240468525 Merge pull request #39162 from meaksh/snapper-module-improvements
  - f950732fa0 pylint fixes
  - aa2f9906e0 Removing extra spaces
  - 9d6a33f257 Adds `snapper.create_config' unit tests
  - d38ed505f8 Adds `snapper.modify_snapshots' unit tests
  - d5496ccc99 Adds `snapper.delete_snapshots' unit tests
  - 3eecb6076b Snapper: Adding support for creating configurations
  - 041e54d42a Snapper: Adding support for snapshot metadata modification
  - eaf5de9dce Snapper: Adding support for deleting snapshots
- **ISSUE** #38370: (tjyang) Salt-Cloud: There was a query error: Required field ``deviceChange'' not provided (not @optional) (refs: #39171)

  - 4311b0b6de Increasing timeouts for running integrations tests
- **PR** #38639: (isbm) Isbm disable custom roster for api 2016.11 @ *2017-01-23 18:59:11 UTC*
  - bde6d3eee7 Merge pull request #38639 from isbm/isbm-disable-custom-roster-for-api-2016.11
  - ffbd45062e Explain what it is about and how to configure that

25.2.16 Salt 2016.11.4 Release Notes

Version 2016.11.4 is a bugfix release for *2016.11.0*.

Statistics

- Total Merges: **276**
- Total Issue References: **63**
- Total PR References: **223**
- Contributors: **62** (Ch3LL, DennisHarper, DmitryKuzmenko, L4rS6, MasterNayru, Seb-Solon, The-Loeki, UtahDave, aabognah, alankrita, amontalban, ardakuyumcu, attiasr, bdrung, bewing, cachedout, cro, defanator, discountbin, dmurphy18, drawsmcgraw, eldadru, garethgreenaway, githubcdr, gtmanfred, hkrist, isbm, jbadson, jeanpralo, jettero, jinm, joe-niland, kaszuba, lomeroe, lorengordon, mateiw, mcalmer, mchugh19, meaksh, mirceaulinic, mlalpho, narendraingale2, nmadhok, rallytime, redbaron4, roaldnefs, s0undt3ch, skazi0, skizunov, smarsching, sofixa, sp1r, sthrasher, techhat, terminalmage, thatch45, thor, ticosax, twangboy, vutny, whiteinge, zer0def)

AIX Support Expanded

AIX support has been added for the following execution modules:

- *user*
- *group*
- *network*
- *status*
- *timezone*

Additionally, AIX is now supported in the *disk.iostat* remote-execution function, and the *status* beacon is now supported.

Minion Data Cache Enhancement

Memcache is now supported as a data store for the minion data cache.

Memcache is an additional cache layer that keeps a limited amount of data fetched from the minion data cache for a limited period of time in memory that makes cache operations faster. It doesn't make much sense for the `localfs` cache driver but helps for more complex drivers like `consul`.

For more details see `memcache_expire_seconds` and other `memcache_*` options in the master config reverence.

Docker Fixes

- Docker authentication has been re-organized. Instead of attempting a login for each push/pull (which was unnecessary), a new function called `dockerng.login` has been added, which authenticates to the registry and adds the credential token to the `~/.docker/config.json`. After upgrading, if you have not already performed a `docker login` on the minion using the docker CLI, you will need to run `dockerng.login` to login. This only needs to be done once.
- A bug in resolving the tag name for images in a custom registry (where a colon can appear in the image name, e.g. `myregistry.com:5000/image:tagname`) has been fixed. In previous releases, Salt would use the colon to separate the tag name from the image name, and if there was no colon, the default tag name of `latest` would be assumed. However, this caused custom registry images to be misidentified when no explicit tag name was passed (e.g. `myregistry.com:5000/image`). To work around this in earlier releases, simply specify the tag name.

Salt-Cloud Fixes

2016.11.0 added support for templating userdata files for the *ec2* driver, using the *renderer* option from the master config file. However, as the default renderer first evaluates jinja templating, followed by loading the data as a YAML dictionary, this results in unpredictable results when userdata files are comprised of non-YAML data (which they generally are).

2016.11.4 fixes this by only templating the userdata_file when it is explicitly configured to do so. This is done by adding a new optional parameter to the cloud profile called `userdata_template`. This option is used in the same way as the `template` argument in *file.managed* states, it is simply set to the desired templating renderer:

```
my-ec2-config:
  # Pass userdata to the instance to be created
  userdata_file: /etc/salt/my-userdata-file
  userdata_template: jinja
```

If no `userdata_template` option is set in the cloud profile, then salt-cloud will check for the presence of the master configuration parameter `userdata_renderer`. If this is also not set, then no templating will be performed on the userdata_file.

In addition, the other cloud drivers which support setting a `userdata_file` (*azurearm*, *nova*, and *openstack*) have had templating support added to bring them to feature parity with the ec2 driver's implementation of the `userdata_file` option.

Changelog for v2016.11.3..v2016.11.4

Generated at: 2018-05-27 19:46:47 UTC

- **PR** #40708: (Ch3LL) Add 2016.11.4 Release Note ChangeLog @ *2017-04-14 22:12:57 UTC*
  - e5cd6086a7 Merge pull request #40708 from Ch3LL/2016.11.4_release
  - d228fb6e02 Add 2016.11.4 Release Note ChangeLog
- **PR** #40685: (Ch3LL) Fix errno code for filecache test for other operating systems. @ *2017-04-14 16:54:25 UTC*
  - 77028a6c4e Merge pull request #40685 from Ch3LL/fix_mac_file
  - 9ea6e8b456 remove io and change to EROFS
  - 688791ff60 remove try-except and change errno
  - e30afc4c01 add exception type
  - acf333df08 change errno code for fileclient test
- **ISSUE** #40688: (jbadson) Syslog returner does not work with Python 2.6 (refs: #40689)
- **PR** #40689: (jbadson) Fixes bug that prevents syslog returner from working under Python 2.6 @ *2017-04-14 10:45:13 UTC*
  - bc70772f9d Merge pull request #40689 from jbadson/fix-syslog-returner
  - e5a3a7d217 Fixes bug that prevents syslog returner from working under Python 2.6
- **ISSUE** #40658: (sebw) State tomcat.war_deployed regression when WAR filename contains version (refs: #40690)
- **PR** #40690: (thor) Fixes #40658: even clearer and working(!) Tomcat version handling @ *2017-04-14 10:44:02 UTC*
  - 983d35ad38 Merge pull request #40690 from thor/2016.11-tomcat
  - 09145ea1a5 Fixes unindexed strfmt curly braces for python 2.6
  - b78fc46b91 Fixes #40658: clearer version handling
- **PR** #40686: (twangboy) Fix `salt-minion' service for Win 10 Creators Update 1703 @ *2017-04-13 20:00:12 UTC*
  - 3cd9a50b22 Merge pull request #40686 from twangboy/fix_service
  - b6ac4aa86d Fix service for win10 update
- **PR** #40675: (gtmanfred) use loader for getting war version @ *2017-04-13 19:58:30 UTC*
  - ad4d6839fd Merge pull request #40675 from gtmanfred/2016.11

  - a61fc824c4 use loader for war extraction
- **ISSUE** #38497: (chrisLeeTW) local_batch client ignore external auth (refs: #40598)
- **PR** #40680: (rallytime) Back-port #40598 to 2016.11 @ *2017-04-13 19:58:16 UTC*
  - **PR** #40598: (mchugh19) Ensure batch uses passed eauth token or credentials (refs: #40680)
  - 7ea526f59e Merge pull request #40680 from rallytime/bp-40598
  - cc1643eb1f Fix netapi lint
  - e790930f5a re-add batch support to cherrypy saltapi
  - 6eec04b2db pop out of kwargs
  - 260dd84758 Create eauth dict for passing into batch class
  - 5fb8190d44 Ensure batch uses passed eauth token or credentials
- **PR** #40681: (cachedout) Allow status beacon to run on all operating systems @ *2017-04-13 19:33:10 UTC*
  - db68df23dd Merge pull request #40681 from cachedout/status_beacon
  - ecbb0d186f Allow status beacon to run on all operating systems
- **PR** #40678: (Ch3LL) fix test_fstype test for mac @ *2017-04-13 19:20:32 UTC*
  - 39dd6e284d Merge pull request #40678 from Ch3LL/fix_mac_fstype
  - 60724980ec fix test_fstype test for mac
- **PR** #40665: (rallytime) Back-port #35665 to 2016.11 @ *2017-04-12 21:06:36 UTC*
  - **PR** #35665: (sthrasher) Speed up /jobs for salt-api when run under cherrypy. (refs: #40665)
  - 6df76f6687 Merge pull request #40665 from rallytime/bp-35665
  - 0f897b2426 Switch from comprehension to logic used in jobs runner. This makes it easier to deal with potential unicode in returns.
  - 78dd629f09 Fix compat issues with /jobs return values.
  - 4778bc7365 Speed up /jobs for salt-api when run under cherrypy.
- **PR** #40666: (gtmanfred) make sure userdata is always defined in ec2 @ *2017-04-12 21:06:00 UTC*
  - 3e41a248a5 Merge pull request #40666 from gtmanfred/userdata
  - 5e92fd0948 make sure userdata is always defined in ec2
- **PR** #40662: (twangboy) Backport msi-conformant-version function @ *2017-04-12 18:49:23 UTC*
  - b245abbea5 Merge pull request #40662 from twangboy/backport_msi_versioning
  - 825832812b Backport msi-conformant-version function
- **ISSUE** #39868: (amontalban) archive.extracted issue when source_hash_update=True and extracted files does not exist (refs: #40551)
- **PR** #40551: (terminalmage) Fix four issues in archive.extracted state @ *2017-04-12 18:37:52 UTC*
  - 92b5f03beb Merge pull request #40551 from terminalmage/issue39868
  - a722ca9ccf archive.extracted: also cleanup fileclient's cached location
  - 5ea1f607b0 Fix mocking in unit tests
  - 8dfa51f31f Moar fixes for source_hash_update
  - 7103707d49 Remove unnecessary versionadded lines

  - a717881f53 Just get a hash for the source archive
  - 9da4eb18bf Check hash of cached source against source_hash before downloading archive
  - ad24faa59d Fix three issues in archive.extracted state
- **PR** #40637: (twangboy) Add unicode_literals import @ *2017-04-12 16:55:03 UTC*
  - 0638418d22 Merge pull request #40637 from twangboy/fix_unicode_issues
  - 021783dbae Add unicode_literals import
- **PR** #40651: (twangboy) Fix status.diskusage for Windows on Py3 @ *2017-04-12 16:21:29 UTC*
  - 491661f323 Merge pull request #40651 from twangboy/fix_diskusage_py3
  - 7c5079ec91 Correct capitalization problem with api call
- **ISSUE** #40624: (sumeetisp) Issue - grains.append (refs: #40631)
- **PR** #40631: (gtmanfred) if grain is defined as None still convert in append @ *2017-04-12 16:19:16 UTC*
  - 3aabd85e53 Merge pull request #40631 from gtmanfred/grains
  - b0bd99c26d add comment and unit test
  - b21bc7528f if grain is defined as None still convert in append
- **ISSUE** #40167: (alias454) file.replace diff results output showing additional characters (refs: #40629)
- **PR** #40629: (aabognah) Fixing issue # 40167 @ *2017-04-11 22:45:08 UTC*
  - 3737289bee Merge pull request #40629 from aabognah/fix-bug-40167
  - 28f7744cb6 Fixing issue # 40167 with file.replace where the diff output does not display correctly.
- **PR** #40646: (twangboy) Keep network.py execution module @ *2017-04-11 22:03:02 UTC*
  - 2a22bea290 Merge pull request #40646 from twangboy/fix_win_network
  - 0f7a81cd34 Keep network.py execution module
- **PR** #40645: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2017-04-11 20:59:13 UTC*
  - e1f5a5dfc3 Merge pull request #40645 from rallytime/merge-2016.11
  - 8de6497933 Merge branch `2016.3' into `2016.11'
    * 2ae9eaa176 Merge pull request #40638 from rallytime/bp-40571
      · 2d1c4be2df pkgrepo.managed: properly handle comments for debian
- **ISSUE** #40594: (anlutro) salt-ssh file.recurse adds a lot of unwanted directories (refs: #40642)
- **ISSUE** #38458: (duk3luk3) salt-ssh uses sudo to create cache dir, later fails to access it (refs: #40442)
- **PR** #40642: (DmitryKuzmenko) Correctly resolve relative cache path to absolute. @ *2017-04-11 20:43:57 UTC*
  - **PR** #40442: (gtmanfred) allow file_client to figure out cachedir (refs: #40642)
  - 6c4ae3c914 Merge pull request #40642 from DSRCorporation/bugs/40594_ssh_cachedir
  - 055256c518 Correctly resolve relative cache path to absolute.
- **ISSUE** #40075: (afletch) salt-ssh temporary files - insecure permissions (refs: #40609)
- **PR** #40609: (gtmanfred) stat_file when keep is set, instead of mirroring all file permissions @ *2017-04-11 18:48:47 UTC*
  - 8492cef7a5 Merge pull request #40609 from gtmanfred/2016.11

  - 6e34c2b5e5 stat file when placing it on server instead of caching

- **PR** #40620: (mateiw) SUSE specific changes to salt-api.service @ *2017-04-11 14:45:00 UTC*
  - 05ac613ecf Merge pull request #40620 from mateiw/2016.11-suse-saltapi-service
  - ee911a74b4 suse specific changes to salt-api.service
- **ISSUE** #39463: (githubcdr) Transport TCP minions don't reconnect/recover (refs: #40614)
- **PR** #40614: (gtmanfred) add retries on authentications of the salt minion reconnecting @ *2017-04-10 22:42:16 UTC*
  - b0a2414d68 Merge pull request #40614 from gtmanfred/tcp
  - a86b101ae6 add retries on authentications of the salt minion reconnecting
- **PR** #40606: (kaszuba) Use correct exec_driver in dockerng.sls module @ *2017-04-10 22:25:31 UTC*
  - f7e121a9ee Merge pull request #40606 from kaszuba/fix-dockerng-sls
  - 3a0d61f108 Use correct exec_driver in dockerng.sls module
- **ISSUE** #39863: (daswathn) Salt-Master not responding when the list of minions are high after upgrade to 2016.11.2 (refs: #40615)
- **PR** #40615: (rallytime) Call out to _pki_minions() once, rather than in a loop in _check_list_minions() @ *2017-04-10 22:22:18 UTC*
  - **PR** #34920: (cachedout) Key cache (refs: #40615)
  - b6cf948afe Merge pull request #40615 from rallytime/fix-39863
  - 1a9f03ab92 Call out to _pki_minions() once, rather than in a loop in _check_list_minions()
- **PR** #40588: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2017-04-07 19:30:14 UTC*
  - 4fa58be222 Merge pull request #40588 from rallytime/merge-2016.11
  - 5a419b8aae Merge branch `2016.3' into `2016.11'
  - 83f6d3d3bb Merge pull request #40567 from terminalmage/fix-pillar-get-merge-lists

  - 62d8ad2b4b Merge pull request #39882 from smarsching/issue-39842
  - d485d1af44 Fix context for _splitlines_preserving_trailing_newline.
  - 76cb7bf612 Fix trailing newlines on Windows (#39842).
- **PR** #40451: (isbm) Fileclient testcase (2016.11) @ *2017-04-06 19:53:31 UTC*
  - ae13de622a Merge pull request #40451 from isbm/isbm-fileclient-testcase-2016.11
  - 74c65557dd Add space before in-lint comment for lint
  - 35fcb8b52d Fix race condition on cache directory creation
  - aba94495a5 Lintfix (Py3 code compat)
  - 9f9dc6e4e7 Add unit test case for fileclient
- **ISSUE** #40084: (podstava) profile fields in azurearm salt-cloud need to be actualized to sources (refs: #40564)
- **PR** #40564: (techhat) Update Azure ARM docs @ *2017-04-06 18:17:32 UTC*
  - 74366c57a4 Merge pull request #40564 from techhat/azuredocs
  - 08d071bc68 Update Azure ARM docs
- **ISSUE** #40005: (vutny) *ssh_known_hosts.present* does not support SHA256 key fingerprints (refs: #40543)
- **PR** #40543: (rallytime) Add the ``fingerprint_hash_type'' option to ssh state and module @ *2017-04-05 21:21:16 UTC*
  - cb9dcb1e1b Merge pull request #40543 from rallytime/fix-40005
  - 1ef81e6a55 Add the ``fingerprint_hash_type'' option to ssh state and module
- **PR** #40540: (DmitryKuzmenko) A quick fix for Cache has no `list' attribute. @ *2017-04-05 18:50:18 UTC*
  - **PR** #40494: (rallytime) [develop] Merge forward from 2016.11 to develop (refs: #40540)
  - 3f0695575a Merge pull request #40540 from DSRCorporation/bugs/40494_merge_forward_cache_list_fix
  - c0fd5634cf A quick fix for Cache has no `list' attribute.
- **ISSUE** #32662: (anlutro) salt-cloud: allow templating of EC2 userdata, similar to deploy script (refs: #32698)
- **PR** #40464: (terminalmage) salt-cloud: Do not pass userdata_file through yaml renderer @ *2017-04-05 17:32:07 UTC*
  - **PR** #32698: (techhat) Allow EC2 userdata to be templated (refs: #40464)
  - 28fc048030 Merge pull request #40464 from terminalmage/userdata-renderer
  - 84ee693006 Nova and openstack don't accept base64-encoded userdata
  - 73f4c43e2a Allow for userdata_template to be disabled in a cloud_profile
  - 78b4798b1b Update compile_template test to use StringIO

  - 5f7c5613ce Properly handle renderers which return StringIO objects
  - d551b0d857 Bring in salt.utils.stringio from develop branch
  - 6a6ef0adf8 Move userdata templating to salt.utils.cloud
  - b440d0c679 Update 2016.11.4 release notes for userdata_renderer -> userdata_template
  - a6183d93d3 Preserve windows newlines in salt.template.compile_template()
  - 04f02df5fe Try to read compiled template as StringIO
  - 79cc253bbf Only template the userdata_file if explicitly configured to do so
  - b580654f85 Update cloud docs to reflect userdata_renderer -> userdata_template
  - a6064fb2e4 Rename userdata_renderer -> userdata_template in master config docs
  - 50f2b2831f Remove userdata_renderer value
  - cc2186f35a Add templating support for other cloud drivers that support userdata_file
  - be8d34c59b ec2: Add support for using userdata_renderer to template userdata_file
  - eddbd41265 Openstack did not have templating support for userdata_file before 2016.11.4
  - a85a416c72 Add userdata_renderer fix info to 2016.11.4 release notes
  - 111188742a Add documentation for userdata_renderer
  - 9ee2dcfc2d Add userdata_renderer master config param

- **PR** #40530: (dmurphy18) Update release information for 2016.11.4 for additional AIX support @ *2017-04-05 16:20:22 UTC*
  - 990bde4c07 Merge pull request #40530 from dmurphy18/aix_docupd
  - fd93caf206 Added further support for functionality on AIX for 2016.11.4
  - 17b58917f2 Update release information for new AIX support
- **PR** #40528: (dmurphy18) Allow for nightly build designations in Salt versions @ *2017-04-04 20:34:26 UTC*
  - 4d932691f1 Merge pull request #40528 from dmurphy18/salt_nightlybuild
  - d62a119fc1 Allow for nightly build designations in Salt versions
- **ISSUE** #37699: (gstachowiak) Artifactory state. Incorrect timeout error reporting. (refs: #40465)
- **PR** #40465: (rallytime) Artifactory Execution & State Module: Fixup Error Handling @ *2017-04-04 20:12:21 UTC*
  - 0ed385210f Merge pull request #40465 from rallytime/fix-37699
  - 8f084f7056 Update unit test to look for actual string comment
  - ef664b46ae Artifactory State: Only wrap main function call to module in try/except and wrap exc comment in str()
  - f1015e3900 Artifactory Module: catch URLErrors as well as HTTPErrors
- **ISSUE** #39275: (yhekma) Cache backend gets hit a *lot* (refs: #40497, #40429)
- **PR** #40497: (DmitryKuzmenko) Memcache documentation and minor updates. @ *2017-04-04 19:55:18 UTC*
  - **PR** #40429: (DmitryKuzmenko) MemCache - a minion data cache booster. (refs: #40497, #40468)
  - 7a04ed2439 Merge pull request #40497 from DSRCorporation/features/39275_memcache
  - 82c45b1a52 Memcache documentation and minor updates.

- **ISSUE** #38683: (gstachowiak) require/order/failhard combination error (refs: #40504)
- **PR** #40504: (rallytime) Group checks for failhard setting in () in state.check_failhard function @ *2017-04-04 19:53:48 UTC*
  - d654de52ed Merge pull request #40504 from rallytime/fix-38683
  - ede4c28887 Group checks for failhard setting in () in state.check_failhard function
- **PR** #40503: (thatch45) first pass at adding support for pycryptodome installed as @ *2017-04-04 19:39:02 UTC*
  - 4d5d7d9712 Merge pull request #40503 from thatch45/2016.11
  - e21fd54d1b fix lint on the lint ignores...
  - 60113248b1 pycryptodome adds RSA to the key header which the openssl
  - 206dec63ff fix the cryptodome version lookup for the versions report
  - d3b77092b5 good catch
  - 31c6a10d1b first pass at adding support for pycryptodome installed as
- **PR** #40525: (dmurphy18) Add support for disk.iostat on AIX @ *2017-04-04 19:31:41 UTC*
  - 0dd92c63ea Merge pull request #40525 from dmurphy18/aix_dskiostat
  - 712537272b Added support on AIX for disk.iostat
- **PR** #40496: (rallytime) Back-port #40415 to 2016.11 @ *2017-04-04 17:19:39 UTC*
  - **PR** #40415: (defanator) Fix boto_vpc.create_route() to work with interface_id (refs: #40496)
  - a6291b17c1 Merge pull request #40496 from rallytime/bp-40415
  - f8b3006898 Fix boto_vpc.create_route() to work with interface_id
- **ISSUE** #39275: (yhekma) Cache backend gets hit a *lot* (refs: #40497, #40429)
- **PR** #40468: (techhat) Add __func_alias__ back in @ *2017-04-04 17:02:43 UTC*
  - **PR** #40429: (DmitryKuzmenko) MemCache - a minion data cache booster. (refs: #40497, #40468)
  - 3eb8e0baf1 Merge pull request #40468 from techhat/cachealias
  - 6ec0baa9a0 Swap around aliases
  - 76e54a2900 Add __func_alias__ back in
- **ISSUE** #29104: (adithep) Merging Order warning (refs: #39109)
- **PR** #39109: (bdrung) Fix top_file_merging_strategy warning if env_order is set @ *2017-04-04 14:20:56 UTC*
  - 8c0befaa8b Merge pull request #39109 from bdrung/fix-merge-order-warning
  - fbf8fcfa98 Simplify _get_envs() by using list comprehensions
  - 74a3b066ea Fix top_file_merging_strategy warning if env_order is set
  - ec219b5f42 Remove duplicate client_envs variable definitions
  - 6279f7c120 fix do to pre correct on python randome function
  - 66b9515af7 Fix up the doc for failover clarity
- **PR** #40495: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2017-04-03 18:36:16 UTC*
  - 02a1f642ab Merge pull request #40495 from rallytime/merge-2016.11
  - 8111909bb1 Merge branch `2016.3' into `2016.11'

    - 3d45a004b0 Merge pull request #40427 from terminalmage/clarify-master-tops-docs
        * bda781d8f9 Grammar fix
        * 0d7b0c4ef0 Improve the master_tops documentation
        * d27340a9f2 Add saltutil.sync_tops runner func
- **PR** #40466: (dmurphy18) Support for execution module status on AIX @ *2017-04-01 00:28:51 UTC*
    - ac82972cb3 Merge pull request #40466 from dmurphy18/aix_status
    - 7c0b30d9a4 Support for AIX
- **ISSUE** #39275: (yhekma) Cache backend gets hit a *lot* (refs: #40497, #40429)
- **PR** #40429: (DmitryKuzmenko) MemCache - a minion data cache booster. (refs: #40497, #40468) @ *2017-03-31 20:21:00 UTC*
    - fdb0250c95 Merge pull request #40429 from DSRCorporation/features/39275_memcache
    - 4475d1757d In-memory minion data cache.
- **ISSUE** #38458: (duk3luk3) salt-ssh uses sudo to create cache dir, later fails to access it (refs: #40442)
- **PR** #40442: (gtmanfred) allow file_client to figure out cachedir (refs: #40642) @ *2017-03-31 20:14:27 UTC*
    - 31d4e6949c Merge pull request #40442 from gtmanfred/salt-ssh
    - 8367735063 allow file_client to figure out cachedir
- **PR** #40456: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2017-03-31 17:51:11 UTC*
    - 0cfcd188a9 Merge pull request #40456 from rallytime/merge-2016.11
    - 0da4c46b68 Merge branch `2016.3' into `2016.11'
    - c26f4cc76c Merge pull request #40371 from terminalmage/pr-40344
        * a8bcaa73d7 Force use of posixpath when joining salt fileserver paths in gitfs
        * cafa08d8e0 Add ability for salt.utils.path_join to force the use of posixpath
    - df9df82959 Merge pull request #40379 from rallytime/tests-for-39855
        * 96259d6c63 Lint fix
        * 4f7ac1431e Create a unit test for the _replace_auth_key function in the ssh module
- **PR** #40443: (gtmanfred) prepend ssh_log_file with root_dir @ *2017-03-31 09:23:46 UTC*
    - 8617be9c6d Merge pull request #40443 from gtmanfred/sshlog
    - 7f6046deec prepend ssh_log_file with root_dir
- **PR** #40376: (nmadhok) Backporting changes in vmware cloud driver from develop branch to 2016.11 branch @ *2017-03-30 22:35:13 UTC*
    - 132d8b7b88 Merge pull request #40376 from nmadhok/2016.11
    - dd62310941 Adding unit tests for vmware_test
    - 36edf0af64 Add additional VMware related exceptions
    - 034ef30f7c Remove old vmware unit tests
    - 7c144888da Backporting changes in vmware cloud driver from develop branch to 2016.11 branch
- **ISSUE** #39692: (djsly) tuned module and state are broken on 7.3 families. (refs: #40387, #39719, #39768)
- **PR** #40387: (redbaron4) More complete fix for 39692 @ *2017-03-30 22:29:05 UTC*

  - dfaa670b66 Merge pull request #40387 from redbaron4/fix-39692
  - 77a40a0c44 Lint fixes
  - 8c1adfafd5 More complete fix for 39692
- **ISSUE** #7287: (dragozov) django.loaddata treats fixture list as arguments and prepends ``--'' for each (refs: #40404)
- **PR** #40404: (roaldnefs) Fix for fixtures in the djangomod module @ *2017-03-30 22:26:09 UTC*
  - 313d21626f Merge pull request #40404 from roaldnefs/fix-djangomod-loaddata
  - 92285cb045 Fix for fixtures in the djangomod module
- **PR** #40416: (lorengordon) Adds some missing file functions on Windows @ *2017-03-30 22:22:44 UTC*
  - 5379899442 Merge pull request #40416 from lorengordon/win-file-funcs
  - 8edaf25e10 Adds some missing file functions on Windows
- **ISSUE** #40417: (lorengordon) *temp.file* does not close the file handle (refs: #40418)
- **PR** #40418: (lorengordon) Closes handle to temporary file before returning the path @ *2017-03-30 22:22:03 UTC*
  - 1f5d6b88f9 Merge pull request #40418 from lorengordon/close-temp-file
  - 7baf2809cf Closes handle to temporary file before returning the path
- **PR** #40430: (twangboy) Fix logic for __virtual__ in win_dsc and win_psget @ *2017-03-30 22:06:16 UTC*
  - 5c78d55eab Merge pull request #40430 from twangboy/fix_virtual
  - 08e95ce4f0 Add logging on __virtual__ failures
  - 43ecb1a597 Fix logic for __virtual__
- **PR** #40431: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2017-03-30 21:37:39 UTC*
  - b855f29928 Merge pull request #40431 from rallytime/merge-2016.11
  - d5576d75e7 Merge branch `2016.3' into `2016.11'
  - b6770fd81f Merge pull request #40407 from aesdana/fix_rabbitmq_version_check
    * 4c0763fa2f Added split to cut off debian_revision from rabbitmq-server version Fixes #40396
  - d4fb45d9f8 Merge pull request #40424 from terminalmage/fix-open-filehandle
    * 66251263cf Fix open filehandles
  - 8708096365 Merge pull request #40399 from terminalmage/docker-py_version
    * 14c6575655 Add docker-py version to the versions report
  - ff1266b3a6 Merge pull request #40391 from Ch3LL/2016.3.7_release_notes
    * f532ec5288 initial 2016.3.7 release notes
  - 96bf9427b0 Merge pull request #40368 from Ch3LL/bump_version_3
    * a02fa7dd1f [2016.3] Bump previous version to 2016.3.6
- **PR** #40401: (roaldnefs) fix Ubuntu notation in docs/faq.rst @ *2017-03-29 20:28:31 UTC*
  - 7d900d31ea Merge pull request #40401 from roaldnefs/fix-doc-faq
  - 21f161fecc fix Ubuntu notation in docs/faq.rst

- **ISSUE** #29028: (kevins9) state.sls fails to render state with pillar data: Jinja variable `dict object' has no attribute (refs: #37795)
- **PR** #40390: (rallytime) Back-port #37795 to 2016.11 @ *2017-03-29 19:05:12 UTC*
  - **PR** #37795: (jettero) please tell me where is the "error: `dict' object has no ..." (refs: #40390)
  - 70a3f963ec Merge pull request #40390 from rallytime/bp-37795
  - 1ba15577bd Pylint fix
  - ec65924659 please tell me where is the ``error: `dict' object has no attribute `seek'" ??
- **PR** #40395: (rallytime) Handle AttributeError for dockerng_mod.docker attempt fails and docker is installed @ *2017-03-29 17:47:11 UTC*
  - f8fbfff7dc Merge pull request #40395 from rallytime/catch-attribute-error-docker-test
  - 99c8dcc18e Handle AttributeError for dockerng_mod.docker attempt fails and docker is installed
- **PR** #40362: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2017-03-28 22:50:32 UTC*
  - d7d3d68035 Merge pull request #40362 from rallytime/merge-2016.11
  - 4f1543c2a1 Merge branch `2016.3' into `2016.11'
    - 1381f97292 Merge pull request #40264 from meaksh/2016.3-gather_job_timeout-fix
      - 68dccae5b4 Makes sure ``gather_job_timeout'' is an integer
- **PR** #40372: (zer0def) Fixes related to cache directory argument changes in pip>=6. @ *2017-03-28 22:48:41 UTC*
  - 2febd05896 Merge pull request #40372 from zer0def/pip-cache-fixes
  - d68067f1d7 Merge remote-tracking branch `main/2016.11' into pip-cache-fixes
  - 4f23a23ca8 Fixed the *test_install_download_cache_argument_in_resulting_command* to accomodate introduced cache directory argument fixes and renamed it to *test_install_download_cache_dir_arguments_in_resulting_command*.
  - 9d0f94eeba Fixed unnecessary API changes introduced with suggested changes.
- **PR** #40369: (Ch3LL) [2016.11] Bump previous version to 2016.3.6 @ *2017-03-28 18:50:39 UTC*
  - 6162698c87 Merge pull request #40369 from Ch3LL/bump_version_11
  - 7597d96edb [2016.11] Bump previous version to 2016.3.6
- **ISSUE** #40322: (Whissi) ssh_auth.absent: Wrong comment when test=True (refs: #40333)
- **ISSUE** #40321: (Whissi) state.alternatives: Wrong comment when test=True (refs: #40333)
- **PR** #40333: (gtmanfred) fix some test=True comments @ *2017-03-28 16:11:01 UTC*
  - 2d2cb5b837 Merge pull request #40333 from gtmanfred/2016.11
  - 5596620dfb fix some test=True comments
- **PR** #40347: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2017-03-28 02:39:31 UTC*
  - bb37f133fc Merge pull request #40347 from rallytime/merge-2016.11
  - e77e86db3a Merge branch `2016.3' into `2016.11'
  - 17ab1da0ab Merge pull request #40345 from twangboy/fix_osx_build
    - 3207d670c5 Fix osx build
  - 7ab10491ab Merge pull request #40338 from UtahDave/fix_cherrypy_ssl_error_link

    * 280b501950 Upstream cherrypy moved to Github from Bitbucket
  - **PR** saltstack/salt#40332: (zer0def) Fixes related to cache directory argument changes in pip>=6. (refs: #40346)

  - f028e939f5 Clean up temporary file in net.load_template
- **ISSUE** #37972: (ebauman) salt-run execution for master with no AAAA record adds significant execution time (refs: #40310)
- **PR** #40310: (gtmanfred) add warning when no host/dns record is found for fqdn_ip @ *2017-03-24 21:55:20 UTC*
  - 839b620f32 Merge pull request #40310 from gtmanfred/2016.11
  - cff027ddc6 add warning when no host/dns record is found for fqdn
- **PR** #40288: (dmurphy18) Execution module network support for AIX @ *2017-03-24 20:10:36 UTC*
  - eb86d55478 Merge pull request #40288 from dmurphy18/aix_network
  - b53a95dab1 Further update to us in similar to review comments
  - 59c0bdc14d Updated for review comments
  - 031c9457ba Execution module network support for AIX
- **PR** #40308: (rallytime) Back-port #38835 to 2016.11 @ *2017-03-24 19:00:46 UTC*
  - **PR** #38835: (UtahDave) Cache docs (refs: #40308)
  - 4928026253 Merge pull request #40308 from rallytime/bp-38835
  - 3ba50d3c52 add info about what is cached
  - 77e8f6aff9 fix config example
  - 61f2fa9339 Add documentation for the Minion data cache

- **PR** #40287: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2017-03-24 16:50:23 UTC*
  - 12a9fc43c9 Merge pull request #40287 from rallytime/merge-2016.11
  - 77415369cc Merge branch `2016.3' into `2016.11'
  - 0e2d52c3ea Merge pull request #40260 from lubyou/fix-join_domain
    * 1cb15d1ea8 use win32api.FormatMessage() to get the error message for the system code
  - 0c62bb37d3 Merge pull request #40275 from UtahDave/2016.3local
    * 9f0c9802c2 remove reference to auth_minion.
  - 57ce474d73 Merge pull request #40265 from terminalmage/issue40219
    * 1a731e0216 Pop off the version when aggregating pkg states
    * 0055fda3e9 Properly aggregate version when passed with name
    * 62d76f50fc Don't aggregate both name/pkgs and sources in pkg states
  - b208630d85 Merge pull request #40201 from sergeizv/cloud-roster-fixes-2016.3
    * d87b377ad2 cloud roster: Don't stop if minion wasn't found in cloud cache index
    * a6865e0283 cloud roster: Check whether show_instance succeeded on node
    * 1b45c8e8c2 cloud roster: Check provider and profile configs for ssh_username
    * a18250b2e4 cloud roster: Return proper target name
    * 637930b2b3 cloud roster: Fix extracting instance's info
    * dd1d3aac74 cloud roster: Work with custom conf dir
- **PR** #40250: (techhat) Add wait_for_fun() to set_tags() @ *2017-03-23 16:42:13 UTC*
  - **PR** #40225: (techhat) Add wait_for_fun() to set_tags() (refs: #40250)
  - b7f9100e6d Merge pull request #40250 from techhat/settags
  - baff7a046d Add wait_for_fun() to set_tags()
- **ISSUE** #39976: (peterhirn) win_lgpo missing policies, eg. *Prevent the usage of OneDrive for file storage* (refs: #40255, #40253)
- **PR** #40255: (lomeroe) backport #40253 @ *2017-03-23 16:36:44 UTC*
  - **PR** #40253: (lomeroe) correct method of getting `text' of the XML object to compare to the ... (refs: #40255)
  - 904e144ae4 Merge pull request #40255 from lomeroe/fix_39976_2016.11
  - 0e9f5820cc backport #40253
- **PR** #40240: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2017-03-23 14:14:11 UTC*
  - **PR** #40237: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 (refs: #40240)
  - 720a362c7a Merge pull request #40240 from rallytime/merge-2016.11
  - 5c5b74b09a Merge branch `2016.3' into `2016.11'
    * 35ced607dd Merge pull request #40226 from terminalmage/issue40149
      · 2a8df9384c Fix wrong errno in systemd.py
    * 24c4ae9c21 Merge pull request #40232 from rallytime/update-release-notes
      · 2ead188b4f Update release notes for 2016.3.6

        * c59ae9a82c Merge pull request #39855 from Foxlik/use_regex_to_compare_authorized_keys
            · d46845a5b6 Add newline at end of file
            · d4a3c8a66a Use regular expression instead of split when replacing authorized_keys
        * fd10430018 Merge pull request #40221 from rallytime/bp-39179
            · 07dc2de084 fix error parsing
        * a27a2cc3bb Merge pull request #40206 from cro/sign_pub_take2
            · 01048de83f leave sign_pub_messages off on minion by default.
            · a82b005507 Leave sign_pub_messages off by default.
        * d1abb4cbaa Merge pull request #40193 from rallytime/bp-40117
            · cf1857904b More optimization.
            · 5a08266814 Removed debug statemnt
            · f557f7c6bb Added fix for issue 39393
            · bb62278b73 Reverting changes.
            · a9107cde44 Added if condition for broken link.
        * 0f1ff4d4a8 Merge pull request #40196 from twangboy/win_fix_deps
            · 6761527793 Update dependencies for PyOpenSSL
        * b0501515cb Merge pull request #40184 from terminalmage/link-reactor-example
            · a42be82993 Link to minion start reactor example from FAQ.

- **ISSUE** #39445: (systemtrap) state file.copy for directories does not set ownership recursively (refs: #40030)
- **PR** #40231: (rallytime) Back-port #40030 to 2016.11 @ *2017-03-22 23:14:40 UTC*
  - **PR** #40030: (narendraingale2) Added changes for fix_39445 (refs: #40231)
  - c40376250f Merge pull request #40231 from rallytime/bp-40030
  - 4d1c687cbd Using lchown insted of chown.
  - 52b3d986b5 Added changes for fix_39445
  - **PR** saltstack/salt#40225: (techhat) Add wait_for_fun() to set_tags() (refs: #40239)
- **PR** #40239: (cachedout) Revert ``Add wait_for_fun() to set_tags()'' @ *2017-03-22 22:59:16 UTC*
  - e39f5cbf40 Merge pull request #40239 from saltstack/revert-40225-waitforfun
  - 95bdab87b4 Revert ``Add wait_for_fun() to set_tags()''
- **PR** #40225: (techhat) Add wait_for_fun() to set_tags() (refs: #40250) @ *2017-03-22 18:15:35 UTC*
  - 11d2f5abec Merge pull request #40225 from techhat/waitforfun
  - 89b5010883 Add wait_for_fun() to set_tags()
- **PR** #40172: (dmurphy18) Fix solaris network @ *2017-03-22 17:41:56 UTC*
  - c8cfbb7df6 Merge pull request #40172 from dmurphy18/fix_solaris_network
  - a6218b9484 Updated use of tail on Solaris and Sun-like OS
  - 90e6a1d8f6 Further update to support correct tail in network for Solaris
  - 5b6d33dd70 Fix use of correct tail on Solaris for active_tcp

- **PR** #40210: (rallytime) Skip flaky test for now @ *2017-03-22 16:34:41 UTC*
  - e9a4e8548b Merge pull request #40210 from rallytime/test-skip
  - 0ba773d86b Skip flaky test for now
- **ISSUE** #40204: (sofixa) InfluxDB returner present on salt-minion(installed via salt-bootstrap and updated via apt-get) has a bug (refs: #40209)
- **PR** #40209: (sofixa) change InfluxDB get_version to expect status code 204 @ *2017-03-21 21:42:26 UTC*
  - 0b00489eb2 Merge pull request #40209 from sofixa/2016.11
  - e1cc7234ff change InfluxDB get_version to expect status code 204
- **ISSUE** #39775: (mirceaulinic) Proxy *mine_interval* config ignored (refs: #39935, #saltstack/salt`#39935`_, #39776)
  - **PR** saltstack/salt#39935: (cro) Add special token to insert the minion id into the default_include path (refs: #40202)
- **PR** #40202: (cro) Revert ``Add special token to insert the minion id into the default_include path'' @ *2017-03-21 21:37:33 UTC*
  - 66bc680d0a Merge pull request #40202 from saltstack/revert-39935-namespace_proxy_cfg
  - bb71710747 Revert ``Add special token to insert the minion id into the default_include path''
- **PR** #40199: (whiteinge) Ponysay emergency hotfix @ *2017-03-21 21:10:21 UTC*
  - d8f0b79997 Merge pull request #40199 from whiteinge/ponysay-emergency-hotfix
  - 85ea61b544 Add depends note
  - 5a271acfdc Fix ponysay outputter hardcoded path
- **PR** #40194: (terminalmage) Change imports for dockerng tests @ *2017-03-21 19:34:55 UTC*
  - 82cee58e72 Merge pull request #40194 from terminalmage/fix-docker-test-imports
  - 6caedb0de8 Change imports for dockerng tests
- **PR** #40189: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2017-03-21 18:02:51 UTC*
  - 0b512f9ffb Merge pull request #40189 from rallytime/merge-2016.11
  - a55c4138a8 Merge branch `2016.3' into `2016.11'
    * d4e6c58526 Merge pull request #40182 from terminalmage/dockerng-mod_watch-stopped
      · 4629a26fb7 Add support for ``stopped'' state to dockerng's mod_watch
    * a0b4082484 Merge pull request #40171 from Ch3LL/2016.3.6_release
      · 9c6d8d892f additional PRs/issues for 2016.3.6 release notes
    * 33ba7821f7 Merge pull request #40120 from sergeizv/gce-expand-node-fix
      · 9d0fbe7e01 gce: Exclude GCENodeDriver objects from _expand_node result
    * 48843977c3 Merge pull request #40122 from meaksh/2016.3-yum-downloadonly-support
      · 067f3f77c2 Adding downloadonly support to yum/dnf module
    * 60e1d4e2f3 Merge pull request #40159 from cro/sign_pub
      · e663b761fb Fix small syntax error
      · 0a0f46fb14 Turn on sign_pub_messages by default. Make sure messages with no `sig' are dropped with error when sign_pub_messages is True.

- **ISSUE** #39779: (sp1r) Pillar scheduling is broken (refs: #40034)
- **ISSUE** #38523: (MorphBonehunter) schedule not changed on pillar update after minion restart (refs: #40034)
- **ISSUE** #36134: (Ch3LL) carbon: multi-master with failover does not failover when master goes down (refs: #36437)
- **PR** #40034: (sp1r) Disallow modification of jobs from pillar with schedule execution module @ *2017-03-21 16:36:34 UTC*
  - **PR** #36437: (DmitryKuzmenko) Keep the schedule jobs in ONE place. (refs: #40034)
  - d9cb222aa8 Merge pull request #40034 from sp1r/fix-pillar-scheduling
  - 595f786327 fix evaluating jobs when ``pillar'' is missing in opts
  - 9d5db1910c fix initial data structure for schedule tests
  - d3a2489c9c schedule tests to ensure pillar jobs are not modified
  - 27385ff49c added a check ensuring schedule is a dict before merging
  - 14d71918b2 Fixes #39779
- **PR** #40160: (eldadru) Fix this issue: https://github.com/saltstack/salt/issues/40073, descr... @ *2017-03-20 21:37:43 UTC*
  - 257c862c52 Merge pull request #40160 from eldadru/fix-issue-40073-boto-rds-describe-empty-dict
  - 954c871332 Fix this issue: https://github.com/saltstack/salt/issues/40073, describe return dictionary returned empty , probably as result of incorrect past merge (see discussion on issue)
- **PR** #40162: (rallytime) Make sure the tornado web server is stopped at the end of the test class @ *2017-03-20 20:35:21 UTC*
  - aec504173a Merge pull request #40162 from rallytime/archive-integration-test-fixes
  - dd193cc740 Make sure the tornado web server is stopped at the end of the test class
- **PR** #40158: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2017-03-20 20:34:23 UTC*
  - 461e15f0f4 Merge pull request #40158 from rallytime/merge-2016.11
  - 88f3ebd7e9 Remove extra ``connect'' kwarg caught by linter
  - f4d4768a6d Merge branch `2016.3' into `2016.11'
    - 28e4fc17b6 Merge pull request #40123 from twangboy/win_fix_network
      - 06dfd55ef9 Adds support for inet_pton in Windows to network util
    - 35ddb79f59 Merge pull request #40141 from bobrik/fallback-resolve
      - af1545deed Use the first address if cannot connect to any
- **PR** #40165: (rallytime) Don't try to run the dockerng unit tests if docker-py is missing @ *2017-03-20 20:33:19 UTC*
  - b235f0953f Merge pull request #40165 from rallytime/gate-docker-unit-tests
  - f32d8a8683 Don't try to run the dockerng unit tests if docker-py is missing
- **PR** #40085: (mirceaulinic) VRF arg and better doc for ping and traceroute @ *2017-03-20 19:48:57 UTC*
  - db9fb58b82 Merge pull request #40085 from cloudflare/fix-ping-tr
  - 6cbdd61b54 Strip trailing whitespaces
  - 897a2a37c3 VRF arg and better doc for ping and traceroute

- **PR** #40095: (skizunov) dns_check should not try to connect when connect=False @ *2017-03-17 17:31:42 UTC*
  - 3bac06f099 Merge pull request #40095 from skizunov/develop2
  - 880790f743 dns_check should not try to connect when connect=False
- **PR** #40096: (skizunov) When building up the `master_uri_list', do not try to connect @ *2017-03-17 17:13:41 UTC*
  - 31da90edd9 Merge pull request #40096 from skizunov/develop3
  - eb9a0a6fd1 When building up the `master_uri_list', do not try to connect
- **PR** #40111: (eldadru) Fixing simple issue 40081 - the key parameter of the method create ov... @ *2017-03-17 17:00:03 UTC*
  - 5303386d93 Merge pull request #40111 from eldadru/fix-issue-40081-boto-rds-create-overwritten-key-parameter
  - 78b5d112d7 Fixing simple issue 40081 - the key parameter of the method create overwritten by internal loop.
- **PR** #40118: (rallytime) Add CLI Example for dockerng.get_client_args @ *2017-03-17 16:34:13 UTC*
  - d2e376e8f2 Merge pull request #40118 from rallytime/cli-example
  - bb496bb7f4 Add CLI Example for dockerng.get_client_args
- **PR** #40097: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2017-03-17 15:17:08 UTC*
  - baef5009aa Merge pull request #40097 from rallytime/merge-2016.11
  - ef1ff38f8d Merge branch `2016.3' into `2016.11'
  - 116201f345 Merge pull request #40059 from terminalmage/fix-virtualenv-traceback
    - e3cfd29d6b Fix traceback when virtualenv.managed is invoked with nonexistant user
  - a01b52b9a3 Merge pull request #40090 from rallytime/bp-40056
    - ae012db87a update mention bot blacklist
  - d1570bba4c Merge pull request #40057 from cachedout/ollie_blacklist
    - 0ac2e83d37 Merge branch `2016.3' into ollie_blacklist
    - 5592c680b5 More mentionbot blacklists
- **ISSUE** #39771: (mirceaulinic) Empty __proxy__ dunder inside scheduler (refs: #40077)
- **PR** #40077: (mirceaulinic) Fix #39771 (Empty __proxy__ dunder inside scheduler) @ *2017-03-16 20:56:02 UTC*
  - 9ef3e070c2 Merge pull request #40077 from cloudflare/fix-39771
  - cd319e7e39 Add proxy kwarg to scheduler
  - c6e6dd1a04 ProxyMinion: correctly build the scheduler
- **PR** #40088: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2017-03-16 19:58:44 UTC*
  - b12720a56f Merge pull request #40088 from rallytime/merge-2016.11
  - 626bd03885 Merge branch `2016.3' into `2016.11'
  - d36bdb1a6e Merge pull request #40070 from Ch3LL/2016.3.6_release
    - a1f8b49bd1 update 2016.3.6 release notes with additional PR's
  - 8dcffc7751 Merge pull request #40018 from meaksh/2016.3-handling-timeouts-for-manage.up-runner

        * 9f5c3b7dcd Allows to set custom timeouts for `manage.up' and `manage.status'
        * 2102d9c75c Allows to set `timeout' and `gather_job_timeout' via kwargs
    - 22fc5299a2 Merge pull request #40038 from velom/fix-pip-freeze-parsing
        * 3fae91d879 correctly parse ``pkg_name===version'' from pip freeze
    - 3584f935fa Merge pull request #40053 from saltstack/rh_ip_patch
        * 219947acdb Update rh_ip.py
    - 837432d3d2 Merge pull request #40041 from terminalmage/issue40011
        * 5b5d1b375c Fix transposed lines in salt.utils.process

- **PR** #40055: (rallytime) Update ``yaml'' code-block references with ``jinja'' where needed @ *2017-03-16 16:30:38 UTC*
    - 703ab23953 Merge pull request #40055 from rallytime/doc-build-warnings
    - 72d16c9fa9 Update ``yaml'' code-block references with ``jinja'' where needed
- **PR** #40072: (meaksh) [2016.11] Allows overriding `timeout' and `gather_job_timeout' to `manage.up' runner call @ *2017-03-16 15:31:46 UTC*
    - **PR** #40018: (meaksh) Allows overriding `timeout' and `gather_job_timeout' to `manage.up' runner call (refs: #40072)
    - e73a1d0e54 Merge pull request #40072 from meaksh/2016.11-handling-timeouts-for-manage.up-runner
    - 40246d3723 Allows to set custom timeouts for `manage.up' and `manage.status'
    - ad232fdc01 Allows to set `timeout' and `gather_job_timeout' via kwargs
- **PR** #40045: (terminalmage) Fix error when chhome is invoked by user.present state in Windows @ *2017-03-15 19:00:41 UTC*
    - 2f28ec26ee Merge pull request #40045 from terminalmage/fix-windows-user-present
    - 359af3bb2b Fix error when chhome is invoked by user.present state in Windows
- **PR** #40047: (rallytime) Back-port #40000 to 2016.11 @ *2017-03-15 17:47:37 UTC*
    - **PR** #40000: (skizunov) Fix exception in salt-call when master_type is `disable' (refs: #40047)
    - 4067625676 Merge pull request #40047 from rallytime/bp-40000
    - 11766c7259 Fix exception in salt-call when master_type is `disable'
- **PR** #40023: (jeanpralo) We need to match on .p not just strip `.p' otherwise it will remove a... @ *2017-03-14 23:14:56 UTC*
    - 86f7195e0e Merge pull request #40023 from jeanpralo/fix-minions-cant-finish-by-char-p
    - d7b0c8ae88 We need to match on .p not just strip `.p' otherwise it will remove any p from the string even if we have no dot
- **PR** #40025: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2017-03-14 23:14:33 UTC*
    - 277bd17ff2 Merge pull request #40025 from rallytime/merge-2016.11
    - 029f28bbd5 Merge branch `2016.3' into `2016.11'
    - ee7f3b1200 Merge pull request #40021 from Ch3LL/2016.3.6_release
        * f3e7e4fb2a Add 2016.3.6 Release Notes
    - 26895b7be2 Merge pull request #40016 from terminalmage/fix-grains-test

        * 0ec81a4cde Fixup a syntax error
        * 5d84b40bfd Attempt to fix failing grains tests in 2016.3
    - 0c61d064ad Merge pull request #39980 from vutny/cmd-run-state-bg
        * a81dc9dfc1 [2016.3] Allow to use *bg* kwarg for *cmd.run* state function
    - b042484455 Merge pull request #39994 from rallytime/ulimits-dockerng-version
        * 37bd800fac Add a versionadded tag for dockerng ulimits addition
    - e125c94ba5 Merge pull request #39988 from terminalmage/dockerng-timeout
        * bd2519ed1b Add comment explaining change from #39973
- **PR** #40020: (dmurphy18) Full support for execution module timezone on AIX @ *2017-03-14 21:05:31 UTC*
    - 8db74fb275 Merge pull request #40020 from dmurphy18/aix_timezone
    - aabbbffd45 Full support to execution module timezone on AIX
    - 16d5c7ce4a WIP: timezone support for AIX
- **PR** #39924: (dmurphy18) Add AIX support for user and group execution modules @ *2017-03-14 21:04:02 UTC*
    - 60066da614 Merge pull request #39924 from dmurphy18/salt_aix_fixMar
    - 5077c989bb Updated changes file for added AIX support
    - 8e107bd43e WIP: support for useradd on AIX
    - 2f87d727d6 WIP: group support for AIX
- **PR** #40010: (jettero) S3 bucket path broken @ *2017-03-14 19:01:01 UTC*
    - cd73eafec8 Merge pull request #40010 from jettero/s3-bucket-path-broken
    - acee5bf7c8 clarify this, because it messes people up in the mailing lists, and myself briefly before I thought about it
    - 8102ac8e3c same here
    - 21b79e00be In order for the heredoc to be correct, bucket and path have to default to `', not None
- **PR** #39991: (terminalmage) Document the fact that the checksum type can be omitted in file.managed states @ *2017-03-14 15:58:11 UTC*
    - 61f1fb04c5 Merge pull request #39991 from terminalmage/source_hash-docs
    - 537fc36029 Document the fact that the checksum type can be omitted in file.managed states
- **PR** #39984: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2017-03-13 18:30:16 UTC*
    - 53d14d8ad9 Merge pull request #39984 from rallytime/merge-2016.11
    - ef6f4b15ca Merge branch `2016.3' into `2016.11'
    - cd0336e868 Merge pull request #39973 from terminalmage/dockerng-timeout
        * 869416e7db Don't use docker.Client instance from context if missing attributes
- **PR** #39967: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2017-03-10 23:45:33 UTC*
    - 31c00740e7 Merge pull request #39967 from rallytime/merge-2016.11
    - 3022466615 Merge branch `2016.3' into `2016.11'
    - 282c607d26 Merge pull request #39962 from cachedout/disable_mentionbot_delay_3
        * 7a638f204b Disable mention bot delay on 2016.3

    - 1e0c88ae08 Merge pull request #39937 from cachedout/gpg_zypper
        * 13ed0d1209 Fix --non-gpg-checks in zypper module
- **PR** #39963: (cachedout) Mention bot delay disable for 2016.11 @ *2017-03-10 20:25:25 UTC*
    - 269a2fd739 Merge pull request #39963 from cachedout/disable_mentionbot_delay_11
    - 5fcea05691 Mention bot delay disable for 2016.11
- **ISSUE** #7997: (shantanub) Proper way to upgrade salt-minions / salt-master packages without losing minion connectivity (refs: #39952)
- **PR** #39952: (vutny) Fix #7997: describe how to upgrade Salt Minion in a proper way @ *2017-03-10 18:41:57 UTC*
    - 6350b07384 Merge pull request #39952 from vutny/doc-faq-minion-upgrade-restart
    - d989d749d6 Fix #7997: describe how to upgrade Salt Minion in a proper way
- **ISSUE** #39775: (mirceaulinic) Proxy *mine_interval* config ignored (refs: #39935, #saltstack/salt`#39935`_, #39776)
- **PR** #39935: (cro) Add special token to insert the minion id into the default_include path @ *2017-03-10 17:51:55 UTC*
    - dc7d4f4224 Merge pull request #39935 from cro/namespace_proxy_cfg
    - e4aef54c73 Add special token to insert the minion id into the default_include path
- **PR** #39936: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2017-03-10 17:05:04 UTC*
    - 9503a1d0c6 Merge pull request #39936 from rallytime/merge-2016.11
    - c8b5d390b5 Merge branch `2016.3' into `2016.11'
        * 4526fc6e08 Merge pull request #39929 from terminalmage/pr-39770-2016.3
            · cf0100dabe Scrap event-based approach for refreshing grains
        * 111110caf8 Merge pull request #39919 from The-Loeki/patch-1
            · 170cbadc54 CIDR matching supports IPv6, update docs
        * caf10e9988 Merge pull request #39899 from techhat/cleanupdisks
            · baf4579e63 Update cleanup function for azure
        * fcf95f3654 Merge pull request #39871 from terminalmage/squelch-import-warning
            · 2b2ec69d04 Squelch warning for pygit2 import
        * f223fa8906 Merge pull request #39794 from cachedout/clean_monitor_socket_shutdown
            · 2e683e788b Clean up errors which might be thrown when the monitor socket shuts down
        * 4002dc1947 Merge pull request #39819 from terminalmage/top-file-matching-docs
            · 7178e77eee Improve the Top File matching docs
        * c08aaeb7fd Merge pull request #39820 from ni3mm4nd/beacons_topic_doc_typo
            · 804b12048c Add missing apostrophe
        * cbd2a4e3cc Merge pull request #39826 from cachedout/yubikey_fix
            · 6125eff02d Add group func to yubikey auth
        * f575ef459f Merge pull request #39624 from drawsmcgraw/39622

        - 13da50be33 Fix indention lint errors
        - 545026352f Address issue 39622
    * 1f3619c1e5 Merge pull request #39796 from cachedout/master_shutdown
        - e31d46c1b8 Stop the process manager when it no longer has processes to manage
    * 53341cf152 Merge pull request #39791 from gtmanfred/2016.3
        - 3ab4f843bf load runners if role is master
    * c234c25092 Merge pull request #39784 from sergeizv/fix-39782
        - b71c3fe13c Revert ``cloud.clouds.ec2: cache each named node (#33164)''
    * 4ee59be22c Merge pull request #39766 from rallytime/fix-ipv6-connection
        - 65b239664e Restore ipv6 connectivity and ``master: <ip>:<port>'' support

- **ISSUE** #38121: (Da-Juan) Beacon configuration doesn't work as a list (refs: #39932, #39930)
- **PR** #39932: (rallytime) Cherry-pick the beacon fixes made in #39930 to 2016.11 @ *2017-03-10 00:21:09 UTC*
  - **PR** #39930: (s0undt3ch) Moar Py3 and a fix for #38121 (refs: #39932)
  - 899e037f0a Merge pull request #39932 from rallytime/cp-beacon-fixes
  - 4a52cca926 Pylint fixes
  - 4627c4ea6d Code cleanup and make sure the beacons config file is deleted after testing
  - c7fc09f97d Support the new list configuration format.
  - be06df9b64 Remove **args, **kwargs*. Not needed, not useful.
  - 4a242829ee These tests aren't even using mock!
  - 6408b123e7 These tests are not destructive
  - 50e51b5b9d The beacons configuration is now a list. Handle it!
- **PR** #39933: (hkrist) Fixed rawfile_json returner output format. @ *2017-03-10 00:20:52 UTC*
  - 2e68edee4a Merge pull request #39933 from hkrist/fix-rawfile_json_returner-format
  - 4d0ddcd110 Fixed rawfile_json returner output format. It outputted python object instead of standard json.
- **PR** #39934: (dmurphy18) Correct comment lines output from execution module's host.list_hosts @ *2017-03-10 00:20:14 UTC*
  - fb0dc33c42 Merge pull request #39934 from dmurphy18/fix_host_list
  - e7b9a45079 Correct comment lines output got list_hosts
- **PR** #39900: (twangboy) Namespace the line function properly in win_file @ *2017-03-09 22:19:12 UTC*
  - a6f88d03df Merge pull request #39900 from twangboy/win_fix_line
  - 462bdecd33 Namespace the line function properly in win_file
- **ISSUE** #37741: (discountbin) Check in file.replace state for ignore_if_missing (refs: #37743, #39910)
- **PR** #39910: (rallytime) Back-port #37743 to 2016.11 @ *2017-03-09 22:16:58 UTC*
  - **PR** #37743: (discountbin) Adding check for ignore_if_missing param when calling _check_file. (refs: #39910)
  - 77ecff4e02 Merge pull request #39910 from rallytime/bp-37743

  - ca306c0860 Replace pass with updated comment for return
  - 1a78878b47 Adding check for ignore_if_missing param when calling _check_file.
- **PR** #39770: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2017-03-09 22:00:17 UTC*
  - c2d4d17589 Merge pull request #39770 from rallytime/merge-2016.11
  - dbaea3de73 Remove extra refresh reference that snuck in
  - d9f48ac6ea Don't shadow refresh_pillar
  - d86b03dc90 Remove manual refresh code from minion.py
  - a7e419e35f Scrap event-based approach for refreshing grains
  - 776a9431b9 Merge branch `2016.3' into `2016.11'
    * a24da31131 Merge pull request #39761 from cachedout/issue_33187
      · c2df29edb2 Properly display error in jboss7 state
    * 0888bc32ef Merge pull request #39728 from rallytime/update-release-ver-2016.3
      · c9bc8af8f2 [2016.3] Bump latest release version to 2016.11.3
    * b52dbeec68 Merge pull request #39619 from terminalmage/zd1207
      · c7dfb494a6 Fix mocking for grains refresh
      · 7e0ced3b45 Properly hand proxy minions
      · 692c456da3 Add a function to simply refresh the grains
- **PR** #39872: (techhat) Add installation tips for azurearm driver @ *2017-03-07 23:18:04 UTC*
  - 801ff28053 Merge pull request #39872 from techhat/fixdocs
  - 35440c5936 Add installation tips for azure
  - 2a1ae0bf2e Change example master in azure docs
- **PR** #39837: (terminalmage) Fix regression in archive.extracted when it runs file.directory @ *2017-03-07 04:09:51 UTC*
  - 6d0f15c31a Merge pull request #39837 from terminalmage/more-issue39751
  - 0285ff3c7d Fix regression in archive.extracted when it runs file.directory
- **PR** #39858: (techhat) Reorder keys that were being declared in the wrong place @ *2017-03-07 03:51:56 UTC*
  - 68752a2a18 Merge pull request #39858 from techhat/statuskey
  - 507a4f7f93 Reorder keys that were being declared in the wrong place
- **ISSUE** #38830: (danielmotaleite) salt-ssh: vault fails to use config (refs: #38943)
- **PR** #39862: (rallytime) Back-port #38943 to 2016.11 @ *2017-03-07 03:34:40 UTC*
  - **PR** #38943: (thatch45) When we generate the pillar we should send in the master opts (refs: #39862)
  - 49c8faa141 Merge pull request #39862 from rallytime/bp-38943
  - e21b16c002 try it with a different init sequence
  - 92cac0ff8b make it a deepcopy
  - 58cb8cd4f5 make sure to copy the top dict reference since we are moding it
  - a0b671ea43 When we generate the pillar we should send in the master opts

- **PR** #39852: (rallytime) Back-port #39651 to 2016.11 @ *2017-03-06 21:18:34 UTC*
  - **PR** #39651: (DennisHarper) Checking Instance when calling a function that can return None (refs: #39852)
  - 8ecc719f90 Merge pull request #39852 from rallytime/bp-39651
  - bb5ddbe18c Checking instance exists in master._get_cached_minion_data when cache.fetch returns None
  - 79f2a7cbb7 Update __init__.py
  - e2a232921d Checking instance exists in master._get_cached_minion_data when cache.fetch returns None
  - 838774291d Update __init__.py
  - ff6f63e9dd Checking instance exists in master._get_cached_minion_data when cache.fetch returns None
  - 855f87554c Checking instance exists in master._get_cached_minion_data when cache.fetch returns None
- **ISSUE** #39052: (githubcdr) Minion restart very slow since 2016.11.2 (refs: #39104)
- **PR** #39851: (rallytime) Back-port #39104 to 2016.11 @ *2017-03-06 21:17:43 UTC*
  - **PR** #39104: (githubcdr) Do not use name resolving for --notrim check (refs: #39851)

  - 6539dbdbca Do not use name resolving for --notrim check
- **ISSUE** #38231: (tjuup) Typo: salt-key deleteed (refs: #39799)
- **PR** #39799: (Ch3LL) Fix deleteed message when key is deleted @ *2017-03-03 05:17:43 UTC*
  - d0440e2a2a Merge pull request #39799 from Ch3LL/fix_salt_key_msg
  - 8346682cf7 Fix deleteed message when key is deleted
- **ISSUE** #38962: (gstachowiak) Broken /jobs in salt-api in salt 2016.11.1 (Carbon) (refs: #39472)
- **PR** #39472: (whiteinge) Update _reformat_low to not run kwarg dicts through parse_input @ *2017-03-02 17:46:20 UTC*
  - 9f70ad7164 Merge pull request #39472 from whiteinge/_reformat_low-update
  - d11f5381a4 Add RunnerClient test for old/new-style arg/kwarg parsing
  - ec377ab379 Reenable skipped RunnerClient tests
  - 27f7fd9ad4 Update _reformat_low to run arg through parse_input
  - 5177153459 Revert parse_input change from #32005
- **PR** #39727: (terminalmage) salt.modules.state: check gathered pillar for errors instead of in-memory pillar @ *2017-03-02 17:06:43 UTC*
  - 7dfc4b572a Merge pull request #39727 from terminalmage/issue39627
  - 3bb0ebd872 Update tests for PR 39727
  - c334b59c96 salt.modules.state: check gathered pillar for errors instead of in-memory pillar
  - 97dd8a13d9 Ensure that ext_pillar begins with pillar_override if ext_pillar_first is True
  - f951266944 Add log message for successful makostack processing

- **ISSUE** #39775: (mirceaulinic) Proxy *mine_interval* config ignored (refs: #39935, #saltstack/salt`#39935`_, #39776)
- **PR** #39776: (mirceaulinic) WIP: Save _schedule.conf under <proxy ID> dir @ *2017-03-02 16:27:45 UTC*
  - 965f474316 Merge pull request #39776 from cloudflare/proxy-schedule
  - 35b8b8fd64 Save _schedule.conf under <minion ID> dir
- **PR** #39788: (cachedout) Disable one API test that is flaky @ *2017-03-02 16:17:31 UTC*
  - 555f1473f6 Merge pull request #39788 from cachedout/disable_api_test
  - 523e377b33 Disable one API test that is flaky
- **PR** #39762: (terminalmage) Fix regression in file.get_managed @ *2017-03-02 02:59:34 UTC*
  - 793979cbe6 Merge pull request #39762 from terminalmage/issue39751
  - 64db0b8563 Add integration tests for remote file sources
  - f9f894d981 Fix regression in file.get_managed when skip_verify=True
  - 28651a6699 Remove next(iter()) extraction
- **ISSUE** #35088: (Modulus) salt/cloud/ec2.py encoding problems. (refs: #37912)
- **PR** #39767: (rallytime) Back-port #38316 to 2016.11 @ *2017-03-02 02:54:57 UTC*
  - **PR** #38316: (mlalpho) salt utils aws encoding fix (refs: #39767)
  - **PR** #37912: (attiasr) fix encoding problem aws responses (refs: #38316)
  - 91a9337ab3 Merge pull request #39767 from rallytime/bp-38316
  - 1dcf018df7 requests api says Response.encoding can sometimes be None http://docs.python-requests.org/en/master/api/#requests.Response.encoding and result.text.encode() doesn't accept None and expects a string.
- **ISSUE** #39692: (djsly) tuned module and state are broken on 7.3 families. (refs: #40387, #39719, #39768)
- **PR** #39768: (rallytime) Back-port #39719 to 2016.11 @ *2017-03-02 02:54:40 UTC*
  - **PR** #39719: (Seb-Solon) Support new version of tuned-adm binary (refs: #39768)
  - 4a01bd64ea Merge pull request #39768 from rallytime/bp-39719
  - d7cb70f203 Enh: Support new version of tuned-adm binary
- **PR** #39760: (Ch3LL) Initial 2016.11.4 Release Notes Doc @ *2017-03-01 18:43:39 UTC*
  - 780457f934 Merge pull request #39760 from Ch3LL/2016.11.4_notes
  - 1853c998c4 add initial 2016.11.4 release notes
- **PR** #39731: (twangboy) Add docs for Kwargs in pkg.refresh_db @ *2017-02-28 22:02:59 UTC*
  - 0147f78ab5 Merge pull request #39731 from twangboy/win_pkg_docs
  - 423e6f7448 Add docs for Kwargs in pkg.refresh_db
- **ISSUE** #39710: (huangfupeng) schedule.add parameter can not use “after“ (refs: #39734)
- **PR** #39734: (garethgreenaway) Missing parameter in the schedule.add function @ *2017-02-28 20:43:08 UTC*
  - fce2d184f3 Merge pull request #39734 from garethgreenaway/39710_missing_schedule_add_parameter
  - 63eb610245 Per #39710, missing parameter in the schedule.add function
- **PR** #39729: (rallytime) [2016.11] Bump latest release version to 2016.11.3 @ *2017-02-28 18:08:25 UTC*

  - 7b4865c058 Merge pull request #39729 from rallytime/update-release-ver-2016.11
  - b5a7111ad9 [2016.11] Bump latest release version to 2016.11.3

25.2.17 Salt 2016.11.5 Release Notes

Version 2016.11.5 is a bugfix release for *2016.11.0*.

Statistics

- Total Merges: **82**
- Total Issue References: **23**
- Total PR References: **80**
- Contributors: **32** (BenoitKnecht, Ch3LL, DmitryKuzmenko, Enquier, SolarisYan, UtahDave, alexproca, benediktwerner, bobrik, brd, cachedout, clinta, corywright, cro, danlsgiga, drawsmcgraw, ezh, gtmanfred, isbm, jf, jleproust, lorengordon, nevins-b, oeuftete, peter-funktionIT, rallytime, rkgrunt, senthilkumar-e, sjorge, skizunov, terminalmage, twangboy)

Patched Packages

Due to the critical nature of issue issue #41230 we have decided to patch the 2016.11.5 packages with PR #41244. This issue affects all calls to a salt-minion if there is an ipv6 nameserver set on the minion's host. The patched packages on repo.saltstack.com will divert from the v2016.11.5 tag and pypi packages due to the patches applied to the packages.

Changelog for v2016.11.4..v2016.11.5

Generated at: 2018-05-27 20:12:47 UTC

- **PR** #41134: (twangboy) Fix *pkg.install* on Windows on 2016.11 @ *2017-05-09 15:10:19 UTC*
    - a10f0146a4 Merge pull request #41134 from twangboy/fix_get_msiexec
    - d808a60129 Remove redundant if statement
    - b4d6d5a927 Fix for version_num of None and Latest
    - 0f31822a83 Fix problem when use_msiexec is a bool

- **ISSUE** #41100: (frogunder) Exception occurred in runner jobs.list_jobs (refs: #41102)
- **PR** #41102: (gtmanfred) don't pass jid to list_jobs @ *2017-05-08 17:45:40 UTC*
  - 4ecab68bb9 Merge pull request #41102 from gtmanfred/2016.11
  - 83057d0f0f don't pass jid to list_jobs
  - 505cb45722 Merge branch `fix-file-blockreplace-diff-in-test-mode' of https://github.com/L4rS6/salt into L4rS6-fix-file-blockreplace-diff-in-test-mode
  - de9f66b448 show chanages in file.blockreplace function in testing mode. also used same programming style as in file.managed function: (ret['changes']['diff'] = ret['pchanges']['diff'])
- **PR** #41103: (lorengordon) Adds a get_route() function to win_network.py @ *2017-05-06 06:19:42 UTC*
  - 2af89beb53 Merge pull request #41103 from lorengordon/win.get_route
  - 93ce5644ea Adds test for win_network.get_route
  - b9cbbc0290 Adds a get_route() function to win_network.py
- **PR** #41098: (rallytime) Back-port #41088 to 2016.11 @ *2017-05-05 19:04:03 UTC*
  - **PR** #41088: (sjorge) Fix docs for zfs state module (refs: #41098)
  - 2f9b5a4074 Merge pull request #41098 from rallytime/bp-41088
  - dc6cd2ea45 Fix docs for zfs state module
- **PR** #41097: (rallytime) Back-port #41079 to 2016.11 @ *2017-05-05 19:03:43 UTC*
  - **PR** #41079: (brd) Remove an extra colon that is causing rendering issues (refs: #41097)
  - 2123001f32 Merge pull request #41097 from rallytime/bp-41079
  - 845b49c304 Remove and extra colon that is causing rendering issues
- **PR** #41093: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2017-05-05 17:22:09 UTC*
  - ff6fa2b120 Merge pull request #41093 from rallytime/merge-2016.11
  - a670eaa1db Merge branch `2016.3' into `2016.11'
  - 247400c44e Merge pull request #41083 from rallytime/git-state-fix
    - b85ee48ff4 Git state: head_ref should be head_rev in ``latest'' function
- **PR** #41084: (rallytime) Skip the test_salt_documentation_arguments_not_assumed test for Arch @ *2017-05-04 21:56:29 UTC*
  - **PR** #41074: (rallytime) Skip integration.shell.matcher.MatchTest.test_salt_documentation test for Arch (refs: #41084)
  - 4c2e636cd1 Merge pull request #41084 from rallytime/disable-matcher-test-arch
  - da811fe505 Skip the correct test for the matcher tests in Arch
  - b9d1ce9aed Revert ``Skip integration.shell.matcher.MatchTest.test_salt_documentation test for Arch''
- **PR** #41069: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2017-05-04 20:34:58 UTC*
  - 1179720327 Merge pull request #41069 from rallytime/merge-2016.11
  - 08c58919cb Merge branch `2016.3' into `2016.11'
    - 69418092bd Merge pull request #41070 from rallytime/lint-2016.3
      - 486e2ba62e Pylint: remove extra line in mac_system module

    - db70b2d42e Pylint: remove extra line in mac_system module
    - 855d157aa6 Merge branch `2016.3' into `2016.11'
        * 3101694d71 Merge pull request #41048 from willkil/mac_system_non_root
            · b65b82a750 mac_system: return False for non-root user

- **PR** #41074: (rallytime) Skip integration.shell.matcher.MatchTest.test_salt_documentation test for Arch (refs: #41084) @ *2017-05-04 19:26:16 UTC*
    - 9d638abc62 Merge pull request #41074 from rallytime/disable-matcher-test-arch
    - 9eb482d5c7 Skip integration.shell.matcher.MatchTest.test_salt_documentation test for Arch
- **PR** #41078: (Ch3LL) Add 2016.11.5 release notes and change log @ *2017-05-04 19:00:58 UTC*
    - 72c854d9ac Merge pull request #41078 from Ch3LL/add_2016.11.5_release
    - 96ed815687 Add 2016.11.5 release notes and change log
- **PR** #40879: (peter-funktionIT) Update win_pki.py @ *2017-05-04 16:12:00 UTC*
    - eac8401e90 Merge pull request #40879 from peter-funktionIT/2016.11
    - 80fa9e5b76 Update win_pki.py
    - a48b05f158 Update win_pki.py
    - 3a4e6d9d91 Update win_pki.py
- **ISSUE** #40928: (sokratisg) Orchestration runner, highstate and environment question (refs: #41036)
- **PR** #41036: (terminalmage) Do not force effective saltenv when running states via orchestration @ *2017-05-04 15:44:14 UTC*
    - 547a9738db Merge pull request #41036 from terminalmage/issue40928
    - 72ef34c420 Do not force effective saltenv when running states via orchestration
- **PR** #41039: (terminalmage) Look for currently-running python's pip first @ *2017-05-04 15:43:52 UTC*
    - 6e2458e171 Merge pull request #41039 from terminalmage/improve-pip-bin
    - effe8b9432 Look for currently-running python's pip first
- **PR** #41049: (Ch3LL) fix integration wheel test_gen test @ *2017-05-04 15:33:59 UTC*
    - ff39613a53 Merge pull request #41049 from Ch3LL/fix_wheel_test
    - ba223827b9 fix integration wheel test_gen test
- **PR** #41054: (terminalmage) Update package targets for Arch pkg tests @ *2017-05-04 14:59:42 UTC*
    - 4e4b3514b4 Merge pull request #41054 from terminalmage/salt-jenkins-315
    - ee493bae47 Update package targets for Arch pkg tests
- **PR** #41046: (twangboy) Fix pkg.remove @ *2017-05-04 14:58:57 UTC*
    - 62dff52820 Merge pull request #41046 from twangboy/fix_pkg_remove
    - 2af38e5564 Use target instead of version_num
- **PR** #41045: (terminalmage) Clarify gitfs docs @ *2017-05-03 22:24:55 UTC*
    - 2b47b7bec6 Merge pull request #41045 from terminalmage/clarify-gitfs-docs
    - c757eda331 Clarify gitfs docs
- **PR** #41032: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2017-05-03 19:31:58 UTC*

  - 819007cd00 Merge pull request #41032 from rallytime/merge-2016.11
  - d26fd0bbf4 Merge branch `2016.3' into `2016.11'
    * b00acb0034 Merge pull request #41011 from terminalmage/docker-refresh-credentials
      · b8d1dcc307 Use proposed docker-py reload_config() func
- **ISSUE** #35699: (jleproust) LVM state fails to add new device, volume group name is empty string (refs: #41007)
- **PR** #41007: (jleproust) Recognize LVM2 pv with empty vg as orphan @ *2017-05-03 18:24:51 UTC*
  - d7fbd38474 Merge pull request #41007 from jleproust/fix_lvm_empty_vg
  - 3b9a845145 Recognize LVM2 pv with empty vg as orphan
- **PR** #41029: (rallytime) Back-port #38565 to 2016.11 @ *2017-05-03 17:05:10 UTC*
  - **PR** #38565: (drawsmcgraw) Update management of ip addresses for salt cloud azurearm module (refs: #41029)
  - 4eab962e9e Merge pull request #41029 from rallytime/bp-38565
  - 2df93ae3ab Update management of ip addresses. - Assign static, private IP addresses. - Ability to not assign a public IP to a VM.
- **PR** #41012: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2017-05-02 22:06:40 UTC*
  - 97500f078d Merge pull request #41012 from rallytime/merge-2016.11
  - fc756c595c Merge branch `2016.3' into `2016.11'
  - 19894f68ca Merge pull request #40724 from cro/minion_key_revoke_cfg
    * cbc70195c0 Change message level when minion requests key revoke and feature is turned off.
    * 65ea8997b7 Add allow_minion_key_revoke config option
    * 8920495943 Add config option to prevent minions from revoking their own keys.
  - 129859f79b Merge pull request #40952 from terminalmage/fix-dockerng.login-docs
    * dfbbeb5946 Fix documentation for docker login function in pre-nitrogen release branches
- **PR** #40726: (benediktwerner) Fixed minion keys remaining pending after auto signing and fixed typo (Resubmitted to 2016.3) @ *2017-05-02 16:57:34 UTC*
  - e210eaead4 Merge pull request #40726 from benediktwerner/fix-minions-remain-pending-after-autosign-and-typo
  - 82c144e960 Fixed minion keys remaining pending after auto signing and fixed typo
- **PR** #40960: (danlsgiga) Fix consul module ``AttributeError: `dict' object has no attribute `json'" @ *2017-05-02 16:16:57 UTC*
  - 4f342e2fe5 Merge pull request #40960 from danlsgiga/2016.11
  - 6e4cc6db47 Fix consul module ``AttributeError: `dict' object has no attribute `json'"
- **PR** #40963: (twangboy) Fix fullname parameter for add function @ *2017-05-02 16:08:59 UTC*
  - c3b329b398 Merge pull request #40963 from twangboy/fix_win_useradd
  - 5371b6b85e Fix fullname parameter for add function
- **PR** #40995: (twangboy) Remove unused code fragments @ *2017-05-02 15:31:58 UTC*
  - d79c033239 Merge pull request #40995 from twangboy/remove_utils
  - 8c01aacd9b Remove unused code fragments

- **ISSUE** #40981: (ezh) docker-events engine is broken with modern docker (refs: #40982)
- **PR** #40991: (rallytime) Back-port #40982 to 2016.11 @ *2017-05-01 22:31:30 UTC*
  - **PR** #40982: (ezh) Fix docker_events field handling (refs: #40991)
  - c6162876d6 Merge pull request #40991 from rallytime/bp-40982
  - 8fcb7205db Fix docker_events field handling
- **ISSUE** #40965: (weirdbricks) salt-cloud sudo failing (refs: #40987)
- **PR** #40987: (gtmanfred) get sudo_password correctly @ *2017-05-01 19:39:55 UTC*
  - 3fb24929c6 Merge pull request #40987 from gtmanfred/2016.11
  - 2ed694cac6 get sudo_password correctly
- **ISSUE** #40988: (santzi) status.netdev tx_bytes is always zero (refs: #40992)
- **PR** #40992: (gtmanfred) fix bug in status.netdev @ *2017-05-01 19:38:35 UTC*
  - ecbac138d1 Merge pull request #40992 from gtmanfred/netdev
  - a9eed7f1c9 fix bug in status.netdev
- **ISSUE** #40976: (sjorge) smtp.send_msg state oddities (refs: #40993)
- **PR** #40993: (gtmanfred) smtp state can use profile or sender @ *2017-05-01 19:35:47 UTC*
  - d852320d34 Merge pull request #40993 from gtmanfred/smtp
  - 068ebfd9ec smtp state can use profile or sender
- **PR** #40958: (rallytime) Back-port #40939 to 2016.11 @ *2017-04-28 18:01:17 UTC*
  - **PR** #40939: (Ch3LL) Allow vmware to query deploy arg from opts (refs: #40958)
  - fc26fb8a05 Merge pull request #40958 from rallytime/bp-40939
  - 3e9394862f allow vmware to query deploy arg from opts
- **ISSUE** saltstack/salt#34640: (nevins-b) utils.shlex_split removing quotes which are required for augeas (refs: #`saltstack/salt#34643`_)
  - **PR** saltstack/salt#34643: (nevins-b) fix augeas module so shlex doesn't strip quotes (refs: #38115)
- **PR** #40957: (rallytime) Back-port #38115 to 2016.11 @ *2017-04-28 18:01:02 UTC*
  - **PR** #38115: (cro) Revert ``fix augeas module so shlex doesn't strip quotes'' (refs: #40957)
  - a586e12180 Merge pull request #40957 from rallytime/bp-38115
  - eb889173b0 Revert ``fix augeas module so shlex doesn't strip quotes''
- **ISSUE** #40635: (promorphus) Orchestrate + Batches returns false failed information (refs: #40905)
- **PR** #40905: (rkgrunt) Fixed issue with parsing of master minion returns when batching is en... @ *2017-04-28 17:52:32 UTC*
  - 00a15eba60 Merge pull request #40905 from rkgrunt/40635
  - 4f9c92a012 Fixed issue with parsing of master minion returns when batching is enabled.
- **PR** #40954: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2017-04-28 16:41:49 UTC*
  - bb50d4f646 Merge pull request #40954 from rallytime/merge-2016.11
  - 7f31e41aa6 Merge branch `2016.3' into `2016.11'
  - 55a399583e Merge pull request #40930 from rallytime/bp-40811

        * 3ccb553f9f get config_dir based off conf_file
    - 7bc01be859 Merge pull request #40927 from terminalmage/docs
        * 8c078f144c Add additional note about quoting within load_yaml
        * 123b5cdc11 Add documentation for PyYAML's loading of time expressions
    - 7eab9c6cf4 Merge pull request #40891 from terminalmage/pip-installed
        * 75e6bc0aa3 Fix two issues with pip.install
- **ISSUE** #39531: (ypid) Use yaml.safe_* instaed of yaml.load / yaml.dump / ... (refs: #40751)
- **PR** #40751: (rallytime) Use Salt's SaltYamlSafeLoader and SafeOrderedDumper classes for yaml.load/dump *@ 2017-04-28 12:56:06 UTC*
    - 909d519ddb Merge pull request #40751 from rallytime/fix-39531
    - 85dc4164f5 Don't change the salt.utils.jinja yaml Dumper class
    - 4fe6ac93c6 Add extra line for lint
    - 55cfa12975 Use salt.utils.yamldumper with SafeOderedDumper as the Dumper in yaml.dump
    - 62c4d37c2f Use salt.utils.yamlloader with SaltYamlSafeLoader as the Loader with yaml.load
- **ISSUE** #37307: (szjur) Minions run every job twice and open 2 connections to the same syndic - apparently after reconnection between masters (refs: #40861)
- **PR** #40861: (DmitryKuzmenko) Don't run status.master while minion is failing-over. *@ 2017-04-28 12:14:56 UTC*
    - 18fdd8cc34 Merge pull request #40861 from DSRCorporation/bugs/37307_minion_run_jobs_twice
    - f0d46d04af Don't run status.master while minion is failing-over.
- **PR** #40923: (terminalmage) aptpkg: fix temp pkg unhold when version is specified *@ 2017-04-28 11:59:54 UTC*
    - 62cb7b1ae6 Merge pull request #40923 from terminalmage/aptpkg-install-fix-unhold
    - 6dda4f2bc3 aptpkg: fix temp pkg unhold when version is specified
- **ISSUE** #40908: (nicksloan) If master_port is a string the minion cannot connect and prints an unhelpful error message (refs: #40933)
- **ISSUE** #39118: (bobrik) Minion ipv6 option is not documented (refs: #39289)
- **PR** #40933: (gtmanfred) allow master_port to be a string *@ 2017-04-28 11:54:58 UTC*
    - **PR** #39289: (bobrik) Autodetect IPv6 connectivity from minion to master (refs: #40933)
    - 9d92ba7878 Merge pull request #40933 from gtmanfred/2016.11
    - 194423c08e allow master_port to be a string
- **ISSUE** #40912: (razed11) IPV6 Warning when ipv6 set to False (refs: #40934)
- **PR** #40934: (gtmanfred) Only display IPvX warning if role is master *@ 2017-04-28 11:53:50 UTC*
    - d5e0b8b655 Merge pull request #40934 from gtmanfred/ipv6
    - 7855cd6ce6 Only display IPvX warning if role is master
- **ISSUE** #40881: (stamak) 2016.11 SoftLayer salt-cloud driver connects on private IP instead of public IP (refs: #40935)
- **PR** #40935: (gtmanfred) Attempt to connect to public ip address in softlayer *@ 2017-04-28 11:43:57 UTC*
    - 8fdfe4ece6 Merge pull request #40935 from gtmanfred/softlayer

  - d6eb11410f Attempt to connect to public ip address in softlayer

- **PR** #40936: (terminalmage) Add dockerng fixes to 2016.11.4 release notes @ *2017-04-27 19:54:16 UTC*
  - 7404309bec Merge pull request #40936 from terminalmage/release_notes
  - e494ae43e5 Add dockerng fixes to 2016.11.4 release notes
- **ISSUE** #33093: (gtmanfred) [salt-cloud][nova] race condition when assigning floating ips to cloud servers (refs: #37696)
- **PR** #40929: (rallytime) Back-port #37696 to 2016.11 @ *2017-04-27 17:43:26 UTC*
  - **PR** #37696: (SolarisYan) if vm state is not ACTIVE, it will fail (refs: #40929)
  - a622518ad2 Merge pull request #40929 from rallytime/bp-37696
  - 1a28722c5a Pylint fix
  - 8e0a9864c5 if vm state is not ACTIVE, associate floating ip to it will fail.So we should wait for state of vm is ACTIVE,then associate the assigned floating ip to it
- **PR** #40921: (corywright) Make salt.auth.rest heading consistent with all other salt.auth documentation @ *2017-04-27 17:36:47 UTC*
  - f88ce8e4de Merge pull request #40921 from corywright/consistent-salt-auth-headings
  - 2995a05c2b Make salt.auth.rest heading consistent with all other salt.auth documentation
- **ISSUE** #37824: (dxiri) SSLError Trying to use v3 API of Openstack Newton as provider. (refs: #40752)
- **PR** #40752: (Enquier) Add ability to specify a custom SSL certificate or disable SSL verification in KeystoneAuth v3 @ *2017-04-27 17:29:09 UTC*
  - 26be306b5c Merge pull request #40752 from Enquier/nova_ssl_2
  - 817f49296e fixing lint errors in keystone auth error
  - f683636c61 fix trailing whitespace
  - 4a70b8c0cc fixing minor error in security_groups security groups parser had incorrect split action which caused errors
  - c9d6f8e5ed adding note in documentation
  - c24dfe3fba adding support for cacert verification
  - bfaf5e322d Merge pull request #5 from saltstack/2016.11
- **ISSUE** #40845: (e-senthilkumar) /jobs call is broken in 2016.11.4 (refs: #40894)
- **PR** #40894: (senthilkumar-e) Fix for broken /jobs/<jid> in 2016.11.4 @ *2017-04-27 11:33:00 UTC*
  - 0f2ec1e1db Merge pull request #40894 from senthilkumar-e/broken_jobs_api_fix
  - 2f55b26e08 Fixing the pylint issue
  - fb607bab75 Fix for broken /jobs/<jid> in 2016.11.4
- **PR** #40876: (BenoitKnecht) states: sqlite3: fix table_present with multi-line schema @ *2017-04-26 15:21:19 UTC*
  - ea55c15367 Merge pull request #40876 from BenoitKnecht/fix-sqlite3-table-present-with-multiline-schema
  - 2ca627d02d states: sqlite3: fix table_present with multi-line schema
- **ISSUE** #40741: (clinta) Regression in 2016.11.3. File.managed downloads every time. (refs: #40742)

- **PR** #40742: (clinta) Fix #40741 @ *2017-04-25 22:52:06 UTC*
  - e09bafdceb Merge pull request #40742 from clinta/40741
  - 72bf5af9e6 Set sfn if cached_sum == source_sum
- **PR** #40859: (skizunov) Fix TCP Transport to work with Tornado 4.5 @ *2017-04-25 04:29:00 UTC*
  - 5249496f74 Merge pull request #40859 from skizunov/develop2
  - 958ecdace8 Fix TCP Transport to work with Tornado 4.5
- **PR** #40862: (gtmanfred) status should be an int @ *2017-04-24 23:11:31 UTC*
  - ca80f287af Merge pull request #40862 from gtmanfred/2016.11
  - 87ec1da771 status should be an int
- **PR** #40865: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2017-04-24 23:06:28 UTC*
  - c95341959d Merge pull request #40865 from rallytime/merge-2016.11
  - 53ad3159cc Merge branch `2016.3' into `2016.11'
  - 2a71dc3552 Merge pull request #40854 from Ch3LL/11.4_release_2016.3
    - 889540a313 [2016.3] Bump latest release version to 2016.11.4
  - b5f67f0750 Merge pull request #40822 from lordcirth/fix-rsync-changes
    - 1b304bb476 Extra space before inline comment
    - ea4592de91 rsync.py: Don't return changes when clean
- **PR** #40855: (Ch3LL) [2016.11] Bump latest release version to 2016.11.4 @ *2017-04-24 17:37:47 UTC*
  - 7861f12df8 Merge pull request #40855 from Ch3LL/11.4_release_2016.11
  - e7b604339d [2016.11] Bump latest release version to 2016.11.4
- **PR** #40817: (isbm) Some UT for cloud @ *2017-04-23 10:01:40 UTC*
  - 25b62aee47 Merge pull request #40817 from isbm/isbm-skip-false-values-from-preferred-ip-201611
  - 7c5714b90b Describe debug information
  - e0210ff8cb Reformat idents, fix typos
  - fb777e3f3e PEP8: fix unused variable
  - b2e85de85d Fix lint, typos and readability
  - 116c96a4b7 Fix UT parameter changes
  - 61558f08e7 Lintfix E0602
  - ed84420df0 Add unit test for node ip filtering
  - 82582cff77 Skip test, if libcloud is not around
  - f005d53c56 Fix name error exception
  - b668e60b4c Move out nested function for testing purposes
  - 5e574a24d9 Add unit test for nova connector
  - 181d0780d0 Lintfix
  - 8e9ce1a68d Move out nested function to be unit-testable
  - cd43805770 Add initial unit test for openstack cloud module

  - 177f31446d Add fake preferred IP function for testing
  - d1aeb13ac7 Move out openstack's nested function to be testable
- **PR** #40824: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2017-04-21 20:03:10 UTC*
  - 50ddf219a6 Merge pull request #40824 from rallytime/merge-2016.11
  - f31f9512b8 Merge branch `2016.3' into `2016.11'
    * 3b9ebeb98f Merge pull request #40754 from lordcirth/fix-uppercase-checksums
      · c80c792704 remove too many newlines for lint
      · a7d8f375e8 file.manage_file: uppercase checksums now work
- **PR** #40811: (UtahDave) get config_dir based off conf_file if __opts__['config_dir'] doesn't exist (refs: #40930) @ *2017-04-21 17:44:42 UTC*
  - d6e26d18cb Merge pull request #40811 from UtahDave/2016.11local
  - 9f6e2e9c92 get config_dir based off conf_file
- **PR** #40820: (gtmanfred) remove deprecated firstgen rackspace cloud driver @ *2017-04-21 17:42:19 UTC*
  - ddedf05b7d Merge pull request #40820 from gtmanfred/2016.11
  - b60a8d013a remove rackspace from index
  - 559aa1d8b6 remove deprecated firstgen rackspace cloud driver
- **PR** #40797: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2017-04-20 19:42:04 UTC*
  - 2ab42489df Merge pull request #40797 from rallytime/merge-2016.11
  - 22500a7261 Merge branch `2016.3' into `2016.11'
    * 623e2eb61f Merge pull request #40791 from a-powell/s3-util-get-memory-fix
      · 36f6521014 Merge remote-tracking branch `upstream/2016.3' into s3-util-get-memory-fix
      · 04637cd4eb Fixing objects being loaded into memory when performing a GET request with a local file specified.

  - f4f3ee69ba Merge pull request #40721 from gtmanfred/2016.3
    * 58b88859b3 unset the bitwise instead of toggle
- **ISSUE** #29602: (multani) cloud.action start raises ``got an unexpected keyword argument `kwargs'" (refs: #40735)
- **PR** #40735: (rallytime) Handle stacktraces in cloud.action function in module and runner @ *2017-04-18 20:05:06 UTC*
  - 3557b5140e Merge pull request #40735 from rallytime/handle-cloud-traces
  - 87154a95a4 Use *log.error* instead of *log.err*
  - b35bf919a3 Handle stacktraces in cloud.action function in module and runner
- **PR** #40745: (cro) Backport *Add support for specifying a datastore for new disks.* PR #36457 @ *2017-04-18 20:00:51 UTC*
  - **PR** #36457: (cro) Add support for specifying a datastore for new disks. (refs: #40745)
  - e700d8183b Merge pull request #40745 from cro/vmware_disk_datastore_bp
  - 1460f82ce4 Remove leftover conflict markers (oops! :-/)
  - b26be652dd Remove leftover conflict markers (oops! :-/)
  - 096f063464 Remove leftover conflict markers (oops! :-/)
  - d24078d1a0 Add docs for ``datastore'' param for disks
  - 500d6b281d Document validity of a datastore key inside a disk definition.
  - 7608b10225 Add support for specifying a datastore for new disks.
- **PR** #40740: (cro) Backport pr #39802 to add random_startup_delay @ *2017-04-18 19:47:55 UTC*
  - **PR** #39802: (cachedout) A random startup delay option for minions (refs: #40740)
  - 78dbab01dc Merge pull request #40740 from cro/minion_delay_start
  - 2ab95b7dd5 Set minion test to use default opts
  - 785e6060a9 Add requested docs
  - 8ab321f934 A random startup delay option for minions
- **PR** #40728: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2017-04-17 21:13:15 UTC*
  - a48ecc4a5c Merge pull request #40728 from rallytime/merge-2016.11
  - 0a5e05a6e5 Merge branch `2016.3' into `2016.11'

    - bf8bb0fde6 Merge pull request #40719 from rallytime/bp-40714
        * d6c436246b Make salt.modules.pw_user.get_loginclass return string rather than dict
    - 4145d33e46 Merge pull request #40718 from terminalmage/fix-docstring
    - 14e8b85da5 Fix copypasta in the pw_user docstring
- **ISSUE** #36967: (gmykhailiuta) S3fs objects list gets truncated (refs: #40707)
- **PR** #40707: (gtmanfred) Use markers when s3 bucket list is truncated @ *2017-04-17 16:45:21 UTC*
    - c5cbfc2e63 Merge pull request #40707 from gtmanfred/2016.11
    - 1932f7265d Use markers when s3 bucket list is truncated

25.2.18 Salt 2016.11.6 Release Notes

Version 2016.11.6 is a bugfix release for *2016.11.0*.

Changelog for v2016.11.5..v2016.11.6

Generated at: 2018-05-27 20:18:17 UTC

- **PR** #41861: (twangboy) Fix problems with get_rule and delete_rule @ *2017-06-20 20:37:23 UTC*
    - afc61ffe63 Merge pull request #41861 from twangboy/fix_win_firewall
    - 78892074f5 Fix problems with get_rule and delete_rule
- **ISSUE** #41778: (frogunder) 2016.11.6 - TCP Transport gives Exception (refs: #41787)
- **PR** #41787: (skizunov) Fix #41778 @ *2017-06-20 20:11:23 UTC*
    - **PR** #41436: (skizunov) TCP transport: Fix occasional errors when using salt command (refs: #41787)
    - 938d4fddf1 Merge pull request #41787 from skizunov/develop3
    - 2ffd20cede Fix #41778
- **PR** #41812: (skizunov) TCP: Fix salt-master in bad state if remote side closed connection @ *2017-06-20 19:46:53 UTC*
    - 03b6ae5ea8 Merge pull request #41812 from skizunov/develop4
    - 736420eb83 TCP: Fix salt-master in bad state if remote side closed connection
- **PR** #41857: (dmurphy18) Modified support for deprecated netstat being removed by utilizing ss @ *2017-06-20 18:46:27 UTC*

  - cf2252bcea Merge pull request #41857 from dmurphy18/netstat_fix
  - 017fbdbc53 Modified support for deprecated netstat being removed by utilizing ss
- **ISSUE** #40878: (joewreschnig) SSH modules spam warning about MD5 fingerprints when there aren't any (refs: #41837)
- **ISSUE** #40005: (vutny) *ssh_known_hosts.present* does not support SHA256 key fingerprints (refs: #40543)
- **PR** #41837: (rallytime) Add fingerpint_hash_type option to ssh_auth state and related functions @ *2017-06-20 18:14:53 UTC*
  - **PR** #40543: (rallytime) Add the ``fingerprint_hash_type'' option to ssh state and module (refs: #41837)
  - 12ec5f9f23 Merge pull request #41837 from rallytime/fix-40878
  - 48ff5d2a62 Add fingerpint_hash_type option to ssh_auth state and related functions
- **PR** #41839: (cro) Extend proxy to jinja @ *2017-06-19 23:03:00 UTC*
  - e7fc30f482 Merge pull request #41839 from cro/extend_proxy_to_jinja
  - 172d3520ea Merge branch `extend_proxy_to_jinja' of github.com:cro/salt into extend_proxy_to_jinja
    * 2e4a0633da Extend __proxy__ to jinja as *proxy* (like __salt__->salt)
  - 2ffad2af35 Extend __proxy__ to jinja as *proxy* (like __salt__->salt)
- **ISSUE** #41733: (sumeetisp) Salt Rest Api call (refs: #41786)
- **ISSUE** #40845: (e-senthilkumar) /jobs call is broken in 2016.11.4 (refs: #41786)
- **ISSUE** #38962: (gstachowiak) Broken /jobs in salt-api in salt 2016.11.1 (Carbon) (refs: #39472)
- **PR** #41786: (whiteinge) Runner arg parsing regressions @ *2017-06-19 23:00:07 UTC*
  - **PR** #39472: (whiteinge) Update _reformat_low to not run kwarg dicts through parse_input (refs: #41786)
  - 58387b127a Merge pull request #41786 from whiteinge/runner-arg-parsing-regressions
  - bf15c0bb5f Restore sending __current_eauth_* through to the function
  - 6be975da2c Fix regressions from not calling load_args_and_kwargs
  - 9d1cc1a176 Add test to check that runners ignore invalid kwargs
- **PR** #41776: (gtmanfred) npm 5.0.0 added a second line after fsevents @ *2017-06-19 16:53:43 UTC*
  - be0e9abedb Merge pull request #41776 from gtmanfred/2016.11
  - 733a2279ca npm 5.0.0 added a second line after fsevents
- **ISSUE** #32400: (rallytime) Document Default Config Values (refs: #41783)
- **PR** #41783: (rallytime) Add a bunch of config options to the various master/minion files that are missing @ *2017-06-19 16:42:54 UTC*
  - d94d4e4d19 Merge pull request #41783 from rallytime/config-doc-updates
  - c828ad803a Add a bunch of config options to the various master/minion files that are missing
- **PR** #41816: (twangboy) Upgrade psutil to version 5.2.2 @ *2017-06-17 01:51:29 UTC*
  - 2c681887d3 Merge pull request #41816 from twangboy/update_psutil_req
  - 8b4e3ad77d Upgrade psutil to version 5.2.2
- **ISSUE** #41785: (UtahDave) Using master tops without a top.sls file causes extra errors in minion log (refs: #41803)

- **PR** #41803: (terminalmage) Don't log an error when no top.sls is found @ *2017-06-16 22:49:08 UTC*
  - 3e5fe7ca4b Merge pull request #41803 from terminalmage/issue41785
  - f9f4d49f05 Don't log an error when no top.sls is found
- **PR** #41801: (terminalmage) Don't take hostname from name param when creating docker container (2016.11 branch) @ *2017-06-16 17:02:02 UTC*
  - d12bc4ee68 Merge pull request #41801 from terminalmage/issue41781-2016.11
  - 8236d3e1c3 Don't take hostname from name param when creating docker container (2016.11 branch)
- **PR** #41768: (rallytime) Manually back-port the changes in PR #41615 @ *2017-06-15 20:41:45 UTC*
  - **PR** #41615: (Ch3LL) Fix get_hwclock_aix test on MacOSX (refs: #41768)
  - 87e2e72d94 Merge pull request #41768 from rallytime/bp-41615
  - b6cc0b6bf0 Manually backport the changes in PR #41615
- **PR** #41740: (terminalmage) Fix spurious error when glob/regex used in publisher_acl @ *2017-06-15 15:14:56 UTC*
  - 36cb223ab2 Merge pull request #41740 from terminalmage/zd1532
  - e5f3d08751 Fix spurious error when glob/regex used in publisher_acl
- **PR** #41749: (terminalmage) Fix bug in pkg_resource.parse_targets when version passed @ *2017-06-15 15:05:52 UTC*
  - 126a36747b Merge pull request #41749 from terminalmage/parse_targets
  - 698806fb09 No need to manually create pkg_params dict when name and version passed
  - 7484bcc6c6 parse_targets: include version in packed return data
- **PR** #41753: (rallytime) Back-port #41449 to 2016.11 @ *2017-06-14 22:16:10 UTC*
  - **PR** #41449: (sebw) Fix state ``svn.latest'' diff output in test mode (refs: #41753)
  - 2c24012ded Merge pull request #41753 from rallytime/bp-41449
  - fae41c2875 Adjusting SVN unit test
  - eac6b151eb Improved SVN output in test mode
- **PR** #41750: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2017-06-14 22:15:41 UTC*
  - e685858269 Merge pull request #41750 from rallytime/merge-2016.11
  - 89834e49c2 Merge branch `2016.3' into `2016.11'
    - c5a79a1ea6 Merge pull request #41695 from xiaoanyunfei/fixRecursion
      - c54fde69a0 fix spell error
      - bc855b4711 fix swallow exception
      - c0b1f57fc0 add exception
      - aacf9f0a44 fix maximum recursion depth exceeded
    - 4b43ba3366 Merge pull request #41585 from cro/sign_minion_messages
      - 628f709c3c Correct test--caching requires files on disk but the test just supplies what would have been read from disk.
      - 687872a488 Lint

        - dadf4b851c Add documentation to the example master and minion configuration files. Move minion event signing to a saner place. Enable dropping messages when signature does not verify or when minion is not adding the signature to its payloads.
        - e44673cdae Add caching of key.
        - c3917d1e91 Fat finger fix.
        - 3b9326fda7 Sign_minion_messages support

- **PR** #41756: (Ch3LL) Add Change Log to 2016.11.6 Release Notes @ *2017-06-14 20:57:08 UTC*
  - 36cc8f1e35 Merge pull request #41756 from Ch3LL/2016.11.6_release
  - fa368f21ac Add Change Log to 2016.11.6 Release Notes
- **ISSUE** #40155: (grichmond-salt) State module boto_vpc not working with boto 2 (refs: #41692)
- **PR** #41692: (rallytime) Add boto and boto3 version dependencies to boto_vpc state docs @ *2017-06-14 19:05:07 UTC*
  - edcafc6a26 Merge pull request #41692 from rallytime/fix-40155
  - 539c1b0692 Add boto and boto3 version dependencies to boto_vpc state docs
- **ISSUE** #39918: (kivoli) Enabling list merging leads to multiplying of unique list items (refs: #40902)
- **PR** #40902: (lorengordon) Removes duplicates when merging pillar lists and adds pillar.get override for pillar_merge_lists @ *2017-06-14 18:39:09 UTC*
  - bdaeb55a77 Merge pull request #40902 from lorengordon/pillar-get-merge-lists
  - 6e35673fe3 Preserves order when removing duplicates
  - 18eda7084c Updates list merge tests to check for sorted, unique lists
  - 74bf91f99e Sorts the list when removing duplicates
  - 26a4b1b17f Adds pillar.get param to control list merge/overwrite behavior
  - ed04bae94c Removes duplicate values when merging lists
- **ISSUE** #32743: (tonybaloney) Issue with salt-cloud on OpenSUSE (refs: #41723)
- **PR** #41723: (rallytime) Support apache-libcloud work-around for issue #32743 for versions older than 2.0.0 @ *2017-06-14 17:13:38 UTC*
  - **PR** #40837: (tonybaloney) Upgrade apache-libcloud package dependency for 2.0 (refs: #41723)
  - 203ec6730f Merge pull request #41723 from rallytime/libcloud-support
  - 1e9a06000b Bump version check down to 1.4.0 and use distutils.version lib
  - a30f654b04 Support apache-libcloud work-around for issue #32743 for versions older than 2.0.0
- **ISSUE** #41654: (Enquier) Nova Cloud module doesn't work for python-novaclient 8.0.0+ (refs: #41655)
- **PR** #41655: (Enquier) Allow Nova cloud module to set a specific floating ip address @ *2017-06-14 16:44:05 UTC*
  - 62dbf5083c Merge pull request #41655 from Enquier/nova-cloud-set_ip_address
  - 293bc64158 Removed empty debug log
  - 3d9871fe11 Cleaning up, removing debugging tests
  - c78e5feea9 Fixing error message
  - 404dffb6b8 Debugging variable format
  - 6fa3b976a5 removing string call

  - 005995e1b0 modifying variable calls
  - 9e5e7a38ec Testing variable changes
  - 05e240f37f Debugging Format of floating_ip variable
  - 366aca00a8 Adding Max version check for Nova since Cloud no longer operates at higher versions
  - 6f66c9d10c Fixing response of floating_ip_show to align with other floating ip's. Spelling fix
  - 58459adbe8 Adding ability to set a Floating IP by a specific IP address
- **PR** #41731: (terminalmage) Clarify that archive_format is required pre-2016.11.0 @ *2017-06-14 15:05:21 UTC*
  - 82eab84883 Merge pull request #41731 from terminalmage/docs
  - d3f4ea1a84 Clarify that archive_format is required pre-2016.11.0
- **PR** #41663: (skizunov) Don't invoke lspci if enable_lspci is False @ *2017-06-13 21:19:42 UTC*
  - b6d27beac2 Merge pull request #41663 from skizunov/develop3
  - 154d6ce59e Don't invoke lspci if enable_lspci is False
- **ISSUE** #40446: (sumeetisp) [Documentation] include list of kwargs for ec2.create_volume in cloud driver (refs: #41693)
- **PR** #41693: (rallytime) Document available kwargs for ec2.create_volume function @ *2017-06-13 19:51:10 UTC*
  - 46b8d5dc4b Merge pull request #41693 from rallytime/fix-40446
  - 569eb2bf7e Document available kwargs for ec2.create_volume function
- **ISSUE** #41691: (jdonofrio728) Can't pass integers as cmd.run environment variables (refs: #41696)
- **PR** #41696: (terminalmage) Handle a few edge/corner cases with non-string input to cmd.run @ *2017-06-13 18:48:56 UTC*
  - aab55d304a Merge pull request #41696 from terminalmage/issue41691
  - 0623e40d33 Apparently some funcs are passing tuples to cmd.run_*
  - cdbfb94cfe Handle a few edge/corner cases with non-string input to cmd.run
- **PR** #41697: (terminalmage) Resubmit #41545 against 2016.11 branch @ *2017-06-13 16:10:37 UTC*
  - **PR** #41545: (kiorky) Make print_cli resilient on slow systems (refs: #41697)
  - 97897d7a7a Merge pull request #41697 from terminalmage/pr-41545
  - faaacf88bf Use error name instead of error number
  - 7eacda5cbf Make print_cli resilient on slow systems
- **ISSUE** #40605: (sumeetisp) Salt-run manage.bootstrap (refs: #41711)
- **PR** #41711: (rallytime) Update deprecated version info in manage.bootstrap func for root_user @ *2017-06-13 16:04:32 UTC*
  - 09260d7c08 Merge pull request #41711 from rallytime/fix-40605
  - 903c2ffca5 Update deprecated version info in manage.bootstrap fucn for root_user
- **ISSUE** #39668: (mirceaulinic) Master scheduled job not recorded on the event bus (refs: #41658)
- **PR** #41658: (garethgreenaway) Fixes to the salt scheduler @ *2017-06-13 16:00:57 UTC*
  - d563b3e345 Merge pull request #41658 from garethgreenaway/39668_schedule_runners_fire_events
  - d688a1cd88 Enable jobs scheduled on the master to fire their return data to the event bus

- **PR** #41706: (twangboy) Add missing batch files @ *2017-06-13 15:32:53 UTC*
  - 3c3b9343b7 Merge pull request #41706 from twangboy/batch_files
  - 0d4be0220b Add batch files for master
- **PR** #41710: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2017-06-13 15:11:38 UTC*
  - 1afc4adc5a Merge pull request #41710 from rallytime/merge-2016.11
  - 5150916556 Merge branch `2016.3' into `2016.11'
  - 5058b0de1f Merge pull request #41707 from terminalmage/master-tops-docs
    - 6ec9dfb7f3 Update version in master-tops docs
  - 1c1964d807 Merge pull request #41689 from yannj-fr/fix-41688
    - a47eddccd2 Fix #41688 : fix mkfs command linux-swap support
- **PR** #41702: (gtmanfred) npm 5 and greater requires --force for cache clean @ *2017-06-12 23:21:56 UTC*
  - 5d763b9b7f Merge pull request #41702 from gtmanfred/2016.11
  - 8bd19fcc17 fix version number
  - 0fa380f75c npm 5 and greater requires --force for cache clean
- **ISSUE** #41668: (yannj-fr) Parted modules mkfs command does not work with NTFS (refs: #41670)
- **PR** #41704: (rallytime) Back-port #41670 to 2016.11 @ *2017-06-12 23:20:31 UTC*
  - **PR** #41670: (yannj-fr) fixes #41668 ntfs case problem in parted module (refs: #41704)
  - f6519e7f80 Merge pull request #41704 from rallytime/bp-41670
  - 8afc8792d1 fixes #41668 ntfs case problem in parted module
- **ISSUE** #39939: (martinschipper) Relative symlinks are changed with file.recurse 2016.11.3 (refs: #41700)
- **PR** #41700: (terminalmage) roots: return actual link destination when listing symlinks @ *2017-06-12 22:07:03 UTC*
  - 0b89377dce Merge pull request #41700 from terminalmage/issue39939
  - bdbb265a0b roots: return actual link destination when listing symlinks
- **PR** #41699: (rallytime) Remove note about version incompatibility with salt-cloud @ *2017-06-12 19:44:28 UTC*
  - 7cf47f9651 Merge pull request #41699 from rallytime/troubleshooting-doc-update
  - c91ca5f809 Remove note about version incompatibility with salt-cloud
- **ISSUE** #40410: (DarrenDai) Targeting Minions by IP Range via restful API doesn't work (refs: #41694)
- **PR** #41694: (rallytime) Add ipcidr options to ``Allowed Values'' list in LocalClient expr_form docs @ *2017-06-12 19:06:16 UTC*
  - d68a6316b8 Merge pull request #41694 from rallytime/fix-40410
  - 6de9da1d5d Add ipcidr options to ``Allowed Values'' list in LocalClient expr_form docs
- **ISSUE** #41365: (lubyou) file.managed chokes on windows paths when source_hash is set to the URI of a file that contains source hash strings (refs: #41659)
- **PR** #41659: (lubyou) Use re.escape to escape paths before handing them to re.match @ *2017-06-12 18:10:53 UTC*
  - 80d4a3ab98 Merge pull request #41659 from lubyou/41365-fix-file-managed

  - d49a1579b0 Use re.escape to escape paths, before handing them to re.match
  - ac240facca use correct variable
  - c777eba2c1 Use re.escape to escape paths, before handing them to re.match
- **PR** #41661: (whiteinge) Add note about avoiding the *-i* flag for the /keys endpoint @ *2017-06-09 15:03:40 UTC*
  - 564d5fd9d3 Merge pull request #41661 from whiteinge/rest_cherrypy-keys-headers
  - a66ffc9d3e Add note about avoiding the *-i* flag for the /keys endpoint
- **ISSUE** #41651: (Sakorah) pkg.installed fails when unholding and test=true (refs: #41660)
- **PR** #41660: (garethgreenaway) Fix to modules/aptpkg.py for unheld @ *2017-06-09 14:53:23 UTC*
  - 38424f3e3e Merge pull request #41660 from garethgreenaway/41651_fixing_aptpkg_held_unheld_with_test
  - 30da2370a4 Fix when test=True and packages were being set to unheld.
- **PR** #41656: (rallytime) Back-port #41575 to 2016.11 @ *2017-06-08 22:43:23 UTC*
  - **PR** #41575: (dschaller) Fix 41562 (refs: #41656)
  - a308b960d8 Merge pull request #41656 from rallytime/bp-41575
  - 4374e6b034 Replace ``tbd'' with release version information
  - 81413896d1 Lint: Add index numbers to format {} calls
  - 384570384e only list top level npm modules during {un)install
- **PR** #41456: (bdrung) Fix pkgrepo.managed always return changes for test=true @ *2017-06-08 18:21:05 UTC*
  - e6d37b5f3e Merge pull request #41456 from bdrung/fix-pkgrepo.managed-changes-check
  - d3ce7bf05f Fix pkgrepo.managed always return changes for test=true
  - 1592687294 Document aptpkg architectures parameter
- **ISSUE** #41478: (jf) security / information leak with consul pillar when subsitution values are not present (refs: #41530)
- **PR** #41530: (gtmanfred) Set default for consul_pillar to None @ *2017-06-08 18:13:15 UTC*
  - 721e5b6cb9 Merge pull request #41530 from gtmanfred/2016.11
  - 2a4633ce16 Set default for consul_pillar to None
- **ISSUE** #41629: (lubyou) salt.states.cmd.script: Parameter ``args'' is overwritten if ``name/id'' contains spaces (refs: #41638)
- **PR** #41638: (gtmanfred) don't overwrite args if they are passed to the script @ *2017-06-08 17:48:48 UTC*
  - 8926d1c731 Merge pull request #41638 from gtmanfred/cmdscript
  - 6c7d68b97d don't overwrite args if they are passed to the script
- **PR** #41639: (dmurphy18) Update notrim check, netstat takes minutes if large number connections @ *2017-06-07 23:03:24 UTC*
  - ecb09b8694 Merge pull request #41639 from dmurphy18/minion_netstat_check
  - 7ab3319090 Update notrim check, netstat takes minutes if large number connections - 260K
- **ISSUE** #38894: (amendlik) salt.runner and salt.wheel ignore test=True (refs: #41309, #41611)
- **PR** #41611: (garethgreenaway) Additional fixes to states/saltmod.py @ *2017-06-07 22:58:24 UTC*
  - 2913a33b27 Merge pull request #41611 from garethgreenaway/41309_right_return_res

  - fda41ede76 Updating result values to be None for test cases.
  - 003f2d9323 Following the documentation, when passed the test=True argument the runner and wheel functions should return a result value of False.
- **ISSUE** #41626: (ruiaylin) When onlyif and bg are used together the (refs: #41637)
- **PR** #41637: (gtmanfred) never run bg for onlyif or unless cmd states @ *2017-06-07 17:37:47 UTC*
  - 334a5fc2a0 Merge pull request #41637 from gtmanfred/cmd
  - 40fb6c6249 never run bg for onlyif or unless cmd states
- **PR** #41255: (lordcirth) linux_syctl.default_config(): only return path, don't create it @ *2017-06-07 14:13:07 UTC*
  - 34dd9ea862 Merge pull request #41255 from lordcirth/fix-sysctl-test-11
  - 0089be4440 linux_sysctl: use dirname() as suggested
  - 262d95e41d linux_syctl.default_config(): only return path, don't create it
  - 277232b3ac linux_sysctl.persist(): create config dir if needed
- **ISSUE** #35481: (giany) global_identifier does not work when using Softlayer driver (refs: #41551)
- **PR** #41616: (rallytime) Back-port #41551 to 2016.11 @ *2017-06-06 22:44:09 UTC*
  - **PR** #41551: (darenjacobs) Update __init__.py (refs: #41616)
  - 4cf577771b Merge pull request #41616 from rallytime/bp-41551
  - 53bca96328 Update __init__.py
- **PR** #41552: (Enquier) Adding logic so that update_floatingip can dissassociate floatingip's @ *2017-06-06 18:25:56 UTC*
  - 846ca54688 Merge pull request #41552 from Enquier/neutron-floatingip-remove
  - aeed51c1e3 Adding port=None default and documentation
  - fcce05e1e4 Adding logic so that update_floatingip can dissassociate floatingip's Previously update_floatingip would cause an error if port is set to None.
- **PR** #41569: (gtmanfred) Check all entries in result @ *2017-06-06 18:18:17 UTC*
  - b720ecb732 Merge pull request #41569 from gtmanfred/fix_test_result_check
  - 19ea5481b6 remove test that never passed
  - e2a4d5e1e2 Check all entries in result
- **ISSUE** #41540: (UtahDave) archive.extracted fails on second run (refs: #41599)
- **PR** #41599: (garethgreenaway) Fixes to modules/archive.py @ *2017-06-06 18:02:14 UTC*
  - d9546c6283 Merge pull request #41599 from garethgreenaway/41540_fixes_to_archive_module
  - 66a136e6d8 Fixing issues raised in #41540 when a zip file is created on a Windows system. The issue has two parts, first directories that end up in the archive end up in the results of aarchive.list twice as they show up as both files and directories because of the logic to handle the fact that Windows doesn't mark them as directories. This issue shows up when an extraction is run a second time since the module verified the file types and the subdirectory is not a file. The second issue is related to permissions, if Salt is told to extract permissions (which is the default) then the directory and files end up being unreadable since the permissions are not available. This change sets the permissions to what the default umask for the user running Salt is.
- **ISSUE** #40950: (idokaplan) Import certificate (refs: #41453, #41383)

- **PR** #41453: (peter-funktionIT) Update win_pki.py @ *2017-06-06 17:15:55 UTC*
  - **PR** #41383: (peter-funktionIT) Update win_pki.py (refs: #41453)
  - 10ac80ee96 Merge pull request #41453 from peter-funktionIT/fix_win_pki_state_import_cert
  - d146fd029c Update win_pki.py
  - ef8e3ef569 Update win_pki.py
- **PR** #41557: (dmurphy18) Add symbolic link for salt-proxy service similar to other serivce files @ *2017-06-06 17:13:52 UTC*
  - 3335fcbc7d Merge pull request #41557 from dmurphy18/fix-proxy-service
  - ffe492d6a9 Add symbolic link salt-proxy service similar to other service files
- **PR** #41597: (rallytime) Back-port #41533 to 2016.11 @ *2017-06-06 15:15:09 UTC*
  - **PR** #41533: (svinota) unit tests: add pyroute2 interface dict test (refs: #41597)
  - 65ed230f45 Merge pull request #41597 from rallytime/bp-41533
  - 535b8e8d8e Update new pyroute2 unit test to conform with 2016.11 branch standards
  - 5c86dee73c unit tests: test_pyroute2 -- add skipIf
  - 026b39493f unit tests: add encoding clause into test_pyroute2
  - 9ab203d54b unit tests: fix absolute imports in test_pyroute2
  - 1f507cfa7a unit tests: add pyroute2 interface dict test
- **PR** #41596: (rallytime) Back-port #41487 to 2016.11 @ *2017-06-06 02:44:17 UTC*
  - **PR** #41487: (svinota) clean up *change* attribute from interface dict (refs: #41596)
  - bf8aed153d Merge pull request #41596 from rallytime/bp-41487
  - 7b497d9ec6 clean up *change* attribute from interface dict
- **ISSUE** #41435: (seanjnkns) 2016.11: Keystone.endpoint_present overwrites all interfaces (refs: #41509)
- **PR** #41509: (seanjnkns) Add keystone V3 API support for keystone.endpoint_present|absent @ *2017-06-03 03:01:05 UTC*
  - cc6c98a8d8 Merge pull request #41509 from seanjnkns/fix-keystone-v3-endpoint_present
  - 095e5949a3 Fix unit tests for PR #41509
  - eb7ef3c856 Add keystone V3 API support for keystone.endpoint_present|get, endpoint_absent|delete.
- **ISSUE** #38061: (Ch3LL) x509.crl_managed ValueError when digest is not specified in the module (refs: #41539)
- **PR** #41539: (gtmanfred) allow digest to be empty in create_crl @ *2017-06-02 17:00:04 UTC*
  - 0a08649637 Merge pull request #41539 from gtmanfred/x509
  - 0989be8919 allow digest to be empty in create_crl
- **ISSUE** #41154: (mephi42) archive.extracted outputs password embedded in archive URL (refs: #41561)
- **PR** #41561: (terminalmage) Redact HTTP basic authentication in archive.extracted @ *2017-06-02 15:33:14 UTC*
  - 3ae8336895 Merge pull request #41561 from terminalmage/issue41154
  - cbf8acbafc Redact HTTP basic authentication in archive.extracted
- **PR** #41436: (skizunov) TCP transport: Fix occasional errors when using salt command (refs: #41787) @ *2017-06-01 16:37:43 UTC*

  - 39840bfe4e Merge pull request #41436 from skizunov/develop2
  - 07d5862773 unit.transport.tcp_test: Clean up channel after use
  - 4b6aec7154 Preserve original IO Loop on cleanup
  - 892c6d4d24 TCP transport: Fix occasional errors when using salt command
- **ISSUE** #41335: (syphernl) [2016.11.5] ssh_auth.present: IndexError: list index out of range (refs: #41337)
- **PR** #41337: (Foxlik) Fix #41335 - list index out of range on empty line in authorized_keys @ *2017-05-31 19:59:17 UTC*
  - 06ed4f077b Merge pull request #41337 from Foxlik/2016.11
  - 916fecb64f modify ssh_test.py, to check empty lines and comments in authorized_keys #41335
  - 011d6d65e7 Fix #41335 - list index out of range on empty line in authorized_keys
- **PR** #41512: (twangboy) Use psutil where possible in win_status.py @ *2017-05-31 19:56:00 UTC*
  - 1ace72d871 Merge pull request #41512 from twangboy/fix_win_status
  - 582d09b484 Get psutil import
  - fd88bb277f Remove unused imports (lint)
  - 41a39dff00 Use psutil where possible
- **PR** #41490: (t0fik) Backport of SELinux module installation and removal @ *2017-05-31 19:38:00 UTC*
  - 683cc5f414 Merge pull request #41490 from jdsieci/2016.11_selinux
  - e2fbada1c1 Backport of SELinux module installation and removal
- **PR** #41522: (jettero) Sadly, you can't have `.'s and `$'s in dict keys in a mongodb doc. @ *2017-05-31 15:55:24 UTC*
  - 2e7e84b8f2 Merge pull request #41522 from jettero/mongodb-keys-are-stupid
  - 12648f5439 dang, thought I already got that. Apparently only got the bottom one. This should do it.
  - 7c4a763518 ugh, forgot about this lint too. This one looks especially terrible.
  - c973988d8d forgot about the linter pass ... fixed
  - da0d9e4045 Sadly, you can't have `.'s and `$'s in dict keys in a mongodb doc.
- **ISSUE** #41504: (mtkennerly) Can't set REG_DWORD registry value larger than 0x7FFFFFFF (refs: #41506)
- **PR** #41506: (gtmanfred) check for integer types @ *2017-05-31 00:48:21 UTC*
  - 30ad4fd9a0 Merge pull request #41506 from gtmanfred/2016.11
  - 5fe2e9bbf5 check for integer types
- **PR** #41469: (Ch3LL) Fix keep_jobs keyerror in redis returner @ *2017-05-30 18:37:42 UTC*
  - 06ef17dec3 Merge pull request #41469 from Ch3LL/fix_redis_error
  - 8ee1251a3a Fix keep_jobs keyerror in redis returner
- **PR** #41473: (twangboy) Fix win_firewall execution and state modules @ *2017-05-30 18:35:24 UTC*
  - 7a09b2b678 Merge pull request #41473 from twangboy/fix_win_firewall
  - e503b455c3 Fix lint error
  - d3f0f8bcd2 Fix win_firewall execution and state modules
- **PR** #41499: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2017-05-30 18:06:03 UTC*

  - f635cb11c4 Merge pull request #41499 from rallytime/merge-2016.11
  - 20d893d397 Merge branch `2016.3' into `2016.11'
  - 964b1ee027 Merge pull request #41439 from terminalmage/salt-cp-base64
    * ebf6cc78c7 base64 encode binary data sent using salt-cp
- **PR** #41464: (rallytime) Back-port #39850 to 2016.11 @ *2017-05-26 21:22:44 UTC*
  - **PR** #39850: (epcim) Fix endpoint handling per region (refs: #41464)
  - 83f1e48241 Merge pull request #41464 from rallytime/bp-39850
  - 9b84b751b2 Pylint fixes
  - 6db8915021 Endpoint handling per region, fixes #35874 - extend tests for multiple regions - region arg by default set to None - print verbose changes to be exec.
- **PR** #41443: (UtahDave) use proper arg number @ *2017-05-26 20:36:37 UTC*
  - 960c5767fa Merge pull request #41443 from UtahDave/fix_args_masterpy
  - dfbdc275ca use proper arg number

  - 4d9bd06176 Update win_pki.py

- **PR** #41113: (cro) Rescue proxy_auto_tests PR from git rebase hell @ *2017-05-22 17:05:07 UTC*
  - **PR** #39575: (cro) WIP: Proxy auto test, feedback appreciated (refs: #41113)
  - 1ba95684a9 Merge pull request #41113 from cro/proxy_auto_test2
  - 19db038b99 Fix test--use proxy_config instead of minion_config
  - 7749ceadb6 Change default proxy minion opts so only the proxy-specific ones are listed, and the rest are taken from DEFAULT_MINION_OPTS.
  - 106394c80c Lint.
  - 3be90cc9f4 Rescue proxy_auto_tests PR from git rebase hell
- **PR** #41360: (cro) Sysrc on FreeBSD, YAML overeager to coerce to bool and int @ *2017-05-22 15:54:31 UTC*
  - 375892d910 Merge pull request #41360 from cro/sysrc_fix
  - 6db31ce52a Fix problem with sysrc on FreeBSD, YAML overeager to coerce to bool and int.
- **ISSUE** #41190: (jheidbrink) Cannot extract tar.xz archive when it exceeds size of /tmp (refs: #41372)
- **PR** #41372: (terminalmage) Don't use intermediate file when listing contents of tar.xz file @ *2017-05-22 15:36:45 UTC*
  - 01b71c75c1 Merge pull request #41372 from terminalmage/issue41190
  - 1f08936d9c Remove unused import
  - 68cb897520 Replace reference to fileobj
  - 788874408a Remove `*' from mode
  - 3d4b833627 Don't use intermediate file when listing contents of tar.xz file
- **PR** #41373: (alex-zel) Allow HTTP authentication to ES. @ *2017-05-22 15:32:09 UTC*
  - 5edfcf972c Merge pull request #41373 from alex-zel/patch-3
  - 3192eab128 Allow HTTP authentication to ES.
- **ISSUE** #40748: (djhaskin987) Consul backend minion cache does not work (refs: #41287)
- **PR** #41287: (garethgreenaway) Fix to consul cache @ *2017-05-19 18:32:56 UTC*
  - 29bd7f48b7 Merge pull request #41287 from garethgreenaway/40748_2016_11_consul
  - 5039fe12fb Removing chdir as it is no needed with this change
  - 4550c3ce49 Updating the code that is pulling in the list of cached minions to use self.cache.list instead of relying on checking the local file system, which only works for the localfs cache method. #40748
- **ISSUE** #38894: (amendlik) salt.runner and salt.wheel ignore test=True (refs: #41309, #41611)
- **PR** #41309: (garethgreenaway) Adding test argument for runners & wheel orchestration modules @ *2017-05-19 18:26:09 UTC*
  - 672aaa88d3 Merge pull request #41309 from garethgreenaway/38894_allowing_test_argument
  - e1a88e8bf7 Allowing test=True to be passed for salt.runner and salt.wheel when used with orchestration
- **ISSUE** #41306: (lomeroe) win_lgpo does not properly pack group policy version number in gpt.ini (refs: #41319, #41307)
- **PR** #41319: (lomeroe) backport #41307 to 2016.11, properly pack version numbers into single @ *2017-05-19 18:25:00 UTC*

  - **PR** #41307: (lomeroe) properly pack/unpack the verison numbers into a number (refs: #41319)
  - 140b0427e1 Merge pull request #41319 from lomeroe/bp_41307
  - 4f0aa577a5 backport 41307 to 2016.11, properly pack version numbers into single number
- **PR** #41327: (Ch3LL) Add 2016.11.6 Release Notes @ *2017-05-19 18:05:09 UTC*
  - 6bdb7cca7d Merge pull request #41327 from Ch3LL/add_2016.11.6_release
  - e5fc0aeb9c Add 2016.11.6 Release Notes
- **PR** #41329: (lorengordon) Corrects versionadded for win_network.get_route @ *2017-05-19 17:47:57 UTC*
  - 1faffd3932 Merge pull request #41329 from lorengordon/doc-fix
  - 3c471247f0 Corrects versionadded for win_network.get_route
- **PR** #41322: (Ch3LL) Add patched packages warning to 2016.11.5 release notes @ *2017-05-18 21:53:26 UTC*
  - 6ca65592da Merge pull request #41322 from Ch3LL/fix_release_2016.11.5_notes
  - 9a1bf4205f fix url refs in rst
  - cde008ff77 Add patched packages warning to 2016.11.5 release notes
- **PR** #41208: (pkazmierczak) Fix: zypper handling of multiple version packages @ *2017-05-18 15:44:26 UTC*
  - 9f359d841f Merge pull request #41208 from pkazmierczak/pkazmierczak-zypper-multiple-ver-pkgs
  - d411a91676 Reverted back to cascading with statements for python 2.6 compat
  - 7204013653 Compacted with statements in the unit test.
  - 6c4c08042c Added unit tests and copied the behavior to .upgrade method, too.
  - 5f952007f6 Fix: zypper handling of multiple version packages
- **PR** #41317: (Ch3LL) [2016.11] Bump latest release version to 2016.11.5 @ *2017-05-18 15:34:13 UTC*
  - bcef99adb6 Merge pull request #41317 from Ch3LL/update_latest_2016.11
  - cdb072c207 [2016.11] Bump latest release version to 2016.11.5
- **PR** #41232: (axmetishe) Add basic auth for SPM @ *2017-05-17 19:08:56 UTC*
  - b8ddd7ee08 Merge pull request #41232 from axmetishe/2016.11
  - 76104f23b4 Add basic auth for SPM
- **PR** #41236: (BenoitKnecht) states: cron: show correct changes when using *special* @ *2017-05-17 18:51:58 UTC*
  - 7bdb66d969 Merge pull request #41236 from BenoitKnecht/2016.11
  - 33211d032e states: cron: show correct changes when using *special*
- **PR** #41269: (isbm) Bugfix: Unable to use ``127'' as hostname for the Minion ID @ *2017-05-17 18:31:15 UTC*
  - 1c1e092f56 Merge pull request #41269 from isbm/isbm-minion-id-127-name
  - 5168ef8959 Add unit test for hostname can be started from 127
  - 0d0354198b Harden to 127. IP part
  - d9c8324a6b Unit test for accepting hosts names as 127
  - 65b03c667b Bugfix: unable to use 127 as hostname
- **PR** #41289: (garethgreenaway) Fixing consul cache @ *2017-05-17 16:54:12 UTC*
  - d0fa31d4ca Merge pull request #41289 from garethgreenaway/2016_11_5_fix_consul_cache_ls

  - 780a28c9a0 Swapping the order in the func_alias so the ls function is available.

- **ISSUE** #41291: (lomeroe) win_lgpo does not properly convert large decimal values in regpol data (refs: #41301, #41303)
- **PR** #41303: (lomeroe) backport #41301 -- properly convert packed string to decimal values @ *2017-05-17 16:32:22 UTC*
  - **PR** #41301: (lomeroe) properly convert packed string to decimal values (refs: #41303)
  - 6566648948 Merge pull request #41303 from lomeroe/bp-41301
  - f4b93f9d9a properly convert packed string to decimal values
- **ISSUE** #41231: (kaihowl) PR #30777 misses an update to the documentation for pkg.installed and hold:true (refs: #41251)
- **ISSUE** #30733: (ealphonse) version-controlled packages with hold: True can no longer be upgraded by salt (refs: #30777)
- **PR** #41283: (terminalmage) Backport #41251 to 2016.11 @ *2017-05-16 18:01:17 UTC*
  - **PR** #41251: (abednarik) Update apt module regarding upgrade against hold packages. (refs: #41283)
  - **PR** #30777: (abednarik) Fix update apt hold pkgs (refs: #41251)
  - 44598617be Merge pull request #41283 from terminalmage/bp-41251
  - ed03ca534f Update apt module regarding upgrade against hold packages.
- **PR** #41181: (gtmanfred) add resolving extra flags to yum upgrade @ *2017-05-16 04:07:47 UTC*
  - d8e9676fcf Merge pull request #41181 from gtmanfred/2016.11
  - 2ca71713b1 use six and clean_kwargs
  - c9bf09a5a1 add resolving extra flags to yum upgrade
- **ISSUE** #40177: (eldadru) libcloud_dns state ``global name `__salt__' is not defined'' in salt.cmd runner (refs: #40246)
- **PR** #41220: (rallytime) Back-port #40246 to 2016.11 @ *2017-05-15 17:59:38 UTC*
  - **PR** #40246: (tonybaloney) Fix libcloud_dns state module bug (refs: #41220)
  - 75942235f0 Merge pull request #41220 from rallytime/bp-40246
  - 79f1bb2bba Remove unused/duplicate imports leftover from merge-conflict resolution
  - 2f610680e5 remove unused imports
  - 9b7de2e7d7 fix unit tests
  - 49d94559ab linting
  - 4b260a4594 linting
  - 41d1adab5f fix up tests
  - b3822e03fc add fixes for incorrectly importing modules directly instead of using __salt__
- **ISSUE** #41230: (RealKelsar) 2016.11.5 IPv6 nameserver in resolv.conf leads to minion exception (refs: #41244)
- **ISSUE** #40912: (razed11) IPV6 Warning when ipv6 set to False (refs: #40934)
- **PR** #41244: (cachedout) Fix ipv6 nameserver grains @ *2017-05-15 17:55:39 UTC*
  - **PR** #40934: (gtmanfred) Only display IPvX warning if role is master (refs: #41244)
  - 53d5b3e816 Merge pull request #41244 from cachedout/fix_ipv6_nameserver_grains

  - f745db1a43 Lint
  - 6e1ab69710 Partial revert of #40934
  - 88f49f9146 Revert ``Only display IPvX warning if role is master''
- **PR** #41242: (pprkut) Fix changing a mysql user to unix socket authentication. @ *2017-05-15 17:00:06 UTC*
  - 895fe582eb Merge pull request #41242 from M2Mobi/mysql_socket_auth
  - 7d8359766d Fix changing a mysql user to unix socket authentication.
- **ISSUE** #40940: (djhaskin987) When *state_aggregate* is set to *True*, the *latest* keyword doesn't work with pkg.installed (refs: #41101)
- **PR** #41101: (terminalmage) Fix ``latest'' keyword for version specification when used with aggregation @ *2017-05-15 16:52:35 UTC*
  - 50d8fde123 Merge pull request #41101 from terminalmage/issue40940
  - 7fe64219ae Add rtag check to integration test for pkg.refresh_db
  - 88a08aa3bf Add comments to explain what removing the rtag file actually does
  - 92011dbe5f Fix ``latest'' keyword for version specification when used with aggregation
- **ISSUE** #34775: (babilen) Please allow users to disable branch environment mapping in GitFS (refs: #41144)

  - d8766562c9 fix incorrect service.running success response

25.2.19 Salt 2016.11.7 Release Notes

Version 2016.11.7 is a bugfix release for *2016.11.0*.

Security Fix

CVE-2017-12791 Maliciously crafted minion IDs can cause unwanted directory traversals on the Salt-master

This release corrects a flaw in minion ID validation which could allow certain minions to authenticate to a master despite not having the correct credentials. To exploit the vulnerability, an attacker must create a salt-minion with an ID containing characters that will cause a directory traversal. Credit for discovering the security flaw goes to: Vernhk@qq.com

25.2.20 Salt 2016.11.8 Release Notes

Version 2016.11.8 is a bugfix release for *2016.11.0*.

Security Fix

CVE-2017-14695 Directory traversal vulnerability in minion id validation in SaltStack. Allows remote minions with incorrect credentials to authenticate to a master via a crafted minion ID. Credit for discovering the security flaw goes to: Julian Brost (julian@0x4a42.net)

CVE-2017-14696 Remote Denial of Service with a specially crafted authentication request. Credit for discovering the security flaw goes to: Julian Brost (julian@0x4a42.net)

Anonymous Binds and LDAP/Active Directory

When `auth.ldap.anonymous` is set to `False`, the bind password can no longer be empty.

- **PR** #43508: (rallytime) Back-port #43333 to 2016.11.8 @ *2017-09-14 21:40:19 UTC*
  - **PR** #43333: (damon-atkins) Docs are wrong cache_dir (bool) and cache_file (str) cannot be passed as params + 1 bug (refs: #43508)
  - a648f75949 Merge pull request #43508 from rallytime/bp-43333
  - d4981a2717 Update doco
  - a7c8b9e048 Update win_pkg.py
  - 1d6dc6fb72 Docs are wrong cache_dir (bool) and cache_file (str) cannot be passed on the cli (#2)
- **PR** #43434: (rallytime) Add 2016.11.8 release notes @ *2017-09-11 17:06:29 UTC*
  - e7009877bc Merge pull request #43434 from rallytime/2016.11.8-release-notes
  - 68f529ee5e Add 2016.11.8 release notes
- **PR** #43271: (twangboy) Fix minor formatting issue @ *2017-08-30 18:35:12 UTC*
  - cf21f91fb2 Merge pull request #43271 from twangboy/win_fix_pkg.install
  - 91b062f564 Fix formatting issue, spaces surrounding +
- **PR** #43228: (twangboy) Win fix pkg.install @ *2017-08-30 14:26:21 UTC*
  - 3a0b02f3ae Merge pull request #43228 from twangboy/win_fix_pkg.install
  - 13dfabb1ce Fix regex statement, add .
  - 31ff69f0ad Add underscore to regex search
  - 3cf2b6575c Fix spelling
  - ed030a35a5 Use regex to detect salt-minion install
  - e5daff495a Fix pkg.install
- **PR** #43191: (viktorkrivak) Fix apache.config with multiple statement @ *2017-08-28 18:13:44 UTC*
  - b4c689dff5 Merge pull request #43191 from viktorkrivak/fix-apache-config-multi-entity
  - c15bcbe1cc Merge remote-tracking branch `upstream/2016.11' into fix-apache-config-multi-entity

  - 4164047951 Fix apache.config with multiple statement At this moment when you post more than one statement in config only last is used. Also file is rewrited multiple times until last statement is written. Example: salt `*' apache.config /etc/httpd/conf.d/ports.conf config="[{`Listen': `8080'}, {`Proxy': ``Something''}]" Ends only with Proxy Something and ignore Listen 8080, This patch fix this issue.

- **ISSUE** #42279: (dafyddj) win_lgpo matches multiple policies due to startswith() (refs: #43154, #43116)
- **PR** #43154: (lomeroe) Backport #43116 to 2016.11 @ *2017-08-28 16:40:41 UTC*
  - **PR** #43116: (lomeroe) Fix 42279 in develop (refs: #43154)
  - b90e59ede9 Merge pull request #43154 from lomeroe/bp-43116-2016.11
  - 8f593b0b02 verify that files exist before trying to remove them, win_file.remove raises an exception if the file does not exist
  - 33a30bac06 correcting bad format statement in search for policy to be disabled
  - acc3d7ac82 correct fopen calls from salt.utils for 2016.11's utils function
  - 2da1cdd109 lint fix
  - 61bd12c0de track xml namespace to ensure policies w/duplicate IDs or Names do not conflict
  - f232bed9f9 add additional checks for ADM policies that have the same ADMX policy ID (#42279)
- **ISSUE** #42642: (githubcdr) state.augeas (refs: #42669, #43202)
- **PR** #43202: (garethgreenaway) Reverting previous augeas module changes @ *2017-08-28 13:14:27 UTC*
  - 5308c27f9f Merge pull request #43202 from garethgreenaway/42642_2016_11_augeas_module_revert_fix
  - ef7e93eb3f Reverting this change due to it breaking other uses.
- **ISSUE** #43101: (aogier) genesis.bootstrap fails if no pkg AND exclude_pkgs (which can't be a string) (refs: #43103)
- **PR** #43103: (aogier) genesis.bootstrap deboostrap fix @ *2017-08-25 20:48:23 UTC*
  - f16b7246e4 Merge pull request #43103 from aogier/43101-genesis-bootstrap
  - db94f3bb1c better formatting
  - e5cc667762 tests: fix a leftover and simplify some parts
  - 13e5997457 lint
  - 216ced69e5 allow comma-separated pkgs lists, quote args, test deb behaviour
  - d8612ae006 fix debootstrap and enhance packages selection/deletion via cmdline
- **ISSUE** #42329: (jagguli) State git.latest does not pull latest tags (refs: #42663)
- **PR** #42663: (jagguli) Check remote tags before deciding to do a fetch #42329 @ *2017-08-25 20:14:32 UTC*
  - 4863771428 Merge pull request #42663 from StreetHawkInc/fix_git_tag_check
  - 2b5af5b59d Remove refs/tags prefix from remote tags
  - 3f2e96e561 Convert set to list for serializer
  - 2728e5d977 Only include new tags in changes
  - 4b1df2f223 Exclude annotated tags from checks
  - 389c037285 Check remote tags before deciding to do a fetch #42329
- **ISSUE** #43198: (corywright) disk.format_ needs to be aliased to disk.format (refs: #43199)
- **PR** #43199: (corywright) Add *disk.format* alias for *disk.format_* @ *2017-08-25 19:21:07 UTC*

  - 4193e7f0a2 Merge pull request #43199 from corywright/disk-format-alias
  - f00d3a9ddc Add *disk.format* alias for *disk.format_*
- **ISSUE** saltstack/salt-jenkins#495: (Ch3LL) npm tests failing (refs: #43196)
- **PR** #43196: (gtmanfred) Pin request install to version for npm tests @ *2017-08-25 18:43:06 UTC*
  - 5471f9fe0c Merge pull request #43196 from gtmanfred/2016.11
  - ccd2241777 Pin request install to version
- **ISSUE** #43143: (abulford) git.detached does not fetch if rev is missing from local (refs: #43178)
- **PR** #43178: (terminalmage) git.detached: Fix traceback when rev is a SHA and is not present locally @ *2017-08-25 13:58:37 UTC*
  - ace2715c60 Merge pull request #43178 from terminalmage/issue43143
  - 2640833400 git.detached: Fix traceback when rev is a SHA and is not present locally
- **PR** #43179: (terminalmage) Fix missed deprecation @ *2017-08-24 22:52:34 UTC*
  - 12e9507b9e Merge pull request #43179 from terminalmage/old-deprecation
  - 3adf8ad04b Fix missed deprecation
- **PR** #43171: (terminalmage) Add warning about adding new functions to salt/utils/__init__.py @ *2017-08-24 19:10:23 UTC*
  - b595440d90 Merge pull request #43171 from terminalmage/salt-utils-warning
  - 7b5943a31a Add warning about adding new functions to salt/utils/__init__.py
- **PR** #43173: (Ch3LL) Add New Release Branch Strategy to Contribution Docs @ *2017-08-24 19:04:56 UTC*
  - 4f273cac4f Merge pull request #43173 from Ch3LL/add_branch_docs
  - 1b24244bd3 Add New Release Branch Strategy to Contribution Docs
- **PR** #43151: (ushmodin) state.sls hangs on file.recurse with clean: True on windows @ *2017-08-23 17:25:33 UTC*
  - **PR** #42969: (ushmodin) state.sls hangs on file.recurse with clean: True on windows (refs: #43151)
  - 669b376abf Merge pull request #43151 from ushmodin/2016.11
  - c5841e2ade state.sls hangs on file.recurse with clean: True on windows
- **PR** #42986: (renner) Notify systemd synchronously (via NOTIFY_SOCKET) @ *2017-08-22 16:52:56 UTC*
  - ae9d2b7985 Merge pull request #42986 from renner/systemd-notify
  - 79c53f3f81 Fallback to systemd_notify_call() in case of socket.error
  - f1765472dd Notify systemd synchronously (via NOTIFY_SOCKET)
- **ISSUE** #43036: (mcarlton00) Linux VMs in Bhyve aren't displayed properly in grains (refs: #43037)
- **PR** #43037: (mcarlton00) Issue #43036 Bhyve virtual grain in Linux VMs @ *2017-08-22 16:43:40 UTC*
  - b420fbe618 Merge pull request #43037 from mcarlton00/fix-bhyve-grains
  - 73315f0cf0 Issue #43036 Bhyve virtual grain in Linux VMs
- **PR** #43100: (vutny) [DOCS] Add missing *utils* sub-dir listed for *extension_modules* @ *2017-08-22 15:40:09 UTC*
  - 0a86f2d884 Merge pull request #43100 from vutny/doc-add-missing-utils-ext
  - af743ff6c3 [DOCS] Add missing *utils* sub-dir listed for *extension_modules*
- **ISSUE** #15171: (JensRantil) Maximum recursion limit hit related to requisites (refs: #42985)

- **PR** #42985: (DmitryKuzmenko) Properly handle *prereq* having lost requisites. @ *2017-08-21 22:49:39 UTC*
  - e2bf2f448e Merge pull request #42985 from DSRCorporation/bugs/15171_recursion_limit
  - 651b1bab09 Properly handle *prereq* having lost requisites.
- **PR** #43092: (blarghmatey) Fixed issue with silently passing all tests in Testinfra module @ *2017-08-21 20:22:08 UTC*
  - e51333306c Merge pull request #43092 from mitodl/2016.11
  - d4b113acdf Fixed issue with silently passing all tests in Testinfra module
- **PR** #43060: (twangboy) Osx update pkg scripts @ *2017-08-21 20:06:12 UTC*
  - 77a443ce8e Merge pull request #43060 from twangboy/osx_update_pkg_scripts
  - ef8a14cdf9 Remove /opt/salt instead of /opt/salt/bin
  - 2dd62aa1da Add more information to the description
  - f44f5b70dc Only stop services if they are running
  - 3b62bf953c Remove salt from the path
  - ebdca3a0f5 Update pkg-scripts
- **ISSUE** #42869: (abednarik) Git Module : Failed to update repository (refs: #43064)
- **PR** #43064: (terminalmage) Fix race condition in git.latest @ *2017-08-21 14:29:52 UTC*
  - 1b1b6da803 Merge pull request #43064 from terminalmage/issue42869
  - 093c0c2f77 Fix race condition in git.latest
- **ISSUE** #42041: (lorengordon) pkg.list_repo_pkgs fails to find pkgs with spaces around yum repo enabled value (refs: #43054)
- **PR** #43054: (lorengordon) Uses ConfigParser to read yum config files @ *2017-08-18 20:49:44 UTC*
  - **PR** #42045: (arount) Fix: salt.modules.yumpkg: ConfigParser to read ini like files. (refs: #43054)
  - 96e8e836d1 Merge pull request #43054 from lorengordon/fix/yumpkg/config-parser
  - 3b2cb81a72 fix typo in salt.modules.yumpkg
  - 38add0e4a2 break if leading comments are all fetched
  - d7f65dc7a7 fix configparser import & log if error was raised
  - ca1b1bb633 use configparser to parse yum repo file
- **PR** #43048: (rallytime) Back-port #43031 to 2016.11 @ *2017-08-18 12:56:04 UTC*
  - **PR** #43031: (gtmanfred) use a ruby gem that doesn't have dependencies (refs: #43048)
  - 43aa46f512 Merge pull request #43048 from rallytime/bp-43031
  - 35e45049e2 use a ruby gem that doesn't have dependencies
- **PR** #43023: (terminalmage) Fixes/improvements to Jenkins state/module @ *2017-08-18 01:33:10 UTC*
  - ad89ff3104 Merge pull request #43023 from terminalmage/fix-jenkins-xml-caching
  - 33fd8ff939 Update jenkins.py
  - fc306fc8c3 Add missing colon in *if* statement
  - 822eabcc81 Catch exceptions raised when making changes to jenkins
  - 91b583b493 Improve and correct execption raising

  - f096917a0e Raise an exception if we fail to cache the config xml

- **PR** #43026: (rallytime) Back-port #43020 to 2016.11 @ *2017-08-17 23:19:46 UTC*
  - **PR** #43020: (gtmanfred) test with gem that appears to be abandoned (refs: #43026)
  - 2957467ed7 Merge pull request #43026 from rallytime/bp-43020
  - 0eb15a1f67 test with gem that appears to be abandoned
- **ISSUE** #40490: (alxwr) saltstack x509 incompatible to m2crypto 0.26.0 (refs: #42760)
- **PR** #43033: (rallytime) Back-port #42760 to 2016.11 @ *2017-08-17 22:24:43 UTC*
  - **PR** #42760: (AFriemann) Catch TypeError thrown by m2crypto when parsing missing subjects in c... (refs: #43033)
  - 4150b094fe Merge pull request #43033 from rallytime/bp-42760
  - 3e3f7f5d8e Catch TypeError thrown by m2crypto when parsing missing subjects in certificate files.
- **PR** #43032: (rallytime) Back-port #42547 to 2016.11 @ *2017-08-17 21:53:50 UTC*
  - **PR** #42547: (blarghmatey) Updated testinfra modules to work with more recent versions (refs: #43032)
  - b124d3667e Merge pull request #43032 from rallytime/bp-42547
  - ea4d7f4176 Updated testinfra modules to work with more recent versions
- **ISSUE** #42992: (pabloh007) docker.save flag push does is ignored (refs: #43027)
- **PR** #43027: (pabloh007) Fixes ignore push flag for docker.push module issue #42992 @ *2017-08-17 19:55:37 UTC*
  - a88386ad44 Merge pull request #43027 from pabloh007/fix-docker-save-push-2016-11
  - d0fd949f85 Fixes ignore push flag for docker.push module issue #42992
- **ISSUE** #42627: (taigrrr8) salt-cp no longer works. Was working a few months back. (refs: #42890)
- **PR** #42890: (DmitryKuzmenko) Make chunked mode in salt-cp optional @ *2017-08-17 18:37:44 UTC*
  - 51d16840bb Merge pull request #42890 from DSRCorporation/bugs/42627_salt-cp
  - cfddbf1c75 Apply code review: update the doc
  - afedd3b654 Typos and version fixes in the doc.
  - 9fedf6012e Fixed `test_valid_docs' test.
  - 999388680c Make chunked mode in salt-cp optional (disabled by default).
- **PR** #43009: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2017-08-17 18:00:09 UTC*
  - b3c253cdfa Merge pull request #43009 from rallytime/merge-2016.11
  - 566ba4fe76 Merge branch `2016.3' into `2016.11'
    * 13b8637d53 Merge pull request #42942 from Ch3LL/2016.3.6_follow_up
      · f281e1795f move additional minion config options to 2016.3.8 release notes
      · 168604ba6b remove merge conflict
      · 8a07d95212 update release notes with cve number
      · 149633fdca Add release notes for 2016.3.7 release
      · 7a4cddcd95 Add clean_id function to salt.utils.verify.py
    * bbb1b29ccb Merge pull request #42954 from Ch3LL/latest_2016.3

· b551e66744 [2016.3] Bump latest and previous versions

* 5d5edc54b7 Merge pull request #42949 from Ch3LL/2016.3.7_docs

· d75d3741f8 Add Security Notice to 2016.3.7 Release Notes

- **PR** #43021: (terminalmage) Use socket.AF_INET6 to get the correct value instead of doing an OS check @ *2017-08-17 17:57:09 UTC*
  - **PR** #43014: (Ch3LL) Change AF_INET6 family for mac in test_host_to_ips (refs: #43021)
  - 37c63e7cf2 Merge pull request #43021 from terminalmage/fix-network-test
  - 4089b7b1bc Use socket.AF_INET6 to get the correct value instead of doing an OS check
- **PR** #43019: (rallytime) Update bootstrap script to latest stable: v2017.08.17 @ *2017-08-17 17:56:41 UTC*
  - 8f6423247c Merge pull request #43019 from rallytime/bootstrap_2017.08.17
  - 2f762b3a17 Update bootstrap script to latest stable: v2017.08.17
- **PR** #43014: (Ch3LL) Change AF_INET6 family for mac in test_host_to_ips (refs: #43021) @ *2017-08-17 16:17:51 UTC*
  - ff1caeee68 Merge pull request #43014 from Ch3LL/fix_network_mac
  - b8eee4401e Change AF_INET6 family for mac in test_host_to_ips
- **PR** #42968: (vutny) [DOCS] Fix link to Salt Cloud Feature Matrix @ *2017-08-16 13:16:16 UTC*
  - 1ee9499d28 Merge pull request #42968 from vutny/doc-salt-cloud-ref
  - 44ed53b1df [DOCS] Fix link to Salt Cloud Feature Matrix
- **ISSUE** #38839: (DaveOHenry) Invoking runner.cloud.action via reactor sls fails (refs: #42291)
- **PR** #42291: (vutny) Fix #38839: remove *state* from Reactor runner kwags @ *2017-08-15 23:01:08 UTC*
  - 923f9741fe Merge pull request #42291 from vutny/fix-38839
  - 5f8f98a01f Fix #38839: remove *state* from Reactor runner kwags
- **ISSUE** #42644: (stamak) nova salt-cloud -P Private IPs returned, but not public. Checking for misidentified IPs (refs: #42940)
- **PR** #42940: (gtmanfred) create new ip address before checking list of allocated ips @ *2017-08-15 21:47:18 UTC*
  - c20bc7d515 Merge pull request #42940 from gtmanfred/2016.11
  - 253e216a8d fix IP address spelling
  - bd63074e7a create new ip address before checking list of allocated ips
- **PR** #42959: (rallytime) Back-port #42883 to 2016.11 @ *2017-08-15 21:25:48 UTC*
  - **PR** #42883: (rallytime) Fix failing boto tests (refs: #42959)
  - d6496eca72 Merge pull request #42959 from rallytime/bp-42883
  - c6b9ca4b9e Lint fix: add missing space
  - 5597b1a30e Skip 2 failing tests in Python 3 due to upstream bugs
  - a0b19bdc27 Update account id value in boto_secgroup module unit test
  - 60b406e088 @mock_elb needs to be changed to @mock_elb_deprecated as well
  - 6ae1111295 Replace @mock_ec2 calls with @mock_ec2_deprecated calls
- **PR** #42944: (Ch3LL) [2016.11] Add clean_id function to salt.utils.verify.py @ *2017-08-15 18:06:12 UTC*

  - 6366e05d0d Merge pull request #42944 from Ch3LL/2016.11.6_follow_up
  - 7e0a20afca Add release notes for 2016.11.7 release
  - 63823f8c3e Add clean_id function to salt.utils.verify.py
- **PR** #42952: (Ch3LL) [2016.11] Bump latest and previous versions @ *2017-08-15 17:23:02 UTC*
  - 49d339c976 Merge pull request #42952 from Ch3LL/latest_2016.11
  - 74e7055d54 [2016.11] Bump latest and previous versions
- **PR** #42950: (Ch3LL) Add Security Notice to 2016.11.7 Release Notes @ *2017-08-15 16:50:23 UTC*
  - b0d2e05a79 Merge pull request #42950 from Ch3LL/2016.11.7_docs
  - a6f902db40 Add Security Notice to 2016.11.77 Release Notes
- **PR** #42836: (aneeshusa) Backport salt.utils.versions from develop to 2016.11 @ *2017-08-14 20:56:54 UTC*
  - **PR** #42835: (aneeshusa) Fix typo in utils/versions.py module (refs: #42836)
  - c0ff69f88c Merge pull request #42836 from lyft/backport-utils.versions-to-2016.11
  - 86ce7004a2 Backport salt.utils.versions from develop to 2016.11
- **PR** #42919: (rallytime) Back-port #42871 to 2016.11 @ *2017-08-14 20:44:00 UTC*
  - **PR** #42871: (amalleo25) Update joyent.rst (refs: #42919)
  - 64a79dd5ac Merge pull request #42919 from rallytime/bp-42871
  - 4e46c968e6 Update joyent.rst
- **ISSUE** #42803: (gmcwhistler) master_type: str, not working as expected, parent salt-minion process dies. (refs: #42848)
- **ISSUE** #42753: (grichmond-salt) SaltReqTimeout Error on Some Minions when One Master in a Multi-Master Configuration is Unavailable (refs: #42848)
- **PR** #42918: (rallytime) Back-port #42848 to 2016.11 @ *2017-08-14 20:43:43 UTC*
  - **PR** #42848: (DmitryKuzmenko) Execute fire_master asynchronously in the main minion thread. (refs: #42918)
  - bea8ec1098 Merge pull request #42918 from rallytime/bp-42848
  - cdb48126f7 Make lint happier.
  - 62eca9b00b Execute fire_master asynchronously in the main minion thread.
- **PR** #42861: (twangboy) Fix pkg.install salt-minion using salt-call @ *2017-08-14 19:07:22 UTC*
  - 52bce329cb Merge pull request #42861 from twangboy/win_pkg_install_salt
  - 0d3789f0c6 Fix pkg.install salt-minion using salt-call
- **PR** #42798: (s-sebastian) Update return data before calling returners @ *2017-08-14 15:51:30 UTC*
  - b9f4f87aa5 Merge pull request #42798 from s-sebastian/2016.11
  - 1cc86592ed Update return data before calling returners
- **ISSUE** #41976: (abulford) dockerng network states do not respect test=True (refs: #41977)
- **PR** #41977: (abulford) Fix dockerng.network_* ignoring of tests=True @ *2017-08-11 18:37:20 UTC*
  - c15d0034fe Merge pull request #41977 from redmatter/fix-dockerng-network-ignores-test
  - 1cc2aa503a Fix dockerng.network_* ignoring of tests=True

- **PR** #42886: (sarcasticadmin) Adding missing output flags to salt cli docs @ *2017-08-11 18:35:19 UTC*
  - 3b9c3c5671 Merge pull request #42886 from sarcasticadmin/adding_docs_salt_outputs
  - 744bf954ff Adding missing output flags to salt cli
- **PR** #42882: (gtmanfred) make sure cmd is not run when npm isn't installed @ *2017-08-11 17:53:14 UTC*
  - e5b98c8a88 Merge pull request #42882 from gtmanfred/2016.11
  - da3402a53d make sure cmd is not run when npm isn't installed
- **PR** #42788: (amendlik) Remove waits and retries from Saltify deployment @ *2017-08-11 15:38:05 UTC*
  - 5962c9588b Merge pull request #42788 from amendlik/saltify-timeout
  - 928b523797 Remove waits and retries from Saltify deployment
- **PR** #42877: (terminalmage) Add virtual func for cron state module @ *2017-08-11 15:33:09 UTC*
  - 227ecddd13 Merge pull request #42877 from terminalmage/add-cron-state-virtual
  - f1de196740 Add virtual func for cron state module
- **PR** #42859: (terminalmage) Add note about git CLI requirement for GitPython to GitFS tutorial @ *2017-08-11 14:53:03 UTC*
  - ab9f6cef33 Merge pull request #42859 from terminalmage/gitpython-git-cli-note
  - 35e05c9515 Add note about git CLI requirement for GitPython to GitFS tutorial
- **ISSUE** saltstack/salt-jenkins#475: (rallytime) Arch is failing npm cache test (refs: #42856)
- **ISSUE** #41770: (Ch3LL) NPM v5 incompatible with salt.modules.cache_list (refs: #42856)
- **PR** #42856: (gtmanfred) skip cache_clean test if npm version is >= 5.0.0 @ *2017-08-11 13:39:20 UTC*
  - 682b4a8d14 Merge pull request #42856 from gtmanfred/2016.11
  - b458b89fb8 skip cache_clean test if npm version is >= 5.0.0
- **PR** #42864: (whiteinge) Make syndic_log_file respect root_dir setting @ *2017-08-11 13:28:21 UTC*
  - 01ea854029 Merge pull request #42864 from whiteinge/syndic-log-root_dir
  - 4b1f55da9c Make syndic_log_file respect root_dir setting
- **PR** #42851: (terminalmage) Backport #42651 to 2016.11 @ *2017-08-10 18:02:39 UTC*
  - **PR** #42651: (gtmanfred) python2- prefix for fedora 26 packages (refs: #42851)
  - 2dde1f77e9 Merge pull request #42851 from terminalmage/bp-42651
  - a3da86eea8 fix syntax
  - 6ecdbcec1d make sure names are correct
  - f83b553d6e add py3 for versionlock
  - 21934f61bb python2- prefix for fedora 26 packages
- **ISSUE** #42683: (rgcosma) Gluster module broken in 2017.7 (refs: #42806)
- **PR** #42806: (rallytime) Update doc references in glusterfs.volume_present @ *2017-08-10 14:10:16 UTC*
  - c746f79a3a Merge pull request #42806 from rallytime/fix-42683
  - 8c8640d6b8 Update doc references in glusterfs.volume_present
- **PR** #42829: (twangboy) Fix passing version in pkgs as shown in docs @ *2017-08-10 14:07:24 UTC*

  - 27a8a2695a Merge pull request #42829 from twangboy/win_pkg_fix_install
  - 83b9b230cd Add winrepo to docs about supporting versions in pkgs
  - 81fefa6e67 Add ability to pass version in pkgs list
- **PR** #42838: (twangboy) Document requirements for win_pki @ *2017-08-10 13:59:46 UTC*
  - 3c3ac6aeb2 Merge pull request #42838 from twangboy/win_doc_pki
  - f0a1d06b46 Standardize PKI Client
  - 7de687aa57 Document requirements for win_pki
- **PR** #42805: (rallytime) Back-port #42552 to 2016.11 @ *2017-08-09 22:37:56 UTC*
  - **PR** #42552: (remijouannet) update consul module following this documentation https://www.consul.... (refs: #42805)
  - b3e2ae3c58 Merge pull request #42805 from rallytime/bp-42552
  - 5a91c1f2d1 update consul module following this documentation https://www.consul.io/api/acl.html
- **ISSUE** #42731: (infoveinx) http.query template_data render exception (refs: #42804)
- **PR** #42804: (rallytime) Back-port #42784 to 2016.11 @ *2017-08-09 22:37:40 UTC*
  - **PR** #42784: (gtmanfred) only read file if ret is not a string in http.query (refs: #42804)
  - d2ee7934ed Merge pull request #42804 from rallytime/bp-42784
  - dbd29e4aaa only read file if it is not a string
- **PR** #42826: (terminalmage) Fix misspelling of ``versions'' @ *2017-08-09 19:39:43 UTC*
  - 4cbf8057b3 Merge pull request #42826 from terminalmage/fix-spelling
  - 00f93142e4 Fix misspelling of ``versions''
- **PR** #42786: (Ch3LL) Fix typo for template_dict in http docs @ *2017-08-08 18:14:50 UTC*
  - de997edd90 Merge pull request #42786 from Ch3LL/fix_typo
  - 90a2fb66a2 Fix typo for template_dict in http docs
- **ISSUE** #42600: (twangboy) Unable to set `Not Configured' using win_lgpo execution module (refs: #42795, #42744)
- **PR** #42795: (lomeroe) backport #42744 to 2016.11 @ *2017-08-08 17:17:15 UTC*
  - **PR** #42744: (lomeroe) fix #42600 in develop (refs: #42795)
  - bf6153ebe5 Merge pull request #42795 from lomeroe/bp-42744_201611
  - 695f8c1ae4 fix #42600 in develop
- **ISSUE** #42747: (whiteinge) Outputters mutate data which can be a problem for Runners and perhaps other things (refs: #42748)
- **PR** #42748: (whiteinge) Workaround Orchestrate problem that highstate outputter mutates data @ *2017-08-07 21:11:33 UTC*
  - 61fad97286 Merge pull request #42748 from whiteinge/save-before-output
  - de60b77c82 Workaround Orchestrate problem that highstate outputter mutates data
- **PR** #42764: (amendlik) Fix infinite loop with salt-cloud and Windows nodes @ *2017-08-07 20:47:07 UTC*
  - a4e3e7e786 Merge pull request #42764 from amendlik/cloud-win-loop

  - f3dcfca4e0 Fix infinite loops on failed Windows deployments

- **ISSUE** #42690: (ChristianBeer) git.latest state with remote set fails on first try (refs: #42694)
- **PR** #42694: (gtmanfred) allow adding extra remotes to a repository @ *2017-08-07 18:08:11 UTC*
  - da85326ad4 Merge pull request #42694 from gtmanfred/2016.11
  - 1a0457af51 allow adding extra remotes to a repository
- **ISSUE** #42642: (githubcdr) state.augeas (refs: #42669, #43202)
- **PR** #42669: (garethgreenaway) [2016.11] Fixes to augeas module @ *2017-08-06 17:58:03 UTC*
  - 7b2119feee Merge pull request #42669 from garethgreenaway/42642_2016_11_augeas_module_fix
  - 24413084e2 Updating the call to shlex_split to pass the posix=False argument so that quotes are preserved.
- **PR** #42629: (xiaoanyunfei) tornado api @ *2017-08-03 22:21:20 UTC*
  - 30725769ed Merge pull request #42629 from xiaoanyunfei/tornadoapi
  - 1e13383b95 tornado api
- **PR** #42655: (whiteinge) Reenable cpstats for rest_cherrypy @ *2017-08-03 20:44:10 UTC*
  - **PR** #33806: (cachedout) Work around upstream cherrypy bug (refs: #42655)
  - f0f00fcee1 Merge pull request #42655 from whiteinge/rest_cherrypy-reenable-stats
  - deb6316d67 Fix lint errors
  - 6bd91c8b03 Reenable cpstats for rest_cherrypy
- **ISSUE** #42686: (gilbsgilbs) Unable to set multiple RabbitMQ tags (refs: #42693)
- **PR** #42693: (gilbsgilbs) Fix RabbitMQ tags not properly set. @ *2017-08-03 20:23:08 UTC*
  - 21cf15f9c3 Merge pull request #42693 from gilbsgilbs/fix-rabbitmq-tags
  - 78fccdc7e2 Cast to list in case tags is a tuple.
  - 287b57b5c5 Fix RabbitMQ tags not properly set.
- **ISSUE** #41433: (sbojarski) boto_cfn.present fails when reporting error for failed state (refs: #42574)
- **PR** #42574: (sbojarski) Fixed error reporting in ``boto_cfn.present'' function. @ *2017-08-01 17:55:29 UTC*
  - f2b0c9b4fa Merge pull request #42574 from sbojarski/boto-cfn-error-reporting
  - 5c945f10c2 Fix debug message in ``boto_cfn._validate'' function.
  - 181a1beecc Fixed error reporting in ``boto_cfn.present'' function.
- **PR** #42623: (terminalmage) Fix unicode constructor in custom YAML loader @ *2017-07-31 19:25:18 UTC*
  - bc1effc4f2 Merge pull request #42623 from terminalmage/fix-unicode-constructor
  - fcf45889dd Fix unicode constructor in custom YAML loader
- **PR** #42515: (gtmanfred) Allow not interpreting backslashes in the repl @ *2017-07-28 16:00:09 UTC*
  - cbf752cd73 Merge pull request #42515 from gtmanfred/backslash
  - cc4e45656d Allow not interpreting backslashes in the repl
- **ISSUE** #42456: (gdubroeucq) Use yum lib (refs: #42586)
- **PR** #42586: (gdubroeucq) [Fix] yumpkg.py: add option to the command ``check-update'' @ *2017-07-27 23:52:00 UTC*

  - 549495831f Merge pull request #42586 from gdubroeucq/2016.11
  - 9c0b5cc1d6 Remove extra newline
  - d2ef4483e4 yumpkg.py: clean
  - a96f7c09e0 yumpkg.py: add option to the command ``check-update''
- **ISSUE** #41982: (abulford) dockerng.network_* matches too easily (refs: #41988)
- **PR** #41988: (abulford) Fix dockerng.network_* name matching @ *2017-07-27 21:25:06 UTC*
  - 6b45debf28 Merge pull request #41988 from redmatter/fix-dockerng-network-matching
  - 9eea796da8 Add regression tests for #41982
  - 3369f0072f Fix broken unit test test_network_absent
  - 0ef6cf634c Add trace logging of dockerng.networks result
  - 515c612808 Fix dockerng.network_* name matching
- **PR** #42339: (isbm) Bugfix: Jobs scheduled to run at a future time stay pending for Salt minions (bsc#1036125) @ *2017-07-27 19:05:51 UTC*
  - 4b16109122 Merge pull request #42339 from isbm/isbm-jobs-scheduled-in-a-future-bsc1036125
  - bbba84ce2d Bugfix: Jobs scheduled to run at a future time stay pending for Salt minions (bsc#1036125)
- **ISSUE** #23516: (dkiser) BUG: cron job scheduler sporadically works (refs: #42077)
- **PR** #42077: (vutny) Fix scheduled job run on Master if *when* parameter is a list @ *2017-07-27 19:04:23 UTC*
  - **PR** #41973: (vutny) Fix Master/Minion scheduled jobs based on Cron expressions (refs: #42077)
  - 6c5a7c604a Merge pull request #42077 from vutny/fix-jobs-scheduled-with-whens
  - b1960cea44 Fix scheduled job run on Master if *when* parameter is a list
- **PR** #42414: (vutny) DOCS: unify hash sum with hash type format @ *2017-07-27 18:48:40 UTC*
  - f9cb536589 Merge pull request #42414 from vutny/unify-hash-params-format
  - d1f2a93368 DOCS: unify hash sum with hash type format
- **ISSUE** #42375: (dragonpaw) salt.modules.*.__virtualname__ doens't work as documented. (refs: #42523)
- **PR** #42523: (rallytime) Add a mention of the True/False returns with __virtual__() @ *2017-07-27 18:13:07 UTC*
  - 535c922511 Merge pull request #42523 from rallytime/fix-42375
  - 685c2cced6 Add information about returning a tuple with an error message
  - fa466519c4 Add a mention of the True/False returns with __virtual__()
- **PR** #42527: (twangboy) Document changes to Windows Update in Windows 10/Server 2016 @ *2017-07-27 17:45:38 UTC*
  - 0df0e7e749 Merge pull request #42527 from twangboy/win_wua
  - 0373791f2a Correct capatlization
  - af3bcc927b Document changes to Windows Update in 10/2016
- **PR** #42551: (binocvlar) Remove `-s' (--script) argument to parted within align_check function @ *2017-07-27 17:35:31 UTC*
  - 69b06586da Merge pull request #42551 from binocvlar/fix-lack-of-align-check-output
  - c4fabaa192 Remove `-s' (--script) argument to parted within align_check function

- **ISSUE** #42403: (astronouth7303) [2017.7] Pillar empty when state is applied from orchestrate (refs: #42433)
- **PR** #42573: (rallytime) Back-port #42433 to 2016.11 @ *2017-07-27 13:51:21 UTC*
  - **PR** #42433: (terminalmage) Only force saltenv/pillarenv to be a string when not None (refs: #42573)
  - 9e0b4e9faf Merge pull request #42573 from rallytime/bp-42433
  - 0293429e24 Only force saltenv/pillarenv to be a string when not None
- **PR** #42571: (twangboy) Avoid loading system PYTHON* environment vars @ *2017-07-26 22:48:55 UTC*
  - e931ed2517 Merge pull request #42571 from twangboy/win_add_pythonpath
  - d55a44dd1a Avoid loading user site packages
  - 9af1eb2741 Ignore any PYTHON* environment vars already on the system
  - 4e2fb03a95 Add pythonpath to batch files and service
- **ISSUE** #42371: (tsaridas) Minion unresponsive after trying to failover (refs: #42387)
- **PR** #42387: (DmitryKuzmenko) Fix race condition in usage of weakvaluedict @ *2017-07-25 20:57:42 UTC*
  - de2f397041 Merge pull request #42387 from DSRCorporation/bugs/42371_KeyError_WeakValueDict
  - e721c7eee2 Don't use *key in weakvaluedict* because it could lie.
- **ISSUE** #41955: (root360-AndreasUlm) rabbitmq 3.6.10 changed output => rabbitmq-module broken (refs: #41968)
- **PR** #41968: (root360-AndreasUlm) Fix rabbitmqctl output sanitizer for version 3.6.10 @ *2017-07-25 19:12:36 UTC*
  - 641a9d7efd Merge pull request #41968 from root360-AndreasUlm/fix-rabbitmqctl-output-handler
  - 76fd941d91 added tests for rabbitmq 3.6.10 output handler
  - 3602af1e1b Fix rabbitmqctl output handler for 3.6.10
- **ISSUE** #42477: (aikar) Invalid ssh_interface value prevents salt-cloud provisioning without reason of why (refs: #42479)
- **PR** #42479: (gtmanfred) validate ssh_interface for ec2 @ *2017-07-25 18:37:18 UTC*
  - 66fede378a Merge pull request #42479 from gtmanfred/interface
  - c32c1b2803 fix pylint
  - 99ec634c6b validate ssh_interface for ec2
- **ISSUE** #42405: (felrivero) The documentation is incorrectly compiled (PILLAR section) (refs: #42516)
- **PR** #42516: (rallytime) Add info about top file to pillar walk-through example to include edit.vim @ *2017-07-25 17:01:12 UTC*
  - a925c7029a Merge pull request #42516 from rallytime/fix-42405
  - e3a6717efa Add info about top file to pillar walk-through example to include edit.vim
- **ISSUE** #42417: (clem-compilatio) salt-cloud - openstack - ``no more floating IP addresses'' error - but public_ip in node (refs: #42509)
- **PR** #42509: (clem-compilatio) Fix _assign_floating_ips in openstack.py @ *2017-07-24 17:14:13 UTC*
  - 1bd5bbccc2 Merge pull request #42509 from clem-compilatio/fix-42417
  - 72924b06b8 Fix _assign_floating_ips in openstack.py
- **PR** #42464: (garethgreenaway) [2016.11] Small fix to modules/git.py @ *2017-07-21 21:28:57 UTC*

  - 4bf35a74de Merge pull request #42464 from garethgreenaway/2016_11_remove_tmp_identity_file
  - ff24102d51 Uncomment the line that removes the temporary identity file.
- **ISSUE** #42357: (Giandom) Salt pillarenv problem with slack engine (refs: #42443)
- **PR** #42443: (garethgreenaway) [2016.11] Fix to slack engine @ *2017-07-21 15:48:57 UTC*
  - e2120dbd0e Merge pull request #42443 from garethgreenaway/42357_pass_args_kwargs_correctly
  - 635810b3e3 Updating the slack engine in 2016.11 to pass the args and kwrags correctly to LocalClient
- **ISSUE** #42198: (shengis) state sqlite3.row_absent fail with ``parameters are of unsupported type'' (refs: #42200)
- **PR** #42200: (shengis) Fix #42198 @ *2017-07-21 14:47:29 UTC*
  - 8262cc9054 Merge pull request #42200 from shengis/sqlite3_fix_row_absent_2016.11
  - 407b8f4bb3 Fix #42198 If where_args is not set, not using it in the delete request.
- **ISSUE** #42413: (goten4) Invalid error message when proxy_host is set and tornado not installed (refs: #42424)
- **PR** #42424: (goten4) Fix error message when tornado or pycurl is not installed @ *2017-07-20 21:53:40 UTC*
  - d9df97e5a3 Merge pull request #42424 from goten4/2016.11
  - 1c0574d05e Fix error message when tornado or pycurl is not installed
- **PR** #42350: (twangboy) Fixes problem with Version and OS Release related grains on certain versions of Python (2016.11) @ *2017-07-19 17:07:26 UTC*
  - 42bb1a64ca Merge pull request #42350 from twangboy/win_fix_ver_grains_2016.11
  - 8c048403d7 Detect Server OS with a desktop release name
- **PR** #42356: (meaksh) Allow to check whether a function is available on the AliasesLoader wrapper @ *2017-07-19 16:56:41 UTC*
  - 0a72e56f6b Merge pull request #42356 from meaksh/2016.11-AliasesLoader-wrapper-fix
  - 915d94219e Allow to check whether a function is available on the AliasesLoader wrapper
- **PR** #42368: (twangboy) Remove build and dist directories before install (2016.11) @ *2017-07-19 16:47:28 UTC*
  - 10eb7b7a79 Merge pull request #42368 from twangboy/win_fix_build_2016.11
  - a7c910c31e Remove build and dist directories before install
- **PR** #42370: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2017-07-18 22:39:41 UTC*
  - 016189f62f Merge pull request #42370 from rallytime/merge-2016.11
  - 0aa5dde1de Merge branch `2016.3' into `2016.11'
  - e9b0f20f8a Merge pull request #42359 from Ch3LL/doc-update-2016.3
    * dc85b5edbe [2016.3] Update version numbers in doc config for 2017.7.0 release
- **PR** #42360: (Ch3LL) [2016.11] Update version numbers in doc config for 2017.7.0 release @ *2017-07-18 19:23:30 UTC*
  - f06a6f1796 Merge pull request #42360 from Ch3LL/doc-update-2016.11
  - b90b7a7506 [2016.11] Update version numbers in doc config for 2017.7.0 release
- **ISSUE** #32400: (rallytime) Document Default Config Values (refs: #42319)
- **PR** #42319: (rallytime) Add more documentation for config options that are missing from master/minion docs @ *2017-07-18 18:02:32 UTC*

  - e0595b0a0f Merge pull request #42319 from rallytime/config-docs
  - b40f980632 Add more documentation for config options that are missing from master/minion docs
- **ISSUE** #42333: (b3hni4) Getting ``invalid type of dict, a list is required'' when trying to configure engines in master config file (refs: #42352)
- **PR** #42352: (CorvinM) Multiple documentation fixes @ *2017-07-18 15:10:37 UTC*
  - 78940400e3 Merge pull request #42352 from CorvinM/issue42333
  - 526b6ee14d Multiple documentation fixes
- **PR** #42353: (terminalmage) is_windows is a function, not a propery/attribute @ *2017-07-18 14:38:51 UTC*
  - b256001760 Merge pull request #42353 from terminalmage/fix-git-test
  - 14cf6ce322 is_windows is a function, not a propery/attribute
- **ISSUE** #41116: (hrumph) FAQ has wrong instructions for upgrading Windows minion. (refs: #42264)
- **PR** #42264: (rallytime) Update minion restart section in FAQ doc for windows @ *2017-07-17 17:40:40 UTC*
  - 866a1febb4 Merge pull request #42264 from rallytime/fix-41116
  - bd638880e3 Add mono-spacing to salt-minion reference for consistency
  - 30d62f43da Update minion restart section in FAQ doc for windows
- **ISSUE** #42194: (jryberg) pkg version: latest are now broken, appending <package>-latest to filename (refs: #42275)
- **PR** #42275: (terminalmage) pkg.installed: pack name/version into pkgs argument @ *2017-07-17 17:38:39 UTC*
  - 9a707088ad Merge pull request #42275 from terminalmage/issue42194
  - 663874908a pkg.installed: pack name/version into pkgs argument
- **ISSUE** #41721: (sazaro) state.sysrc broken when setting the value to YES or NO (refs: #42269)
- **PR** #42269: (rallytime) Add some clarity to ``multiple quotes'' section of yaml docs @ *2017-07-17 17:38:18 UTC*
  - e588f235e0 Merge pull request #42269 from rallytime/fix-41721
  - f2250d474a Add a note about using different styles of quotes.
  - 38d9b3d553 Add some clarity to ``multiple quotes'' section of yaml docs
- **ISSUE** #42152: (dubb-b) salt-cloud errors on Rackspace driver using -out=yaml (refs: #42282)
- **PR** #42282: (rallytime) Handle libcloud objects that throw RepresenterErrors with --out=yaml @ *2017-07-17 17:36:35 UTC*
  - 5aaa214a75 Merge pull request #42282 from rallytime/fix-42152
  - f032223843 Handle libcloud objects that throw RepresenterErrors with --out=yaml
- **ISSUE** #42295: (lubyou) file.absent fails on windows if the file to be removed has the ``readonly'' attribute set (refs: #42308)
- **PR** #42308: (lubyou) Force file removal on Windows. Fixes #42295 @ *2017-07-17 17:12:13 UTC*
  - fb5697a4bc Merge pull request #42308 from lubyou/42295-fix-file-absent-windows
  - 026ccf401a Force file removal on Windows. Fixes #42295
- **ISSUE** #42267: (gzcwnk) salt-ssh not creating ssh keys automatically as per documentation (refs: #42314)
- **PR** #42314: (rallytime) Add clarification to salt ssh docs about key auto-generation. @ *2017-07-17 14:07:49 UTC*

  - da2a8a518f Merge pull request #42314 from rallytime/fix-42267
  - c406046940 Add clarification to salt ssh docs about key auto-generation.

- **ISSUE** #41936: (michaelkarrer81) git.latest identity does not set the correct user for the private key file on the minion (refs: #41945)
- **PR** #41945: (garethgreenaway) Fixes to modules/git.py @ *2017-07-14 17:46:10 UTC*
  - acadd54013 Merge pull request #41945 from garethgreenaway/41936_allow_identity_files_with_user
  - 44841e5626 Moving the call to cp.get_file inside the with block to ensure the umask is preserved when we grab the file.
  - f9ba60eed8 Merge pull request #1 from terminalmage/pr-41945
    * 1b6026177c Restrict set_umask to mkstemp call only
  - 68549f3496 Fixing umask to we can set files as executable.
  - 4949bf3ff3 Updating to swap on the new salt.utils.files.set_umask context_manager
  - 8faa9f6d92 Updating PR with requested changes.
  - 494765e939 Updating the git module to allow an identity file to be used when passing the user parameter
- **ISSUE** #42240: (casselt) empty_password in user.present always changes password, even with test=True (refs: #42289)
- **PR** #42289: (CorvinM) Multiple empty_password fixes for state.user @ *2017-07-14 16:14:02 UTC*
  - **PR** #41543: (cri-epita) Fix user creation with empty password (refs: #42289)
  - f90e04a2bc Merge pull request #42289 from CorvinM/bp-41543
  - 357dc22f05 Fix user creation with empty password
- **PR** #42123: (vutny) DOCS: describe importing custom util classes @ *2017-07-12 15:53:24 UTC*
  - a91a3f81b1 Merge pull request #42123 from vutny/fix-master-utils-import
  - 6bb8b8f98c Add missing doc for `utils_dirs` Minion config option
  - f1bc58f6d5 Utils: add example of module import
- **PR** #42261: (rallytime) Some minor doc fixes for dnsutil module so they'll render correctly @ *2017-07-11 23:14:53 UTC*
  - e2aa5114e4 Merge pull request #42261 from rallytime/minor-doc-fix
  - 8c76bbb53d Some minor doc fixes for dnsutil module so they'll render correctly
- **PR** #42262: (rallytime) Back-port #42224 to 2016.11 @ *2017-07-11 23:14:25 UTC*
  - **PR** #42224: (tdutrion) Remove duplicate instruction in Openstack Rackspace config example (refs: #42262)
  - 3e9dfbc9cc Merge pull request #42262 from rallytime/bp-42224
  - c31ded341c Remove duplicate instruction in Openstack Rackspace config example
- **ISSUE** #42137: (kiemlicz) cmd.run with multiple commands - random order of execution (refs: #42181)
- **PR** #42181: (garethgreenaway) fixes to state.py for names parameter @ *2017-07-11 21:21:32 UTC*
  - 7780579c36 Merge pull request #42181 from garethgreenaway/42137_backport_fix_from_2017_7
  - a34970b45b Back porting the fix for 2017.7 that ensures the order of the names parameter.
- **PR** #42253: (gtmanfred) Only use unassociated ips when unable to allocate @ *2017-07-11 20:53:51 UTC*

  - **PR** #38965: (toanju) salt-cloud will use list_floating_ips for OpenStack (refs: #42253)
  - **PR** #34280: (kevinanderson1) salt-cloud will use list_floating_ips for Openstack (refs: #38965)
  - 72537868a6 Merge pull request #42253 from gtmanfred/2016.11
  - 53e25760be Only use unassociated ips when unable to allocate
- **PR** #42252: (UtahDave) simple docstring updates @ *2017-07-11 20:48:33 UTC*
  - b2a4698b5d Merge pull request #42252 from UtahDave/2016.11local
  - e6a9563d47 simple doc updates
- **ISSUE** #42232: (astronouth7303) Half of dnsutil refers to dig (refs: #42235)
- **PR** #42235: (astronouth7303) Abolish references to *dig* in examples. @ *2017-07-10 20:06:11 UTC*
  - 781fe13be7 Merge pull request #42235 from astronouth7303/patch-1-2016.3
  - 4cb51bd03a Make note of dig partial requirement.
  - 08e7d8351a Abolish references to *dig* in examples.
- **PR** #42215: (twangboy) Add missing config to example @ *2017-07-07 20:18:44 UTC*
  - 83cbd76f16 Merge pull request #42215 from twangboy/win_iis_docs
  - c07e22041a Add missing config to example
- **PR** #42211: (terminalmage) Only pass a saltenv in orchestration if one was explicitly passed (2016.11) @ *2017-07-07 20:16:35 UTC*
  - 274946ab00 Merge pull request #42211 from terminalmage/issue40928
  - 22a18fa2ed Only pass a saltenv in orchestration if one was explicitly passed (2016.11)
- **PR** #42173: (rallytime) Back-port #37424 to 2016.11 @ *2017-07-07 16:39:59 UTC*
  - **PR** #37424: (kojiromike) Avoid Early Convert ret['comment'] to String (refs: #42173)
  - 89261cf06c Merge pull request #42173 from rallytime/bp-37424
  - 01addb6053 Avoid Early Convert ret['comment'] to String
- **ISSUE** #39365: (dglloyd) service.running fails if sysv script has no status command and enable: True (refs: #39366)
- **PR** #42175: (rallytime) Back-port #39366 to 2016.11 @ *2017-07-06 19:51:47 UTC*
  - **PR** #39366: (dglloyd) Pass sig to service.status in after_toggle (refs: #42175)
  - 3b17fb7f83 Merge pull request #42175 from rallytime/bp-39366
  - 53f7b987e8 Pass sig to service.status in after_toggle
- **PR** #42172: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2017-07-06 18:16:29 UTC*
  - ea16f47f0a Merge pull request #42172 from rallytime/merge-2016.11
  - b1fa332a11 Merge branch `2016.3' into `2016.11'
    * 8fa1fa5bb1 Merge pull request #42155 from phsteve/doc-fix-puppet
      · fb2cb78a31 Fix docs for puppet.plugin_sync so code-block renders properly and sync is spelled consistently
- **PR** #42176: (rallytime) Back-port #42109 to 2016.11 @ *2017-07-06 18:15:35 UTC*
  - **PR** #42109: (arthurlogilab) [doc] Update aws.rst - add Debian default username (refs: #42176)

  - 6307b9873f Merge pull request #42176 from rallytime/bp-42109
  - 686926daf7 Update aws.rst - add Debian default username
- **PR** #42095: (terminalmage) Add debug logging to dockerng.login @ *2017-07-06 17:13:05 UTC*
  - 28c4e4c3b7 Merge pull request #42095 from terminalmage/docker-login-debugging
  - bd27870a71 Add debug logging to dockerng.login
- **ISSUE** #42116: (terminalmage) CLI pillar override regression in 2017.7.0rc1 (refs: #42119)
- **PR** #42119: (terminalmage) Fix regression in CLI pillar override for salt-call @ *2017-07-06 17:02:52 UTC*
  - 2b754bc5af Merge pull request #42119 from terminalmage/issue42116
  - 9a268949e3 Add integration test for 42116
  - 1bb42bb609 Fix regression when CLI pillar override is used with salt-call
- **ISSUE** #42114: (clallen) saltenv bug in pillar.get execution module function (refs: #42121)
- **PR** #42121: (terminalmage) Fix pillar.get when saltenv is passed @ *2017-07-06 16:52:34 UTC*
  - 8c0a83cbb5 Merge pull request #42121 from terminalmage/issue42114
  - d14291267f Fix pillar.get when saltenv is passed
- **PR** #42094: (terminalmage) Prevent command from showing in exception when output_loglevel=quiet @ *2017-07-06 16:18:09 UTC*
  - 687992c240 Merge pull request #42094 from terminalmage/quiet-exception
  - 47d61f4edf Prevent command from showing in exception when output_loglevel=quiet
- **ISSUE** #42115: (nomeelnoj) Installing EPEL repo breaks salt-cloud (refs: #42163)
- **PR** #42163: (vutny) Fix #42115: parse libcloud ``rc'' version correctly @ *2017-07-06 16:15:07 UTC*
  - dad255160c Merge pull request #42163 from vutny/fix-42115
  - b27b1e340a Fix #42115: parse libcloud ``rc'' version correctly
- **PR** #42164: (Ch3LL) Fix kerberos create_keytab doc @ *2017-07-06 15:55:33 UTC*
  - 2a8ae2b3b6 Merge pull request #42164 from Ch3LL/fix_kerb_doc
  - 7c0fb248ec Fix kerberos create_keytab doc
- **PR** #42141: (rallytime) Back-port #42098 to 2016.11 @ *2017-07-06 15:11:49 UTC*
  - **PR** #42098: (twangboy) Change repo_ng to repo-ng (refs: #42141)
  - 678d4d4098 Merge pull request #42141 from rallytime/bp-42098
  - bd80243233 Change repo_ng to repo-ng
- **PR** #42140: (rallytime) Back-port #42097 to 2016.11 @ *2017-07-06 15:11:29 UTC*
  - **PR** #42097: (gtmanfred) require large timediff for ipv6 warning (refs: #42140)
  - c8afd7a3c9 Merge pull request #42140 from rallytime/bp-42097
  - 9c4e132540 Import datetime
  - 1435bf177e require large timediff for ipv6 warning
- **PR** #42142: (Ch3LL) Update builds available for rc1 @ *2017-07-05 21:11:56 UTC*
  - c239664c8b Merge pull request #42142 from Ch3LL/change_builds

  - e1694af39c Update builds available for rc1

- **PR** #42078: (damon-atkins) pkg.install and pkg.remove fix version number input. @ *2017-07-05 06:04:57 UTC*
  - 4780d7830a Merge pull request #42078 from damon-atkins/fix_convert_flt_str_version_on_cmd_line
  - 09d37dd892 Fix comment typo
  - 7167549425 Handle version=None when converted to a string it becomes `None' parm should default to empty string rather than None, it would fix better with existing code.
  - 4fb2bb1856 Fix typo
  - cf55c3361c pkg.install and pkg.remove on the command line take number version numbers, store them within a float. However version is a string, to support versions numbers like 1.3.4
- **PR** #42105: (Ch3LL) Update releasecanddiate doc with new 2017.7.0rc1 Release @ *2017-07-04 03:14:42 UTC*
  - 46d575acbc Merge pull request #42105 from Ch3LL/update_rc
  - d4e7b91608 Update releasecanddiate doc with new 2017.7.0rc1 Release
- **ISSUE** #41885: (astronouth7303) Recommended pip installation outdated? (refs: #42099)
- **PR** #42099: (rallytime) Remove references in docs to pip install salt-cloud @ *2017-07-03 22:13:44 UTC*
  - d38548bbbd Merge pull request #42099 from rallytime/fix-41885
  - c2822e05ad Remove references in docs to pip install salt-cloud
- **ISSUE** #42076: (abulford) dockerng.volume_present test looks as though it would cause a change (refs: #42086)
- **PR** #42086: (abulford) Make result=true if Docker volume already exists @ *2017-07-03 15:48:33 UTC*
  - 81d606a8cb Merge pull request #42086 from redmatter/fix-dockerng-volume-present-result
  - 8d549685a7 Make result=true if Docker volume already exists
- **ISSUE** #25842: (shikhartanwar) Running salt-minion as non-root user to execute sudo commands always returns an error (refs: #42021)
- **PR** #42021: (gtmanfred) Set concurrent to True when running states with sudo @ *2017-06-30 21:02:15 UTC*
  - 7160697123 Merge pull request #42021 from gtmanfred/2016.11
  - 26beb18aa5 Set concurrent to True when running states with sudo
- **PR** #42029: (terminalmage) Mock socket.getaddrinfo in unit.utils.network_test.NetworkTestCase.test_host_to_ips @ *2017-06-30 20:58:56 UTC*
  - b784fbbdf8 Merge pull request #42029 from terminalmage/host_to_ips
  - 26f848e111 Mock socket.getaddrinfo in unit.utils.network_test.NetworkTestCase.test_host_to_ips
- **PR** #42055: (dmurphy18) Upgrade support for gnupg v2.1 and higher @ *2017-06-30 20:54:02 UTC*
  - e067020b9b Merge pull request #42055 from dmurphy18/handle_gnupgv21
  - e20cea6350 Upgrade support for gnupg v2.1 and higher
- **PR** #42048: (Ch3LL) Add initial 2016.11.7 Release Notes @ *2017-06-30 16:00:05 UTC*
  - 74ba2abc48 Merge pull request #42048 from Ch3LL/add_11.7
  - 1de5e008a0 Add initial 2016.11.7 Release Notes
- **PR** #42024: (leeclemens) doc: Specify versionadded for SELinux policy install/uninstall @ *2017-06-29 23:29:50 UTC*

  - ca4e619edb Merge pull request #42024 from leeclemens/doc/selinux
  - b63a3c0fae doc: Specify versionadded for SELinux policy install/uninstall
  - **PR** saltstack/salt#41961: (cachedout) Allow docs to be built under Python 3 (refs: #42028)
- **PR** #42030: (whiteinge) Re-add msgpack to mocked imports @ *2017-06-29 20:47:59 UTC*
  - **PR** #42028: (whiteinge) Revert ``Allow docs to be built under Python 3'' (refs: #42030)
  - 50856d0e28 Merge pull request #42030 from whiteinge/revert-py3-doc-chagnes-pt-2
  - 18dfa9893c Re-add msgpack to mocked imports
  - **PR** saltstack/salt#41961: (cachedout) Allow docs to be built under Python 3 (refs: #42028)
- **PR** #42028: (whiteinge) Revert ``Allow docs to be built under Python 3'' (refs: #42030) @ *2017-06-29 19:47:46 UTC*
  - 53031d2f55 Merge pull request #42028 from saltstack/revert-41961-py3_doc
  - 5592e6e5d4 Revert ``Allow docs to be built under Python 3''
- **ISSUE** #42013: (dusto) Misspelled nozeroconf in salt/modules/rh_ip.py (refs: #42017)
- **PR** #42017: (lorengordon) Fixes typo ``nozerconf'' -> ``nozeroconf'' @ *2017-06-29 17:30:48 UTC*
  - 1416bf70b9 Merge pull request #42017 from lorengordon/issue-42013
  - b6cf5f2528 Fixes typo nozerconf -> nozeroconf
- **PR** #41906: (terminalmage) Better support for numeric saltenvs @ *2017-06-29 17:19:33 UTC*
  - 0ebb50b601 Merge pull request #41906 from terminalmage/numeric-saltenv
  - 2d798de982 Better support for numeric saltenvs
- **PR** #41995: (terminalmage) Temporarily set the umask before writing an auth token @ *2017-06-29 01:09:48 UTC*
  - 6a3c03c2d5 Merge pull request #41995 from terminalmage/token-umask
  - 4f54b0069f Temporarily set the umask before writing an auth token
- **PR** #41999: (terminalmage) Update IP address for unit.utils.network_test.NetworkTestCase.test_host_to_ips @ *2017-06-29 01:01:31 UTC*
  - e3801b0e78 Merge pull request #41999 from terminalmage/fix-network-test
  - fb6a93314f Update IP address for unit.utils.network_test.NetworkTestCase.test_host_to_ips
- **ISSUE** #18659: (whiteinge) mod_aggregate not working for list-form configuration (refs: #41991)
- **PR** #41991: (Da-Juan) Accept a list for state_aggregate global setting @ *2017-06-29 00:58:59 UTC*
  - a7f38929cb Merge pull request #41991 from Da-Juan/fix-state_aggregate-list
  - c9075b8f84 Accept a list for state_aggregate setting
- **PR** #41993: (UtahDave) change out salt support link to SaltConf link @ *2017-06-29 00:55:20 UTC*
  - 7424f879a3 Merge pull request #41993 from UtahDave/2016.11local
  - bff050ad52 change out salt support link to SaltConf link
- **PR** #41987: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2017-06-28 20:19:11 UTC*
  - 3b9ccf09d7 Merge pull request #41987 from rallytime/merge-2016.11
  - 48867c4a82 Merge branch `2016.3' into `2016.11'

        * c589eae03f Merge pull request #41981 from Ch3LL/11.6_3
        * 2516ae1349 [2016.3] Bump latest release version to 2016.11.6

- **PR** #41985: (rallytime) Back-port #41780 to 2016.11 @ *2017-06-28 20:18:57 UTC*
  - **PR** #41780: (ferringb) Fix salt.util.render_jinja_tmpl usage for when not used in an environmnet (refs: #41985)
  - 768339d734 Merge pull request #41985 from rallytime/bp-41780
  - 8f8d3a473a Fix salt.util.render_jinja_tmpl usage for when not used in an environment.
- **ISSUE** #34963: (craigafinch) Incorrect behavior or documentation for comments in salt.states.pkgrepo.managed (refs: #41820)
- **PR** #41986: (rallytime) Back-port #41820 to 2016.11 @ *2017-06-28 20:18:43 UTC*
  - **PR** #41820: (nhavens) Fix yum repo file comments to work as documented in pkgrepo.managed (refs: #41986)
  - bd9090c0bf Merge pull request #41986 from rallytime/bp-41820
  - 72320e35b9 Fix yum repo file comments to work as documented in pkgrepo.managed
- **PR** #41973: (vutny) Fix Master/Minion scheduled jobs based on Cron expressions (refs: #42077) @ *2017-06-28 16:39:02 UTC*
  - a31da52635 Merge pull request #41973 from vutny/fix-croniter-scheduled-jobs
  - 148788e652 Fix Master/Minion scheduled jobs based on Cron expressions
- **PR** #41980: (Ch3LL) [2016.11] Bump latest release version to 2016.11.6 @ *2017-06-28 15:35:11 UTC*
  - 689ff93349 Merge pull request #41980 from Ch3LL/11.6_11
  - fe4f5711d5 [2016.11] Bump latest release version to 2016.11.6
- **PR** #41961: (cachedout) Allow docs to be built under Python 3 @ *2017-06-27 21:11:54 UTC*
  - 82b1eb28ab Merge pull request #41961 from cachedout/py3_doc
  - 7aacddf6ef Allow docs to be built under Python 3
- **PR** #41948: (davidjb) Fix Composer state's *name* docs; formatting @ *2017-06-27 17:51:29 UTC*
  - **PR** #41933: (davidjb) Fix Composer state's *name* docs and improve formatting (refs: #41948)
  - f0eb51df17 Merge pull request #41948 from davidjb/patch-9
  - 0e4b3d9a42 Fix Composer state's *name* docs; formatting
- **PR** #41914: (vutny) archive.extracted: fix hash sum verification for local archives @ *2017-06-26 17:59:27 UTC*
  - e28e10ded2 Merge pull request #41914 from vutny/fix-archive-extracted-local-file-hash
  - 54910fe55f archive.extracted: fix hash sum verification for local archives

  - 6f70dbd0e1 Add pycryptodome to crypt_test
- **PR** #41877: (Ch3LL) Fix netstat and routes test @ *2017-06-21 16:16:58 UTC*
  - 13df29ed9b Merge pull request #41877 from Ch3LL/fix_netstat_test
  - d2076a6c93 Patch salt.utils.which for test_route test
  - 51f7e107dc Patch salt.utils.which for test_netstat test
- **ISSUE** #41367: (lubyou) certutil.add_store does not work on non english windows versions or on Windows 10 (localised or English) (refs: #41566)
- **PR** #41566: (morganwillcock) win_certutil: workaround for reading serial numbers with non-English languages @ *2017-06-21 15:40:29 UTC*
  - 66f8c83c93 Merge pull request #41566 from morganwillcock/certutil
  - c337d52d0c Fix test data for test_get_serial, and a typo
  - 7f6961378e test and lint fixes
  - 8ee48432f4 Suppress output of crypt context and be more specifc with whitespace vs. serial
  - 61f817d172 Match serials based on output position (fix for non-English languages)
- **PR** #41679: (terminalmage) Prevent unnecessary duplicate pillar compilation @ *2017-06-21 15:32:42 UTC*
  - 4d0f5c433d Merge pull request #41679 from terminalmage/get-top-file-envs
  - a916e8da49 Improve normalization of saltenv/pillarenv usage for states
  - 02f293a19c Update state unit tests to reflect recent changes
  - b7e5c11165 Don't compile pillar data when getting top file envs
  - 8d6fdb7c9a Don't compile pillar twice for salt-call
  - d2abfbf4ed Add initial_pillar argument to salt.state
  - 70186de532 salt.pillar: rename the ``pillar'' argument to ``pillar_override''
- **ISSUE** #39668: (mirceaulinic) Master scheduled job not recorded on the event bus (refs: #41658)
- **ISSUE** #12653: (pengyao) salt schedule doesn't return jobs result info to master (refs: #41853)
- **PR** #41853: (vutny) Fix master side scheduled jobs to return events @ *2017-06-20 22:06:29 UTC*

- **PR** #41695: (xiaoanyunfei) fix max RecursionError, Ellipsis (refs: #41853)
- **PR** #41658: (garethgreenaway) Fixes to the salt scheduler (refs: #41853)
- 29b0acc3a2 Merge pull request #41853 from vutny/fix-master-schedule-event
- e206c381c6 Fix master side scheduled jobs to return events

25.2.21 Salt 2016.11.9 Release Notes

Version 2016.11.9 is a bugfix release for *2016.11.0*.

Windows Changes

pkg Execution Module`

Significate changes (PR #43708 & #45390, damon-atkins) have been made to the pkg execution module. Users should test this release against their existing package sls definition files.

- *pkg.list_available* no longer defaults to refreshing the winrepo meta database.
- *pkg.install* without a `version` parameter no longer upgrades software if the software is already installed. Use `pkg.install version=latest` (or simply use a *pkg.latest* state to get the old behavior.
- *pkg.list_pkgs* now returns multiple versions if software installed more than once.
- *pkg.list_pkgs* now returns `Not Found` when the version is not found instead of `(value not set)` which matches the contents of the sls definitions.
- *pkg.remove* will wait up to 3 seconds (normally about a second) to detect changes in the registry after removing software, improving reporting of version changes.
- *pkg.remove* can remove `latest` software, if `latest` is defined in sls definition.
- Documentation was update for the execution module to match the style in new versions, some corrections as well.
- All install/remove commands are prefix with cmd.exe shell and cmdmod is called with a command line string instead of a list. Some sls files in saltstack/salt-winrepo-ng expected the commands to be prefixed with cmd.exe (i.e. the use of &).
- Some execution module functions results, now behave more like their Unix/Linux versions.

cmd Execution Module

Due to a difference in how Python's `subprocess.Popen()` spawns processes on Windows, passing the command as a list of arguments can result in problems. This is because Windows' *CreateProcess* requires the command to be passed as a single string. Therefore, `subprocess` will attempt to re-assemble the list of arguments into as string. Some escaped characters and quotes can cause the resulting string to be incorrectly-assembled, resulting in a failure to execute the command.

Salt now deals with these cases by joining the list of arguments correctly and ensuring that the command is passed to `subprocess.Popen()` as a string.

Changelog for v2016.11.8..v2016.11.9

Generated at: 2018-05-27 20:28:05 UTC

  - 529bc0c680 update release number for salt-call man page 2016.11.9
  - 11b7222148 Update man pages for 2016.11.9
- **PR** #45532: (gtmanfred) fix mock for opensuse @ *2018-01-18 22:48:30 UTC*
  - 654df0f526 Merge pull request #45532 from gtmanfred/2016.11.9
  - 6c26025664 fix mock for opensuse
- **PR** #45518: (gtmanfred) fix last 2016.11.9 failing tests @ *2018-01-18 12:03:50 UTC*
  - 571c33aa39 Merge pull request #45518 from gtmanfred/2016.11.9
  - 5455d2dee6 fix centos 6 pip test
  - 40255194b0 fix fedora pkg test
- **ISSUE** #45394: (dmurphy18) git.latest fails when ``depth'' is used with a non-default branch (refs: #45399)
- **PR** #45443: (rallytime) Back-port #45399 to 2016.11.9 @ *2018-01-17 14:53:58 UTC*
  - **PR** #45399: (terminalmage) Fix git.latest failure when rev is not the default branch (refs: #45443)
  - 4e0a0eec1f Merge pull request #45443 from rallytime/bp-45399-2016.11.9
  - 919e92c911 Fix git.latest failure when rev is not the default branch
- **ISSUE** #45432: (TheBigBear) winrepo-ng fault pkg.refresh_db doesn't work - it processes ANY stray .git metadata *.sls files present on minion (refs: #45493)

- **PR** #45493: (damon-atkins) win_pkg: pkg.refresh_db report an issue if a sls pkg definition does not contain a dict instead of aborting @ *2018-01-17 14:52:03 UTC*
  - ebd4db66b8 Merge pull request #45493 from damon-atkins/2016.11_fix_sls_defintion_wrong_type
  - af108440df win_pkg lint space after ,
  - c6e922a236 win_pkg lint issues
  - f4627d7a80 fix quote i.e. change ` to `
  - 6938a4c099 pkg.refresh_db report an issue if a sls pkg definition id not a dict instead of aborting.
- **PR** #45446: (rallytime) Back-port #45390 to 2016.11.9 @ *2018-01-16 20:08:38 UTC*
  - **PR** #45390: (damon-atkins) win_pkg: fix pkg.remove, pkg.list_pkgs (refs: #45446)
  - 7322efba92 Merge pull request #45446 from rallytime/bp-45390
  - 69f045ea24 lint too-many-blank-lines
  - 10a7501ede Update release notes
  - 6f2affe01c fix pkg.remove, pkg.list_pkgs
- **PR** #45424: (twangboy) Fix some issues with reg.py @ *2018-01-13 19:34:47 UTC*
  - b0ece9f4d4 Merge pull request #45424 from twangboy/win_reg
  - 30f06205f7 Fix some issues with reg.py
- **PR** #45327: (lomeroe) Backport #44861 to 2016.11 @ *2018-01-08 21:10:41 UTC*
  - **PR** #44861: (twangboy) Fix win_lgpo for unknown values (refs: #45327)
  - 0959ae4ea3 Merge pull request #45327 from lomeroe/bp-44861_2016.11
  - 784139f734 Check for values other than 0 or 1
- **PR** #45268: (damon-atkins) Fix pkg.install packagename version=latest i.e. if on an old version is installed @ *2018-01-08 17:34:15 UTC*
  - a6db5f95f0 Merge pull request #45268 from damon-atkins/2016.11_win_pkg_pkg_install_latest
  - 325a9f0f66 Update 2016.11.9.rst
  - 4da9200b9c Update 2016.11.9.rst
  - 126aee36ac Update 2016.11.9.rst
  - 1c01967943 Update 2016.11.9.rst
  - a0d89882b8 Fix pkg.install packagename version=latest i.e. if on an old version upgrade to the latest
- **PR** #45256: (rallytime) Back-port #45034 to 2016.11 @ *2018-01-04 14:25:42 UTC*
  - **PR** #45034: (brejoc) Fix for pidfile removal logging (refs: #45256)
  - 1c5e905b61 Merge pull request #45256 from rallytime/bp-45034
  - 68f971b38f Apply test fixes from #45034 to parsers_test.py
  - 9454236694 Fix for pidfile removal logging
- **ISSUE** saltstack/salt-jenkins#598: (rallytime) [oxygen] CentOS 7 is failing ~ 20 tests in the integration.ssh.test_state.SSHStateTest (refs: #45209)
- **PR** #45235: (rallytime) Back-port #45209 to 2016.11 @ *2018-01-02 20:20:15 UTC*
  - **PR** #45209: (gtmanfred) enable UsePAM for ssh tests (refs: #45235)

  - b75f50afe3 Merge pull request #45235 from rallytime/bp-45209
  - 2d0a9bbf7e enable UsePAM for ssh tests
- **PR** #44965: (gtmanfred) check if VALUE is a string_type @ *2018-01-02 16:42:39 UTC*
  - 3ab962b01a Merge pull request #44965 from gtmanfred/2016.11
  - a5d8a6340e check if VALUE is a string_type
- **ISSUE** #27160: (martinadolfi) salt.states.mount persistence error using spaces in route (refs: #45232)
- **PR** #45232: (rasathus) Backport #27160 to 2016.11 @ *2018-01-02 15:48:22 UTC*
  - 40fb30f63f Merge pull request #45232 from rasathus/2016.11
  - 7a2bd8f49b Merge branch `2016.11' into 2016.11
- **ISSUE** #44516: (doesitblend) Windows PY3 Minion Returns UTF16 UnicodeError (refs: #44944, #45161)
- **PR** #45161: (lomeroe) Backport #44944 to 2016.11 @ *2017-12-30 13:19:35 UTC*
  - **PR** #44944: (lomeroe) win_lgpo registry.pol encoding updates (refs: #45161)
  - 707ef55175 Merge pull request #45161 from lomeroe/bp-44944_2016.11
  - 0a4c6b5a83 remove references to six.unichr
  - f3196d795d lint fixes for static regexes
  - 11b637d108 lint fixes
  - c14d6282ad do not decode registry.pol file wholesale, but instead decode individual elements of the file
- **ISSUE** #45188: (jak3kaj) salt state status.process always returns false (refs: #45199)
- **PR** #45199: (gtmanfred) status.pid returns pid ids not process names @ *2017-12-28 19:06:11 UTC*
  - 6f52034e08 Merge pull request #45199 from gtmanfred/status
  - fb07f9ea7d status.pid returns pid ids not process names
- **ISSUE** #44728: (casselt) Nodegroups can not be defined by glob with ? or seq (refs: #45118)
- **PR** #45118: (garethgreenaway) [2016.11] Fix to allow nodegroups to include sequences @ *2017-12-27 18:49:10 UTC*
  - d3381e27d0 Merge pull request #45118 from garethgreenaway/44728_nodegroups_seq
  - 0ff811de70 Swapping import to be the old path for 2016.11
  - b3e2f388f5 Fix to allow nodegroups to include sequences
- **PR** #45127: (twangboy) Fix issue with 1641 return code @ *2017-12-22 15:18:28 UTC*
  - f969aca3a3 Merge pull request #45127 from twangboy/win_fix_pkg
  - 14639739f2 Fix issue with 1641 return code
- **PR** #45137: (twangboy) Catch correct error type in list_keys and list_values @ *2017-12-22 14:45:22 UTC*
  - dc357b39f0 Merge pull request #45137 from twangboy/win_fix_reg_tests
  - b6f4ef8d73 Catch correct error type in list_keys and list_values
- **PR** #45130: (rallytime) Resolve groups for salt api @ *2017-12-21 20:38:32 UTC*
  - 0aa1662731 Merge pull request #45130 from rallytime/api-groups
  - 2dcc8df845 Resolve groups for salt api

- **PR** #45114: (twangboy) Move pam library load to try/except block @ *2017-12-21 14:37:17 UTC*
  - 7dc3cc4641 Merge pull request #45114 from twangboy/win_fix_pam
  - cf5eae1f77 Move pam library load to try/except block
- **ISSUE** #45049: (vernondcole) salt cloud module documentation is missing from the index. (refs: #45070)
- **PR** #45100: (rallytime) Back-port #45070 to 2016.11 @ *2017-12-20 14:55:01 UTC*
  - **PR** #45070: (vernondcole) insert clouds modules in index (refs: #45100)
  - 7e128e8f15 Merge pull request #45100 from rallytime/bp-45070
  - 0bdb46dab9 add clouds modules to index
- **PR** #45098: (rallytime) Back-port #45092 to 2016.11 @ *2017-12-20 14:40:51 UTC*
  - **PR** #45092: (terminalmage) Fix integration.states.test_pip.PipStateTest.test_pip_installed_weird_install (refs: #45098)
  - bdf93f339d Merge pull request #45098 from rallytime/bp-45092
  - 80b6bd6813 Fix integration.states.test_pip.PipStateTest.test_pip_installed_weird_install
- **ISSUE** #41044: (pirxthepilot) user.present `date' parameter is not applying (refs: #44078)
- **PR** #44078: (rossengeorgiev) user.present: allow date param to be 0 @ *2017-12-19 15:59:29 UTC*
  - 324b7d4058 Merge pull request #44078 from rossengeorgiev/fix-41044
  - a81a6fe23c fix #41044; allow for date param to be 0
- **PR** #44970: (rallytime) Update bootstrap script to latest release: 2017.12.13 @ *2017-12-19 15:49:05 UTC*
  - 48a59761df Merge pull request #44970 from rallytime/update-bootstrap-script
  - b2c8057427 Update bootstrap script to latest release: 2017.12.13
- **ISSUE** #45036: (dijit) Quiet installation of packaged minions fails due to redistributable not being quietly installed [py3] [Windows] (refs: #45040)
- **PR** #45069: (rallytime) Back-port #45040 to 2016.11 @ *2017-12-19 14:25:57 UTC*
  - **PR** #45040: (dijit) Installation Fails on headless machines. (refs: #45069)
  - 637fdaed58 Merge pull request #45069 from rallytime/bp-45040
  - aa438e1605 Installation Fails on headless machines.
    - de53c45c29 Backport #27160 to 2016.11
- **ISSUE** #41286: (arthtux) boto_vpc.accept_vpc_peering_connection wait a object (refs: #41305)
- **PR** #44969: (rallytime) Back-port #41305 to 2016.11 @ *2017-12-15 17:22:18 UTC*
  - **PR** #41305: (arthtux) correct accept_vpc_peering_connection (refs: #44969)
  - 4d6d640381 Merge pull request #44969 from rallytime/bp-41305
  - 5c4bee43dc correct accept_vpc_peering_connection
- **PR** #45031: (terminalmage) Fix invalid exception class in mysql returner @ *2017-12-15 15:00:15 UTC*
  - 10de468f13 Merge pull request #45031 from terminalmage/fix-mysql-returner
  - f3bd12c27c Fix invalid exception class in mysql returner
- **ISSUE** #44820: (msteed) Custom returner breaks manage runner (refs: #44958)
- **PR** #44972: (terminalmage) Backport #44958 to 2016.11 branch @ *2017-12-14 16:56:02 UTC*

  - **PR** #44958: (terminalmage) Fix a race condition in manage runner (refs: #44972)
  - 9a7406207f Merge pull request #44972 from terminalmage/bp-44958
  - a416bf0112 No need to manually do connect_pub, use listen=True in run_job
  - 3ec004bd2e Fix a race condition in manage runner
- **ISSUE** #44378: (llua) minion: infinite loop during start when schedule key is null (refs: #44385)
- **PR** #44385: (gtmanfred) schedule should be a dict in opts @ *2017-12-12 20:44:02 UTC*
  - 1032ca3290 Merge pull request #44385 from gtmanfred/schedule
  - 9e15c38da2 add comma
  - 855d933cb7 schedule should be a dict
- **ISSUE** #44734: (cruscio) Documentation inconsistency for minion ping_interval timing (refs: #44770)
- **PR** #44770: (cruscio) Fix minion ping_interval documentation @ *2017-12-11 19:50:19 UTC*
  - 68d901b12c Merge pull request #44770 from cruscio/2016.11
  - e2682bf441 Fix minion ping_interval documentation
- **ISSUE** #44292: (andrew-regan) grains['virtual_subtype'] assignment for Docker broken on Mac (refs: #44335)
- **PR** #44335: (gtmanfred) add docker-ce to docker subtype grains check @ *2017-12-10 17:17:49 UTC*
  - d4ab55ec47 Merge pull request #44335 from gtmanfred/2016.11
  - 3f1268d67f fix patching for python 2.6
  - 1d0bd5bb32 Merge branch `2016.11' into 2016.11
  - f02b02032d Merge pull request #4 from terminalmage/pr-44335
    * b4eb1527a6 Add test for PR 44335
  - a30af3252e add docker-ce to docker subtype grains check
- **ISSUE** #44530: (roaldnefs) Identifier not working in salt.states.cron when special is used (refs: #44579)
- **PR** #44579: (roaldnefs) Fix bug in cron module and state - Fixes #44530 @ *2017-12-07 20:18:27 UTC*
  - bb1f8dceaf Merge pull request #44579 from roaldnefs/fix-cron-identifier
  - df73a4c051 Merge branch `2016.11' into fix-cron-identifier
- **PR** #44852: (damon-atkins) win_pkg fix spelling typos and minion option 2016.11 @ *2017-12-06 16:49:17 UTC*
  - af0131fa1f Merge pull request #44852 from damon-atkins/2016.11_win_pkg_typo_n_fix
  - 0e7c19084f Lint: Remove extra whitespace
  - 7c7e21f94d Fix spelling typo, and fix backwards campatible minion option for repo location
- **ISSUE** #44365: (icycle77) file.managed appears to ignore source_hash check (refs: #44794)
- **PR** #44794: (terminalmage) Fix regression in file.managed when source_hash used with local file @ *2017-12-04 14:23:29 UTC*
  - 88c0d66b4e Merge pull request #44794 from terminalmage/issue44365
  - 3b8b6f25e6 Remove debugging line
  - 153bf45b03 Fix regression in file.managed when source_hash used with local file
- **ISSUE** #35777: (rallytime) Properly deprecate template context data in Fluorine (refs: #44738)

- **ISSUE** #35523: (rallytime) Come up with a reasonable alternative for lxc.edited_conf (refs: #44738)
- **PR** #44738: (rallytime) Bump some deprecation warnings from Oxygen to Fluorine @ *2017-12-01 23:10:08 UTC*
  - c8bb9dfbbb Merge pull request #44738 from rallytime/bump-oxygen-warnings
  - ead3c569e1 Bump deprecation warnings from Oxygen to Fluorine
- **ISSUE** #44730: (msciciel) State network.routes could not add route without gateway on centos7 (refs: #44741)
- **PR** #44741: (gtmanfred) if gateway is not specified use iface @ *2017-12-01 23:09:03 UTC*
  - 88e3aab00d Merge pull request #44741 from gtmanfred/rhip
  - 439dc8dce6 if gateway is not specified use iface
- **ISSUE** #31405: (SEJeff) Salt leaves tmp file when file.managed dest file is immutable (refs: #44699)
- **PR** #44699: (jfindlay) utils/files.py remove temp file upon move failure @ *2017-12-01 15:03:54 UTC*
  - 97e0cf569c Merge pull request #44699 from jfindlay/attr_file
  - 9e5a40ea7c Merge branch `2016.11' into attr_file
  - 5c34607f6c utils/files remove temp file upon move failure
- **ISSUE** #44556: (doesitblend) --static option doesn't return highstate output (refs: #44714)
- **PR** #44714: (rallytime) Allow --static option to display state runs with highstate output @ *2017-12-01 14:31:19 UTC*
  - 7434e0afdf Merge pull request #44714 from rallytime/fix-44556
  - 1bbe1abeb2 Allow --static option to display state runs with highstate output
- **PR** #44517: (whytewolf) Publish port doc missing @ *2017-11-28 21:50:19 UTC*
  - 998d714ee7 Merge pull request #44517 from whytewolf/publish_port_doc_missing
  - 4b5855283a missed one place where i didnt chanbge master_port from my copy to publish_port
  - e4610baea5 update doc to have publish port
- **PR** #41279: (Ch3LL) Add fqdn and dns core grain tests @ *2017-11-27 21:28:10 UTC*
  - 6169b52749 Merge pull request #41279 from Ch3LL/add_grain_tests
  - 1b64f15692 Merge branch `2016.11' into add_grain_tests
  - 095f1b7d7a Merge branch `2016.11' into add_grain_tests
  - 9ea4db4224 mock socket.getaddrinfo
  - 78a07e30f4 add more fqdn tests and remove some of the mocking
  - 5dbf4144ce add ipv6 in opts
  - eabc1b4f9c Add fqdn and dns core grain tests
    - 3ec4329307 Merge branch `2016.11' into fix-cron-identifier
- **ISSUE** #44544: (creideiki) pgjsonb returner sets wrong timezone on timestamps in database when using Python 2 (refs: #44563)
- **PR** #44563: (creideiki) Send Unix timestamps to database in pgjsonb returner @ *2017-11-21 17:44:32 UTC*
  - dc6de050a9 Merge pull request #44563 from creideiki/pgjsonb-timestamps-44544
  - 231e412ca4 Merge branch `2016.11' into pgjsonb-timestamps-44544

- **ISSUE** #44601: (rallytime) CherryPy 12.0 removed support for ``engine.timeout_monitor.on'' config option (refs: #44602)
- **PR** #44602: (rallytime) Handle timeout_monitor attribute error for new versions of CherryPy @ *2017-11-20 21:38:40 UTC*
  - 4369df020b Merge pull request #44602 from rallytime/fix-44601
  - ff303fd060 Handle timeout_monitor/TimeoutError issues for new versions of CherryPy
- **PR** #44604: (lorengordon) Documents the exclude argument in state execution module @ *2017-11-20 18:19:18 UTC*
  - 4a4756fc37 Merge pull request #44604 from lorengordon/doc-exclude
  - c4a6c40eb3 Documents the exclude argument in state execution module
  - 15c445e6b9 Send Unix timestamps to database in pgjsonb
    * 99fa05a456 Fix for bug in cron state
    * 97328faeac Fix for bug in cron module
- **PR** #44434: (whytewolf) add a note that describes grain rebuilding on restart and refresh @ *2017-11-14 11:21:54 UTC*
  - 91d46d4cfc Merge pull request #44434 from whytewolf/1837
  - d148e39dda change from md to rst for code reference
  - 955e305bda fix bad english, as requested by cachedout
  - 7256fcc1c9 update note to take into account grains_cache
  - 7a2981585e Merge branch `2016.11' into 1837
  - aca0405b26 add a note that describes grain rebuilding on restart and refresh
- **ISSUE** #41474: (dmaziuk) state.file.* line endings (refs: #44321)
- **PR** #44321: (gvengel) Fix file.line diff formatting. @ *2017-11-13 19:36:39 UTC*
  - a3bd99317f Merge pull request #44321 from gvengel/fix-file-line-diff-output
  - 69a50204a6 Add newline for lint.
  - ef7b6bbb81 Fixed issue with file.line on Windows running Python 2.
  - 8f89c99fa5 Fix FileModuleTest setUp and tearDown to work on Windows.
  - 3ac5391f5f Namespace missing functions for file.line on Windows.
  - b2b8f075b9 Fixed test to work on Windows.
  - 5a5a2dd026 Added integration test for issue #41474
  - 24d7315f1a Fix file.line diff formatting.
- **ISSUE** #43417: (damon-atkins) win_pkg: pkg.install and pkg.remove general issues (refs: #43708)
- **PR** #43708: (damon-atkins) Merge Ready : Backport develop win_pkg to 2016.11 with additional bug fixes @ *2017-11-13 19:33:41 UTC*
  - 9ca563718d Merge pull request #43708 from damon-atkins/2016.11_43417_Backport_and_Fixes
  - 04d03ea6b8 Updated comment
  - 1dd565e585 Merge remote branch `upstream/2016.11' into 2016.11_43417_Backport_and_Fixes
  - dd48ba2616 Merge remote branch `upstream/2016.11' into 2016.11_43417_Backport_and_Fixes

  - a0d08598bf dco fix
  - 9467899fc6 Merge remote branch `upstream/2016.11' into 2016.11_43417_Backport_and_Fixes
  - 6dc180fd0e doco fixes
  - 2496a42ea4 lint fix
  - 2c937fbe19 Merge remote branch `upstream/2016.11' into 2016.11_43417_Backport_and_Fixes
  - c9c8c48a4d all remove/install commands are passed to cmd.exe /s /c and commands are passed as strings to cmdmod
  - 350244bd93 typo in comments and doc strings.
  - ec31f5a9bd 2017.11/develop version() was ignoring saltenv setting.
  - b314549a32 Backport of devlop to 2016.11 with additional bug fixes
- **ISSUE** #44423: (mtkennerly) The win_path.exists state cannot prepend to the very start of the PATH (refs: #44424)
- **PR** #44477: (rallytime) Back-port #44424 to 2016.11 @ *2017-11-13 17:33:29 UTC*
  - **PR** #44424: (mtkennerly) Fix #44423: Handle index=None and index=0 distinctly in the win_path.exists state (refs: #44477)
  - 68ea22188e Merge pull request #44477 from rallytime/bp-44424
  - 4a9f8dcc96 Fix #44423: Handle index=None and index=0 distinctly
- **ISSUE** #44034: (seanjnkns) salt-call pillar overrides broken in 2016.11.8 and 2017.7.2 (refs: #44483)
- **PR** #44483: (terminalmage) salt-call: account for instances where __pillar__ is empty @ *2017-11-13 17:30:36 UTC*
  - 2c89050a24 Merge pull request #44483 from terminalmage/issue44034
  - a9db8becea salt-call: account for instances where __pillar__ is empty
- **PR** #44489: (whytewolf) update log-granular-levels to describe what they are filtering on @ *2017-11-13 17:27:37 UTC*
  - b5c2028680 Merge pull request #44489 from whytewolf/1956_log-granular-levels
  - 9cdeb4e903 update log-granular-levels to describe what they are filtering on
- **PR** #44193: (twangboy) Fix reg.py for use with LGPO module @ *2017-11-10 19:01:17 UTC*
  - ea07f9c54c Merge pull request #44193 from twangboy/win_fix_reg
  - 44d6d9f46d Remove unused import (lint)
  - f7502436bd Fix various issues
  - 221e6e3b91 make salt.utils.to_unicode return none when passed none
  - ce41acc788 Fix many issues with reg.py
  - 4a19df1f7f Use six.text_type instead of str
  - 1b12acd303 Check type before casting
  - 03fa37b445 Cast vdata to it's proper type
- **PR** #43863: (nicholasmhughes) Atomicfile only copies mode and not user/group perms @ *2017-11-10 18:47:55 UTC*
  - ed8da2450b Merge pull request #43863 from nicholasmhughes/fix-atomicfile-permission-copy

  - ea852ec5d3 remove index use with stat module attributes
  - dbeeb0e917 fixes #38452 atomicfile only copies mode and not user/group perms
- **ISSUE** #39901: (seanjnkns) network.managed ipaddrs ignored (refs: #44260)
- **PR** #44260: (seanjnkns) Fixes #39901 for RH/CentOS 7 @ *2017-11-07 23:14:59 UTC*
  - a66cd67d15 Merge pull request #44260 from seanjnkns/issue-39901
  - ed8cccf457 #39901: Fix pylint
  - 43c81dfdee #39901: Add unit tests
  - 613d500876 Merge branch `2016.11' into issue-39901
  - b97e8046ca Utilize salt.utils.validate.net.* and _raise_error_iface
  - 6818f3631d Fixes #39901 for RH/CentOS 7
- **PR** #44383: (gtmanfred) switch salt-jenkins over to saltstack for kitchen-salt tests @ *2017-11-03 19:56:48 UTC*
  - 5e289f42ba Merge pull request #44383 from gtmanfred/2016kitchen
  - b65f4ea4ea switch salt-jenkins over to saltstack
- **PR** #44173: (twangboy) Use google style docstrings in win_system.py @ *2017-10-31 17:56:34 UTC*
  - cab54e34b5 Merge pull request #44173 from twangboy/win_system_docs
  - 8e111b413d Fix some of the wording and grammer errors
  - a12bc5ae41 Use google style docstrings
- **PR** #44304: (jfindlay) states.cron identifier defaults to name @ *2017-10-31 16:39:47 UTC*
  - 7aaea1d179 Merge pull request #44304 from jfindlay/cron_id
  - cc038c5bec states.cron identifier defaults to name
- **ISSUE** #44313: (rossengeorgiev) salt-ssh: --user option missing from the cli documentation (refs: #44322)
- **PR** #44322: (rossengeorgiev) updated CLI docs for salt-ssh @ *2017-10-30 21:39:23 UTC*
  - e4dbbde734 Merge pull request #44322 from rossengeorgiev/saltssh-docs-update
  - b18f2e5a6d fix program name and description for --static
  - 5b10918f02 updated CLI docs for salt-ssh
- **PR** #44345: (gtmanfred) remove binding from erb template rendering @ *2017-10-30 20:57:43 UTC*
  - 4e6f09e3eb Merge pull request #44345 from gtmanfred/2016kitchen
  - 79b8b2d0bf remove binding
- **PR** #44342: (gtmanfred) render template files platforms.yml and driver.yml @ *2017-10-30 20:04:00 UTC*
  - 209847c8c2 Merge pull request #44342 from gtmanfred/2016kitchen
  - c50508f0b7 render template files platforms.yml and driver.yml
- **ISSUE** #44336: (corywright) Docs for archive.tar should not use leading dash for tar options (refs: #44339)
- **PR** #44339: (corywright) Remove leading dash from options in archive.tar docs (2016.11) @ *2017-10-30 19:00:34 UTC*
  - 1be65224cb Merge pull request #44339 from corywright/issue-44336-fix-archive-tar-docs-2016-11
  - 9c1c35a59f Remove leading dash (-) from options in archive.tar documentation

- **ISSUE** #44272: (gurubert) [patch] win_service.stop() fails (refs: #44295)
- **PR** #44295: (gurubert) fixes issue #44272 @ *2017-10-27 14:28:57 UTC*
  - bebc33daf5 Merge pull request #44295 from HeinleinSupport/issue44272
  - f972715a45 fixes issue #44272
- **PR** #44286: (gtmanfred) use our git repo for kitchen-salt @ *2017-10-25 19:27:32 UTC*
  - e7ca9f8407 Merge pull request #44286 from gtmanfred/2016.11
  - 193e715e37 use our git repo for kitchen-salt
- **PR** #44259: (gtmanfred) begin switching in kitchen-salt for running the test suite @ *2017-10-25 13:30:35 UTC*
  - 8a1ea165af Merge pull request #44259 from gtmanfred/2016.11
  - 56a3ad8f68 fix pylint comments
  - 4add666db1 add comment to Gemfile and move copyartifacts
  - b4c8f7eb57 fix pylint
  - 392fd4f837 try newest salttesting
  - 79251287d0 add logging
  - 38963d5a82 use transport if not set in state_file
  - 10e309a64f which vagrant should go to stderr
  - 9307564de0 fix output columns
  - 2da22f87e1 test opennebula
  - 9f38f16905 add opennebula to Gemfile
  - 7465f9b27a add script for copying back artifacts
  - 255118cfd7 run tests with kitchen
- **PR** #44268: (twangboy) Fix typo @ *2017-10-25 13:01:35 UTC*
  - 9d6bc8509b Merge pull request #44268 from twangboy/win_fix_lgpo_typo
  - a6a4c10a77 Fix typo
- **PR** #44269: (terminalmage) Fix log message in salt.utils.gitfs @ *2017-10-25 13:00:58 UTC*
  - 0beb65a283 Merge pull request #44269 from terminalmage/fix-log-message
  - bc9cd65496 Fix log message in salt.utils.gitfs
- **ISSUE** #44155: (rhoths) file.directory with clean not triggering listener in test mode (refs: #44160)
- **PR** #44160: (gtmanfred) add changes to test return @ *2017-10-23 14:35:21 UTC*
  - 304dd2529d Merge pull request #44160 from gtmanfred/directory
  - a7d3d668f4 missed removing changes in the next test
  - ac0b5ec440 fix test
  - d3d00c3e62 add changes to test return
- **PR** #44205: (rallytime) Back-port #44177 to 2016.11 @ *2017-10-23 14:09:07 UTC*
  - **PR** #44177: (senthilkumar-e) Fixing default redis.host in documentation (refs: #44205)
  - e10395483d Merge pull request #44205 from rallytime/bp-44177

  - b9940f8521 Fixing default redis.host in documentation

- **ISSUE** #44140: (vtolstov) incorrect network interfaces settings with network.managed under debian jessie (refs: #44167)
- **PR** #44167: (garethgreenaway) Fixes to modules/debian_ip @ *2017-10-20 14:25:39 UTC*
  - 09ddfd0c08 Merge pull request #44167 from garethgreenaway/44140_debian_ip_fixes
  - 5f7555846f When looping through the various pre, post, up and down commands put them into the interface dict using the right internet family variable.
- **PR** #43830: (rallytime) Back-port #43644 to 2016.11 @ *2017-10-19 22:57:51 UTC*
  - **PR** #43644: (defanator) Several fixes for RDS DB parameter group management (refs: #43830)
  - 9f9e936b52 Merge pull request #43830 from rallytime/bp-43644
  - 12845ae802 Several fixes for RDS DB parameter group management
- **ISSUE** #43936: (oeuftete) manage.present still reports *lost* minion (refs: #43994)
- **ISSUE** #38367: (tyeapple) logic error in connected_ids function of salt/utils/minions.py when using include_localhost=True (refs: #43994)
- **PR** #43994: (oeuftete) Fix manage.present to show lost minions @ *2017-10-19 22:27:59 UTC*
  - 07db6a3d8b Merge pull request #43994 from oeuftete/fix-manage-runner-presence
  - f3980d7d83 Fix manage.present to show lost minions
- **ISSUE** #44150: (rossengeorgiev) version param in pkg.installed broken in 2016.11.8/2017.7.2 in EL6-7 (refs: #44188)
- **PR** #44188: (terminalmage) yumpkg: Check pkgname instead of name to see if it is a kernel pkg @ *2017-10-19 22:20:35 UTC*
  - a07537e258 Merge pull request #44188 from terminalmage/issue44150
  - 0692f442db yumpkg: Check pkgname instead of name to see if it is a kernel pkg
- **ISSUE** #43427: (tylerjones4508) Salt-Cloud There was a profile error: invalid literal for int() with base 10: (refs: #44089)

  - **PR** #44029: (msummers42) addresses issue #43307, disk.format_ to disk.format (refs: #44131)
  - 0cd493b691 Merge pull request #44131 from rallytime/bp-44029
  - bebf301976 fixed test addressing issue #43307, disk.format_ to disk.format
  - b4ba7ae2fc addresses issue #43307, disk.format_ to disk.format
- **ISSUE** #44087: (mfussenegger) Using state.highstate with *terse=true* prevents useful error output (refs: #44093)
- **PR** #44093: (gtmanfred) don't filter if return is not a dict @ *2017-10-16 19:13:19 UTC*

  - 3a68e356f8 Merge pull request #44093 from gtmanfred/fix-44087
  - 5455c5053b fix pylint
  - f749cafa25 don't filter if return is not a dict
- **PR** #44122: (cachedout) Add note about GPG signing to PR template @ *2017-10-16 19:09:38 UTC*
  - c785d7a847 Merge pull request #44122 from cachedout/gpg_pr_template
  - e41e3d76be Typo fix
  - 37c7980880 Add note about GPG signing to PR template
- **PR** #44124: (rallytime) [2016.11] Merge forward from 2016.11.8 to 2016.11 @ *2017-10-16 19:07:14 UTC*
  - bf90ea1f51 Merge pull request #44124 from rallytime/merge-2016.11
  - 59861291c8 Merge branch `2016.11.8' into `2016.11'
    * 57623e2abe Merge pull request #44028 from rallytime/bp-44011
      · 89e084bda3 Do not allow IDs with null bytes in decoded payloads
      · 206ae23f15 Don't allow path separators in minion ID
- **PR** #44097: (gtmanfred) OpenNebula does not require the template_id to be specified @ *2017-10-16 18:36:17 UTC*
  - 13f3ffa83a Merge pull request #44097 from gtmanfred/openneb
  - c29655b2c2 Merge branch `2016.11' into openneb
  - bd2490b149 OpenNebula does not require the template_id to be specified
- **PR** #44110: (roaldnefs) Format fix code example local returner doc @ *2017-10-16 15:57:50 UTC*
  - ac3e4df964 Merge pull request #44110 from roaldnefs/fix-doc-local-returner
  - efd58f7594 Merge branch `2016.11' into fix-doc-local-returner
- **PR** #44092: (techhat) Made sure that unicoded data is sent to sha256() @ *2017-10-13 21:20:12 UTC*
  - c960ca32c2 Merge pull request #44092 from techhat/awsunicode
  - bbd9db4d00 One more encoding
  - 0e8b325667 Apparently __salt_system_encoding__ is a thing
  - 1e7211838d Use system encoding
  - 1af21bbe5e Made sure that unicoded data is sent to sha256()
- **ISSUE** #43581: (jcourington) cherrypy stats issue (refs: #44021)
- **PR** #44021: (whiteinge) Also catch cpstats AttributeError for bad CherryPy release ~5.6.0 @ *2017-10-12 18:11:41 UTC*
  - **PR** #42655: (whiteinge) Reenable cpstats for rest_cherrypy (refs: #44021)
  - **PR** #33806: (cachedout) Work around upstream cherrypy bug (refs: #42655)
  - d89c317d96 Merge pull request #44021 from whiteinge/cpstats-attribute-error
  - bf14e5f578 Also catch cpstats AttributeError for bad CherryPy release ~5.6.0
- **PR** #44025: (dayid) Typo correction of lover to lower @ *2017-10-11 17:31:45 UTC*
  - bbdabe242a Merge pull request #44025 from dayid/lover_typo
  - 385980c21a Merge branch `2016.11' of https://github.com/saltstack/salt into lover_typo

  - 266dc00a23 Typo correction of lover to lower

- **PR** #44030: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ *2017-10-11 13:01:42 UTC*
  - d8f3891a5e Merge pull request #44030 from rallytime/merge-2016.11
  - 53eaf0d75c Merge branch `2016.3' into `2016.11'
  - 64fd839377 Merge pull request #44010 from Ch3LL/2016.3.7_follow_up
    * 9a00302cd8 fix 2016.3.7 release notes merge conflict
    * 63da1214db Do not allow IDs with null bytes in decoded payloads
    * ee792581fc Don't allow path separators in minion ID
    * 8aab65c718 fix 2016.3.7 release notes merge conflict
  - bd73dcb02c Merge pull request #43977 from Ch3LL/3.8_sec
  - 5fb3f5f6b1 Add Security Notes to 2016.3.8 Release Notes
- **PR** #44011: (Ch3LL) Security Fixes for 2016.11.8 (refs: #44028) @ *2017-10-10 20:04:36 UTC*
  - 0dbf41e79e Merge pull request #44011 from Ch3LL/2016.11.7_follow_up
  - c0149101c0 Do not allow IDs with null bytes in decoded payloads
  - 19481423dd Don't allow path separators in minion ID
- **PR** #44023: (Ch3LL) Add 2016.11.9 Release Note File @ *2017-10-10 20:03:03 UTC*
  - d61300df20 Merge pull request #44023 from Ch3LL/11.9rn
  - 7f9015eb41 Add 2016.11.9 Release Note File
- **PR** #44019: (benediktwerner) Added missing docs to the tutorial index and fixed spelling mistake @ *2017-10-10 19:57:06 UTC*
  - 9ff53bf63a Merge pull request #44019 from benediktwerner/2016.11
  - bc53598027 Fixed spelling mistake in salt_bootstrap tutorial
  - 6c30344824 Added missing tutorial docs to the tutorial index
- **PR** #43955: (meaksh) Enable a new `--with-salt-version' parameter for the ``setup.py'' script @ *2017-10-10 17:36:52 UTC*
  - 364523f5f8 Merge pull request #43955 from meaksh/2016.11-fix-2291
  - a81b78381b Merge branch `2016.11' into 2016.11-fix-2291
  - 44bc91bb98 Enable `--with-salt-version' parameter for setup.py script
- **ISSUE** #43945: (bobrik) kmod.present doesn't work with compiled-in modules (refs: #43962)
- **PR** #43962: (bobrik) Report built-in modiles in kmod.available, fixes #43945 @ *2017-10-10 16:31:39 UTC*
  - fec714b91d Merge pull request #43962 from bobrik/kmod-built-in
  - 95ab901553 Report built-in modiles in kmod.available, fixes #43945
- **PR** #43960: (cro) Require that bindpw be non-empty when auth.ldap.anonymous is False @ *2017-10-09 23:09:02 UTC*
  - e434c39c4e Merge pull request #43960 from cro/ldap_nopw_bind2
  - 962a20cf4b Require that bindpw be non-empty if auth.ldap.anonymous=False
  - 9df3d91d8f Release notes blurb for change to bindpw requirements

- **PR** #43991: (Ch3LL) Add Security Notes to 2016.3.8 Release Notes @ *2017-10-09 22:00:25 UTC*
  - e9dfda2177 Merge pull request #43991 from Ch3LL/3.8_sec_2
  - 1977df8462 Add Security Notes to 2016.3.8 Release Notes
- **ISSUE** #42947: (rossengeorgiev) Zenoss state changes production state even when test=true (refs: #43968)
- **PR** #43968: (rossengeorgiev) fix zenoss state module not respecting test=true @ *2017-10-09 21:27:31 UTC*
  - 2346d2691e Merge pull request #43968 from rossengeorgiev/fix-zenoss-prod_state
  - e6d31c1ea6 fix zenoss state module not respecting test=true
- **PR** #43776: (Ch3LL) [2016.11] Bump latest and previous versions @ *2017-10-09 17:22:15 UTC*
  - 8d56a5ac45 Merge pull request #43776 from Ch3LL/2016.11.8_docs
  - f72bc00000 [2016.11] Bump latest and previous versions
- **PR** #43976: (Ch3LL) Add Security Notes to 2016.11.8 Release Notes @ *2017-10-09 17:20:54 UTC*
  - 21bf71c3f5 Merge pull request #43976 from Ch3LL/11.8_sec
  - f0c3184288 Add Security Notes to 2016.11.8 Release Notes
- **PR** #43973: (terminalmage) Fix grains.has_value when value is False @ *2017-10-09 14:59:20 UTC*
  - 1d5397ab5b Merge pull request #43973 from terminalmage/fix-grains.has_value
  - bf45ae6e6a Fix grains.has_value when value is False
- **PR** #43888: (rallytime) Back-port #43841 to 2016.11 @ *2017-10-05 20:09:58 UTC*
  - **PR** #43841: (austinpapp) add -n with netstat so we don't resolve IPs (refs: #43888)
  - 9ac3f2ea7b Merge pull request #43888 from rallytime/bp-43841
  - 87d676f08a add -n with netstat so we don't resolve
- **PR** #43916: (dereckson) Fix typo in salt-cloud scaleway documentation @ *2017-10-05 18:58:00 UTC*
  - f880ac4c08 Merge pull request #43916 from dereckson/fix-typo-cloud-scaleway
  - 15b8b8a9f4 Fix typo in salt-cloud scaleway documentation
- **PR** #43884: (UtahDave) Update SaltConf banner per Rhett's request @ *2017-10-04 13:08:30 UTC*
  - 2ab7549d48 Merge pull request #43884 from UtahDave/2016.11local
  - e3b2857285 Merge branch `2016.11' into 2016.11local
- **PR** #43869: (terminalmage) Only join cmd if it's not a string @ *2017-10-03 16:25:07 UTC*
  - 4b882d4272 Merge pull request #43869 from terminalmage/issue43522
  - fe28b0d4fb Only join cmd if it's not a string
  - 8c671fd0c1 Update SaltConf banner per Rhett's request
- **ISSUE** #43373: (rgcosma) use keyword breaks sls_id (refs: #43707)
- **PR** #43707: (terminalmage) Add missing support for use/use_in requisites to state.sls_id @ *2017-10-01 14:07:53 UTC*
  - a2161efda3 Merge pull request #43707 from terminalmage/issue43373
  - 3ebde1895f Merge branch `2016.11' into issue43373
  - e580ed4caa Merge branch `2016.11' into issue43373

  - 5b3be6e8af Fix failing unit test
  - f73764481b Add missing support for use/use_in requisites to state.sls_id
- **PR** #43807: (terminalmage) cmdmod: Don't list-ify string commands on Windows @ *2017-09-29 02:48:36 UTC*
  - 85b3aa332a Merge pull request #43807 from terminalmage/issue43522
  - d8708bf698 cmdmod: Don't list-ify string commands on Windows
- **PR** #43768: (vutny) Fix Pylint deprecated option warnings @ *2017-09-28 12:27:36 UTC*
  - ea8d273c2b Merge pull request #43768 from vutny/fix-pylint-deprecation-warnings
  - f8b3fa9da1 Merge branch `2016.11' into fix-pylint-deprecation-warnings
- **ISSUE** #40311: (cralston0) --hide-timeout used with --output json --static produces unparseable JSON (refs: #43772)
- **PR** #43772: (gtmanfred) dont print Minion not responding with quiet @ *2017-09-27 15:39:18 UTC*
  - 1a8cc60bb4 Merge pull request #43772 from gtmanfred/2016.11
  - 0194c60960 dont print Minion not responding with quiet
- **PR** #43747: (rallytime) Add GPG Verification section to Contributing Docs @ *2017-09-26 21:25:37 UTC*
  - 9dee896fb9 Merge pull request #43747 from rallytime/gpg-verification
  - 7a70de19f4 Merge branch `2016.11' into gpg-verification
- **ISSUE** #43729: (The-Loeki) Docker events engine broken on newer docker.py (refs: #43733)
- **PR** #43733: (terminalmage) Allow docker_events engine to work with newer docker-py @ *2017-09-26 16:47:40 UTC*
  - 1cc3ad1c8d Merge pull request #43733 from terminalmage/issue43729
  - 6e5c99bda0 Allow docker_events engine to work with newer docker-py
- **ISSUE** #42082: (stamak) [salt.utils.gitfs][CRITICAL] Invalid gitfs configuration parameter `saltenv' in remote git+ssh://git@ourgitserver/ourgitrepo.git. (refs: #43458)
- **PR** #43458: (terminalmage) Fix missing PER_REMOTE_ONLY in cache.clear_git_lock runner @ *2017-09-26 14:39:01 UTC*
  - 5d38be4ff7 Merge pull request #43458 from terminalmage/issue42082
  - 5f90812b12 Fix missing PER_REMOTE_ONLY in cache.clear_git_lock runner
    * 23bb4a5dde Add GPG Verification section to Contributing Docs
- **ISSUE** #43650: (rallytime) Review contributing documentation and the merge-forward process (refs: #43727)
- **ISSUE** #42706: (blarghmatey) Parallel Cache Failure (refs: #43018)
- **PR** #43727: (rallytime) Revise ``Contributing'' docs: merge-forwards/release branches explained! @ *2017-09-26 12:43:16 UTC*
  - **PR** #43018: (jubrad) Update state.py (refs: #43727)
  - 023a563657 Merge pull request #43727 from rallytime/fix-43650
  - babad12d83 Revise ``Contributing'' docs: merge-forwards/release branches explained!
- **PR** #43648: (rallytime) Handle VPC/Subnet ID not found errors in boto_vpc module @ *2017-09-22 17:40:43 UTC*
  - f46c858f25 Merge pull request #43648 from rallytime/handle-boto-vpc-errors

    - 54842b5012 Handle VPC/Subnet ID not found errors in boto_vpc module
        * 651ed16ad3 Fix Pylint deprecated option warnings
- **PR** #43575: (akissa) Fix CSR not recreated if key changes @ *2017-09-21 17:52:01 UTC*
    - 9dba34aa06 Merge pull request #43575 from akissa/fix-csr-not-recreated-if-key-changes
    - b1b4dafd39 Fix CSR not recreated if key changes
- **ISSUE** #42165: (arount) top_file_merging_strategy: merge does not works (refs: #43415)
- **PR** #43672: (rallytime) Back-port #43415 to 2016.11 @ *2017-09-21 16:38:56 UTC*
    - **PR** #43415: (mattLLVW) Fix env_order in state.py (refs: #43672)
    - 1d4fa48209 Merge pull request #43672 from rallytime/bp-43415
    - 3fb42bc238 Fix env_order in state.py
- **PR** #43673: (rallytime) Back-port #43652 to 2016.11 @ *2017-09-21 16:37:36 UTC*
    - **PR** #43652: (VertigoRay) Salt Repo has Deb 9 and 8 (refs: #43673)
    - ff832ee607 Merge pull request #43673 from rallytime/bp-43652
    - d91c47c6f0 Salt Repo has Deb 9 and 8
- **PR** #43677: (terminalmage) Fix RST headers for runners (2016.11 branch) @ *2017-09-21 16:35:57 UTC*
    - 365cb9fba8 Merge pull request #43677 from terminalmage/runners-docs-2016.11
    - 2fd88e94fa Fix RST headers for runners (2016.11 branch)
- **PR** #43534: (twangboy) Fixes removal of double-quotes by shlex_split in winrepo for 2016.11 @ *2017-09-21 14:39:42 UTC*
    - be38239e5d Merge pull request #43534 from twangboy/win_fix_pkg.install_2016.11
    - 1546c1ca04 Add posix=False to call to salt.utils.shlex_split
    - **PR** #43663: (moio) multiprocessing minion option: documentation fixes (develop) (refs: #43661)
- **PR** #43661: (moio) multiprocessing minion option: documentation fixes (2016.11) @ *2017-09-21 13:02:27 UTC*
    - 0d3fd3d374 Merge pull request #43661 from moio/2016.11-multiprocessing-doc-fix
    - 625eabb83f multiprocessing minion option: documentation fixes
- **PR** #43646: (brejoc) Added tests for pid-file deletion in DaemonMixIn @ *2017-09-20 19:21:54 UTC*
    - 6b4516c025 Merge pull request #43646 from brejoc/2016.11.4-pidfile-tests
    - 96f39a420b Fixed linting
    - 08fba98735 Fixed several issues with the test
    - 3a089e450f Added tests for pid-file deletion in DaemonMixIn
- **PR** #43591: (rallytime) [2016.11] Merge forward from 2016.11.8 to 2016.11 @ *2017-09-19 16:18:34 UTC*
    - cfb1625741 Merge pull request #43591 from rallytime/merge-2016.11
    - 57b9d642c2 Merge branch `2016.11.8' into `2016.11'
        * e83421694f Merge pull request #43550 from twangboy/osx_fix_preinstall_2016.11.8
        * 1b0a4d39d2 Fix logic in */etc/paths.d/salt* detection
- **PR** #43572: (vutny) cloud.action: list_nodes_min returns all EC2 instances @ *2017-09-18 20:36:44 UTC*

  - 8671b91f62 Merge pull request #43572 from vutny/fix-salt-cloud-list-min-instance-set
  - 21966e7ce8 cloud.action: list_nodes_min returns all instances
- **PR** #43461: (twangboy) Add */norestart* switch to vcredist install @ *2017-09-12 20:33:46 UTC*
  - f2b86fa2db Merge pull request #43461 from twangboy/win_norestart
  - 2d269d1a76 Change all comment markers to `#'
  - d80aea16cb Handle ErrorCodes returned by VCRedist installer
  - fb31e9a530 Add /norestart switch to vcredist install
- **ISSUE** #43267: (brejoc) OSError - Can't delete PIDfile when not root (refs: #43366)
- **PR** #43366: (brejoc) Catching error when PIDfile cannot be deleted @ *2017-09-12 15:31:16 UTC*
  - 90e8ca9c36 Merge pull request #43366 from brejoc/2016.11.pidfile-fix
  - 6e3eb76c79 Removed unused format argument
  - daf4948b3d Catching error when PIDfile cannot be deleted
- **ISSUE** #43386: (rajvidhimar) Scheduler's job_kwargs not working as expected. (refs: #43442)
- **PR** #43442: (garethgreenaway) [2016.11] Fixes to scheduler __pub values in kwargs @ *2017-09-12 15:16:20 UTC*
  - a6c458607a Merge pull request #43442 from garethgreenaway/43386_2016_11_schedule_kwargs_pub
  - e637ecbe86 Merge branch `2016.11' into 43386_2016_11_schedule_kwargs_pub
  - 6114df8dc3 Adding a small check to ensure we do not continue to populate kwargs with __pub_ items from the kwargs item.
- **ISSUE** #43223: (rallytime) Properly deprecate describe_route_table function in boto_vpc module (refs: #43445)
- **PR** #43456: (rallytime) Add Neon to version list @ *2017-09-12 15:00:27 UTC*
  - **PR** #43445: (rallytime) Bump deprecation warning for boto_vpc.describe_route_table (refs: #43456)
  - 3c429299f9 Merge pull request #43456 from rallytime/43445_follow_up
  - 35c1d8898d Add Neon to version list
- **PR** #43441: (meaksh) Use $HOME to get the user home directory instead using `~' char @ *2017-09-11 21:25:20 UTC*
  - 6db7a721c0 Merge pull request #43441 from meaksh/2016.11-salt-bash-completion-fix
  - be4f26ab21 Use $HOME to get the user home directory instead using `~' char
- **ISSUE** #43223: (rallytime) Properly deprecate describe_route_table function in boto_vpc module (refs: #43445)
- **PR** #43445: (rallytime) Bump deprecation warning for boto_vpc.describe_route_table (refs: #43456) @ *2017-09-11 21:23:28 UTC*
  - 05fff44a50 Merge pull request #43445 from rallytime/bump-deprecation-warning
  - c91cd1c6d9 Bump deprecation warning for boto_vpc.describe_route_table
- **PR** #43432: (rallytime) Back-port #43419 to 2016.11 @ *2017-09-11 17:36:37 UTC*
  - **PR** #43419: (gtmanfred) make cache dirs when spm starts (refs: #43432)
  - c57dc5f0e3 Merge pull request #43432 from rallytime/bp-43419
  - c471a29527 make cache dirs when spm starts
- **ISSUE** #43387: (aogier) genesis.bootstrap debootstrap fails if no qemu specified (refs: #43390)

- **PR** #43390: (aogier) better qemu_static parameter mangle in deboostrap management, tests @ *2017-09-11 13:18:30 UTC*
  - 57cccd75d0 Merge pull request #43390 from aogier/43387-genesis-qemu
  - 496f14a7e7 forgot to mock the proper one
  - 51c7a1ba00 only check if static_qemu is_executable()
  - 70642e495d better qemu_static parameter mangle in deboostrap management, tests
- **ISSUE** #43338: (LEMNX) virtualenv never-download (refs: #43356)
- **PR** #43356: (gtmanfred) never-download got readded @ *2017-09-07 17:46:05 UTC*
  - 6106aec696 Merge pull request #43356 from gtmanfred/2016.11
  - 3f19b247f3 Add handler.messages back in for test comparison
  - 9911b04208 fix test
  - 3c6ae99a77 never-download got readded
- **PR** #43325: (doesitblend) mine_interval option is minutes not seconds @ *2017-09-07 16:58:11 UTC*
  - e638fac54e Merge pull request #43325 from doesitblend/salt-mine-doc-fix
  - 1e94d0ac3a Lint: Remove trailing whitespace
  - 51af8f8757 Fix mine_interval phrasing in default file
  - ba0cdd4536 Fix phrasing for mine_interval description
  - 9ff03c2d43 Update Salt Mine documentation to show that the mine_interval option is configured in minutes.
- **ISSUE** #43086: (aogier) pylint: Instance of `tuple' has no `extend' member (no-member) (refs: #43105)
- **PR** #43105: (aogier) groupadd module: string does not have attribute `extend', plus homogeneous *cmd* parm building @ *2017-09-06 15:49:44 UTC*
  - fc587f784a Merge pull request #43105 from aogier/43086-no-member
  - 5111cf8bad Merge branch `2016.11' into 43086-no-member
- **PR** #43333: (damon-atkins) Docs are wrong cache_dir (bool) and cache_file (str) cannot be passed as params + 1 bug @ *2017-09-06 14:21:35 UTC*
  - d97a680372 Merge pull request #43333 from damon-atkins/2016.11
  - 92de2bb498 Update doco
  - fc9c61d12e Update win_pkg.py
  - c91fc14704 Merge branch `2016.11' into 2016.11
  - cb3af2bbbd Docs are wrong cache_dir (bool) and cache_file (str) cannot be passed on the cli (#2)
- **ISSUE** #43295: (V3XATI0N) salt.cache.redis_cache does not actually work. (refs: #43329)
- **PR** #43361: (rallytime) Back-port #43329 to 2016.11 @ *2017-09-05 23:23:01 UTC*
  - **PR** #43329: (johnj) Fix #43295, better handling of consul initialization (refs: #43361)
  - 0c986f5eba Merge pull request #43361 from rallytime/bp-43329
  - b09e5b4379 Fix #43295, better handling of consul initialization issues
- **ISSUE** #35840: (junovitch) preserve_minion_cache is broken in 2016.3+ (refs: #42903)

- **PR** #42903: (junovitch) Fix `preserve_minion_cache: True' functionality (fixes #35840) @ *2017-09-05 22:57:14 UTC*
  - 22287439e6 Merge pull request #42903 from junovitch/issue-35840-fix-preserve-minion-cache-2016.11
  - c9d4fdbd45 Merge branch `2016.11' into issue-35840-fix-preserve-minion-cache-2016.11
  - 93a68e32a5 Merge branch `2016.11' into issue-35840-fix-preserve-minion-cache-2016.11
  - 079f097985 Fix `preserve_minion_cache: True' functionality (fixes #35840)
- **PR** #43360: (terminalmage) Fix failing tests in Fedora @ *2017-09-05 22:23:13 UTC*
  - 4860e10757 Merge pull request #43360 from terminalmage/sj-496
  - 433bca14b1 Fix KeyError in yumpkg configparser code on Python 3
  - f6c16935d8 Move --showduplicates before repository-packages
- **PR** #43244: (rallytime) Update release branch section with a few more details @ *2017-09-05 20:27:59 UTC*

25.2.22 Salt 2016.3.0 Release Notes - Codename Boron

Known Issues

Warning: Some Salt Masters may need to apply a patch for Default Job Cache to prevent a possible crash

An issue exists that prevents the Salt master from cleaning the default job cache. This issue can cause an overconsumption of resources resulting in a crash. 2016.3.0 Salt masters should apply the patch in PR #33555. This issue will be addressed in 2016.3.1.

- issue #33516: When upgrading from 2015.8.10 to 2016.3.0 on centos7/redhat7 salt-minion must be restarted twice.
- issue #33517: SPM does not work on amazon linux 2015 in 2016.3.0.

Backwards-incompatible Changes

- The default path for the *extension_modules* master config option has been changed. Prior to this release, the location was a directory named `extmods` in the Salt cachedir. On most platforms, this would put the *extension_modules* directory in `/var/cache/salt/extmods`. It has been moved one directory down, into the master cachedir. On most platforms, this is `/var/cache/salt/master/extmods`. Most users won't have to worry about this, but those who have been manually placing custom runners into `/var/cache/salt/extmods/runners`, or outputters into `/var/cache/salt/extmods/output`, etc. will be affected by this. To transition, it is recommended not to simply move the extmods directory into `/var/cache/salt/master`, but to copy the custom modules into the salt fileserver under `salt://_runners`, `salt://_output`, etc. and sync them using the functions in the new *saltutil runner*.
- The `pkg.check_db` function has been removed for yum/dnf.

Core Changes

- The `onchanges` requisite now fires if **any** watched state changes. issue #19592.
- The `ext_pillar` functions **must** now accept a minion ID as the first argument. This stops the deprecation path started in Salt 0.17.x. Before this minion ID first argument was introduced, the minion ID could be retrieved accessing `__opts__['id']` losing the reference to the master ID initially set in opts. This is no longer the case, `__opts__['id']` will be kept as the master ID.
- Custom types can now be synced to the master using the new *saltutil runner*. Before, these needed to manually be placed under the *extension_modules* directory. This allows custom modules to easily be synced to the master to make them available when compiling Pillar data. Just place custom runners into `salt://_runners`, custom outputters into `salt://_output`, etc. and use the functions from the *saltutil runner* to sync them.

- The `client_acl` configuration options were renamed to `publisher_acl`.
- Added a new `--config-dump` option (issue #26639).
- TCP Transport presence events were updated to work with a NAT (PR #30629).
- A *`minion_pillar_cache`* setting was added to save rendered pillar data to cachedir for later use when file_client is set to local (PR #30428).
- Added the ability for binary data (such as a license key) to be distributed via pillar using the *`file.managed`* (issue #9569).
- Scheduled jobs now include `success` and `retcode` (issue #24237).
- The `saltversioninfo` grain was changed from a string to a list to enable reading values by index. (PR #30082).
- A *`pillar_merge_lists`* option was added to enable recursively merging pillar lists by aggregating them instead of replacing them (PR #30062).
- Grain values reported by Debian 8 (jessie) when lsb-release is installed were updated for consistency (PR #28649).
- A new option for minions called master_tries has been added. This specifies the number of times a minion should attempt to contact a master to attempt a connection. This allows better handling of occasional master downtime in a multi-master topology.
- The default directory for deploying the salt-thin tarball has changed for salt-ssh. It is now /var/tmp instead of /tmp. Users may also wish to delete any directories in /tmp ending with *_salt/*. (issue #32771)

External Module Packaging

Modules may now be packaged via entry-points in setuptools. See *external module packaging* tutorial for more information.

Cloud Changes

- Refactored the OpenNebula driver and added numerous `--function` and `--action` commands to enhance Salt support for image, template, security group, virtual network and virtual machine management in OpenNebula.
- Added execution/state modules to support the deployment of AWS cognito identity pools (PR #31094).
- Added ability to set tags and listener policies on a AWS ELB (PR #27552).

Platform Changes

- Renamed modules related to macOS. The following module filenames were changed. The virtual name remained unchanged.
- PR ##30558: renamed osxdesktop.py to mac_desktop.py
- PR ##30557: renamed macports.py to mac_ports.py
- PR ##30556: renamed darwin_sysctl.py to mac_sysctl.py
- PR ##30555: renamed brew.py to mac_brew.py
- PR ##30552: renamed darwin_pkgutil.py to mac_pkgutil.py

Package Support

- Ubuntu Xenial: Packages for Ubuntu Xenial (16.04) are available for 2016.3.0 and onwards. See repo.saltstack.com for more information. Note that Xenial comes with Debian's packaged version of Salt 2015.8.8 and official repo.saltstack.com packages are available for 2015.8 releases beginning with Salt 2015.8.11.

Proxy Minion Changes

The deprecated config option `enumerate_proxy_minions` has been removed.

As mentioned in earlier documentation, the `add_proxymodule_to_opts` configuration variable defaults to `False` in this release. This means if you have proxymodules or other code looking in `__opts__['proxymodule']` you will need to set this variable in your `/etc/salt/proxy` file, or modify your code to use the *__proxy__* injected variable.

The `__proxyenabled__` directive now only applies to grains and proxy modules themselves. Standard execution modules and state modules are not prevented from loading for proxy minions.

Support has been added to Salt's loader allowing custom proxymodules to be placed in `salt://_proxy`. Proxy minions that need these modules will need to be restarted to pick up any changes. A corresponding utility function, `saltutil.sync_proxymodules`, has been added to sync these modules to minions.

Enhancements in grains processing have made the `__proxyenabled__` directive somewhat redundant in dynamic grains code. It is still required, but best practices for the `__virtual__` function in grains files have changed. It is now recommended that the `__virtual__` functions check to make sure they are being loaded for the correct proxytype, example below:

```
def __virtual__():
    '''
    Only work on proxy
    '''
    try:
        if salt.utils.is_proxy() and \
           __opts__['proxy']['proxytype'] == 'ssh_sample':
            return __virtualname__
    except KeyError:
        pass

    return False
```

The try/except block above exists because grains are processed very early in the proxy minion startup process, sometimes earlier than the proxy key in the `__opts__` dictionary is populated.

Grains are loaded so early in startup that no dunder dictionaries are present, so `__proxy__`, `__salt__`, etc. are not available. Custom grains located in `/srv/salt/_grains` and in the salt install grains directory can now take a single argument, `proxy`, that is identical to `__proxy__`. This enables patterns like

```
def get_ip(proxy):
    '''
    Ask the remote device what IP it has
    '''
    return {'ip':proxy['proxymodulename.get_ip']()}
```

Then the grain `ip` will contain the result of calling the `get_ip()` function in the proxymodule called `proxymodulename`.

Proxy modules now benefit from including a function called `initialized()`. This function should return `True` if the proxy's `init()` function has been successfully called. This is needed to make grains processing easier.

Finally, if there is a function called `grains` in the proxymodule, it will be executed on proxy-minion startup and its contents will be merged with the rest of the proxy's grains. Since older proxy-minions might have used other methods to call such a function and add its results to grains, this is config-gated by a new proxy configuration option called `proxy_merge_grains_in_module`. This defaults to `False` in this release. It will default to True in the release after next. The next release is codenamed **Carbon**, the following is **Nitrogen**.

The example proxy minions `rest_sample` and `ssh_sample` have been updated to reflect these changes.

Syndic Updates

A major performance and management issue was found and fixed in the syndic. This makes the Salt Syndic substantially more reliable and performant. Please make sure that the syndic and the master of masters which syndics attach to are updated, otherwise the syndic fixes alone can cause minor performance issues with older master of masters. Please update masters first, then syndics. Minions do not need to be updated for this fix to work.

Module Changes

- *file execution module*: `show_diff` is deprecated in favor of `show_changes`. (PR #30988)
- *reg execution module*:
  - Removed the following deprecated functions from the reg module (PR #30956):
    - read_key
    - set_key
    - create_key
    - delete_key
  - Removed force parameter from reg state module
  - Fixed virtual function in state
  - Improved error information for `reg.delete_value` function
- *jboss7 execution module*: `deployed` function was decoupled from Artifactory by removing Artifactory-specific functionality. Note that the changes in some of the function arguments break existing state files, see issue #30515 and PR #3080 for details.
- *pkg state module*: The `wait` function was removed, the functionality was replaced with the `onchanges` requisite (PR #30297).
- *firewalld state module*: A `permanent` argument was added `add_port`. Note that `permanent` defaults to `True`, which changes previous behavior (PR #30275). A `bind` function was also added that allows binding zones to interfaces and sources (PR #29497).
- *journald beacon module*: The event string was updated to include a tag. Note this might impact existing reactors based on this beacon. (PR #30116).
- *postgres_privileges state module*: The default value of the `prepend` argument was changed from `None` to `public`.
- *zenoss execution module*: The `add_device` function was updated with a default value of `1000` for `prod_state` to match the documentation (PR #28924).
- The etcd execution module, state module, returner module, and util module were refactor (PR #28599). This refactor changes error returns for several functions (primarily edge cases):
  - get: Used to return `'' on key-not-found. Now returns None.

  - set: Used to return `' on issues setting keys. Now returns None.
  - ls: Used to return {path: {}} on key-not-found. Now returns None.
  - Tree: Used to return {} on key-not-found. Now returns None.

- *smartos_virt execution module*: Updated to use most of the new smartos_vmadm (PR #28284).
- *apache_conf state module*, *apache_module state module*, and *apache_site state module*: the `enable` and `disable` functions were renamed to `enabled` and `disabled`, respectively. In PR #33562, these functions were readded and properly deprecated and will be removed in Salt 2017.7.0. This fix will be available in 2016.3.1. As a workaround, try

```
apache_module.enable{{ 'd' if grains.saltversioninfo == [2016, 3, 0] else '' }}
```

New Features

Thorium - Provisional New Reactor

The 2016.3 release introduces the new Thorium Reactor. This reactor is an experimental new feature that implements a flow programming interface using the salt state system as the engine. This means that the Thorium reactor uses a classic state tree approach to create a reactor that can aggregate event data from multiple sources and make aggregate decisions about executing reactions.

This feature is both experimental and provisional, it may be removed and APIs may be changed. This system should be considered as ambitious as the Salt State System in that the scope of adding a programmable logic engine of this scale into the event systems is non trivial.

See *Thorium Complex Reactor*.

Improved Mac OS Support

Improved Solaris Support

A lot of work was done to improve support for SmartOS. This work also resulted in improvements for Solaris and illumos as SmartOS.

- rewrite of *vmadm module* (SmartOS)
- rewrite of *imgadm module* (SmartOS)
- deprecation of *virt module* in favor of vmadm (SmartOS)
- implemented *smartos state* (SmartOS)
- improved *zpool module* add SmartOS, illumos and Solaris support
- improved *zfs module* add SmartOS, illumos and Solaris support
- implemented *zpool state*
- implemented *zfs state* implemented *solaris_system* system module to provide better Solaris support (PR #30519)
- other minor fixes to grains, localmod, ...

Tornado Transport

Important: The Tornado Transport wire protocol was changed in 2016.3, making it incompatible with 2015.8 (PR #29339).

Windows DSC Integration (Experiemental)

Dimension Data Cloud Support

A SaltStack Cloud driver for Dimension Data Public Cloud, provides the driver functionality to service automation for any of the Dimension Data Public Cloud locations:

- Deploy new virtual machines
- List and query virtual machine images
- Destroy and query virtual machines

Documentation of the Dimension Data SaltStack integration is found on developer.dimensiondata.com

Minion Blackout

During a blackout, minions will not execute any remote execution commands, except for *saltutil.refresh_pillar*. Blackouts are enabled using a special pillar key, `minion_blackout` set to `True`.

See *Minion Blackout*.

Splunk Returner

A Splunk Returner that uses HTTP Event Collector is now available (PR #30718).

SQLCipher Pillar Module

Support was added for retrieving pillar data via queries to SQLCiper databases (PR #29782).

New Modules

The following list contains a link to the new modules added in this release.

Beacons

- *beacons.adb*
- *beacons.glxinfo*
- *beacons.memusage*
- *beacons.network_settings*

- *beacons.proxy_example*
- *beacons.salt_proxy*

Engines

- *engines.docker_events*
- *engines.redis_sentinel*
- *engines.slack*
- *engines.sqs_events*
- *engines.thorium*

Execution Modules

- *modules.bcache*
- *modules.beacons*
- *modules.boto_cloudtrail*
- *modules.boto_datapipeline*
- *modules.boto_iot*

25.2.23 Salt 2016.3.1 Release Notes

Version 2016.3.1 is a bugfix release for *2016.3.0*.

Statistics

- Total Merges: **87**
- Total Issue References: **23**
- Total PR References: **58**
- Contributors: **25** (abednarik, amontalban, anlutro, babilen, cachedout, clburlison, danslimmon, eliasp, glomium, jacobhammons, jfindlay, kev009, lomeroe, michalsuba, neil-williamson, onorua, opdude, rallytime, sjorge, terminalmage, thatch45, ticosax, tomlaredo, twangboy, zigarn)

Final Release of Debian 7 Packages

Regular security support for Debian 7 ended on April 25th, 2016. As a result, 2016.3.1 and 2015.8.10 will be the last Salt releases for which Debian 7 packages are created.

Changelog for v2016.3.0..v2016.3.1

Generated at: 2018-05-27 04:31:54 UTC

- **PR** #33883: (jfindlay) add 2016.3.1 release notes
- **PR** #33866: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-06-08 19:49:56 UTC*
  - be20ce1bbf Merge pull request #33866 from rallytime/merge-2016.3
  - 595d4f2ac3 Fixup new groupadd tests for syntax change in 2016.3
  - c5b4ec0b0f Merge branch `2015.8' into `2016.3'
    * ec09095c45 Merge pull request #33827 from cachedout/issue_33810
      · 9d36f1e474 Fix broken locate.locate function
    * f7b3d0eda0 Merge pull request #33839 from cachedout/fix_pkgresource_test_stacktrace

  - 518713f5e5 Merge pull request #33519 from jacobhammons/2016.3.0rel
  - a424c38f5d New doc site layout, 2016.3.0 release note known issue additions
- **PR** #33508: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-05-25 20:34:49 UTC*
  - 9199101ef2 Merge pull request #33508 from rallytime/merge-2016.3
  - a5e0141eda Merge branch `2015.8' into `2106.3'
  - 5a6b037cbd Merge pull request #33507 from rallytime/merge-2015.8
    * 03b0c97520 Merge branch `2015.5' into `2015.8'
    * 6f7fda0354 Merge pull request #33486 from jtand/2015.5
      · d1e210fff8 Merge branch `2015.5' of https://github.com/saltstack/salt into 2015.5
      · ee2ae0ea8a Added docstring examples to glance.image_schema and schema_get
      · 59e90064e6 modules.swift.head does not have a body. Should not be checked for a docstring right now.
    * f72ec1479b Merge pull request #33482 from rallytime/pillar-opts-docs
      · 087564528d Add pillar_opts docs to master.rst

    * dc644b145d Merge pull request #33488 from rallytime/fix-18752
        · b0a9f4181f Add docs for the syndic_finger config
    * a4e84aa7d2 Merge pull request #33454 from scubahub/2015.5
        · df3c0b8e78 Correct (and make consistent) determination of the test flag.
    * 3a52ace673 manage account information for pam (#33473)
- ee76be3b0b Merge pull request #33503 from rallytime/fix-15252
    * cfc07f7641 Add docs about minion config file in standalone minion docs
- e9b648e461 Merge pull request #33474 from cachedout/issue_29451
    * aa2bac3a0d Remove debugging
    * 68d8050cb8 Fix diskusage beacon
- 3bfb6bf719 Merge pull request #33465 from meaksh/check-if-job-returns-successfully-2015.8
    * 9deb70fd8e jobs.exit_success() now works parsing the results of jobs.lookup_id()
    * 7ba40c4f31 jobs.exit_success allow to check if a job has executed and exit successfully
- 70eb7b66f3 Merge pull request #33487 from jtand/glance_doc_fixes
    * 0b1cae05d9 Added docstring examples to glance methods and nova.list
    * ebf1256545 Don't need to check swift.head due to it having no body
- 56ea979916 Merge pull request #33481 from rallytime/fix-33423
    * 7fd3e8f361 Fix docs about etcd config options and add pillar_opts doc
- 2394cdc4bf Merge pull request #33490 from rallytime/fix-16319
    * 0c5548f9d1 Document the postgres.psql_query function
- ede232f0f1 Merge pull request #33480 from jfindlay/service_doc
    * 29c00a1b1b states.service: clarify function description language
    * 6a9ae09e79 states.service.__virtual__: add load fail reason
- 4f96cc1f54 Return full pending computer name (#33483)
- a89be5e9d4 Use six.string_types in jobs runner (#33499)
- 2e24a04565 Merge pull request #33491 from BlaineAtAffirm/2015.8
    * 7599b18995 fix jobs.list_jobs failing with search_target
- 1861af427e Merge pull request #33478 from rallytime/bp-32484
    * 042f17efa4 Only unsub if we have a jid
- b8154b678e Merge pull request #33457 from rallytime/doc-formatting
    * 82f8f3efff Make doc formatting consistent and use correct versionadded
- 1dfa95651c Don't allow a ``repo'' kwarg for pkgrepo.managed (#33477)
- b4071b07f1 Allow for config entry to be a list in a dict for beacons (#33476)
- 9f56ab4c45 Merge pull request #33469 from meaksh/zypper-download-check-signature-2015.8
    * a65071a6d1 simpler rpm.checksum function
    * 80fe303e38 Renamed check_sig to checksum and some refactoring

        * d56e3f4258 bugfix: showing errors when a package download fails using zypper pkg.download
        * 8a21b9149e check the signature of downloaded RPM files
    - 00f9090928 Add docs about PyYAML's 1024 character limitations for simple keys (#33459)
    - 3b12f396b4 Prevent several minion processes on the same machine (#33464)
    - c8b4f338d8 Make --gpg-auto-import-keys a global param when calling zypper (#33432)
    - 0c4e38ced4 Fix the saltutil.wheel function and add integration tests (#33414)
- **PR** #33505: (twangboy) Fix build script where pip didn't work @ *2016-05-25 18:15:27 UTC*
    - a43ffadcb7 Merge pull request #33505 from twangboy/fix_build_script
    - 7d78e5d612 Fix build script where pip wouldn't work
- **PR** #33076: (cachedout) Avoid second grains load on windows multiprocessing (refs: #33656) @ *2016-05-25 17:10:06 UTC*
    - 4cf40da7d7 Merge pull request #33076 from cachedout/win_grains
    - dab9825c88 Fix indentation error
    - b14e2cce9e Avoid second grains load on windows multiprocessing

25.2.24 Salt 2016.3.2 Release Notes

Version 2016.3.2 is a bugfix release for *2016.3.0*.

Statistics

- Total Merges: **200**
- Total Issue References: **66**
- Total PR References: **177**
- Contributors: **52** (Ch3LL, DarkKnightCZ, DmitryKuzmenko, Inveracity, abalashov, abednarik, adelcast, ajacoutot, amendlik, anlutro, aphor, artxki, bbinet, bensherman, cachedout, christoe, clinta, cro, dmurphy18, dongweiming, eliasp, eradman, farcaller, garethgreenaway, glomium, gtmanfred, isbm, jacobhammons, jacobweinstock, jfindlay, jmacfar, jnhmcknight, justinta, l2ol33rt, lomeroe, meaksh, nulfox, opdude, peterdemin, rallytime, s0undt3ch, secumod, sjmh, sjorge, terminalmage, thatch45, themalkolm, ticosax, tmehlinger, twangboy, vutny, whiteinge)

Returner Changes

- Any returner which implements a `save_load` function is now required to accept a `minions` keyword argument. All returners which ship with Salt have been modified to do so.

Changelog for v2016.3.1..v2016.3.2

Generated at: 2018-05-27 04:37:58 UTC

- **PR** #34988: (rallytime) Update release notes with new changes @ *2016-07-27 15:54:16 UTC*
    - 721e6dcce8 Merge pull request #34988 from rallytime/release-notes-update
    - a2aae987a6 Update release notes with new changes

- **PR** #34946: (anlutro) Fix virtualenv behavior when requirements files are in subdirectories @ *2016-07-27 14:43:27 UTC*
  - d63ac1671c Merge pull request #34946 from alprs/fix-venv_reqs_subdir
  - f773d63cbb normalize requirements path to be absolute
  - bdec73bb03 remove unnecessary os.path.basename logic
- **PR** #34957: (sjmh) Don't fall through to checking auth entries @ *2016-07-26 22:16:17 UTC*
  - f765faa3aa Merge pull request #34957 from sjmh/2016.3
  - 0095dbe530 Don't fall through to checking auth entries
- **PR** #34971: (cachedout) Increase timeout for grains test @ *2016-07-26 22:11:29 UTC*
  - 2d3b95dec9 Merge pull request #34971 from cachedout/increase_timeout_grains_test
  - 82d271b43a Increase timeout for grains test
- **ISSUE** saltstack/salt#34873: (Cashwini) Scheduler on master does not recognize the date strings supported by python dateutil (refs: #34951)
- **ISSUE** #34873: (Cashwini) Scheduler on master does not recognize the date strings supported by python dateutil (refs: #34951)
- **PR** #34951: (vutny) Fix #34873 @ *2016-07-26 17:07:48 UTC*
  - f23e8c525e Merge pull request #34951 from vutny/fix-schedule-dateutil
  - 0faa490991 Fix job scheduling using `when` parameter (by `python-dateutil`)
- **PR** #34935: (rallytime) Avoid UnboundLocalError in beacons module @ *2016-07-26 17:01:23 UTC*
  - **PR** #34894: (rallytime) [develop] Merge forward from 2016.3 to develop (refs: #34935)
  - deb1331601 Merge pull request #34935 from rallytime/beacons-mod-cleanup
  - 97a36ef367 Avoid UnboundLocalError in beacons module
  - **PR** #34956: (cachedout) Increase all run_script timeouts to 30s
- **PR** #34933: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-07-25 22:09:05 UTC*
  - 5d194f2d17 Merge pull request #34933 from rallytime/merge-2016.3
  - 8b295fe4ea Merge branch `2015.8' into `2016.3'
  - ec8fc058d4 Master performance improvement (#34916)
  - 34dc2fd792 Merge pull request #34911 from cachedout/backport_34906
    - 8becec2f4f Backport #34906
  - 6ccc27f697 Merge pull request #34898 from hrumph/list_upgrades_refresh
    - acd4b1a23b Fixes #33620
  - 5c13ee0e72 Merge pull request #34606 from isbm/isbm-config-reading-exit-2015.8
    - 5f5b802c0c Add option to master config reader on ignoring system exit for wrong configuration
    - 6fc677f177 Ignore minion config errors everywhere but the minion itself
    - 8699194647 Remove deprecation: BaseException.message deprecated as of 2.6
    - 0e65cfec91 Fix lint: E8302
    - 67faa56bf1 Use Salt default exit codes instead of hard-coded values

        * a84556e596 Exit immediately on configuration error
        * 43d965907c Raise an exception on any found wrong configuration file
        * 30ed728d05 Cover exception handling in the utils.parsers
        * 5e8c0c6bdb Introduce configuration error exception

- **ISSUE** #34760: (nate-byrnes) XenServer 7 needs correct provider setup for services. (refs: #34915)
  - **PR** #34915: (abednarik) Update service_rh provider to exclude XenServer >= 7.
- **PR** #34926: (rallytime) Lint #34923 @ *2016-07-25 14:53:42 UTC*
  - **PR** #34923: (eliasp) Handle exception when no Slack API key was provided (refs: #34926)
  - a7e7ec6d25 Merge pull request #34926 from rallytime/lint-34923
  - b3514abf1b Lint fixes for #34923
  - 69afcc4060 Handle exception when no Slack API key was provided
- **ISSUE** saltstack/salt#34908: (Ch3LL) Cannot start proxy minion due to keyerror in grains (refs: #34910)
- **PR** #34910: (cachedout) Fix grains error on proxy minions @ *2016-07-22 23:05:46 UTC*
  - c663c8bb5b Merge pull request #34910 from cachedout/proxy_grains
  - 0970ebace8 Fix grains error on proxy minions
  - **PR** #34864: (jmacfar) Check for version in list of installed versions
- **ISSUE** saltstack/salt#34816: (msdogado) VirtuozzoLinux not realized as RedHat by pkg (refs: #`saltstack/salt`#34878`_`_, #34878)
  - **PR** saltstack/salt#34878: (abednarik) Add VirtuozzoLinux is yumpkg enable list. (refs: #34902)
  - **PR** #34902: (rallytime) Back-port #34878 to 2016.3
  - **PR** #34878: (abednarik) Add VirtuozzoLinux is yumpkg enable list. (refs: #34902)
- **ISSUE** saltstack/salt#34893: (msdogado) rpm VirtuozzoLinux not working (refs: #34901)
- **PR** #34901: (rallytime) Add VirtuozzoLinux to the list of enabled distros for rpm.py @ *2016-07-22 22:23:48 UTC*
  - ad640cc046 Merge pull request #34901 from rallytime/fix-34893
  - 45e2ce10a4 Add VirtuozzoLinux to the list of enabled distros for rpm.py
- **ISSUE** saltstack/salt#34890: (msdogado) VirtuozzoLinux enabling services not working (refs: #34900)
- **PR** #34900: (rallytime) Add VirtuozzoLinux to enabled platforms list in rh_service.py @ *2016-07-22 22:21:20 UTC*
  - 5aa532f98b Merge pull request #34900 from rallytime/fix-34890
  - 12824487cc Add VirtuozzoLinux to enabled platforms list in rh_service.py
- **PR** #34887: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-07-22 18:04:47 UTC*
  - ebebfa647f Merge pull request #34887 from rallytime/merge-2016.3
  - 109b368d19 Merge branch `2015.8' into `2016.3'
    * fb223e1bd4 Invalidate the target cache very quickly (#34862)
    * 1ca1367289 Fail git.latest states with uncommitted changes when force_reset=False (#34869)
    * 4f4381e5b9 Merge pull request #34859 from cachedout/fix_wheel_test
      · b4be66dedf Fix wheel test

- **PR** #34632: (eliasp) Try to create the log directory when not present yet @ *2016-07-22 17:34:31 UTC*
  - eba34f7f4c Merge pull request #34632 from eliasp/2016.3-create-logdir-when-needed
  - 9c89470661 Try to create the log directory when not present yet
- **PR** #34854: (rallytime) Remove string_types import from state compiler @ *2016-07-22 17:20:15 UTC*
  - 965f517889 Merge pull request #34854 from rallytime/cleanup-state-imports
  - 73d3075ce9 Remove string_types import from state compiler
- **ISSUE** saltstack/salt#26171: (HG00) salt-ssh from python2.6 master to python2.7 minion fails on ``from _elementtree import *'' (refs: #34865)
- **PR** #34865: (thatch45) This needs discussion, since this breaks SUSE @ *2016-07-22 17:19:34 UTC*
  - 584d7606d4 Merge pull request #34865 from thatch45/break_suse
  - 6c5f363921 This needs discussion, since this breaks SUSE
- **PR** #34858: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-07-21 21:01:17 UTC*
  - aaede31f66 Merge pull request #34858 from rallytime/merge-2016.3
  - 9227c3dd26 Merge branch `2015.8' into `2016.3'
  - acc9e31c02 Merge pull request #34822 from thatch45/ssh_fixes
    - b5de492143 fix #34798
    - 5ad6bd7307 fix #34796
  - 5d91139bc9 Merge pull request #34847 from cachedout/pwall
    - 2c8298dc6e Profile logging
    - 3affafa2e9 Add an option to skip the verification of client_acl users
  - 07d1d36653 Merge pull request #34827 from thatch45/34691
    - 1ccf35eca4 fix beacon list to include all beacons being processed
  - b375720251 Merge pull request #34833 from rallytime/bp-28521
    - e50a6783ce SPM: packaging doesn't work in Python 2.6. Fixed.
  - 042646582f Merge pull request #34823 from rallytime/bp-25276
    - a028796eff copy spm.1 man page during setup Refs #25213
  - 6c35d88268 Fix #34648 (#34828)
- **PR** #34852: (rallytime) Skip GCE unit tests - causes test suite to hang @ *2016-07-21 17:52:31 UTC*
  - b3d8143d36 Merge pull request #34852 from rallytime/skip-gce-tests
  - 15b4f5a8b3 Skip GCE unit tests - causes test suite to hang
  - **PR** #34850: (rallytime) Update 2016.3.2 release notes
- **ISSUE** #34215: (rvora) salt-master crashes every few days (refs: #34683)
- **PR** #34844: (vutny) Fix getting total available memory without *psutil* installed @ *2016-07-21 17:12:38 UTC*
  - **PR** #34683: (cachedout) Fix publisher leak (refs: #34844)
  - 650674d14a Merge pull request #34844 from vutny/fix-grains-load-in-config-init
  - 4dc7827020 Fix comment in master config, prevents the service from starting

  - b4cfebb107 Fix Salt failure after merge of #34683
  - **PR** #34848: (rallytime) Update release notes for 2016.3.2
- **ISSUE** saltstack/salt#34345: (edgan) Salt master mode's and salt-ssh mode's top.sls processing aren't the same (refs: #34837)
- **ISSUE** #34345: (edgan) Salt master mode's and salt-ssh mode's top.sls processing aren't the same (refs: #34837)
- **PR** #34837: (thatch45) Fix #34345 @ *2016-07-21 14:36:15 UTC*
  - 52a95b2ea3 Merge pull request #34837 from thatch45/34345
  - 1e8c585cd3 Fix #34345
- **ISSUE** saltstack/salt#32591: (AndrewPashkin) ``RuntimeError: maximum recursion depth exceeded'' in salt/utils/lazy.py, using Salt-SSH (refs: #34838)
- **PR** #34838: (thatch45) Check if a valid value is passed to unlyif/unless @ *2016-07-21 14:34:29 UTC*
  - 96450ac74d Merge pull request #34838 from thatch45/unless_valid
  - 1f34299a84 Check if a valid value is passed to unlyif/unless
- **ISSUE** saltstack/salt#32525: (anlutro) state.show_low_sls not working in salt-ssh (refs: #34840)
- **PR** #34840: (thatch45) update the state wrapper to include show_low_sls @ *2016-07-21 14:34:02 UTC*
  - 3a5ef86d58 Merge pull request #34840 from thatch45/state_update_ssh
  - 77dce3920c update the state wrapper to include show_low_sls
- **ISSUE** #34762: (aphor) zpool state module needs support for disk vdev (refs: #34791, #34770)
- **PR** #34842: (sjorge) 2016.3 zpool cleanup and fixes @ *2016-07-21 14:32:56 UTC*
  - **PR** #34770: (aphor) zpool state module needs support for disk vdev #34762 (refs: #34842)
  - 5f67318fd7 Merge pull request #34842 from sjorge/2016.3-zpool-simplifaction
  - a7ff9524b0 drop parsing of vdevs, error passthrough from zpool cli
  - 25d6c8139b eliminate hardcoded vdev type from zpool state
  - 47b8dc946c salt.states.zpool - work with updates exec module
  - a5a98845c7 salt.module.zpool - fix bug with properties on/off being parsed as true/false
  - dd64494a19 salt.modules.zpool - drop vdev types to make it more future proof, fallback to zpool cli error messages
  - **PR** #34825: (thatch45) keep this beacon from stack tracing at the loader
- **PR** #34824: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-07-20 20:54:35 UTC*
  - b9db0b0036 Merge pull request #34824 from rallytime/merge-2016.3
  - 094731f4b6 Merge branch `2015.8' into `2016.3'
  - 98fa4a404e Merge pull request #34818 from jtand/mysql_state_integration_test_cleanup
    - 9abb6f91bb Skip mysql state test if mysqladmin is not available
  - 6636f2b449 Merge pull request #34803 from junovitch/issue_24744
    - 64c850410f salt/state.py: set `chunk['order'] = 0' with `order: first'; fixes #24744
- **PR** #34670: (isbm) Add ``osmajorrelease'' grain (2016.3) @ *2016-07-20 14:39:38 UTC*
  - 62ef8fdb35 Merge pull request #34670 from isbm/isbm-osmajorrelease-grain-suse

  - a6bcbd615f Lintfix PEP8: E262
  - 110a422d5a Keep osmajorrelease as a string type for 2016.3 release
  - 208fd33b48 Add unit test for osmajorrelease grain
  - 9a6b2175c6 Implement ``osmajorrelease'' by killing spaghetti
- **ISSUE** #34215: (rvora) salt-master crashes every few days (refs: #34683)
- **PR** #34683: (cachedout) Fix publisher leak (refs: #34844) @ *2016-07-20 13:57:10 UTC*
  - 6ca9ffa7c7 Merge pull request #34683 from cachedout/issue_34215
  - ccd53e9214 Lint
  - 76eb46fb08 Document master setting
  - 0dfe3aaf31 Set up dynamic config
  - 3cfb82cdd4 Fix silly error
  - 35a845fff5 Only set IPC with write buffer if set
  - b2d636017d Add IPC to minion opts
  - 2c1c92c48e Lint
  - c4395ae84e Dial down default buffer and apply to just write buffer
  - 3e3e2a997e Typo
  - 78f6251c09 Correct issues with config
  - c138cc03e3 Configuration settings for IPC buffers
- **ISSUE** #34762: (aphor) zpool state module needs support for disk vdev (refs: #34791, #34770)
- **PR** #34791: (sjorge) salt.state.zpool tweaks @ *2016-07-19 20:56:47 UTC*
  - 49ab3fd2b5 Merge pull request #34791 from sjorge/zpool-state-tweaks
  - d48c6d2dcb accomidate use of ``fake'' vdev type disk, this behavior may be broken later if a disk vdev ever gets added to the cli tools. improve documentation explaining how to create a striped pool without the ``fake'' vdev type
- **PR** #34784: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-07-19 16:30:18 UTC*
  - 1617a7058a Merge pull request #34784 from rallytime/merge-2016.3
  - 3e032dc397 Merge branch `2015.8' into `2016.3'
  - 58021035a9 Merge pull request #34773 from randomed/mysql-returner-startup/2015.8
    * 0cd55eb7d7 Add jid=req handling for mysql returner. It should also store the return jid into the jid list table.
  - 10a1af9949 Remove unnedeed config test (#34751)
  - f19caac8e4 Merge pull request #34754 from cachedout/disable_mid_test
    * 46901c6e65 Disable test
  - 81f29006f2 Merge pull request #34741 from rallytime/bp-34726
    * d949110993 Loop over updated keys in non recursive update
- **ISSUE** saltstack/salt#34630: (bdrung) Spelling errors (refs: #34756, #34722)
- **ISSUE** saltstack/salt#33923: (pavankumar2203) Salt module certutil install doesnt work (refs: #34756)

    - **PR** #34756: (jacobhammons) Rebuild man pages
- **ISSUE** saltstack/salt#27980: (rayba) salt-cloud 2015.5.0 azure provider could not be loaded (refs: #34746)
- **PR** #34746: (rallytime) Update azure lib dep to match the one in cloud.clouds.msazure @ *2016-07-18 18:54:40 UTC*
    - 2a9738f00d Merge pull request #34746 from rallytime/azure-version
    - ead3eb1606 Update azure lib dep to match the one in cloud.clouds.msazure
- **PR** #34744: (justinta) Test valid docs fix @ *2016-07-18 18:22:47 UTC*
    - c0e2657c8e Merge pull request #34744 from jtand/test_valid_docs_fix
    - 4fe33a7695 add directives example to ldap3.modify
    - 6fa40a0d46 Add cli examples for ldap3 module
    - b94e0dd95a ipset.long_range doesn't need a docstring
- **PR** #34740: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-07-18 16:28:56 UTC*
    - d4adf98b85 Merge pull request #34740 from rallytime/merge-2016.3
    - 7d106c78f0 Merge branch `2015.8' into `2016.3'
        * e9e5bbe38b Merge pull request #34721 from rallytime/fix-34703
            · 9c803d05a5 Add output_file option to master config docs
- **PR** #34607: (isbm) Bugfix: Exit on configuration read (backport) @ *2016-07-18 15:15:21 UTC*
    - efc7599f85 Merge pull request #34607 from isbm/isbm-config-reading-exit-2016.3
    - fb7542f920 Add option to master config reader on ignoring system exit for wrong configuration
    - abd10b5782 Ignore minion config errors everywhere but the minion itself
    - e5f43e6711 Remove deprecation: BaseException.message deprecated as of 2.6
    - 23d1031a09 Fix lint: E8302
    - 6b660678fa Use Salt default exit codes instead of hard-coded values
    - 0c2d3511c9 Exit immediately on configuration error
    - c5de6c8c4a Raise an exception on any found wrong configuration file
    - 575767022b Cover exception handling in the utils.parsers
    - 2cf696671f Introduce configuration error exception
    - **PR** saltstack/salt#34607: (isbm) Bugfix: Exit on configuration read (backport) (refs: #34739)
- **PR** #34739: (cachedout) Remove unnedeed config test @ *2016-07-18 15:15:15 UTC*
    - d0e0c0186b Merge pull request #34739 from cachedout/remove_config_test
    - 4625ee65b8 Remove unnedeed config test
- **ISSUE** saltstack/salt#34630: (bdrung) Spelling errors (refs: #34756, #34722)
- **PR** #34722: (rallytime) Various spelling fixes @ *2016-07-16 19:49:54 UTC*
    - abf5b976ed Merge pull request #34722 from rallytime/fix-34630
    - cca9446c37 Various spelling fixes
- **PR** #34714: (sjmh) Fix ldap auth for function matches @ *2016-07-16 19:49:12 UTC*

  - 922cc5a8a7 Merge pull request #34714 from sjmh/fix/ldap_auth
  - d4144039bc Fix ldap auth for function matches

- **PR** #34720: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-07-16 19:22:28 UTC*
  - 40626d786a Merge pull request #34720 from rallytime/merge-2016.3
  - c2130d5a04 Merge branch `2015.8' into `2016.3'
  - 08d00f3a61 Merge pull request #34689 from Azidburn/fix_pkg_sources
    * 2c0fc919b3 fix second run problems with pkg.installed using sources
  - 4cb1ded520 Merge pull request #34695 from isbm/isbm-zypper-product-boolean-values
    * 5ed5142fbc Update test data for `registerrelease' and `productline' fields
    * 21444ee240 Bugfix: return boolean only for `isbase' and `installed' attributes
  - aaa6f7d80a update 2015.8.11 release notes (#34682)

- **ISSUE** #34661: (chrimi) Cron State documentation lacks information of ``New in'' for special parameter in cron.present (refs: #34707)
  - **PR** #34707: (rallytime) Add versionadded to ``special'' option in cron.present state

- **PR** #34696: (isbm) Bugfix: Zypper *pkg.list_products* returns False on some empty values (2016.3) @ *2016-07-15 21:18:21 UTC*
  - 51fce770a5 Merge pull request #34696 from isbm/isbm-zypper-product-boolean-values-2016.3
  - 96021e257c Update test data for `registerrelease' and `productline' fields
  - 337eee33ac Bugfix: return boolean only for `isbase' and `installed' attributes

- **PR** #34702: (farcaller) Fixed dockerng.list_tags @ *2016-07-15 20:50:35 UTC*
  - 45045f6900 Merge pull request #34702 from farcaller/fixtags
  - 032e35a28e Fixed dockerng.list_tags

- **ISSUE** saltstack/salt#34548: (Inveracity) win_dsc.set_lcm_config does not set multiple values, missing semi-colon (refs: #34549, #saltstack/salt`#34549`_)
  - **PR** saltstack/salt#34549: (Inveracity) fixes multiple values in mof configuration (refs: #34681)
  - **PR** #34681: (rallytime) Back-port #34549 to 2016.3
  - **PR** #34549: (Inveracity) fixes multiple values in mof configuration (refs: #34681)

- **PR** #34679: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-07-14 20:59:45 UTC*
  - d57507dde8 Merge pull request #34679 from rallytime/merge-2016.3
  - 0c566dce89 Merge branch `2015.8' into `2016.3'
  - 3192e1674b Merge pull request #34676 from cachedout/partial_revert_34644
    * 64a154826a Revert ``Modify lodaer global test to use populated dunders''
  - 3b6f1089b2 Merge pull request #34601 from lorengordon/clarify-doc
    * bfe0dd0b8a Clarifies the proper way to reference states
  - bc63f25a6f Lint 34644 (#34651)
  - 50360263c5 Adjust the mine test a little bit to give it a better chance of success (#34647)
  - 8a0209101e Merge pull request #34642 from jtand/mysql_integration_cleanup

        * dd1559a599 Check that mysqladmin exists before running mysql integration tests.
    - 3e612c3794 Merge pull request #34618 from jtand/network_integration_fix
        * 34bcf9ccfc Changed network state test to use test=True
        * b2616833b0 Some small changes
        * ed59113e94 Change network state integration test to use test=True
- **ISSUE** saltstack/salt#33452: (Ch3LL) Digital Ocean does not return anything on deletion (refs: #34605)
- **PR** #34605: (gtmanfred) catch error if no dns domains exist @ *2016-07-14 15:20:46 UTC*

  - b3875f397d Merge pull request #34400 from cachedout/issue_34379
  - b413f05a4f Fix uninitialized value
- **PR** #34404: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-07-01 15:02:09 UTC*
  - d1cd36ab2b Merge pull request #34404 from rallytime/merge-2016.3
  - 8398de0baf Merge branch `2015.8' into `2016.3'
  - fe18bbb527 Merge pull request #34392 from cro/salt-cloud-doc-clarify
    - 6cce575d40 Clarify that salt-cloud doesn't get installed by bootstrap
  - 45b8fb10d7 Merge pull request #34373 from jtand/network_state_integration_test
    - 1d24053e36 network.system sls file
    - 4a9e6af542 network.routes sls file
    - 76c90b2ef6 network.managed sls file
    - 84a36369fa Added network state integration test
  - d6af1de0b7 Optimize pkg integration tests and add a couple new tests (#34377)
- **PR** #34292: (twangboy) Fix runas function for System Account @ *2016-06-30 18:25:09 UTC*
  - ad63b1d3d3 Merge pull request #34292 from twangboy/fix_runas
  - 433f300eba Enable all privileges
  - 5584cc2c6f Handle users that aren't admin
  - e9d2402c0b Fix runas function for System Account
- **PR** #34388: (rallytime) Back-port #34378 to 2016.3 @ *2016-06-30 17:50:48 UTC*
  - **PR** #34378: (adelcast) network_settings.py: fix documentation (refs: #34388)
  - be9a831ef6 Merge pull request #34388 from rallytime/bp-34378
  - 2040dbeca5 network_settings.py: fix documentation
  - **PR** #34352: (cro) Esxi dvs
  - **PR** #34386: (rallytime) Beacon network docs
- **PR** #34376: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-06-30 14:31:28 UTC*
  - 5a44b077a0 Merge pull request #34376 from rallytime/merge-2016.3
  - 3149da1bcc Merge branch `2015.8' into `2016.3'
  - af8ef1e461 Merge pull request #34368 from rallytime/merge-2015.8
    - 3bce0cb510 Merge branch `2015.5' into `2015.8'
    - 970aaa46d4 Merge pull request #34252 from gtmanfred/2015.5
      - 82183f1572 return list of nodes for lxc driver when called directly
  - 94e094652c Back-port #34324 to 2015.8 (#34344)
  - 11dc0203b0 Making salt-ssh pass proper return codes for jinja rendering errors (#34342)
- **PR** #34365: (sjorge) fixes computenode_* grains on SmartOS compute nodes @ *2016-06-29 17:55:24 UTC*
  - 3808d849fe Merge pull request #34365 from sjorge/2016.3-fix-broken-smartos-grains

  - 3ff895cacf fixes computenode_* grains on SmartOS compute nodes

- **PR** #34353: (cro) Remove proxy check and additional GetConnection--this makes the proxy... @ *2016-06-29 14:54:47 UTC*
  - 65efb55917 Merge pull request #34353 from cro/pyvmomi-ssl-fail
  - 14ea29f446 Remove proxy check and additional GetConnection--this makes the proxy fail to start. Need to check to see if proxy memory leak is back.
- **PR** #34348: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-06-28 23:28:45 UTC*
  - c89d1ad27f Merge pull request #34348 from rallytime/merge-2016.3
  - c87a108a12 Don't forget the pylint disables for range
  - 359e8ca2ce Pylint fixes
  - f9ab8ba46d Merge branch `2015.8' into `2016.3'
    * f6bd1ad47e Revert py3modernize lint changes (#34339)
    * 046bdaa9f2 Merge pull request #34306 from ghedo/iptables_flush_table
      · 882c6c9c86 Do not force `filter' table when flushing
    * 0c60feac02 Doc clarifications to file modules, addition of new *profile* log level to docs, fixed example in dnsmasq (#34323)
    * b793426c23 Remove unnecessarily-disabled sanity check (#34325)
    * c5890a0eca Merge pull request #34335 from rallytime/merge-2015.8
      · 2296587536 Merge branch `2015.5' into `2015.8'
      · 6cce545d92 Merge pull request #34313 from rallytime/bootstrap-2015.5
      · c7db73be92 [2015.5] Update to latest bootstrap script v2016.06.27
    * a6d3cc637b Typo in dockerio doc (#34319)
    * dd4c937009 Merge pull request #34312 from rallytime/bootstrap-2015.8
      · 944a393f89 [2015.8] Update to latest bootstrap script v2016.06.27
    * 91703d2dc4 Merge pull request #34307 from rallytime/fix-test-example
      · f44a0543fe Fix test example in integration testing docs
- **ISSUE** #34255: (tmehlinger) fire_event requisite does not work in orchestration states (refs: #34256, #34343)
  - **PR** #34343: (rallytime) Back-port #34256 to 2016.3
  - **PR** #34256: (tmehlinger) detect running from master in State.event method (refs: #34343)
- **PR** #34338: (themalkolm) Add listen/listen_in support to stateconf.py @ *2016-06-28 21:50:14 UTC*
  - 0b9cb602fe Merge pull request #34338 from themalkolm/patch-2
  - cd63541325 Add listen/listen_in support to stateconf.py
- **PR** #34283: (sjorge) 2016.3 mount vfstab support @ *2016-06-28 19:23:39 UTC*
  - 80a659bb51 Merge pull request #34283 from sjorge/2016.3-mount-fstab
  - b8c6948cd5 fixes broken rm_fstab test due to missing __grain__.kernel
  - d633e774ea actually do the cleanup, oops
  - 987c240850 minor cleanup

  - c3667203bf add test for vfstab
  - 80e9d1d278 set __grains__ for fstab unit test
  - f0f5d449c3 mount.vfstab implemented on Solaris like platforms
  - 4398e8841b undo some changes to mount.fstab and mount.rm_fstab, create mount.vfstab and mount.rm_vfstab
  - 133d3bb2bb mount.set_fstab errors out on Solaris like platforms
  - c0863fb024 mount.rm_fstab works with Solaris like platforms
  - 151799ea74 initial vfstab support (Solaris like platforms)
- **ISSUE** #34321: (Ch3LL) Raspberry Pi salt-minion missing osmajorrelease grain (refs: #34322)
- **PR** #34322: (Ch3LL) add osmajorrelease grain for raspbian @ *2016-06-28 19:08:39 UTC*
  - 75aad073a9 Merge pull request #34322 from Ch3LL/add_grains_majorrelease_test
  - 693cc61aa4 add osmajorrelease to ubuntu and fix pylint
  - 2fc3e8a54b add osmajorrelease grain for raspbian
- **PR** #34337: (clinta) Change merge-if-exists logic to properly report changes @ *2016-06-28 18:41:56 UTC*
  - 81547f413d Merge pull request #34337 from clinta/serialize-merge
  - ebe7def2fb Change merge-if-exists logic to properly report changes
- **PR** #34300: (vutny) Make apache.configfile state handle the Options list correctly @ *2016-06-28 18:34:45 UTC*
  - affc65dc79 Merge pull request #34300 from vutny/fix-apache-vhost-options
  - 52001afdde Fix apache.configfile state example
  - 64a9442e38 apache.config: correctly output a list of the Options
- **ISSUE** #33588: (whytewolf) rabbitmq_user.present error (refs: #34333)
  - **PR** #34333: (rallytime) Back-port #33734 to 2016.3
  - **PR** #34304: (rallytime) Back-port #33734 to 2016.3 (refs: #34333)
  - **PR** #33734: (glomium) modules/rabbitmq.py version checking had a logical error (refs: #34333, #34304)
- **ISSUE** #34329: (clinta) file.serialize merge_if_exists fails: `function' object has no attribute `deserialize' (refs: #34330)
  - **PR** #34330: (clinta) fix #34329
- **ISSUE** #34170: (rodoyle) ps.top raises ValueError ``too many values to unpack'' when psutil > 4.1.0 (refs: #34318)
  - **PR** #34318: (rallytime) Back-port #32182 to 2016.3
  - **PR** #32182: (dongweiming) Fix psutil.cpu_times unpack error (refs: #34318)
- **PR** #34311: (rallytime) [2016.3] Update to latest bootstrap script v2016.06.27 @ *2016-06-27 18:59:27 UTC*
  - 1398b1c51e Merge pull request #34311 from rallytime/bootstrap-2016.3
  - 75aa7047bc [2016.3] Update to latest bootstrap script v2016.06.27
- **ISSUE** #34129: (onorua) fqdn_ip4 and fqdn_ip6 are empty on 2016.3+ (refs: #34284)
- **PR** #34284: (rallytime) Don't require `domain' to be present before checking fqdn_ip* grains @ *2016-06-27 17:06:17 UTC*

  - dc8462451d Merge pull request #34284 from rallytime/fix-34129
  - 5f45a8ff73 Don't require `domain' to be present before checking fqdn_ip* grains
- **ISSUE** #30493: (sjorge) salt.modules.status mostly broken on solaris like operating systems. (refs: #34296)
- **PR** #34296: (sjorge) 2016.3 status module now works on Solaris like platforms @ *2016-06-27 16:49:41 UTC*
  - 259935d6d2 Merge pull request #34296 from sjorge/2016.3-module.status
  - a26340c555 make status.all_status work on Solaris like platforms
  - 33e24fa697 make status.cpustats work on Solaris like platforms
  - d214e9c776 correctly cast to int for status.netdevs on Solaris like platforms
  - b74761b52d make status.cpuinfo support Solaris like platforms and OpenBSD
  - 2cd76d5ab5 make status.diskstats work on Solaris like platforms
  - 3211538830 make status.diskusage work on Solaris like platforms
  - a12b311a62 make status.netdev compatible with Solaris like platforms
  - 3bc01458aa make status.netstats compatible with Solaris like platforms
  - 25678901fa avoid KeyError in ping_master
  - 81d7fc98d8 make status.vmstats work on Solaris like platforms and OpenBSD
- **PR** #34281: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-06-24 21:51:43 UTC*
  - 376bec0455 Merge pull request #34281 from rallytime/merge-2016.3

- **PR** #34201: (DarkKnightCZ) Suffix temp file with .sr1 and add mandatory argument when executing PowerShell script @ *2016-06-22 17:21:24 UTC*
  - **PR** #34198: (DarkKnightCZ) Don't use binary mode for cmdmod.exec_code (refs: #34201)
  - 606ae3c886 Merge pull request #34201 from DarkKnightCZ/cmdmod-34199
  - 05748743bc Suffix temp file with .sr1 and add -File argument when executing PowerShell code via cmdmod.exec_code
- **ISSUE** #34196: (DarkKnightCZ) Salt call cmdmod.exec_code_all fails on Windows minion due to invalid file mode (refs: #34198)
- **PR** #34198: (DarkKnightCZ) Don't use binary mode for cmdmod.exec_code (refs: #34201) @ *2016-06-22 17:14:06 UTC*
  - cb704b780b Merge pull request #34198 from DarkKnightCZ/cmdmod-34196
  - 04553cd3de Don't use binary mode for cmdmod.exec_code
- **PR** #34172: (dmurphy18) Support for building with local packages on Debian and Ubuntu @ *2016-06-22 16:36:44 UTC*
  - 0578a2f87d Merge pull request #34172 from dmurphy18/debbuild_deps
  - f7f8a5d33f Fixed pylint issues
  - 82fa276141 Support for building with local packages on Debian and Ubuntu
  - **PR** #34194: (vutny) Correct the docstrings formatting in pkgbuild modules and state
  - **PR** #34056: (vutny) Make rpmbuild module work on non-RPM based GNU/Linux systems (refs: #34194)
- **PR** #34186: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-06-21 23:26:34 UTC*
  - a8429c2595 Merge pull request #34186 from rallytime/merge-2016.3
  - 318c2ed6a1 Merge branch `2015.8' into `2016.3'
  - 1c4369d093 Merge pull request #34184 from rallytime/merge-2015.8
    - 8e36e90966 Merge branch `2015.5' into `2015.8'
    - 5411ebb3b4 Merge pull request #34141 from jtand/boto_vpc_test_fix
      - b7ac6c735a Moved imports to top, out of _get_moto_version function
      - 02f9ba99ba Updated version check. Moved check into it's own function
      - d445026c56 Updated test to work with new moto version. Changed strings to unicode
  - c059d6c08c Merge pull request #34176 from rallytime/bp-34103
    - 2e5e7ed03c Fix diskusage beacon
  - 5cbaaed167 Merge pull request #34179 from terminalmage/issue34114
    - 86d1b8e864 Raise the correct exception when gitfs lockfile is empty
  - 67deded119 Merge pull request #34178 from terminalmage/remove-comment
    - 4965be72b1 Remove unnecesssary comment
  - 6387d1636e fix salt --summary to count not responding minions correctly (#34165)
  - e5949ea6f1 doc: add missing dot (#34175)

  - 47595d6795 Typo fix (#34174)
  - 3669048654 Merge pull request #34077 from rallytime/grains-tests
    * 2199bb8a78 Add integration tests for grains.append
    * 37cfe70724 Add some grains targeting tests
- **ISSUE** #34162: (ryanwalder) salt-call default loglevel regression (refs: #34173)
- **PR** #34173: (rallytime) Update docs to match log_level default @ *2016-06-21 17:15:53 UTC*
  - 3413c494bd Merge pull request #34173 from rallytime/fix-34162
  - f577681f0b Update docs to match log_level warning default
- **ISSUE** #34094: (avandendorpe) cron.file is broken (refs: #34095)
- **PR** #34095: (rallytime) Back-port #32396 to 2016.3 @ *2016-06-21 16:12:39 UTC*
  - **PR** #32396: (eradman) Unbreak cron.file (refs: #34095)
  - c596bf5744 Merge pull request #34095 from rallytime/bp-32396
  - 074b6ab5c2 Correct pylint error
  - 20ff5c879a Unbreak cron.file
- **PR** #34108: (l2ol33rt) Make dockerng.absent state honor test=true @ *2016-06-21 15:55:29 UTC*
  - b98687875f Merge pull request #34108 from l2ol33rt/docker_absent_dryrun
  - 5598cb4a21 Make docker.absent honor test=true
- **ISSUE** #34012: (viq) States mount.* fail on OpenBSD's tmpfs (refs: #34133)
- **PR** #34133: (rallytime) Back-port #34057 to 2016.3 @ *2016-06-21 15:53:46 UTC*
  - **PR** #34057: (ajacoutot) _active_mounts_openbsd: unbreak output for special filesystems (refs: #34133)
  - a75386a669 Merge pull request #34133 from rallytime/bp-34057
  - f7be5e182b _active_mounts_openbsd: unbreak output for special filesystems
- **PR** #34156: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-06-21 15:52:59 UTC*
  - dd989dac78 Merge pull request #34156 from rallytime/merge-2016.3
  - b061b86946 Merge branch `2015.8' into `2016.3'
    * 65fba5b4d7 Merge pull request #34142 from isbm/isbm-getid-loglevel-shift
      · 236a67b702 Move log message from INFO to DEBUG.
    * 79a719b719 Update documentation on ``refresh'' behavior in pkg states (#34100)
    * 6d0d52fa86 modules.pkg int tests: skip refresh_db upon error (#34072)
- **PR** #34110: (garethgreenaway) Fixes to git module & state module related to identity file @ *2016-06-21 15:52:17 UTC*
  - b302cb03ef Merge pull request #34110 from garethgreenaway/git_needs_saltenv_for_identity
  - 68092cdc8c When specifying the SSH identity to use with Git as a salt URL, eg. salt://files/identity, if that file exists outside of the default base environment the file won't be accessible so we need to include the saltenv.
- **ISSUE** #34120: (rmohta) Correct package name to systemd-python for RHEL 7 in docs.saltstack.com (refs: #34138)

- **ISSUE** #31402: (vutny) [repo] systemd-python required package is missing from RHEL7 archive (refs: #34138)
- **PR** #34138: (rallytime) Update package dep note to systemd-python for RHEL7 install @ *2016-06-21 15:51:24 UTC*
  - 6c3405755a Merge pull request #34138 from rallytime/fix-34120
  - 73f3e12ce6 Update package dep note to systemd-python for RHEL7 install
  - **PR** #34166: (vutny) Fix YAML indentation in Apache state docstrings
  - **PR** #34098: (terminalmage) Restore old refresh logic
  - **PR** #34087: (bbinet) Encourage to report issues to upstream PillarStack project
- **PR** #34075: (jfindlay) modules.inspectlib.kiwiproc: import gate lxml @ *2016-06-17 15:36:08 UTC*
  - 9da592a297 Merge pull request #34075 from jfindlay/import_xml
  - f882a72348 modules.inspectlib.kiwiproc: import gate lxml
- **PR** #34056: (vutny) Make rpmbuild module work on non-RPM based GNU/Linux systems (refs: #34194) @ *2016-06-17 15:14:51 UTC*
  - 52b852216a Merge pull request #34056 from vutny/rpmbuild-support-debian
  - 8ff36d4f2b Expose virtual pkgbuild module as rpmbuild on non-RPM based systems if all required utilities are in place
  - 758f5cd77c Make rpmbuild module work on Debian GNU/Linux and derivatives
- **PR** #34073: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-06-16 23:02:32 UTC*
  - f2a2c2bf53 Merge pull request #34073 from rallytime/merge-2016.3
  - f6bfaede21 Merge branch `2015.8' into `2016.3'
  - 1b76de1557 Merge pull request #34069 from rallytime/test-minion-return-message
    - 60561ac6fc Add a test to check for disconnected minion messaging
  - 3119693dac Merge pull request #34048 from terminalmage/issue30100
    - 715e7af8a4 Ensure only one fileserver update in a masterless run
  - dd03024931 Merge pull request #34011 from rallytime/bp-33948-2015.8
    - a4660d1ff7 Warn when custom returners don't have minions kwarg in save_load
    - 78befde62f Add note to release notes about returner minions kwarg change
    - 4e7f35fa36 Fix loop over cache in auth checking!
    - 06963e0505 Save an entire minion cache traversal on each master pub
  - bca437128e Fixed a bug in the consul.py module that was preventing services (#34051)
  - 8ba117c7f6 Merge pull request #34045 from jacobhammons/release-prev
    - 43b4a12aa2 Updated latest release version
  - f9bfcde61f Always make changes to minion config if set (#34020)
  - e25dba49e2 More YAML indentation fixes in state module examples (#34030)
  - 5b5eae4ca9 Merge pull request #34018 from rallytime/merge-2015.8
    - 77f44f3087 Merge branch `2015.5' into `2015.8'
    - 871f7966ce Lint fix for #34000 (#34005)

        * f758e42172 Fix incorrectly written test (#34000)
        * cf6281b4cf Add loader.utils() example to calling minion_mods (#33953)
        * 6b98e8a9ea Merge pull request #33880 from terminalmage/zh744
            - ea726d11c8 pkg.uptodate: Pass kwargs to pkg.list_upgrades
            - de90b35d2b salt/modules/zypper.py: add fromrepo support to list_upgrades
            - 35fbb06df5 salt/modules/win_pkg.py: add kwargs to list_upgrades
            - bf5505f425 salt/modules/solarisips.py: add kwargs to list_upgrades
            - 6e89a8be98 salt/modules/pkgutil.py: add kwargs to list_upgrades
            - 5179dbcec4 salt/modules/pacman.py: add kwargs to list_upgrades
            - 46e5a52784 salt/modules/macports.py: add kwargs to list_upgrades
            - 76143b76ca salt/modules/ebuild.py: add kwargs to list_upgrades
            - b40fc9bc62 salt/modules/brew.py: add kwargs to list_upgrades
            - 4f11c16d86 salt/modules/aptpkg.py: add fromrepo support to list_upgrades
        * cb88960ed1 Merge pull request #33904 from rallytime/bp-33806
            - 638ccf501d Work around upstream cherrypy bug
    - 7d940aed1f states.file: fix indentation in YAML examples (#34003)
    - 4c7fac0aaa Remove loader test for pam module (#34002)
    - c4dab6a074 Merge pull request #33990 from jacobhammons/community-projects
        * b20213fd79 Adds links to several current Salt-related projects Removes the salt_projects.rst file which hasn't been updated in a long time, this is replaced by the updated topics/projects/index.rst file Adds a note about Salt Pack to the installation doc
    - 444c15792c Merge pull request #33983 from twangboy/fix_docs_join_domain
        * b057be04b4 Fix typo, more documentation
        * d8c2f3e57a Clarify the *account_exists* parameter
    - 9bd2317992 Merge pull request #33951 from jfindlay/gem_tests
        * 2eb633ccad modules.gem int tests: only check known installed gems
        * 9f3e18b037 modules.gem int tests: (un)install a non-core gem
    - 53baae6eb1 Merge pull request #33984 from jfindlay/disk_capacity
        * 6cbe31e6c2 states.disk: rewrite unit tests
        * 82c77b533f states.disk.status: validate percent values
        * aedc4e15e5 states.disk: add documentation
    - fa5efb6a69 Merge pull request #33985 from rallytime/more-batch-tests
        * 3e7ab8c7b3 Write some more simple batch command tests
    - 6080846cce acl.ClientACL: add unit tests (#33684)
- **ISSUE** #33831: (astehlik) file.managed state should not download a file if the checksum did not change (refs: #34010)
- **PR** #34010: (terminalmage) Do not cache remote files if they are already cached @ *2016-06-16 21:03:47 UTC*

  - 790384f413 Merge pull request #34010 from terminalmage/issue33831
  - 636d081ae0 Do not cache remote files if they are already cached
- **PR** #34009: (rallytime) Back-port #33948 to 2016.3 + add log message (refs: #34011) @ *2016-06-16 21:01:09 UTC*
  - **PR** #33948: (cachedout) Save an entire minion cache traversal on each master pub (refs: #34011, #34009)
  - dd26d6fd74 Merge pull request #34009 from rallytime/bp-33948
  - 239af9ae5e Warn when custom returners don't have minions kwarg in save_load
  - c776d2d795 Add note to release notes about returner minions kwarg change
  - 5f696082e3 Fix loop over cache in auth checking!
  - 180c312715 Save an entire minion cache traversal on each master pub
- **ISSUE** #33927: (phil123456) Salt - windows minion cannot do anything (refs: #33941)
- **PR** #33941: (cachedout) Don't call os.getppid() on Windows @ *2016-06-16 20:56:17 UTC*
  - 5f4ef46d2f Merge pull request #33941 from cachedout/issue_33927
  - 5fe889c7f1 Don't call os.getppid() on Windows
- **PR** #34067: (jacobhammons) Fixes doc refresh bug on chrome mobile. @ *2016-06-16 18:44:12 UTC*
  - fa253aa62b Merge pull request #34067 from jacobhammons/mobile-fix
  - ce027fd769 Fixes doc refresh bug on chrome mobile.
  - **PR** #34050: (rallytime) Back-port #34026 to 2016.3
  - **PR** #34026: (bensherman) removed method that doesn't exist (refs: #34050)
- **PR** #33987: (isbm) inspectlib cleanup @ *2016-06-15 22:09:31 UTC*
  - 73ff11585e Merge pull request #33987 from isbm/isbm-inspectlib-cleanup
  - e36821510f Fix documentation: add an example how to export system to the Kiwi
  - fe300ccf73 Lintfix
  - 96423076b1 Add unit test for file tree
  - 8975036b27 Add get_unmanaged_files test
  - be5f12fcaf Add initial unit test for inspectlib.collector.Inspector
  - 652c96d7e7 Stop build (not implemented yet)
  - 58e85ea0ab Refactor class caller
  - 878f67674a Sort package names
  - c31818b4aa Fix lint: PEP8 multiplication of 4.
  - c87fff3680 Add root-only warning when exporting system with Kiwi
  - 9bd80f02fc Implement users Kiwi export
  - e191f338c7 Cleanup code
  - 80f45defae Implement packages and patterns gathering
  - ad45a265f5 Add Debian support for the repo generator
  - 6280ad137e Semifix: sometimes SQLite3 is locked. TODO: a proper handling required.
  - 51567ab61d Implement SUSE repositories export

  - e4ac113927 Add Kiwi support to the collector/inspector
  - eceeb4ecf2 Add ability to specify an additional PID file
  - f522a91ac6 Add ISO/image build (stub) and export to the Kiwi
  - bb19684606 Add Kiwi processor exception
  - 805e2ce204 Add Kiwi exported (initial)
  - a52f9f7107 Add default configuration
- **ISSUE** #34038: (Ch3LL) user.list_users does not work on smartos (refs: #34042)
  - **PR** #34042: (sjorge) fix #34038
- **PR** #34025: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-06-15 19:41:00 UTC*
  - f546a00dc9 Merge pull request #34025 from rallytime/merge-2016.3
- **PR** #34044: (jacobhammons) Updated latest release to 2016.3.1 @ *2016-06-15 19:20:28 UTC*
  - 3035520594 Merge pull request #34044 from jacobhammons/3.1
  - a4b67fd1e9 Updated latest release to 2016.3.1 Clean up installation instructions code-block type updates Add link to jinja tutorial
  - **PR** #34014: (jnhmcknight) fix launch config creation params
  - **PR** #34021: (twangboy) Always make changes to minion config if set (2016.3)
- **PR** #34031: (eliasp) *states.postgres_privileges* expects a real list, not a comma-separated string @ *2016-06-15 16:34:04 UTC*
  - 5f90717fd3 Merge pull request #34031 from eliasp/2016.3-salt.states.postgres_privileges-doc-priv-list
  - d3198ea538 *states.postgres_privileges* expects a real list, not a comma-separated string for *privileges*
- **ISSUE** #33023: (cmclaughlin) rest_cherrypy eauth can't handle some characters (refs: #33995)
- **ISSUE** #23522: (nbirnel) Update the best practices documentation to include simpler examples of of jinja dictionaries (refs: #33995)
- **ISSUE** #12470: (whiteinge) Document how to (and not NOT to) use Jinja in states (refs: #33995)
- **ISSUE** #10480: (gravyboat) Create documentation that talks about using Jinja specifically for Salt. (refs: #33995)
- **ISSUE** #10206: (rabits) Jinja import: Jinja variable `salt' is undefined (refs: #33995)
- **PR** #33995: (jacobhammons) Understanding Jinja topic, Jinja doc issues. @ *2016-06-14 02:00:29 UTC*
  - 1132bc5d0b Merge pull request #33995 from jacobhammons/doc-fixes
  - 887a415138 Adds new Understanding Jinja topic, and fixes several Jinja doc issues. Removes the ``Full list of builtin ...'' from each module reference list, leaving just the module type for scanability.
- **PR** #33900: (amendlik) Document sudo policy for gitfs post-recieve hook @ *2016-06-14 01:04:35 UTC*
  - a400f6a6c3 Merge pull request #33900 from amendlik/gitfs-hook-doc
  - b4a28e2684 Add clarifying documentation about the need for sudo in the git hook
  - 1046279cb7 Document sudo policy for gitfs post-recieve hook
- **PR** #33980: (twangboy) Use full path to python.exe @ *2016-06-14 00:46:14 UTC*
  - 28c886edd0 Merge pull request #33980 from twangboy/fix_build
  - dd7d55afb9 Use full path to python.exe

- **PR** #33993: (s0undt3ch) Call *sys.exit()* instead of *exit() @ 2016-06-14 00:30:46 UTC*
  - 26fee377ec Merge pull request #33993 from s0undt3ch/2016.3
  - 34f7d90d9f Call *sys.exit()* instead of *exit()*
- **PR** #33976: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-06-13 19:29:40 UTC*
  - 2e934cffef Merge pull request #33976 from rallytime/merge-2016.3
  - 19d49d94f2 Merge branch `2015.8' into `2016.3'
    * a74f1b8077 ZD 762 (#33942)
    * 0281d491c6 Merge pull request #33946 from rallytime/bp-33698
      · 5fdfed1cb9 Make sure we only use GetConnection if we are using a proxy salt minion
      · 1505c5724b Fix a bug with self signed certificates and creating a new VM
    * dff3f51955 Merge pull request #33952 from rallytime/fix-33911
      · 03b7cbbd2c Add base argument to salt-ssh grains wrapper for filter_by func
    * 4a8064918a Adds a ``Generated on <timestamp>'' line to the footer of each doc html page in the doc (#33962)
- **ISSUE** #33868: (abalashov) Returner configuration override options don't work for scheduled jobs (schedule module) (refs: #33912)
- **PR** #33912: (abalashov) utils/schedule.py:handle_func() - Fix for accessing returner configur... @ *2016-06-13 17:18:04 UTC*
  - 8d8ed59b85 Merge pull request #33912 from abalashov/abalashov/fix-schedule-returner-config
  - b5a4f8b313 utils/schedule.py:handle_func() - Fix for accessing returner configuration attributes `return_config' and `return_kwargs'.
- **PR** #33945: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-06-13 15:44:30 UTC*
  - 81e16bb93f Merge pull request #33945 from rallytime/merge-2016.3
  - b4ab322ce1 Merge branch `2015.8' into `2016.3'
    * b3ec39d644 Correct issue with ping on rotate with minion cache (#33765)
    * 378dd7ca06 Merge pull request #33888 from jfindlay/random_check
      · 6acee3cc30 modules.random_org._query: only return text if present
      · 82f95429db modules.random_org unit tests: skip if random.org down
      · 1f9422e0cd utils.http.query: also except gaierror with tornado
    * 2dc1914e7c Add connecting_settings to boto_elb state attributes list (#33936)
    * 91a2184f2d Wait for up to a minute for sync_after_install (#33917)
    * ef6da0be5d Merge pull request #33877 from rallytime/merge-2015.8
    * 398534a9e7 Fix ret return from merge-conflict resolution
    * b8e4706074 Merge branch `2015.5' into `2015.8'
    * cdda593c50 Merge pull request #33829 from terminalmage/update-versionchanged
      · f7028eb1c6 Update versionchanged directive
    * b8e6c144d8 Merge pull request #33833 from terminalmage/issue33645

        - 91745c2a67 Support syncing pillar modules to masterless minions
    * e061788e81 Merge pull request #33814 from terminalmage/archive-extracted-xz
        - 897a716df2 Support extraction of XZ archives in archive.extracted state
    * fa983e91cf Merge pull request #33778 from sodium-chloride/2015.5-2016-0604-1938
        - a5fb6d7a69 Fix minor docstring issues
    * b9133326c8 Merge pull request #33726 from jtand/sysmod_skip_valid_docs_glance
        - ebee8a89af glance.warn_until shouldn't be checked for a doc string
    * 137f0b19f3 Merge pull request #33611 from TargetHolding/2015.5
    * 1dd15a603b solve' TypeError: expected string or buffer' in json/decoder.py
    * eaf42ca892 solve AttributeError: `module' object has no attribute `exception'

- **PR** #33960: (nulfox) Fix mongo get_load to return full mongo record instead of non-existant `load' key @ *2016-06-13 15:37:46 UTC*
  - 68d261fe5b Merge pull request #33960 from mecarus/2016.3
  - d622133a49 The jid load comes in directly, not as `load' key. Should return the mongo record directly without accessing keys
- **PR** #33961: (jacobhammons) 2016.3.0 known issues update @ *2016-06-13 02:59:21 UTC*
  - 8f56406507 Merge pull request #33961 from jacobhammons/release
  - 2cf787d4ba 2016.3.0 known issues update
  - **PR** #33908: (ticosax) [boto_lambda] handle ommitted Permissions parameter
- **ISSUE** #33575: (anlutro) File states seem slower in 2016.3, especially on first cache retrieval (refs: #33896)
- **ISSUE** #29643: (matthayes) Can't get batch mode and --failhard to work as expected (refs: #31164)
- **ISSUE** #28569: (andrejohansson) Reactor alert on highstate fail (refs: #31164)
- **PR** #33896: (DmitryKuzmenko) Don't deep copy context dict values. @ *2016-06-10 15:32:54 UTC*
  - **PR** #31164: (DmitryKuzmenko) Issues/29643 fix invalid retcode (refs: #33896)
  - 16b5e9dcc1 Merge pull request #33896 from DSRCompany/issues/33575_do_not_deep_copy_context
  - 8e34d0a9c3 Don't deep copy context dict values.
- **ISSUE** #3077: (torhve) Client ACL and external auth system should have support for limiting functions to certain arguments (refs: #29153)
- **PR** #33905: (rallytime) Back-port #33847 to 2016.3 @ *2016-06-10 15:22:34 UTC*
  - **PR** #33847: (whiteinge) Add docs for arg/kwarg eauth matching (refs: #33905)
  - **PR** #29153: (DmitryKuzmenko) ACL limit args (refs: #33847)
  - 01323322b0 Merge pull request #33905 from rallytime/bp-33847
    * b6ebd7b6ef Add docs for arg/kwarg eauth matching
  - 261baeb5b5 Ensure tht pillar have freshest grains (#33910)
  - 00e016ecfc Add note about Xenial packages to 2016.3.0 release notes (#33870)

25.2.25 Salt 2016.3.3 Release Notes

Version 2016.3.3 is a bugfix release for *2016.3.0*.

Known Issues

issue #36055: Salt Cloud events (`salt/cloud`) are not generated on the master event bus when provisioning cloud systems.

Bootstrap Issue #973: `python-futures` is not installed when installing from a git tag on RedHat-based distributions. `Python futures` is needed when

running Salt with the TCP transport. This is fixed on the `develop` branch of the salt-bootstrap repo and the fix will be included in the upcoming release of salt-bootstrap, but is a bug in the bootstrap release that ships with this version of Salt. Please see the salt-bootstrap repo for more information on how to update your bootstrap version.

Changelog for v2016.3.2..v2016.3.3

Generated at: 2018-05-27 04:47:36 UTC

- **PR** #35603: (rallytime) Make sure version label is correct in header
- **PR** #35602: (rallytime) Update release notes for 2016.3.3
- **ISSUE** #35102: (TheBigBear) Exception raised when processing __virtual__ function for mac_system - (mac os x installation relies on un-installed `mac_service_helper.sh') (refs: #35580)
- **PR** #35580: (twangboy) Fix mac_service attempts to parse non-plist files @ *2016-08-19 09:24:38 UTC*
  - 9683bb3c58 Merge pull request #35580 from twangboy/fix_35102
  - 4122e66ed5 Handle malformed plist files
  - 52feff9309 Fix mac_service attempts to parse non-plist files
- **PR** #35586: (hu-dabao) Fix 35420, add run_on_start in build_schedule_item @ *2016-08-19 09:23:32 UTC*
  - c4ec94d6e8 Merge pull request #35586 from hu-dabao/fix-35420
  - 2d3a882cc2 fix 35420, add run_on_start in build_schedule_item, remove redundancy of enabled
  - **PR** #35583: (terminalmage) Fix localemod tests
- **PR** #35579: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-08-18 22:00:41 UTC*
  - d1339fd9f5 Merge pull request #35579 from rallytime/merge-2016.3
  - 00dff9dcbd Merge branch `2015.8' into `2016.3'

  - 26a7f7d9f7 Merge pull request #35577 from terminalmage/unit-file-changes
    * 6cb0fb47f3 pkg/salt-syndic.service: change Type to notify
    * 175ba99e0e pkg/salt-minion.service: remove KillMode, change Type to notify
    * 540ec28954 pkg/salt-master.service: remove KillMode
    * 69fad464ab pkg/salt-api.service: change Type to notify
- **PR** #35571: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-08-18 19:50:03 UTC*
  - f7a18234db Merge pull request #35571 from rallytime/merge-2016.3
  - 2930df924e Update localemod_test systemd.sd_booted mock to use salt.utils.systemd.booted
  - e61b04a707 Merge branch `2015.8' into `2016.3'
    * 2a5d1a0eee fix-35384, fix the logic caused by wrong indent (#35566)
    * feb852f8c0 Clarify config.get docstring (#35492)
    * 205d8e2e7b Merge pull request #35483 from gtmanfred/2015.8
      · 2d8ec1e9db use __opts__ in salt.utils.cloud for cache functions
    * 70fa2d0901 Merge pull request #35546 from whiteinge/salt-api-eauth-fail-gracefully
      · eb3574adae Don't fail hard if the user's permissions cannot be found
      · ec597bd54c Change groups check in token to look for truthy values
    * 61fec6caa9 add missing glob import (#35525)
    * 0e3f2fc6cb Whitespace fix for 2015.8 (#35540)
    * fd3274c800 Merge pull request #35510 from terminalmage/issue33516
      · 5b5f19d269 Update zypper unit test to reflect call to config.get
      · 2730edb516 Add note about systemd-run usage in package states
      · e2d9e87e10 salt/modules/systemd.py: Use systemd-run --scope where needed
      · 22919a25bc Notify systemd on salt-api start
      · a40b3f8a08 Notify systemd on syndic start
      · e847d3af30 Notify systemd on minion start
      · d648887afc salt/modules/zypper.py: Use systemd-run --scope where needed
      · 2e17976722 salt/modules/yumpkg.py: Use systemd-run --scope where needed
      · 86b59c1e74 salt/modules/pacman.py: Use systemd-run --scope where needed
      · e32d92c6d5 salt/modules/ebuild.py: Use systemd-run --scope where needed
      · c7d21d3ae3 salt/modules/aptpkg.py: Use systemd-run --scope where needed
      · f83e0ef242 Add unit tests for salt.utils.systemd
      · 5b12f030c6 Add func to salt.utils.systemd to tell if scopes are available
  - **PR** #35573: (rallytime) Back-port #33337 to 2016.3
  - **PR** #33337: (mzupan) adding the () to make changes work (refs: #35573)
- **PR** #35572: (terminalmage) Fix poor formatting in pkg state docs @ *2016-08-18 18:15:52 UTC*
  - 73b549ed00 Merge pull request #35572 from terminalmage/docs

  - 7d7a7de9e6 Fix poor formatting in pkg state docs
  - **PR** #35545: (hu-dabao) fix-35384, fix cmd.run unless (refs: #35566)
  - **PR** saltstack/salt#35463: (skizunov) Make *auth_timeout* user configurable again (refs: #35489)
- **PR** #35489: (rallytime) Back-port #35463 to 2016.3 @ *2016-08-18 07:16:03 UTC*
  - **PR** #35463: (skizunov) Make *auth_timeout* user configurable again (refs: #35489)
  - f2eb3dc105 Merge pull request #35489 from rallytime/bp-35463
  - bbf7ce121b Remove final self.MINION_CONNECT_TIMEOUT ref
  - cf2e2daab9 Make *auth_timeout* user configurable again
  - **PR** #35538: (thatch45) Treat python XML as an optdep
- **PR** #35526: (thatch45) Always deploy the thin to /var/tmp @ *2016-08-17 19:44:26 UTC*
  - e2bd575461 Merge pull request #35526 from thatch45/ssh_W_tmp
  - a381f02cfe Always deploy the thin to /var/tmp
- **PR** #35522: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-08-17 18:07:16 UTC*
  - 8b770869e4 Merge pull request #35522 from rallytime/merge-2016.3
  - ff212d8976 Whitespace fix
  - c305d8d99b Merge branch `2015.8' into `2016.3'
  - b3b28cb760 Might be a good idea to be able to download the software we make (#35513)
  - 9f87081cef Merge pull request #35302 from Ch3LL/add_job_cache_test
    * ccb2a5cadf remove unused imports
    * 512ae81dfd remove TMP and add integration.TMP
    * c9b7c3cf80 need to add returners option in other places
    * 7316df7a02 fix pylint
    * 50a4f0fe6a fix comment
    * 6837acf742 add job cache integration tests
  - 1c82c6bee5 Merge pull request #35512 from cachedout/fixup_35419
    * 253662541a Fix import
    * f16a30786b Fixes consul.agent_service_register which was broken for registering service checks.
  - e1a373fa4c Merge pull request #35497 from deepakhj/2015.8
    * 685db4ab88 Fix spacing
  - 4048255ed6 Merge pull request #35508 from terminalmage/update-docstring
    * 67c945fce0 Add Carbon to versionadded for git.diff
- **PR** #35516: (rallytime) Back-port #34441 to 2016.3 @ *2016-08-17 15:47:23 UTC*
  - **PR** #34441: (markuskramerIgitt) Copy and delete silently, do not list each file (refs: #35516)
  - e86a39a115 Merge pull request #35516 from rallytime/bp-34441
  - e47c661cb0 Copy and delete silently, do not list each file

  - **PR** saltstack/salt#34502: (markuskramerIgitt) Windows installer build scripts will exit on error (refs: #35517)

- **PR** #35517: (rallytime) Back-port #34502 to 2016.3 @ *2016-08-17 15:47:10 UTC*
  - **PR** #34502: (markuskramerIgitt) Windows installer build scripts will exit on error (refs: #35517)
  - 45080d9860 Merge pull request #35517 from rallytime/bp-34502
  - 32da48df08 setup.py will not print each individual file
  - 698a076a39 Completely remove Python and verify
  - 7406bd22a6 Errors will stop the scripts
- **PR** #35429: (tankywoo) Fix iptables target options with no arguments @ *2016-08-17 10:05:17 UTC*
  - c1deb945d7 Merge pull request #35429 from tankywoo/fix-iptables-target-options
  - 914eb60d51 Fix iptables target options with no arguments
- **ISSUE** #35458: (iggy) SALT.STATES.APACHE_MODULE needs version annotations (refs: #35495)
- **PR** #35495: (rallytime) Use correct deprecated notation instead of a warning for apache_module.enable state function. @ *2016-08-17 09:36:40 UTC*
  - 678759ba6c Merge pull request #35495 from rallytime/fix-35458
  - 9bae3d09a6 Use correct deprecated notation instead of a warning.
- **ISSUE** #35336: (Sylvain303) documentation state.file.managed parameter template not reflecting TEMPLATE_REGISTRY (refs: #35360, #35498, #35406, #saltstack/salt`#35360`_)
  - **PR** saltstack/salt#35360: (rallytime) Add all template registery templates to file.managed docs (refs: #35406)
- **PR** #35498: (rallytime) Add supported templates list to all template doc references in file state @ *2016-08-17 09:33:36 UTC*
  - **PR** #35406: (rallytime) Provide links to the renderers in the template docs (refs: #35498)
  - **PR** #35360: (rallytime) Add all template registery templates to file.managed docs (refs: #35498)
  - 5bd44b10a7 Merge pull request #35498 from rallytime/file-state-docs
  - 6190b2d738 Add supported templates list to all template doc references in file state
- **PR** #35487: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-08-16 18:36:21 UTC*
  - 6df4648765 Merge pull request #35487 from rallytime/merge-2016.3
  - c6c82be1de Merge branch `2015.8' into `2016.3'
  - bfe7107a87 Update bootstrap script to latest stable (2016.08.16) (#35486)
  - 240fc12863 Merge pull request #35413 from cachedout/issue_35296
    * fb8a12d677 Fix silly error
    * 3646cf1afa Additional checks on master and integration test
    * 09efde7634 Splat the list into os.path.join
    * fc0d5878bc Set file_recv on test master
    * 81c4d136c5 Transition file push paths to lists
  - c3319b2a8b Merge pull request #35476 from cachedout/issue_35380
    * c05fcf33d1 Fixup SSH bug where sudo without sudo user would break

  - 004778c966 Merge pull request #35471 from terminalmage/issue34479
    * e243c63e43 win_pkg: Fix traceback when package is not installed
  - 5c9428c32d Merge pull request #35448 from isbm/isbm-zypper-106-fix
    * dd82e6a848 Add ignore_repo_failure option to suppress zypper's exit code 106 on unavailable repos
  - 1473474b04 Merge pull request #35451 from isbm/isbm-zypper-mod_repo-unchanged
    * 8790197d86 Fix Unit test for suppressing the exception removal on non-modified repos
    * 3f00c6997a Remove zypper's raise exception if mod_repo has no arguments and/or no changes
  - a8c4f17f50 Merge pull request #35453 from theothergraham/fix_CacheDisk
    * ae5b233d51 fixes #34279
  - d8c35b5260 Merge pull request #35459 from thatch45/shim_fix
    * 10037b00cb Some environments refuse to return the command output
  - 38b60a32e5 [2015.8] Update bootstrap script to latest stable (2016.08.15) (#35460)
- **ISSUE** #34161: (bobrik) Salt command can hang forever because of one broken minion (refs: #35446)
  - **PR** #35446: (cachedout) Make salt-client aware of edge-case where saltutil might be broken
- **ISSUE** #35422: (ViaviSolutions) aptpkg.py: install_recommends: True does not force ``--install-recommends'' (refs: #35449)
- **PR** #35449: (dkruger) aptpkg will specify --install-recommends if enabled by the SLS @ *2016-08-16 01:38:56 UTC*
  - f90ecbb15e Merge pull request #35449 from dkruger/fix-35422
  - f54bf445b5 aptpkg will specify --install-recommends if enabled by the SLS
- **ISSUE** #33367: (supertom) [salt-cloud] libcloud >= 1.0.0 incompatible regarding node_state (refs: #33518)
- **PR** #35467: (rallytime) Back-port #33518 to 2016.3 @ *2016-08-16 01:17:01 UTC*
  - **PR** #35235: (rallytime) Back-port #33518 to 2016.3 (refs: #35467)
  - **PR** #33518: (tonybaloney) Fix libcloud bug #33367 (refs: #35235, #35467)
  - d2dd78e25b Merge pull request #35467 from rallytime/bp-33518
  - e427815caf fix clrf
  - be41a400fa commit fix
  - 06530b5461 add a test to check existing functionality is broken
  - **PR** #35461: (rallytime) [2016.3] Update bootstrap script to latest stable (2016.08.15)
- **PR** #35456: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-08-15 19:16:23 UTC*
  - 9b2c075611 Merge pull request #35456 from rallytime/merge-2016.3
  - 6a86a12294 Merge branch `2015.8' into `2016.3'
  - d75005c519 Fix cp.push_dir pushing empty dirs (#35442)
  - 09925ba353 Minor doc fixup (#35436)
  - a0b128a85a Merge pull request #35132 from sjorge/2015.8-35121
    * 5cb38c8ae0 switch to fpread().splitlines(), as per @lorengordon suggestion

        * 634f1dded5 fixes #35121, causing lots of mayham (onchange) with 2016.3.2 for me
    - **PR** saltstack/salt#35308: (farcaller) Actually fixed dockerng.list_tags (refs: #35447)
    - **PR** saltstack/salt#34702: (farcaller) Fixed dockerng.list_tags (refs: #35447)
    - **PR** #35447: (ticosax) [dockerng] RepoTags can be also be None with docker 1.12
    - **PR** #34702: (farcaller) Fixed dockerng.list_tags (refs: #`saltstack/salt#35308`_)
- **ISSUE** saltstack/salt#35403: (randomed) Setting ext_job_cache breaks on salt-master (refs: #35427)
    - **PR** #35427: (cachedout) Correct errant call to argspec from master. Fix ext_job_cache.
- **ISSUE** #35423: (Ch3LL) Stacktrace when running state.sls against an sls does not exist (refs: #35428)
    - **PR** #35428: (cachedout) Resolve stacktrace logged by highstate outputter if sls cannot be found
- **PR** #35412: (s0undt3ch) Only allow one sync read to happen at a time. *@ 2016-08-12 23:57:29 UTC*
    - 607169a01b Merge pull request #35412 from s0undt3ch/2016.3
    - f54b3cc514 Only allow one sync read to happen at a time.
- **ISSUE** #35336: (Sylvain303) documentation state.file.managed parameter template not reflecting TEMPLATE_REGISTRY (refs: #35360, #35498, #35406, #saltstack/salt`#35360`_)
    - **PR** saltstack/salt#35360: (rallytime) Add all template registery templates to file.managed docs (refs: #35406)
    - **PR** #35406: (rallytime) Provide links to the renderers in the template docs (refs: #35498)
- **PR** #35393: (deniszh) No need to run ddns update every time *@ 2016-08-12 12:40:36 UTC*
    - b3e9e98b40 Merge pull request #35393 from deniszh/2016.3_fix35350
    - 6f2f080f4a No need to run dns update every time
- **PR** #35407: (hu-dabao) [Fix-35094] None will not be added to grains which generate [none] *@ 2016-08-12 12:34:05 UTC*
    - a5fe05b7f9 Merge pull request #35407 from hu-dabao/fix-35094
    - a23108f795 None will not be added to grains which generate [none]
- **PR** #35411: (eliasp) modules.event.send(): Prevent backtrace for masterless Minions *@ 2016-08-12 12:29:02 UTC*
    - 4dc776ffbf Merge pull request #35411 from eliasp/2016.3-modules.event-handle-file_client-opt
    - 8d7244bdd9 modules.event.send(): Also check for *file_client* and *use_master_when_local* opts
- **PR** #35395: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 *@ 2016-08-11 20:59:37 UTC*
    - c032506e6b Merge pull request #35395 from rallytime/merge-2016.3
    - 0d1aa630f1 Lint fix
    - cf038ee3fe Merge branch `2015.8' into `2016.3'
    - d9c20c0456 Update freebsd.rst (#35394)
    - a375dd7e1f Clean up open filehandles (#35359)
    - 9ea7a34c30 Merge pull request #35339 from isbm/isbm-2015.8-minion-importerror-fix
        * 12af60b7be Fix continuous minion restart if a dependency wasn't installed
    - fd9b05ace4 Merge pull request #35357 from twangboy/file.recurse.clean.2015.8

        * d328ec0157 Fix file.recurse with clean: True

- **ISSUE** #35226: (mathieubouchard) Do not throw an exception when an invalid requisite is set (refs: #35373)
  - **PR** #35373: (cachedout) Raise SaltRenderError on bad requisite
- **PR** #35352: (twangboy) Fix file.recurse with clean: True on Windows (2016.3) @ *2016-08-11 00:46:11 UTC*
  - 72f3548671 Merge pull request #35352 from twangboy/file.recurse.clean
  - ecad616d08 Fix file.recurse with clean: True
- **PR** #35356: (jfindlay) document log levels and warn on all logging below info @ *2016-08-11 00:45:56 UTC*
  - 0fcfc70cc8 Merge pull request #35356 from jfindlay/log_levels
  - 2fc3a55338 utils.verify.verify_log: warn at all levels less than info
  - 72a3f18a2e log.setup: minor optimization
  - 66332510c6 doc.ref.configuration.logging: document log levels
  - 93616eff3e doc.ref.configuration.logging: fix formatting
  - 472a2d31de doc.ref.configuration.logging: cleanup formatting
- **PR** #35358: (twangboy) Update libsodium deps @ *2016-08-11 00:36:30 UTC*
  - 2f7be03053 Merge pull request #35358 from twangboy/update_libsodium_deps
  - d120a8906f Add vcredist 14 dlls
- **ISSUE** #35336: (Sylvain303) documentation state.file.managed parameter template not reflecting TEMPLATE_REGISTRY (refs: #35360, #35498, #35406, #saltstack/salt`#35360`_)
- **PR** #35360: (rallytime) Add all template registery templates to file.managed docs (refs: #35498) @ *2016-08-11 00:35:20 UTC*
  - f9e03b9c59 Merge pull request #35360 from rallytime/fix-35336
  - 30badb5402 Add all template registery templates to file.managed docs
- **ISSUE** #24745: (The-Loeki) RFC: disk versus blockdev (refs: #24893)
  - **PR** saltstack/salt#25267: (jfindlay) Disk module improvements (refs: #35361)
- **PR** #35362: (rallytime) Correct deprecation version tags @ *2016-08-11 00:34:38 UTC*
  - **PR** #35361: (rallytime) Blockdev deprecations (refs: #35362)
  - **PR** #25267: (jfindlay) Disk module improvements (refs: #35362)
  - **PR** #24893: (The-Loeki) Contribution: Disk module improvements (refs: #`saltstack/salt`#25267`_`_, #25267)
  - 3c628d3cbc Merge pull request #35362 from rallytime/correct-deprecated-tag
  - 507827a014 Correct deprecation version tags
- **PR** #35347: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-08-10 20:07:42 UTC*
  - 87e29188c0 Merge pull request #35347 from rallytime/merge-2016.3
  - a651962e95 Merge branch `2015.8' into `2016.3'
  - 4618b433e9 Merge pull request #35323 from thatch45/ssh_crazy
    * 8a5b47b5d7 Collect all error data from the wfuncs call
    * 11864c31b7 supress a stack trace to show clean ssh error

        * 9fbfa282fa wow this solves an issue!
    - cfae862972 Merge pull request #35325 from kev009/fbsd-netstat-route
        * 0d49dd3c29 Fix fbsd netstat route on fbsd 10+
    - 244c3bd495 Pass port to ssh.check_known_host, closes #35264 (#35301)
    - 243909f39d file.recurse: Do not convert octal mode string to int (#35309)
    - **PR** #35334: (cachedout) Restore random_master functionality
- **PR** #35331: (hu-dabao) fix 35165, salt-run jobs.exit_success jid is broken @ *2016-08-10 11:50:10 UTC*
    - 78dfd18ec6 Merge pull request #35331 from hu-dabao/fix-35165
    - 4dcce18d01 fix 35165, salt-run jobs.exit_success jid is broken
- **PR** #35318: (rallytime) Remove legacy compat docs in mysql pillar since the code was removed already @ *2016-08-10 11:34:48 UTC*
    - **PR** #30913: (justinta) Deprecated code removed. (refs: #35318)
    - fcca0b9333 Merge pull request #35318 from rallytime/remove-deprecation-docs
    - 75f205e485 Remove legacy compat docs in mysql pillar since the code was removed already
- **PR** #35329: (hu-dabao) sys.doc will skip all not connected minions @ *2016-08-10 11:18:22 UTC*
    - 3446dc9ec6 Merge pull request #35329 from hu-dabao/fix-tiny-salt-cli
    - 4b806a70ea sys.doc will skip all not connected minions
- **PR** #35306: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-08-09 18:50:44 UTC*
    - 31f7d307a7 Merge pull request #35306 from rallytime/merge-2016.3
    - 2d3eadfe49 Merge branch `2015.8' into `2016.3'
    - 2efc1b333b Merge pull request #35290 from terminalmage/issue35051
        * d621aa7b61 Update runner/wheel unit tests to reflect new key in ret dict
        * 90c12a9c7b Add __orchestration__ key to orch returns for runner/wheel funcs
        * 7b8c3b86e7 Suppress error about invalid changes data for orchestration jobs
        * 54a1704d6c Suppress event for wheel/runner funcs executed from orchestration
        * f409f62bf2 Accept print_event option in WheelClient.cmd()
        * b42b25ccce Add cmd func for RunnerClient
        * 480065fe00 Add print_event option to client mixins
- **PR** #35229: (lubyou) Ignore import error for pwd module in mac_shadow @ *2016-08-09 15:48:16 UTC*
    - 94529d0578 Merge pull request #35229 from lubyou/fix-mac_shadow
    - b45039c240 Do not blindly ignore import failures
    - c1d5670b79 Ignore import error for pwd module
- **PR** #35227: (isbm) Isbm osfinger ubuntu fix @ *2016-08-09 15:38:31 UTC*
    - ce7aeb6ca4 Merge pull request #35227 from isbm/isbm-osfinger-ubuntu-fix
    - fe5da97283 Lintfix: E8303
    - 6eea62d4ec Add a deprecation warning

  - 4dc45f2509 Add grains unit test for Ubuntu systems
  - 3904e4b81c Bugfix: Ubuntu osfinger should contain also minor version
  - a69f97f9ad Bugfix: use oscodename if lsb_distrib_codename key exists empty.
- **PR** #35286: (hu-dabao) fix 34425, a bug that sys.doc cannot output format @ *2016-08-09 09:50:12 UTC*
  - 47e328f755 Merge pull request #35286 from hu-dabao/fix-34425
  - 86fb359f58 fix 34425, a bug that sys.doc cannot output format
- **ISSUE** #27294: (stenstad) salt-cloud should support Openstack Identitiy v3 for authentication (refs: #35213)
- **PR** #35275: (rallytime) Back-port #35213 to 2016.3 @ *2016-08-09 00:02:43 UTC*
  - **PR** #35213: (gtmanfred) add identity v3 support to openstack driver (refs: #35275)
  - d79cb1b4ec Merge pull request #35275 from rallytime/bp-35213
  - 9b9fc508cc add identity v3 support to openstack driver
  - **PR** #35278: (dmurphy18) Increase timeout for siging to 10 seconds when signing rpm packages
- **PR** #35276: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-08-08 18:20:29 UTC*
  - 959a00e4b7 Merge pull request #35276 from rallytime/merge-2016.3
  - 2b4c156df1 Merge branch `2015.8' into `2016.3'
  - f8158124d5 Merge pull request #35211 from cachedout/issue_31074
    * 6f53232e6d Better error handling and a workaround for group mismatch.
    * 5b56a4acf7 Docs
    * ae04e7aaeb Initial POC
  - 3e4eb13daa Merge pull request #35271 from bobrik/default-output-profile
    * 6cdee21036 Default state_output_profile to True everywhere, closes #35166
  - 673e1aa1aa Merge pull request #35233 from terminalmage/issue32719
    * 730a077041 Do not attempt to get fqdn_ip{4,6} grains when ipv{4,6} grains are empty
  - cdf3c0fe73 Merge pull request #35202 from multani/fix/test-doc
    * 1642dba5d1 doc: fix broken links in the test documentation page
  - e1331cd2a3 Merge pull request #35236 from rallytime/bp-35119
    * 9ade78de7b Revise unnecessary code duplication
    * 7c15f5b20a Fix formatting
    * 64f93f8938 Assume two EVRs are equal if E and V are equal but one R is missing.
  - 4f2b8aa5b6 Merge pull request #35240 from derekmaciel/bp-35225
    * 9ed47f713a Add missing documentation for pkg.installed
  - 4bcfaa97d0 Merge pull request #35241 from terminalmage/gitfs-fixes
    * e05648cc2d Break from loop when file is found
    * 6764a88601 Ensure that failed recursion results in no blob object being returned
  - f6d7360e0b Merge pull request #35245 from rallytime/bp-35039
    * 51ab9cd6d4 Add saltenv support to module.run

    - d65a5c7134 Merge pull request #35249 from terminalmage/issue35214
        * bcd5129e9f Fix regression in git.latest when update is fast-forward
        * e2e8bbbfde Add integration test for #35214
- **ISSUE** #35003: (edgan) rabbitmq_user.present broken on Ubuntu 16.04 Xenial (refs: #35232)
- **ISSUE** #34481: (L4rS6) rabbitmq_user.present with password keyword throws exception (refs: #35232)

  - 7302a8a6e5 Merge pull request #35232 from theredcat/fix-rabbitmq-version-detection
  - f75eb2ecc7 Fix runas in code order and make the check_password work with the new >3.5.7 version
  - 4d8119b88b fix rabbitmq version detection using a package-agnostic version
- **PR** #35244: (rallytime) Back-port #31677 to 2016.3 @ *2016-08-06 07:53:28 UTC*
  - **PR** #31677: (miihael) Return correct value for services that must be enabled in Systemd (refs: #35244)
  - 2e9fa3799c Merge pull request #35244 from rallytime/bp-31677
  - 45d563d5ac Return correct value for services that must be enabled in Systemd, not in SysV
- **PR** #35182: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-08-03 20:57:29 UTC*
  - bd0496eef5 Merge pull request #35182 from rallytime/merge-2016.3
  - c35974f78f Merge branch `2015.8' into `2016.3'
  - 67d8dd0fd0 Don't discard running beacons config when listing becaons (#35174)
  - 3754550dd2 Add missing CLI Examples to aws_sqs module funcs (#35173)
  - 4967ed275f doc version update to 2015.8.11, updates to release notes (#35145)
- **PR** #35150: (rallytime) Start release notes for 2016.3.3 @ *2016-08-03 13:46:31 UTC*
  - f9f92ad326 Merge pull request #35150 from rallytime/2016.3.3-release-notes
  - a64026fc99 Start release notes for 2016.3.3
- **PR** #35157: (hu-dabao) master returned from func should be a string as designed so far @ *2016-08-03 13:29:16 UTC*
  - 518ecf897a Merge pull request #35157 from hu-dabao/func-return-string
  - a7506af4c9 master returned from func should be a string as designed so far
  - **PR** #35147: (jacobhammons) doc version updated to 2016.3.2
- **PR** #35136: (s0undt3ch) Don't restart processes if the manager is not set to restart them @ *2016-08-02 18:40:05 UTC*
  - dc7d7db3d5 Merge pull request #35136 from s0undt3ch/2016.3

  - 7b8bf2d2b4 Don't restart processes if the manager is not set to restart them

- **PR** #35133: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-08-02 18:06:18 UTC*
  - bf04bd3316 Merge pull request #35133 from rallytime/merge-2016.3
  - 0d5f0b6016 Merge branch `2015.8' into `2016.3'
  - 81845ee31d Merge pull request #35114 from terminalmage/git_pillar-env-remap-docs
    * 5951554e9f Add clarification docs on a common git_pillar misconfiguration
  - 88a9fb1b31 Merge pull request #34768 from hrumph/bad-installed-state
    * e1fcb8311d Put pkg.latest_version in try/except structure Move refreshed or refresh to different spot (just for code tidyness)
    * e0b6261659 changed name of varibale `refreshed' to `was_refreshed'
    * 340110b4b4 Move check for rtag to outermost-nesting in function
    * ac67c6b493 Lint fix
    * 0435a1375e Get rid of repetition in code by using new ``refreshed'' variable instead
    * 3b1dc978e2 Lint fix
    * a9bd1b92b9 lint fixes
    * 71d69343ef Fixes #34767
  - 343576408f Merge pull request #35043 from rallytime/new-release-notes
    * bdcc81a384 Start release notes file for 2015.8.12

- **PR** #35120: (kstreee) The `_handle_event_socket_recv' function in Salt Api is missing first data of stream. @ *2016-08-02 16:22:50 UTC*
  - dd91006ed7 Merge pull request #35120 from kstreee/fix-missing-first-stream-data
  - 28f793caac Fix missing first data in stream when subscribing stream using a function `read_async'.
  - **PR** saltstack/salt#35011: (nishigori) Fix docstring for code-block of rst (refs: #35131)
  - **PR** #35131: (rallytime) Back-port #35011 to 2016.3
  - **PR** #35011: (nishigori) Fix docstring for code-block of rst (refs: #35131)

- **PR** #35110: (hu-dabao) Do not return job status back to master for master_alive and master_failback schedules @ *2016-08-02 07:49:46 UTC*
  - 77b1f43b0d Merge pull request #35110 from hu-dabao/master-check-lighter
  - 3a3b66e27d dont return job status back to master for master_alive and master_failback schedules

- **PR** #35104: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-08-01 18:56:43 UTC*
  - 94a983f129 Merge pull request #35104 from rallytime/merge-2016.3
  - dda2c32325 Merge branch `2015.8' into `2016.3'
    * 848bf0272f Merge pull request #35050 from terminalmage/fix-saltdev-arg
      · 40cfa7cf17 Avoid needlessly running 2 argspecs in salt.utils.format_call()
      · fd186b7e4c Pass environment as `saltdev' if runner/wheel func accepts a saltdev argument
      · 951b52ab93 Pass __env__ from saltmod orch states to to saltutil.{runner,wheel}
    * 2144178ae0 Merge pull request #35066 from jfindlay/postgres_log

            · c2c442234f returners.postgres_local_cache: do not log in __virtual__

        * 7121618142 Merge pull request #35024 from bobrik/daemon-reload-fix

            · c300615e9d Cache systemd unit update check per unit, closes #34927

        * 865c29f126 Expressly deny a minion if a key cannot be found instead of raising stacktrace (#35026)

- **ISSUE** #32761: (notpeter) Ubuntu 16.04 Xenial Xerus Support (refs: #`saltstack/salt#33870`_)
  - **PR** saltstack/salt#33870: (rallytime) Add note about Xenial packages to 2016.3.0 release notes (refs: #35105)
- **PR** #35105: (rallytime) Update 2016.3.0 release notes with repo.saltstack.com Xenial pkg availability @ *2016-08-01 17:26:55 UTC*
  - 6c056a829e Merge pull request #35105 from rallytime/update-2016.3.0-release-notes
  - fbaff3e98e Update 2016.3.0 release notes with repo.saltstack.com Xenial pkg availability
- **PR** #35059: (vutny) Add *fun_args* field to events generated by execution of Master modules @ *2016-08-01 13:01:42 UTC*
  - 1f8a0fd1e7 Merge pull request #35059 from vutny/event-function-args
  - 19d080445b Add *fun_args* field to events generated by execution of Master modules
- **PR** #34955: (lubyou) force dism to always output english text @ *2016-08-01 12:54:03 UTC*
  - d137c4b986 Merge pull request #34955 from lubyou/fix-dism-on-non-english-systems
  - 63c974a3d0 add missing comma
  - 775ea73578 fix unit tests
  - 51869807f1 force dism to always output english text
- **PR** #35078: (jacobweinstock) added missing non-keyword argument skip_verify to __get_artifact func... @ *2016-08-01 12:22:47 UTC*
  - ff7ddf0b68 Merge pull request #35078 from jacobweinstock/fix-missing-non-keyword-argument
  - c40314ba80 added missing non-keyword argument skip_verify to __get_artifact function
- **PR** #35008: (hu-dabao) Fix multimaster failover on more than two masters and failback behaviour @ *2016-07-29 16:34:37 UTC*
  - 878e200cd9 Merge pull request #35008 from hu-dabao/fix-multimaster
  - 12da890910 Fix multimaster failover on more than two masters and failback behaviour
- **ISSUE** saltstack/salt#33536: (murzick) pkgrepo.managed does not disable a yum repo with ``disabled: True'' (refs: #35055)

  - 1e4e856fb2 Only fail user lookup is the user parameter is required
- **PR** #35029: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-07-28 18:01:35 UTC*
  - bee303db51 Merge pull request #35029 from rallytime/merge-2016.3
  - 65f9365ee0 Merge branch `2015.8' into `2016.3'
  - 2b511f3013 Merge pull request #35000 from rallytime/bp-33875
    - 35696ad637 Pylint fix
    - f9fd6ddd8a Fixup #33875
    - 56b1f6c651 Fix naive fileserver map diff algorithm
  - 837bc6ba7d Merge pull request #34994 from rallytime/bp-34835
    - 9268a793de same thing for the mine in salt-ssh
    - 3e11e19714 Fix the mine in salt ssh
  - **PR** #35021: (terminalmage) Don't add `.' to strerror when passed string ends in ? or !
  - **PR** #34983: (eliasp) modules.slack.post_message: Allow sending messages to direct-message ...
- **PR** #34996: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-07-27 19:03:04 UTC*
  - 05cfb1cefc Merge pull request #34996 from rallytime/merge-2016.3
  - a7d4f93697 Merge branch `2015.8' into `2016.3'
    - b58c663d8d Merge pull request #34991 from cachedout/ssh_timeout
      - 39cd8da399 Lint diff against salt-testing
      - 443e5cdde2 Add timeout to ssh tests
    - 5f8370ae8d Refine errors in client (#34976)
    - a83cdf9339 Merge pull request #34831 from thatch45/recoverssh
    - fa73041a49 If the thin does not match, then redeploy, don't error
  - **PR** #34987: (eliasp) salt.states.slack: check correct result attribute
- **ISSUE** saltstack/salt#34526: (danielmotaleite) salt-ssh + mine = weird error (refs: #34835, #salt-stack/salt`#34835`_)
- **PR** #34835: (thatch45) Make the mine and publish combine minion and master opts in salt-ssh (refs: #34994) @ *2016-07-27 17:25:26 UTC*
  - edeb0eda36 Merge pull request #34835 from thatch45/34526_
  - 1d2477df05 same thing for the mine in salt-ssh
  - 6b6c5ff278 Fix the mine in salt ssh

25.2.26 Salt 2016.3.4 Release Notes

Version 2016.3.4 is a bugfix release for *2016.3.0*.

Statistics

- Total Merges: **275**
- Total Issue References: **119**
- Total PR References: **374**
- Contributors: **80** (BenoitKnecht, Ch3LL, DavidWittman, DmitryKuzmenko, Jlin317, Kimamisa, UtahDave, aaronm-cloudtek, abednarik, ahammond, alertedsnake, alexander-bauer, amontalban, basepi, bl4ckcontact, bx2, cachedout, clarkperkins, clinta, cro, damon-atkins, danlsgiga, darkalia, dmurphy18, do3meli, edhgoose, efficks, eliasp, eradman, fix7, galet, goestin, gtmanfred, hrumph, hu-dabao, isbm, jackywu, jacobhammons, jbonachera, jf, jfindlay, jizhilong, justinta, kstreee, l2ol33rt, lomeroe, lorengordon, maximeguillet, meaksh, mikeadamz, mirceaulinic, morganwillcock, mrproper, multani, nvtkaszpir, oba11, onorua, opdude, orymate, oz123, pass-by-value, pbdeuchler, rallytime, roosri, silenius, skizunov, slinn0, stanislavb, swiftgist, techhat, terminalmage, thatch45, theredcat, ticosax, twangboy, vutny, whiteinge, xbglowx, xiaoanyunfei, yhekma)

Known Issues

The Salt Minion does not clean up files in `/tmp` when rendering templates. This potentially results in either running out of disk space or running out of inodes. Please see issue #37541 for more information. This bug was fixed with PR #37540, which will be available in the `2016.3.5` release of Salt.

The release of the `bootstrap-salt.sh` script that is included with 2016.3.4 release has a bug in it that fails to install salt correctly for git installs using tags in the 2015.5 branch. This bug has not been fixed in the salt-bootstrap repository yet, but the previous bootstrap release (v2016.08.16) does not contain this bug.

Changes

- The *disk.wipe* execution module function has been modified so that it correctly wipes a disk.
- Add ability to clone from a snapshot to the VMWare salt-cloud driver.
- Add ability to specify disk backing mode in the VMWare salt cloud profile.

Changelog for v2016.3.3..v2016.3.4

Generated at: 2018-05-27 04:56:54 UTC

- **PR** #37285: (rallytime) Update 2016.3.4 release notes
- **ISSUE** #37281: (frogunder) 2016.3.4: Raet Transport not working (refs: #37282)
- **PR** #37282: (thatch45) add cpub to raet event for compat *@ 2016-10-27 21:33:48 UTC*
  - 3b62a89e45 Merge pull request #37282 from thatch45/raet_cpub
  - 90f778dbc1 Add func for compat with main event system
  - 8e52f425e4 add cpub to raet event for compat
  - **PR** #37278: (jfindlay) update 2016.3.4 release notes

- **PR** #37252: (vutny) Set logging level to `info' for message about init system detection @ *2016-10-27 06:15:01 UTC*
  - d0ce3de50c Merge pull request #37252 from vutny/suppress-init-grain-error
  - 3f20cc01ed Set logging level to `info' for message about init system detection
  - **PR** #37259: (rallytime) [2016.3] Update man pages for the 2016.3 branch
- **PR** #37257: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-10-26 17:32:36 UTC*
  - 2087cfce90 Merge pull request #37257 from rallytime/merge-2016.3
  - 2066f10d7b Merge branch `2015.8' into `2016.3'
    * f49ccdf30f Merge pull request #37234 from rallytime/bp-37167
      · a7dbb5bfc9 fixes pkgrepo for fedora>22 saltstack/salt#31240
- **ISSUE** #37238: (cmclaughlin) Restarting master causes minion to hang (refs: #37254)
- **ISSUE** #37192: (Ch3LL) 2016.3.4: Windows minion does not kill process running in foreground (refs: #37254)
- **ISSUE** #37191: (Ch3LL) 2016.3.4: Multi-Master Failover minion hangs when masters not running (refs: #37254)
- **ISSUE** #35480: (jelenak) 200 processes of salt-master (2016.3.2) (refs: #36184, #36555, #37254)
- **PR** #37254: (DmitryKuzmenko) Bugs/37191 minion hangs @ *2016-10-26 16:28:41 UTC*
  - ea6155c3f4 Merge pull request #37254 from DSRCorporation/bugs/37191_minion_hangs
  - 9ee24b2d70 Revert ``Don't set the *daemon* flag for LoggingQueue process.''
- **ISSUE** #37187: (darkalia) Supervisord is considered as ``systemd'' in grains (refs: #37218)
- **PR** #37218: (darkalia) Issue #37187 Do not parse first /proc/1/cmdline binary if it's not *b... @ *2016-10-26 01:41:03 UTC*
  - d1a6bb72ac Merge pull request #37218 from darkalia/37187_supervisor_2016.3
  - a8dfc6bb96 Issue #37187 Do not parse first /proc/1/cmdline binary if it's not *bin/init and set supervisord
- **PR** #37239: (Ch3LL) Fix cloud tests timeout @ *2016-10-26 01:11:52 UTC*
  - 760ed9f56d Merge pull request #37239 from Ch3LL/fix_cloud_timeout
  - 394fccf556 fix run_cloud timeout
  - 23947c5944 change timeout for cloud tests
- **PR** #37244: (rallytime) Update bootstrap release to 2016.10.25 @ *2016-10-26 00:46:29 UTC*
  - 6c5f619398 Merge pull request #37244 from rallytime/update-bootstrap
  - f728a5bc7b Update bootstrap release to 2016.10.25
  - **PR** saltstack/salt#36334: (pass-by-value) Add ability to specify disk backing mode for VMware cloud profile (refs: #37245)
- **PR** #37245: (rallytime) Back-port #36334 to 2016.3 @ *2016-10-26 00:41:00 UTC*
  - **PR** #36334: (pass-by-value) Add ability to specify disk backing mode for VMware cloud profile (refs: #37245)
  - bb7caf8c42 Merge pull request #37245 from rallytime/bp-36334
  - f64ca3c442 Update release notes and version added
  - 0a3d266d6b Add ability to specify disk backing mode for VMware cloud profile

- **ISSUE** #37132: (bl4ckcontact) Incorrect flag defined for disabling AD computer account in win_system.py (refs: #37154)
- **PR** #37233: (rallytime) Back-port #37154 to 2016.3 @ *2016-10-25 18:32:56 UTC*
  - **PR** #37154: (bl4ckcontact) modules.win_system.py: Fix flag disabling AD Computer objects (refs: #37233)
  - 3c94315d35 Merge pull request #37233 from rallytime/bp-37154
  - 849af162f1 modules.win_system.py: Fix flag disabling AD Computer objects
- **PR** #37232: (rallytime) Back-port #37153 to 2016.3 @ *2016-10-25 18:32:41 UTC*
  - **PR** #37153: (eradman) Update configuration examples for Joyent (refs: #37232)
  - 94852f2eb1 Merge pull request #37232 from rallytime/bp-37153
  - 3829b7592f Update configuration examples for Joyent
- **PR** #37228: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-10-25 18:22:57 UTC*
  - a913eed92a Merge pull request #37228 from rallytime/merge-2016.3
  - b99d6733b6 Merge branch `2015.8' into `2016.3'
  - d608465d77 Merge pull request #37178 from isbm/isbm-fix-saltapi-ssh-crash
    - 44da411c3a Do not prematurily raise an exception, let the main loop take care of it instead
    - ee48deeded Do not restart the whole thing if roster is not around
    - b8f4e46920 Fix PEP8
- **PR** #37213: (cachedout) More salttesting fixes @ *2016-10-25 07:53:33 UTC*
  - 6aaf6bf399 Merge pull request #37213 from cachedout/more_salttesting_fixes
  - 0bbf06bd86 Lint fix
  - f609917760 Workaround for utils
  - a6a24c2b3b Workaround for tornado test startup error
  - 88bcfa2c0a Fix TCP test
- **ISSUE** #37194: (sjorge) function_cache in modules.mine docs? (refs: #37207)
- **PR** #37207: (cachedout) Correct documentation for mine_functions @ *2016-10-25 07:25:09 UTC*
  - b448455c31 Merge pull request #37207 from cachedout/issue_37194
  - 9fcdf6da94 Correct documentation for mine_functions
- **ISSUE** #37182: (Ch3LL) 2016.3.4: multi-master minion stack trace when killed with ctrl+c (refs: #37208)
- **PR** #37208: (cachedout) Give multimion a process manager and its own destroy method @ *2016-10-25 07:24:52 UTC*
  - a5e1c041cc Merge pull request #37208 from cachedout/issue_37182
  - 1449770b0b Give multimion a process manager and its own destroy method
- **PR** #37206: (cachedout) Address transport test hang @ *2016-10-25 05:25:55 UTC*
  - e19ee88b6b Merge pull request #37206 from cachedout/transport_test_hang
  - c4393d5e9e Address transport test hang
- **PR** #37179: (isbm) Fix Salt-API ssh crash (2016.3) @ *2016-10-25 04:52:19 UTC*

  - 6737fd3ad9 Merge pull request #37179 from isbm/isbm-fix-saltapi-ssh-crash-2016-3
  - 28edda457e Do not prematurily raise an exception, let the main loop take care of it instead
  - 372f2bbd93 Do not restart the whole thing if roster is not around
  - 8d1450cc47 Fix PEP8
- **ISSUE** saltstack/salt#37176: (guettli) docs for ``load tags'' explains ``import_yaml'' (refs: #37183)
- **PR** #37183: (gtmanfred) load tags should reference the actual load tags @ *2016-10-25 04:38:00 UTC*
  - 815dfd1c04 Merge pull request #37183 from gtmanfred/2016.3
  - 1b7b4b1a0c load tags should reference the actual load tags
- **PR** #37188: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-10-25 04:37:26 UTC*
  - ca63376c97 Merge pull request #37188 from rallytime/merge-2016.3
  - ccb664050d Merge branch `2015.8' into `2016.3'
  - b3e79dcd51 Merge pull request #37139 from awerner/fix-spm-download-remote-download
    * a606a42575 Minor style change
    * e3916813bb Download spm package from remote repository and save it to cache directory
  - 35b4494157 Merge pull request #37162 from rallytime/bp-36823
    * 3032a542d9 Use NotifyAccess=all in all unit files
    * 4826995973 Remove EnvironmentFile and Restart lines from unit files
    * 3be15694d2 Use Type=notify for debian systemd units
    * d58fda6f67 Use control-group default for killmode
  - **PR** #37186: (rallytime) Pylint fix for 2016.3
  - **PR** #37175: (cachedout) Fix test hang (refs: #37186)
- **PR** #37175: (cachedout) Fix test hang (refs: #37186) @ *2016-10-24 09:55:37 UTC*
  - 0d7af935e5 Merge pull request #37175 from cachedout/fix_test_hange
  - 0fecb5ff2e Remove sleep. Thanks @s0undt3ch
  - cedc609503 Fix test suite hang on salt testing
- **ISSUE** #36866: (sjorge) [2016.11.0rc1] salt-master <> salt-minion communication borken due to master_alive_interval (refs: #37144, #37117, #37142)
- **PR** #37144: (DmitryKuzmenko) Bugs/36866 salt minion communication broken 2016.3 @ *2016-10-24 03:19:06 UTC*
  - **PR** #37142: (DmitryKuzmenko) status.master: don't fail if host_to_ips returns None (refs: #37144)
  - **PR** #37117: (DmitryKuzmenko) Updated host_to_ip to return all the IPs instead of the first one. (refs: #37144, #37142)
  - 334313ec64 Merge pull request #37144 from DSRCorporation/bugs/36866_salt-minion_communication_broken_2016.3
  - 87c2e93e40 Don't fail if host_to_ips returns None.
  - f625e6d3a9 Updated host_to_ip to return all the IPs instead of the first one.
- **PR** #37158: (jfindlay) add mock for *status.uptime* unit test (refs: #37157) @ *2016-10-24 03:13:53 UTC*

  - **PR** #37157: (jfindlay) Implement *status.uptime* on macOS (refs: #37158)
  - c5d81a8ade Merge pull request #37158 from jfindlay/mac_skip_uptime
  - 094eac06eb modules.status.uptime unit test: mock on linux
- **ISSUE** #37037: (mikeadamz) schedule state always reports changed when running in highstate (refs: #37098)
- **PR** #37161: (rallytime) Back-port #37098 to 2016.3 @ *2016-10-24 03:13:14 UTC*
  - **PR** #37098: (mikeadamz) Add run_on_start to SCHEDULE_CONF (refs: #37161)
  - e51f90b459 Merge pull request #37161 from rallytime/bp-37098
  - 36bc2a1ded Add run_on_start to SCHEDULE_CONF
- **PR** #37159: (rallytime) Back-port #37107 to 2016.3 @ *2016-10-22 13:55:47 UTC*
  - **PR** #37107: (do3meli) use versionadded and deprecated warnings in apache_module (refs: #37159)
  - b5025c044e Merge pull request #37159 from rallytime/bp-37107
  - c63126a2f0 removed trailing whitespaces in apache_module.py
  - a812cbfea7 use versionadded and deprecated warnings in apache_module
- **PR** #37163: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-10-22 13:52:37 UTC*
  - 1e520b3f48 Merge pull request #37163 from rallytime/merge-2016.3
  - 8fff95b3b4 Merge branch `2015.8' into `2016.3'
  - a5335a2f15 Merge pull request #37137 from awerner/fix-spm-msgpack
    * 52d47cece9 SPM-METADATA are now loaded as yaml from remote URLs
  - 8c46d69251 Merge pull request #37109 from meaksh/zypper-distupgrade-support-2015.8
    * 330f830c9b Disables `novendorchange' for old SLEs versions
    * 01b0a6917c Minor pylint fixes
    * 7dbb0bd252 Unit tests fixes
    * e89982b6d2 Improves `dryrun' outputting. Setting `novendorchange' as not supported for SLE11
    * c5a34cbadf Adds multiple repositories support to `fromrepo' parameter
  - 38fdd28962 Merge pull request #37087 from vutny/gpg-fix-short-keyid
    * c589cba8a9 salt.modules.gpg: allow getting keys by short key ID
  - 3a37a22366 Merge pull request #37088 from meaksh/zypper-distupgrade-support-2015.8
    * c0641a4027 Fix in log message
    * a092a974da Refactor: Cleanup and pylint fixes
    * 1331ae5c72 Unit tests for zypper upgrade and dist-upgrade
    * 4bcfef2ba2 Adding `dist-upgrade' support to zypper module
  - 2f29e9e956 Merge pull request #37090 from zer0def/silence-prereq-supervisord-warnings
    * 6a4bfbb485 Silence warnings about ``__prerequired__'' being an invalid kwarg when using *prereq*. (no refs)
  - **PR** #37150: (rallytime) Allow the minion test daemons a couple of tries to connect to the master
  - **PR** #37152: (rallytime) Add note about salt-bootstrap known issue for 2016.3.4

- **PR** #37135: (aaronm-cloudtek) Fix example signing policy in salt.states.x509 docs @ *2016-10-21 11:45:24 UTC*
  - 8de7b39b5e Merge pull request #37135 from Cloudtek/x509-docs-fix
  - ce87f7311b Fix example signing policy in salt.states.x509 docs
- **PR** #37140: (vutny) pkgbuild.repo: fix GPG signing with *use_passphrase=False* @ *2016-10-21 09:37:54 UTC*
  - 41ae90d3c3 Merge pull request #37140 from vutny/pkgbuild-repo-sign-with-no-passphrase
  - 409a3100a7 pkgbuild.repo: fix GPG signing with *use_passphrase=False*
- **PR** #37071: (vutny) pkgbuild.repo: add *timeout* parameter for waiting passphrase prompt @ *2016-10-21 05:20:26 UTC*
  - 96a1292a7e Merge pull request #37071 from vutny/pkgbuild-repo-gpg-sign-timeout
  - cfc3a0ed92 pkgbuild.repo: add *timeout* parameter for waiting passphrase prompt
- **ISSUE** saltstack/salt#31454: (johje349) Salt Mine memory leak (refs: #36024)
- **ISSUE** #37018: (tsaridas) get events from python (refs: #37115)
- **ISSUE** #31454: (johje349) Salt Mine memory leak (refs: #36720)
- **PR** #37115: (DmitryKuzmenko) Backport/36720 fix race condition @ *2016-10-21 05:16:15 UTC*
  - **PR** #36720: (skizunov) Fix race condition when returning events from commands (refs: #37115)
  - **PR** #36024: (DmitryKuzmenko) Don't subscribe to events if not sure it would read them. (refs: #36720)
  - 274120300d Merge pull request #37115 from DSRCorporation/backport/36720_fix_race_condition
  - d7e3209e13 For IPCClient, remove entry from instance map on close
  - 82e27634a7 Fix race condition when returning events from commands
- **PR** #37119: (jfindlay) log.setup: only assign user if defined @ *2016-10-21 05:14:55 UTC*
  - **PR** #36203: (xiaoanyunfei) fix owner of MultiprocessingLoggingQueue (refs: #37119)
  - 169a82e62b Merge pull request #37119 from jfindlay/log_proc_user
  - 8c29949a0e log.setup: only assign user if defined
  - 1d503f032c tests.integration: pass opts as a dict
  - **PR** #37126: (Ch3LL) fix digital ocean image name in profile
  - **PR** #37125: (jfindlay) add 2016.3.4 release notes
- **PR** #37120: (rallytime) Back-port #36246 to 2016.3 @ *2016-10-20 19:38:32 UTC*
  - **PR** #36418: (rallytime) Back-port #36246 to 2016.3 (refs: #37120)
  - **PR** #36246: (twangboy) Fix test_issue_6833_pip_upgrade_pip test on OS X (refs: #36418, #37120)
  - 2a35f57be8 Merge pull request #37120 from rallytime/bp-36246
  - f1c8d98119 Skip weird_install test on Mac OS X
  - 90de794290 Fix test_issue_6833_pip_upgrade_pip test on OSX
- **PR** #37103: (cachedout) Remove unnecessary sleep from unit.utils.process_test.TestProcessMana... @ *2016-10-20 08:45:07 UTC*
  - 0b87e7890a Merge pull request #37103 from cachedout/fix_proc_test
  - d7aebd1877 Remove unnecessary sleep from unit.utils.process_test.TestProcessManager.test_restarting

- **PR** #36823: (terminalmage) Update debian systemd unit files to use default KillMode, Type=notify (refs: #37162) @ *2016-10-20 05:54:42 UTC*
  - **PR** #36806: (l2ol33rt) Deb systemd should use control-group default for killmode (refs: #36823)
  - 326bbd5e30 Merge pull request #36823 from terminalmage/pr-36806
  - fb6e545f78 Use NotifyAccess=all in all unit files
  - 0ccf789172 Remove EnvironmentFile and Restart lines from unit files
  - ddd44e9b13 Use Type=notify for debian systemd units
  - 036d73f31b Use control-group default for killmode
- **PR** #37030: (isbm) Fix status.uptime for Solaris 9, 10 and 11. @ *2016-10-20 05:52:53 UTC*
  - 0c40e71e17 Merge pull request #37030 from isbm/isbm-solaris-status-fix
  - 7d7b5ef9a9 Lintfix: E8303 too many blank lines
  - c11940d14c Fix status.uptime for Solaris 9, 10 and 11.
- **PR** #37101: (rallytime) [2016.3] Merge forward from 2016.3 to carbon @ *2016-10-20 05:39:24 UTC*
  - eb88c73222 Merge pull request #37101 from rallytime/merge-2016.3
  - b445a5e579 Merge branch `2015.8' into `2016.3'
  - 68eeb29783 Add warning about GitPython 2.0.9 incompatibility with Python 2.6 (#37099)
  - 39d59ab0df Merge pull request #36880 from vutny/cp-get-salt-url
    * d1ab98b459 cp.get_url: update usage doc and add tests for *file://* URL with *dest=None*
    * c7cf79e959 cp.get_url: add note and test for https:// URL with `dest=None`
    * ff55f77179 cp.get_url: write more verbose docstring
    * 94a34a08ba cp.get_url: add integration tests
    * 983f82fcf4 cp.get_url: fix variable type check
    * b33f4d7b93 cp.get_url: log error message if no file could be fetched from *salt://* URL
    * 99cf3038cc cp.get_url: fix *dest=None* behaviour with *salt://* URL
- **PR** #36958: (twangboy) Fix bug where cmd.powershell fails to return @ *2016-10-19 16:03:58 UTC*
  - 8d44efed78 Merge pull request #36958 from twangboy/fix_cmd_powershell
  - 427be7b422 Add versionadded
  - d8e0e0e482 Fix missing comma
  - 7b46d04a84 Add note about increased completion times
  - 9365581a36 Clarify docs, add depth option
- **PR** #37086: (cachedout) Make salt-call a first-class citizen for multi-master @ *2016-10-19 15:19:09 UTC*
  - beb54b3ffa Merge pull request #37086 from cachedout/mm_req
  - 7dc15c1a48 Lint utils
  - 9bbe3c998b Lint error in publish
  - e22a3d2be6 Add multi-master support to publish.publish
  - 7f141ba38c Add function to search for substr in list

  - 007eef84d7 Extend support to event.fire_master
  - 8171c73b00 Multi-master support for salt-call
- **ISSUE** #36814: (martin-helmich) x509.create_csr creates invalid CSR (refs: #36898)
- **PR** #36898: (clinta) X509 fixes @ *2016-10-19 03:03:43 UTC*
  - 6b94153ea6 Merge pull request #36898 from clinta/x509-fixes
  - e732fe7725 fix docs on CSR state
  - 9b6f1a336c fix quotes and remove dependency on pkg_resources
  - eb4433d1ae return early if there are no requested extensions in the csr
  - d00cf8ef87 allow specifying digest for crl
  - dd50705e58 fix #36814
- **ISSUE** #34872: (cbuechler) ``Minion did not return'' executing state with long running command, 2016.3 regression (refs: #37025)
- **PR** #37025: (cro) Make salt.utils.minion._check_cmdline work on OSes without /proc. @ *2016-10-19 03:00:10 UTC*
  - a32b8cd741 Merge pull request #37025 from cro/freebsd_no_proc
  - 1ac87e0efd Make salt.utils.minion._check_cmdline work on OSes without /proc.
- **PR** #37050: (twangboy) Fix service state for Windows (DO NOT MERGE FORWARD) @ *2016-10-19 02:46:27 UTC*
  - **PR** #36923: (twangboy) Fix service state for Windows (refs: #37050)
  - e09d9f85c5 Merge pull request #37050 from twangboy/fix_win_service_state
  - b3b688e298 Fix tests
  - 1e1ee786c9 Set service to manual if disabled on start
  - **PR** saltstack/salt#29322: (mrproper) add http proxy support for tornado (refs: #37076)
- **PR** #37076: (jfindlay) Document proxy settings @ *2016-10-19 02:30:27 UTC*
  - 5e998638a4 Merge pull request #37076 from jfindlay/proxy_doc
  - 7328df68f5 doc.topic.tutorials.http.query: add proxy section
  - 331072b35d doc.topic.tutorials.http.query: add subheadings
  - 478def4923 doc.ref.configuration.minion: add proxy vars
- **ISSUE** #37001: (phil123456) URGENT : archive.extracted does not work anymore (refs: #37081)
- **PR** #37081: (terminalmage) Fix archive.extracted remote source_hash verification @ *2016-10-19 02:22:22 UTC*
  - 9ec366833e Merge pull request #37081 from terminalmage/issue37001
  - a3c4deeb82 Fix archive.extracted remote source_hash verification
- **ISSUE** #35097: (jwhite530) Minions die with ``un-handled exception from the multiprocessing process'' (refs: #37064)
- **PR** #37064: (cachedout) Unify job check in scheduler @ *2016-10-19 02:08:06 UTC*
  - 67faee1f94 Merge pull request #37064 from cachedout/issue_35097
  - 980ba892c9 Unify job check in scheduler

- **PR** #37072: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-10-18 15:23:17 UTC*
  - 7ef10f6de6 Merge pull request #37072 from rallytime/merge-2016.3
  - 78a144f19a Merge branch `2015.8' into `2016.3'
  - 7dd91c2880 Merge pull request #37053 from rallytime/update-fedora-install-docs
    - 24e0f5e024 Update the Fedora installation docs
  - 4eb0a89b7c remove options from pylint (#37054)
- **PR** #37049: (terminalmage) Further clarification on new grains docs from #37028 @ *2016-10-18 01:47:57 UTC*
  - **PR** #37028: (damon-atkins) Update topics/grains doco, about considerations before adding a Grain (refs: #37049)
  - 71fd01ab8d Merge pull request #37049 from terminalmage/grains-docs
  - 854586c6a4 Add one more paragraph
  - a0502a7b90 Restructure grain writing docs
  - 4e419e90ac Further clarification on new grains docs from #37028
- **ISSUE** saltstack/salt#18419: (jasonrm) salt-cloud fails to run as non-root user (refs: #35483)
- **ISSUE** #34806: (jerrykan) salt-cloud ignores sock_dir when firing event (refs: #35483)
- **PR** #37057: (rallytime) [2016.3] Update salt.utils.cloud references to __utils__ for cache funcs @ *2016-10-18 01:31:43 UTC*
  - **PR** #35483: (gtmanfred) use __utils__ in salt.cloud (refs: #35855, #37057, #36070)
  - 9a6671ce69 Merge pull request #37057 from rallytime/cloud-utils-cleanup
  - d0dc7d4e55 [2016.3] Update salt.utils.cloud references to __utils__ for cache funcs
- **PR** #36977: (twangboy) Remove whitespace from string commands @ *2016-10-17 22:32:03 UTC*
  - f8cd7b7b28 Merge pull request #36977 from twangboy/fix_cmd_run
  - 6586050736 Move strip to powershell block, add -NoProfile
- **PR** #37048: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-10-17 16:05:48 UTC*
  - 9378b22d80 Merge pull request #37048 from rallytime/merge-2016.3
  - 5efd6d3df9 Merge branch `2015.8' into `2016.3'
  - 7f5aced50e Merge pull request #36972 from zer0def/supervisor-state-fixes
    - 53801c6e80 Mitigates failure reports when making sure an existing supervisor process group is running, despite success.
  - 4e2ad07b0f Prevent source files in /tmp from being deleted by file.managed states (#37023)
  - 4e9824a65e args does not always exist (#37019)
- **PR** #37028: (damon-atkins) Update topics/grains doco, about considerations before adding a Grain (refs: #37049) @ *2016-10-17 09:54:21 UTC*
  - 104a153a1f Merge pull request #37028 from damon-atkins/update_topics_grains_doco
  - 01e83a715e doc/topics/grains Update doco on when a grain should be created
  - a0e1fcc951 Add information to consider before adding a Grain to doco's for Grains
- **PR** #37012: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-10-14 18:07:03 UTC*

  - c30656814d Merge pull request #37012 from rallytime/merge-2016.3
  - a7c9a72104 Merge branch `2015.8' into `2016.3'
  - c6254d59fd Merge pull request #36807 from terminalmage/issue36723
    * 7d60e73308 Fix pillar merging when ext_pillar_first is enabled
  - e2bc94b029 cp.get_file_str: do not fail if file not found (#36936)
- **ISSUE** #34397: (jaredhanson11) ignore_epoch needs to be passed through to version_cmp functions (refs: #34531)
  - **PR** #37007: (skizunov) opkg: Support ignore_epoch argument in version comparisons
  - **PR** #34531: (terminalmage) Support ignore_epoch argument in version comparisons (refs: #37007)
- **PR** #36808: (gtmanfred) allow for closing stuff in beacons (refs: #36835) @ *2016-10-14 15:50:09 UTC*
  - 8b3e65448d Merge pull request #36808 from gtmanfred/beacons
  - 727d4f309a allow for closing stuff in beacons
  - **PR** #36993: (terminalmage) Make helper funcs private
- **ISSUE** #27316: (efficks) Extracted state with zip format failed on Windows (refs: #27317)
- **ISSUE** #27207: (PredatorVI) archive.extracted state not preserving file permissions (refs: #33906)
- **ISSUE** #26569: (ssgward) Add support for password-protected zip files in archive.extracted on Windows (refs: #31116)
- **ISSUE** #23822: (sidcarter) Zip file extracted permissions are incorrect (refs: #25128)
  - **PR** saltstack/salt#36539: (jfindlay) Prefer archive.cmd_unzip (refs: #`saltstack/salt`#36648`_`_, #36648)
- **PR** #36986: (jfindlay) modules.archive.unzip: zipfile is stdlib @ *2016-10-13 21:38:00 UTC*
  - **PR** #36648: (jfindlay) Integration tests for archive execution module (refs: #36986)
  - **PR** #33906: (lomeroe) Archive unzip permissions (refs: #36539, #saltstack/salt`#36539`_)
  - **PR** #31116: (UtahDave) Add password support for zip files in archive module and state (refs: #36539, #saltstack/salt`#36539`_)
  - **PR** #27764: (basepi) Merge forward from 2015.8 to develop (refs: #36539, #saltstack/salt`#36539`_)
  - **PR** #27317: (efficks) State unzip should use unzip command instead of unzip_cmd. (refs: #36539, #saltstack/salt`#36539`_)
  - **PR** #25128: (stanislavb) Use cmd_unzip to preserve permissions (refs: #36539, #saltstack/salt`#36539`_)
  - a75761de87 Merge pull request #36986 from jfindlay/arch_test
  - 2ec2684860 modules.archive.unzip: zipfile is stdlib
- **ISSUE** #36422: (rippiedoos) No error Reporting for (yum)pkg.upgrade (refs: #`saltstack/salt#36450`_)
  - **PR** saltstack/salt#36980: (rallytime) Skip pkg.upgrade test if pkg install/upgrade has problems (refs: #36981)
  - **PR** saltstack/salt#36450: (terminalmage) Normalize pkg.upgrade and raise CommandExecutionError on failure (refs: #36981, #`saltstack/salt#36980`_)
- **PR** #36981: (rallytime) Skip pkg.upgrades test on distros other that Suse in 2016.3 @ *2016-10-13 21:29:36 UTC*
  - c7595b84a7 Merge pull request #36981 from rallytime/upgrades-test-fix
  - a5ae737057 Skip pkg.upgrades test on distros other that Suse in 2016.3

- **ISSUE** #36671: (wrigtim) systemd.py available() breaks on latest LSB-compliant versions of systemd (refs: #36755)
- **PR** #36755: (terminalmage) systemd.py: check retcode for service availability in systemd >= 231 @ *2016-10-13 19:41:50 UTC*
  - 6b782c15e1 Merge pull request #36755 from terminalmage/issue36671
  - d916c2b49c Handle cases where retcode/output feature is backported
  - b3364646ad Update systemd module unit tests
  - a2439acbc9 systemd.py: check retcode for service availability in systemd >= 231
- **ISSUE** #36746: (Ch3LL) Carbon: When killing a job jid output missing (refs: #36750)
- **PR** #36750: (terminalmage) Add the CLI client and pub_data as class attributes @ *2016-10-13 19:38:33 UTC*
  - 10d255c511 Merge pull request #36750 from terminalmage/issue36746
  - 0e7c600e02 Only display Ctrl-c message on SIGINT
  - 9025be48c5 Include the jid (when available) in SystemExit message on Ctrl-c
  - 9c9f1f620b Add the CLI client and pub_data as class attributes
- **ISSUE** #36240: (hrumph) win_certutil add_store state not installing certificates (refs: #36241)
- **PR** #36241: (hrumph) Fixes #36240 @ *2016-10-12 23:28:35 UTC*
  - 3ac9ced202 Merge pull request #36241 from hrumph/cert_problem
  - 51230fc263 Merge pull request #1 from rallytime/pr-36241
    - 32846794c8 Update mocks for failing tests in win_certutil_test
  - b26578d1ac Fixes #36240
- **PR** #36950: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-10-12 20:57:41 UTC*
  - c1f84388d6 Merge pull request #36950 from rallytime/merge-2016.3
  - 1d3ce45ac0 Merge branch `2015.8' into `2016.3'
    - 2ccc44f314 Merge pull request #36914 from rallytime/suse_show_link
      - b8ffd9f53f Allow alternatives.show_link function to work on Suse distros
  - 5362e5183e Merge branch `2015.8' into `2016.3'
  - fe2f094838 salt.modules.gpg: initialize GnuPG home dir with correct ownership (#36824)
  - 4b21cca909 Fix race condition in which files were removed during a file.directory (#36928)
  - 7838d8d3f9 Remove ``Targeting with Executions'' section from docs (#36925)
  - a56bf8bd2d Update references to future default value change that was reverted (#36924)
- **PR** #36948: (rallytime) Back-port #36943 to 2016.3 @ *2016-10-12 18:33:02 UTC*
  - **PR** #36943: (orymate) doc: document what the argument of salt --subset means (refs: #36948)

  - c79f525863 Merge pull request #36585 from twangboy/add_pyopenssl
  - 5fc63a1054 Add pyOpenSSL to req file for Windows
- **ISSUE** #36568: (lkx007) cp.push remove_source problem (refs: #36572)
  - **PR** #36572: (cachedout) Fix salt.utils.rm_rf to delete files too
- **ISSUE** #36491: (cro) pkg.upgrade does not upgrade on Leap 42.1 or Tumbleweed (refs: #36495)
- **PR** #36495: (cro) Fix pkg.upgrade for zypper @ *2016-09-26 10:02:39 UTC*
  - d0dd92b037 Merge pull request #36495 from cro/zypper_fix
  - 6c5807c4be Fix pkg.upgrade for zypper
- **ISSUE** #27316: (efficks) Extracted state with zip format failed on Windows (refs: #27317)
- **ISSUE** #27207: (PredatorVI) archive.extracted state not preserving file permissions (refs: #33906)
- **ISSUE** #26569: (ssgward) Add support for password-protected zip files in archive.extracted on Windows (refs: #31116)
- **ISSUE** #23822: (sidcarter) Zip file extracted permissions are incorrect (refs: #25128)
- **PR** #36539: (jfindlay) Prefer archive.cmd_unzip @ *2016-09-26 10:02:11 UTC*
  - **PR** #33906: (lomeroe) Archive unzip permissions (refs: #36539, #saltstack/salt`#36539`_)

  - **PR** #31116: (UtahDave) Add password support for zip files in archive module and state (refs: #36539, #saltstack/salt`#36539`_)
  - **PR** #27764: (basepi) Merge forward from 2015.8 to develop (refs: #36539, #saltstack/salt`#36539`_)
  - **PR** #27317: (efficks) State unzip should use unzip command instead of unzip_cmd. (refs: #36539, #saltstack/salt`#36539`_)
  - **PR** #25128: (stanislavb) Use cmd_unzip to preserve permissions (refs: #36539, #saltstack/salt`#36539`_)
  - 4bca246a27 Merge pull request #36539 from jfindlay/arch_perms
  - d64ae48783 states.archive: use archive.cmd_unzip when possible
  - 928a7891b4 modules.archive.unzip: log a warning about perms
- **ISSUE** #36514: (nilliams) salt.stages.hg errors when -identity option is used (refs: #36546)
- **PR** #36546: (rallytime) Mercurial Module: Pass the identity_path portion as own arg @ *2016-09-26 09:44:30 UTC*
  - ab50cde391 Merge pull request #36546 from rallytime/fix-36514
  - 9afe76759e Mercurial Module: Pass the identity_path portion as own arg
- **ISSUE** #35480: (jelenak) 200 processes of salt-master (2016.3.2) (refs: #36184, #36555, #37254)
- **PR** #36555: (DmitryKuzmenko) Bugs/35480 master shutdown @ *2016-09-26 09:25:43 UTC*
  - aea55fce61 Merge pull request #36555 from DSRCorporation/bugs/35480_master_shutdown
  - 6ad2998715 Wait for kill in ProcessManager should be greater in main process than in subprocess.
  - c9c45a5d79 Don't set the *daemon* flag for LoggingQueue process.
- **PR** #36542: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-09-23 22:47:26 UTC*
  - a1e0afe1c7 Merge pull request #36542 from rallytime/merge-2016.3
  - 861a001749 Merge branch `2015.8' into `2016.3'
  - 07c9d040c0 Fixup the rabbitmq_user state test failure (#36541)
- **ISSUE** #29421: (scbunn) pillar data leaks through environments (refs: #36435, saltstack/salt#36435)
  - **PR** #36532: (rallytime) Back-port #36435 to 2016.3
  - **PR** #36435: (yhekma) Add ``none'' as a pillar merging strategy (refs: #36532)
  - **PR** #36535: (rallytime) Be explicit about the salt.utils.templates import
  - **PR** #36537: (rallytime) Wrap the entire GrainsAppendTestCase class with destructiveTest
- **PR** #36529: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-09-23 16:42:42 UTC*
  - 55cf4d6a04 Merge pull request #36529 from rallytime/merge-2016.3
  - 52cf40db8c Merge branch `2015.8' into `2016.3'
  - 1c3758544c Merge pull request #36441 from twangboy/update_setup
    * fc4a03a75d Check for existing library on Windows
- **PR** #36483: (dmurphy18) Isolate sun IPv6 fix to Sun OS only @ *2016-09-23 09:24:54 UTC*
  - 03491634ff Merge pull request #36483 from dmurphy18/aix_fix_ipv6
  - b68f982c6a Updated check as per code review
  - cbcdb472fe Isolate SUN IPv6 fix to Sun Os only

- **ISSUE** #36279: (alertedsnake) state.postgres_privileges should allow grants to ALL tables/sequences. (refs: #36280)
- **PR** #36280: (alertedsnake) Feature/2016.3 better postgresql grants @ *2016-09-23 07:55:32 UTC*
  - **PR** #36249: (alertedsnake) Quote postgres privilege target names (refs: #36280)
  - 654fa8d770 Merge pull request #36280 from jwplayer/feature/2016.3-better-postgresql-grants
  - e7a597da00 Bugfix: don't concatenate when not needed
  - ba60b7972a Additional documentation.
  - 8b877f014d `All' grants for PostgreSQL.
- **PR** #36508: (twangboy) Fix chocolatey @ *2016-09-23 07:36:03 UTC*
  - 8104d5c92a Merge pull request #36508 from twangboy/fix_chocolatey
  - a7c858d9ab Fix retcodes
  - feadd827a7 Add additional functionality to upgrade
  - fb5eb4dc03 Fix retcodes, add upgrade function
- **PR** #36519: (terminalmage) Rewrite minionfs walkthrough @ *2016-09-23 05:19:59 UTC*
  - 364f74dfc9 Merge pull request #36519 from terminalmage/docs
  - 2df51ce3e9 Rewrite minionfs walkthrough
  - cc9d41fb0e Change items in minionfs blacklist/whitelist example
- **PR** #36505: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-09-22 17:37:33 UTC*
  - 6f54e16cdf Merge pull request #36505 from rallytime/merge-2016.3
  - 5bd4d6430b Merge branch `2015.8' into `2016.3'
  - bf6195b9a6 *postgres_extension* state: small corrections in docstrings (#36500)
  - b021ea5d40 Merge pull request #36464 from vutny/postgres-tablespace-options
    - 580aed87b9 Fix *options* parameter processing in *postgres_tablespace.present*
- **ISSUE** #35813: (UtahCampusD) Empty dictionary returned from grains.items command within local client (refs: #36496)
- **PR** #36496: (cachedout) Add repr to namespacedict @ *2016-09-22 04:34:11 UTC*
  - 464c4305f9 Merge pull request #36496 from cachedout/namespace_repr
  - 333842c319 Add repr to namespacedict
- **PR** #36474: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-09-22 04:16:58 UTC*
  - a0f838af36 Merge pull request #36474 from rallytime/merge-2016.3
  - 8805b57a1e Merge branch `2015.8' into `2016.3'
    - 41d3c09857 Merge pull request #35433 from terminalmage/issue34790
      - 71b51f49ba Add integration tests for PR #35433
      - 82515eccde Add an additional hint for cases where rev == `HEAD'
      - 4b7e2f9475 git.latest: Add a hint for possible rev changes resulting in non-fast-forward failures
    - 87263b9387 Merge pull request #36445 from notpeter/salt_cloud_iam_role

        - 469d1a61fe Remove (required).
        - 98449e66f5 Better docs for use-instance-role-credentials.
- **ISSUE** #36475: (amendlik) GitFS online documentation is missing a section present in the code (refs: #36478)
- **PR** #36478: (rallytime) Add the ``bash'' option to the ``code-block''directive. @ *2016-09-22 04:15:14 UTC*
  - ec4f4f49ca Merge pull request #36478 from rallytime/fix-36475
  - 7be7d5832f Add the ``bash'' option to the ``code-block''directive.
- **PR** #36484: (terminalmage) Fix for temp files being left over by salt-cloud execution @ *2016-09-22 04:11:58 UTC*
  - **PR** #36482: (clarkperkins) Have salt-cloud clean up tmp files (refs: #36484)
  - 4c6e7bf873 Merge pull request #36484 from terminalmage/salt-cloud-tmp-files
  - 0bf520e089 Ensure temp file is actually removed
  - 072fd823f7 Use os.write() on file descriptor instead of opening a filehandle
  - f61e8d6366 Fix for temp files being left over by salt-cloud execution
- **PR** #36486: (terminalmage) Improve the rebase docs in contributing guidelines @ *2016-09-21 19:21:10 UTC*
  - 9005a87635 Merge pull request #36486 from terminalmage/rebase-docs
  - 4839c325ae Improve the rebase docs in contributing guidelines
- **PR** #36455: (twangboy) Update docs for Windows @ *2016-09-21 14:28:28 UTC*
  - bc5ac9adae Merge pull request #36455 from twangboy/windows_installation_docs
  - ec67a9bb2f Add cachedout's recommendations
  - 26a40dadbe Update docs for Windows
- **PR** #36459: (cachedout) Pr 36426 @ *2016-09-21 06:34:29 UTC*
  - 3d23371ca2 Merge pull request #36459 from cachedout/pr-36426
  - bb5c01ae9d Lint
  - 85d2068326 Refactor for testing and adding related engine tests
  - 266adae2fd Make sqs_events engine support owner_acct_id
- **PR** #36442: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-09-20 23:16:30 UTC*
  - c8e15dcdca Merge pull request #36442 from rallytime/merge-2016.3
  - 2740fb7bfd Merge branch `2015.8' into `2016.3'
  - 266dd7c00a Merge pull request #36379 from twangboy/windows_grains
    * 6138390da7 Fix typo
    * cf045e5c03 Remove comment
    * ddb6e11bcb Remove refactoring
    * 45dc920db0 Clarify comments
    * 211fd3b47e Improve version checking
    * 88be5a3761 Check for Python 2.7.12 and 3.5.2
    * 6f80f0062a Add osservicepack grain

        * 04c4ec4f81 Fix lint
        * 5789ea99cf Force string
        * 6c5bd7664b Fix join syntax
        * ac8610d523 Add ServicePack to osrelease
        * 92034936c1 Fix windows grains for os
    - 5625827ee2 Merge pull request #36378 from terminalmage/issue36321
        * 7b1f621206 Fix git.latest test with local changes to reflect changes in state
        * 0364fedb76 Use a single conditional
        * 0dd1e7b53e git.latest Treat an up-to-date checkout with local changes as up-to-date
- **PR** #36310: (thatch45) Fix bug where the client will destroy the loop @ *2016-09-20 13:14:23 UTC*
    - d0a495f08b Merge pull request #36310 from thatch45/keep_loop
    - a3c0d4a0ab Add docstring
    - 083f1d998a Fix bug where the client will destroy the loop
- **PR** #36394: (oba11) fix accound_id in boto_iam and get_region in boto_sns @ *2016-09-20 13:11:28 UTC*
    - 6e16ca46ed Merge pull request #36394 from oba11/module-fixes
    - 966685020c fix accound_id in boto_iam and get_region in boto_sns
- **PR** #36424: (jfindlay) skip some mac_timezone tests @ *2016-09-20 06:43:47 UTC*
    - **PR** #36194: (jfindlay) skip some mac_timezone tests (refs: #36424)
    - ae1fc430c2 Merge pull request #36424 from jfindlay/bp-36194
    - a20a2148bf skip some mac_timezone tests
- **ISSUE** #36388: (qurczak) pkg.list_upgrades return debug information rather than packages list (refs: #36428)
- **PR** #36428: (terminalmage) A couple fixes for Antergos Linux @ *2016-09-20 06:42:16 UTC*
    - 6319e3419a Merge pull request #36428 from terminalmage/issue36388
    - b0069ad0d8 pacman.py: use os_family grain to assign as pkg virtual module
    - 5d632dbfca Properly set os grain for Antergos
    - 0ae8dca2d0 pkg.list_upgrades: Ignore ``downloading'' lines in pacman output
- **ISSUE** #36373: (frioux) Salt-API does not validate input properly (refs: #36425)
- **PR** #36425: (whiteinge) Check for dictionary explicitly since we're accessing it as one @ *2016-09-20 06:41:40 UTC*
    - 155bd14b5e Merge pull request #36425 from whiteinge/salt-api-dict-payload
    - 0b63ed258f Check for dictionary explicitly since we're accessing it as one
- **ISSUE** saltstack/salt#18341: (falzm) Dry-running state.highstate only returns the first change (refs: #36199)
- **PR** #36199: (thatch45) skip all failhards if test=True @ *2016-09-20 05:38:32 UTC*
    - 420be364ee Merge pull request #36199 from thatch45/fix_18341
    - e13d61f06a skip all failhards if test=True
- **PR** #36418: (rallytime) Back-port #36246 to 2016.3 (refs: #37120) @ *2016-09-19 21:56:52 UTC*

  - **PR** #36246: (twangboy) Fix test_issue_6833_pip_upgrade_pip test on OS X (refs: #36418, #37120)
  - b2365f553e Merge pull request #36418 from rallytime/bp-36246
  - aab02f28b4 Ensure we have a test venv created using virtualenv < 13.0
- **PR** #36419: (rallytime) Back-port #36329 to 2016.3 @ *2016-09-19 21:56:33 UTC*
  - **PR** #36329: (oz123) Fix a minor typo in docs (refs: #36419)

- **PR** #36297: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-09-14 16:07:30 UTC*
  - a8a72c985f Merge pull request #36297 from rallytime/merge-2016.3
  - e2f1cf6025 Merge branch `2015.8' into `2016.3'
    * b9b8e45362 Merge pull request #36272 from terminalmage/improved-gitfs-logging
      · 223a20e987 Improved gitfs/git_pillar error logging
    * abb6aacb4b Merge pull request #36277 from terminalmage/gitfs-check-key-path
      · 4fee18c820 salt.utils.gitfs: Check for existence of ssh keys
    * ed2d2bd331 Integration tests fixes for 2015.8 (#36262)
    * 297a12c387 Fix misspelling of ``occurred'' in log messages/exceptions (#36270)
  - **PR** #36178: (cachedout) Filter out pub kwargs from cloud runner
- **PR** #36238: (pass-by-value) Add ability to clone from a snapshot to salt-cloud vmware driver @ *2016-09-14 05:31:51 UTC*
  - fc7a1d536f Merge pull request #36238 from pass-by-value/vmware_clone_from_snapshot
  - dd670bd18f Fix lint error and add try except
  - d96981639b Add ability to clone from a snapshot to salt-cloud vmware driver
  - **PR** #36263: (meaksh) Integration tests fixes for 2016.3
- **PR** #36264: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-09-13 18:25:41 UTC*
  - d634fd8628 Merge pull request #36264 from rallytime/merge-2016.3
  - f603757b55 Merge branch `2015.8' into `2016.3'
  - 931486ba35 Merge pull request #36096 from twangboy/update_setup
    * dc1988add5 fix download when requests not present
    * b4479bff5f Add additional required dll's
  - b0dd6ff5c8 Merge pull request #36244 from terminalmage/gen-back-bug
    * 363b21fd9b salt.fileserver.Fileserver: Don't try to split a list in _gen_back
  - dcc9380996 Merge pull request #36245 from terminalmage/roots-bug
    * 75d4997b70 roots backend: Don't include `.' or `..' in empty_dirs

    - fdf40907b7 Some unit tests fixes (#36227)
- **ISSUE** #33525: (anlutro) file.serialize no longer indents/pretty-prints in 2016.3 (refs: #35688)
- **PR** #35688: (cachedout) Splat serializer default configs into the serializer kwargs @ *2016-09-13 09:21:46 UTC*
    - de06116075 Merge pull request #35688 from cachedout/issue_33525
    - 4910e8191c Provide fallback for serializers without opts
    - a238666aba Add serializer test
    - 345fd2a9e5 Splat serializer default configs into the serializer kwargs
- **ISSUE** #36021: (mirceaulinic) Scheduled runners not executed (for proxy minions, at least) (refs: #36025)
- **PR** #36025: (mirceaulinic) Potential fix for #36021 @ *2016-09-13 07:46:41 UTC*
    - d9d477ed45 Merge pull request #36025 from cloudflare/CF-FIX-36021
    - 03007be6b1 Potential fix for #36021
    - **PR** #36183: (opdude) Fix timezones states on OS X
- **PR** #36235: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-09-12 17:40:42 UTC*
    - fcbebb40c3 Merge pull request #36235 from rallytime/merge-2016.3
    - 99dcf84b62 Merge branch `2015.8' into `2016.3'
        * 4e9490eebe Merge pull request #36214 from vutny/postgres-extension-doc
            · 5fe548f043 *postgres_extension* state module: fix docstrings
        * 5b7b96c0b7 Merge pull request #36205 from vutny/postgres-tablespace-doc
            · 78296b90d8 Add missing *maintenance_db* kwarg to *postgres_tablespace.present* docstring
        * 6a5f7cb346 Ignore states that do not have a numeric jid, i.e. `req' (#36185)
- **ISSUE** #35423: (Ch3LL) Stacktrace when running state.sls against an sls does not exist (refs: #36137)
- **ISSUE** #33915: (mattglv) Orchestration runner output on Success vs Failures in 2016.3.0 (refs: #36137)
- **ISSUE** #25664: (sdm24) 2015.5.2 MySQL Returner: salt-run jobs.lookup_jid doesn't return full result for highstate output (refs: #35559)
- **PR** #36137: (cachedout) Allow highstate outputter to show all results @ *2016-09-12 16:37:49 UTC*
    - **PR** #35559: (Jlin317) Fix highstate outputter when it's given multiple results (refs: #36137)
    - 7b96197c5e Merge pull request #36137 from cachedout/issue_35423
    - 1e8431f2b8 Allow highstate outputter to show all results
- **ISSUE** #35340: (dqminh) Custom modules are only resynced to minions at highstate (refs: #36217)
    - **PR** #36217: (cachedout) Docs clarification for module sync and state.apply
- **ISSUE** #35480: (jelenak) 200 processes of salt-master (2016.3.2) (refs: #36184, #36555, #37254)
- **PR** #36184: (DmitryKuzmenko) Disable signal handling while handling signal @ *2016-09-11 22:59:08 UTC*
    - 6ebe655e17 Merge pull request #36184 from DSRCorporation/bugs/35480_master_shutdown
    - 229504efef Removed unused import.
    - ca8eb7e076 Don't run the same signal handler twice. Catch os.kill errors.
- **PR** #36203: (xiaoanyunfei) fix owner of MultiprocessingLoggingQueue (refs: #37119) @ *2016-09-11 09:15:15 UTC*

  - f11f093f8c Merge pull request #36203 from xiaoanyunfei/logowner
  - 74dc90c7bb cancle pr last
  - 90e4a25dd0 Merge branch `logowner' of https://github.com/xiaoanyunfei/salt into logowner
    * bd61b88fc8 fix log owner
    * 58160ed6c0 Merge branch `2016.3' of github.com:saltstack/salt into 2016.3
    * f2de71782b move back
    * b8214824fd add simplify code
    * aec9385c6b Merge branch `2016.3' of github.com:saltstack/salt into 2016.3
    * 1074b3355d Merge branch `2016.3' of github.com:saltstack/salt into 2016.3
    * ea0d74cd27 fix salt-api opts
  - ffd87b2f2f fix logqueue owner
  - **PR** #36193: (thatch45) Fix stack trace in salt-ssh gitfs
- **PR** #36188: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-09-09 18:59:20 UTC*
  - f035121291 Merge pull request #36188 from rallytime/merge-2016.3
  - 521a7b2470 Merge branch `2015.8' into `2016.3'
  - d4628f3c6b Allow additional kwargs in states.dockerng.image_present (#36156)
  - 24b0387b92 Back-port #36070 to 2015.8 (#36169)
  - 116d7ac3e5 If windows pkg db hasn't been created yet, refresh the db instead of stacktracing (#36008)
- **ISSUE** #35819: (cable2999) pkg.group_installed doesn't handle missing package group (refs: #`saltstack/salt`#35907`_`_, #35907)
- **PR** #35907: (rallytime) Catch CommandExecutionError when the group in group_installed doesn't exist @ *2016-09-09 10:14:16 UTC*
  - 1d5f97d36b Merge pull request #35907 from rallytime/fix-35819
  - d7380d83be requires_system_grains decorator needs a grains=None kwarg
  - b20f6b9384 Catch CommandExecutionError when group_installed doesn't exist
- **ISSUE** saltstack/salt#35972: (tjyang) DeprecationWarning: The ``osmajorrelease'' will be a type of an integer. (refs: #36068)
  - **PR** saltstack/salt#35637: (cachedout) Add Nitrogen release notes (refs: #36068)
- **PR** #36068: (rallytime) Remove grains type deprecation warning from 2016.3 @ *2016-09-09 10:00:50 UTC*
  - 40127b6bf3 Merge pull request #36068 from rallytime/fix-35972
  - 2b7679c9f6 Remove grains type deprecation warning from 2016.3
- **ISSUE** #36094: (UtahDave) Windows stacktraces on msgpack on Carbon (refs: #36152)
- **PR** #36152: (cachedout) Remove unnecessary unpack @ *2016-09-09 09:13:47 UTC*
  - 24bd03734d Merge pull request #36152 from cachedout/issue_36094
  - 95eb95a0f8 Remove unnecessary unpack
- **PR** #36158: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-09-08 21:53:50 UTC*
  - dc3a68ed8c Merge pull request #36158 from rallytime/merge-2016.3

- 7f955bda0a Merge branch `2015.8' into `2016.3'
  - 6242702288 Fix issue with cp.push (#36136)
  - 0e13118f6e Document *owner* kwarg for *postgres_schema.present* state function (#36147)
  - 4cc8ea9577 Merge pull request #36146 from meaksh/tests-fixes-for-2015.8
    - 9f9aa4779c rename darwin_sysctl.py to mac_sysctl.py
    - 2cf6f36d89 modules.darwin_sysctl: __virtual__ return err msg.
    - f74ca15f50 Remove test for file dir behavior
    - c65aefee20 Fix tests that assert CommandExecutionError (#32485)
    - f8c0b439b8 Fixed more lint
    - 63ff731009 Fixed tests
    - 04b1a4a9ca Fixed use of assert_has_calls in tests.
    - 46e4bb58e5 Fixed LoadAuthTestCase
    - 4e9733ad6d Rename dockerio.py unit tests to dockerio_test.py
    - ec0cc943e0 Make sure spm tests are picked up by runtests.
    - 2605f34849 Fix missing first data in stream when subscribing stream using a function `read_async'.
    - 305bab8be0 Fixed _interfaces_ifconfig output for SunOS test
    - b5ca02c867 Fix tests that assert CommandExecutionError (#32485)
    - 1fb6340fef Fix tests (#35693)
    - 5977f1f54c Skip utils_test if timelib is not installed (#32699)
    - d1b9a4061e Fixing skipped boto tests to prevent errors if boto3 does not exists.
  - c4ddfe3887 Merge pull request #35954 from morganwillcock/upgrade-on-batteries
    - 108f9470f2 win_pkg: report failure for failed launch of Scheduled Task
    - e0978220f7 win_pkg: allow minion upgrade when using batteries
  - 94b7659304 Merge pull request #36129 from terminalmage/pygit2-ssl_verify
    - 640f0c17c6 pygit2: Prevent traceback on initial gitfs setup
  - 7cdbc546f1 Back-port #36062 to 2015.8 (#36118)
- **PR** #36170: (rallytime) Back-port #36154 to 2016.3
- **PR** #36154: (DavidWittman) Remove unclosed backticks in walkthrough doc (refs: #36170)

- **ISSUE** #36055: (gladiatr72) 2016.3.3 -- missing salt-cloud events on the master event bus (refs: #36161)
- **PR** #36161: (jacobhammons) Adds #36055 to release notes @ *2016-09-08 17:11:36 UTC*
  - 4ccf8a841f Merge pull request #36161 from jacobhammons/relnotes
  - ecb0979be7 Adds #36055 to release notes
- **PR** #36139: (meaksh) Fixing unit tests for 2016.3 @ *2016-09-08 13:20:21 UTC*
  - 1f909038f0 Merge pull request #36139 from meaksh/tests-fixes-for-2016.3
  - 52a7ed605e Fixed _interfaces_ifconfig output for SunOS test

  - 158bcbff65 Fix tests that assert CommandExecutionError (#32485)
  - 8b480167e1 Fix tests (#35693)
  - 29814f9d43 Skip utils_test if timelib is not installed (#32699)
  - d1d806f893 Fix PortageConfigTestCase in case of portage is not present
  - 1c260e4bd0 Fix tests to prevent errors when libcloud is not present
  - 71ebf2c8cd Fixing skipped boto tests to prevent errors if boto3 does not exists.
- **PR** #36143: (multani) doc: fix doc formatting for salt.states.mount @ *2016-09-08 13:11:03 UTC*
  - 3eb3df55ad Merge pull request #36143 from multani/fix-doc-state-mount
  - 035a212a9b doc: fix doc formatting for salt.states.mount
- **ISSUE** saltstack/salt#18419: (jasonrm) salt-cloud fails to run as non-root user (refs: #35483)
- **ISSUE** #36057: (Inveracity) Regression in opennebula cloud provider (refs: #36070)
- **ISSUE** #34806: (jerrykan) salt-cloud ignores sock_dir when firing event (refs: #35483)
- **PR** #36070: (rallytime) Use __utils__ instead of salt.utils.cloud in opennebula driver (refs: #36169) @ *2016-09-08 01:18:45 UTC*
  - **PR** #35483: (gtmanfred) use __utils__ in salt.cloud (refs: #35855, #37057, #36070)
  - 70da628018 Merge pull request #36070 from rallytime/fix-36057
  - de4f77cb68 Fixup failing test: need to mock __utils__ instead of salt.utils.cloud call
  - 25e3f2b4b8 Use __utils__ instead of salt.utils.cloud in opennebula driver
- **PR** #36089: (terminalmage) Support running git states / remote exec funcs as a different user in Windows @ *2016-09-08 01:17:23 UTC*
  - b7556a2aeb Merge pull request #36089 from terminalmage/issue35565
  - 796156c5f5 Add attribution
  - 2e56527ead Move command logging to before win_runas
  - 91eafddda6 Pass the ``password'' param to git module functions
  - 7871065d32 Use ``user'' instead of ``runas'' in _git_run() helper
  - 5943b4662c Add ``password'' param to funcs which support the user parameter
  - 5c7b9f0341 Make ``password'' an explicit argument, not a kwarg
- **PR** #35923: (kstreee) Fixes a bug that Ctrl-c not working on Salt CLI. @ *2016-09-07 11:47:50 UTC*
  - 45ba2e806b Merge pull request #35923 from kstreee/fix-cli-stalling
  - 6569267afc Fixes a bug that Ctrl-c not working on Salt CLI.
- **ISSUE** #18341: (falzm) Dry-running state.highstate only returns the first change (refs: #36078)
- **PR** #36078: (thatch45) Failhard test=True fix @ *2016-09-07 05:10:35 UTC*
  - 48dc5ad4ee Merge pull request #36078 from thatch45/failhard_test
  - 9b36904149 Fix failhard causing test=True to failhard too soon
- **ISSUE** #34515: (vernondcole) Please actually implement skip_verify for archive.extracted (refs: #34529)
- **PR** #34529: (Ch3LL) Add skip_verify for archive.extracted @ *2016-09-06 21:05:31 UTC*
  - 40081176af Merge pull request #34529 from Ch3LL/add_skip_verify_archive

  - 38203e3d2c add tornado web app to serve up static file for test
  - 617f5680e4 add windows path and add custom tar
  - c5035118bf add skip_verify option to archive.extracted
- **PR** #36073: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-09-06 19:45:48 UTC*
  - fc41c744a0 Merge pull request #36073 from rallytime/merge-2016.3
  - e9c634685b Merge branch `2015.8' into `2016.3'
  - fa09050150 consul: fix formatting of consul.agent_join (#36061)
  - **PR** saltstack/salt#36030: (whiteinge) Add include_* kwargs to the *_dict key functions (refs: #36040)
  - **PR** #36040: (rallytime) Add docs for new kwargs added to the wheel key module
  - **PR** #36047: (whiteinge) Doc cherrypy deemphasize urlencoded
- **PR** #36039: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-09-02 21:50:47 UTC*
  - 74143999d3 Merge pull request #36039 from rallytime/merge-2016.3
  - 5f499cfd41 Merge branch `2015.8' into `2016.3'
  - 1b39c7ed48 Merge pull request #35978 from DSRCorporation/bugs/28462_update_auth_data_on_reauth
    * 778ae9a9ff Update auth data on reauth.
  - b652271ddc Fix type error in networkfbsd osmajorrelease compare (#36016)
  - bc81818075 Merge pull request #36018 from meaksh/bp-36000-to-2015.8
    * 8c05d2aac5 Lint for #35916
    * b5fe6100ee Check for single quote before splitting on single quote
- **ISSUE** saltstack/salt#35683: (JensRantil) Salt wheel key documentation improvements (refs: #35824, #saltstack/salt`#35824`_)
  - **PR** saltstack/salt#35824: (rallytime) Add more documentation to the wheel key module (refs: #36038)
  - **PR** #36038: (rallytime) Back-port #35824 to 2016.3
  - **PR** #35824: (rallytime) Add more documentation to the wheel key module (refs: #36038)
  - **PR** #36033: (gtmanfred) catch unicode encoding errors in json outputter
  - **PR** #36010: (eliasp) modules.service: Do not default to OpenRC on Gentoo, also allow systemd
- **ISSUE** #33969: (Inveracity) Redis returner stacktrace in clean_old_jobs 2016.3.0 (refs: #33998)
  - **PR** #36014: (rallytime) Back-port #33998 to 2016.3
  - **PR** #33998: (jizhilong) fix redis_return's clean_old_jobs. (refs: #36014)
- **ISSUE** #35618: (komljen) [salt-cloud] With `make_master: True' minions are configured with the masters public IP address on AWS (refs: #35919, #saltstack/salt`#35919`_)
  - **PR** saltstack/salt#35919: (rallytime) Add documentation about salt_interface to EC2 docs (refs: #36015)
  - **PR** #36015: (rallytime) Back-port #35919 to 2016.3
  - **PR** #35919: (rallytime) Add documentation about salt_interface to EC2 docs (refs: #36015)
  - **PR** saltstack/salt#36000: (rallytime) Lint #35916 (refs: #36019, #36018)
  - **PR** saltstack/salt#35916: (swiftgist) Check for single quote before splitting on single quote (refs: #36019, #36018)

- **PR** #36019: (meaksh) Back-port #36000 to 2016.3 @ *2016-09-02 20:34:30 UTC*
  - **PR** #36000: (rallytime) Lint #35916 (refs: #36019, #36018)
  - **PR** #35916: (swiftgist) Check for single quote before splitting on single quote (refs: #`saltstack/salt`#36000`_`_, #36000)
  - e88df5845d Merge pull request #36019 from meaksh/bp-36000-to-2016.3
  - 1b2abeabd1 Lint for #35916
  - 8b4f46fbd0 Check for single quote before splitting on single quote
  - **PR** #36028: (thatch45) Fix error when profiling is turned on and minions don't return (refs: #36730)
  - **PR** #36030: (whiteinge) Add include_* kwargs to the *_dict key functions
- **ISSUE** saltstack/salt#31454: (johje349) Salt Mine memory leak (refs: #36024)
- **PR** #36024: (DmitryKuzmenko) Don't subscribe to events if not sure it would read them. (refs: #36720) @ *2016-09-02 15:41:01 UTC*
  - cd60ec5d57 Merge pull request #36024 from DSRCorporation/bugs/31454_local_client_memleak
  - 01911c530e Don't subscribe to events if not sure it would read them.
- **PR** #36023: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-09-02 15:37:59 UTC*
  - 32d5f896d4 Merge pull request #36023 from rallytime/merge-2016.3
  - a63c9dfc6a Merge branch `2015.8' into `2016.3'
  - e6b93c2380 Merge pull request #36022 from saltstack/revert-33770-service_tests
    - 6cf56843d4 Revert ``service state integration tests''
- **PR** #36004: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-09-01 21:11:06 UTC*
  - d248ab0120 Merge pull request #36004 from rallytime/merge-2016.3
  - 318bffed1d Merge branch `2015.8' into `2016.3'
  - 678f10cf8b Avoid traceback in mac_user.py when user.chhome is invoked from a user state (#35901)
  - 2da501071e Merge pull request #35967 from twangboy/improve_show_sls_2015.8
    - 2ed9a82ef8 Allow full path to be passed to show_sls
  - d86fba15b3 Merge pull request #35981 from cachedout/cptestcase_license
    - dd562dd200 Update Salt's licensing information to include cptestcase
- **PR** #35952: (twangboy) Load UserProfile when using RunAs (2016.3) @ *2016-09-01 15:18:15 UTC*
  - f7b85cb70b Merge pull request #35952 from twangboy/fix_win_runas_2016.3
  - 3721a09ea3 Load UserProfile on RunAs
- **PR** #35959: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-08-31 22:14:54 UTC*
  - b8ca3f5e4d Merge pull request #35959 from rallytime/merge-2016.3
  - bb4605ffee Merge branch `2015.8' into `2016.3'
  - 0f0f15d048 Merge pull request #35956 from jacobhammons/dot12
    - 3e21e35933 Version docs to 2015.8.12
  - d2db4ea7a2 cachedir should be /cloud not /master (#35897)
  - f4cdcc0d66 Better logging when file_recv_max_size is exceeded (#35914)

- **PR** #35955: (jacobhammons) Version docs to 2016.3.3 @ *2016-08-31 20:35:55 UTC*
  - a87b91a8ea Merge pull request #35955 from jacobhammons/dot3
  - ac8fe6ff9e Version docs to 2016.3.3
- **ISSUE** #875: (dhoffutt) state pkg won't install package nscd (refs: #35865)
  - **PR** #35865: (jacobhammons) Fix incremental doc builds - OS X, postgres returner, tcp transport doc updates
- **ISSUE** #35829: (amontalban) FreeBSD pkg.latest speed improvement (refs: #35904)
  - **PR** #35904: (amontalban) Fixes #35829 for branch 2016.3
  - **PR** #35931: (vutny) Salt Cloud: add *centos* default user for official CentOS AMIs
  - **PR** saltstack/salt#35892: (cachedout) Fixup Docker test (refs: #35926)
  - **PR** saltstack/salt#35581: (pbdeuchler) Correctly check if image is in current tags (refs: #35926)
  - **PR** #35926: (ticosax) [dockerng] Mention that docker image names must be given with repository
  - **PR** #35581: (pbdeuchler) Correctly check if image is in current tags (refs: #35926)
- **ISSUE** #35825: (tjyang) ```drac' __virtual__ returned False'' from salt-run drac.version host (refs: #35868)
- **PR** #35868: (rallytime) Add more helpful return messages for drac runner @ *2016-08-31 01:33:27 UTC*
  - ca06c62900 Merge pull request #35868 from rallytime/fix-35825
  - 00ae17248e Update error message to be more helpful and fix doc formatting
  - 30a422bfe0 Add more helpful return messages for drac runner
- **PR** #35903: (rallytime) [2016.3] Merge forward from 2015.8 into 2016.3 @ *2016-08-30 17:15:36 UTC*
  - 95b89dbce9 Merge pull request #35903 from rallytime/merge-2016.3
  - 9e55bee5d5 Merge branch `2015.8' into `2016.3'
  - 08e10f69eb Clarifies how to create aliased functions (#35891)
  - 6dd5f68a08 Merge pull request #35856 from vutny/2015.8
    - eceedadfa5 salt-cloud: fix path to Salt Master socket dir
  - 336d1a700d Merge pull request #35880 from terminalmage/issue35747
    - 123a611066 pacman.py: Fix incorrect return in pkg.latest_version
  - 6383451c99 Merge pull request #35884 from terminalmage/clarify-pkg-latest-logic
    - b0b419d1d8 Fix condition for Gentoo USE flag update
    - 1542fd4716 Add clarifying comments to the pkg.latest state
- **ISSUE** saltstack/salt#18419: (jasonrm) salt-cloud fails to run as non-root user (refs: #35483)
- **ISSUE** #34806: (jerrykan) salt-cloud ignores sock_dir when firing event (refs: #35483)
- **PR** #35855: (vutny) [REGRESSION] salt-cloud: fix path to Salt Master socket dir (refs: #35856) @ *2016-08-30 07:09:04 UTC*
  - **PR** #35483: (gtmanfred) use __utils__ in salt.cloud (refs: #35855, #37057, #36070)
  - cf8f081401 Merge pull request #35855 from vutny/salt-cloud-fix-sock_dir
  - a662ea5337 salt-cloud: fix path to Salt Master socket dir
- **PR** #35881: (whiteinge) Add fail-safe in case Salt gives us data we can't serialize @ *2016-08-30 06:43:11 UTC*

  - f0987cf27a Merge pull request #35881 from whiteinge/salt-api-catch-serializer-error
  - 6e27fad21f Add fail-safe in case Salt gives us data we can't serialize
- **ISSUE** #35837: (JensRantil) Doc improvement: Mention engine under extension modules (refs: #35864)
  - **PR** #35864: (rallytime) Add engines to list of extension module options in master config docs
- **ISSUE** #35835: (JensRantil) Incorrect SQS config documentation statement (refs: #35861)
  - **PR** #35861: (rallytime) Fix IAM roles statement to be boto version specific in sqs_events
- **ISSUE** #35834: (JensRantil) Incorrect SQS engine config (refs: #35860)
  - **PR** #35860: (rallytime) Fix doc formatting for sqs_events engine example config
- **PR** #35859: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-08-29 18:21:04 UTC*
  - 96747bc3bb Merge pull request #35859 from rallytime/merge-2016.3
  - 5f93d682aa Merge branch `2015.8' into `2016.3'
  - eda2ae0add Merge pull request #35781 from thatch45/ssh_deploy_more
    * 2558dcc100 follow up on the re-deploy if there is a checksum missmatch
  - 165237412c Merge pull request #35815 from gtmanfred/2015.8
    * 805d43598e list_nodes_min should return a minimum dictionary
  - b12c6577d2 Merge pull request #35833 from terminalmage/2015.8-top-file-merging-docs
    * c534d88280 More clarification/correction in minion docs
    * e9e6ea8485 One more tweak to top file merging docs
- **ISSUE** #34478: (hujunya) makedir bug in the file module (refs: #35849)
- **PR** #35849: (theredcat) Fix potential infinite loop with no error when using recursive makedirs @ *2016-08-29 11:37:19 UTC*
  - dc705ff675 Merge pull request #35849 from theredcat/fix_file_makedirs_infinite_loop
  - 86d5398b28 Fix potential infinite loop with no error when using recursive makedirs
- **PR** #35682: (vutny) [BACKPORT] Fix empty *fun_agrs* field in Reactor generated events @ *2016-08-29 04:11:06 UTC*
  - **PR** #35659: (vutny) Fix empty *fun_agrs* field in Reactor generated events (refs: #35682)
  - **PR** #35059: (vutny) Add *fun_args* field to events generated by execution of Master modules (refs: #35659, #35682)
  - 433743f609 Merge pull request #35682 from vutny/backport-35659
  - 78d16a8057 [BACKPORT] Fix empty *fun_agrs* field in Reactor generated events
- **ISSUE** #34973: (szjur) Syndic stops forwarding job results if the local salt-master is restarted (refs: #35792)
- **PR** #35792: (DmitryKuzmenko) Reconnect syndic to event bus if master disappeared. @ *2016-08-29 02:13:19 UTC*
  - 30c2db7b09 Merge pull request #35792 from DSRCorporation/bugs/34973_syndic_reconnect_master_2016.3
  - 9afdbb0e97 Reconnect syndic to master event bus if master disappears.
  - ab1afd002e Fixed syndic event bus connection.
  - ea8e1385c1 Fixed syndic unhandled future exception if master is stopped.

- **PR** #35817: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-08-26 20:44:18 UTC*
  - 43c08ae431 Merge pull request #35817 from rallytime/merge-2016.3

Security Fixes

CVE-2017-5192 local_batch client external authentication not respected

The `LocalClient.cmd_batch()` method client does not accept `external_auth` credentials and so access to it from salt-api has been removed for now. This vulnerability allows code execution for already-authenticated users and is only in effect when running salt-api as the `root` user.

CVE-2017-5200 Salt-api allows arbitrary command execution on a salt-master via Salt's ssh_client

Users of Salt-API and salt-ssh could execute a command on the salt master via a hole when both systems were enabled.

We recommend everyone on the 2016.3 branch upgrade to a patched release as soon as possible.

Improved Checksum Handling in `file.managed`, `archive.extracted` States

When the `source_hash` argument for these states refers to a file containing checksums, Salt now looks for checksums matching the name of the source URI, as well as the file being managed. Prior releases only looked for checksums matching the filename being managed. Additionally, a new argument (`source_hash_name`) has been added, which allows the user to disambiguate ambiguous matches when more than one matching checksum is found in the `source_hash` file.

A more detailed explanation of this functionality can be found in the *`file.managed`* documentation, in the section for the new `source_hash_name` argument.

Changelog for v2016.3.4..v2016.3.5

Generated at: 2018-05-27 05:09:33 UTC

- **PR** #38833: (Ch3LL) add 2016.3.5 changelog to release notes @ *2017-01-19 23:27:26 UTC*
  - a04ab86da1 Merge pull request #38833 from Ch3LL/add_release_notes_2016.3.5
  - 374dc1ab88 skip 2016.3.5 due to :doc: references
  - 31f324c4ff add 2016.3.5 changelog to release notes
- **PR** #38812: (rallytime) Update pyobjects test to be a list @ *2017-01-18 21:06:01 UTC*

- **ISSUE** #36598: (ikkaro) CloudClient vmware driver reusing SI bug (refs: #38813)
- **PR** #38813: (gtmanfred) catch SIGPIPE in vmware connection @ *2017-01-18 21:05:42 UTC*
  - 50f03f8057 Merge pull request #38813 from gtmanfred/2016.3
  - ce3472cec2 catch SIGPIPE in vmware connection
- **PR** #38809: (twangboy) Fix get_hostname to handle longer computer names @ *2017-01-18 19:32:00 UTC*
  - 23b8b47258 Merge pull request #38809 from twangboy/fix_hostname_2016.3
  - d57a51f9f9 Fix tests for get_hostname
  - 7ca3fd7484 Fix get_hostname to handle longer computer names
- **ISSUE** #38388: (johje349) No INFO logs in minion log file (refs: #38808)
- **PR** #38808: (vutny) Fix #38388 @ *2017-01-18 18:19:36 UTC*
  - 1033bbdde8 Merge pull request #38808 from vutny/fix-38388
  - 9bd203ffcc Fix #38388
- **ISSUE** #38604: (jsandas) Using ``batch'' with saltmod errors with ``ValueError: need more than 2 values to unpack'' (refs: #38668)
- **PR** #38668: (terminalmage) Fix proposal for #38604 @ *2017-01-18 17:53:09 UTC*
  - f3ae3cd5c8 Merge pull request #38668 from terminalmage/issue38604

    - 0ea97cdad9 Merge pull request #10 from cachedout/pr-38668
        * db81afc035 Munge retcode into return data for batching
    - a642a995dc Return the ret data from batch execution instead of raw data
- **ISSUE** #38622: (mikejford) Incorrect saltenv argument documentation in salt.modules.state (refs: #38789)
- **PR** #38789: (rallytime) Update some saltenv refs to environment in salt.modules.state docs @ *2017-01-18 15:39:22 UTC*
    - c6a19a9e5a Merge pull request #38789 from rallytime/fix-38622
    - af41fe0c6e Update some saltenv refs to environment in salt.modules.state docs
- **PR** #38790: (cachedout) Fix typo in pyobjects test @ *2017-01-18 15:38:57 UTC*
    - e0bf700020 Merge pull request #38790 from cachedout/fix_pyobjects_test_typo
    - a66afb5f0f Fix typo in pyobjects test
- **ISSUE** #38629: (Arabus) Conflicting documentation about default value of pillar_opts (refs: #38792)
- **PR** #38792: (rallytime) Update pillar tutorial lanuage regarding pillar_opts settings @ *2017-01-18 15:38:19 UTC*
    - 6e9785edea Merge pull request #38792 from rallytime/fix-38629
    - 1e125e2844 Update pillar tutorial lanuage regarding pillar_opts settings
    - **PR** saltstack/salt#38707: (alexbleotu) Fixed prepending of root_dir override to the other paths (refs: #38796)
- **PR** #38796: (cachedout) Revert ``Fixed prepending of root_dir override to the other paths'' @ *2017-01-17 23:18:18 UTC*
    - 3417adc617 Merge pull request #38796 from saltstack/revert-38707-root_dir_fix-gh
    - cb080f3bbe Revert ``Fixed prepending of root_dir override to the other paths''
- **ISSUE** #38524: (rbjorklin) salt-api seems to ignore rest_timeout since 2016.11.0 (refs: #38585, #38527)
- **ISSUE** #38479: (tyeapple) api_logfile setting takes no effect (refs: #38585)
- **PR** #38585: (rallytime) Follow up to PR #38527 @ *2017-01-17 18:40:01 UTC*
    - **PR** #38570: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 (refs: #38585)
    - **PR** #38560: (Ch3LL) fix api logfile (refs: #38585)
    - **PR** #38527: (rbjorklin) salt-api no longer forces the default timeout (refs: #38585)
    - bab3479a3c Merge pull request #38585 from rallytime/follow-up-38527
    - 05587201b6 Pylint fix: add line at end of file
    - fa01367599 Keep a copy of the DEFAULT_API_OPTS and restore them after the test run
    - 2ad07634d9 Test clean up
    - fd2ee7db30 Add some simple unit tests for salt.config.api_config function
    - 3d2fefc83b Make sure the pidfile and log_file values are overriden by api opts
    - 1f6b540e46 Make sure the pidfile and log_file values are overriden by api opts
    - 04d307f917 salt-api no longer forces the default timeout
- **PR** #38707: (alexbleotu) Fixed prepending of root_dir override to the other paths @ *2017-01-17 15:40:13 UTC*
    - 0fb6bb7b77 Merge pull request #38707 from alexbleotu/root_dir_fix-gh

  - 0bac8c8be3 Fixed prepending of root_dir override to the other paths

- **PR** #38774: (vutny) DOCS: add C++ compiler installation on RHEL required for bundled 0mq @ *2017-01-17 15:21:00 UTC*
  - 96c9dc10f7 Merge pull request #38774 from vutny/dev-test-docs
  - 4620dc4afa DOCS: add C++ compiler installation on RHEL required for bundled 0mq
- **PR** #38749: (vutny) pkg build modules throw better exception message if keyid wasn't found @ *2017-01-17 02:13:08 UTC*
  - aedfbb7a43 Merge pull request #38749 from vutny/pkg-build-better-exception-msg
  - 53f2be5b21 pkg build modules throw better exception message if keyid wasn't found
- **PR** #38743: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2017-01-17 01:46:01 UTC*
  - 8466b34e82 Merge pull request #38743 from rallytime/merge-2016.3
  - d24776f5e9 Merge branch `2015.8' into `2016.3'
  - 6869621ed1 Merge pull request #38731 from rallytime/merge-2015.8
    * 9eb191b6ac Pylint fix
    * b910499dbe Various follow up fixes
    * e8309a6bbf Add release notes for 2015.8.13
    * f881f366b7 Merge pull request #20 from rallytime/2015.8.12_follow_up-batch-tests
      · 34282322c0 Clean up tests and docs for batch execution
    * c80b20b957 Merge pull request #19 from whiteinge/batchclient
      · 3d8f3d18f6 Remove batch execution from NetapiClient and Saltnado
    * 97b0f64923 Lintfix
    * d1516664f7 Add explanation comment
    * 62f2c87080 Add docstring
    * 9b0a786aeb Explain what it is about and how to configure that
    * 5ea3579e10 Pick up a specified roster file from the configured locations
    * 3a8614c5df Disable custom rosters in API
    * c0e5a1171d Add roster disable flag
  - e9c59e9b8f Merge pull request #38602 from terminalmage/fix-boto-test
    * 3424a108ac Fix failing unit.states.boto_vpc_test.BotoVpcRouteTableTestCase.test_present_with_routes
- **ISSUE** #38674: (jackywu) There is no code to use parameter `event_publisher_pub_hwm' in saltstack-2016.3 (refs: #38723)
- **PR** #38723: (rallytime) Remove ``event_publisher_pub_hwm'' and ``salt_event_pub_hwm'' from config/__init__.py @ *2017-01-15 18:36:14 UTC*
  - **PR** #29294: (skizunov) ZeroMQ no longer required when transport is TCP (refs: #38723)
  - a642cdef79 Merge pull request #38723 from rallytime/fix-38674
  - 706c885f55 Remove ``event_publisher_pub_hwm'' and ``salt_event_pub_hwm'' from config/__init__.py
- **PR** #38669: (rallytime) Update bootstrap script verstion to latest release @ *2017-01-15 18:03:27 UTC*

  - fc545af10b Merge pull request #38669 from rallytime/update-bootstrap-script
  - 78ba76e34c Update bootstrap script verstion to latest release
- **PR** #38693: (twangboy) Update jinja2 to 2.9.4 @ *2017-01-15 14:40:46 UTC*
  - 50d417f267 Merge pull request #38693 from twangboy/update_jinja
  - e0c7e5549b Update jinja2 to 2.9.4
- **PR** #38739: (vutny) DOCS: correct examples of running test suite @ *2017-01-15 14:35:47 UTC*
  - f4233bb18d Merge pull request #38739 from vutny/fix-runtests-doc
  - b872bb63f6 DOCS: correct examples of running test suite
  - **PR** #38735: (vutny) DOCS: add links to File State Backups page where necessary
  - **PR** #38720: (dereckson) Proofread jinja_to_execution_module tutorial
- **ISSUE** #36548: (abonillasuse) openstack auth with nova driver (refs: #38647)
- **PR** #38647: (gtmanfred) Allow novaclient to use keystoneauth1 sessions for authentication @ *2017-01-10 17:48:26 UTC*
  - 7b850d472d Merge pull request #38647 from gtmanfred/nova
  - 5be9b60851 add documentation about using keystoneauth for v3
  - 7b657ca4ae add the ability to use keystone v2 and v3
  - 5646ae1b34 add ability to use keystoneauth to authenitcate in nova driver
- **ISSUE** #38648: (ericuldall) No release file error from PPA on Ubuntu (refs: #38650)
- **ISSUE** #38572: (COLABORATI) ppa:saltstack/salt failure (refs: #38650)
- **ISSUE** #34504: (AvinashDeluxeVR) Installation documentation for Ubuntu server and Windows minion leads the user to use different salt versions. (refs: #38650)
- **PR** #38650: (rallytime) Remove the installation instructions for out-of-date community ppa @ *2017-01-10 17:47:45 UTC*
  - 383768d838 Merge pull request #38650 from rallytime/remove-ubuntu-ppa-docs
  - 30429b2e44 Remove the installation instructions for out-of-date community ppa
- **ISSUE** #38087: (UtahDave) The `data' field in the return from a minion below a syndic is wrapped in an extra `data' field. (refs: #38657)
- **PR** #38657: (DmitryKuzmenko) Publish the `data' field content for Syndic evets @ *2017-01-10 16:59:33 UTC*
  - 7d9f56e3b5 Merge pull request #38657 from DSRCorporation/bugs/38087_syndic_event_format_fix
  - 594c33f396 Publish the `data' field content for Syndic evets
- **PR** #38649: (Ch3LL) fix unit.modules.file_test @ *2017-01-10 16:44:45 UTC*
  - 83987511fd Merge pull request #38649 from Ch3LL/test_apply_template
  - 47f8b68e0b fix unit.modules.file_test
- **ISSUE** #37355: (Firewire2002) salt-ssh - ImportError: No module named backports.ssl_match_hostname (refs: #38626, #`saltstack/salt`#37358`_`_, #37358)

  - 5e58b32934 Merge pull request #37358 from Firewire2002/2016.3.3_issue37355
  - 910da18bfd fixed typo
  - 4fbc5ddd06 fixed wrong renamed variable and spaces
  - 92366e646c issue #37355
  - 7dc87ab7b8 issue #37355
  - 2878180405 issue #37355
- **PR** #35390: (alexandr-orlov) Returns back missed proper grains dictionary for file module @ *2017-01-06 18:02:13 UTC*
  - 6c2fe615aa Merge pull request #35390 from alexandr-orlov/2016.3
  - cd5ae17e8d fxd missed proper grains dictionary
- **ISSUE** #38558: (multani) pillar.get("...", default=var, merge=true) updates default value (refs: #38579)
- **PR** #38618: (rallytime) Back-port #38579 to 2016.3 @ *2017-01-06 17:37:56 UTC*
  - **PR** #38579: (zwo-bot) Fix #38558 - pillar.get with default= ...,merge=true influence subsequent calls of pillar.get (refs: #38618)
  - 2579cfa42d Merge pull request #38618 from rallytime/bp-38579
  - 2052ecee2c Add copy import
  - 2c8845aaa0 add test for pillar.get() + default value
  - c2f98d2f04 ticket 38558: add unit test, deepcopy() only if necessary
  - 30ae0a1958 added deepcopy of default if merge=True
- **PR** #38601: (terminalmage) pillar.get: Raise exception when merge=True and default is not a dict @ *2017-01-05 23:15:51 UTC*
  - da676cebd6 Merge pull request #38601 from terminalmage/pillar-get
  - 8613d7254d pillar.get: Raise exception when merge=True and default is not a dict
- **PR** #38600: (terminalmage) Avoid errors when sudo_user is set (2016.3 branch) @ *2017-01-05 20:57:09 UTC*
  - **PR** #38598: (terminalmage) Avoid errors when sudo_user is set (refs: #38600)
  - 224fc7712a Merge pull request #38600 from terminalmage/issue38459-2016.3
  - 8a45b13e76 Avoid errors when sudo_user is set
- **PR** #38589: (tobithiel) State Gem: fix incorrect warning about missing rvm/rbenv @ *2017-01-05 20:12:15 UTC*
  - a376970f88 Merge pull request #38589 from tobithiel/fix_rvm_rbenv_warning

  - 9ec470b4a5 State Gem: fix incorrect warning about missing rvm/rbenv

- **PR** #38567: (pass-by-value) Create queue if one doesn't exist @ *2017-01-05 18:46:11 UTC*
  - 02e6a78254 Merge pull request #38567 from pass-by-value/pgjsonb_queue_changes_2016.3
  - 67879ebe65 Create queue if one doesn't exist
- **ISSUE** #37498: (githubcdr) service.restart salt-minion fails on Ubuntu 14.04.5 LTS (refs: #37748, #38587)
- **PR** #38587: (rallytime) Change daemontools __virtualname__ from service to daemontools @ *2017-01-05 18:06:01 UTC*
  - 0889cbdb31 Merge pull request #38587 from rallytime/fix-37498
  - 2a5880966f Change daemontools __virtualname__ from service to daemontools
- **PR** #38562: (rallytime) Update arch installation docs with correct package name @ *2017-01-04 20:04:28 UTC*
  - 7b74436d13 Merge pull request #38562 from rallytime/arch-install-docs
  - 8b1897ace9 Update arch installation docs with correct package name
- **PR** #38560: (Ch3LL) fix api logfile (refs: #38585) @ *2017-01-04 19:03:17 UTC*
  - 01860702cb Merge pull request #38560 from Ch3LL/fix_api_log
  - 1b45e9670b fix api logfile
- **PR** #38531: (rallytime) Back-port #33601 to 2016.3 @ *2017-01-04 16:56:53 UTC*
  - **PR** #33601: (mchugh19) Fix slack engine to run on python2.6 (refs: #38531)
  - 0056620a53 Merge pull request #38531 from rallytime/bp-33601
  - c36cb39825 remove the unnecessary double trigger
  - 38414493bf fix spacing lint error
  - 8c1defc710 Remove uncessary type from alias commands. Deduplicate alias handling to autodetect function selection. Add error reporting to slack connectivty problems. Cleanup slack's unicode conversion
  - c2f23bc45e Fix slack engine to run on python2.6
- **ISSUE** #38187: (curiositycasualty) username/password saved as cleartext when using URIs with user:pass@ format (refs: #38541)
- **PR** #38541: (techhat) Strip user:pass from cached URLs @ *2017-01-04 15:39:57 UTC*
  - 50242c7f17 Merge pull request #38541 from techhat/issue38187
  - eae3a435dd Strip user:pass from cached URLs
- **ISSUE** #30454: (favoretti) Using yaml serializer inside jinja template results in unicode being prepended by `!!python/unicode' (refs: #30481, #38554)
- **PR** #38554: (multani) Fix YAML deserialization of unicode @ *2017-01-04 15:31:16 UTC*
  - **PR** #30481: (basepi) Add yaml_safe jinja filter (refs: #38554)
  - 325dc56e59 Merge pull request #38554 from multani/fix/30454
  - 2e7f743371 yaml: support unicode serialization/deserialization
  - df76113c5c jinja: test the ``yaml'' filter with ordered dicts
  - f7712d417f Revert ``Add yaml_safe filter''
  - **PR** #38536: (UtahDave) add note about pyVmomi locale workaround

- **ISSUE** #38353: (Ch3LL) salt-cloud gce specifying (refs: #38542)
  - **PR** #38542: (Ch3LL) fix gce image bug
- **ISSUE** #38449: (swalladge) Parsing issues in *list_tab* (salt/modules/cron.py) (refs: #38487)
- **PR** #38487: (gtmanfred) Fix crontab issues with spaces @ *2017-01-01 20:33:29 UTC*
  - ec60f9c721 Merge pull request #38487 from gtmanfred/2016.3
  - 048b9f6b9d add test
  - c480c11528 allow spaces in cron env
  - c529ec8c34 allow crons to have multiple spaces
- **ISSUE** #37684: (thusoy) State execution duration is timezone-dependent (refs: #38491)
- **PR** #38491: (gtmanfred) Use UTC for timing in case timezone changes @ *2017-01-01 20:30:57 UTC*
  - c5ba11b5e0 Merge pull request #38491 from gtmanfred/timing
  - 79368c7528 Use UTC for timing in case timezone changes
- **ISSUE** #38472: (jinm) file.managed Unable to manage file: `hash_type' (2016.3.4) (refs: #38503)
- **PR** #38503: (jinm) Hash type fallback for file management @ *2017-01-01 17:36:51 UTC*
  - 86f0aa0bb3 Merge pull request #38503 from jinm/issue_38472_jinm
  - 0cd9df299f Hash type fallback for file management
- **PR** #38457: (bshelton229) Stops git.latest checking for local changes in a bare repo @ *2016-12-30 14:28:47 UTC*
  - ed2ba4bd1b Merge pull request #38457 from bshelton229/git-latest-head-bug
  - 558e7a771a Stops git.latest checking for local changes in a bare repo
- **PR** #38385: (dragon788) Use unambigous long names with double dashes @ *2016-12-29 17:10:48 UTC*
  - 36e21b22cb Merge pull request #38385 from dragon788/2016.3-double-dash
  - 86c4b56f47 Newline for lint compat
  - 9d9b686057 Address review comments, consistency of quotes
  - df9bd5e7f9 Use unambigous long names with double dashes
- **ISSUE** #38209: (limited) Accepting a minion causes tornado to exit (refs: #38474)
- **PR** #38474: (cachedout) Allow an existing ioloop to be passed to salt-key @ *2016-12-29 16:28:51 UTC*
  - 59f2560d88 Merge pull request #38474 from cachedout/key_loop
  - de504538e1 Allow an existing ioloop to be passed to salt-key
- **ISSUE** #38438: (jf) file.line with mode=delete breaks on empty file (refs: #38467)
- **PR** #38467: (gtmanfred) file.line fail with mode=delete @ *2016-12-28 20:00:33 UTC*
  - 3d0c752acd Merge pull request #38467 from gtmanfred/2016.3
  - 7b7c6b3878 file.line fail with mode=delete
- **PR** #38434: (slinn0) Make sysctl.persist fail when failing to set a value into the running kernel @ *2016-12-27 15:37:53 UTC*
  - 940025d5c4 Merge pull request #38434 from slinn0/issue_38433_fixes
  - 22af87a3fc Fixes for https://github.com/saltstack/salt/issues/38433

  - **PR** #38421: (rallytime) Update deprecation notices to the correct version
  - **PR** #38420: (rallytime) Removed various deprecation notices from salt/modules/* files (refs: #38421)
- **ISSUE** #38282: (sash-kan) file.managed fails when file (which contains utf-characters in the name) exists (refs: #38415)
  - **PR** #38415: (terminalmage) file.managed: Fix failure when filename contains unicode chars
- **PR** #38419: (Ch3LL) fix scsci docs example @ *2016-12-22 18:57:51 UTC*
  - 2cdb59d055 Merge pull request #38419 from Ch3LL/fix_doc_scsi
  - 234043b8bb fix scsci docs example
  - **PR** #38407: (terminalmage) Improve pillar documentation
- **ISSUE** #38372: (fanirama) Issue with cron.file. Source: salt://path/to/crontab_file not found (refs: #38398)
- **PR** #38398: (terminalmage) Fix call to file.get_managed in cron.file state @ *2016-12-22 16:46:14 UTC*
  - 423b1fddff Merge pull request #38398 from terminalmage/issue38372
  - c80dbaa914 Fix call to file.get_managed in cron.file state
  - **PR** #38382: (heewa) Fix http.query when result has no text
- **PR** #38390: (meaksh) Add ``try-restart'' to fix autorestarting on SUSE systems @ *2016-12-21 16:06:24 UTC*
  - b74b5c7d38 Merge pull request #38390 from meaksh/2016.3-fix-try-restart-for-autorestarting-on-SUSE-systems
  - de6ec05ec0 add try-restart to fix autorestarting on SUSE systems
- **PR** #38221: (UtahDave) Fix default returner @ *2016-12-20 20:34:36 UTC*
  - 2c3a39760a Merge pull request #38221 from UtahDave/fix_default_returner
  - 385640765b remove a blank line to satisfy linter
  - 9c248aa14c validate return opt, remove default.
  - 8bb37f9fe7 specify allowed types and default for ``returner''
  - 11863a4bfe add examples of default minion returners
  - e7c6012655 add support for default returners using *return*
- **PR** #38288: (terminalmage) archive.extracted: don't try to cache local sources (2016.3 branch) @ *2016-12-18 13:07:11 UTC*
  - 09d9cff992 Merge pull request #38288 from terminalmage/archive-extracted-local-source-2016.3
  - 845e3d0e75 Update tests to reflect change in cache behavior
  - 5a08d7c70a archive.extracted: don't try to cache local sources (2016.3 branch)
- **PR** #38312: (cro) Backport feature allowing proxy config to live in pillar OR /etc/salt/proxy @ *2016-12-18 12:39:01 UTC*
  - bf37667f8a Merge pull request #38312 from cro/proxy_config_in_cfg
  - 2006c4000e Typo
  - 689d95b10f Backport feature allowing proxy config to live in pillar OR /etc/salt/proxy.
- **ISSUE** #12788: (whiteinge) Comb through docs to replace :doc: roles with :ref: (refs: #38320)
- **PR** #38320: (rallytime) Cleanup doc internal markup references @ *2016-12-18 12:31:28 UTC*

  - c83db5a785 Merge pull request #38320 from rallytime/cleanup-doc-refs
  - 62978cb7a0 Don't check the doc/conf.py file for doc markup refs
  - 770e732d76 Add a unit test to search for new doc markup refs
  - 5c42a361a0 Remove ":doc:" references from all doc/topics/installation/* files
  - 23bce1c929 Remove ":doc:" references from all doc/topics/releases/* files
  - 4aafa41d22 Remove ":doc:" references from a bunch of doc/* files
  - 02bfe7912c Remove more ":doc:" references from doc/* files
  - 6e32267d0c Remove ":doc:" references in salt/* files
  - **PR** #38281: (mikejford) Add nick to args for create_multi
- **ISSUE** #38290: (dragon788) Need to use machine automation friendly output (refs: #38313)
- **PR** #38313: (dragon788) 2016.3 chocolatey fix @ *2016-12-16 17:20:39 UTC*
  - 235682b1e6 Merge pull request #38313 from dragon788/2016.3-chocolatey-fix
  - 1f5fc17551 Use machine readable output for list
  - cdbd2fbe3c Added limit-output to eliminate false packages
- **ISSUE** #38174: (NickDubelman) [syndic] Why can't a syndic node signal when all of it's minions have returned? (refs: #38279)
- **ISSUE** #32400: (rallytime) Document Default Config Values (refs: #38279)
- **PR** #38279: (rallytime) Add docs for syndic_wait setting @ *2016-12-15 18:30:31 UTC*
  - 9e78ddc80e Merge pull request #38279 from rallytime/fix-38174
  - 4a62d01577 Add docs for syndic_wait setting
- **PR** #38248: (meaksh) Successfully exit of salt-api child processes when SIGTERM is received @ *2016-12-15 09:16:27 UTC*
  - fc9e1dff35 Merge pull request #38248 from meaksh/salt-api-successfully-close-child-processes
  - ee6eae9855 Successfully exit of salt-api child processes when SIGTERM.
- **PR** #38254: (terminalmage) Also check if pillarenv is in opts @ *2016-12-15 09:10:24 UTC*
  - 3c718ed35e Merge pull request #38254 from terminalmage/check-pillarenv
  - fa9ad311c6 Also check if pillarenv is in opts
  - **PR** #38256: (rallytime) [2016.3] Bump latest release version to 2016.11.1
- **PR** #38198: (vutny) Add missing requirements for running unit tests: libcloud and boto3 @ *2016-12-13 14:12:20 UTC*
  - 004e46afe7 Merge pull request #38198 from vutny/unit-tests-require-libcloud-boto3
  - a6098bac1a Remove note about SaltTesting installation, now it is in the requirements
  - 004bff113e Add missing requirements for running unit tests: libcloud and boto3
- **PR** #38213: (rallytime) Skip test_cert_info tls unit test on pyOpenSSL upstream errors @ *2016-12-13 12:05:01 UTC*
  - 9d497bc74c Merge pull request #38213 from rallytime/skip-tls-test
  - bdb807fc7c Skip test_cert_info tls unit test on pyOpenSSL upstream errors

- **PR** #38224: (whiteinge) Allow CORS OPTIONS requests to be unauthenticated @ *2016-12-13 12:02:30 UTC*
  - 203109dd17 Merge pull request #38224 from whiteinge/cors-options-unauthed
  - de4d3227ab Allow CORS OPTIONS requests to be unauthenticated
- **PR** #38223: (whiteinge) Add root_dir to salt-api file paths @ *2016-12-13 07:44:19 UTC*
  - **PR** #37272: (vutny) Get default logging level and log file from default opts dict (refs: #38223)
  - 721a5feccd Merge pull request #38223 from whiteinge/salt-api-root_dirs
  - bfbf390c0e Add root_dir to salt-api file paths
- **ISSUE** #38162: (747project) git_pillar does not detect changes to remote repository when told to update (refs: #38191)
- **PR** #38191: (terminalmage) Clarify the fact that git_pillar.update does not fast-forward @ *2016-12-12 09:45:48 UTC*
  - 70f7d22ad6 Merge pull request #38191 from terminalmage/issue38162
  - 1ae543a98a Clarify the fact that git_pillar.update does not fast-forward
- **PR** #38194: (vutny) Document the requirements for running ZeroMQ-based integration tests @ *2016-12-12 09:42:11 UTC*
  - 28171cbfc5 Merge pull request #38194 from vutny/integration-test-requirements-doc
  - e9f419ff64 Document the requirements for running ZeroMQ-based integration tests
- **PR** #38185: (rallytime) Back-port #38181 to 2016.3 @ *2016-12-09 22:27:44 UTC*
  - **PR** #38181: (rallytime) Reset socket default timeout to None (fixes daemons_tests failures) (refs: #38185)
  - a4ef037ab1 Merge pull request #38185 from rallytime/bp-38181
  - 609f814454 Reset socket default timeout to None (fixes daemons_tests failures)
- **PR** #38163: (Ch3LL) enabled ec2 cloud tests @ *2016-12-09 18:01:57 UTC*
  - 65b2ad7b14 Merge pull request #38163 from Ch3LL/enabled_ec2_cloud
  - be74c45463 enabled ec2 cloud tests
- **PR** #38177: (vutny) Correct *cp.get_file_str* docstring and add integration tests @ *2016-12-09 16:55:35 UTC*
  - b63f74e034 Merge pull request #38177 from vutny/fix-cp-get-file-str
  - a449980672 Correct *cp.get_file_str* docstring and add integration tests
- **PR** #38153: (vutny) Master config includes may contain errors and be safely skipped @ *2016-12-08 17:43:34 UTC*
  - 7596313be0 Merge pull request #38153 from vutny/master-includes-error-tolerance
  - cd0154ee93 Master config includes may contain errors and be safely skipped
  - **PR** #38134: (rallytime) Skip daemon unit tests when running on Python 2.6
- **ISSUE** #38091: (tjyang) [WARNING] salt.loaded.int.module.zenoss.__virtual__() is wrongly returning *None*. (refs: #38102)
- **PR** #38102: (rallytime) Add False + msg tuple return if requests is missing for zenoss module @ *2016-12-07 13:24:37 UTC*
  - d3d98fd4eb Merge pull request #38102 from rallytime/fix-38091
  - 4f79d5a0d1 Add False + msg tuple return if requests is missing for zenoss module

- **ISSUE** #36707: (do3meli) slow FreeBSD sysctl module with test=true (refs: #36794)
- **PR** #38104: (rallytime) Back-port #36794 to 2016.3 @ *2016-12-07 13:23:48 UTC*
  - **PR** #36794: (do3meli) FreeBSD sysctl module now handels config_file parameter in show method (refs: #38104)
  - 8c8cbc2734 Merge pull request #38104 from rallytime/bp-36794
  - c906c8a0d5 Pylint fixes
  - da3ebf83e6 FreeBSD sysctl module now handels config_file parameter in show method
- **ISSUE** #35342: (morganwillcock) win_pkg: refresh_db doesn't remove cached items which have been renamed or removed (refs: #38083)
- **PR** #38083: (twangboy) Only delete .sls files from winrepo-ng [DO NOT MERGE FORWARD] @ *2016-12-06 14:13:35 UTC*
  - fbc87769b9 Merge pull request #38083 from twangboy/fix_refresh_db
  - 978af6d83c Remove only .sls files from the cached winrepo-ng
- **PR** #38059: (rallytime) Call exec_test for the Syndic daemon in tests.unit.daemons_test.py @ *2016-12-04 04:18:41 UTC*
  - **PR** #38057: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 (refs: #38059)
  - **PR** #38034: (cachedout) Modify daemons test to use multiprocessing (refs: #38059)
  - 9dcfdeef6b Merge pull request #38059 from rallytime/daemons-test-fix
  - eb372b27d8 Add missing ``not'' statement: The last syndic test should assertFalse()
  - 4e10f8e018 Call exec_test for the Syndic daemon in tests.unit.daemons_test.py
- **ISSUE** #37939: (Talkless) file.comment always report changes in test=True mode (refs: #38039)
- **PR** #38039: (rallytime) Check to see if a line is already commented before moving on @ *2016-12-02 20:08:35 UTC*
  - 9cd42b9b3f Merge pull request #38039 from rallytime/fix-37939
  - 1da7aacfbe Update unit tests to account for additional file.search call
  - 8a685b1820 Check to see if a line is already commented before moving on
  - f2c045520d Write an integration test demonstrating the issue
- **ISSUE** #38037: (dmurphy18) pkg.latest and yumpkg.latest_version return incorrect package versions 2016.3 and 2016.11 (refs: #38045)
- **PR** #38045: (terminalmage) yumpkg.py: don't include non-upgrade versions found by ``yum list available'' @ *2016-12-02 20:07:38 UTC*
  - a34a763984 Merge pull request #38045 from terminalmage/issue38037
  - 65289503d9 Simplify logic for matching desired pkg arch with actual pkg arch
  - 3babbcda94 yumpkg.py: don't include non-upgrade versions found by ``yum list available''
  - **PR** #38034: (cachedout) Modify daemons test to use multiprocessing (refs: #38059)
- **PR** #37995: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-11-30 20:12:55 UTC*
  - 6942d5d95b Merge pull request #37995 from rallytime/merge-2016.3
  - b44e17921c Merge branch `2015.8' into `2016.3'

        * 7a7e36728f Merge pull request #37978 from terminalmage/ext_pillar_first-docs
            · 61ed9a8657 Add clarifying language to ext_pillar_first docs
    - **PR** #38002: (laleocen) fix broken yaml code block
- **ISSUE** #35088: (Modulus) salt/cloud/ec2.py encoding problems. (refs: #37912)
- **PR** #37912: (attiasr) fix encoding problem aws responses @ *2016-11-30 18:10:30 UTC*
    - 3dd45fbedf Merge pull request #37912 from attiasr/fix_aws_response_encoding
    - ba4ec4e7f1 use Requests result encoding to encode the text
    - abe4eb3b98 fix encoding problem aws responses
- **PR** #37950: (vutny) Set default Salt Master address for a Syndic (like for a Minion) @ *2016-11-30 18:09:04 UTC*
    - 69a74a4d2d Merge pull request #37950 from vutny/fix-starting-up-syndic
    - 7d9bc9abce syndic_master: correct default value, documentation and example config
    - 92a7c7ed1b Set default Salt Master address for a Syndic (like for a Minion)
    - **PR** #37964: (terminalmage) Add clarification on expr_form usage and future deprecation
- **ISSUE** #37867: (tobiasBora) Bug into lsb_release that crash salt (refs: #37962)
    - **PR** #37962: (cachedout) Catch possible exception from lsb_release
- **ISSUE** #37945: (gstachowiak) Missing exception handling in salt.master.Maintenance. Process never completes. (refs: #37961)
    - **PR** #37961: (cachedout) Handle empty tokens safely
- **PR** #37272: (vutny) Get default logging level and log file from default opts dict (refs: #38223) @ *2016-11-28 23:04:20 UTC*
    - ea46639ce7 Merge pull request #37272 from vutny/fix-getting-default-logging-opts
    - e5ce52388a Fix description in the Salt Syndic usage info
    - 518a3dd7ee Add unit tests for Salt parsers processing logging options
    - 83d6a44254 Add *ssh_log_file* option to master config and documentation
    - c8a0915460 Fix configuration example and documentation for *syndic_log_file* option
    - e64dd3ed6b Correct default attributes for various parser classes
    - 82a2e216b3 Fix default usage string for Salt command line programs
    - 45dffa292f Fix readding and updating logfile and pidfile config options for Salt API
    - f47253c21b Fix reading and applying Salt Cloud default configuration
    - fad5bec936 Work with a copy of default opts dictionaries
    - b7c24811e5 Fix *log_level_logfile* config value type
    - 1bd76a1d96 Fix setting temporary log level if CLI option omitted
    - 121848cc77 Fix obtaining *log_granular_levels* config setting
    - 44cf07fec2 Make CLI options take precedence for setting up logfile_logger
    - 61afaf1792 Fix setting option attributes when processing *log_level* and *log_file*
    - 3c60e2388e Fix processing of *log_level_logfile* config setting
    - 55a0af5bbd Use attribute functions for getting/setting options and config values

  - c25f2d091e Fix getting Salt API default logfile option
  - f2422373c1 Remove processing of unused and undocumented *cli_*_log_** config options
  - 2065e8311c Get default logging level and file from default opts dict
- **PR** #37925: (kontrolld) Fix missing ipv6 options centos network @ *2016-11-28 22:38:43 UTC*
  - f2f957da6c Merge pull request #37925 from kontrolld/add-ipv6-centos-network
  - ac2b477412 Adding IPv6 functionality for CentOS /etc/sysconfig/network
- **ISSUE** #37059: (basepi) Beacon fileserver operations cause scheduled jobs with fileserver operations to hang (refs: #37899)
- **PR** #37899: (DmitryKuzmenko) Clear functions context in schedule tasks for ZeroMQ. @ *2016-11-28 22:23:45 UTC*
  - c07ad11279 Merge pull request #37899 from DSRCorporation/bugs/37059_schedule_task_hang
  - 9497748546 Clear functions context in schedule tasks for ZeroMQ.
- **ISSUE** #37737: (b-harper) python client api CloudClient multiple calls needed (refs: #37928)
- **PR** #37928: (techhat) Don't modify self.opts directly @ *2016-11-28 21:07:40 UTC*
  - a55519db40 Merge pull request #37928 from techhat/issue37737
  - a09a60e89b Don't modify self.opts directly
- **PR** #37929: (gtmanfred) add list_nodes_min to nova driver @ *2016-11-28 21:05:40 UTC*
  - 9d17f1ce90 Merge pull request #37929 from gtmanfred/2016.3
  - c7d2c73503 add list_nodes_min to nova driver
- **PR** #37926: (kontrolld) Fixes no IPv6 functionality in /etc/sysconfig/network @ *2016-11-28 20:40:00 UTC*
  - 3bb743b59f Merge pull request #37926 from kontrolld/fix-ipv6-centos-network
  - 3ed42e5b44 updated
  - 3b3bc4f239 Fixes no IPv6 functionality in /etc/sysconfig/network
- **PR** #37921: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-11-28 19:54:40 UTC*
  - 271170a9f3 Merge pull request #37921 from rallytime/merge-2016.3
  - 523a67c422 Merge branch `2015.8' into `2016.3'
    * 4cdc6cf5ec Update earlier release channels' docs with Carbon release notes (#37914)
    * d31491a7fe [2015.8] Update version numbers in doc config for 2016.11.0 release (#37918)
- **PR** #37924: (cachedout) Update test for new gem ver @ *2016-11-28 18:17:53 UTC*
  - 6cd6429ac0 Merge pull request #37924 from cachedout/fix_gem_states
  - 894cca3427 Update test for new gem ver
- **PR** #37916: (rallytime) [2016.3] Update version numbers in doc config for 2016.11.0 release @ *2016-11-28 17:09:08 UTC*
  - c35ba1f390 Merge pull request #37916 from rallytime/doc-update-2016.3
  - bd40592289 [2016.3] Update version numbers in doc config for 2016.11.0 release
- **ISSUE** #37287: (aaronm-cloudtek) salt.states.ddns.present: `NS' record type always returns as changed (refs: #37785)

- **PR** #37785: (aaronm-cloudtek) respect trailing dot in ddns name parameter @ *2016-11-28 14:02:10 UTC*
  - e13a2488c8 Merge pull request #37785 from Cloudtek/ddns-respect-trailing-dot
  - 262e3b3697 respect trailing dot in ddns name parameter
- **ISSUE** #37870: (fj40crawler) salt.states.augeas.change returns None when test=True (refs: #37895)
- **PR** #37895: (fj40crawler) Change return value for salt/states/augeas.py to be True instead of N... @ *2016-11-28 13:49:27 UTC*
  - c03b389422 Merge pull request #37895 from fj40crawler/fix-augeas-return-for-test
  - ddc238df36 Fixed augeas_test.py to match True v.s. None for test_change_in_test_mode
  - ef75c459c0 Merge branch `2016.3' of github.com:saltstack/salt into fix-augeas-return-for-test
  - b0fe0cd256 Change return value for salt/states/augeas.py to be True instead of None for cases where salt is run with test=True. Fixes #37870
- **PR** #37907: (Talkless) Fix server trust in test run of svn.latest @ *2016-11-28 13:47:39 UTC*
  - fdbc31e8d8 Merge pull request #37907 from Talkless/patch-2
  - 072a319490 Fix server trust in test run of svn.latest
- **PR** #37896: (toanju) rh networking: add missing values @ *2016-11-27 10:30:35 UTC*
  - f39fdf443f Merge pull request #37896 from toanju/2016.3
  - c95304188e rh networking: add missing values
- **PR** #37886: (bdrung) Fix various spelling mistakes @ *2016-11-25 02:59:36 UTC*
  - ea935c5a91 Merge pull request #37886 from bdrung/fix-typos
  - 9a51ba5c5b Fix various spelling mistakes
- **ISSUE** #37732: (dhaines) list_semod() (from modules/selinux.py) incompatible with policycoreutils-2.5 (RHEL 7.3) (refs: #37736)
- **PR** #37736: (dhaines) handle semodule version >=2.4 (#37732) and fix typo @ *2016-11-24 01:44:20 UTC*
  - 371b0a86d9 Merge pull request #37736 from dhaines/issue-37732
  - 7ef590a505 Update selinux.py
  - 516a67e6a3 fix indexing error
  - 4e49c1e991 fix typo
  - b16f2d8400 handle semodule version >=2.4 (#37732) and fix typo
- **PR** #37797: (clan) check count of columns after split @ *2016-11-24 01:28:59 UTC*
  - 87aeb66fbf Merge pull request #37797 from clan/extfs
  - acf0f960ef check count of columns after split
- **PR** #37762: (twangboy) Add pre_versions to chocolatey.installed @ *2016-11-24 01:27:29 UTC*
  - f7c7109152 Merge pull request #37762 from twangboy/fix_chocolatey_state
  - 9696b6dfa5 Use keyword args instead of relying on ordering
  - 398eaa074d Add pre_versions to the available arguments
- **PR** #37866: (meaksh) Backport #37149 #36938 and #36784 to 2016.3 @ *2016-11-23 21:54:17 UTC*
  - **PR** #37857: (meaksh) Backport #37149 and #36938 to 2015.8 (refs: #37866)

  - **PR** #37856: (meaksh) Backport #36784 to 2015.8 (refs: #37866)
  - **PR** #37149: (dincamihai) Fix pkg.latest_version when latest already installed (refs: #37857, #37866)
  - **PR** #36938: (wanparo) acl.delfacl: fix position of -X option to setfacl (refs: #37857, #37866)
  - **PR** #36784: (moio) OS grains for SLES Expanded Support (refs: #37856, #37866)
  - 56baa92d55 Merge pull request #37866 from meaksh/2016.3-bp-37149-36938-36784
  - 9d8d578109 Fix pkg.latest_version when latest already installed
  - ffca0d491c - acl.delfacl: fix position of -X option to setfacl
  - 3dfed6b841 Adjust linux_acl unit test argument ordering
  - f185ecdde1 core.py: quote style fixed
  - 8404d13424 Setting up OS grains for SLES Expanded Support (SUSE's Red Hat compatible platform)
- **ISSUE** #32829: (tyhunt99) Dockerng appears to not be using docker registries pillar data (refs: #36893)
- **PR** #37863: (rallytime) Back-port #36893 to 2016.3 @ *2016-11-23 17:09:09 UTC*
  - **PR** #36893: (tyhunt99) add option to force a reauth for a docker registry (refs: #37863)
  - d0cc7f0d56 Merge pull request #37863 from rallytime/bp-36893
  - 4c70534991 Add versionadded to reauth option in dockerng module
  - 5ca2c388c2 added documentation for the new reuth option in docker registry configuration
  - 5b0c11ab47 add option to force a reauth for a docker registry
  - **PR** #37847: (laleocen) add multiline encryption documentation to nacl
- **ISSUE** #37787: (elyulka) user.present state fails to change loginclass on FreeBSD (refs: #37827)
  - **PR** #37827: (silenius) add missing chloginclass
  - **PR** #37826: (rallytime) Update branch refs to more relevant branch
  - **PR** #37822: (laleocen) add documenation for multiline encryption using nacl (refs: #37826)
- **ISSUE** #19269: (markuskramerIgitt) Undocumented feature *names:* of *file.directory* (refs: #37823)
  - **PR** #37823: (rallytime) Add ``names'' option to file state docs: point users to highstate doc examples
- **ISSUE** #15697: (arthurlogilab) keystone.user_present should not re-set the password when user exists (refs: #37821)
  - **PR** #37821: (rallytime) Clarify keystone.user_present password state docs with default behavior
- **ISSUE** #5999: (pille) libvirt.keys does not work (refs: #37820)
  - **PR** #37820: (rallytime) Add some dependency documentation to libvirt docs
- **PR** #37772: (bdrung) Support initializing OpenSSL 1.1 @ *2016-11-21 20:28:51 UTC*
  - 485270f74e Merge pull request #37772 from bdrung/openssl1.1
  - 819c9658ed Support initializing OpenSSL 1.1
- **ISSUE** #37383: (edwardsdanielj) Orchestration arguments (kwarg) not being interperted / How I learned to stop worrying about documentation and love experimenting (refs: #37817)
  - **PR** #37817: (rallytime) Update orchestrate runner file.copy doc example
- **ISSUE** #37653: (gravyboat) Salt.cron docs don't wrap @hourly and @daily correctly in quotes for the examples (refs: #37816)

- **ISSUE** #31953: (sjorge) Documentation for salt.states.cron is incorrect (refs: #32157)
- **PR** #37816: (rallytime) Back-port #32157 to 2016.3 @ *2016-11-21 20:22:27 UTC*
  - **PR** #32157: (cachedout) Add quotes to cron doc (refs: #37816)
  - c5d3d8b66a Merge pull request #37816 from rallytime/bp-32157
  - d9c297119e Add quotes to cron doc
- **PR** #37812: (rallytime) Back-port #37790 to 2016.3 @ *2016-11-21 18:46:40 UTC*
  - **PR** #37790: (sofixa) Update cloud/proxmox.rst with more options and LXC (refs: #37812)
  - 97e6b6aabe Merge pull request #37812 from rallytime/bp-37790
  - ca3b6e7874 Update proxmox.rst with more options and LXC
- **ISSUE** #37751: (freach) Documentation salt.states.dockerng.running: ``privileged'' property undocumented (refs: #37789)
- **PR** #37811: (rallytime) Back-port #37789 to 2016.3 @ *2016-11-21 18:46:21 UTC*
  - **PR** #37789: (fedusia) issue: 37751 (refs: #37811)
  - 27703c54bc Merge pull request #37811 from rallytime/bp-37789
  - ba3fef48e1 fix comment
  - a021f76a9b issue: 37751 Add documentation for option privileged
- **PR** #37810: (rallytime) Back-port #37775 to 2016.3 @ *2016-11-21 18:45:53 UTC*
  - **PR** #37775: (calve) Document *python* argument in *salt.states.virtualenv_mod* (refs: #37810)
  - adac9d7c0c Merge pull request #37810 from rallytime/bp-37775
  - 2bed91437b Document *python* argument in *salt.states.virtualenv_mod*
- **ISSUE** #37742: (blaketmiller) Cannot match on nodegroup when checking minions (refs: #37763)
  - **PR** #37763: (cachedout) Add nodegroup check to ckminions
- **ISSUE** #37725: (secumod) salt-call incorrectly parses master hostname:port from minion config (refs: #37766)
  - **PR** #37766: (cachedout) Fix ip/port issue with salt-call
- **ISSUE** #33709: (msummers42) Any/All Salt-SSH invocations in 2016.3.0 Fails with AttributeError: `module' object has no attribute `BASE_THORIUM_ROOTS_DIR' (refs: #37767)
  - **PR** #37767: (cachedout) Add thorium path to syspaths
- **PR** #37760: (hu-dabao) Fix couchbase returner and add couple of more features @ *2016-11-18 00:28:23 UTC*
  - bff949f4e9 Merge pull request #37760 from hu-dabao/fix_cb_returner
  - de372f277e 1. returner no need to check whether the jid exists for external job cache setup 2. add full_ret to return doc so that the document will be informative 3. make ttl as a config attribute because salt-minion does not have keep_jobs attribute 4. add password into config attribute 5. update the documents accordingly
- **ISSUE** #36629: (yhekma) The pillar run module does not honor saltenv (refs: #37738)
- **PR** #37738: (terminalmage) Allow pillar.get to retrieve fresh pillar data when saltenv passed @ *2016-11-17 23:13:04 UTC*
  - 1f976ac212 Merge pull request #37738 from terminalmage/issue36629
  - da46678c51 Allow pillar.get to retrieve fresh pillar data when saltenv passed

  - **PR** #37745: (cro) Switch default filter tag for ONE resources from user only to all resources
- **ISSUE** #37498: (githubcdr) service.restart salt-minion fails on Ubuntu 14.04.5 LTS (refs: #37748, #38587)
  - **PR** #37748: (silenius) check for SERVICE_DIR in __virtual__ in salt.modules.daemontools
- **ISSUE** #37734: (Ch3LL) Joyent Cloud Size Issue (refs: #37735)
- **PR** #37735: (Ch3LL) change size and image of joyent profile @ *2016-11-16 21:07:52 UTC*
  - fa7883115e Merge pull request #37735 from Ch3LL/fix_joyent_profile
  - 9ef41dcdfc change size and image of joyent profile
- **PR** #37731: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-11-16 17:13:02 UTC*
  - 98e25c68aa Merge pull request #37731 from rallytime/merge-2016.3
  - ec1389711f Merge branch `2015.8' into `2016.3'
    * f417dbbe99 Merge pull request #37718 from terminalmage/docs
      · 23b8b2a3f4 Fix incorrectly-formatted RST

  - 694df30d40 Merge pull request #37565 from rallytime/bp-37549
  - c92a90b8e5 Update sqlite3.py
  - fb76557a2a sqlite is not found in 2015.8
- **ISSUE** #37511: (jdelic) service.dead now only operates if the service file exists (refs: #37562)
  - **PR** #37562: (terminalmage) Fix regression in service.dead state
- **ISSUE** #37554: (sjmh) salt-api doesn't dynamically re-read nodegroups configuration (refs: #37560)
  - **PR** #37560: (whiteinge) Skip config type checking for sdb values
  - **PR** #37556: (rallytime) Don't pass the vpc id to boto.vpc.create_internet_gateway func
  - **PR** #37543: (multani) Documentation rendering fixes
- **ISSUE** saltstack/salt#31081: (JensRantil) salt.modules.file.line documentation unclarities (refs: #37457)
- **PR** #37457: (rallytime) Fixup file.line docs to be more clear and consistent @ *2016-11-08 00:29:20 UTC*
  - 96b8b9a849 Merge pull request #37457 from rallytime/fix-31081
  - 25821bb8db Clarify which modes use ``before'', ``after'', and ``indent'' options
  - 8b2d2b9e7b Clarify file.line state docs as well
  - b2615892eb Move note about using mode=insert with location options to mode section
  - db0b0cefb8 Fixup file.line docs to be more clear and consistent
- **ISSUE** #35799: (davegiles) dsc.apply_config hangs (no error) on empty directory on target (refs: #37526)
- **PR** #37526: (twangboy) Remove loop from dsc.apply_config @ *2016-11-08 00:23:11 UTC*
  - 7de790ffed Merge pull request #37526 from twangboy/fix_35799
  - fc4260911c Remove unnecessary format

  - c934a2bfa7 Remove the loop from apply_config
  - **PR** saltstack/salt#37515: (rallytime) [carbon] Merge forward from 2016.3 to carbon (refs: #37534)
- **PR** #37534: (rallytime) Back-port fix needed from #37515 @ *2016-11-08 00:14:46 UTC*
  - **PR** #37515: (rallytime) [carbon] Merge forward from 2016.3 to carbon (refs: #37534)
  - 94811df2ea Merge pull request #37534 from rallytime/bp-merge-foward-fix
  - d1b2af1d69 Add missing source_hash_name args to a couple funcs
- **PR** #37533: (whiteinge) Return a 504 response instead of 500 for Salt timeouts @ *2016-11-08 00:14:15 UTC*
  - 17adbb0c9f Merge pull request #37533 from whiteinge/salt-api-504-timeouts
  - 63226aeda6 Return a 504 response instead of 500 for Salt timeouts
- **ISSUE** saltstack/salt#36679: (lorengordon) Command `Import-Module ServerManager' failed with return code: 1 (refs: #`saltstack/salt`#36736`_`_, #36736)
  - **PR** saltstack/salt#36736: (m03) Fix issue 36679 win_servermanager error (refs: #37529)
- **PR** #37529: (lorengordon) Backport: PR 36736 to 2016.3 @ *2016-11-08 00:04:10 UTC*
  - **PR** #36736: (m03) Fix issue 36679 win_servermanager error
  - a9f03eee6f Merge pull request #37529 from lorengordon/bp-36736
  - 21c2664b6a Fix issue 36679 win_servermanager failure
- **ISSUE** #37444: (Tanoti) Returning False from __virtual__ in a returner does not return expected error (refs: #`saltstack/salt`#37502`_`_, #37519, #37502)
  - **PR** saltstack/salt#37502: (cachedout) Log proper message on returners that cannot be loaded (refs: #37519)
- **PR** #37519: (rallytime) Update returner __virtual__() return messages for loader @ *2016-11-07 23:06:23 UTC*
  - 19475aada6 Merge pull request #37519 from rallytime/returner-load-errors
  - fb261a31f3 Update returner __virtual__() return messages for loader
- **ISSUE** #35016: (pingangit) TypeError: save_minions() got an unexpected keyword argument `syndic_id' (refs: #37527)
- **PR** #37527: (rallytime) Add syndic_id=None kwarg to save_minions funcs in returners @ *2016-11-07 23:04:03 UTC*
  - fefdfab850 Merge pull request #37527 from rallytime/fix-35016
  - 2944b244aa Add syndic_id=None kwarg to save_minions funcs in returners
  - **PR** #37530: (gtmanfred) fix Lithium to 2015.5.0
- **PR** #37514: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-11-07 16:51:06 UTC*
  - 743164844d Merge pull request #37514 from rallytime/merge-2016.3
  - 41166aede4 Merge branch `2015.8' into `2016.3'
  - c505a059ef [2015.8] Doc version updated to 2016.3.4 (#37482)
- **ISSUE** #36713: (Tanoti) ExtraData: unpack(b) received extra data after upgrading to 2016.3.3 (refs: #37503)
- **PR** #37503: (cachedout) Catch loader error on returners without save_load @ *2016-11-07 09:33:57 UTC*
  - 2d924d0820 Merge pull request #37503 from cachedout/issue_36713
  - 5f7f971b2c Catch loader error on returners without save_load

- **ISSUE** #37448: (alisson276) In `salt/key' events there are acts that never happen (refs: #37499)
- **PR** #37499: (cachedout) Clarify docs on salt-key events @ *2016-11-07 09:33:20 UTC*
  - d95bf59f97 Merge pull request #37499 from cachedout/key_docs_clarify
  - 2758e74785 Clarify docs on salt-key events
- **PR** #37500: (cachedout) Remove unused flag @ *2016-11-07 09:33:04 UTC*
  - 1dd1408ae6 Merge pull request #37500 from cachedout/remove_include_errors
  - 6c705b11e0 Remove unused flag
- **ISSUE** #37444: (Tanoti) Returning False from __virtual__ in a returner does not return expected error (refs: #`saltstack/salt`#37502`_`_, #37519, #37502)
- **PR** #37502: (cachedout) Log proper message on returners that cannot be loaded @ *2016-11-07 09:32:45 UTC*
  - 4b6f1ab1c4 Merge pull request #37502 from cachedout/issue_37444
  - 4c5ab057ce Remove debugging
  - 17d01e4f4c Log proper message on returners that cannot be loaded
- **ISSUE** #37389: (d101nelson) Some core grains are inaccurate or incomplete for Solaris (refs: #37472)
- **PR** #37494: (sjorge) Forgot to update os_family map in #37472 @ *2016-11-06 22:18:54 UTC*
  - **PR** #37472: (sjorge) 2016.3 solaris grains improvements (refs: #37494)
  - 2422dafd52 Merge pull request #37494 from sjorge/2016.3-osfam_map
  - 96ba545492 Forgot to update os_family map in #37472
- **PR** #37496: (mcalmer) fix status handling in sysv init scripts @ *2016-11-06 22:18:00 UTC*
  - 41bd8e3f52 Merge pull request #37496 from mcalmer/fix-status-handling-in-sysv-init-scripts
  - 1fb2c4dfcf fix status handling in sysv init scripts
- **PR** #37497: (terminalmage) Update 2016.3.5 release notes with source_hash_name explanation @ *2016-11-06 22:17:40 UTC*
  - e741a773a5 Merge pull request #37497 from terminalmage/release_notes
  - c08038d9ea Update 2016.3.5 release notes with source_hash_name explanation
- **PR** #37486: (twangboy) Add requirement for PowerShell 3 on Windows @ *2016-11-06 06:01:07 UTC*
  - f4426c2233 Merge pull request #37486 from twangboy/fix_win_docs
  - 9e0631a1ae Add docs denoting the requirement for at least PowerShell 3
- **PR** #37493: (cachedout) Add sdb support to minion and master configs @ *2016-11-06 06:00:18 UTC*
  - a1f355a569 Merge pull request #37493 from cachedout/minion_master_sdb
  - 9761a462c2 Add sdb support to minion and master configs
- **ISSUE** #31135: (jeffreyctang) file.line mode=replace breaks on empty file. (refs: #37452)
- **PR** #37452: (rallytime) file.line with mode=replace on an empty file should return False, not stacktrace @ *2016-11-06 01:55:11 UTC*
  - be93710fee Merge pull request #37452 from rallytime/fix-31135
  - c792f76d2f Bump log level from debug to warning on empty file
  - 5f181cf00d file.line with mode=replace on an empty file should return False

  - 94a00c66eb Write a unit test demonstrating stack trace in #31135

- **ISSUE** #37001: (phil123456) URGENT : archive.extracted does not work anymore (refs: #37081, #saltstack/salt`#37081`_)
- **ISSUE** #29010: (The-Loeki) file.managed download failing checksum testing for Ubuntu initrd w/source_hash (refs: #37469)
  - **PR** saltstack/salt#37081: (terminalmage) Fix archive.extracted remote source_hash verification (refs: #37469)
- **PR** #37469: (terminalmage) Rewrite file.extract_hash to improve its matching ability @ *2016-11-06 01:50:01 UTC*
  - **PR** #37081: (terminalmage) Fix archive.extracted remote source_hash verification (refs: #37469)
  - 129b0387e6 Merge pull request #37469 from terminalmage/issue29010
  - a3f38e5a9f Update file.extract_hash unit tests
  - b26b528f79 Add the source_hash_name param to file.managed states
  - 52fe72d402 Rewrite file.extract_hash
- **ISSUE** #37389: (d101nelson) Some core grains are inaccurate or incomplete for Solaris (refs: #37472)
- **PR** #37472: (sjorge) 2016.3 solaris grains improvements (refs: #37494) @ *2016-11-06 01:46:10 UTC*
  - 9426b9d5c4 Merge pull request #37472 from sjorge/2016.3-solaris-grains
  - 2958f5ce52 detect and properly handle OmniOS
  - 37c3a7f5ab handle Oracle Solaris better
  - 69706d32be parse minorrelease if it has a / in it
  - d1cf4a0e56 improve regex for parsing /etc/release using files from Solaris 8 SPARC and Solaris 10
  - 88eddef765 some more cleanup for smartos
  - d3ff39f09c improve smartos os version grains
- **PR** #37478: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-11-04 20:30:08 UTC*
  - 4ba63aba48 Merge pull request #37478 from rallytime/merge-2016.3
  - 3483a445f2 Merge branch `2015.8' into `2016.3'
    * 35888c2e30 Merge pull request #37408 from terminalmage/issue37286
      · 4e4a05731e Strip slashes from gitfs mountpoints
    * b6c57c6c8d Merge pull request #37418 from terminalmage/issue36849
      · 740bc54239 Do not use compression in tornado httpclient requests
    * 7fba8aaa7e Merge pull request #37441 from rallytime/bp-37428
      · 6fe3ef49de Fix incorrect reference of __utils__ in salt.utils
  - **PR** #37485: (rallytime) Get release notes started for 2016.3.5
  - **PR** #37483: (rallytime) [2016.3] Doc version updated to 2016.3.4
- **ISSUE** #37123: (nevins-b) file.recurse state doesn't support pulling from other environments (refs: #37121)
- **PR** #37121: (nevins-b) allow the file.recurse state to support saltenv @ *2016-11-04 05:59:28 UTC*
  - 580eca709b Merge pull request #37121 from nevins-b/2016.3

  - 99d2c360ed making messaging in tests match new return
  - bc4b0e7cda adding test for saltenv in file.recurse source url
  - 3315b67075 fixing saltenv if not set in url
  - a9683cbbd8 allow the file.recurse state to support saltenv (salt://example/dir?saltenv=dev)
- **PR** #37426: (jfindlay) Wait for macOS to change system settings @ *2016-11-04 04:35:52 UTC*
  - **PR** #37351: (jfindlay) modules.mac_power: give macOS time to change setting (refs: #37426)
  - 766b1437c2 Merge pull request #37426 from jfindlay/mac_sleep
  - 43a8e199bf modules.mac_power: wait for system to make change
  - feabca6e0b modules.mac_system: wait for system to make change
  - 0213eb9a07 utils.mac_utils: add confirm_updated
- **ISSUE** #37238: (cmclaughlin) Restarting master causes minion to hang (refs: #37438, #37602)
- **ISSUE** #37018: (tsaridas) get events from python (refs: #37438, #37602)
- **PR** #37438: (DmitryKuzmenko) Fix for #37238 salt hang on master restart (refs: #37602) @ *2016-11-04 04:10:51 UTC*
  - 9eab5c8f71 Merge pull request #37438 from DSRCorporation/bugs/37238_salt_hang_on_master_restart
  - f253d3ce4a Auto reconnect *salt* to master if the connection was lost.
  - **PR** saltstack/salt#31207: (thusoy) Remove error logging of missing boto libraries (refs: #37440)
- **PR** #37440: (rallytime) Back-port #31207 to 2016.3 @ *2016-11-04 04:09:33 UTC*
  - **PR** #31207: (thusoy) Remove error logging of missing boto libraries (refs: #37440)
  - 9aa7073f70 Merge pull request #37440 from rallytime/bp-31207
  - c71ae61271 Remove error logging of missing boto libraries
- **PR** #37442: (twangboy) Create paths.d directory @ *2016-11-04 04:07:19 UTC*
  - edbfadca21 Merge pull request #37442 from twangboy/fix_osx_postinstall
  - 8091a3065e Create paths.d directory
- **PR** #37445: (twangboy) Check for Server os before checking [DO NOT MERGE FORWARD] @ *2016-11-04 04:04:49 UTC*
  - afb1b3cee5 Merge pull request #37445 from twangboy/fix_import_error_2016.3
  - c0d5ebdd8a Check for Server os before checking
- **PR** #37446: (twangboy) Detect VC++ for Python on Win32 @ *2016-11-04 04:04:02 UTC*
  - 7a9f95ab3b Merge pull request #37446 from twangboy/fix_build_32
  - 2de69f48f8 Detect VC for Python correctly on 32bit Windows
- **ISSUE** saltstack/salt#36961: (nullify005) boto_secgroup assumes a string when checking ip_protocol validity when not tcp|udp|all|-1 (refs: #37447)
- **PR** #37447: (rallytime) Cast ip_protocol rule as a str() in boto_secgroup.present @ *2016-11-04 04:03:45 UTC*
  - 651e0f728f Merge pull request #37447 from rallytime/fix-36961
  - 6b930ac7aa Cast ip_protocol rule as a str() in boto_secgroup.present
- **ISSUE** #36446: (whiteinge) Custom salt-api config problem (refs: #37455)

  - **PR** saltstack/salt#36386: (xiaoanyunfei) fix salt-api's default opts were covered by salt-master #35734 (refs: #37455)

- **PR** #37455: (techhat) Make api opts respect correct root_dir @ *2016-11-04 03:25:40 UTC*
  - **PR** #35734: (xiaoanyunfei) fix salt-api's default opts were covered by salt-master (refs: #`saltstack/salt#36386`_)
  - a51d944c7c Merge pull request #37455 from techhat/issue36446
  - 7eff90d61d Make api opts respect correct root_dir
- **PR** #37459: (twangboy) Fix error message when ConvertTo-Json not supported [DO NOT MERGE FORWARD] @ *2016-11-04 03:22:31 UTC*
  - 3591bf0f58 Merge pull request #37459 from twangboy/fix_dsc_json_msg_2016.3
  - 949b70913d Use cmd.run_all instead of cmd.shell
- **PR** #37430: (meaksh) Including resolution parameters in the Zypper debug-solver call during a dry-run dist-upgrade (2016.3) @ *2016-11-03 14:35:46 UTC*
  - **PR** #37353: (meaksh) Including resolution parameters in the Zypper debug-solver call during a dry-run dist-upgrade (refs: #37430)
  - 80a99c4cc5 Merge pull request #37430 from meaksh/zypper-dist-upgrade-debug-solver-fix-2016.3
  - ffc596f215 Including resolver params for Zypper debug-solver
- **ISSUE** #37388: (tyhunt99) [2016.3.4] Refreshing of an s3 file server results in an exception. (refs: #37428)
  - **PR** #37428: (cachedout) Fix incorrect reference of __utils__ in salt.utils (refs: #37441)
- **PR** #37419: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2016-11-02 21:40:04 UTC*
  - 7864f9b79d Merge pull request #37419 from rallytime/merge-2016.3
  - bce47c9175 Merge branch `2015.8' into `2016.3'
    * 7b1d3b5562 Merge pull request #37392 from rallytime/bp-33190
    * 4063bae5de catch None cases for comments in jboss7 state module
  - **PR** #37416: (terminalmage) Fix regression in output for Ctrl-c'ed CLI jobs
  - **PR** #37414: (pass-by-value) Add unit tests for cloning from snapshot
  - **PR** #37350: (pass-by-value) Add handling for full and linked clone (refs: #37414)
  - **PR** saltstack/salt#37401: (cachedout) Bootstrap delay option for salt-cloud (refs: #37404)
- **PR** #37404: (cachedout) Revert ``Bootstrap delay option for salt-cloud'' @ *2016-11-02 09:48:53 UTC*
  - ecd794a233 Merge pull request #37404 from saltstack/revert-37401-bootstrap_delay
  - e864de8f03 Revert ``Bootstrap delay option for salt-cloud''
- **PR** #37401: (cachedout) Bootstrap delay option for salt-cloud @ *2016-11-02 09:02:13 UTC*
  - 2eb44fbd11 Merge pull request #37401 from cachedout/bootstrap_delay
  - 6e42b0e157 Bootstrap delay option for salt-cloud
- **PR** #37350: (pass-by-value) Add handling for full and linked clone (refs: #37414) @ *2016-11-02 08:02:29 UTC*
  - 9446e48da0 Merge pull request #37350 from pass-by-value/full_and_linked_clone_v1
  - d8b1c9c777 Add handling for full and linked clone and commit disk mode additions
- **ISSUE** #34841: (Ch3LL) Wrong return when using *user.chgroups* on windows (refs: #37386)

- **PR** #37386: (rallytime) Fix win_useradd.chgroups return when cmd.run_all retcode != 0 @ *2016-11-02 06:34:12 UTC*
  - c7f4d7f76a Merge pull request #37386 from rallytime/fix-34841
  - c70492a1fe Fix win_useradd.chgroups return when cmd.run_all retcode != 0
- **ISSUE** #34263: (vernondcole) Use of dnsmasq.set_config injects unintentional text into the configuration file. (refs: #37390)
- **PR** #37390: (rallytime) Don't insert __pub* keys into dnsmasq config file with set_config function @ *2016-11-02 06:31:53 UTC*
  - 34b6c6459a Merge pull request #37390 from rallytime/fix-34263
  - e082ff538b Fix failing test now that we're raising a CommandExecutionError
  - c6a3476abb Filter out the __pub keys passed via **kwargs for dnsmasq.set_config
  - fd380c79b9 Add test case to reproduce dnsmasq.set_config failure in #34263
- **ISSUE** #35163: (SolarisYan) salt file.mkdir (refs: #35287, #35189)
- **PR** #37391: (rallytime) Back-port #35287 to 2016.3 @ *2016-11-02 06:18:26 UTC*
  - **PR** #35287: (dere) 2016.3 (refs: #37391)
  - **PR** #35189: (dere) return value for file.mkdir instead of None (refs: #35287)
  - 798b2acbe3 Merge pull request #37391 from rallytime/bp-35287
  - 0e1ebea5a4 Simplify return value to ``True''.
  - 13022c5cc4 return value for mkdir instead of None
- **ISSUE** #37264: (junster1) Parsing __grains__ with json.dumps in a module is returning an empty dict in 2016.3.3 (refs: #37279)
- **PR** #37279: (gtmanfred) initialize super class of NamespacedDictWrapper @ *2016-11-01 15:12:49 UTC*
  - 1a4833b3a1 Merge pull request #37279 from gtmanfred/2016.3
  - 597f346d57 initialize super class of NamespacedDictWrapper
- **PR** #37351: (jfindlay) modules.mac_power: give macOS time to change setting (refs: #37426) @ *2016-10-31 19:15:40 UTC*
  - 351175931c Merge pull request #37351 from jfindlay/mac_set
  - 0c58056d84 modules.mac_power: give macOS time to change setting
- **PR** #37340: (cachedout) SIGILL -> SIGKILL in process test @ *2016-10-31 08:50:10 UTC*
  - 25c987e33a Merge pull request #37340 from cachedout/ill_kill_3
  - a6b7417fe9 SIGILL -> SIGKILL in process test
- **ISSUE** #35480: (jelenak) 200 processes of salt-master (2016.3.2) (refs: #37306)
- **PR** #37306: (DmitryKuzmenko) Don't use os.wait() on subprocesses managed by *multiprocessing*. @ *2016-10-31 06:55:30 UTC*
  - 7f1654894d Merge pull request #37306 from DSRCorporation/bugs/35480_master_shutdown_no_process_error
  - b6937ebaa8 Don't use os.wait() on subprocesses managed by *multiprocessing*.
- **ISSUE** #34998: (exowaucka) placementgroup parameter for salt-cloud is undocumented (refs: #37314)

- **PR** #37314: (rallytime) Document the existence of placementgroup option in ec2 driver @ *2016-10-31 06:42:33 UTC*
  - bf8ba97d54 Merge pull request #37314 from rallytime/fix-34998
  - 39459ed30b Document the existence of placementgroup option in ec2 driver
- **ISSUE** #36148: (alex-zel) Eauth error with openLDAP groups (refs: #37219)
- **PR** #37219: (alex-zel) Fix freeipa ldap groups @ *2016-10-28 04:33:37 UTC*
  - e0baf4b193 Merge pull request #37219 from alex-zel/fix-freeipa-ldap-groups
  - b5b2e7e097 Remove trailing whitespaces
  - 32f906b020 Add support for FreeIPA

25.2.28 Salt 2016.3.6 Release Notes

Version 2016.3.6 is a bugfix release for *2016.3.0*.

Statistics

- Total Merges: **119**
- Total Issue References: **52**
- Total PR References: **163**

Security Fix

CVE-2017-7893 Compromised salt-minions can impersonate the salt-master. (Discovery credit: Frank Spierings)

Changelog for v2016.3.5..v2016.3.6

Generated at: 2018-05-27 13:45:07 UTC

- **PR** #40232: (rallytime) Update release notes for 2016.3.6 @ *2017-03-22 21:09:35 UTC*
  - 24c4ae9c21 Merge pull request #40232 from rallytime/update-release-notes
  - 2ead188b4f Update release notes for 2016.3.6
- **ISSUE** #39854: (Foxlik) quoted space in authorized_keys confuses ssh.py (refs: #39855)
- **PR** #39855: (Foxlik) Use regular expression instead of split when replacing authorized_keys @ *2017-03-22 18:28:32 UTC*
  - c59ae9a82c Merge pull request #39855 from Foxlik/use_regex_to_compare_authorized_keys
  - d46845a5b6 Add newline at end of file
  - d4a3c8a66a Use regular expression instead of split when replacing authorized_keys

- **PR** #40221: (rallytime) Back-port #39179 to 2016.3 @ *2017-03-22 17:40:34 UTC*
  - **PR** #39179: (mcalmer) fix error parsing (refs: #40221)
  - fd10430018 Merge pull request #40221 from rallytime/bp-39179
  - 07dc2de084 fix error parsing
- **ISSUE** #40203: (frogunder) 2016.3.6. Minion don't connect to older master. (refs: #40206)
- **PR** #40206: (cro) Leave sign_pub_messages off by default. @ *2017-03-22 16:43:03 UTC*
  - a27a2cc3bb Merge pull request #40206 from cro/sign_pub_take2
  - 01048de83f leave sign_pub_messages off on minion by default.
  - a82b005507 Leave sign_pub_messages off by default.
- **PR** #40193: (rallytime) Back-port #40117 to 2016.3 @ *2017-03-22 16:42:21 UTC*
  - **PR** #40117: (narendraingale2) Fix force remove (refs: #40193)
  - d1abb4cbaa Merge pull request #40193 from rallytime/bp-40117
  - cf1857904b More optimization.
  - 5a08266814 Removed debug statemnt
  - f557f7c6bb Added fix for issue 39393
  - bb62278b73 Reverting changes.
  - a9107cde44 Added if condition for broken link.
- **PR** #40196: (twangboy) Update dependencies for PyOpenSSL @ *2017-03-22 16:40:46 UTC*
  - 0f1ff4d4a8 Merge pull request #40196 from twangboy/win_fix_deps
  - 6761527793 Update dependencies for PyOpenSSL
- **PR** #40184: (terminalmage) Link to minion start reactor example from FAQ. @ *2017-03-21 17:33:09 UTC*
  - b0501515cb Merge pull request #40184 from terminalmage/link-reactor-example
  - a42be82993 Link to minion start reactor example from FAQ.
- **PR** #40182: (terminalmage) Add support for ``stopped'' state to dockerng's mod_watch @ *2017-03-21 15:40:29 UTC*
  - d4e6c58526 Merge pull request #40182 from terminalmage/dockerng-mod_watch-stopped
  - 4629a26fb7 Add support for ``stopped'' state to dockerng's mod_watch
- **PR** #40171: (Ch3LL) additional PRs/issues for 2016.3.6 release notes @ *2017-03-20 22:14:17 UTC*
  - a0b4082484 Merge pull request #40171 from Ch3LL/2016.3.6_release
  - 9c6d8d892f additional PRs/issues for 2016.3.6 release notes
- **PR** #40120: (sergeizv) gce: Exclude GCENodeDriver objects from _expand_node result @ *2017-03-20 21:44:42 UTC*
  - 33ba7821f7 Merge pull request #40120 from sergeizv/gce-expand-node-fix
  - 9d0fbe7e01 gce: Exclude GCENodeDriver objects from _expand_node result
- **PR** #40122: (meaksh) Adding ``pkg.install downloadonly=True'' support to yum/dnf execution module @ *2017-03-20 21:44:15 UTC*
  - 48843977c3 Merge pull request #40122 from meaksh/2016.3-yum-downloadonly-support

  - 067f3f77c2 Adding downloadonly support to yum/dnf module

- **PR** #40159: (cro) Turn on sign_pub_messages by default. @ *2017-03-20 21:00:49 UTC*
  - 60e1d4e2f3 Merge pull request #40159 from cro/sign_pub
  - e663b761fb Fix small syntax error
  - 0a0f46fb14 Turn on sign_pub_messages by default. Make sure messages with no `sig' are dropped with error when sign_pub_messages is True.
- **PR** #40123: (twangboy) Adds support for inet_pton in Windows to network util @ *2017-03-20 16:25:47 UTC*
  - 28e4fc17b6 Merge pull request #40123 from twangboy/win_fix_network
  - 06dfd55ef9 Adds support for inet_pton in Windows to network util
- **ISSUE** #39995: (frogunder) Head of Develop - Multimaster error (refs: #40141)
- **ISSUE** #39118: (bobrik) Minion ipv6 option is not documented (refs: #39289, #39131)
- **PR** #40141: (bobrik) Use the first address if cannot connect to any @ *2017-03-20 15:06:57 UTC*
  - **PR** #39289: (bobrik) Autodetect IPv6 connectivity from minion to master (refs: #39766, #40141)
  - 35ddb79f59 Merge pull request #40141 from bobrik/fallback-resolve
  - af1545deed Use the first address if cannot connect to any
- **PR** #40059: (terminalmage) Fix traceback when virtualenv.managed is invoked with nonexistant user @ *2017-03-16 20:46:43 UTC*
  - 116201f345 Merge pull request #40059 from terminalmage/fix-virtualenv-traceback
  - e3cfd29d6b Fix traceback when virtualenv.managed is invoked with nonexistant user
- **PR** #40090: (rallytime) Back-port #40056 to 2016.3 @ *2017-03-16 19:42:58 UTC*
  - **PR** #40056: (thatch45) update mention bot blacklist (refs: #40090)
  - a01b52b9a3 Merge pull request #40090 from rallytime/bp-40056
  - ae012db87a update mention bot blacklist
- **PR** #40057: (cachedout) More mentionbot blacklists @ *2017-03-16 18:10:11 UTC*
  - d1570bba4c Merge pull request #40057 from cachedout/ollie_blacklist
  - 0ac2e83d37 Merge branch `2016.3' into ollie_blacklist
- **PR** #40070: (Ch3LL) update 2016.3.6 release notes with additional PR's @ *2017-03-16 15:43:22 UTC*
  - d36bdb1a6e Merge pull request #40070 from Ch3LL/2016.3.6_release
  - a1f8b49bd1 update 2016.3.6 release notes with additional PR's
- **PR** #40018: (meaksh) Allows overriding `timeout' and `gather_job_timeout' to `manage.up' runner call @ *2017-03-15 19:43:01 UTC*
  - 8dcffc7751 Merge pull request #40018 from meaksh/2016.3-handling-timeouts-for-manage.up-runner
  - 9f5c3b7dcd Allows to set custom timeouts for `manage.up' and `manage.status'
  - 2102d9c75c Allows to set `timeout' and `gather_job_timeout' via kwargs
- **PR** #40038: (velom) correctly parse ``pkg_name===version'' from pip freeze @ *2017-03-15 19:30:03 UTC*
  - 22fc5299a2 Merge pull request #40038 from velom/fix-pip-freeze-parsing
  - 3fae91d879 correctly parse ``pkg_name===version'' from pip freeze

- **ISSUE** #40036: (oogali) UnboundLocalError: local variable `ifcfg' referenced before assignment (refs: #40053)
- **PR** #40053: (gtmanfred) Update rh_ip.py @ *2017-03-15 18:57:32 UTC*
  - 3584f935fa Merge pull request #40053 from saltstack/rh_ip_patch
  - 219947acdb Update rh_ip.py
- **ISSUE** #40011: (tsaridas) salt-minion does not shutdown properly 2016.11.3 rh6 (refs: #40041)
- **PR** #40041: (terminalmage) Fix transposed lines in salt.utils.process @ *2017-03-15 17:58:24 UTC*
  - 837432d3d2 Merge pull request #40041 from terminalmage/issue40011
  - 5b5d1b375c Fix transposed lines in salt.utils.process
- **PR** #40021: (Ch3LL) 2016.3.6 release notes with change log @ *2017-03-14 21:06:18 UTC*
  - ee7f3b1200 Merge pull request #40021 from Ch3LL/2016.3.6_release
  - f3e7e4fb2a Add 2016.3.6 Release Notes
- **PR** #40016: (terminalmage) Attempt to fix failing grains tests in 2016.3 @ *2017-03-14 18:34:32 UTC*
  - 26895b7be2 Merge pull request #40016 from terminalmage/fix-grains-test
  - 0ec81a4cde Fixup a syntax error
  - 5d84b40bfd Attempt to fix failing grains tests in 2016.3
- **PR** #39980: (vutny) [2016.3] Allow to use *bg* kwarg for *cmd.run* state function @ *2017-03-14 17:16:14 UTC*
  - 0c61d064ad Merge pull request #39980 from vutny/cmd-run-state-bg
  - a81dc9dfc1 [2016.3] Allow to use *bg* kwarg for *cmd.run* state function
- **ISSUE** #39942: (Foxlik) Web Documentation not in sync with release 2016.11.3 (refs: #39994)
- **PR** #39994: (rallytime) Add a versionadded tag for dockerng ulimits addition @ *2017-03-13 20:58:02 UTC*
  - b042484455 Merge pull request #39994 from rallytime/ulimits-dockerng-version
  - 37bd800fac Add a versionadded tag for dockerng ulimits addition
- **PR** #39988: (terminalmage) Add comment explaining change from #39973 @ *2017-03-13 18:37:29 UTC*
  - **PR** #39973: (terminalmage) Don't use docker.Client instance from context if missing attributes (refs: #39988)
  - e125c94ba5 Merge pull request #39988 from terminalmage/dockerng-timeout
  - bd2519ed1b Add comment explaining change from #39973
- **PR** #39973: (terminalmage) Don't use docker.Client instance from context if missing attributes (refs: #39988) @ *2017-03-11 14:57:50 UTC*
  - cd0336e868 Merge pull request #39973 from terminalmage/dockerng-timeout
  - 869416e7db Don't use docker.Client instance from context if missing attributes
- **PR** #39962: (cachedout) Disable mention bot delay on 2016.3 @ *2017-03-10 20:24:08 UTC*
  - 282c607d26 Merge pull request #39962 from cachedout/disable_mentionbot_delay_3
  - 7a638f204b Disable mention bot delay on 2016.3
    - 5592c680b5 More mentionbot blacklists
- **PR** #39937: (cachedout) Fix --non-gpg-checks in zypper module @ *2017-03-10 18:02:51 UTC*
  - 1e0c88ae08 Merge pull request #39937 from cachedout/gpg_zypper

  - 13ed0d1209 Fix --non-gpg-checks in zypper module

- **PR** #39929: (terminalmage) Scrap event-based approach for refreshing grains (2016.3 branch) @ *2017-03-09 22:03:16 UTC*
  - 4526fc6e08 Merge pull request #39929 from terminalmage/pr-39770-2016.3
  - cf0100dabe Scrap event-based approach for refreshing grains
- **ISSUE** #22080: (The-Loeki) CIDR matching for IPv6 / improve IPv6 support in utils.network (refs: #39919)
- **PR** #39919: (The-Loeki) CIDR matching supports IPv6, update docs @ *2017-03-09 16:03:00 UTC*
  - 111110caf8 Merge pull request #39919 from The-Loeki/patch-1
  - 170cbadc54 CIDR matching supports IPv6, update docs
- **PR** #39899: (techhat) Update cleanup function for azure @ *2017-03-08 23:28:33 UTC*
  - caf10e9988 Merge pull request #39899 from techhat/cleanupdisks
  - baf4579e63 Update cleanup function for azure
- **PR** #39871: (terminalmage) Squelch warning for pygit2 import @ *2017-03-07 20:40:18 UTC*
  - fcf95f3654 Merge pull request #39871 from terminalmage/squelch-import-warning
  - 2b2ec69d04 Squelch warning for pygit2 import
- **PR** #39794: (cachedout) Clean up errors which might be thrown when the monitor socket shuts down @ *2017-03-04 16:12:37 UTC*
  - f223fa8906 Merge pull request #39794 from cachedout/clean_monitor_socket_shutdown
  - 2e683e788b Clean up errors which might be thrown when the monitor socket shuts down
- **PR** #39819: (terminalmage) Improve the Top File matching docs @ *2017-03-04 16:06:40 UTC*
  - 4002dc1947 Merge pull request #39819 from terminalmage/top-file-matching-docs
  - 7178e77eee Improve the Top File matching docs
- **PR** #39820: (ni3mm4nd) Add missing apostrophe in Beacons topic documentation @ *2017-03-04 16:05:29 UTC*
  - c08aaeb7fd Merge pull request #39820 from ni3mm4nd/beacons_topic_doc_typo
  - 804b12048c Add missing apostrophe
- **PR** #39826: (cachedout) Add group func to yubikey auth @ *2017-03-04 16:02:14 UTC*
  - cbd2a4e3cc Merge pull request #39826 from cachedout/yubikey_fix
  - 6125eff02d Add group func to yubikey auth
- **ISSUE** #39622: (drawsmcgraw) boto_vpc.create_subnet does not properly assign tags (refs: #39624)
- **PR** #39624: (drawsmcgraw) Address issue 39622 @ *2017-03-03 15:59:04 UTC*
  - f575ef459f Merge pull request #39624 from drawsmcgraw/39622
  - 13da50be33 Fix indention lint errors
  - 545026352f Address issue 39622
- **ISSUE** #39119: (frogunder) Head of 2016.3 - Salt-Master uses 90 seconds to restart (refs: #39796)
- **PR** #39796: (cachedout) Stop the process manager when it no longer has processes to manage @ *2017-03-02 23:03:13 UTC*
  - 1f3619c1e5 Merge pull request #39796 from cachedout/master_shutdown

  - e31d46c1b8 Stop the process manager when it no longer has processes to manage
- **ISSUE** #39333: (jagguli) Not Available error - Scheduling custom runner functions (refs: #39791)
- **ISSUE** #38514: (githubcdr) Unable to schedule runners (refs: #39791)
- **PR** #39791: (gtmanfred) load runners if role is master @ *2017-03-02 19:43:41 UTC*
  - 53341cf152 Merge pull request #39791 from gtmanfred/2016.3
  - 3ab4f843bf load runners if role is master
- **ISSUE** #39782: (sergeizv) salt-cloud show_instance action fails on EC2 instances (refs: #39784)
- **ISSUE** #33162: (jfindlay) Key error with salt.utils.cloud.cache_node and EC2 (refs: #39784, #33164)
- **PR** #39784: (sergeizv) Fix 39782 @ *2017-03-02 16:08:51 UTC*
  - **PR** #33164: (jfindlay) cloud.clouds.ec2: cache each named node (refs: #39784)
  - c234c25092 Merge pull request #39784 from sergeizv/fix-39782
  - b71c3fe13c Revert ``cloud.clouds.ec2: cache each named node (#33164)''
- **ISSUE** #39336: (GevatterGaul) salt-minion fails with IPv6 (refs: #39766)
- **ISSUE** #39118: (bobrik) Minion ipv6 option is not documented (refs: #39289, #39131)
- **PR** #39766: (rallytime) Restore ipv6 connectivity and ``master: <ip>:<port>'' support @ *2017-03-02 02:55:55 UTC*
  - **PR** #39289: (bobrik) Autodetect IPv6 connectivity from minion to master (refs: #39766, #40141)
  - **PR** #25021: (GideonRed-zz) Introduce ip:port minion config (refs: #39766)
  - 4ee59be22c Merge pull request #39766 from rallytime/fix-ipv6-connection
  - 65b239664e Restore ipv6 connectivity and ``master: <ip>:<port>'' support
- **ISSUE** #33187: (usbportnoy) Deploy to jboss TypeError at boss7.py:469 (refs: #39761, #39170)
- **PR** #39761: (cachedout) Properly display error in jboss7 state @ *2017-03-01 18:43:23 UTC*
  - a24da31131 Merge pull request #39761 from cachedout/issue_33187
  - c2df29edb2 Properly display error in jboss7 state
- **PR** #39728: (rallytime) [2016.3] Bump latest release version to 2016.11.3 @ *2017-02-28 18:07:44 UTC*
  - 0888bc32ef Merge pull request #39728 from rallytime/update-release-ver-2016.3
  - c9bc8af8f2 [2016.3] Bump latest release version to 2016.11.3
- **PR** #39619: (terminalmage) Add a function to simply refresh the grains @ *2017-02-28 00:20:27 UTC*
  - b52dbeec68 Merge pull request #39619 from terminalmage/zd1207
  - c7dfb494a6 Fix mocking for grains refresh
  - 7e0ced3b45 Properly hand proxy minions
  - 692c456da3 Add a function to simply refresh the grains
- **ISSUE** #39482: (bobrik) file.managed and file mode don't mention default mode (refs: #39487)
- **PR** #39487: (bobrik) Document default permission modes for file module @ *2017-02-24 23:49:00 UTC*
  - 3f8b5e6733 Merge pull request #39487 from bobrik/mode-docs
  - 41ef69b3ca Document default permission modes for file module

- **ISSUE** #39169: (blueyed) Using batch-mode with *salt.state* in orchestration runner considers all minions to have failed (refs: #39641)
- **PR** #39641: (smarsching) Return runner return code in a way compatible with check_state_result @ *2017-02-24 23:07:11 UTC*
  - f7389bf1f5 Merge pull request #39641 from smarsching/issue-39169-2016.3
  - 88c2d9a540 Fix return data structure for runner (issue #39169).
- **PR** #39633: (terminalmage) Fix misspelled argument in salt.modules.systemd.disable() @ *2017-02-24 18:21:36 UTC*
  - fc970b6a16 Merge pull request #39633 from terminalmage/fix-systemd-typo
  - ca54541abe Add missing unit test for disable func
  - 17109e1522 Fix misspelled argument in salt.modules.systemd.disable()
- **PR** #39613: (terminalmage) Fix inaccurate documentation @ *2017-02-24 06:07:35 UTC*
  - 53e78d67f6 Merge pull request #39613 from terminalmage/fix-docs
  - 9342eda377 Fix inaccurate documentation
- **PR** #39600: (vutny) state.file: drop non-relevant examples for *source_hash* parameter @ *2017-02-23 16:55:27 UTC*
  - 4e2b852f83 Merge pull request #39600 from vutny/state-file-docs
  - 9b0427c27a state.file: drop non-relevant examples for *source_hash* parameter
- **PR** #39584: (cachedout) A note in the docs about mentionbot @ *2017-02-23 15:12:13 UTC*
  - ed83420417 Merge pull request #39584 from cachedout/mentionbot_docs
  - 652044b18f A note in the docs about mentionbot
- **PR** #39583: (cachedout) Add empty blacklist to mention bot @ *2017-02-23 02:22:57 UTC*
  - d3e50b4f2f Merge pull request #39583 from cachedout/mentionbot_blacklist
  - 62491c900d Add empty blacklist to mention bot
- **PR** #39579: (rallytime) [2016.3] Pylint: Remove unused import @ *2017-02-22 23:46:33 UTC*
  - 8352e6b44b Merge pull request #39579 from rallytime/fix-lint
  - 65889e1f30 [2016.3] Pylint: Remove unused import
- **PR** #39578: (cachedout) Add mention-bot configuration @ *2017-02-22 23:39:24 UTC*
  - 43dba3254c Merge pull request #39578 from cachedout/2016.3
  - 344499eef7 Add mention-bot configuration
- **PR** #39542: (twangboy) Gate ssh_known_hosts state against Windows @ *2017-02-22 20:16:41 UTC*
  - 8f7a0f9d96 Merge pull request #39542 from twangboy/gate_ssh_known_hosts
  - c90a52ef27 Remove expensive check
  - 6d645cae0e Add __virtual__ function
- **ISSUE** #39118: (bobrik) Minion ipv6 option is not documented (refs: #39289, #39131)
- **PR** #39289: (bobrik) Autodetect IPv6 connectivity from minion to master (refs: #39766, #40141) @ *2017-02-22 19:05:32 UTC*
  - c10965833a Merge pull request #39289 from bobrik/autodetect-ipv6

  - 2761a1b244 Move new kwargs to the end of argument list
  - 0df6b922e7 Narrow down connection exception to socket.error
  - e8a2cc0488 Do no try to connect to salt master in syndic config test
  - af9578631e Properly log address that failed to resolve or pass connection check
  - 9a34fbeba9 Actually connect to master instead of checking route availability
  - c494839c65 Avoid bare exceptions in dns_check
  - 29f376676d Rewrite dns_check to try to connect to address
  - 55965ce505 Autodetect IPv6 connectivity from minion to master
- **PR** #39569: (s0undt3ch) Don't use our own six dictionary fixes in this branch @ *2017-02-22 18:59:49 UTC*
  - 3fb928b63a Merge pull request #39569 from s0undt3ch/2016.3
  - 49da135abd Don't use our own six dictionary fixes in this branch
- **PR** #39508: (dincamihai) Openscap @ *2017-02-22 18:36:36 UTC*
  - 91e3319df8 Merge pull request #39508 from dincamihai/openscap
  - 9fedb84607 Always return oscap's stderr
  - 0ecde2cd02 Include oscap returncode in response
- **ISSUE** #30802: (kjelle) Missing ulimits on docker.running / dockerng.running (refs: #39562)
- **PR** #39562: (terminalmage) Add ulimits to dockerng state/exec module @ *2017-02-22 16:31:49 UTC*
  - fbe2194a93 Merge pull request #39562 from terminalmage/issue30802
  - c50374041d Add ulimits to dockerng state/exec module
  - da42040c1a Try the docker-py 2.0 client name first
  - **PR** #39544: (terminalmage) dockerng.get_client_args: Fix path for endpoint config for some versions of docker-py
- **ISSUE** #39447: (Foxlik) dockerng keeps restarting privileged container (refs: #39483)
- **PR** #39498: (terminalmage) Resubmit PR #39483 against 2016.3 branch @ *2017-02-20 19:35:33 UTC*
  - **PR** #39483: (Foxlik) dockerng: compare sets instead of lists of security_opt (refs: #39498)
  - dff35b58f8 Merge pull request #39498 from terminalmage/pr-39483
  - 20b097a745 dockerng: compare sets instead of lists of security_opt
- **PR** #39497: (terminalmage) Two dockerng compatibility fixes @ *2017-02-19 17:43:36 UTC*
  - 6418e725ed Merge pull request #39497 from terminalmage/docker-compat-fixes
  - cbd0270bac docker: make docker-exec the default execution driver
  - a6a17d58aa Handle docker-py 2.0's new host_config path
- **PR** #39423: (dincamihai) Openscap module @ *2017-02-17 18:31:04 UTC*
  - 9c4292fb4e Merge pull request #39423 from dincamihai/openscap
  - 9d13422ac1 OpenSCAP module
- **ISSUE** #39444: (clem-compilatio) salt-cloud - IPv6 and IPv4 private_ips - preferred_ip sends False to is_public_ip (refs: #39464)
- **PR** #39464: (gtmanfred) skip false values from preferred_ip @ *2017-02-16 22:48:32 UTC*

  - 7dd2502360 Merge pull request #39464 from gtmanfred/2016.3
  - f829d6f9fc skip false values from preferred_ip
- **PR** #39460: (cachedout) Fix mocks in win_disim tests @ *2017-02-16 19:27:48 UTC*
  - db359ff2c3 Merge pull request #39460 from cachedout/win_dism_test_fix
  - e652a45592 Fix mocks in win_disim tests
- **PR** #39426: (morganwillcock) win_dism: Return failure when package path does not exist @ *2017-02-16 00:09:22 UTC*
  - 9dbfba9b57 Merge pull request #39426 from morganwillcock/dism
  - a7d5118262 Return failure when package path does not exist
- **PR** #39431: (UtahDave) Fix grains.setval performance @ *2017-02-15 23:56:30 UTC*
  - 56162706e3 Merge pull request #39431 from UtahDave/fix_grains.setval_performance
  - 391bbecd90 add docs
  - 709c197f84 allow sync_grains to be disabled on grains.setval
- **ISSUE** #39304: (Auha) boto_s3_bucket documentation dependency clarification (refs: #39405)
- **PR** #39405: (rallytime) Update :depends: docs for boto states and modules @ *2017-02-15 17:32:08 UTC*
  - 239e16e612 Merge pull request #39405 from rallytime/fix-39304
  - bd1fe03ce7 Update :depends: docs for boto states and modules
- **ISSUE** #38762: (oz123) Configuration information for custom returners (refs: #39411)
- **PR** #39411: (rallytime) Update external_cache docs with other configuration options @ *2017-02-15 17:30:40 UTC*
  - 415102f346 Merge pull request #39411 from rallytime/fix-38762
  - e13febe58d Update external_cache docs with other configuration options
  - **PR** #39421: (terminalmage) Update docs on upstream EPEL7 pygit2/libgit2 issues
  - **PR** #39409: (terminalmage) salt.fileserver.roots: Fix regression in symlink_list
  - **PR** #39337: (terminalmage) Don't re-walk the roots fileserver in symlink_list() (refs: #39409)
- **PR** #39362: (dincamihai) Add cp.push test @ *2017-02-14 18:42:11 UTC*
  - 8b8ab8ef8e Merge pull request #39362 from dincamihai/cp-push-test-2016.3
  - 91383c5a19 Add cp.push test
- **PR** #39380: (joe-niland) Quote numeric user names so pwd.getpwnam handles them properly @ *2017-02-14 18:33:33 UTC*
  - 4b726f955b Merge pull request #39380 from joe-niland/quote-numeric-usernames
  - c2edfdd464 Quote numeric user names so pwd.getpwnam handles them properly
- **PR** #39400: (meaksh) Prevents `OSError' exception in case certain job cache path doesn't exist @ *2017-02-14 18:27:04 UTC*
  - 1116d32df9 Merge pull request #39400 from meaksh/2016.3-fix-local-cache-issue
  - e7e559ef5c Prevents `OSError' exception in case path doesn't exist
- **PR** #39300: (terminalmage) Replace more usage of str.format in the loader @ *2017-02-13 19:01:19 UTC*

  - **PR** #39227: (terminalmage) Loader optimzation (refs: #39300)
  - 6c854da1d4 Merge pull request #39300 from terminalmage/loader-optimization
  - d3e5d1525e Replace more usage of str.format in the loader
- **PR** #39337: (terminalmage) Don't re-walk the roots fileserver in symlink_list() (refs: #39409) @ *2017-02-13 18:41:17 UTC*
  - 5286b5ff1b Merge pull request #39337 from terminalmage/issue34428
  - a7d2135dc2 Don't re-walk the roots fileserver in symlink_list()
- **PR** #39339: (cro) Add link to external pillar documentation for clarification. @ *2017-02-13 18:40:13 UTC*
  - ce781deeb5 Merge pull request #39339 from cro/pillar_filetree_doc
  - 410810cea2 Clarification on external pillar usage.
  - **PR** #39316: (terminalmage) Document the upstream RedHat bug with their pygit2 package
- **PR** #39313: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2017-02-10 16:23:23 UTC*
  - 9de559ff4e Merge pull request #39313 from rallytime/merge-2016.3
  - 0b8dddf12b Merge branch `2015.8' into `2016.3'
  - fc551bcf5d Merge pull request #39293 from sergeizv/grammar-fix
    * 70f2b586d3 Rewrap paragraph
    * e6ab5178ea Grammar fix
  - 8a1b45632a Merge pull request #39295 from sergeizv/typo-fix
    * 5d9f36d58d Fix typo
  - cfaafece34 Merge pull request #39296 from sergeizv/whitespace-fix
    * 1d4c1dc140 Whitespace fix in docs Makefile
  - 0b4dcf4a47 Merge pull request #39294 from sergeizv/fix-link
    * 04bde6eed2 Fix link in proxyminion guide
- **ISSUE** #38595: (yue9944882) Redis ext job cache occurred error (refs: #38610)
  - **PR** #39299: (rallytime) Back-port #38610 to 2016.3
  - **PR** #38610: (yue9944882) Fix #38595 - Unexpected error log from redis retuner in master's log (refs: #39299)
- **PR** #39297: (cro) Add doc to recommend pgjsonb for master job caches @ *2017-02-09 22:49:59 UTC*
  - f16027d30e Merge pull request #39297 from cro/pg_returner_docs
  - 28bac649ae Typo
  - 19fedcdd23 Add doc to recommend pgjsonb for master job caches
- **PR** #39286: (terminalmage) Allow minion/CLI saltenv/pillarenv to override master when compiling pillar @ *2017-02-09 21:22:46 UTC*
  - 77e50ed8b7 Merge pull request #39286 from terminalmage/fix-pillarenv-precedence
  - 3cb9833e57 Allow minion/CLI saltenv/pillarenv to override master when compiling pillar
- **ISSUE** #39220: (lvg01) state file.line skips leading spaces in content with mode:ensure and indent:False (refs: #39221)

- **PR** #39221: (lvg01) Fix bug 39220 @ *2017-02-09 18:12:29 UTC*
  - 52440416ca Merge pull request #39221 from lvg01/fix-bug-39220
  - e8a41d6341 Removes to early content stripping (stripping is allready done when needed with ident:true), fixes #39220
  - a4b169e0bd Fixed wrong logic, fixes #39220
- **ISSUE** #36913: (terminalmage) Support custom refspecs in GitFS (refs: #39210)
  - **PR** #39280: (terminalmage) Add warning for Dulwich removal
  - **PR** #39210: (terminalmage) salt.utils.gitfs: remove dulwich support, make refspecs configurable (refs: #39280)
  - **PR** #39260: (terminalmage) Update jsonschema tests to reflect change in jsonschema 2.6.0
- **ISSUE** saltstack/salt#33536: (murzick) pkgrepo.managed does not disable a yum repo with ``disabled: True'' (refs: #35055)
- **ISSUE** #33536: (murzick) pkgrepo.managed does not disable a yum repo with ``disabled: True'' (refs: #35055)
  - **PR** #39251: (terminalmage) Better handling of enabled/disabled arguments in pkgrepo.managed
  - **PR** #35055: (galet) #33536 pkgrepo.managed does not disable a yum repo with ``disabled: True'' (refs: #39251)
- **PR** #39227: (terminalmage) Loader optimzation (refs: #39300) @ *2017-02-08 19:38:21 UTC*
  - 8e88f71dd9 Merge pull request #39227 from terminalmage/loader-optimization
  - c750662946 Loader optimzation
- **ISSUE** #38856: (fhaynes) salt-cloud throws an exception when ec2 does not return encoding (refs: #39228)
- **PR** #39228: (gtmanfred) default to utf8 encoding if not specified @ *2017-02-08 19:36:57 UTC*
  - bc89b297f8 Merge pull request #39228 from gtmanfred/2016.3
  - afee047b08 default to utf8 encoding if not specified
- **PR** #39231: (terminalmage) Add clarification for jenkins execution module @ *2017-02-08 19:34:45 UTC*
  - d9b0671dbd Merge pull request #39231 from terminalmage/clarify-jenkins-depends
  - ad1b1255f2 Add clarification for jenkins execution module
- **PR** #39232: (terminalmage) Avoid recursion in s3/svn ext_pillars @ *2017-02-08 19:33:28 UTC*
  - ddcff89a84 Merge pull request #39232 from terminalmage/issue21342
  - c88896c277 Avoid recursion in s3/svn ext_pillars
- **ISSUE** #38697: (fboismenu) On Windows, ip.get_all_interfaces returns at most 2 DNS/WINS Servers (refs: #38793)
  - **PR** #39230: (rallytime) Fix the win_ip_test failures
  - **PR** #38793: (fboismenu) Fix for #38697 (refs: #39197, #39230)
- **ISSUE** #33187: (usbportnoy) Deploy to jboss TypeError at boss7.py:469 (refs: #39761, #39170)
- **PR** #39199: (rallytime) Back-port #39170 to 2016.3 @ *2017-02-07 16:19:32 UTC*
  - **PR** #39170: (grep4linux) Added missing source_hash_name argument in get_managed function (refs: #39199)
  - df5f934c34 Merge pull request #39199 from rallytime/bp-39170

  - c129905310 Added missing source_hash_name argument in get_managed function Additional fix to #33187 Customer was still seeing errors, this should now work. Tested with 2015.8.13 and 2016.11.2

- **ISSUE** #37174: (mikeadamz) The State execution failed to record the order in which all states were executed spam while running pkg.upgrade from orchestration runner (refs: #39206)
- **PR** #39206: (cachedout) Ignore empty dicts in highstate outputter @ *2017-02-07 16:11:36 UTC*
  - 2621c119fd Merge pull request #39206 from cachedout/issue_issue_37174
  - be31e0559c Ignore empty dicts in highstate outputter
- **PR** #39209: (terminalmage) Sort the return list from the fileserver.envs runner @ *2017-02-07 16:07:08 UTC*
  - dd440452ea Merge pull request #39209 from terminalmage/sorted-envs
  - e6dda4a625 Sort the return list from the fileserver.envs runner
  - **PR** #39202: (rallytime) [2016.3] Pylint fix
- **ISSUE** #38697: (fboismenu) On Windows, ip.get_all_interfaces returns at most 2 DNS/WINS Servers (refs: #38793)
- **PR** #39197: (cachedout) Pr 38793 @ *2017-02-06 19:23:12 UTC*
  - **PR** #38793: (fboismenu) Fix for #38697 (refs: #39197, #39230)
  - ab76054127 Merge pull request #39197 from cachedout/pr-38793
  - f3d35fb5c6 Lint fixes
  - 624f25b78d Fix for #38697
- **PR** #39166: (Ch3LL) fix boto ec2 module create_image doc @ *2017-02-06 18:27:17 UTC*
  - fa45cbc359 Merge pull request #39166 from Ch3LL/fix_boto_ec2_docs
  - 90af696331 fix boto ec2 module create_image doc
- **PR** #39173: (rallytime) Restore ``Salt Community'' doc section @ *2017-02-06 18:19:11 UTC*
  - **PR** #30770: (jacobhammons) Doc restructuring, organization, and cleanup (refs: #39173)
  - **PR** #10792: (cachedout) Documentation overhaul (refs: #39173)
  - a40cb46249 Merge pull request #39173 from rallytime/restore-community-docs
  - 5aeddf42a0 Restore ``Salt Community'' doc section
- **ISSUE** #38704: (nasenbaer13) Archive extracted fails when another state run is queued (refs: #38705)
  - **PR** #39077: (terminalmage) Apply fix from #38705 to 2016.3 branch
  - **PR** #38705: (nasenbaer13) Fix for #38704 archive extracted and dockerio states (refs: #39077)
  - **PR** #39146: (gtmanfred) update vmware getting started doc
  - **PR** #39145: (garethgreenaway) [2016.3] Fix when targeting via pillar with Salt syndic
- **PR** #38804: (alexbleotu) Second attempt to fix prepending of root_dir to paths @ *2017-02-02 16:10:37 UTC*
  - cd8077ab81 Merge pull request #38804 from alexbleotu/root_dir_fix-2016.3-gh
  - b3bdd3b04a Add missing whiteline
  - c7715acd53 Merge pull request #3 from cro/ab_rootdirfix
    * e8cbafaaf1 When running testsuite, salt.syspaths.ROOT_DIR is often empty.
  - b12dd44a26 Merge pull request #1 from cro/ab_rootdirfix

        * bffc537aca Remove extra if statements (rstrip will check for the presence anyway).
    - 97521b3468 Second attempt to fix prepending of root_dir to paths
- **ISSUE** #39118: (bobrik) Minion ipv6 option is not documented (refs: #39289, #39131)
    - **PR** #39131: (bobrik) Clarify ipv6 option for minion and inteface for master, closes #39118
    - **PR** #39116: (terminalmage) Don't abort pillar.get with merge=True if default is None
- **PR** #39091: (terminalmage) Run test_valid_docs in batches @ *2017-02-01 19:09:05 UTC*
    - cc9b69b6bc Merge pull request #39091 from terminalmage/update-test-valid-docs
    - d76f0380d0 add debug logging for batch vars
    - b4afea2a25 Don't fail test if data is empty
    - b3a5d549c1 Account for trimmed value in `salt -d' output
    - 909916c78e Run test_valid_docs in batches
    - **PR** #39081: (terminalmage) Move fileclient tests to tests/integration/fileserver/fileclient_test.py
    - **PR** #39067: (rallytime) Bump openstack deprecation notice to Oxygen
- **PR** #39047: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ *2017-01-30 23:48:14 UTC*
    - a24af5ac46 Merge pull request #39047 from rallytime/merge-2016.3
    - b732a1f646 Merge branch `2015.8' into `2016.3'
    - 56ccae6ff7 Add 2015.8.14 release notes file (#39046)
    - 5943fe65d3 Update 2015.8.13 release notes (#39037)
    - **PR** #39045: (rallytime) Add 2016.3.6 release notes file
    - **PR** #39042: (rallytime) [2016.3] Update release numbers for doc build
    - **PR** #39038: (rallytime) Update 2016.3.5 release notes
- **PR** #39028: (terminalmage) Clarify delimiter argument @ *2017-01-30 18:20:26 UTC*
    - 5b09dc4198 Merge pull request #39028 from terminalmage/clarify-delimiter-argument
    - f29ef071f3 Clarify delimiter argument
    - **PR** #39030: (rallytime) Back-port #38972 to 2016.3
    - **PR** #38972: (rallytime) Add CLI Example for rest_sample_utils.get_test_string function (refs: #39030)
- **ISSUE** #38753: (alexbleotu) *__proxy__* dunder is not injected when invoking the *salt* variable in sls files (refs: #38899, #38829)
- **ISSUE** #38557: (alexbleotu) Proxy not working on develop (refs: #38829)
- **ISSUE** #38265: (mirceaulinic) *__utils__* object not available in proxy module (refs: #38899, #38829)
- **ISSUE** #32918: (mirceaulinic) Proxy minions reconnection (refs: #38829)
    - **PR** #38899: (cro) Enable __proxy__ availability in states, highstate, and utils. Enable __utils__ for proxies.
    - **PR** #38829: (cro) MANY dunder variable fixes for proxies + proxy keepalive from @mirceaulinic (refs: #38899)
    - **PR** #37864: (mirceaulinic) Proxy keepalive feature (refs: #38829)
- **ISSUE** #37938: (johje349) Memory leak in Reactor (refs: #38951)

- **ISSUE** #33890: (hvnsweeting) salt memleak when running state.sls (refs: #38951)
- **PR** #38951: (DmitryKuzmenko) Keep the only one record per module-function in depends decorator. *@ 2017-01-27 17:05:42 UTC*
  - da96221741 Merge pull request #38951 from DSRCorporation/bugs/37938_fix_depends_decorator_memleak
  - 0b18f34678 Keep the only one record per module-function in depends decorator.
- **ISSUE** #34780: (joehoyle) S3fs broken in 2016.3.1 (refs: #38982)
- **PR** #38982: (rallytime) Set response when using ``GET'' method in s3 utils *@ 2017-01-27 17:04:48 UTC*
  - 85165edb70 Merge pull request #38982 from rallytime/fix-34780
  - 1583c5579a Set response when using ``GET'' method in s3 utils
- **PR** #38989: (anlutro) Documentation: fix SLS in environment variable examples *@ 2017-01-27 17:00:08 UTC*
  - cfdbc99e12 Merge pull request #38989 from alprs/docfix-state_pt3_environ
  - 52a9ad1c60 fix SLS in environment variable examples
- **PR** #39000: (rallytime) Skip the test_badload test until Jenkins move is complete *@ 2017-01-27 16:58:21 UTC*
  - 55e4d2572e Merge pull request #39000 from rallytime/skip-badload-test
  - 4b3ff0fe0f Skip the test_badload test until Jenkins move is complete
- **PR** #38995: (terminalmage) Fix pillar.item docstring *@ 2017-01-27 16:58:00 UTC*
  - fe054eb772 Merge pull request #38995 from terminalmage/fix-pillar.item-docstring
  - 06d094dd8f Fix pillar.item docstring
- **ISSUE** #34551: (mbom2004) salt.engines.logstash not loading (refs: #38950)
- **PR** #38950: (mbom2004) Fixed Logstash Engine in file logstash.py *@ 2017-01-26 19:10:07 UTC*
  - b66b6f6423 Merge pull request #38950 from mbom2004/2016.3
  - c09f39d6c9 Remove unused json import
  - 249efa3068 Fixed Logstash Engine in file logstash.py
  - **PR** #38973: (rallytime) Handle changing ``is_default'' value in moto package for boto test mock
- **PR** #38952: (terminalmage) Make the ext_pillars available to pillar.ext tunable *@ 2017-01-26 19:01:56 UTC*
  - b965b5dcc2 Merge pull request #38952 from terminalmage/zd1168
  - 6b014e53fc Rename on_demand_pillar to on_demand_ext_pillar
  - d216f90c63 Document new on_demand_pillar option and add to config template
  - 426b20f02f Add documentation for on-demand pillar to pillar.ext docstring
  - 7b10274b6b Make on-demand ext_pillars tunable
  - d54723ccae Add on_demand_pillar config option
- **ISSUE** #35777: (rallytime) Properly deprecate template context data in Fluorine (refs: #38948)
- **PR** #38948: (rallytime) Bump the template context deprecation version to Oxygen *@ 2017-01-25 19:45:59 UTC*
  - 2c4ad85a78 Merge pull request #38948 from rallytime/bump-template-context-deprecation
  - 749e0031d7 Bump the template context deprecation version to Oxygen
- **PR** #38946: (rallytime) Back-port #37632 to 2016.3 *@ 2017-01-25 19:40:40 UTC*

  - **PR** #37632: (twangboy) Fix versions report for Windows Server platforms (refs: #38946)
  - e4514ca7d8 Merge pull request #38946 from rallytime/bp-37632
  - ee37cdace9 Fix some lint
  - c08071e182 Fix versions report for server OSs
- **PR** #38913: (Adaephon-GH) Ignore plist files without Label key @ *2017-01-25 19:07:27 UTC*
  - 953a20350a Merge pull request #38913 from Adaephon-GH/patch-1
  - e2f4a16fdd Removing trailing whitespace
  - 616292c6b1 Ignore plist files without Label key
- **PR** #38917: (twangboy) Update Jinja2 to 2.9.4 @ *2017-01-25 19:05:38 UTC*
  - 826dce1059 Merge pull request #38917 from twangboy/update_jinja_mac
  - 62e608b627 Update Jinja2 to 2.9.4
- **ISSUE** #38540: (amendlik) API wheel client throws exception and success=true (refs: #38925)
- **ISSUE** #38537: (amendlik) API client wheel_async always returns status 500 (refs: #38925)
- **PR** #38925: (terminalmage) Fix two wheel issues in netapi @ *2017-01-25 18:28:52 UTC*
  - b27733cc33 Merge pull request #38925 from terminalmage/issue38540
  - 76392fc6ad Fix traceback when a netapi module uses wheel_async
  - bd4474fa62 Fix `success' value for wheel commands
- **PR** #38926: (gtmanfred) add note about pysss for pam eauth @ *2017-01-25 18:12:20 UTC*
  - 618596f0cc Merge pull request #38926 from gtmanfred/2016.3
  - 9cae953c93 add note about pysss for pam eauth
- **ISSUE** #38825: (IshMalik) file.managed multiple sources for redundency failure (refs: #38847)
- **PR** #38847: (terminalmage) Catch MinionError in file.source_list @ *2017-01-24 16:03:10 UTC*
  - 405d86a2ca Merge pull request #38847 from terminalmage/issue38825
  - 11a47803ce Use log.exception() instead
  - e40fac589a Catch MinionError in file.source_list
- **ISSUE** #36121: (Ashald) TemplateNotFound/Unable to cache file (refs: #38875)
- **PR** #38875: (terminalmage) Reactor: fix traceback when salt:// path is nonexistant @ *2017-01-24 15:23:39 UTC*
  - b5df104fc2 Merge pull request #38875 from terminalmage/issue36121
  - fbc4d2a2c4 reactor: ensure glob_ref is a string
  - 2e443d79a3 cp.cache_file: add note re: return for nonexistant salt:// path
- **ISSUE** #37413: (Snarfingcode666) Salt-cloud vmware missing reboot command (refs: #38887, #38890)
- **PR** #38890: (cro) Backport #38887 to 2016.3: Enable resetting a VM via salt-cloud & VMware driver @ *2017-01-24 15:15:35 UTC*
  - **PR** #38887: (cro) Enable resetting a VM via salt-cloud & VMware driver (refs: #38890)
  - e9ebec4d80 Merge pull request #38890 from cro/vmware_reset_vm_20163
  - 0146562fb4 Call correct function for resetting a VM

- **PR** #38883: (techhat) Don't require text_out path to exist @ *2017-01-23 18:20:42 UTC*
  - **PR** #38867: (mchugh19) Touch deploy.sh before use (refs: #38883)
  - **PR** #32026: (techhat) Don't require the decode_out file to already exist (refs: #38883)
  - c3fbfcd231 Merge pull request #38883 from techhat/dontrequire
  - 67bc4d6687 Don't require text_out path to exist
- **PR** #38851: (terminalmage) Support docker-py 2.0 in dockerng @ *2017-01-23 16:48:12 UTC*
  - 6430a45196 Merge pull request #38851 from terminalmage/docker-py-2.0
  - 3c061b21fe Support docker-py 2.0 in dockerng
- **PR** #38844: (cachedout) Fix memory leak in HTTP client @ *2017-01-20 20:59:14 UTC*
  - ac8008d843 Merge pull request #38844 from cachedout/http_memory_leak
  - c46bf85518 Fix memory leak in HTTP client
- **ISSUE** #38798: (ripta) *match.compound* fails to match when pillar data is used (refs: #38823)
- **PR** #38823: (gtmanfred) pass pillar to compound matcher in match module @ *2017-01-20 19:19:09 UTC*
  - dfe6dfe963 Merge pull request #38823 from gtmanfred/2016.3
  - f0a71e8707 pass pillar to compound matcher in match module

25.2.29 Salt 2016.3.7 Release Notes

Version 2016.3.7 is a bugfix release for *2016.3.0*.

Security Fix

CVE-2017-12791 Maliciously crafted minion IDs can cause unwanted directory traversals on the Salt-master

This release corrects a flaw in minion ID validation which could allow certain minions to authenticate to a master despite not having the correct credentials. To exploit the vulnerability, an attacker must create a salt-minion with an ID containing characters that will cause a directory traversal. Credit for discovering the security flaw goes to: Vernhk@qq.com

Changelog for v2016.3.6..v2016.3.7

Generated at: 2018-05-27 14:09:17 UTC

- 11d176ff1b Add release notes for 2016.3.7 release
- dc649ded51 Add clean_id function to salt.utils.verify.py

25.2.30 Salt 2016.3.8 Release Notes

Version 2016.3.8 is a bugfix release for *2016.3.0*.

Security Fix

CVE-2017-14695 Directory traversal vulnerability in minion id validation in SaltStack. Allows remote minions with incorrect credentials to authenticate to a master via a crafted minion ID. Credit for discovering the security flaw goes to: Julian Brost (julian@0x4a42.net)

CVE-2017-14696 Remote Denial of Service with a specially crafted authentication request. Credit for discovering the security flaw goes to: Julian Brost (julian@0x4a42.net)

Changelog for v2016.3.7..v2016.3.8

Generated at: 2018-05-27 14:11:36 UTC

- 8cf08bd7be Update 2016.3.7 Release Notes
- 0425defe84 Do not allow IDs with null bytes in decoded payloads
- 31b38f50eb Don't allow path separators in minion ID

25.2.31 Salt 2016.3.9 Release Notes

Version 2016.3.9 is a bugfix release for *2016.3.0*.

Master Changes

The following options have been added to the master config file:

- *allow_minion_key_revoke* - This option controls whether a minion can request that the master revoke its key. When `True`, a minion can request a key revocation and the master will comply. If it is `False`, the key will not be revoked by the msater.
- `require_minion_sign_messages` - This requires that minions cryptographically sign the messages they publish to the master. If minions are not signing, then log this information at loglevel `INFO` and drop the message without acting on it.
- `drop_messages_signature_fail` - Drop messages from minions when their signatures do not validate. Note that when this option is `False` but *require_minion_sign_messages* is `True`, minions *MUST* sign their messages, but the validity of their signatures is ignored.
- `minion_sign_messages` - Causes the minion to cryptographically sign the payload of messages it places on the event bus for the master. The payloads are signed with the minion's private key so the master can verify the signature with its public key.

25.2.32 Salt 2015.8.0 Release Notes - Codename Beryllium

2015.8.0 Detailed Change List

Extended changelog courtesy of Todd Stansell (https://github.com/tjstansell/salt-changelogs)

Generated at: 2015-09-09T18:15:43Z

This list includes all pull requests merged into the 2015.8 branch between the forking of the branch from develop and the release of 2015.8.0.

Statistics:

- Total Merges: **682**

- Total Issue references: **342**
- Total PR references: **866**

Pull Requests:

- #26993: (*whiteinge*) Backport #26975
- #26970: (*cachedout*) Revert ``better path query parsing in fileserver''
- #26980: (*terminalmage*) Use human-readable cachedirs for gitfs-backed winrepo
- #26969: (*TheBigBear*) URL of salt windows downloads has changed
- #26968: (*TheBigBear*) URL of salt windows downloads has changed
- #26958: (*s0undt3ch*) Bradthurber bootstrap command line help doc update
- #26949: (*rallytime*) Back-port #25148 to 2015.8
- #26914: (*cro*) Add salt-proxy script and manpage to setup.py so they will get installed.
- #26909: (*terminalmage*) Don't try to git clone from /tmp on Windows
- #26910: (*s0undt3ch*) Sometimes the event system is just too fast
- #26905: (*s0undt3ch*) Exit the loop if run_once is true
- #26897: (*msteed*) spm file hash part deux
- #26900: (*s0undt3ch*) If no tag is passed, don't actually subscribe to anything.
- #26880: (*s0undt3ch*) Restore backwards compatibility to *salt.utils.event*
- #26896: (*msteed*) spm remove: use pkgfiles to calculate file hashes
- #26891: (*jtand*) Fixed an unboundlocalerror
- #26892: (*cachedout*) Make the testing ioloop the current one
- #26886: (*jtand*) Gets the azure version correctly on python-azure 1.0.0
- #26870: (*rallytime*) Back-port #26834 to 2015.8
- #26865: (*dmurphy18*) Fix apt preferences for apts, repos for pbuilder building for Debian
- #26873: (*terminalmage*) Properly handle getting local config values in older git versions
- #26869: (*rallytime*) Fix provider --> driver change for salt-cloud lxc
- #26858: (*terminalmage*) Fix a couple version checks for git state and execution module
- #26853: (*UtahDave*) Fix salt-cloud on windows
- #26852: (*basepi*) [2015.8] Only reference msgpack if it imported successfully
- #26835: (*terminalmage*) Backport #26572 to 2015.8
- #26836: (*jacobhammons*) Added rst source for salt-proxy man page, added build and copy lines ...
- #26818: (*terminalmage*) Support empty repositories in git.latest
- #26819: (*rallytime*) Make sure we're calling _validate_name in the correct place in 2015.8 Linode driver
- #26841: (*l2ol33rt*) Fix reference before assignment in sqs engine
- #26822: (*terminalmage*) Add some missing imports for masterless winrepo
- #26831: (*basepi*) [2015.8] Merge forward from 2015.5 to 2015.8
- #26826: (*techhat*) Pass a package name to unregister_file()

- #26757: (*cachedout*) Fix various filehandle leaks
- #26816: (*gtmanfred*) rev defaults to HEAD
- #26801: (*jacobhammons*) Added doc for dockerng minion configuration options
- #26808: (*anlutro*) Fix git init argument formatting
- #26807: (*terminalmage*) Move salt.utils.itersplit() to salt.utils.itertools.split()
- #26796: (*jacobhammons*) Add doc for __states__
- #26764: (*sjorge*) salt.utils.is_proxy() is no longer always true on SunOS/Illumos/SmartOS
- #26772: (*sjorge*) pull in smartos `virt' module from develop
- #26726: (*terminalmage*) Redact HTTPS Basic Auth in states/funcs which deal with git remotes
- #26769: (*terminalmage*) Use --track to set tracking branch on older git versions
- #26765: (*basepi*) [2015.8] Merge forward from 2015.5 to 2015.8
- #26761: (*sjorge*) fix SPM paths on smartos/illumos esky
- #26751: (*terminalmage*) Fixes for masterless winrepo
- #26745: (*rallytime*) Make sure pyrax configs are in place before checking for deps
- #26746: (*rallytime*) Make sure nova configs are set before checking for dependencies
- #26750: (*basepi*) [2015.8] Add __utils__ to state modules
- #26752: (*cro*) Fix typo in some diagram labels
- #26747: (*basepi*) [2015.8] Add __states__ to state modules, for cross-calling states
- #26744: (*basepi*) [2015.8] Fix issue from #26717
- #26737: (*dmurphy18*) Fix to allow for package naming other than just salt
- #26742: (*rallytime*) Only warn about vsphere deprecation if vsphere is configured
- #26733: (*sjorge*) Refactor of smartos_vmadm module
- #26735: (*s0undt3ch*) Add *.hg* and *.cvs* to spm_build_exclude
- #26720: (*UtahDave*) Updates for winrepo in 2015.8 to support jinja, while maintaining backwards compat
- #26719: (*jodv*) Backport 26532 to 2015.8
- #26721: (*rallytime*) Linode Driver Cleanup
- #26707: (*techhat*) Add top_level_dir to FORMULAs
- #26723: (*s0undt3ch*) Handle SPM paths in the setup script
- #26717: (*basepi*) [2015.8] Revert loader changes from #26645
- #26712: (*techhat*) Move SPM paths around
- #26680: (*TheBigBear*) add more python libs info in `--versions-report'
- #26716: (*terminalmage*) Allow git identity to be a list
- #26691: (*garethgreenaway*) Fixes to ipset module for 2015.8
- #26701: (*kev009*) Ignore the first element of kern.disks split, which is the sysctl name (new disks grain)
- #26678: (*terminalmage*) Restructure git.latest rewrite to work better when following HEAD
- #26679: (*rallytime*) Back-port #26661 to 2015.8

- #26684: (*techhat*) Add reactor formulas to spm
- #26682: (*basepi*) [2015.8] Merge forward from 2015.5 to 2015.8
- #26671: (*rallytime*) Warn users if cloud driver dependencies are missing.
- #26674: (*rallytime*) Back-port #26583 to 2015.8
- #26670: (*techhat*) Set up SPM to install -conf packages
- #26657: (*jfindlay*) top file compilation fixes
- #26659: (*TheBigBear*) minor doc edits - spelling
- #26654: (*jfindlay*) merge #26650
- #26567: (*jtand*) Added git version check to git module
- #26649: (*twangboy*) Fixed Lint for real in win_repo.py
- #26608: (*jacobhammons*) 2015.8.0 release notes and doc/conf.py updates
- #26646: (*basepi*) [2015.8] Merge forward from 2015.5 to 2015.8
- #26645: (*rallytime*) Back-port #26390 to 2015.8
- #26642: (*twangboy*) Added function to render winrepo Jinja
- #26625: (*twangboy*) Correctly detect packages with no version, docs
- #26575: (*msteed*) Update spm for integration into raas
- #26635: (*cro*) Don't report windows as a proxy.
- #26622: (*rallytime*) [2015.8] Also add -Z to script args for cloud tests
- #26619: (*rallytime*) Apply cloud test fixes from 2015.5 to 2015.8
- #26603: (*terminalmage*) Fixes for git.latest, git module integration tests, etc.
- #26577: (*basepi*) [2015.8] Merge forward from 2015.5 to 2015.8
- #26534: (*cachedout*) Bump required Tornado version to 4.2.1
- #26566: (*cachedout*) Don't stacktrace trying to publish without a master
- #26541: (*terminalmage*) Make winrepo execution module use the same code as the runner
- #26530: (*basepi*) [2015.8] Merge forward from 2015.5 to 2015.8
- #26570: (*cachedout*) Fix haproxy docs to be valid
- #26562: (*cachedout*) Fix suprious error message with systemd-detect
- #26557: (*jfindlay*) add docs to #26550
- #26544: (*nmadhok*) Do not raise KeyError when calling avail_images if VM/template is in disconnected state
- #26501: (*terminalmage*) Update git_pillar docs, add git.list_worktrees function
- #26521: (*terminalmage*) Work around upstream git bug when cloning repo as root
- #26518: (*krak3n*) Fix for #25492
- #26514: (*evverx*) Unmask a runtime masked services too
- #26529: (*mnalt*) bugfix: fix service.enable for missing rc.conf
- #26516: (*techhat*) Move more path operations into SPM loader
- #26533: (*cachedout*) Fix too aggressive even init check

- #26522: (*cro*) Do not load package provider if its not a proxy
- #26531: (*cachedout*) Fix failing event tests and modify event init
- #26433: (*cro*) Add support for default proxy config options, change default location of proxy config and log to /etc/salt/proxy and /var/log/proxy
- #26504: (*nmadhok*) [Backport] Adding ability to specify the virtual hardware version when creating VM
- #26517: (*cachedout*) Better fix for opensuse tornado httpclient
- #26479: (*rallytime*) Don't allow VMs with duplicate names to be created in EC2/AWS
- #26488: (*cachedout*) Don't pass unsupported kwarg to tornado
- #26451: (*terminalmage*) Use `rpm -qa' instead of repoquery to list installed packages
- #26491: (*jacobhammons*) doc site css fix for tiny fonts that appeared in code or pre tags in ...
- #26442: (*rallytime*) Hide API Key from debug logs for Linode Driver
- #26441: (*rallytime*) Refactor a few linode functions to be useful with salt-cloud command
- #26485: (*s0undt3ch*) One more missed typo
- #26495: (*basepi*) [2015.8] Merge forward from 2015.5 to 2015.8
- #26492: (*cachedout*) Fix schedule test error on py26
- #26489: (*cachedout*) Fixing more tarfile tests on py2.6
- #26475: (*cachedout*) Better object checking on asyncreq cleanup
- #26477: (*cachedout*) Fix integration.modules.git.GitModuleTest.test_archive on py26
- #26469: (*jtand*) --annotate and --message aren't valid options in older versions of git.
- #26439: (*basepi*) [2015.8] Merge forward from 2015.5 to 2015.8
- #26464: (*rallytime*) Back-port #26456 to 2015.8
- #26463: (*rallytime*) Back-port #26455 to 2015.8
- #26449: (*s0undt3ch*) The CLI options are not meant to include underscores.
- #26270: (*sjorge*) salt.modules.network now supports SmartOS and SunOS < Solaris 11
- #26436: (*TheBigBear*) minor edits
- #26410: (*basepi*) [2015.8] Merge forward from 2015.5 to 2015.8
- #26427: (*anlutro*) git.latest with no rev: fix concatenation error (NoneType and str)
- #26307: (*cachedout*) Fix bug in top file ordering
- #26428: (*cro*) Update docs to reflect new pillar structure
- #26429: (*cachedout*) Add release note regarding tcp transport on freebsd
- #26418: (*driskell*) Fix forward-merged caching from 2015.5 into 2015.8 to be compatible with the new match_func
- #26252: (*DmitryKuzmenko*) Issues/24048 http client 2015.8
- #26413: (*evverx*) Fix service.{start,restart,reload,force-reload} for masked services
- #26393: (*dmurphy18*) Added option parameters to make_repo to allow for configuration settings
- #26422: (*TheBigBear*) no dots in SLS filename __AND__ any directories (incl git repos)
- #26323: (*0xf10e*) Fix Credentials used in *glance* Exec Module

- #26341: (*terminalmage*) Rewrite git state and execution modules
- #26419: (*terminalmage*) Only use pygit2.errors if it exists
- #26423: (*eliasp*) doc - Correct function name for peer configuration
- #26401: (*cachedout*) Adapt proxy minion to tornado (w/lint)
- #26400: (*rallytime*) Back-port #26318 to 2015.8
- #26397: (*s0undt3ch*) A single *isinstance()* check for all types is enough
- #26385: (*gtmanfred*) don't require volume endpoint in nova driver
- #26287: (*techhat*) Break out SPM components into loaders
- #26384: (*TheBigBear*) Fix shell quoting for cmd.run
- #26391: (*rallytime*) Back-port #26367 to 2015.8
- #26383: (*rallytime*) Allow the creation of a VM without a profile
- #26375: (*s0undt3ch*) [2015.8] Schema DictItem required attribute fixes
- #26363: (*garethgreenaway*) Fixes to mount state 2015.8
- #26347: (*0xf10e*) Load `pkgng' as `pkg' on FreeBSD 9 when *providers:pkg* == `pkgng'
- #26361: (*TronPaul*) sign security token
- #26346: (*TronPaul*) Fix s3 using IAM credentials
- #26331: (*mnalt*) fix bug in sysrc to allow for empty rc variables
- #26334: (*rallytime*) Call salt.utils.cloud.bootstrap in GCE Driver provisioning
- #26308: (*dmurphy18*) Support for environment overrides building packages
- #26279: (*TheScriptSage*) Merge changes for pull`#26083`_ and pull`#25632`_ into 2015.8
- #26224: (*cachedout*) Cleanup of a few cases to move to salt.utils.fopen
- #26260: (*nmadhok*) Correct spelling of integration in docs
- #26226: (*rallytime*) Fix #25463
- #26248: (*nmadhok*) Initial commit of unit tests for vmware cloud driver
- #26228: (*basepi*) [2015.8] Merge forward from 2015.5 to 2015.8
- #26244: (*nmadhok*) Backport additions to VMware cloud driver from develop to 2015.8 branch
- #26235: (*sjorge*) salt.utils.is_smartos_zone, inverse of is_smartos_globalzone
- #26221: (*sjorge*) SmartOS grain fixes
- #26218: (*terminalmage*) Add warning about file.recurse unicode errors with vim swap files.
- #26214: (*rallytime*) Back-port #24878 to 2015.8
- #26211: (*techhat*) Move SPM to its own directory
- #26197: (*TronPaul*) Fix GitFS when whitelisting base
- #26200: (*anlutro*) Make it possible to run salt-cloud as current user
- #26201: (*kev009*) Avoid VBOX storage emulation bugs in FreeBSD disks grain
- #26188: (*basepi*) [2015.8] Merge forward from 2015.5 to 2015.8
- #26194: (*basepi*) Allow virtual grains to be generated even if virt-what is not available

- #26176: (*rallytime*) Back-port #26165 to 2015.8
- #26169: (*terminalmage*) Fix attribute error in gitfs' find_file functions
- #26170: (*nmadhok*) [Backport] Make sure variable is a dictionary before popping something from it.
- #26143: (*nmadhok*) VMware cloud driver fixes [forward port from 2015.5 into 2015.8]
- #26173: (*jacobhammons*) Updates to cloud docs for the provider > driver change
- #26125: (*evverx*) Use timedatectl set-timezone to tzsetting if available
- #26145: (*sjorge*) smartos_imgadm cleanup
- #26148: (*terminalmage*) Refactor winrepo support
- #26128: (*sjorge*) imgadm.avail should return multiple results
- #26109: (*jfindlay*) fix quote indent
- #26089: (*anlutro*) User state/module: fix coercing of None into string ``None'' in GECOS
- #26081: (*cachedout*) Move invocation routine up
- #26086: (*rallytime*) Back-port #26019 to 2015.8
- #26087: (*rallytime*) Back-port #26059 to 2015.8
- #26052: (*jtand*) Rh_ip fix
- #26078: (*cachedout*) Fix missing key in error return
- #26074: (*basepi*) [2015.8] Re-apply #25358 in 2015.8
- #26069: (*jfindlay*) fix win_firewall.delete_rule
- #26066: (*s0undt3ch*) [2015.8] Update to latest bootstrap stable release v2015.06.08
- #26049: (*basepi*) [2015.8] Merge forward from 2015.5 to 2015.8
- #26026: (*anlutro*) Fix httpasswd result false positive in test mode
- #26037: (*rallytime*) Back-port #25489 to 2015.8
- #26004: (*techhat*) Allow updating a single SPM repo at a time
- #26012: (*cachedout*) Merge kwargs into opts for tcp client
- #26007: (*anlutro*) file.managed: wrap os.remove in if isfile, don't remove on success
- #26009: (*terminalmage*) Add winrepo and dockerng information to 2015.8.0 release notes
- #26006: (*basepi*) Revert #25727 in favor of #25645
- #26001: (*cachedout*) Fix failing tests
- #25978: (*anlutro*) Correct service state changes in test mode
- #25982: (*sjorge*) salt.modules.smartos_* limit to global zone only
- #25989: (*rallytime*) Back-port #25832 to 2015.8
- #25988: (*cachedout*) Move #25642 to 2015.8
- #25999: (*s0undt3ch*) Include subschema defaults
- #25997: (*s0undt3ch*) Allow getting a defaults dictionary from schema defaults
- #25979: (*basepi*) [2015.8] Merge forward from 2015.5 to 2015.8
- #25902: (*basepi*) [2015.8] Merge forward from 2015.5 to 2015.8

- #25956: (*anlutro*) Fix user argument to cron functions
- #25946: (*sjorge*) Fix for salt.utils.decorators under esky
- #25957: (*anlutro*) Remove temporary file after file.managed with checkcmd
- #25874: (*rallytime*) Back-port #25668 to 2015.8
- #25929: (*sjorge*) salt.module.pkgin's __virtual__() should not return None if pkg_info is not present
- #25952: (*garethgreenaway*) Log when event.fire and event.fire_master fail 2015.8
- #25944: (*sjorge*) Smartos libcrypto nonesky fix
- #25906: (*dmurphy18*) Cherry-pick of pkgbuild changes from develop branch
- #25925: (*sjorge*) Create default log location in smartos esky buildscript
- #25928: (*cachedout*) Fix stacktrace for non-existant states
- #25922: (*jacksontj*) Correct max_wait -> max_auth_wait in MultiMinion
- #25907: (*rallytime*) Back-port #25892 to 2015.8
- #25910: (*terminalmage*) Pass osarch to check_32()
- #25849: (*basepi*) Repress template error for GPG renderer (can't seek an OrderedDict)
- #25868: (*rallytime*) Back-port #25404 to 2015.8
- #25896: (*cachedout*) Lint
- #25876: (*jacksontj*) Fixes for 2015.8
- #25867: (*rallytime*) Back-port #25370 to 2015.8
- #25845: (*jacobhammons*) updated versionadded
- #25836: (*jacksontj*) Keep track of SyncWrapper's IOLoop usage
- #25859: (*0xf10e*) warn_until(Carbon,...) instead of Boron
- #25505: (*0xf10e*) Glance state module for 2015.8 ``Beryllium''
- #25843: (*jtand*) Fixed a lint error in parsers.py
- #25835: (*techhat*) spm update_repo doesn't always require arguments
- #25837: (*jacobhammons*) regenerated man pages
- #25830: (*sjorge*) Loading of libcrypto on smartos esky fixed
- #25808: (*jfindlay*) add highstate opts to config/__init__.py, update docs
- #25820: (*sjorge*) Prerequisite to fix the smartos libcrypto loading
- #25781: (*anlutro*) Fix iptables.build_rule
- #25764: (*gtmanfred*) allow use of cloudnetworks in ssh_interface
- #25736: (*jfindlay*) insert explicit formatter number
- #25742: (*rallytime*) Back-port #25731 to 2015.8
- #25741: (*rallytime*) Back-port #25727 to 2015.8
- #25712: (*cachedout*) Fix outputter for state.apply
- #25698: (*rallytime*) Back-port #25659 to 2015.8
- #25690: (*anlutro*) Fix highstate duration alignment (again)

- #25684: (*davidjb*) Fix doc around Include/Exclude for states
- #25549: (*techhat*) Switch Scaleway to salt.utils.cloud.bootstrap()
- #25667: (*jfindlay*) add 2015.8.0rc2 autogenerated changelog
- #25653: (*anlutro*) Properly align highstate duration sum
- #25663: (*rallytime*) Back-port #25638 to 2015.8
- #25639: (*terminalmage*) Don't do pre-flight check on git_pillar if it is not configured
- #25587: (*cachedout*) Fix prereq in salt.state
- #25628: (*anlutro*) Highstate output: show duration in seconds instead of milliseconds when appropriate
- #25631: (*basepi*) Remove trailing whitespace
- #25627: (*basepi*) [2015.8] Merge forward from 2015.5 to 2015.8
- #25626: (*basepi*) Fix the highstate outputter if `duration' is not present
- #25601: (*terminalmage*) Fix error message when local bin pkg path is not absolute
- #25595: (*terminalmage*) Bring git_pillar up to feature parity with gitfs
- #25619: (*cachedout*) Lint stateconf changes
- #25578: (*davidjb*) Allow parent relative includes in state files
- #25610: (*s0undt3ch*) [2015.8] Update the bootstrap script to latest release v2015.07.22
- #25599: (*jfindlay*) fix transport settings in #25596
- #25596: (*jfindlay*) Tcp test
- #25591: (*garethgreenaway*) Return data for scheduled jobs in 2015.8 default to True.
- #25588: (*basepi*) Fix some of the retcode work from #23105
- #25583: (*jtand*) Fixed lint error where pprint wasn't imported.
- #25572: (*rallytime*) Back-port #25570 to 2015.8
- #25575: (*rallytime*) Make Sure Scaleway driver works with deprecation paths
- #25564: (*basepi*) [2015.8] Merge forward from 2015.5 to 2015.8
- #25566: (*techhat*) Fix download process for SPM repo updates
- #25553: (*techhat*) Switch SoftLayer to salt.utils.cloud.bootstrap()
- #25552: (*techhat*) Update pricing for SoftlayerHW
- #25547: (*techhat*) Switch Parallels to salt.utils.cloud.bootstrap()
- #25548: (*techhat*) Switch Proxmox to salt.utils.cloud.bootstrap()
- #25543: (*techhat*) Switch GCE to salt.utils.cloud.bootstrap()
- #25546: (*techhat*) Switch CloudStack to salt.utils.cloud.bootstrap()
- #25558: (*cachedout*) Lint config_test
- #25515: (*s0undt3ch*) salt.utils.schema fixes
- #25514: (*garethgreenaway*) fixes to schedule.add documentation in 2015.8
- #25508: (*s0undt3ch*) [2015.8] Update bootstrap script to latest stable release, v2015.07.17
- #25501: (*basepi*) Add optional job end time to the local_cache returner

- #25491: (*s0undt3ch*) Let's call it for what it is!
- #25462: (*rallytime*) Wrap is_profile_configrured calls in try/except block
- #25439: (*rallytime*) Reduce digital_ocean API call frequency
- #25451: (*s0undt3ch*) Salt-SSH Scan roster bugfixes (And Py3 support)
- #25449: (*ruzarowski*) Exclude dotfiles and directories from minion key lists (Fixes #25448)
- #25421: (*basepi*) [2015.8] Merge forward from 2015.5 to 2015.8
- #25412: (*basepi*) [2015.8] Merge forward from 2015.5 to 2015.8
- #25415: (*bechtoldt*) [docs] declare YAML as code block
- #25407: (*rallytime*) Back-port #23236 to 2015.8
- #25409: (*rallytime*) Back-port #24422 to 2015.8
- #25394: (*rallytime*) Back-port #25355 to 2015.8
- #25393: (*rallytime*) Back-port #25289 to 2015.8
- #25387: (*cachedout*) Lint #25319
- #25319: (*ruzarowski*) [cloud:EC2] Move SourceDest logic to _update_enis and add alias for delete_interface_on_terminate
- #25310: (*anlutro*) Add an ``is list'' test to the jinja environment
- #25264: (*ruzarowski*) Fix AttributeError in fileserver update_opts
- #25372: (*rallytime*) Don't stacktrace when provisioning instances with softlayer* drivers
- #25315: (*ruzarowski*) [cloud:EC2] Move handling of AssociatePublicIpAddress to associate_eip/allocate_new_eip logic depending on value type
- #25312: (*ruzarowski*) [cloud:EC2] Introduce eni Name property to set name tag value after its creation
- #25311: (*ruzarowski*) [cloud:EC2] Add ability to attach an existing eni
- #25280: (*rallytime*) Remove deprecation warnings for Beryllium
- #25329: (*twangboy*) Fixed some documentation errors
- #25300: (*s0undt3ch*) Fix ordering issue & Added requirements support
- #25283: (*jfindlay*) ensure ret is always defined
- #25252: (*jfindlay*) make args optional with default values in win_firewall.delete_rule
- #25257: (*notpeter*) Document SourceDestCheck added in #25242.
- #25298: (*twangboy*) Continue if profile not found
- #25296: (*twangboy*) Fixed file.comment for windows
- #25254: (*rallytime*) Change versionadded/changed references from Beryllium to 2015.8.0
- #25285: (*thusoy*) Remove error logging of missing victorops keys
- #25266: (*ruzarowski*) cloud: EC2 eni property SourceDestCheck is a AttributeBooleanValue
- #25216: (*jfindlay*) replace shell code with native python code
- #25278: (*rallytime*) Don't require size for all cloud drivers when checking profile configs
- #25271: (*basepi*) [2015.8] Merge forward from 2015.5 to 2015.8
- #25263: (*techhat*) Allow non-standard HTTP requests on tornado

- #25253: (*s0undt3ch*) Remove the deprecation warning. The driver has been renamed.
- #25248: (*techhat*) Do not resize while iterating
- #25244: (*rallytime*) Remove parted deprecations and fix failing tests
- #25242: (*ruzarowski*) Make SourceDestCheck flag available to network interface definition
- #25226: (*nmadhok*) Backporting fix for issue #25223 on 2015.8 branch
- #25234: (*krak3n*) Fix: Bug in boto_asg state argument passing to boto_asg module
- #25222: (*rallytime*) Back-port #25219 to 2015.8
- #25188: (*rallytime*) Use linode status descriptions instead of ints when logging status to CLI
- #25203: (*s0undt3ch*) Added DictConfig with tests & More tests
- #25189: (*basepi*) [2015.8] Merge forward from 2015.5 to 2015.8
- #25184: (*rallytime*) Back-port #25126 to 2015.8
- #25172: (*s0undt3ch*) Comment out imports while the YAML and RST rendering is not in-place.
- #25158: (*s0undt3ch*) Comment out not implemented code
- #25145: (*s0undt3ch*) Implement *oneOf*, *anyOf*, *allOf* and *not* with unit tests
- #25140: (*s0undt3ch*) Make the detection code work under Python 3.4
- #25131: (*s0undt3ch*) Array support in salt.utils.config
- #25130: (*basepi*) [2015.8] Merge forward from 2015.5 to 2015.8

The 2015.8.0 feature release of Salt contains several major new features. As usual the release notes are not exhaustive and primarily include the most notable additions and improvements. Hundreds of bugs have been fixed and many modules have been substantially updated and added.

New SaltStack Installation Repositories

SaltStack now provides installation repositories for several platforms, with more to come. See the following links for instructions:

- *Red Hat / CentOS 5, 6, 7*
- *Debian 8*
- *Windows*
- *FreeBSD*

Send Event on State Completion

A `fire_event` global state keyword argument was added that allows any state to send an event upon completion. Useful for custom progress bars and checking in on long state runs. See *fire_event*.

ZeroMQ socket monitoring

If `zmq_monitor` is enabled, log all ZMQ events for socket monitoring purposes. Verbose, but useful.

SPM (Salt Package Manager)

Allows Salt formulas to be packaged for ease of deployment. See *spm*.

Note: The spm executable was not included in the Debian or Ubuntu packages for the 2015.8.0 or the 2015.8.1 releases. This executable will be included in an upcoming release. As a workaround, copy the SPM script from the salt library installation into `/usr/local/bin` or your local equivalent.

Specify a Single Environment for Top Files

A new `default_top` option was added to load the state top file from a single, specific environment, rather than merging top data across all environments. Additionally, new `top_file_merge_strategy` and `env_order` options were added for more control over top file merging. See *The Top File*.

Tornado TCP Transport

Implemented a pure-TCP transport, in addition to ZeroMQ and RAET. The new transport uses Tornado, which allows Salt to use a standardized set of libraries for asynchronous behavior, which should greatly improve reliability and performance.

Note: Tornado is considered expiremental in this release. The following known issues were being investigated at the time of release:

- TCP tests show performance degredation over time (issue #26051)
- TCP transport stacktrace on windows minion: Future exception was never retrieved (issue #25718)
- [freebsd] TCP transport not working in 2015.8.0rc3 (issue #26364)

Proxy Minion Enhancements

Proxy Minions have undergone a significant overhaul in 2015.8, see Proxy Minion Enhancements.

Engines

Salt engines are long-running, external processes that leverage Salt. See *Salt Engines*.

Core Changes

- Add system version info to `versions_report`, which appears in both `salt --versions-report` and `salt '*' test.versions_report`. Also added is an alias `test.versions` to `test.versions_report`. (issue #21906)
- Add colorized console logging support. This is activated by using `%(colorlevel)s`, `%(colorname)s`, `%(colorprocess)s`, `%(colormsg)s` in `log_fmt_console` in the config file for any of `salt-master`, `salt-minion`, and `salt-cloud`.

Git Pillar

The git external pillar has been rewritten to bring it up to feature parity with *gitfs*. Support for pygit2 has been added, bringing with it the ability to access authenticated repositories.

Using the new features will require updates to the git ext_pillar configuration, further details can be found in the *pillar.git_pillar* docs.

Salt Cloud Improvements

- Pricing data from several cloud providers (GCE, DigitalOcean, SoftLayer_HW, EC2)
- All cloud providers now use standardized bootstrapping code.
- Modified the Linode Salt Cloud driver to use Linode's native API instead of depending on apache-libcloud or linode-python.

Salt Cloud Changes

- Changed the default behavior of `rename_on_destroy` to be set to `True` in the EC2 and AWS drivers.
- Changed the default behavior of the EC2 and AWS drivers to always check for duplicate names of VMs before trying to create a new VM. Will now throw an error similarly to other salt-cloud drivers when trying to create a VM of the same name, even if the VM is in the `terminated` state.
- When querying for VMs in `digital_ocean.py`, the number of VMs to include in a page was changed from 20 (default) to 200 to reduce the number of API calls to Digital Ocean.Ocean.

State and Execution Module Improvements

- New and improved Docker state and execution modules (`state` and `execution module`).

Git State and Execution Modules Rewritten

The git state and execution modules have gone through an extensive overhaul.

Changes in the `git.latest` State

- The `branch` argument has been added, allowing for a custom branch name to be used in the local checkout maintained by the *git.latest* state. This can be helpful in avoiding ambiguous refs in the local checkout when a tag is used as the `rev` argument. If no `branch` is specified, then the state uses the value of `rev` as the branch name.
- The `always_fetch` argument no longer has any effect, and will be removed in a future release. The state now detects whether or not a fetch is needed based on comparisons made between the local and remote repositories.
- The `force_fetch` argument has been added to force a fetch if the fetch is not a fast-forward (for instance, if someone has done a reset and force-pushed to the remote repository).
- The `remote_name` argument has been deprecated and renamed to `remote`.
- The `force` argument has been deprecated and renamed to `force_clone` to reduce ambiguity with the other ``force'' arguments.

- Using SHA1 hashes (full or shortened) in the `rev` argument is now properly supported.
- Non-fast-forward merges are now detected before the repository is updated, and the state will not update the repository if the change is not a fast-forward. Non-fast-forward updates must be overridden with the `force_reset` argument. If `force_reset` is set to `True`, the state will only reset the repository if it cannot be fast-forwarded. This is in contrast to the earlier behavior, in which a hard-reset would be performed every time the state was run if `force_reset` was set to `True`.
- A `git pull` is no longer performed by this state, dropped in favor of a fetch-and-merge (or fetch-and-reset) workflow.

`git.config_unset` state added

This state allows for configuration values (or entire keys) to be unset. See *here* for more information and example SLS.

git.config State Renamed to `git.config_set`

To reduce confusion after the addition of *git.config_unset*, the git.config state has been renamed to *git.config_set*. The old config.get name will still work for a couple releases, allowing time for SLS files to be updated.

In addition, this state now supports managing multivar git configuration values. See *here* for more information and example SLS.

Initial Support for Git Worktrees in Execution Module

Several functions have been added to the execution module to manage worktrees (a feature new to Git 2.5.0). State support does not exist yet, but will follow soon.

New Functions in Git Execution Module

- git.config_get_regexp
- *git.config_unset*
- *git.is_worktree*
- *git.list_branches*
- *git.list_tags*
- *git.list_worktrees*
- *git.merge_base*
- *git.merge_tree*
- *git.rev_parse*
- *git.version*
- *git.worktree_rm*
- *git.worktree_add*
- *git.worktree_prune*

Changes to Functions in Git Execution Module

git.add

- `--verbose` is now implied when running the `git add` command, to provide a list of the files added in the return data.

git.archive

- Now returns `True` when the `git archive` command was successful, and otherwise raises an error.
- The `overwrite` argument has been added to prevent an existing archive from being overwritten by this function.
- The `fmt` argument has been deprecated and renamed to `format`.
- Trailing slash no longer implied in `prefix` argument, must be included if this argument is passed.

git.checkout

- The `rev` argument is now optional when using `-b` or `-B` in `opts`, allowing for a branch to be created (or reset) using HEAD as the starting point.

git.clone

- The `name` argument has been added to specify the name of the directory in which to clone the repository. If this option is specified, then the clone will be made within the directory specified by the `cwd`, instead of at that location.
- The `repository` argument has been deprecated and renamed to `url`.

git.config_get

- The `setting_name` argument has been deprecated and renamed to `key`.
- The `global` argument has been added, to query the global git configuration
- The `all` argument has been added to return a list of all values for the specified key, allowing for all values in a multivar to be returned.
- The `cwd` argument is now optional if `global` is set to `True`

git.config_set

- The value(s) of the key being set are now returned
- The `setting_name` argument has been deprecated and renamed to `key`.
- The `setting_value` argument has been deprecated and renamed to `value`.
- The `is_global` argument has been deprecated and renamed to `global`.
- The `multivar` argument has been added to specify a list of values to set for the specified key. The `value` argument is not compatible with `multivar`.

- The `add` argument has been added to add a value to a key (this essentially just adds an `--add` to the `git config` command that is run to set the value).

git.fetch

- The `force` argument has been added to force the fetch when it is not a fast-forward. This could have been achieved in previous Salt versions by including `--force` in the `opts` argument, this argument is just for convenience and to match the usage of other functions with `force` arguments.
- The `refspecs` argument has been added to allow for one or more refspecs to be provided which override the one(s) specified by the **remote.remote_name.fetch** git configuration option.

git.ls_remote

- The `repository` argument has been deprecated and renamed to `remote`.
- The `branch` argument has been deprecated and renamed to `ref`.
- The `opts` argument has been added to allow for additional CLI options to be passed to the `git ls-remote` command.

git.merge

- The `branch` argument has been deprecated and renamed to `rev`.

git.status

- Return data has been changed from a list of lists to a dictionary containing lists of files in the modified, added, deleted, and untracked states.

git.submodule

- Added the `command` argument to allow for operations other than `update` to be run on submodules, and deprecated the `init` argument. To do a submodule update with `init=True` moving forward, use `command=update opts='--init'`.
- OpenStack Glance API V2 execution module
- Amazon VPC state module
- RallyDev execution module
- BambooHR execution module
- Stormpath execution, state modules
- Remove unused argument `timeout` in jboss7.status.
- Deprecate `enabled` argument in `pkgrepo.managed` in favor of `disabled`.
- Archive module changes: In the `archive.tar` and `archive.cmd_unzip` module functions, remove the arbitrary prefixing of the options string with `-`. An options string beginning with a `--long-option`, would have uncharacteristically needed its first `-` removed under the former scheme. Also, tar will parse its options differently if short options are used with or without a preceding `-`, so it is better to not confuse the user into thinking they're using the non- `-` format, when really they are using the with- `-` format.

- Added `__states__` to state modules, for cross-calling states. This enables using existing states when writing custom states. See *cross calling states*.

Windows Improvements

- Enhanced the windows minion silent installation with command line parameters to configure the salt master and minion name. See *Silent Installer Options*.
- Improved user management with additional capabilities in the user module for Windows.
- Improved patch management with a new module for managing windows updates (`win_wua`).
- Turned on multi-processing by default for windows in minion configuration.

Windows Software Repo Changes

A next-generation (ng) windows software repo is available for 2015.8.0 and later minions. When using this new repository, the repo cache is compiled on the Salt Minion, which enables pillar, grains and other things to be available during compilation time.

See the *Windows Software Repository* documentation for more information.

Changes to legacy Windows repository

If you have pre 2015.8 Windows minions connecting to your 2015.8 Salt master, you can continue to use the legacy Windows repository for these Salt minions.

If you were previously using this repository and have customized settings, be aware that several config options have been renamed to make their naming more consistent.

See the *Windows Software Repository* documentation for more information.

Win System Module

The unit of the `timeout` parameter in the `system.halt`, `system.poweroff`, `system.reboot`, and `system.shutdown` functions has been changed from seconds to minutes in order to be consistent with the linux timeout setting. (issue #24411) Optionally, the unit can be reverted to seconds by specifying `in_seconds=True`.

Other Improvements

- Sanitize sensitive fields in http.query
- Allow authorization to be read from Django and eauth
- Add templating to SMTP returner
- New REST module for SDB
- Added rest_timeout config option and timeout argument to jobs api call
- Provide config options for Raet lane and road buffer count. (Useful for BSD kernels)
- Implemented ZeroMQ socket monitor for master and minion
- Add end time to master job cache for jobs (optional, off by default)
- Tornado is now the default backend for http.request

- Support pillarenv selection as it's done for saltenv
- salt was updated to use python-crypto version 2.6.1, which removes the dependency on python-m2crypto.

Deprecations

- The `digital_ocean.py` Salt Cloud driver was removed in favor of the `digital_ocean_v2.py` driver as DigitalOcean has removed support for APIv1. The `digital_ocean_v2.py` was renamed to `digital_ocean.py` and supports DigitalOcean's APIv2.
- The `vsphere.py` Salt Cloud driver has been deprecated in favor of the `vmware.py` driver.
- The `openstack.py` Salt Cloud driver has been deprecated in favor of the `nova.py` driver.
- The use of `provider` in Salt Cloud provider files to define cloud drivers has been deprecated in favor of using `driver`. Both terms will work until the 2017.7.0 release of Salt. Example provider file:

```
my-ec2-cloud-config:
  id: 'HJGRYCILJLKJYG'
  key: 'kdjgfsgm;woormgl/aserigjksjdhasdfgn'
  private_key: /etc/salt/my_test_key.pem
  keyname: my_test_key
  securitygroup: default
  driver: ec2
```

- The use of `lock` has been deprecated and from `salt.utils.fopen`. `salt.utils.flopen` should be used instead.
- The following args have been deprecated from the `rabbitmq_vhost.present` state: `user`, `owner`, `conf`, `write`, `read`, and `runas`.
- The use of `runas` has been deprecated from the `rabbitmq_vhost.absent` state.
- Support for `output` in `mine.get` was removed. `--out` should be used instead.
- The use of `delim` was removed from the following functions in the `match` execution module: `pillar_pcre`, `pillar`, `grain_pcre`,

Security Fixes

CVE-2015-6918 - Git modules leaking HTTPS auth credentials to debug log

Updated the Git state and execution modules to no longer display HTTPS basic authentication credentials in loglevel debug output on the Salt master. These credentials are now replaced with REDACTED in the debug output. Thanks to Andreas Stieger <asteiger@suse.com> for bringing this to our attention.

Major Bug Fixes

- Fixed minion failover to next master on DNS errors (issue #21082)
- Fixed memory consumption in SaltEvents (issue #25557)
- Don't lookup outside system path in which() util (issue #24085)
- Fixed broken jobs rest api call (issue #23408)
- Fixed stale grains data using in modules (issue #24073)
- Added ssh_identities_only config flag for ssh-agent configured environments (issue #24096)

- Fixed ``object has no attribute'' errors for Raet transport (issue #21640)
- Flush event returners before master exit (issue #22814)
- Fix CommandExecutionError in grains generation with lspci missing (issue #23342)
- Fix salt-ssh against CentOS 7 when python-zmq not installed (issue #23503)
- Fix salt-ssh issues related to out-of-date six module (issue #20949)
- Fix salt-ssh thin generation after previous run was interrupted (issue #24376)
- Use proper line endings on Windows with ``file.managed'' w/contents (issue #25675)
- Fixed broken comment/uncomment functions in file.py (issue #24620)
- Fixed problem with unicode when changing computer description (issue #12255)
- Fixed problem with chocolatey module not loading (issue #25717)
- Fixed problem adding users to groups with spaces in the name (issue #25144)
- Fixed problem adding full name to user account (issue #25206)
- Fixed gem module stack trace (issue #21041)
- Fixed problem with file.managed when test=True (issue #20441)
- Fixed problem with powershell hanging while waiting for user input (issue #13943)
- Fixed problem where the salt-minion service would not consistently start (issue #25272)
- Fixed problem where pkg.refresh_db would return True even when winrepo.p was not found (issue #18919)
- Could someone please provide end to end example for Proxy Minion with REST (issue #25500)
- Proxy minions stopped working between 2014.7 and 2015.5 (issue #25053)
- Proxy minion documentation includes outdated code sample (issue #24018)
- Proxy Minion documentation missing grains example (issue #18273)
- Improve process management in proxy minion (issue #12024)
- Proxy minion never comes up with message ` I am XXX and I am not supposed to start any proxies.' (issue #25908)
- Fixed an issue that caused an exception when using Salt mine from pillar. (issue #11509)

25.2.33 Salt 2015.8.1 Release Notes

Version 2015.8.1 is a bugfix release for *2015.8.0*.

Statistics

- Total Merges: **201**
- Total Issue References: **39**
- Total PR References: **135**

- Contributors: **40** (DmitryKuzmenko, The-Loeki, TheBigBear, basepi, bechtoldt, bernieke, blueyed, cachedout, cedwards, clinta, cro, deuscapturus, dmurphy18, dsumsky, eliasp, flowhamster, isbm, jacksontj, jacobhammons, jfindlay, justinta, l2ol33rt, macgyver13, meggiebot, msteed, multani, nasenbaer13, perfinion, pprkut, rallytime, rhealitycheck, ruzarowski, ryan-lane, s0undt3ch, systembell, techhat, terminalmage, ticosax, twangboy, whiteinge)

Security Fixes

CVE-2015-6941 The Windows *user* module and `salt-cloud` display passwords in log when log level is set to `debug` or more verbose.

For the Windows *user* module, the password is now replaced with the string `XXX-REDACTED-XXX`.

For salt-cloud, debug logging no longer displays `win_password` and `sudo_password` authentication credentials.

CVE-2015-6918 Git state/execution modules log HTTPS auth credentials when log level is set to `debug` or more verbose.

These credentials are now replaced with `REDACTED` in the debug output. Thanks to Andreas Stieger <asteiger@suse.com> for bringing this to our attention.

Major Bug Fixes

- Add support for `spm.d/*.conf` configuration of SPM (issue #27010)
- Fix `proxy` grains breakage for non-proxy minions (issue #27039)
- Fix global key management for git state
- Fix passing http auth to `util.http` from `state.file` (issue #21917)
- Fix `multiprocessing: True` in windows (on by default`)
- Add `pkg.info` to pkg modules
- Fix name of `serial` grain (this was accidentally renamed in 2015.8.0`)
- Merge config values from `master.d`/`minion.d` conf files (rather than flat update`)
- Clean grains cache on grains sync (issue #19853)
- Remove streamed response for fileclient to avoid HTTP redirection problems (issue #27093)
- Fixed incorrect warning about `osrelease` grain (issue #27065)
- Fix authentication via Salt-API with tokens (issue #27270)
- Fix winrepo downloads from https locations (issue #27081)
- Fix potential error with salt-call as non-root user (issue #26889)
- Fix global minion provider overrides (issue #27209)
- Fix backward compatibility issues for pecl modules
- Fix Windows uninstaller to only remove `./bin`, `salt*`, `nssm.exe`, `uninst.exe` (issue #27383)
- Fix misc issues with mongo returner.
- Add sudo option to cloud config files (issue #27398)
- Fix regression in RunnerClient argument handling (issue #25107)
- Fix `dockerng.running` replacing creation hostconfig with runtime hostconfig (issue #27265)

- Fix dockerng.running replacing creation hostconfig with runtime hostconfig (issue #27265)
- Increased performance on boto asg/elb states due to `__states__` integration
- Windows minion no longer requires powershell to restart (issue #26629)
- Fix x509 module to support recent versions of OpenSSL (issue #27326)
- Some issues with proxy minions were corrected.

Known Issues

- Proxy minions currently cannot execute a highstate because of the way the proxymodule is being loaded internally. This will be fixed in a future release.

Changelog for v2015.8.0..v2015.8.1

Generated at: 2018-05-27 22:48:32 UTC

  - 51e765078a Merge pull request #27380 from jtand/async_tests
  - fd0dedeb99 Skipping Async tests
- **ISSUE** #27217: (nasenbaer13) Gitfs cleans up wrong directories (refs: #27218, #27477, #27276, #27382)
- **PR** #27382: (terminalmage) Revert ``fixes #27217 clear_old_remotes clears wrong directory (gitfs)'' @ *2015-09-24 22:54:23 UTC*
  - 633af56517 Merge pull request #27382 from terminalmage/revert-27218
  - 2379748f9e Revert ``fixes #27217 clear_old_remotes clears wrong directory (gitfs)''
- **PR** #27361: (cro) Correct some issues with proxy minions @ *2015-09-24 16:03:38 UTC*
  - 12a021da11 Merge pull request #27361 from cro/pxm_doc
  - 1a2c41c9e3 Add versionadded.
  - 93a6397598 func_alias should be list_ and should have a corresponding list_ fn.
  - 0221f7ee4e Pylint
  - 3a297d8036 Add release notes for proxy fixes.
  - 39df44b841 Pylint
  - e3ebff9bce Fix some problems with the rest_sample, remove unnecessary file and make sure that rest_service has the right contents.
  - f4944fe68a Fix typo in docs
- **PR** #27364: (ruzarowski) SaltCloud[EC2] Fix missing credentials in modify_eni_properties api call @ *2015-09-24 13:55:39 UTC*
  - cff74510de Merge pull request #27364 from ruzarowski/2015.8-modify-eni-properties-api-call
  - 100eea46d5 Issue #27121 - Remove leftover code comment
  - c58e7a00f3 Issue #27121 - Attempt to fix missing credentials when modifying eni properties
  - 5d292a221e Merge remote-tracking branch `upstream/2015.8' into 2015.8

  - 4dbd9ebb30 Merge remote-tracking branch `upstream/2015.8' into 2015.8
- **PR** #27349: (jfindlay) add freebsd install docs to release notes @ *2015-09-24 13:51:02 UTC*
  - 928ef59a8a Merge pull request #27349 from jfindlay/doc_typos
  - e509cfca17 fix typo in 2015.8.0 pull list
  - 7137e731d3 add FreeBSD documentation to 2015.8.0 notes
- **ISSUE** #26889: (UtahDave) salt-call w/non root user outputs repeating error (refs: #27343)
- **PR** #27343: (cachedout) Close io loop before deleting attribute @ *2015-09-24 13:49:55 UTC*
  - 331230ea4f Merge pull request #27343 from cachedout/issue_26889
  - 2b648e51af Close io loop before deleting attribute
- **PR** #27337: (rallytime) [2015.8] Fixup salt-cloud logging @ *2015-09-24 13:49:17 UTC*
  - cd82ead005 Merge pull request #27337 from rallytime/cloud-logging-eight
  - ed18384108 Merge pull request #7 from jtand/cloud-logging-eight
    * a6c1d0b408 Fixed a bug where logging_command wasnt set as a key in a couple spots
  - 8bb7cb7ff4 Use correct indexes
  - c3483002b0 [2015.8] Fixup salt-cloud logging
- **PR** #27332: (terminalmage) Adjust dockerng/dockerio docstrings @ *2015-09-24 13:45:34 UTC*
  - b2f8418ffc Merge pull request #27332 from terminalmage/adjust-dockerng-docstring
  - bdbf4d8e5c Add deprecation notice to dockerio state module
  - 17829ab38d Fix name of dockerng module in dockerio docstring
  - ed5ae75180 Adjust dockerng docstrings
- **PR** #27353: (cachedout) Fix case where var not set in config @ *2015-09-23 21:45:32 UTC*
  - ac9e6c2532 Merge pull request #27353 from cachedout/fix_retry_get
  - ea286e1874 Fix case where var not set in config
- **ISSUE** #21390: (fyatzeck) Having trouble with GCE cloud profile assigning static IP and enabling IP forward (refs: #27350)
- **PR** #27350: (rallytime) Allow IP-forwarding in GCE driver @ *2015-09-23 21:36:41 UTC*
  - 3f6b06116f Merge pull request #27350 from rallytime/fix-21390
  - 2bf566d934 Allow IP-forwarding in GCE driver
  - 484015a7a3 Added version tag for ex_disk_type option
  - a71ebc97b2 Allow use of rst header links by separating options out from yaml example
- **ISSUE** #27103: (twangboy) Salt-Minion doesn't display logs for new processes with multiprocessing on (refs: #27305)
- **PR** #27305: (cachedout) Re-init logging system on Windows when using multiprocessing @ *2015-09-23 15:32:32 UTC*
  - 6f3da863fc Merge pull request #27305 from cachedout/issue_27103
  - 7a7492d186 Fix typo
  - 22c653482c Re-init logging system on Windows when using multiprocessing

- **PR** #27331: (terminalmage) dockerng: Allow both cmd and command to be used to specify command (refs: #27459, #27444) @ *2015-09-23 15:27:43 UTC*
  - 684e33aeb2 Merge pull request #27331 from terminalmage/dockerng-cmd
  - 7d4eaac8ae dockerng: Allow both cmd and command to be used to specify command
- **PR** #27327: (isbm) Fix a typo in the RPM output @ *2015-09-23 14:27:42 UTC*
  - a3f4fa1106 Merge pull request #27327 from isbm/isbm-pkg-info-typofix
  - 7912f8c13b Fix typo
- **PR** #27312: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8 @ *2015-09-22 22:52:14 UTC*
  - a789303d75 Merge pull request #27312 from basepi/merge-forward-2015.8
  - 647080d064 Add missing import
  - 95e70f0bef Merge remote-tracking branch `upstream/2015.5' into merge-forward-2015.8
  - ca4597b93a Merge pull request #27310 from basepi/merge-forward-2015.5
    - 7b75e4aed1 Merge remote-tracking branch `upstream/2014.7' into merge-forward-2015.5
    - e90412d3b8 Merge pull request #27252 from jfindlay/version.2014.7
      - 3d28307a00 2014.7 -> 2014.7.0
  - 982c21c79f Merge pull request #27308 from terminalmage/fix-refresh_db-regression
    - 77686fb7ce Fix refresh_db regression in yumpkg.py
  - 775a4f9ad0 Merge pull request #27286 from terminalmage/return_retry_timer
    - 540a7dfcf1 Add default values for new minion config options
    - 453b883820 Add a configurable timer for minion return retries
  - 02482c0572 Merge pull request #27278 from rallytime/bp-27256
    - 1beddf6311 Fix error handling in salt.modules.file.statvfs
  - e36c019c37 Merge pull request #27277 from rallytime/bp-27230
    - 3ce77db1bc Fix typo in AWS doc config
  - b22286476e Merge pull request #27253 from jfindlay/version.2015.5
    - 967e3bb72a 2015.5 -> 2015.5.0
  - 51a0193b54 Merge pull request #27244 from garethgreenaway/ec2_create_snapshot_no_return_data_exception
    - 820fd576b9 Fixing the cause when the r_data from aws.query is empty and an exception happens when looking for the snapshotID
  - 26540f15bc Merge pull request #27231 from jfindlay/cronchange
    - 1e335297e2 only write cron file if it is changed
- **PR** #27303: (jacobhammons) Updated module doc index using https://github.com/saltstack/salt/pull... @ *2015-09-22 19:29:04 UTC*
  - c3b690273b Merge pull request #27303 from jacobhammons/ref-updates
  - 7ac98a03b6 Updated module doc index using https://github.com/saltstack/salt/pull/27203
- **ISSUE** #27081: (TheBigBear) winrepo - SSLError: [Errno 1] _ssl.c:510: error:14090086:SSL routines:SSL3_GET_SERVER_CERTIFICATE:certificate verify failed (refs: #27301)

- **PR** #27301: (twangboy) Pass ca_bundle for windows (fixes SSL Error) @ *2015-09-22 19:00:45 UTC*
  - aaa2db9943 Merge pull request #27301 from twangboy/fix_27081
  - 5c4f5f8944 Changed windows gate to check for verify_ssl option
  - e2fe5a60b5 Pass ca_bundle for windows (fixes SSL Error)
- **PR** #27300: (rallytime) Back-port #27287 to 2015.8 @ *2015-09-22 16:59:07 UTC*
  - **PR** #27287: (rhealitycheck) Mongo returners patch 1 (refs: #27300)
  - 55f4050146 Merge pull request #27300 from rallytime/bp-27287
  - e49a6dc449 Update mongo_return.py
  - 63153322b9 Update mongo_future_return.py
- **PR** #27288: (rallytime) Filter on `name', not `id', when listing images @ *2015-09-21 22:37:26 UTC*
  - d96462af48 Merge pull request #27288 from rallytime/do-cleanup
  - 6e16fad760 Use name in all places, not id.
  - 9b34542cb0 Filter on `name', not `id', when listing images
- **PR** #27283: (justinta) __grains__['osrelease'] returns a string @ *2015-09-21 19:18:44 UTC*
  - 688f24e9e4 Merge pull request #27283 from jtand/yumpkg_yum_fix
  - b73f5289b4 __grains__['osrelease'] returns a string. Cast to int for correct comparison
- **ISSUE** #27217: (nasenbaer13) Gitfs cleans up wrong directories (refs: #27218, #27477, #27276, #27382)
- **PR** #27276: (rallytime) Back-port #27218 to 2015.8 @ *2015-09-21 19:05:54 UTC*
  - **PR** #27218: (nasenbaer13) fixes #27217 clear_old_remotes clears wrong directory (gitfs) (refs: #27276)
  - 78d44a5c74 Merge pull request #27276 from rallytime/bp-27218
  - 8c0991d527 fixes #27217 clear_old_remotes clears wrong directory (gitfs)
- **PR** #27275: (rallytime) Back-port #27213 to 2015.8 @ *2015-09-21 19:05:18 UTC*
  - **PR** #27213: (macgyver13) Make get_event compatible with salt/client (refs: #27275)
  - d5ce81e8e7 Merge pull request #27275 from rallytime/bp-27213
  - 5d4c90c479 Make get_event compatible with salt/client
- **PR** #27274: (rallytime) Back-port #27272 to 2015.8 @ *2015-09-21 18:54:48 UTC*
  - **PR** #27272: (techhat) Make sure list_nodes_full contains a name attribute (refs: #27274)
  - 2be21d6451 Merge pull request #27274 from rallytime/bp-27272
  - f3ea3259a5 Make sure list_nodes_full contains a name attribute
- **PR** #27271: (isbm) Bugfix: crash on token authentication via API @ *2015-09-21 15:53:09 UTC*
  - c0943dd4d1 Merge pull request #27271 from isbm/isbm-bufix-27270
  - fc524c17b9 Reduce the criteria that would match empty iterables as well as None or False values
  - 3152af78b5 Fix the crash on token auth via API (http://git.io/vn4tx)
- **ISSUE** #19947: (gczuczy) Unable to supply provisioning script to softlayer create() (refs: #27251)
- **PR** #27251: (rallytime) Add support for post_uri in SoftLayer cloud drivers @ *2015-09-21 15:43:16 UTC*
  - b11ce6ac2a Merge pull request #27251 from rallytime/fix-19947

  - aafb776808 Add support for post_uri in SoftLayer cloud drivers

- **ISSUE** #21879: (bechtoldt) Reference pages in documentation are outdated again (refs: #27260, #25019, #21880)
- **ISSUE** #19262: (bechtoldt) salt.pillar.file_tree doesn't appear in the documentation (refs: #27260, #25019)
- **PR** #27260: (bechtoldt) add missing module doc references @ *2015-09-21 05:48:38 UTC*
  - **PR** #25019: (bechtoldt) add missing module documentation to references (refs: #27260)
  - **PR** #24421: (bechtoldt) add missing module documentation (refs: #27260, #25019)
  - **PR** #21880: (bechtoldt) update references, fixes #21879 (refs: #27260, #25019)
  - **PR** #20039: (bechtoldt) completing some doc references (refs: #27260, #25019)
  - de6e5abe6c Merge pull request #27260 from bechtoldt/missing_refs
  - 3a7d31a91c add missing module references
- **PR** #27254: (jfindlay) 2015.2,2015.8,Beryllium -> 2015.8.0 @ *2015-09-18 23:44:46 UTC*
  - 1a32b9f778 Merge pull request #27254 from jfindlay/version.2015.8
  - 8ea15f498e 2015.2,2015.8,Beryllium -> 2015.8.0
- **ISSUE** #25079: (jondonas) Salt-cloud does not check for duplicate ssh keys when using provider such as DigitalOcean (refs: #27245)
- **PR** #27245: (rallytime) If two ssh keynames are found in DigitalOcean, abort and warn the user. @ *2015-09-18 21:42:36 UTC*
  - f3a847823b Merge pull request #27245 from rallytime/fix-25079
  - 4b0f7cce1d If two ssh keynames are found in DigitalOcean, abort.
- **ISSUE** #27065: (lorengordon) 2015.8.0: yumpkg reporting ``Unexpected osrelease grain `6.7"' (refs: #27241)
- **PR** #27241: (jfindlay) osrelease is only an integer for fedora @ *2015-09-18 21:40:50 UTC*
  - e4a5b004ae Merge pull request #27241 from jfindlay/yumwarn
  - 1f7570250f osrelease is only an integer for fedora
- **PR** #27234: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8 @ *2015-09-18 20:41:38 UTC*
  - f8e71f6d7d Merge pull request #27234 from basepi/merge-forward-2015.8
  - be2b0fc497 Merge remote-tracking branch `upstream/2015.5' into merge-forward-2015.8
    * 579f375f74 Merge pull request #27233 from basepi/release.notes.stubs
      · f4563ea9b7 Add stub release notes for 2015.5.6
    * f5a322e3f2 Merge pull request #27208 from basepi/nop.state.25423
      · 9414b05b2c Add test.nop example
      · a84ce67b8f Add test.nop state
    * 59a07cae68 Merge pull request #27201 from jfindlay/sshhash
      · 1b620b77cd rename hash_host arg to hash_known_hosts
      · 12f14ae37c update hash_known_hosts docs in ssh module
    * 560545c4c5 Merge pull request #27214 from jacksontj/2015.5
      · e7526bdb44 Correctly support https, port 443 is not a requirement

        * 7a34c7742d Merge pull request #27172 from rallytime/bp-27150
            · 0d7ee4b209 Merge config values from master.d/minion.d conf files

- **PR** #27240: (isbm) Backport of the fix of `pkg.info*' for Beryllium @ *2015-09-18 20:02:15 UTC*
  - 2d6c75cbd7 Merge pull request #27240 from isbm/isbm-pkg.info-tz-bugfix-backport-2015.8
  - 19a361851a Return install date only if possible.
  - ff857bc8aa Return RPM package time in UTC timezone
  - eaa0f370bf Remove time fraction and return ISO in UTC
  - ce9570fce6 Return UTC timestamp for modification of path.
- **ISSUE** #27222: (pprkut) Support firewalld zone configuration in network.managed state for rh7 systems (refs: #27223)
- **PR** #27223: (pprkut) Support firewalld per interface zone config on rh7 systems @ *2015-09-18 19:44:45 UTC*
  - 80a45b74ed Merge pull request #27223 from M2Mobi/zone
  - 48023669e7 Support permanent per interface firewalld zone configuration on rh7 systems.
  - **PR** #27239: (bechtoldt) test #27238 prevent keyerror when partition doesn't exist (refs: #27238)
- **PR** #27238: (bechtoldt) salt.modules.disk.percent() throws KeyError when partition doesn't exist (refs: #27239) @ *2015-09-18 19:37:00 UTC*
  - 652b2998af Merge pull request #27238 from bechtoldt/fix_disk_percent_keyerror
  - 0511f611bb prevent KeyError by checking whether partition even exists
- **PR** #27232: (basepi) [2015.8] Add stub release notes for 2015.8.1 @ *2015-09-18 16:53:01 UTC*
  - 253ac5e0c3 Merge pull request #27232 from basepi/release.notes.stubs
  - 25410706ee Add stub release notes for 2015.8.1
- **ISSUE** #24573: (bailsman) cloud.profile RuntimeError: dictionary changed size during iteration (refs: #27199)
- **PR** #27199: (rallytime) Avoid RunTimeError (dictionary changed size during iteration) with keys() @ *2015-09-18 15:44:27 UTC*
  - c542cd49d0 Merge pull request #27199 from rallytime/fix-24573
  - 6b2a00e947 Avoid RunTimeError (dictionary changed size during iteration) with keys()
- **PR** #27206: (rallytime) Don't repeat GCE setup instructions, and make the use of .json files clearer @ *2015-09-18 14:38:40 UTC*
  - 6b79ad69a9 Merge pull request #27206 from rallytime/gce-doc-cleanup
  - cced6e9031 Don't repeat GCE setup instructions, and make the use of .json files clearer
- **PR** #27210: (rallytime) Refactor some digital ocean functions @ *2015-09-18 14:38:01 UTC*
  - 1d022eb5de Merge pull request #27210 from rallytime/do-clean-up
  - 808a5b3b81 Make sure we set the full data to the ret variable
  - 9b635004e2 Refactor some digital_ocean functions to help simplify the driver
- **PR** #27197: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8 @ *2015-09-17 19:53:22 UTC*
  - 8c204a45ab Merge pull request #27197 from basepi/merge-forward-2015.8
  - 2c2a5f85ac Merge remote-tracking branch `upstream/2015.5' into merge-forward-2015.8

* e956d88f5f Merge pull request #27194 from rallytime/bp-27180
    - 327d343fef file copy ret result True if no change in test mode
* a02d043309 Merge pull request #27176 from basepi/merge-forward-2015.5
    - 66f4641be3 Merge remote-tracking branch `upstream/2014.7' into merge-forward-2015.5
    - c186e51764 Merge pull request #27117 from jacobhammons/release-docs-2014.7
    - b69e11e0a4 made 2014.7 an archived release minor doc site updates
    - 69d758ee2b Merge pull request #27114 from cachedout/warn_on_insecure_log
    - 507fb04683 Issue warning that some log levels may contain sensitive data
    - aa71bae8aa Merge pull request #27075 from twangboy/fix_password_2014.7
    - c0689e3215 Replaced password with redacted when displayed
* de2027426e Merge pull request #27170 from rallytime/gce-docs
    - a07db909bd Update Getting Started with GCE docs to use cloud.profiles or cloud.profiles.d examples
* 28cfdfd067 Merge pull request #27167 from rallytime/bp-27148
    - d12be52355 Pass filepointers to the serialize load functions.
* 4495f4f4d0 Merge pull request #27168 from techhat/gateimpacket
    - cc448bfdc1 Add further gating of impacket library
* 3e5ef0dc30 Merge pull request #27166 from rallytime/fix-27100
    - 50fb3a489a Allow a full-query for EC2, even if there are no profiles defined
* f1c9de7ed9 Merge pull request #27162 from rallytime/softlayer-service
    - d281068c70 Be explicit in using ``SoftLayer'' for service queries in SoftLayer drivers
* 59e9dfd8de Merge pull request #27149 from twangboy/fix_27133
    - 7992b7e20a Fixed some tests... hopefully...
    - d4c8e30f5d Fixed problem with add/remove path
* 097fcd1017 Merge pull request #27147 from rallytime/fix-11669
    - 55312ea03f Provide a more friendly error message.
    - 36555856c7 Enforce bounds in the GCE Regex
* f5c3f157dd Merge pull request #27128 from eguven/2015.5-fix-test-diff
    - ec2d68a84a don't show diff for test run if show_diff=False
* 088b1dbb3e Merge pull request #27116 from jacobhammons/release-docs-2015.5
    - 6e323b6dd3 Update latest to 2015.8, 2015.5 is now previous Assorted style and minor updates
* 440855b182 Merge pull request #27033 from jfindlay/n0ne
    - 3334b9d548 fix comment and unit test for reg state
    - 391a09d5ac update reg state unit tests
    - ebbf2b05ca Fixed reg state module for None, 0, and `' values
* 35fc74132a Merge pull request #26942 from Arabus/fix-docker.run

        - e61e1de1f5 Fixes value typo for dockerio.loaded state
        - 39fa11b696 further linting
        - 4aec37397c Further Linting to quiet the linter
        - 7eff8ad070 Code Linting and cmd call fix
        - a51676e0eb Fixes #17088 olyif and unless should run on the host
        - d0c6128b8f Fixes #17088 retcode now returns True or False based on return status
        - 8b2e7cc4f5 Syntax clarification
- **PR** #27195: (jacobhammons) Fixed sphinx / latex build warnings and errors @ *2015-09-17 17:28:37 UTC*
  - 430c48c5ea Merge pull request #27195 from jacobhammons/doc-build
  - fad87e34a2 Fixed lint errors
  - e56f02b025 re-add cheatsheet do-over
  - 60a8330561 re-added cheatsheet.tex
  - f7a9e25d52 Fixed sphinx / latex build warnings and errors Added missing modules to contents
- **PR** #27182: (bernieke) fix restart_on_error @ *2015-09-17 17:24:01 UTC*
  - 8f8e75c5ff Merge pull request #27182 from Awingu/2015.8
  - 693b81f7e4 fix restart_on_error #27127
- **ISSUE** #27093: (TheBigBear) 2015.8.0 winrepo downloader corrupts some installers (refs: #27394, #27163)
- **PR** #27163: (terminalmage) Workaround upstream tornado bug affecting redirects (refs: #27394) @ *2015-09-17 16:09:01 UTC*
  - 97d2a5fddc Merge pull request #27163 from terminalmage/issue27093
  - 80b396db73 Handle potential ValueError when checking content length
  - a89c987943 Remove unused import
  - 469e18f74c Workaround upstream tornado bug affecting redirects
  - f2a562ac60 Add salt.utils.files.rename() for cross-platform renaming
- **ISSUE** #19954: (gczuczy) Multiple disks on softlayer (refs: #27173)
- **PR** #27177: (rallytime) Remove note - incorrect info @ *2015-09-17 01:34:04 UTC*
  - **PR** #27173: (rallytime) Add the ability to specify multiple disks on the SoftLayer driver (refs: #27177)
  - 65c59ec2ea Merge pull request #27177 from rallytime/fix-19954
  - 531b44243d Remove note - incorrect info
- **ISSUE** #19954: (gczuczy) Multiple disks on softlayer (refs: #27173)
- **PR** #27173: (rallytime) Add the ability to specify multiple disks on the SoftLayer driver (refs: #27177) @ *2015-09-17 00:32:57 UTC*
  - cbb7e7f1a5 Merge pull request #27173 from rallytime/fix-19954
  - 45c6aabde9 DeviceID `1' is reserved for the SWAP disk; let's skip it.
  - 54e104cf5b Don't stacktrace if local_disk isn't set
  - fe74d203f5 Add the ability to specify multiple disks on the SoftLayer driver
- **ISSUE** #22724: (ty2u) digital_ocean_v2.py doesn't restore snapshot (refs: #26824)

- **PR** #27164: (rallytime) Make sure changes from #26824 to digital_ocean_v2.py driver make it to digital_ocean.py in 2015.8 @ *2015-09-16 18:55:17 UTC*
  - **PR** #26824: (systembell) [salt-cloud] Fix creating droplet from snapshot in digital_ocean provider (refs: #27164)
  - 0e04588d58 Merge pull request #27164 from rallytime/add-26824-changes-to-2015.8
  - a44bd763dd Make sure changes from #26824 to digital_ocean_v2.py driver make it to digital_ocean.py in 2015.8
- **ISSUE** #19853: (ksalman) master needs a way to invalidate grains on the minion (refs: #27143)
- **PR** #27143: (cachedout) Clean grains cache on grains sync @ *2015-09-16 16:27:06 UTC*
  - 38d93a96fe Merge pull request #27143 from cachedout/clean_grains_cache_on_sync
  - 0a660a9f80 Break apart long line
  - 6de2c2a50c Better error checking
  - 252f7c7ea9 Clean grains cache on grains sync
- **ISSUE** #18582: (mainframe) Allow merging file_roots and pillar_roots from different config files included from master.d (refs: #27150)
- **PR** #27150: (cachedout) Merge config values from master.d/minion.d conf files (refs: #27172) @ *2015-09-16 15:36:41 UTC*
  - 626cbe61ce Merge pull request #27150 from cachedout/issue_18582
  - 6351a94d08 Merge config values from master.d/minion.d conf files
- **ISSUE** #27135: (SEJeff) Regression in core grains in the latest version of salt (refs: #27137)
- **PR** #27137: (jfindlay) revert serial grain regression @ *2015-09-15 21:52:25 UTC*
  - **PR** #22267: (The-Loeki) modify _hw core grains to use the new smbios module, add system uuid (refs: #27137)
  - 72fad569b0 Merge pull request #27137 from jfindlay/serial
  - 78c9687f0e revert serial grain regression
- **PR** #27144: (rallytime) Don't stacktrace on softlayer_hw.show_all_prices if a code isn't supplied @ *2015-09-15 21:52:09 UTC*
  - 58b56b9d78 Merge pull request #27144 from rallytime/softlayer-fixes
  - 3963a5cf0f Don't stacktrace on softlayer_hw.show_all_prices if a code isn't supplied
- **PR** #27139: (jacobhammons) Updated key instruction on rhel7 @ *2015-09-15 16:06:14 UTC*
  - b71de75c1c Merge pull request #27139 from jacobhammons/rhel-doc
  - 7ed9f6260f Updated key instruction on rhel7
- **PR** #27134: (isbm) Backport to 2015.8: ``pkg.info'' @ *2015-09-15 15:57:46 UTC*
  - 0d8248930e Merge pull request #27134 from isbm/isbm-pkg.info-backport-2015.8
  - b60e6a37a7 Lintfix: E7801, C0321
  - cb4706c7e8 Add license extraction for Dpkg.
  - 38753fe8b2 Enhance filter for the ``technical'' fields that are not generally needed as a package information for the CMDB
  - ffe8f14dae Implement additional package information merger

  - 2aafc469d0 Fix the size and installed-size keys
  - 3fc389435b Add homepage translator key
  - 25040c9c71 Docfix
  - 911bae1baf Add alias for `info' of deprecation in v. Boron
  - 306958dad0 Fix renamed method
  - 6ba269fbc6 Remove `N/A' when no data.
  - 137eb75ca2 Rename existing `info' to `info_available'
  - 7b376fd5c3 Implement compatible `info_installed'. Returned keys are common to other systems with other package managers
  - ca7d0d5025 Implement compatible `info_installed'. Returned keys are common to other systems with other package managers
  - c1faebf0b5 Implement compatible `info_installed'. Returned keys are common to other systems with other package managers
  - f14f4036df Lint: regexp as a string
  - cabe863b81 Implement package info function
  - 0668f1da53 Implement getting package installation time
  - e03716e5b5 Implement getting general packages information
  - 8737d690fe Extract package description
  - a283d53737 Lintfix the regexp string
  - fc9c959678 Convert time to ISO 8601
  - 9fb9296276 Return a detailed information about package(s)
- **PR** #27119: (l2ol33rt) Boto dynamodb module should be using layer 2 abstractions @ *2015-09-15 14:09:57 UTC*
  - 7f512852ef Merge pull request #27119 from l2ol33rt/boto_dynamo_module_fix
  - 46c7aee367 Boto dynamodb util should be using layer 2 abstractions
- **PR** #27092: (perfinion) salt/master: chdir to root not homedir @ *2015-09-15 14:09:24 UTC*
  - 100e340111 Merge pull request #27092 from perfinion/chdir-fix-2015.8
  - 284d268855 salt/master: chdir to root not homedir
- **PR** #27131: (jacobhammons) Install docs @ *2015-09-15 12:34:38 UTC*
  - 7483556b5f Merge pull request #27131 from jacobhammons/install-docs
  - d1e8af9be6 added command to remove key from rhel6
  - 69d64f177d moved rhel5 commands to separate lines
  - 90431278ea Install instruction updates for rhel6 and debian
- **PR** #27124: (jfindlay) Backport #27123 @ *2015-09-15 08:37:43 UTC*
  - **PR** #27123: (cedwards) update for freebsd installation documentation (refs: #27124)
  - fc8afcc9f9 Merge pull request #27124 from jfindlay/bp-27123
  - 016fb5fafe Update freebsd.rst
  - 026fc9a884 update for freebsd installation documentation

- **PR** #27111: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8 @ *2015-09-15 07:29:30 UTC*
  - 0d62d3470c Merge pull request #27111 from basepi/merge-forward-2015.8
  - ab519fb5ff Remove heavily-mocked unit tests
  - 274464a85b Merge remote-tracking branch `upstream/2015.5' into merge-forward-2015.8
    * 59f2a0c7ae Merge pull request #26977 from abh/2015.5-ntppeer
      · df3d6e817f Add support for PEERNTP network interface configuration on RH derived systems
    * e05b1f3951 Merge pull request #27023 from jfindlay/htwebutilpass
      · 9f3d7890a6 add test support for htpasswd state mod
    * 9f999c0027 Merge pull request #27074 from twangboy/fix_password_2015.5
      · fdd3537456 Replaced password with redacted when displayed
    * 46b44f85ed Merge pull request #27073 from rallytime/remove-lxc-warning
      · 76c056d02b Remove ``use develop branch'' warning from LXC tutorial now that 2015.5.0 has been released
    * caab21d99c Merge pull request #27054 from rallytime/bp-27029
      · 0be393be22 Removed check for no package name
    * 0227e1cb57 Merge pull request #27053 from rallytime/bp-26992
      · 83798aff3c Do not use full return for documentation.
      · d9d5bbaa68 Summary requires full return information.
    * b72a0ef86d Merge pull request #27052 from rallytime/bp-26930
      · d9787aa318 aptpkg.mod_repo: Raise when key_url doesn't exist
    * 8b554dd16f Merge pull request #27049 from johanek/repoquery-dedupe
      · c113916a23 When running repoquery to check for available versions of packages, run once for all packages rather than once per package
    * cc2cbf9869 Merge pull request #27070 from stanislavb/2015.5
      · 1e6e5ddc9c Deprecate salt.utils.iam in Carbon
    * e23caa8ccf Merge pull request #27030 from jfindlay/winreg
      · 120fbe78e0 remove trailing line in win_path exec module
      · b36a7107b2 update win_path exec module unit tests
      · a2dc6f2dd7 Fixes win_path module, migrates from reg.(set|get)_key to reg.(set|get)_value
    * 843c28b435 Merge pull request #27025 from cachedout/issue_25581
      · ecc09d9b93 Lint
      · bfcaab9ef4 Better try and error handling for prep_jid
    * b9baa0b39a Merge pull request #27035 from terminalmage/useradd-contextmanager
      · e430e97f6c Update user states to reflect changes to login class handling
      · f24b979c7c useradd.py: Use contextmanager to prevent leaked filehandles
    * 1cdfdf7a92 Merge pull request #27034 from rallytime/softlayer-doc-fix

    - cb641f8145 Update softlayer docs for where to find apikey

* 9e06d3f01a Merge pull request #27024 from rallytime/bp-27004
    - 54d6fcf4c7 Fix `dict' object has no attribute split
    - bb29d73c71 Fix `dict' object has no attribute split
    - 5f1a9c46aa Fix `dict' object has no attribute split
    - 2bfdd9724e Fix `dict' object has no attribute split
* 9ab2cae1e4 Merge pull request #27027 from rallytime/bp-27013
    - 19a6e9cb1c Remove unwanted debug statement.
* 2c8beb238f Merge pull request #27026 from rallytime/bp-27011
    - f8518d545f Move giant eventlisten.sh example out of the state.event docstring
* e8cdcc62f7 Merge pull request #26972 from twangboy/fix_20522
    - 0110786fa9 Catch the 404 error from fileclient
* fbc95f4685 Merge pull request #26951 from terminalmage/fix-timezone
    - 30a4915762 Update tests to reflect changes to timezone module
    - b6f926919f Fix timezone module for CentOS
* f2ad3c333c Merge pull request #26875 from marccardinal/patch-2
    - 36d5a62262 LXC gateway provisioned only when IP is provided
* 7b2e7b1b37 Merge pull request #26997 from twangboy/fix_symlink_windows
    - 89cc02d4e0 Added *versionadded*
    - 835177b0c8 Fixed symlinks for windows (don't use user root)
* 5389a85894 Merge pull request #27001 from twangboy/fix_reg_docs
    - 2980bbda17 Minor clarification
    - 4684b2ddd1 Added CLI example for reg.delete_key_recursive
* 37814f5dff Merge pull request #26996 from jacobhammons/beacon-doc
    - e475ea688e Fixed typo
    - 2401533d9e New content added to beacon docs.
* 4ba7eed711 Merge pull request #26868 from joejulian/2015.5_lvm_vg_symlink_fix
    - 3dfb33849a Use the actual device name when checking vgdisplay
* 1537e945be Merge pull request #26955 from dsumsky/s3-pillar-module-cache-fix-2015.5
    - 8219acffe7 - fixed pylint warnings
    - a3b10e8ab1 - fixed broken caching in S3 ext_pillar module (file_md5 was a list) - added debugging messages - static parameters are available as module parameters now
* 3e902e86b1 Merge pull request #26987 from rallytime/bp-26966
    - 6a29eac003 URL has changed
* eddb532713 Merge pull request #26915 from rallytime/joyent-tests
    - d4ad42d697 Update Joyent Cloud Tests

* f86814b2a4 Merge pull request #26971 from rallytime/reactor-doc-fix
    - 0214daad19 Fix a couple of typos in reactor docs
* 57b1080f94 Merge pull request #26976 from saltstack/revert-26899-fix_26730
    - 6dd54e6bec Revert ``file.symlink gets windows account instead of root''
* 67be01f5fe Merge pull request #26975 from whiteinge/rest_cherrypy-integration
    - 9a0989585b Add additional `groups' check to rest_cherrypy if groups are not used
    - d68aefcfde Remove mocks from rest_cherrypy integration tests
    - 2aa3da8911 Rename the rest_cherrypy tests to conform to our convention
* 20a48f7f2e Merge pull request #26899 from twangboy/fix_26730
    - 9d9b3bb47a file.symlink gets windows account instead of root
* dbc6b862f4 Merge pull request #26960 from rallytime/cherrypy-docs
    - c1420711db Fix bash code block formatting
* f733e048c9 Merge pull request #26940 from rallytime/api-doc-fix
    - 00fe6a225c Fix minor doc typo in client api
* de9350466e Merge pull request #26871 from rallytime/bp-26852
    - 5a4c8dd2f5 Only reference msgpack if it imported successfully
* a563af29d3 Merge pull request #26851 from jacobhammons/doc-bugs
    - ac3bd47440 states/pkgrepo examples, suse installation updates Refs #26644 Refs #26638
* 5b1b934192 Merge pull request #26817 from jfindlay/grouparg
    - 82d33939f3 modify groupadd for rhel 5
* cdc0ea2fe3 Merge pull request #26824 from pravka/fix-droplet-creation-from-snapshot-in-dov2
    - 00e3192536 removing log
    - e4a82d78d9 removing stringification of every value in the image dict
    - cdc2b4584a fixing condition for slug check
* 4af6951a4c Merge pull request #26823 from joejulian/ctlfix
    - a9928cb143 pep8 fixes
    - 6108ec4280 Gated dbus for os families that use it
    - e154c7b16f remove trailing spaces
    - c1c1266cc3 fix indent change
    - 0a35320aa7 Use dbus directly
* a1749b76b8 Merge pull request #26820 from jfindlay/ctlfix
    - 3a2c0d5fbb add default param in _parse_localectl in locale mod
* ff733547c4 Merge pull request #26821 from twangboy/fix_26788
    - cf979e4877 Fixed user.rename function in windows
* c892be3255 Merge pull request #26803 from twangboy/fix_26754
    - 23576c65eb Added check for PyMySQL if MySQLdb import fails

        * 6edfa36083 Merge pull request #26815 from jfindlay/linstr
        * 2ff5823944 stringify linode id before performing str actions
- **PR** #27122: (terminalmage) Fix broken link to git-config(1) docs @ *2015-09-15 07:25:05 UTC*
    - 886e7bc234 Merge pull request #27122 from terminalmage/fix-broken-link
    - 0b212ea5b3 Fix broken link to git-config(1) docs
- **PR** #27115: (jacobhammons) Release docs @ *2015-09-14 22:19:18 UTC*
    - 551bbe70af Merge pull request #27115 from jacobhammons/release-docs
    - 42eaa80997 Restored missing css
    - 9ab642295e Fixed a release notes typo and bad file rename
    - daa3f4eee0 Updated release notes, change 2015.8 to latest release for doc site
    - d939a38c8c release notes updates
- **ISSUE** #11993: (UtahDave) salt-cloud -Q output not consistent across providers (refs: #27110)
- **PR** #27110: (rallytime) Make sure -Q output is consistent across salt-cloud drivers @ *2015-09-14 21:48:40 UTC*
    - 89c90df909 Merge pull request #27110 from rallytime/fix-11993
    - c1abc5a19f Remove implied Nones
    - 5d7d357cdd digital_ocean list_nodes function should list public and private ips like other drivers
    - 4b27aef406 Add `name' to the output of salt-cloud -Q commands, where needed, for consistency.
- **PR** #27050: (twangboy) Turned multiprocessing on @ *2015-09-14 17:34:18 UTC*
    - 860de8d877 Merge pull request #27050 from twangboy/fix_minion_conf
    - 7e35b13022 Turned multiprocessing on
- **PR** #27086: (techhat) Document develoment of SPM loader modules @ *2015-09-13 04:52:55 UTC*
    - c78d833540 Merge pull request #27086 from techhat/spmdevdocs
    - ee0c8955dd Document develoment of SPM loader modules
- **ISSUE** #23125: (bemeyert) Elasticsearch as master_job_cache throws critical (refs: #26941)
- **PR** #26941: (msteed) Make elasticsearch work as master job cache @ *2015-09-12 17:13:44 UTC*
    - 25b11759f9 Merge pull request #26941 from msteed/issue-23125
    - ff88fe402c add versionadded info to save_load() & get_load()
    - 5d2fae8a89 make master job cache index configurable
    - bc041fa4a7 Merge branch `issue-23125' of github.com:msteed/salt into issue-23125
        * 9aedc2662e issue-23125
    - 593c4d6b2f issue-23125
- **PR** #27080: (bechtoldt) [Proposal] Add Github SPM label for issues @ *2015-09-12 14:32:58 UTC*
    - b763d0ba52 Merge pull request #27080 from bechtoldt/spm_doc
    - b9e5095bf5 add GH issue label SPM to docs
- **PR** #27064: (twangboy) Fixed user docs @ *2015-09-11 22:37:19 UTC*
    - cf59a03432 Merge pull request #27064 from twangboy/user_docs

  - db03ca198e Fixed user docs

- **PR** #27072: (rallytime) Back-port #26840 to 2015.8 @ *2015-09-11 22:35:52 UTC*
  - **PR** #26840: (deuscapturus) Update http.py (refs: #27072)
  - 71c12cbf46 Merge pull request #27072 from rallytime/bp-26840
  - d0b9ececa4 Update http.py
- **PR** #27060: (cro) Fix grains breakage when hosts are not Linux, Windows, or SunOS @ *2015-09-11 17:28:49 UTC*
  - 0e7555089f Merge pull request #27060 from cro/proxy_grains_breakage
  - e697326f1b Don't check for proxy in the individual is_linux/is_windows/etc functions. This breaks too many things.
- **PR** #27051: (rallytime) Back-port #26953 to 2015.8 @ *2015-09-11 16:28:20 UTC*
  - **PR** #26953: (dsumsky) S3 ext_pillar module has broken caching mechanism (refs: #27051)
  - 8ee87b9f61 Merge pull request #27051 from rallytime/bp-26953
  - eac9d9aba9 Pylint Fix
  - 453440753c - fixed pylint warnings
  - b40dfa459e - fixed broken caching in S3 ext_pillar module (file_md5 was a list) - added debugging messages - static parameters are available as module parameters now
- **PR** #26864: (terminalmage) Only do git_pillar preflight checks on new-style git_pillar configs @ *2015-09-11 07:47:12 UTC*
  - 249f55cd8c Merge pull request #26864 from terminalmage/fix-git_pillar-tests
  - 0b5a653f7c Only do git_pillar preflight checks on new-style git_pillar configs
- **PR** #26967: (TheBigBear) new URL for windows salt downloads @ *2015-09-10 20:51:33 UTC*
  - efaedb8aea Merge pull request #26967 from TheBigBear/patch-4
  - 8d2c042cf7 new URL for windows salt downloads
- **PR** #26921: (terminalmage) Get rid of error in legacy git pillar when using branch mapping notation @ *2015-09-10 20:06:29 UTC*
  - 757d3c4eab Merge pull request #26921 from terminalmage/legacy_git_pillar_tests
  - 28e07d5d06 Get rid of error in legacy git pillar when using branch mapping notation
- **PR** #26923: (rallytime) Code clean up of cloud drivers and files @ *2015-09-10 16:37:26 UTC*
  - 68eb508e6c Merge pull request #26923 from rallytime/cloud-cleanup
  - bf33c99b08 Remove redundant parentheses
  - 5045989be7 Make sure function names comply
  - e327d9a8a4 Remove redundant parens
  - eee0291ff8 Code clean up of cloud drivers and files
- **PR** #27010: (rallytime) Back-port #26988 to 2015.8 @ *2015-09-10 16:30:30 UTC*
  - **PR** #26988: (s0undt3ch) Process *spm.d/*.conf* and add prefix root dir support to SPM directories (refs: #27010)
  - 590c46f4e3 Merge pull request #27010 from rallytime/bp-26988

  - 93b30b5ba8 Whitespace
  - 685fa911e7 Version Added for new apply_spm_config function
  - 9612a6c7ad Process *spm.d/*.conf* and add prefix root dir support to SPM directories
- **PR** #26985: (rallytime) Fix versionadded tag @ *2015-09-10 16:29:38 UTC*
  - ec185d77fa Merge pull request #26985 from rallytime/versionadded-fix
  - 79eb606cb7 Fix versionadded tag

25.2.34 Salt 2015.8.10 Release Notes

Version 2015.8.10 is a bugfix release for *2015.8.0*.

This release includes fixes for two issues discovered in *2015.8.9*:

- Pip state broken in 2015.8.9 with pip <6.0 (issue #33376)
- Fix traceback in logging for config validation (PR #33386)

Final Release of Debian 7 Packages

Regular security support for Debian 7 ended on April 25th 2016. As a result, 2016.3.1 and 2015.8.10 will be the last Salt releases for which Debian 7 packages are created.

Important Post-Upgrade Instructions for Linux Mint

As a result of some upstream changes, the `os` grain on Mint Linux is now being detected as `LinuxMint` (issue #33295). Run the following command **after you upgrade to 2015.8.10** to reset the `os` grain to `Mint` and the `os_family` grain to `Debian`:

```
salt -G 'os:LinuxMint' grains.setvals "{'os': 'Mint', 'os_family': 'Debian'}"
```

Changelog for v2015.8.9..v2015.8.10

Generated at: 2018-05-28 00:51:57 UTC

- c3d2c4eaae Fix traceback in logging for config validation (#33386)
- 2a060ea1e8 restore whitespace
- aa1f45d664 blast, put the try/except int he right place
- be1a7659a3 maintain the fallabck because I am totally sick of this crap

25.2.35 Salt 2015.8.11 Release Notes

Version 2015.8.11 is a bugfix release for *2015.8.0*.

Ubuntu 16.04 Packages

SaltStack is now providing official Salt 2015.8 packages for Ubuntu 16.04.

Returner Changes

- Any returner which implements a `save_load` function is now required to accept a `minions` keyword argument. All returners which ship with Salt have been modified to do so.

New Master Configuration Parameter

- *`rotate_aes_key`* - if `True`, causes Salt to generate a new AES key whenever a minion key is deleted. This eliminates the chance that a deleted minion could continue to eavesdrop on communications with the master if it continues to run after its key is deleted.

Changelog for v2015.8.10..v2015.8.11

  - ed59113e94 Change network state integration test to use test=True
- **PR** #34617: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ *2016-07-12 20:11:40 UTC*
  - 9f123543e5 Merge pull request #34617 from rallytime/merge-2015.8
  - 3026df346f Merge branch `2015.5' into `2015.8'
  - 57df38e685 Update github IP for ssh state integration tests (#34592)
  - 2e1007254b Avoid circular imports when calling salt.utils functions (#34584)
- **ISSUE** #33649: (tyhunt99) 2016.3.0 dockerng state fails comparing cmd configuration (refs: #saltstack/salt`#33851`_, #33851)
  - **PR** saltstack/salt#33851: (ticosax) [dockerng] Add support for edge case when *Cmd* and *Entrypoint* can't be blanked (refs: #34593)
  - **PR** #34593: (rallytime) Back-port #33851 to 2015.8
  - **PR** #33851: (ticosax) [dockerng] Add support for edge case when *Cmd* and *Entrypoint* can't be blanked (refs: #34593)
  - **PR** #34590: (oeuftete) [2015.8] dockerng: When sorting list actual_data, make it a list
  - **PR** #34591: (justinta) Gate docker unit test to check for docker
  - **PR** #34560: (terminalmage) Add a bunch of documentation on getting files from other environments
- **ISSUE** #34397: (jaredhanson11) ignore_epoch needs to be passed through to version_cmp functions (refs: #34531)
- **PR** #34531: (terminalmage) Support ignore_epoch argument in version comparisons @ *2016-07-08 16:43:36 UTC*
  - 91e0656d44 Merge pull request #34531 from terminalmage/issue34397
  - d0fec1b8f6 salt/modules/zypper.py: accept ignore_epoch argument
  - 5ae9463c1f salt/modules/yumpkg.py: accept ignore_epoch argument
  - c2791117af salt/modules/rpm.py: accept ignore_epoch argument
  - c5de8b880d salt/modules/ebuild.py: accept ignore_epoch argument
  - 4ee8e8f037 salt/modules/aptpkg.py: accept ignore_epoch argument
  - 5b123b403c Pass ignore_epoch to salt.utils.compare_versions()
  - 07368fac40 Accept ignore_epoch argument for salt.utils.compare_versions()
- **PR** #34545: (terminalmage) Handle cases where Docker Remote API returns an empty ExecutionDriver @ *2016-07-08 16:34:30 UTC*
  - e99befad47 Merge pull request #34545 from terminalmage/docker-exec-driver
  - dd5838e242 Handle cases where Docker Remote API returns an empty ExecutionDriver

- **PR** #34546: (rallytime) Rename unit.states.boto_secgroup to unit.states.boto_secgroup_test @ *2016-07-08 16:16:42 UTC*
  - 7120d43df0 Merge pull request #34546 from rallytime/rename-boto-secgroup-test
  - f8a3622be7 Rename unit.states.boto_secgroup to unit.states.boto_secgroup_test
- **PR** #34537: (rallytime) Rename tests.unit.simple to tests.unit.simple_test @ *2016-07-08 00:08:36 UTC*
  - ca92061821 Merge pull request #34537 from rallytime/rename-simple-test
  - ceefb6e34c Rename tests.unit.simple to tests.unit.simple_test
  - **PR** #34527: (rallytime) [2015.8] Update bootstrap script to latest stable
  - **PR** #34521: (cachedout) Prevent many errors in the test suite in loader tests
  - **PR** #34507: (AAbouZaid) Fix wrong order of retention_policy_exists.
- **PR** #34518: (terminalmage) Fix pkg.latest integration test for non-LTS ubuntu @ *2016-07-07 19:29:13 UTC*
  - 685df80929 Merge pull request #34518 from terminalmage/fix-pkg.latest-test
  - 4aef44ecdf Fix pkg.latest integration test for non-LTS ubuntu
- **PR** #34513: (cachedout) Lower the log level for modules which cannot be loaded to trace @ *2016-07-07 17:00:48 UTC*
  - a516f116d1 Merge pull request #34513 from cachedout/lower_loader_log
  - 733c5d00c0 Lower the log level for modules which cannot be loaded to trace
- **PR** #34498: (rallytime) Use -O in the wget example in the bootstrap tutorial for the develop branch @ *2016-07-07 16:30:46 UTC*
  - 63f0451041 Merge pull request #34498 from rallytime/bootstrap-tutorial-doc-fix
  - 23c5739c3b Use -O in wget develop example in bootstrap tutorial
  - **PR** #34503: (rallytime) Rename some unit test files by adding _test
- **ISSUE** #34302: (ghost) Salt gitfs loads top files from all branches and tags (refs: #34505)
  - **PR** #34505: (terminalmage) Improve top file merging documentation
  - **PR** #34492: (zer0def) Gracefully handle non-XML output in GlusterFS execution module.
  - **PR** #34489: (justinta) Use skipTest for network state integration test
- **ISSUE** #34261: (vernondcole) salt.modules.dnsmasq documentation errors (refs: #34488, #34323)
  - **PR** #34488: (rallytime) Update dnsmasq.get_config docs to use correct config_file param.
- **PR** #34462: (terminalmage) Use --always when available to git describe @ *2016-07-06 03:59:33 UTC*
  - e2f576e847 Merge pull request #34462 from terminalmage/git-describe-always
  - 6ef7ee198e Restrict use of --always to git 1.5.6 and newer
  - c554b22fc8 modules/git: added --always parameter for git.describe().
- **PR** #34467: (rallytime) Back-port #34457 to 2015.8 @ *2016-07-06 03:56:58 UTC*
  - **PR** #34457: (ryan-lane) Only access key metadata if we found key metadata (refs: #34467)
  - 85f1f18239 Merge pull request #34467 from rallytime/bp-34457
  - 746883741f Only access key metadata if we found key metadata
- **PR** #34432: (twangboy) Fix file.append @ *2016-07-05 23:14:22 UTC*

  - 9e15337b74 Merge pull request #34432 from twangboy/fix_file.append
  - 13f11fddce Remove refactoring code
  - 78f7c530bb Remove unit tests, integration tests written
  - b83392edea Remove len() in favor of boolean test
  - 4373408163 Fix line error
  - 2479b53e2f Fix erroneous report on newline code
  - 75b6ed1fd5 Change back to binary read
  - 65753cff6d Use os.linesep instead of n
  - a55d63f086 Fix object names
  - 3e2fe12e5e Add new line if missing
  - 0b7821c8db Fix file.append state
- **PR** #34429: (terminalmage) Skip version checking for targeted packages in pkg.latest state @ *2016-07-05 17:50:41 UTC*
  - 91e095bb41 Merge pull request #34429 from terminalmage/pkg-latest-versioncheck
  - 667f31a72a Skip version checking for targeted packages in pkg.latest state
  - **PR** #34455: (cro) Forgot reference to inotify
- **PR** #34451: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ *2016-07-05 15:57:54 UTC*
  - 7bb0868c66 Merge pull request #34451 from rallytime/merge-2015.8
  - 55a91e22be Merge branch `2015.5' into `2015.8'
  - 8c72ee56e4 Merge pull request #34435 from cachedout/backport_config_dir_integration
    * 0e2c71a537 Backport change to integraiton test suite
- **ISSUE** #34390: (mgresser) Use rpmdev-vercmp to determine correct version of rpms in CentOS5 (refs: #34401)
- **PR** #34401: (terminalmage) Use rpmdev-vercmp as a fallback for version comparison on RHEL5 @ *2016-07-01 17:42:24 UTC*
  - e65d1ae374 Merge pull request #34401 from terminalmage/rpm-version_cmp
  - 7cefd4182d Use rpmdev-vercmp as a fallback for version comparison on RHEL5
- **PR** #34366: (steverweber) Update service.py @ *2016-07-01 17:40:31 UTC*
  - 5ddf417432 Merge pull request #34366 from steverweber/fix_servicerestart
  - 7847c39024 Update service.py
- **PR** #34426: (cro) Document that inotify is Linux only @ *2016-07-01 17:04:38 UTC*
  - 485454febb Merge pull request #34426 from cro/inotify-linux-only
  - 54a02f25ba Document that inotify is Linux only
- **PR** #34392: (cro) Clarify that salt-cloud doesn't get installed by bootstrap @ *2016-06-30 18:16:23 UTC*
  - fe18bbb527 Merge pull request #34392 from cro/salt-cloud-doc-clarify
  - 6cce575d40 Clarify that salt-cloud doesn't get installed by bootstrap
- **PR** #34373: (justinta) Network state integration test @ *2016-06-30 15:05:44 UTC*
  - 45b8fb10d7 Merge pull request #34373 from jtand/network_state_integration_test

  - 1d24053e36 network.system sls file
  - 4a9e6af542 network.routes sls file
  - 76c90b2ef6 network.managed sls file
  - 84a36369fa Added network state integration test
  - **PR** #34377: (terminalmage) Optimize pkg integration tests and add a couple new tests
- **PR** #34368: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ *2016-06-29 17:54:49 UTC*
  - af8ef1e461 Merge pull request #34368 from rallytime/merge-2015.8
  - 3bce0cb510 Merge branch `2015.5' into `2015.8'
  - 970aaa46d4 Merge pull request #34252 from gtmanfred/2015.5
    * 82183f1572 return list of nodes for lxc driver when called directly
  - **PR** #34344: (rallytime) Back-port #34324 to 2015.8
  - **PR** #34324: (cachedout) Test custom grains matcher (refs: #34344)
- **ISSUE** #33674: (edgan) salt-ssh returns a zero code on jinja template failure. (refs: #34316)
- **ISSUE** #28300: (srkunze) [salt-ssh] Does not return non-zero exit code (refs: #34316)
  - **PR** #34342: (rallytime) Back-port #34316 to 2015.8
  - **PR** #34316: (edgan) Making salt-ssh pass proper return codes for jinja rendering errors (refs: #34342)
  - **PR** #34339: (terminalmage) Revert py3modernize lint changes
- **PR** #34306: (ghedo) Fix iptables.flush state: Do not force `filter' table when flushing @ *2016-06-28 19:03:14 UTC*
  - 046bdaa9f2 Merge pull request #34306 from ghedo/iptables_flush_table
  - 882c6c9c86 Do not force `filter' table when flushing
- **ISSUE** #34261: (vernondcole) salt.modules.dnsmasq documentation errors (refs: #34488, #34323)

- **ISSUE** #33694: (hjc) Document That Local Files Can Be Used as a Source for File States (refs: #34323)
  - **PR** #34323: (jacobhammons) Doc clarifications to file modules, addition of new *profile* log lev...
  - **PR** #34325: (terminalmage) Remove unnecessarily-disabled sanity check
- **PR** #34335: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ *2016-06-28 15:07:15 UTC*
  - c5890a0eca Merge pull request #34335 from rallytime/merge-2015.8
  - 2296587536 Merge branch `2015.5' into `2015.8'
  - 6cce545d92 Merge pull request #34313 from rallytime/bootstrap-2015.5
    * c7db73be92 [2015.5] Update to latest bootstrap script v2016.06.27
  - **PR** #34319: (rallytime) Back-port #34244 to 2015.8
  - **PR** #34244: (the-glu) Typo in dockerio doc (refs: #34319)
- **PR** #34312: (rallytime) [2015.8] Update to latest bootstrap script v2016.06.27 @ *2016-06-27 18:59:59 UTC*
  - dd4c937009 Merge pull request #34312 from rallytime/bootstrap-2015.8

  - 944a393f89 [2015.8] Update to latest bootstrap script v2016.06.27
- **PR** #34307: (rallytime) Fix test example in integration testing docs @ *2016-06-27 17:41:24 UTC*
  - 91703d2dc4 Merge pull request #34307 from rallytime/fix-test-example
  - f44a0543fe Fix test example in integration testing docs
- **PR** #34233: (thegoodduke) ipset: fix the comment containing blank @ *2016-06-24 19:28:34 UTC*
  - d235b1245b Merge pull request #34233 from thegoodduke/for_2015.8_ipset
  - 4da5e35bf4 ipset: fix the comment containing blank
- **ISSUE** #34037: (bobrik) salt-call ignores --config-dir resulting in failing gpg renderer (refs: #34257)
- **PR** #34257: (rallytime) Use `config_dir' setting instead of CONFIG_DIR in gpg renderer @ *2016-06-24 17:25:04 UTC*
  - 65c5675a3f Merge pull request #34257 from rallytime/fix-34037
  - d7a5e9b10e Remove test that doesn't actually test anything
  - c4c037d600 Use `config_dir' setting instead of CONFIG_DIR in gpg renderer
- **ISSUE** #34273: (clinta) file.recurse does not properly cache files, adds a pipe to path (refs: #34274)
- **PR** #34274: (clinta) Don't escape source before calling managed @ *2016-06-24 17:23:35 UTC*
  - 203870f147 Merge pull request #34274 from clinta/2015.8
  - 6572454918 Don't escape source before calling managed
- **PR** #34258: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ *2016-06-24 14:27:06 UTC*
  - a59dc85a15 Merge pull request #34258 from rallytime/merge-2015.8
  - ea914b67cd Merge branch `2015.5' into `2015.8'
  - 8d5ed91980 Merge pull request #34225 from richardscollin/fix-win-set-datetime
    * 6286771ef7 Fix win_system.set_system_date_time
  - cb1e8bf082 Merge pull request #34232 from thegoodduke/for_2015.5_ipset
    * 344eb60762 ipset: fix commont containing blank
- **ISSUE** #33873: (hrumph) refresh: True not working with pkg.installed state (refs: #34093)
- **PR** #34093: (terminalmage) Catch CommandExecutionError in pkg states @ *2016-06-23 21:00:13 UTC*
  - 92962957c8 Merge pull request #34093 from terminalmage/issue33873
  - 5edb45d746 win_pkg: refresh pkg database if refresh=True passed to version() or list_pkgs()
  - 0078adee35 Catch CommandExecutionError in pkg states
- **PR** #34136: (meaksh) Fixed behavior for SUSE OS grains in 2015.8 @ *2016-06-23 20:24:58 UTC*
  - **PR** #34134: (meaksh) Fixed behavior for SUSE OS grains in 2016.3 (refs: #34136)
  - **PR** #33903: (meaksh) Fetching grains['os'] from /etc/os-release on SUSE systems if it is possible (refs: #34134)
  - cb5399787c Merge pull request #34136 from meaksh/salt-suse-os-detection-2015.8
  - 97f1958863 some cleanup and renaming
  - 72c8e5d78f better way to check for openSUSE Leap
  - 548971bdc9 Fix for SUSE OS grains in 2015.8

- **ISSUE** #34074: (fooka03) Unable to use S3 file backend with 2016.3.1 on Ubuntu 14.04 or 16.04 (refs: #34208)
- **ISSUE** #32916: (giannello) file.managed memory usage with s3 sources (refs: #33599)
  - **PR** #34208: (lomeroe) fix regression from #33681 which causes pulling a list of s3 objects ...
  - **PR** #33681: (rallytime) Back-port #33599 to 2015.8 (refs: #34208)
  - **PR** #33599: (lomeroe) Fix s3 large file download (refs: #33681)
- **ISSUE** #34213: (terminalmage) gitfs w/pygit2 - corner case, traceback with short hexidecimal environment names (refs: #34218)
- **ISSUE** #34212: (terminalmage) gitfs: commit SHAs no longer available as fileserver environments (refs: #34218)
  - **PR** #34218: (terminalmage) Fix a pair of gitfs bugs
- **ISSUE** #34043: (rallytime) state execution stacktraces when psutil isn't installed (refs: #34182)
- **PR** #34182: (rallytime) Handle child PIDs differently depending on the availability of psutils @ *2016-06-22 19:22:06 UTC*
  - **PR** #33942: (cachedout) ZD 762 (refs: #34182)
  - 6d643cd528 Merge pull request #34182 from rallytime/fix-34043
  - b7d49c5052 Handle child PIDs differently depending on the availability of psutils
  - **PR** #34188: (terminalmage) Clarify pkg.list_repo_pkgs docstring for held packages
  - **PR** #34206: (terminalmage) Change target for dockerng assuming default status to Nitrogen release
- **PR** #34184: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ *2016-06-21 21:43:46 UTC*
  - 1c4369d093 Merge pull request #34184 from rallytime/merge-2015.8
  - 8e36e90966 Merge branch `2015.5' into `2015.8'
  - 5411ebb3b4 Merge pull request #34141 from jtand/boto_vpc_test_fix
    - b7ac6c735a Moved imports to top, out of _get_moto_version function
    - 02f9ba99ba Updated version check. Moved check into it's own function
    - d445026c56 Updated test to work with new moto version. Changed strings to unicode
- **ISSUE** #33972: (morganwillcock) 2016.3.1 breaks diskusage beacon (refs: #34176, #34103)
- **PR** #34176: (rallytime) Back-port #34103 to 2015.8 @ *2016-06-21 20:01:46 UTC*
  - **PR** #34103: (morganwillcock) Fix diskusage beacon (refs: #34176)
  - **PR** #33474: (cachedout) Fix diskusage beacon (refs: #34103)
  - c059d6c08c Merge pull request #34176 from rallytime/bp-34103
  - 2e5e7ed03c Fix diskusage beacon
- **ISSUE** #34114: (onorua) can't read PID from lock file due to exception if gitfs_global_lock is enabled (refs: #34179)
- **PR** #34179: (terminalmage) Raise the correct exception when gitfs lockfile is empty @ *2016-06-21 20:00:59 UTC*
  - 5cbaaed167 Merge pull request #34179 from terminalmage/issue34114
  - 86d1b8e864 Raise the correct exception when gitfs lockfile is empty
- **PR** #34178: (terminalmage) Remove unnecesssary comment @ *2016-06-21 19:15:37 UTC*

  - 67deded119 Merge pull request #34178 from terminalmage/remove-comment
  - 4965be72b1 Remove unnecesssary comment
  - **PR** #34165: (mcalmer) fix salt --summary to count not responding minions correctly
  - **PR** #34175: (rallytime) Back-port #34128 to 2015.8
  - **PR** #34128: (bebehei) doc: add missing dot (refs: #34175)
  - **PR** #34174: (rallytime) Back-port #34066 to 2015.8
  - **PR** #34066: (complexsplit) Typo fix (refs: #34174)
- **PR** #34077: (rallytime) Add some grains targeting tests @ *2016-06-21 16:06:30 UTC*
  - 3669048654 Merge pull request #34077 from rallytime/grains-tests
  - 2199bb8a78 Add integration tests for grains.append
  - 37cfe70724 Add some grains targeting tests
- **PR** #34142: (isbm) Move log message from INFO to DEBUG. @ *2016-06-20 18:57:34 UTC*
  - 65fba5b4d7 Merge pull request #34142 from isbm/isbm-getid-loglevel-shift
  - 236a67b702 Move log message from INFO to DEBUG.
  - **PR** #34100: (terminalmage) Update documentation on ``refresh'' behavior in pkg states
  - **PR** #34072: (jfindlay) modules.pkg int tests: skip refresh_db upon error
- **PR** #34069: (rallytime) Add a test to check for disconnected minion messaging @ *2016-06-16 21:18:38 UTC*
  - 1b76de1557 Merge pull request #34069 from rallytime/test-minion-return-message
  - 60561ac6fc Add a test to check for disconnected minion messaging
- **ISSUE** #30100: (armooo) Masterless gitfs performance (refs: #34048)
- **PR** #34048: (terminalmage) RFC: proposed fix for multiple fileserver updates in masterless runs @ *2016-06-16 21:10:59 UTC*
  - 3119693dac Merge pull request #34048 from terminalmage/issue30100
  - 715e7af8a4 Ensure only one fileserver update in a masterless run
- **PR** #34011: (rallytime) Back-port #33948 and #34009 to 2015.8 @ *2016-06-16 15:41:02 UTC*
  - **PR** #34009: (rallytime) Back-port #33948 to 2016.3 + add log message (refs: #34011)
  - **PR** #33948: (cachedout) Save an entire minion cache traversal on each master pub (refs: #34011, #34009)
  - dd03024931 Merge pull request #34011 from rallytime/bp-33948-2015.8
  - a4660d1ff7 Warn when custom returners don't have minions kwarg in save_load
  - 78befde62f Add note to release notes about returner minions kwarg change
  - 4e7f35fa36 Fix loop over cache in auth checking!
  - 06963e0505 Save an entire minion cache traversal on each master pub
  - **PR** #34051: (tegbert) Fixed a bug in the consul.py module that was preventing services
- **PR** #34045: (jacobhammons) Updated latest release version @ *2016-06-15 19:22:43 UTC*
  - 8ba117c7f6 Merge pull request #34045 from jacobhammons/release-prev
  - 43b4a12aa2 Updated latest release version

  - **PR** #34020: (twangboy) Always make changes to minion config if set (2015.8)
  - **PR** #34030: (vutny) More YAML indentation fixes in state module examples
  - **PR** #34003: (vutny) states.file: fix indentation in YAML examples (refs: #34030)
- **PR** #34018: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ *2016-06-14 22:53:19 UTC*
  - 5b5eae4ca9 Merge pull request #34018 from rallytime/merge-2015.8
  - 77f44f3087 Merge branch `2015.5' into `2015.8'
  - 871f7966ce Lint fix for #34000 (#34005)
  - f758e42172 Fix incorrectly written test (#34000)
  - cf6281b4cf Add loader.utils() example to calling minion_mods (#33953)
  - 6b98e8a9ea Merge pull request #33880 from terminalmage/zh744
    * ea726d11c8 pkg.uptodate: Pass kwargs to pkg.list_upgrades
    * de90b35d2b salt/modules/zypper.py: add fromrepo support to list_upgrades
    * 35fbb06df5 salt/modules/win_pkg.py: add kwargs to list_upgrades
    * bf5505f425 salt/modules/solarisips.py: add kwargs to list_upgrades
    * 6e89a8be98 salt/modules/pkgutil.py: add kwargs to list_upgrades
    * 5179dbcec4 salt/modules/pacman.py: add kwargs to list_upgrades
    * 46e5a52784 salt/modules/macports.py: add kwargs to list_upgrades
    * 76143b76ca salt/modules/ebuild.py: add kwargs to list_upgrades
    * b40fc9bc62 salt/modules/brew.py: add kwargs to list_upgrades
    * 4f11c16d86 salt/modules/aptpkg.py: add fromrepo support to list_upgrades
  - cb88960ed1 Merge pull request #33904 from rallytime/bp-33806
    * 638ccf501d Work around upstream cherrypy bug
  - **PR** #34003: (vutny) states.file: fix indentation in YAML examples (refs: #34030)
- **ISSUE** #20809: (lorengordon) Function pam.read_file is not available? (refs: #34002)
  - **PR** #34002: (lorengordon) Remove loader test for pam module
- **PR** #33990: (jacobhammons) Adds links to several current Salt-related projects @ *2016-06-14 01:15:20 UTC*
  - c4dab6a074 Merge pull request #33990 from jacobhammons/community-projects
  - b20213fd79 Adds links to several current Salt-related projects Removes the salt_projects.rst file which hasn't been updated in a long time, this is replaced by the updated topics/projects/index.rst file Adds a note about Salt Pack to the installation doc
- **PR** #33983: (twangboy) Clarify the *account_exists* parameter @ *2016-06-14 01:11:48 UTC*
  - 444c15792c Merge pull request #33983 from twangboy/fix_docs_join_domain
  - b057be04b4 Fix typo, more documentation
  - d8c2f3e57a Clarify the *account_exists* parameter
- **PR** #33951: (jfindlay) modules.gem int tests: more fixes @ *2016-06-14 00:46:43 UTC*
  - 9bd2317992 Merge pull request #33951 from jfindlay/gem_tests
  - 2eb633ccad modules.gem int tests: only check known installed gems

  - 9f3e18b037 modules.gem int tests: (un)install a non-core gem
- **PR** #33984: (jfindlay) Add docs and tests to disk state @ *2016-06-14 00:43:38 UTC*
  - 53baae6eb1 Merge pull request #33984 from jfindlay/disk_capacity
  - 6cbe31e6c2 states.disk: rewrite unit tests
  - 82c77b533f states.disk.status: validate percent values
  - aedc4e15e5 states.disk: add documentation
- **PR** #33985: (rallytime) Write some more simple batch command tests @ *2016-06-14 00:38:05 UTC*
  - fa5efb6a69 Merge pull request #33985 from rallytime/more-batch-tests
  - 3e7ab8c7b3 Write some more simple batch command tests
  - **PR** #33684: (jfindlay) add acl unit tests
  - **PR** #33942: (cachedout) ZD 762 (refs: #34182)
- **PR** #33946: (rallytime) Back-port #33698 to 2015.8 @ *2016-06-13 15:55:22 UTC*
  - **PR** #33698: (opdude) Vsphere fixes (refs: #33946)
  - 0281d491c6 Merge pull request #33946 from rallytime/bp-33698
  - 5fdfed1cb9 Make sure we only use GetConnection if we are using a proxy salt minion
  - 1505c5724b Fix a bug with self signed certificates and creating a new VM
- **ISSUE** #33911: (xlotlu) salt-ssh + grains.filter_by Type error: filter_by() got an unexpected keyword argument `base' (refs: #33952)
- **PR** #33952: (rallytime) Add base argument to salt-ssh grains wrapper for filter_by func @ *2016-06-13 15:51:33 UTC*
  - dff3f51955 Merge pull request #33952 from rallytime/fix-33911
  - 03b7cbbd2c Add base argument to salt-ssh grains wrapper for filter_by func
  - **PR** #33962: (jacobhammons) Adds a ``Generated on <timestamp>'' line to the html footer
- **ISSUE** #29525: (apergos) master config setting ping_on_rotate is broken if minion_data_cache is disabled (refs: #33765)
  - **PR** #33765: (cachedout) Correct issue with ping on rotate with minion cache
- **PR** #33888: (jfindlay) random.org checks @ *2016-06-10 15:45:07 UTC*
  - 378dd7ca06 Merge pull request #33888 from jfindlay/random_check
  - 6acee3cc30 modules.random_org._query: only return text if present
  - 82f95429db modules.random_org unit tests: skip if random.org down
  - 1f9422e0cd utils.http.query: also except gaierror with tornado
- **ISSUE** #31499: (Reiner030) FeatureRequest: boto_elb misses connection_settings - idle_timeout (refs: #33936)
  - **PR** #33936: (rallytime) Add connecting_settings to boto_elb state attributes list
- **ISSUE** #29249: (timcharper) *salt-cloud sync_after_install: all* does not seem to sync anything at all (refs: #33917)
  - **PR** #33917: (techhat) Wait for up to a minute for sync_after_install
- **PR** #33877: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ *2016-06-09 14:50:42 UTC*

  - ef6da0be5d Merge pull request #33877 from rallytime/merge-2015.8
  - 398534a9e7 Fix ret return from merge-conflict resolution
  - b8e4706074 Merge branch `2015.5' into `2015.8'
  - cdda593c50 Merge pull request #33829 from terminalmage/update-versionchanged
    * f7028eb1c6 Update versionchanged directive
  - b8e6c144d8 Merge pull request #33833 from terminalmage/issue33645
    * 91745c2a67 Support syncing pillar modules to masterless minions
  - e061788e81 Merge pull request #33814 from terminalmage/archive-extracted-xz
    * 897a716df2 Support extraction of XZ archives in archive.extracted state
  - fa983e91cf Merge pull request #33778 from sodium-chloride/2015.5-2016-0604-1938
    * a5fb6d7a69 Fix minor docstring issues
  - b9133326c8 Merge pull request #33726 from jtand/sysmod_skip_valid_docs_glance
    * ebee8a89af glance.warn_until shouldn't be checked for a doc string
  - 137f0b19f3 Merge pull request #33611 from TargetHolding/2015.5
    * 1dd15a603b solve' TypeError: expected string or buffer' in json/decoder.py
    * eaf42ca892 solve AttributeError: `module' object has no attribute `exception'

- **ISSUE** #33810: (chiro79) locate.locate fails always (refs: #33827)
- **PR** #33827: (cachedout) Fix broken locate.locate function @ *2016-06-08 13:49:57 UTC*
  - ec09095c45 Merge pull request #33827 from cachedout/issue_33810
  - 9d36f1e474 Fix broken locate.locate function
- **PR** #33839: (cachedout) Fix another unit test stacktrace in pkg_resource @ *2016-06-08 13:32:55 UTC*
  - f7b3d0eda0 Merge pull request #33839 from cachedout/fix_pkgresource_test_stacktrace
  - 435547a747 Fix another unit test stacktrace in pkg_resource
- **PR** #33840: (cachedout) Remove matcher tests @ *2016-06-08 13:31:41 UTC*
  - 5f081ef31c Merge pull request #33840 from cachedout/remove_matcher_unit_tests
  - 6297448377 Remove matcher tests
- **PR** #33836: (cachedout) Fixing more stupid unit tests @ *2016-06-07 21:34:04 UTC*
  - cda032dab2 Merge pull request #33836 from cachedout/fix_winserver_manager_test
  - 453fb1ac91 Fixing more stupid unit tests
- **PR** #33805: (jfindlay) states.pkg int tests: skip if pkg mgr unavailable @ *2016-06-07 14:40:47 UTC*
  - 1db559afe9 Merge pull request #33805 from jfindlay/pkg_tests
  - 0c069ddc95 states.pkg int tests: skip if pkg mgr unavailable
- **PR** #33808: (jfindlay) fix some problems with the gem module integration tests @ *2016-06-07 14:40:25 UTC*
  - 3984b65486 Merge pull request #33808 from jfindlay/gem_tests
  - f7c19a1a58 modules.gem int tests: relax version checks
  - 6af47d2ba7 modules.gem int tests: remove pkgs before testing install

- **PR** #33770: (jfindlay) service state integration tests @ *2016-06-07 14:37:54 UTC*
  - c30d8a8c61 Merge pull request #33770 from jfindlay/service_tests
  - f13f914755 states.service: add integration tests
  - 90aee79c39 states.service.mod_watch: update unit test
  - d210a92f09 states.service.mod_watch: update sfun and force docs
- **PR** #33691: (justinta) Gem integration test @ *2016-06-06 11:13:23 UTC*
  - 7fdfbe9a28 Merge pull request #33691 from jtand/gem_integration_test
  - ff2dae103d ubuntu doesn't install default gems when ruby is installed
  - 504df9a65a Fixed lint error
  - 0cb1bfa0d3 Removed extra :
  - 86f59b3e80 Made more pythonic
  - 2f36f34981 Fixed salt.util import. Added status check to make sure external resource is available
  - 400a71ec33 Removed redundancies
  - 91db411bea A couple lint fixes
  - c97f3319b9 Add check for gem binary
  - 210aceb402 Refactored tests to not use return messages
  - 9d437bd45d Removed artifact from testing
  - 134e1fa888 Fixed typos, and added destructiveTest decorator
  - 37bc3ad8fd Fixed typo, uninstalled to uninstall
  - 5b23b91ac6 Integration test for gem module
- **PR** #33777: (sacren) Fix minor docstring issue of arg being missing @ *2016-06-06 10:44:59 UTC*
  - bb4194bb79 Merge pull request #33777 from sodium-chloride/2015.8-2016-0604-1939
  - c1fd830a1a Fix minor docstring issue of arg being missing
- **ISSUE** #31219: (gladiatr72) when the minions have all been destroyed... (refs: #33759)
- **PR** #33759: (cachedout) Catch no minions exception in batch mode @ *2016-06-03 21:22:49 UTC*
  - c749aea409 Merge pull request #33759 from cachedout/issue_31219
  - 15a39f8646 Catch no minions exception in batch mode
- **ISSUE** #33554: (jfindlay) local cache missing directories while running test suite (refs: #33653)
- **PR** #33719: (cachedout) Catch oserror for race condition @ *2016-06-03 17:25:26 UTC*
  - **PR** #33653: (cachedout) Create missing jid dir if it doesn't exist (refs: #33719)
  - 47d668e071 Merge pull request #33719 from cachedout/fixup_33653
  - 635efa248b Change to just surround the mkdir
  - 21b7123a60 Catch oserror for race condition
- **PR** #33712: (meaksh) Fix for groupadd execution module failures in SLES11 systems @ *2016-06-03 16:13:06 UTC*
  - 11e39e7203 Merge pull request #33712 from meaksh/fix-for-groupadd-module-failures-in-SLE11-2015.8

  - ab738416ba pylint fix
  - bf27e5d36e test_members cleanup
  - ba815dbf76 improvements on groupadd unit tests
  - 3bbc5ae0d9 one line is better
  - a53dc192c9 fix groupadd module for sles11 systems
- **PR** #33718: (rallytime) Back-port #33700 to 2015.8 @ *2016-06-03 16:10:44 UTC*
  - **PR** #33700: (sacren) Fix incorrect args passed to timezone.set_hwclock (refs: #33718)
  - 2c450a7494 Merge pull request #33718 from rallytime/bp-33700
  - a6a446121a Fix speed issue
  - a41146730a Fix incorrect args passed to timezone.set_hwclock
- **ISSUE** #33725: (terminalmage) git_pillar w/pygit2 fails to checkout a non-master branch when remote repo has no master branch (refs: #33727)
- **PR** #33727: (terminalmage) Fix git_pillar edge case for remote repos without a master branch @ *2016-06-03 16:03:59 UTC*
  - b07701f0a0 Merge pull request #33727 from terminalmage/issue33725
  - d8ba7ed5a5 Fix git_pillar edge case for remote repos without a master branch
- **PR** #33728: (jfindlay) Make *configurable_test_state* configurable in test mode @ *2016-06-03 16:02:57 UTC*
  - 015e50cec8 Merge pull request #33728 from jfindlay/test_state_test
  - 87e018af2a states.test.configurable_test_state: add unit tests
  - c2d0679c4b states.test.configurable_test_state: refactor change_data
  - f06ff1af1f states.test.configurable_test_state test mode
- **PR** #33729: (twangboy) Add exclude option to win_servermanager @ *2016-06-03 15:53:13 UTC*
  - 1cf8fe3f1d Merge pull request #33729 from twangboy/fix_win_servermanager
  - 2de91d166f Fix docstring
  - 9870479d99 Add exclude option to state
  - 50bd76e206 Add exclude option
- **ISSUE** #31816: (vutny) Deprecate or update the http://debian.saltstack.com/ (refs: #33743)
- **PR** #33743: (vutny) Debian installation docs: drop section about community-maintained repo @ *2016-06-03 15:29:45 UTC*
  - 6c150d840d Merge pull request #33743 from vutny/drop-debian-community-repo-doc
  - 8621f5be54 Debian installation docs: drop section about community-maintained repository
- **ISSUE** #33554: (jfindlay) local cache missing directories while running test suite (refs: #33653)
  - **PR** #33653: (cachedout) Create missing jid dir if it doesn't exist (refs: #33719)
- **PR** #33654: (twangboy) Fix win servermanager @ *2016-06-02 17:55:45 UTC*
  - 8a566ff4b9 Merge pull request #33654 from twangboy/fix_win_servermanager
  - 6c7b21676a Fix lint and tests
  - 4775e6bdf0 Add additional params to state

  - b0af32346d Add additional params to install and remove

- **ISSUE** #33424: (thusoy) Error logging with non-environment branches in gitfs (refs: #33679)
- **PR** #33679: (terminalmage) Only compile the template contents if they evaluate to True @ *2016-06-02 17:20:00 UTC*
  - 996ff56dd4 Merge pull request #33679 from terminalmage/issue33424
  - 9da40c4437 Append empty dictionaries for saltenvs with no top file
  - 5eb1b3ca62 Only compile the template contents if they evaluate to True
- **PR** #33685: (jfindlay) modules.cp.get_url: add test for https:// @ *2016-06-01 22:25:41 UTC*
  - c8dc70b96a Merge pull request #33685 from jfindlay/get_url_test
  - 2b5035fdc0 modules.cp.get_url: add test for https://
- **PR** #33581: (dincamihai) Call zypper refresh after adding/modifying a repository @ *2016-06-01 22:25:11 UTC*
  - 5e022ff29c Merge pull request #33581 from dincamihai/2015.8
  - 788730ea72 DRY test
  - 1d3769ccfa Improve zypper_patcher_config looks
  - 42d8d4195c Assert only gpgautoimport: True works
  - ced75e8e62 Reverse if conditions and rename variable
  - 80bfbe5c52 Reduce dicts and lists to one line where possible
  - 1d5d6d7d60 Update test method names to pass pylint
  - c7ae5907ee Call zypper refresh after adding/modifying a repository
- **ISSUE** #32916: (giannello) file.managed memory usage with s3 sources (refs: #33599)
- **PR** #33681: (rallytime) Back-port #33599 to 2015.8 (refs: #34208) @ *2016-06-01 21:14:29 UTC*
  - **PR** #33599: (lomeroe) Fix s3 large file download (refs: #33681)
  - 069ee15b7c Merge pull request #33681 from rallytime/bp-33599
  - 45143a599b use requests streaming for uploads/downloads to file (return_bin unchanged) allows downloading files larger than amount of memory (non-stream reads into memory before writing to disk or uploading)
  - 4a9b23f03f first go at having requests use streaming for get/put requests
- **ISSUE** #33393: (babilen) pip.installed does not work with ancient pip versions (refs: #33396)
- **PR** #33396: (babilen) Issue 33393 @ *2016-06-01 21:12:03 UTC*
  - 13537c4891 Merge pull request #33396 from babilen/issue-33393
  - 57e0475cd4 Make pip InstallationError import more robust
  - 291a3e21fa Remove duplicated code.
- **PR** #33652: (terminalmage) Lower the log level for failed auths @ *2016-06-01 16:37:09 UTC*
  - 7bce4ece1a Merge pull request #33652 from terminalmage/zh723
  - 411841603a Lower the log level for failed auths
- **ISSUE** #33582: (waxie) mysql module gives traceback if no working authentication (refs: #33615)

- **PR** #33615: (danslimmon) Fix crash on unconnectable MySQL server (resolves #33582) @ *2016-05-31 16:03:51 UTC*
  - 504989388a Merge pull request #33615 from danslimmon/mysql-traceback-33582
  - 180099ae9f Wrote test for broken server connection
  - c6c3ff02e3 Added some error checking to resolve #33582.
- **PR** #33558: (twangboy) Fix win servermanager @ *2016-05-27 22:05:43 UTC*
  - b47182e47c Merge pull request #33558 from twangboy/fix_win_servermanager
  - 62a6bde0ea Fix comment when already installed
  - 79bc7195dc Fix unit tests
  - 56a6f6bb83 Fix changes
  - 8ebe99ec5e Fix restart_needed
  - 6e478cbda0 Add restart needed
  - 72ebf26616 Add missing import
  - 193583be96 Use dictionary compare for changes in remove
  - 1ae7dd76c1 Use dictionary compare for changes
- **ISSUE** #33544: (tjuup) Salt 2016.3.0 (Boron) clean_old_jobs fails (refs: #33555)
- **PR** #33555: (cachedout) Fix crashing Maintenence process @ *2016-05-26 19:25:39 UTC*
  - 58d89d66e3 Merge pull request #33555 from cachedout/issue_33544
  - fe7ee7a470 Fix crashing Maintenence process
- **PR** #33501: (meaksh) unit tests for rpm.checksum() and zypper.download() @ *2016-05-26 14:34:27 UTC*
  - d052908729 Merge pull request #33501 from meaksh/zypper-download-check-signature-2015.8
  - eaaef25c79 lint issue fixed
  - 6b6febb211 unit tests for rpm.checksum() and zypper.download()
- **ISSUE** #33319: (ghost) Salt interpets jinja syntax in contents pillar (refs: #33513)
- **PR** #33513: (rallytime) Add a section to the jinja docs about escaping jinja @ *2016-05-26 14:24:58 UTC*
  - e2d0c4abb1 Merge pull request #33513 from rallytime/fix-33319
  - 81c1471209 Add a section to the jinja docs about escaping jinja
- **PR** #33520: (jacobhammons) Updated version numbers in the docs for the 2016.3.0 release @ *2016-05-26 14:15:00 UTC*
  - fabc15e616 Merge pull request #33520 from jacobhammons/release-notes.8
  - 42e358af7d Updated version numbers in the docs for the 2016.3.0 release
- **PR** #33507: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ *2016-05-25 19:14:41 UTC*
  - 5a6b037cbd Merge pull request #33507 from rallytime/merge-2015.8
  - 03b0c97520 Merge branch `2015.5' into `2015.8'
  - 6f7fda0354 Merge pull request #33486 from jtand/2015.5
    * d1e210fff8 Merge branch `2015.5' of https://github.com/saltstack/salt into 2015.5
    * ee2ae0ea8a Added docstring examples to glance.image_schema and schema_get

        * 59e90064e6 modules.swift.head does not have a body. Should not be checked for a docstring right now.
    - f72ec1479b Merge pull request #33482 from rallytime/pillar-opts-docs
        * 087564528d Add pillar_opts docs to master.rst
    - dc644b145d Merge pull request #33488 from rallytime/fix-18752
        * b0a9f4181f Add docs for the syndic_finger config
    - a4e84aa7d2 Merge pull request #33454 from scubahub/2015.5
        * df3c0b8e78 Correct (and make consistent) determination of the test flag.
    - 3a52ace673 manage account information for pam (#33473)
- **ISSUE** #15252: (gravyboat) Standalone minion docs don't explain what file is being modified. (refs: #33503)
- **PR** #33503: (rallytime) Add docs about minion config file in standalone minion docs @ *2016-05-25 17:23:08 UTC*
    - ee76be3b0b Merge pull request #33503 from rallytime/fix-15252
    - cfc07f7641 Add docs about minion config file in standalone minion docs
- **PR** #33474: (cachedout) Fix diskusage beacon (refs: #34103) @ *2016-05-25 17:10:54 UTC*
    - e9b648e461 Merge pull request #33474 from cachedout/issue_29451
    - aa2bac3a0d Remove debugging
    - 68d8050cb8 Fix diskusage beacon
- **PR** #33465: (meaksh) jobs.exit_success allow to check if a job has executed and exit successfully @ *2016-05-25 16:52:53 UTC*
    - 3bfb6bf719 Merge pull request #33465 from meaksh/check-if-job-returns-successfully-2015.8
    - 9deb70fd8e jobs.exit_success() now works parsing the results of jobs.lookup_id()
    - 7ba40c4f31 jobs.exit_success allow to check if a job has executed and exit successfully
    - **PR** saltstack/salt-jenkins#175: (justinta) Adding back shade to setup states (refs: #33487)
- **PR** #33487: (justinta) Add docstring examples to glance.py and nova.py [2015.8] @ *2016-05-25 16:47:25 UTC*
    - 70eb7b66f3 Merge pull request #33487 from jtand/glance_doc_fixes
    - 0b1cae05d9 Added docstring examples to glance methods and nova.list
    - ebf1256545 Don't need to check swift.head due to it having no body
- **ISSUE** #33423: (warden) etcd profile doesn't work when used in master conf file (refs: #33481)
- **PR** #33481: (rallytime) Fix docs about etcd config options and add pillar_opts doc (refs: #33482) @ *2016-05-25 16:41:56 UTC*
    - 56ea979916 Merge pull request #33481 from rallytime/fix-33423
    - 7fd3e8f361 Fix docs about etcd config options and add pillar_opts doc
- **ISSUE** #16319: (lsh-0) create a postgresql *query* function (refs: #33490)
- **PR** #33490: (rallytime) Document the postgres.psql_query function @ *2016-05-25 16:41:22 UTC*
    - 2394cdc4bf Merge pull request #33490 from rallytime/fix-16319
    - 0c5548f9d1 Document the postgres.psql_query function

- **PR** #33480: (jfindlay) states.service: minor doc updates @ *2016-05-25 16:38:14 UTC*
  - ede232f0f1 Merge pull request #33480 from jfindlay/service_doc
  - 29c00a1b1b states.service: clarify function description language
  - 6a9ae09e79 states.service.__virtual__: add load fail reason
  - **PR** #33483: (twangboy) Return full pending computer name (2015.8)
- **ISSUE** #32444: (justindesilets) Feature Request - jobs runner list by target (refs: #33491)
  - **PR** #33499: (cachedout) Use six.string_types in jobs runner
  - **PR** #33491: (BlaineAtAffirm) fix jobs.list_jobs failing with search_target (refs: #33499)
- **ISSUE** #32444: (justindesilets) Feature Request - jobs runner list by target (refs: #33491)
- **PR** #33491: (BlaineAtAffirm) fix jobs.list_jobs failing with search_target (refs: #33499) @ *2016-05-25 15:11:22 UTC*
  - 2e24a04565 Merge pull request #33491 from BlaineAtAffirm/2015.8
  - 7599b18995 fix jobs.list_jobs failing with search_target
- **ISSUE** #33467: (beelit94) Orchestration gives exception when a target does not exist (refs: #33478)
- **ISSUE** #32479: (ssgward) Orchestration gives exception when a target does not exist (refs: #32484, #33478)
- **PR** #33478: (rallytime) Back-port #32484 to 2015.8 @ *2016-05-24 19:14:23 UTC*
  - **PR** #32484: (cachedout) Only unsub if we have a jid (refs: #33478)
  - 1861af427e Merge pull request #33478 from rallytime/bp-32484
  - 042f17efa4 Only unsub if we have a jid
- **PR** #33457: (rallytime) Make doc formatting consistent and use correct versionadded @ *2016-05-24 17:52:34 UTC*
  - b8154b678e Merge pull request #33457 from rallytime/doc-formatting
  - 82f8f3efff Make doc formatting consistent and use correct versionadded
  - **PR** #33477: (terminalmage) Don't allow a ``repo'' kwarg for pkgrepo.managed
- **ISSUE** #29451: (githubcdr) 2015.8.3 pillar beacons bugged? (refs: #33476)
  - **PR** #33476: (cachedout) Allow for config entry to be a list in a dict for beacons
- **PR** #33469: (meaksh) check the RPM signature of zypper pkg.download packages and report errors @ *2016-05-24 16:09:05 UTC*
  - 9f56ab4c45 Merge pull request #33469 from meaksh/zypper-download-check-signature-2015.8
  - a65071a6d1 simpler rpm.checksum function
  - 80fe303e38 Renamed check_sig to checksum and some refactoring
  - d56e3f4258 bugfix: showing errors when a package download fails using zypper pkg.download
  - 8a21b9149e check the signature of downloaded RPM files
- **ISSUE** #33389: (DaveQB) Too many hostnames in pillar? (refs: #33459)
  - **PR** #33459: (rallytime) Add docs about PyYAML's 1024 character limitations for simple keys
  - **PR** #33464: (isbm) Prevent several minion processes on the same machine
  - **PR** #33432: (dincamihai) Make --gpg-auto-import-keys a global param when calling zypper

- **ISSUE** #32446: (sel-fish) " salt `*' saltutil.wheel minions.connected " not work (refs: #33414)
  - **PR** #33414: (rallytime) Fix the saltutil.wheel function and add integration tests
- **ISSUE** #29286: (harlanbarnes) Can't disable Job Cache? (refs: #33328)
  - **PR** #33440: (rallytime) Make sure the path we're removing is present first - avoid an OSError
  - **PR** #33328: (rallytime) Update job_cache and keep_jobs docs to be more specific to their behavior (refs: #33440)
- **ISSUE** #26913: (imchairmanm) manage.bootstrap runner quotation escape bug (refs: #33443)
  - **PR** #33443: (rallytime) Avoid a syntax error by using " instead of escaped `
  - **PR** #33436: (rmarcinik) Fix virtual function
- **PR** #33438: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ *2016-05-23 17:50:51 UTC*
  - 6e94a4a03b Merge pull request #33438 from rallytime/merge-2015.8
  - 7c41c34528 Merge branch `2015.5' into `2015.8'
    * 2cc650965a update 2015.5.11 release notes (#33412)
    * dc8ce2d8b1 Fix traceback in logging for config validation (#33386) (#33405)
- **ISSUE** #33395: (fmnisme) salt doc error (refs: #33421)
  - **PR** #33421: (abednarik) Documentation update in file.serialize.
  - **PR** #33398: (lvg01) Fix LVM parameter devices as a pure list. Comma seperated lists are c...
  - **PR** #33406: (rallytime) Back-port #33387 to 2015.8
  - **PR** #33387: (tveastman) Spelling correction. (refs: #33406)
- **ISSUE** #33298: (lorengordon) Windows: pkg.install returns failed for msiexec/instmsi exit code 3010 (ERROR_SUCCESS_REBOOT_REQUIRED) (refs: #33321)
  - **PR** #33321: (lorengordon) Update windows pkg.[install|remove] error logic
- **ISSUE** #29252: (mitar) reload_modules is not documented for the pkg state (refs: #33374)
  - **PR** #33374: (rallytime) Add note about reload_modules functionality for pkg.installed
- **ISSUE** #31430: (The-Loeki) Salt Coding Style regarding absolute_imports (refs: #33377)
  - **PR** #33377: (rallytime) Add note to absolute_imports practice about __future__ import
- **ISSUE** #21720: (kaithar) Revisiting aliases.file option. (refs: #33380)
  - **PR** #33380: (rallytime) Document how to set the alias file location for alias state
- **PR** #33403: (jacobhammons) 2015.8.10 release notes @ *2016-05-20 16:02:50 UTC*
  - 3c9def310c Merge pull request #33403 from jacobhammons/dot10
  - e850c298a9 2015.8.10 release notes
- **PR** #33381: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ *2016-05-20 15:58:11 UTC*
  - 91059224f6 Merge pull request #33381 from rallytime/merge-2015.8
  - 5aec32b20f Merge branch `2015.5' into `2015.8'
    * d15f5e2cef Merge pull request #33383 from thatch45/2015.5
      · f5ebcba21c restore whitespace
      · 1d8b289db1 blast, put the try/except int he right place

            · 081e6c5b83 maintain the fallabck because I am totally sick of this crap

        * 755acfb97e Improve doc clarity for disable_modules documentation (#33379)

    – 8ef7697806 Merge branch `2015.5' into `2015.8'

        * 2b5ad128bf Better YAML syntax error handling (#33375)

        * bb3e98cad2 Merge pull request #33372 from jacobhammons/release-update

            · 5ce502160b revved 2015.8 branch to .9 in version selector

    – **PR** #33386: (terminalmage) Fix traceback in logging for config validation (refs: #33405)

- **ISSUE** #27737: (mpaolini) name param never mentioned in pillar_ext git documentation (refs: #33369)
    – **PR** #33369: (rallytime) Add note about name parameter in git_pillar docs
- **ISSUE** #32913: (hrumph) Possible problem with salt.states.pkg.installed documentation (refs: #33362)
    – **PR** #33362: (rallytime) Add win_pkg to list of modules that support ``version'' in pkg.installed
- **ISSUE** #27779: (jbouse) [Doc] Hipchat returner documentation update (refs: #33365)
    – **PR** #33365: (rallytime) Add note to docs about api settings for Hipchat API v2
    – **PR** saltstack/salt-bootstrap#828: (vutny) Fix bootstrapping from git on Debian 8 by installing latest *tornado* via pip (refs: #32857)
    – **PR** #820: (dcolish) Refactor of cli parsers, normalize around conf_file (refs: #`saltstack/salt-bootstrap#828`_)
    – **PR** #32857: (vutny) Add initscripts, SystemD service units and environment files for Debian
- **PR** #33370: (jacobhammons) Update docs version to 2015.8.9 @ *2016-05-19 19:59:15 UTC*
    – 80f52a658e Merge pull request #33370 from jacobhammons/2015.8.9
    – 146b4df6be Updates docs version to 2015.8.9 Adds note regarding the os grain on Mint Linux Adds an FAQ regarding grains that change due to upstream changes
- **PR** #33366: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ *2016-05-19 19:41:40 UTC*
    – 3e5689abbf Merge pull request #33366 from rallytime/merge-2015.8
    – 52b3128678 Merge branch `2015.5' into `2015.8'
    – 55be0abf4d Expanded documentation for boto_elb state and module (#33341)
- **ISSUE** #33313: (morganwillcock) pkg.py: pkgs parameter documented as not supported on Windows (refs: #33361)
- **ISSUE** #3313: (mou) If no fileserver backend initialized there should be warning or error message on performing various file operations (refs: #33361)
    – **PR** #33361: (rallytime) Remove mentions of windows not supporting pkgs param
- **ISSUE** #29286: (harlanbarnes) Can't disable Job Cache? (refs: #33328)
    – **PR** #33328: (rallytime) Update job_cache and keep_jobs docs to be more specific to their behavior (refs: #33440)
- **ISSUE** #33295: (andrew-vant) Linux Mint service module not correctly detected. (refs: #33359)
    – **PR** #33359: (terminalmage) Properly detect newer Linux Mint distros
- **ISSUE** #32260: (jagguli) git.latest UnboundLocalError: local variable `desired_upstream' referenced before assignmen (refs: #33340)

  - **PR** #33340: (terminalmage) Fix UnboundLocalError in git.latest
  - **PR** #33339: (phistrom) states.boto_elb Describe parameters in register_instances function
  - **PR** #33347: (rallytime) Fix some link errors in the test writing tutorial
  - **PR** #33312: (twangboy) Fix network.managed for windows
  - **PR** #33327: (cro) Bp 28467 calm mine
  - **PR** #28467: (jodv) Make mine.update more manageable for large environments (refs: #33327)
  - **PR** #33334: (jfindlay) import ps from psutil_compat in beacons
- **ISSUE** #21520: (jfindlay) sudo.salt_call is broken (refs: #25089)
  - **PR** #33318: (jfindlay) remove redundant, incorrect sudo_runas config documentation
  - **PR** #25089: (jfindlay) fix minion sudo (refs: #33318)
  - **PR** #22480: (thatch45) Add sudo user docs into salt (refs: #33318)
  - **PR** #20226: (thatch45) Allow sudo priv escalation (refs: #25089, #33318)
- **ISSUE** #33323: (terminalmage) Overeager globbing in systemd.py for sysv service detection (refs: #33324)
  - **PR** #33324: (terminalmage) Disambiguate non-exact matches when checking if sysv service is enabled
- **ISSUE** #30130: (dreampuf) Non-root minion not work with state.sls module (refs: #33325)
  - **PR** #33325: (cachedout) Allow concurrency mode in state runs if using sudo
- **ISSUE** #29674: (jakehilton) Salt Master Hang (refs: #33333)
  - **PR** #33333: (DmitryKuzmenko) Fix master hanging after a request from minion with removed key.
- **ISSUE** #33266: (Timandes) Method *grains.items* returns unexpected *manufacturer* information (refs: #33302)
  - **PR** #33306: (rallytime) Back-port #33302 to 2015.8
  - **PR** #33302: (The-Loeki) Cleanup comments in smbios.get output (fixes #33266) (refs: #33306)
- **ISSUE** #23643: (falzm) Error in iptables module: argument --match-set: expected 2 argument(s) (refs: #33314, #33301, #28325)
  - **PR** #33314: (gerhardqux) Fix iptables --match-set (#23643)
  - **PR** #33301: (gerhardqux) Fix iptables --match-set (#23643) (refs: #33314)
  - **PR** #28325: (l13t) Fix issue wiith --match-set option. #23643 (refs: #33314)
- **PR** #33308: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ *2016-05-17 19:26:05 UTC*
  - d0ed1616b0 Merge pull request #33308 from rallytime/merge-2015.8
  - 1c43a62f85 Merge branch `2015.5' into `2015.8'
    * 9b42a05519 Added some more docs for master and minion config settings (#33292)
  - 5004d2fa61 Merge branch `2015.5' into `2015.8'
  - 8acee5e06c Fix iptables --match-set (#23643) (#33301)
  - 757ef20a31 fix ``loose'' typo (#33290)
  - b7d98da64d Add auth_tries config option to minion.rst docs (#33287)
  - 061851bcbf Document minion_id_caching config value (#33282)

25.2.36 Salt 2015.8.12 Release Notes

Version 2015.8.12 is a bugfix release for *2015.8.0*.

Statistics

- Total Merges: **58**
- Total Issue References: **43**
- Total PR References: **117**
- Contributors: **29** (Azidburn, Ch3LL, UtahDave, bobrik, cachedout, cedwards, deepakhj, dere, gongled, gtmanfred, hrumph, hu-dabao, isbm, jacobhammons, jfindlay, jmesquita, junovitch, justinta, kev009, martinhoefling, multani, rallytime, randomed, sjorge, terminalmage, thatch45, theothergraham, twangboy, whiteinge)

Changelog for v2015.8.11..v2015.8.12

Generated at: 2018-05-28 01:19:12 UTC

- **PR** #35614: (rallytime) Update release notes for 2015.8.12
- **PR** #35611: (rallytime) Everything in the sample master config file should be commented out
- **ISSUE** #35384: (ghost) The unless requisite stops at first successful command (refs: #35569)
  - **PR** saltstack/salt#35545: (hu-dabao) fix-35384, fix cmd.run unless (refs: #35566)
- **PR** #35569: (rallytime) Write test for multiple unless commands where 1st cmd passes and 2nd fails @ *2016-08-19 19:28:01 UTC*
  - **PR** #35566: (rallytime) Back-port #35545 to 2015.8 (refs: #35569)
  - **PR** #35545: (hu-dabao) fix-35384, fix cmd.run unless (refs: #35569, #35566)
  - c9070c212f Merge pull request #35569 from rallytime/test-for-35384
  - 30f42d5352 Write test for multiple unless commands where 1st cmd passes and 2nd fails
  - **PR** #35600: (rallytime) Update release notes for 2015.8.12
  - **PR** #35599: (rallytime) Update release notes for 2015.8.12
  - **PR** #35584: (terminalmage) Update linux_sysctl tests to reflect new context key
  - **PR** #35575: (terminalmage) Add warning about AWS flagging of nmap usage
- **PR** #35577: (terminalmage) Unit file changes for 2015.8.12, 2016.3.3 @ *2016-08-18 20:36:25 UTC*
  - 26a7f7d9f7 Merge pull request #35577 from terminalmage/unit-file-changes
  - 6cb0fb47f3 pkg/salt-syndic.service: change Type to notify
  - 175ba99e0e pkg/salt-minion.service: remove KillMode, change Type to notify
  - 540ec28954 pkg/salt-master.service: remove KillMode
  - 69fad464ab pkg/salt-api.service: change Type to notify
  - **PR** saltstack/salt#35545: (hu-dabao) fix-35384, fix cmd.run unless (refs: #35566)
  - **PR** #35566: (rallytime) Back-port #35545 to 2015.8 (refs: #35569)
  - **PR** #35545: (hu-dabao) fix-35384, fix cmd.run unless (refs: #35569, #35566)

    - **PR** #35492: (terminalmage) Clarify config.get docstring
- **ISSUE** saltstack/salt#18419: (jasonrm) salt-cloud fails to run as non-root user (refs: #35483)
- **ISSUE** #34806: (jerrykan) salt-cloud ignores sock_dir when firing event (refs: #35483)
- **PR** #35483: (gtmanfred) use __utils__ in salt.cloud @ *2016-08-18 13:32:22 UTC*
    - 205d8e2e7b Merge pull request #35483 from gtmanfred/2015.8
    - 2d8ec1e9db use __opts__ in salt.utils.cloud for cache functions
- **PR** #35546: (whiteinge) Salt api eauth fail gracefully @ *2016-08-18 07:21:55 UTC*
    - 70fa2d0901 Merge pull request #35546 from whiteinge/salt-api-eauth-fail-gracefully
    - eb3574adae Don't fail hard if the user's permissions cannot be found
    - ec597bd54c Change groups check in token to look for truthy values
    - **PR** #35525: (UtahDave) add missing glob import
    - **PR** #35540: (rallytime) Whitespace fix for 2015.8
- **ISSUE** #33803: (dmurphy18) systemd notification is not fully supported by Salt (refs: #35510)
- **ISSUE** #33516: (Ch3LL) When upgrading from 2015.8.10 to 2016.3.0 on centos7/redhat7 I have to restart the salt-minion twice (refs: #35510)
- **PR** #35510: (terminalmage) Better systemd integration @ *2016-08-17 18:54:11 UTC*
    - fd3274c800 Merge pull request #35510 from terminalmage/issue33516
    - 5b5f19d269 Update zypper unit test to reflect call to config.get
    - 2730edb516 Add note about systemd-run usage in package states
    - e2d9e87e10 salt/modules/systemd.py: Use systemd-run --scope where needed
    - 22919a25bc Notify systemd on salt-api start
    - a40b3f8a08 Notify systemd on syndic start
    - e847d3af30 Notify systemd on minion start
    - d648887afc salt/modules/zypper.py: Use systemd-run --scope where needed
    - 2e17976722 salt/modules/yumpkg.py: Use systemd-run --scope where needed
    - 86b59c1e74 salt/modules/pacman.py: Use systemd-run --scope where needed
    - e32d92c6d5 salt/modules/ebuild.py: Use systemd-run --scope where needed
    - c7d21d3ae3 salt/modules/aptpkg.py: Use systemd-run --scope where needed
    - f83e0ef242 Add unit tests for salt.utils.systemd
    - 5b12f030c6 Add func to salt.utils.systemd to tell if scopes are available
    - **PR** #35513: (cachedout) Might be a good idea to be able to download the software we make
- **PR** #35302: (Ch3LL) Add job cache test @ *2016-08-17 10:45:28 UTC*
    - 9f87081cef Merge pull request #35302 from Ch3LL/add_job_cache_test
    - ccb2a5cadf remove unused imports
    - 512ae81dfd remove TMP and add integration.TMP
    - c9b7c3cf80 need to add returners option in other places

  - 7316df7a02 fix pylint
  - 50a4f0fe6a fix comment
  - 6837acf742 add job cache integration tests
- **PR** #35512: (cachedout) Fixup 35419 @ *2016-08-17 10:11:17 UTC*
  - 1c82c6bee5 Merge pull request #35512 from cachedout/fixup_35419
  - 253662541a Fix import
  - f16a30786b Fixes consul.agent_service_register which was broken for registering service checks.
- **PR** #35497: (deepakhj) Fixes spacing in requirements files @ *2016-08-17 09:34:15 UTC*
  - e1a373fa4c Merge pull request #35497 from deepakhj/2015.8
  - 685db4ab88 Fix spacing
- **PR** #35508: (terminalmage) Add Carbon to versionadded for git.diff @ *2016-08-17 06:17:12 UTC*
  - 4048255ed6 Merge pull request #35508 from terminalmage/update-docstring
  - 67c945fce0 Add Carbon to versionadded for git.diff
  - **PR** #35486: (rallytime) Update bootstrap script to latest stable (2016.08.16)
- **ISSUE** #35296: (szjur) cp.push_dir gets confused when using upload_path and is probably insecure too (refs: #35413)
- **PR** #35413: (cachedout) Resolve path issues with cp.push @ *2016-08-16 16:40:39 UTC*
  - 240fc12863 Merge pull request #35413 from cachedout/issue_35296
  - fb8a12d677 Fix silly error
  - 3646cf1afa Additional checks on master and integration test
  - 09efde7634 Splat the list into os.path.join
  - fc0d5878bc Set file_recv on test master
  - 81c4d136c5 Transition file push paths to lists
- **ISSUE** saltstack/salt#35380: (anlutro) salt-ssh with sudo stopped working (refs: #35476)
- **PR** #35476: (cachedout) Fixup SSH bug where sudo without sudo user would break @ *2016-08-16 15:41:25 UTC*
  - c3319b2a8b Merge pull request #35476 from cachedout/issue_35380
  - c05fcf33d1 Fixup SSH bug where sudo without sudo user would break
- **PR** #35471: (terminalmage) win_pkg: Fix traceback when package is not installed @ *2016-08-16 02:02:00 UTC*
  - 004778c966 Merge pull request #35471 from terminalmage/issue34479
  - e243c63e43 win_pkg: Fix traceback when package is not installed
- **PR** #35448: (isbm) Add ignore_repo_failure option to suppress zypper's exit code 106 on ... @ *2016-08-16 01:39:43 UTC*
  - 5c9428c32d Merge pull request #35448 from isbm/isbm-zypper-106-fix
  - dd82e6a848 Add ignore_repo_failure option to suppress zypper's exit code 106 on unavailable repos
- **PR** #35451: (isbm) Bugfix: zypper mod repo unchanged @ *2016-08-16 01:38:25 UTC*
  - 1473474b04 Merge pull request #35451 from isbm/isbm-zypper-mod_repo-unchanged
  - 8790197d86 Fix Unit test for suppressing the exception removal on non-modified repos

  - 3f00c6997a Remove zypper's raise exception if mod_repo has no arguments and/or no changes

- **ISSUE** saltstack/salt#34279: (vmadura) Salt 2016.3.1 - Master Side Pillar Cache (backend: Disk) never Expires. (refs: #35453)
- **ISSUE** #34279: (vmadura) Salt 2016.3.1 - Master Side Pillar Cache (backend: Disk) never Expires. (refs: #35453)
- **PR** #35453: (theothergraham) fixes #34279 - disk cache ttl expiry @ *2016-08-16 01:34:33 UTC*
  - a8c4f17f50 Merge pull request #35453 from theothergraham/fix_CacheDisk
  - ae5b233d51 fixes #34279
- **PR** #35459: (thatch45) Ensure that output for salt-ssh gets back @ *2016-08-16 01:29:16 UTC*
  - d8c35b5260 Merge pull request #35459 from thatch45/shim_fix
  - 10037b00cb Some environments refuse to return the command output
  - **PR** #35460: (rallytime) [2015.8] Update bootstrap script to latest stable (2016.08.15)
- **ISSUE** saltstack/salt#35010: (vchav73) cp.push_dir returns incorrect result for non-existent directories (refs: #35442)
  - **PR** #35442: (cachedout) Fix cp.push_dir pushing empty dirs
- **ISSUE** saltstack/salt#35387: (mzealey) Document reload_grains and reload_pillar (refs: #35436)
  - **PR** #35436: (cachedout) Minor doc fixup
- **ISSUE** saltstack/salt#35121: (sjorge) file.append always results in change (refs: #35132)
- **PR** #35132: (sjorge) fixes , causing lots of mayham (onchange) with 2016.3.2 for me @ *2016-08-15 07:11:22 UTC*
  - a0b128a85a Merge pull request #35132 from sjorge/2015.8-35121
  - 5cb38c8ae0 switch to fpread().splitlines(), as per @lorengordon suggestion
  - 634f1dded5 fixes #35121, causing lots of mayham (onchange) with 2016.3.2 for me
  - **PR** saltstack/salt#34573: (cedwards) Update freebsd.rst (refs: #35394)
  - **PR** #35394: (rallytime) Back-port #34573 to 2015.8
  - **PR** #34573: (cedwards) Update freebsd.rst (refs: #35394)
  - **PR** #35359: (terminalmage) Clean up open filehandles
- **PR** #35339: (isbm) Bugfix: Prevent continuous restart, if a dependency wasn't installed @ *2016-08-11 16:15:17 UTC*
  - 9ea7a34c30 Merge pull request #35339 from isbm/isbm-2015.8-minion-importerror-fix
  - 12af60b7be Fix continuous minion restart if a dependency wasn't installed
- **PR** #35357: (twangboy) Fix file.recurse with clean: True on Windows (2015.8) @ *2016-08-11 00:44:14 UTC*
  - fd9b05ace4 Merge pull request #35357 from twangboy/file.recurse.clean.2015.8
  - d328ec0157 Fix file.recurse with clean: True
- **PR** #35323: (thatch45) Fix issue with bad error check in salt-vt @ *2016-08-10 11:33:49 UTC*
  - 4618b433e9 Merge pull request #35323 from thatch45/ssh_crazy
  - 8a5b47b5d7 Collect all error data from the wfuncs call
  - 11864c31b7 supress a stack trace to show clean ssh error
  - 9fbfa282fa wow this solves an issue!

- **PR** #35325: (kev009) Fix freebsd netstat route on fbsd 10+ @ *2016-08-10 11:33:12 UTC*
  - cfae862972 Merge pull request #35325 from kev009/fbsd-netstat-route
  - 0d49dd3c29 Fix fbsd netstat route on fbsd 10+
- **ISSUE** #35264: (bobrik) ssh_known_hosts.present is not idempotent in test=true with port (refs: #35301)
  - **PR** #35301: (bobrik) Pass port to ssh.check_known_host, closes #35264
- **ISSUE** #34945: (babilen) file.recurse breaks directory permissions (refs: #35309)
  - **PR** #35309: (terminalmage) file.recurse: Do not convert octal mode string to int
- **ISSUE** #35051: (terminalmage) Runner/Wheel funcs still print return data to console when invoked from orchestration (refs: #35290)
- **PR** #35290: (terminalmage) Resolve a couple bugs in orchestration output @ *2016-08-09 15:27:00 UTC*
  - 2efc1b333b Merge pull request #35290 from terminalmage/issue35051
  - d621aa7b61 Update runner/wheel unit tests to reflect new key in ret dict
  - 90c12a9c7b Add __orchestration__ key to orch returns for runner/wheel funcs
  - 7b8c3b86e7 Suppress error about invalid changes data for orchestration jobs
  - 54a1704d6c Suppress event for wheel/runner funcs executed from orchestration
  - f409f62bf2 Accept print_event option in WheelClient.cmd()
  - b42b25ccce Add cmd func for RunnerClient
  - 480065fe00 Add print_event option to client mixins
- **ISSUE** #31074: (turtletraction) salt-ssh sudo_user execution not running as sudo_user (refs: #35211)
- **PR** #35211: (cachedout) Alternative sudo users for salt-ssh @ *2016-08-08 15:40:55 UTC*
  - f8158124d5 Merge pull request #35211 from cachedout/issue_31074
  - 6f53232e6d Better error handling and a workaround for group mismatch.
  - 5b56a4acf7 Docs
  - ae04e7aaeb Initial POC
- **ISSUE** #35166: (bobrik) state_output_profile defaults are confusing (refs: #35271)
- **PR** #35271: (bobrik) Default state_output_profile to True everywhere, closes #35166 @ *2016-08-08 14:36:24 UTC*
  - 3e4eb13daa Merge pull request #35271 from bobrik/default-output-profile
  - 6cdee21036 Default state_output_profile to True everywhere, closes #35166
- **ISSUE** #32719: (azweb76) Salt-Call Hangs when IPv6 is disabled on System (refs: #35233)
- **PR** #35233: (terminalmage) Do not attempt to get fqdn_ip{4,6} grains when ipv{4,6} grains are empty @ *2016-08-06 22:58:32 UTC*
  - 673e1aa1aa Merge pull request #35233 from terminalmage/issue32719
  - 730a077041 Do not attempt to get fqdn_ip{4,6} grains when ipv{4,6} grains are empty
- **PR** #35202: (multani) doc: fix broken links in the test documentation page @ *2016-08-06 08:29:41 UTC*
  - cdf3c0fe73 Merge pull request #35202 from multani/fix/test-doc
  - 1642dba5d1 doc: fix broken links in the test documentation page

- **ISSUE** saltstack/salt#34861: (dere) minion incorrectly reports package cannot be installed (refs: #35119)
- **PR** #35236: (rallytime) Back-port #35119 to 2015.8 @ *2016-08-06 08:10:54 UTC*
  - **PR** #35119: (dere) Assume two EVRs are equal if E and V are equal but one R is missing. (refs: #35236)
  - e1331cd2a3 Merge pull request #35236 from rallytime/bp-35119
  - 9ade78de7b Revise unnecessary code duplication
  - 7c15f5b20a Fix formatting
  - 64f93f8938 Assume two EVRs are equal if E and V are equal but one R is missing.
- **ISSUE** saltstack/salt#29785: (paul-mulvihill) pkg.installed to accept `latest' as a version keyword (refs: #35225)
- **ISSUE** #29785: (paul-mulvihill) pkg.installed to accept `latest' as a version keyword (refs: #35240)
- **PR** #35240: (dere) Backport #35225 to 2015.8 @ *2016-08-06 07:54:19 UTC*
  - **PR** #35225: (dere) Add missing documentation for pkg.installed (refs: #35240)
  - 4f2b8aa5b6 Merge pull request #35240 from derekmaciel/bp-35225
  - 9ed47f713a Add missing documentation for pkg.installed
- **PR** #35241: (terminalmage) Ensure max recursion in gitfs results in no blob object being returned. @ *2016-08-06 07:53:49 UTC*
  - 4bcfaa97d0 Merge pull request #35241 from terminalmage/gitfs-fixes
  - e05648cc2d Break from loop when file is found
  - 6764a88601 Ensure that failed recursion results in no blob object being returned
  - **PR** saltstack/salt#35039: (whiteinge) Add saltenv support to module.run (refs: #35245)
- **PR** #35245: (rallytime) Back-port #35039 to 2015.8 @ *2016-08-06 07:52:44 UTC*
  - **PR** #35039: (whiteinge) Add saltenv support to module.run (refs: #35245)
  - f6d7360e0b Merge pull request #35245 from rallytime/bp-35039
  - 51ab9cd6d4 Add saltenv support to module.run
- **ISSUE** #35214: (tdenny) git.latest fails on non-fast-forward when a fast-forward is possible (refs: #35249)
- **PR** #35249: (terminalmage) Fix regression in git.latest @ *2016-08-06 07:52:15 UTC*
  - d65a5c7134 Merge pull request #35249 from terminalmage/issue35214
  - bcd5129e9f Fix regression in git.latest when update is fast-forward
  - e2e8bbbfde Add integration test for #35214
- **ISSUE** saltstack/salt#34691: (dmacvicar) beacons.list does not include beacons configured from the pillar/ext_pillar (refs: #saltstack/salt`#34827`_, #34827)
  - **PR** saltstack/salt#35146: (cachedout) Don't discard running beacons config when listing becaons (refs: #35174)
  - **PR** saltstack/salt#34827: (thatch45) fix beacon list to include all beacons being processed (refs: #35146, #`saltstack/salt`#35146`_`_)
  - **PR** #35174: (rallytime) Back-port #35146 to 2015.8
  - **PR** #35146: (cachedout) Don't discard running beacons config when listing becaons (refs: #35174)
  - **PR** saltstack/salt#35135: (rallytime) Add missing CLI Examples to aws_sqs module funcs (refs: #35173)

  - **PR** #35173: (rallytime) Back-port #35135 to 2015.8
  - **PR** #35135: (rallytime) Add missing CLI Examples to aws_sqs module funcs (refs: #35173)
  - **PR** #35145: (jacobhammons) doc version update to 2015.8.11, updates to release notes
- **PR** #35114: (terminalmage) Add clarification docs on a common git_pillar misconfiguration @ *2016-08-02 00:30:48 UTC*
  - 81845ee31d Merge pull request #35114 from terminalmage/git_pillar-env-remap-docs
  - 5951554e9f Add clarification docs on a common git_pillar misconfiguration
- **ISSUE** saltstack/salt#34767: (hrumph) Ensure that pkg.installed function refreshes properly with windows. (refs: #34768)
- **ISSUE** #34767: (hrumph) Ensure that pkg.installed function refreshes properly with windows. (refs: #34768)
- **PR** #34768: (hrumph) Fixes #34767 @ *2016-08-01 21:46:16 UTC*
  - 88a9fb1b31 Merge pull request #34768 from hrumph/bad-installed-state
  - e1fcb8311d Put pkg.latest_version in try/except structure Move refreshed or refresh to different spot (just for code tidyness)
  - e0b6261659 changed name of varibale `refreshed' to `was_refreshed'
  - 340110b4b4 Move check for rtag to outermost-nesting in function
  - ac67c6b493 Lint fix
  - 0435a1375e Get rid of repetition in code by using new ``refreshed'' variable instead
  - 3b1dc978e2 Lint fix
  - a9bd1b92b9 lint fixes
  - 71d69343ef Fixes #34767
- **PR** #35043: (rallytime) Start release notes file for 2015.8.12 @ *2016-08-01 17:22:04 UTC*
  - 343576408f Merge pull request #35043 from rallytime/new-release-notes
  - bdcc81a384 Start release notes file for 2015.8.12
- **PR** #35050: (terminalmage) [orchestration] Properly handle runner/wheel funcs which accept a `saltdev' argument @ *2016-08-01 15:48:08 UTC*
  - 848bf0272f Merge pull request #35050 from terminalmage/fix-saltdev-arg
  - 40cfa7cf17 Avoid needlessly running 2 argspecs in salt.utils.format_call()
  - fd186b7e4c Pass environment as `saltdev' if runner/wheel func accepts a saltdev argument
  - 951b52ab93 Pass __env__ from saltmod orch states to to saltutil.{runner,wheel}
- **PR** #35066: (jfindlay) returners.postgres_local_cache: do not log in __virtual__ @ *2016-07-30 01:32:17 UTC*
  - 2144178ae0 Merge pull request #35066 from jfindlay/postgres_log
  - c2c442234f returners.postgres_local_cache: do not log in __virtual__
- **ISSUE** #34927: (bobrik) Salt does not run ``systemd daemon-reload'' on unit override (refs: #35024)
- **PR** #35024: (bobrik) Cache systemd unit update check per unit, closes #34927 @ *2016-07-28 17:56:29 UTC*
  - 7121618142 Merge pull request #35024 from bobrik/daemon-reload-fix
  - c300615e9d Cache systemd unit update check per unit, closes #34927

  - **PR** #35026: (cachedout) Expressly deny a minion if a key cannot be found
  - **PR** saltstack/salt#33875: (jmesquita) Fix naive fileserver map diff algorithm (refs: #35000)
- **PR** #35000: (rallytime) Back-port #33875 and #34999 to 2015.8 @ *2016-07-27 21:55:58 UTC*
  - **PR** #34999: (cachedout) Fixup #33875 (refs: #35000)
  - **PR** #33875: (jmesquita) Fix naive fileserver map diff algorithm (refs: #35000, #34999)
  - 2b511f3013 Merge pull request #35000 from rallytime/bp-33875
  - 35696ad637 Pylint fix
  - f9fd6ddd8a Fixup #33875
  - 56b1f6c651 Fix naive fileserver map diff algorithm

  - **PR** #34828: (thatch45) Fix #34648
  - **PR** saltstack/salt#34642: (justinta) Check that mysqladmin exists before running mysql integration tests (refs: #34818)
- **PR** #34818: (justinta) Skip mysql state test if mysqladmin is not available @ *2016-07-20 16:10:35 UTC*
  - 98fa4a404e Merge pull request #34818 from jtand/mysql_state_integration_test_cleanup
  - 9abb6f91bb Skip mysql state test if mysqladmin is not available
- **ISSUE** saltstack/salt#26278: (jiahua-h) ``order: first'' doesn't work? (refs: #34803)
- **ISSUE** saltstack/salt#24744: (anlutro) Allow states to define order: first (refs: #34803)
- **ISSUE** #24744: (anlutro) Allow states to define order: first (refs: #34803)
- **PR** #34803: (junovitch) salt/state.py: set `chunk['order'] = 0' with `order: first'; fixes #24744 @ *2016-07-20 13:56:20 UTC*
  - 6636f2b449 Merge pull request #34803 from junovitch/issue_24744
  - 64c850410f salt/state.py: set `chunk['order'] = 0' with `order: first'; fixes #24744
- **PR** #34773: (randomed) Bugfix: Startup states on minions are not being written to mysql returner @ *2016-07-19 12:39:53 UTC*
  - 58021035a9 Merge pull request #34773 from randomed/mysql-returner-startup/2015.8
  - 0cd55eb7d7 Add jid=req handling for mysql returner. It should also store the return jid into the jid list table.
  - **PR** #34751: (cachedout) Remove unnedeed config test
  - **PR** #34606: (isbm) Bugfix: Exit on configuration read (backport) (refs: #34751)
- **PR** #34754: (cachedout) Disable test @ *2016-07-18 18:40:50 UTC*
  - f19caac8e4 Merge pull request #34754 from cachedout/disable_mid_test
  - 46901c6e65 Disable test
- **ISSUE** saltstack/salt#34678: (martinhoefling) config.get module is broken due to bug in dictupdate.py (refs: #34726, #`saltstack/salt`#34726`_`_, #34741)

  - **PR** saltstack/salt#34726: (martinhoefling) Always loop over updated keys in non recursive update (refs: #34741)

- **PR** #34741: (rallytime) Back-port #34726 to 2015.8 @ *2016-07-18 18:00:23 UTC*
  - **PR** #34726: (martinhoefling) Always loop over updated keys in non recursive update (refs: #34741)
  - 81f29006f2 Merge pull request #34741 from rallytime/bp-34726
  - d949110993 Loop over updated keys in non recursive update
- **ISSUE** saltstack/salt#34703: (Cashwini) Is it possible to return output from python execution module to a file on salt master? (refs: #34721)
- **PR** #34721: (rallytime) Add output_file option to master config docs @ *2016-07-16 20:04:03 UTC*
  - e9e5bbe38b Merge pull request #34721 from rallytime/fix-34703
  - 9c803d05a5 Add output_file option to master config docs
- **ISSUE** saltstack/salt#32276: (javicacheiro) pkg.installed using sources from master fails with file not found after first succesful run (refs: #34689)
- **PR** #34689: (Azidburn) fix second run problems with pkg.installed using sources @ *2016-07-15 21:19:39 UTC*
  - 08d00f3a61 Merge pull request #34689 from Azidburn/fix_pkg_sources
  - 2c0fc919b3 fix second run problems with pkg.installed using sources
- **PR** #34695: (isbm) Bugfix: Zypper *pkg.list_products* returns False on some empty values (2015.8) @ *2016-07-15 21:08:00 UTC*
  - 4cb1ded520 Merge pull request #34695 from isbm/isbm-zypper-product-boolean-values
  - 5ed5142fbc Update test data for `registerrelease' and `productline' fields
  - 21444ee240 Bugfix: return boolean only for `isbase' and `installed' attributes

25.2.37 Salt 2015.8.13 Release Notes

Version 2015.8.13 is a bugfix release for *2015.8.0*.

Security Fixes

CVE-2017-5192 local_batch client external authentication not respected

The `LocalClient.cmd_batch()` method client does not accept `external_auth` credentials and so access to it from salt-api has been removed for now. This vulnerability allows code execution for already-authenticated users and is only in effect when running salt-api as the `root` user.

CVE-2017-5200 Salt-api allows arbitrary command execution on a salt-master via Salt's ssh_client

Users of Salt-API and salt-ssh could execute a command on the salt master via a hole when both systems were enabled.

We recommend everyone on the 2015.8 branch upgrade to a patched release as soon as possible.

25.2.38 Salt 2015.8.2 Release Notes

Version 2015.8.2 is a bugfix release for *2015.8.0*.

Statistics

- Total Merges: **379**
- Total Issue References: **138**
- Total PR References: **351**
- Contributors: **83** (DmitryKuzmenko, JaseFace, LoveIsGrief, MasterNayru, Oro, SmithSamuelM, The-Loeki, TheBigBear, aboe76, ajacoutot, anlutro, avinassh, basepi, bdrung, bechtoldt, bernieke, blueyed, cachedout, cbuechler, cedwards, clarkperkins, cro, dkiser, douglas-vaz, dr4Ke, eguven, eliasp, erchn, eyj, favadi, flavio, garethgreenaway, gravyboat, gtmanfred, hedinfaok, hexedpackets, hyn-salt, isbm, itsamenathan, jacksontj, jacobhammons, jeffreyctang, jejenone, jfindlay, johnsocp, justinta, keesbos, lathama, ldobson, lomeroe, martinhoefling, mbarrien, mbologna, merll, mrosedale, msteed, multani, nasenbaer13, nmadhok, notpeter, opdude, papertigers, pass-by-value, plastikos, quantonganh, rallytime, redmcg, rowillia, ruzarowski, ryan-lane, s0undt3ch, sdm24, sjansen, skizunov, srkunze, techhat, terminalmage, ticosax, tkwilliams, toddtomkinson, twangboy, twellspring, whiteinge)

Important: A significant orchestrate issue (issue ##29110) was discovered during the release process of 2015.8.2, so it has not been officially released. Please use *2015.8.3* instead.

Changelog for v2015.8.1..v2015.8.2

Generated at: 2018-05-27 23:17:44 UTC

- **PR** #28865: (jfindlay) add 2015.8.2 release notes @ *2015-11-13 17:30:18 UTC*
  - af297bb0ae Merge pull request #28865 from jfindlay/2015.8
  - 1f847fc9ba add 2015.8.2 release notes
- **ISSUE** #27392: (ahammond) schedule running state.orchestrate fails (refs: #28730)
- **PR** #28730: (garethgreenaway) Fixes to how return_job is handled in the scheduler for the salt master. @ *2015-11-13 16:58:20 UTC*
  - 15672a3faa Merge pull request #28730 from garethgreenaway/27392_2015_8_scheduler_return_job_master
  - 882350a543 Fixing the salt scheduler so that it only attempts to return the job data to the master if the scheduled job is running from a minion's scheduler.
- **PR** #28848: (cro) Lint @ *2015-11-13 13:46:36 UTC*
  - 5560cb662b Merge pull request #28848 from cro/fx2_multi_creds
  - f032bffd7c Lint
  - 6bb6703c3e Merge branch `fx2_multi_creds' of git://github.com/cro/salt into cro
  - 3b7d22248c Fix fallback credentials, add grains based on dracr.server_info and dracr.inventory, fix short-circuited for loop that was preventing retrieval of most data from CMC and DRAC devices, format responses from racadm more clearly.
  - b86c614564 Better logic around fallback credentials.
  - 2701826a99 Update fx2.py, fix typos in new fallback parameters.
  - 8ce5348808 Better variable name.
  - 92038b8718 Default configuration file for proxy minions.
- **PR** #28842: (cachedout) Add transport setting to shell test @ *2015-11-12 21:43:11 UTC*

  - 778ace3ca5 Merge pull request #28842 from cachedout/tcp_shell_test
  - 785bf94f55 Add transport setting to shell test
- **PR** #28837: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8 @ *2015-11-12 21:17:14 UTC*
  - 5639971744 Merge pull request #28837 from basepi/merge-forward-2015.8
  - 1c91ad6765 fix lint
  - 4b706ac76a Merge remote-tracking branch `upstream/2015.5' into merge-forward-2015.8
    * eb904665dc Merge pull request #28832 from basepi/backport.28826
      · 57be72eb91 Add backports_abc and singledispatch_helpers to thin as well
      · 897cad627b Add singledispatch to the thin
    * eff811a0ad Merge pull request #28833 from basepi/increase.gather_job_timeout.8647
      · c09243dd01 Increase the default gather_job_timeout
    * e4a036365d Merge pull request #28829 from basepi/merge-forward-2015.5
      · f8b8441485 Merge remote-tracking branch `upstream/2014.7' into merge-forward-2015.5
      · 76e69b4bff Merge pull request #28777 from rallytime/bp-28740-2014.7
      · da5fac2b36 Back-port #28740 to 2014.7
      · 45c73ebf2f Merge pull request #28716 from rallytime/bp-28705
      · 32e7bd3ea0 Account for new headers class in tornado 4.3
      · f4fe921965 Merge pull request #28717 from cachedout/umask_note
      · 1874300e08 Add note about recommended umask
  - 5aeab71f76 Merge remote-tracking branch `upstream/2015.5' into merge-forward-2015.8
    * 93562631aa Merge pull request #28756 from MrCitron/fix-25775
      · 82075c809c Add logs and correct pylint error
      · e31e22d96a Fix 25775
    * 30cc48e37f Merge pull request #28786 from chrigl/fix-28783
      · ba6d814553 closes #28783
    * 8f1d0b636e Merge pull request #28776 from rallytime/bp-28740-2015.5
      · 49256b7d90 Back-port #28740 to 2015.5

- **PR** #28615: (The-Loeki) Fixes to FreeBSD pkg @ *2015-11-05 23:43:33 UTC*
    - **PR** #198: (techhat) Basic salt support for Tomcat (refs: #28615)
    - cf79722260 Merge pull request #28615 from The-Loeki/patch-1
    - a9ee178e0d rehash is a shell builtin, needs cmd.shell to work
    - 17f3852bdd environ.get has no output_loglevel
- **PR** #28613: (cachedout) Add facility to deepcopy bound methods in Py2.6 and apply to grains @ *2015-11-05 23:28:50 UTC*
    - **PR** #28587: (cachedout) Reset yaml rendering hooks to avoid leaks (refs: #28613)
    - 9196c57e3f Merge pull request #28613 from cachedout/py26_method_deepcopy
    - 0935fcf4fc Spelling is hard
    - 2435b45195 Move to compat module to avoid namespace collisions in salt.utils
    - f519661875 Add facility to deepcopy bound methods in Py2.6 and apply to grains
- **ISSUE** #28527: (Oro) boto_rds.create needs storage_type, which does not exist in boto.rds2 create_db_instance (refs: #28561)
- **ISSUE** #28470: (mlalpho) salt boto_rds.present fails to execute, too many arguments (refs: #28612, #28653)
- **PR** #28612: (rallytime) Remove unsupported storage_type argument for parity with boto_rds module @ *2015-11-05 19:07:42 UTC*
    - **PR** #28561: (Oro) Issue #28527 boto_rds.create does not work (refs: #28612)
    - 2032d61e68 Merge pull request #28612 from rallytime/fix-28470
    - 8fd26a5488 Remove unsupported storage_type argument for parity with boto_rds module
- **PR** #28611: (rallytime) [2015.8] Be explicit about salt.utils.vmware function calls @ *2015-11-05 18:43:36 UTC*
    - d81330ac7f Merge pull request #28611 from rallytime/vmware-utils-fix

  - f46547eb56 [2015.8] Be explicit about salt.utils.vmware function calls and avoid namespacing

- **PR** #28610: (pass-by-value) Lxc config additions @ *2015-11-05 18:43:05 UTC*
  - 35dbca24e7 Merge pull request #28610 from pass-by-value/lxc_config_additions
  - 83193641ca Add doc about cloud lxc options
  - 8977ddad59 Add argument to init
  - 2be3f8b5bb Add bootstrap delay and systemd check options
- **ISSUE** #28601: (nasenbaer13) boto_asg.present overwrites custom dimensions in alarms (refs: #28602)
- **PR** #28602: (nasenbaer13) Allow setting of custom dimensions in asg alarm specification @ *2015-11-05 15:00:24 UTC*
  - 464aa6b062 Merge pull request #28602 from eyj/fix-28601
  - 963ad4250a Allow setting of custom dimensions in asg alarm specification
- **PR** #28596: (rallytime) Merge branch `2015.5' into `2015.8' @ *2015-11-05 14:25:09 UTC*
  - 572d95b3e1 Merge pull request #28596 from rallytime/merge-2015.8
  - eec9d69387 Merge branch `2015.5' into `2015.8'
    * 08295de5a5 Merge pull request #28563 from s0undt3ch/2015.5
      · 16f4db79a0 Update to latest bootstrap script v2015.11.04
    * 1e09f186ce Merge pull request #28541 from twangboy/fix_28173
      · 7edf5ce370 Fixed problem with system.set_computer_name
    * f44ed780b5 Merge pull request #28537 from jfindlay/decode_state_2015.5
      · 06e514940c decode filename to utf-8 in file.recurse state
    * 6acf87593f Merge pull request #28529 from rallytime/fix-28272
      · a959681858 Add link to Sending a GH PR to documentation docs
      · 1c612e2772 Update contributing and documentation pages to recommend submitting against branches
    * 025bff2bf0 Merge pull request #28548 from nmadhok/2015.5-task-error
      · 804a0a6537 Tasks can be in queued state instead of running. Fixes #28511
    * 63bd3e52b3 Merge pull request #28531 from rallytime/fix-24585
      · bc577b2531 Add versionadded directives to virtualenv_mod state/module
    * ea3bf972c4 Merge pull request #28508 from twangboy/fix_unit_tests_windows
      · 0da6ff7c50 Fixed some logic
      · cf1e059be5 Fixed windows tests
    * 73c5735fc1 Merge pull request #28525 from rallytime/route53_spacing
      · 6ab2ce615c Fix spacing in doc examples for boto_route53 state and module
    * 2d7f934f67 Merge pull request #28517 from rallytime/fix-28243
      · be8f650901 Punctuation.
      · fd846822c1 Add state_auto_order defaults to True note to ordering docs
- **PR** #28593: (blueyed) doc: fix typo with salt.states.file: s/preseve/preserve/ @ *2015-11-04 22:33:25 UTC*

  - 73c33e0b4a Merge pull request #28593 from blueyed/fix-typo-preserve
  - eaf27d6ee7 doc: fix typo with salt.states.file: s/preseve/preserve/
- **PR** #28578: (twangboy) Fixed the script... something got broke... @ *2015-11-04 22:00:18 UTC*
  - 8b483ee354 Merge pull request #28578 from twangboy/fix_windows_installer_script
  - 90b19a3279 Fixed the script... something got broke...
- **PR** #28579: (jfindlay) fix __virtual__ returns: tls,uptime mods @ *2015-11-04 22:00:02 UTC*
  - 7ca7ed4b37 Merge pull request #28579 from jfindlay/virt_ret
  - 333c132378 fix __virtual__ returns: tls,uptime mods
- **ISSUE** #27574: (jgill) salt-cloud: Could not associate elastic ip address <None> with network interface <eni-xxxxxxxx> (refs: #28584)
- **PR** #28584: (rallytime) If AssociatePublicIpAddress is set to True, don't auto-assign eip. @ *2015-11-04 21:59:38 UTC*
  - **PR** #25315: (ruzarowski) [cloud:EC2] Move handling of AssociatePublicIpAddress to associate_eip/allocate_new_eip logic depending on value type (refs: #28584)
  - ae764c6b5c Merge pull request #28584 from rallytime/fix-27574
  - 490e1bd5bb If AssociatePublicIpAddress is set to True, don't auto-assign eip.
- **ISSUE** #28392: (jacksontj) AsyncZeroMQReqChannel does not implement *tries* (2015.8) (refs: #28410)
- **PR** #28576: (jacksontj) Only encode the zmq message once @ *2015-11-04 21:59:20 UTC*
  - **PR** #28410: (jacksontj) Add retries to the zeromq.AsyncReqMessageClient (refs: #28576)
  - 231cdd4316 Merge pull request #28576 from jacksontj/transport
  - b29fc676a3 Only encode the zmq message once
- **PR** #28587: (cachedout) Reset yaml rendering hooks to avoid leaks (refs: #28613) @ *2015-11-04 21:37:11 UTC*
  - ab62f5cd12 Merge pull request #28587 from cachedout/fix_yaml_render_leak
  - 2da64bd736 Reset yaml rendering hooks to avoid leaks
- **ISSUE** #3436: (madduck) Pillar does not handle Unicode data (refs: #28134, #saltstack/salt`#28134`_)
  - **PR** saltstack/salt#28134: (bernieke) fix unicode pillar values #3436 (refs: #28581)
- **PR** #28581: (basepi) Revert b4875e585a165482c4c1ddc8987d76b0a71ef1b0 @ *2015-11-04 19:28:20 UTC*
  - 69081d00e0 Merge pull request #28581 from saltstack/revert-28134-2015.8
  - 0a07c90d5e Revert b4875e585a165482c4c1ddc8987d76b0a71ef1b0
- **ISSUE** #28477: (anlutro) KeyError with file.managed HTTPS source (refs: #28573)
- **PR** #28573: (jacksontj) Add *body* to salt.utils.http.query returns @ *2015-11-04 17:18:19 UTC*
  - ea3658eac8 Merge pull request #28573 from jacksontj/2015.8
  - d55ea7550b Add *body* to salt.utils.http.query returns
- **ISSUE** #655: (thatch45) Add general command management to service (refs: #`saltstack/salt-bootstrap#656`_)
  - **PR** saltstack/salt-bootstrap#674: (jfindlay) add support for repo.saltstack.com (refs: #28564, #28563)
  - **PR** saltstack/salt-bootstrap#665: (mbologna) Change to `dnf' as package manager for Fedora 22-> (refs: #28564, #28563)

  - **PR** saltstack/salt-bootstrap#656: (eyj) Add bootstrap -b flag (don't install dependencies) (refs: #28564, #28563)
  - **PR** saltstack/salt-bootstrap#654: (hedinfaok) Fixes error finding python-jinja2 in RHEL 7 (refs: #28564, #28563)
  - **PR** saltstack/salt-bootstrap#653: (cbuechler) Make bootstrap work with FreeBSD 11-CURRENT. (refs: #28564, #28563)

- **PR** #28564: (s0undt3ch) [2015.8] Update to latest bootstrap script v2015.11.04 @ *2015-11-04 15:29:46 UTC*
  - 3a729c2b40 Merge pull request #28564 from s0undt3ch/2015.8
  - b6a53a6bfb Update to latest bootstrap script v2015.11.04
- **ISSUE** #28527: (Oro) boto_rds.create needs storage_type, which does not exist in boto.rds2 create_db_instance (refs: #28561)
- **PR** #28561: (Oro) Issue #28527 boto_rds.create does not work (refs: #28612) @ *2015-11-04 15:13:09 UTC*
  - fed4c6f482 Merge pull request #28561 from Oro/fix-boto-rds-create
  - 54782b6fd9 Removed exception message where there is no exception
  - e08f45c824 Issue #28527 boto_rds.create does not work
- **PR** #28560: (bdrung) Fix various typos @ *2015-11-04 15:06:36 UTC*
  - ec924e8410 Merge pull request #28560 from bdrung/2015.8
  - 89dcb66310 Fix the wrong ``allow to do'' phrase
  - 859b6b46a6 Fix typo an nonexistant -> nonexistent
  - 66921cc61e Fix typo an succesfully -> successfully
  - c1e3ef7c8d Fix typo an explicitely -> explicitly
  - 029a95398c Fix typo an superflous -> superfluous
  - 026c215933 Fix typo an unecessary -> unnecessary
  - 5f7fc5f94b Fix typo an edditable -> editable
  - 0b768944c2 Fix typo an deamon -> daemon
  - 5af49881d7 Fix typo an completly -> completely
  - 14d2a16f74 Fix typos of compatibility
  - 46a5a9b073 Fix typo an suppored -> supported
  - abc490a78e Fix typo an usefull -> useful
  - ddd412180c Fix typo an targetting -> targeting
  - 610a6a77ae Fix typo an verison -> version
  - e0a5d46a1e Fix typo an seperated -> separated
  - 7f11cfd5e1 Fix typo an helpfull -> helpful
  - 2e9b520d84 Fix typos of omitted
  - 3029f64481 Fix typo an compatbility -> compatibility
  - 470e82f17f Fix typo an dictionnary -> dictionary
  - 5843c7aa24 Fix typo an optionnal -> optional

  - 730d0f95e7 Fix typo an transfered -> transferred
  - c7e7884de2 Fix typo an recieved -> received
  - 50eea287f3 Fix typo an managment -> management
  - cb01da81c6 Fix typos of parameter
  - 45fcc7d339 Fix typo an dont -> don't
  - 3624935d32 Fix typo an other -> another
  - d16afe2607 Fix typo sofwares -> software
  - b9b7cbe525 Fix typo sofware -> software
  - 8edd2c1add Fix typos of dependency
  - 3a5e2e3437 Fix typo documention -> documentation
- **ISSUE** #28528: (schlagify) timezone.system error: CommandExecutionError: Failed to parse timedatectl output, this is likely a bug (refs: #28550)
- **PR** #28550: (jfindlay) check timedatectl errno and return stdout on failure @ *2015-11-04 15:00:24 UTC*
  - bd0b291b63 Merge pull request #28550 from jfindlay/ctl_err
  - 11a9a5868f simplify timezone module unit test mocks
  - 476b651c94 update timezone module unit tests for timedatectl
  - 5c0e5dacc0 check timedatectl errno and return stdout on failure
- **ISSUE** #19249: (ahetmanski) Cannot create cache_dir salt master exception. (refs: #28545)
- **PR** #28545: (jfindlay) pass on concurrent create of jid_dir in local_cache @ *2015-11-04 14:54:11 UTC*
  - e048667c91 Merge pull request #28545 from jfindlay/concurrent_dir
  - 58ad699331 pass on concurrent create of cache_dir in roots fs
  - e456184b04 pass on concurrent create of jid_dir in local_cache
- **PR** #28544: (rallytime) Start moving some vmware.py cloud funcs to utils/vmware.py @ *2015-11-04 14:52:59 UTC*
  - 082ffd5734 Merge pull request #28544 from rallytime/vmware-utils
  - 403fe37704 Pylint.
  - d9301eea95 Don't move _set_cd_or_dvd_backing_type yet
  - 8d69639230 Start moving some vmware.py cloud funcs to utils/vmware.py
- **PR** #28543: (gtmanfred) clean up changes for pkg.uptodate and supervisord.dead @ *2015-11-04 14:49:46 UTC*
  - bf4f7cdc4b Merge pull request #28543 from gtmanfred/2015.8
  - 3d57b392cb return changes if supervisord stopped process
  - 5547a34acc return empty changes if server is uptodate
- **ISSUE** #28524: (bmcorser) UnicodeDecodeError in states.file (refs: #28537, #28538)
- **PR** #28538: (jfindlay) decode path and url to utf-8 in url.create (refs: #28537) @ *2015-11-04 14:48:34 UTC*
  - d345768b81 Merge pull request #28538 from jfindlay/decode_state
  - b05dfc5c58 decode path and url to utf-8 in url.create
- **ISSUE** #28476: (ColorFuzzy) state.sls UnicodeDecodeError (refs: #28533)

- **PR** #28533: (jfindlay) decode highstate error messages to utf-8 @ *2015-11-04 14:47:55 UTC*
  - 2e0c8264db Merge pull request #28533 from jfindlay/decode_err
  - 9c9bb75c37 decode highstate error messages to utf-8
- **PR** #28547: (nmadhok) [Backport] [2015.8] Tasks can be in queued state instead of running @ *2015-11-04 04:13:30 UTC*
  - cfc3146b2d Merge pull request #28547 from nmadhok/2015.8-task-error
  - 3fb1f9ee6b Tasks can be in queued state instead of running. Fixes #28511
- **PR** #28535: (techhat) Fail gracefully if 169.254* isn't available @ *2015-11-03 22:39:38 UTC*
  - 7e22e7cf24 Merge pull request #28535 from techhat/fixcreds
  - 8d9224bd09 Catch timeouts too
  - fa46dbb2a3 Lint
  - f05a5e0936 Fail gracefully if 169.254* isn't available
- **PR** #28536: (cro) Default configuration file for proxy minions. @ *2015-11-03 21:26:27 UTC*
  - 9a5208e8aa Merge pull request #28536 from cro/proxyconf
  - 1e031c4940 Default configuration file for proxy minions.
- **ISSUE** #28469: (mlalpho) state boto_secgroup.present fails to find vpc_name (refs: #28710, #28534)
- **PR** #28534: (rallytime) Add versionadded directive for vpc_name arg in boto_secgroup.present @ *2015-11-03 19:30:04 UTC*
  - 2bc78a32ef Merge pull request #28534 from rallytime/fix-28469
  - ebe3b34ae7 Add versionadded directive for vpc_name arg in boto_secgroup.present
- **PR** #28516: (rallytime) Back-port #28489 to 2015.8 @ *2015-11-03 14:05:54 UTC*
  - **PR** #28489: (TheBigBear) Update windows-package-manager.rst (minor edit) adding missing single quote pairs. (refs: #28516)
  - c6a6fe0089 Merge pull request #28516 from rallytime/bp-28489
  - 2e5684a1e4 Update windows-package-manager.rst
- **PR** #28506: (basepi) [2015.8] Log minion list for all rosters, at debug level @ *2015-11-03 14:05:22 UTC*
  - 36a217acbd Merge pull request #28506 from basepi/salt-ssh.minions.log.debug
  - 06cdb50494 Log minion list for all rosters, at debug level
- **PR** #28514: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8 @ *2015-11-03 01:19:33 UTC*
  - 8cbea63e40 Merge pull request #28514 from basepi/merge-forward-2015.8
  - 463a03b2a9 Merge remote-tracking branch `upstream/2015.5' into merge-forward-2015.8
  - 63ce8f78d5 Merge pull request #28512 from basepi/merge-forward-2015.5
    - 61c382133a Merge remote-tracking branch `upstream/2014.7' into merge-forward-2015.5
    - 4bf56cad3f Merge pull request #28461 from cachedout/issue_28455
      - 097838ec0c Wrap all cache calls in state.sls in correct umask
    - f3e61db045 Merge pull request #28407 from DSRCompany/issues/24910_token_auth_fix_2014
      - b7b5bec309 Don't request creds if auth with key.

- **PR** #28502: (cachedout) Lint #28427 @ *2015-11-02 21:09:20 UTC*
  - **PR** #28427: (cro) More updates (refs: #28502)
  - b919f55f8d Merge pull request #28502 from cachedout/lint_28427
  - 459a342102 Lint #28427
  - d354885c3d Lint
  - dbb1f0899e Lint
  - 749383c413 Lint
  - 0fa067ea30 Add datacenter getter/setter, change `dell_switch' to just `switch', trap call to change_password.
  - 4bcb5a508b Add datacenter getter/setter, change `dell_switch' to just `switch', trap call to change_password.
- **PR** #28464: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8 @ *2015-11-02 20:18:21 UTC*
  - 238411c8ce Merge pull request #28464 from basepi/merge-forward-2015.8
  - 6f6e687cb4 Mock master_uri for even tests
  - 3286a5250f Merge remote-tracking branch `upstream/2015.5' into merge-forward-2015.8
    * 37ceae1e88 Merge pull request #28448 from gwaters/add-redhat-notes
      · e70990704a added a note to the tutorial for those that redhat so they can use the state file too.
    * 5ef50d60cd Merge pull request #28406 from rallytime/bp-28381
      · e5322d2c44 Add FreeBSD detection for VirtualBox
    * 30d5f7bbae Merge pull request #28413 from rallytime/bp-28400
      · ae1921b922 Do not execute _preflight_check if not_installed list is empty in _find_install_targets. Calling with empty list on rhel/centos cause execution of repoquery --whatprovides without pkg list which is memory consumptive task for host and also for red hat satellite server.
    * 045d540aff Merge pull request #28366 from erchn/fix_yumpkg_mod_repo_disabled
      · 8187a4ce20 re-arrange things a bit to have less overall changes
      · f1d570ff18 move todelete above disabled check, add comment
      · 64feec413f also remove disabled key from repo_opts
      · 2f2ebb7bb6 mark repo not enabled when pkgrepo state passes in disable: True
    * 3923f4a569 Merge pull request #28373 from beverlcl/fix-use_carrier-28372
      · 32cffeceb6 Fixing bug #28372 for use_carrier option on bonding network interfaces.
    * e07e3f257b Merge pull request #28359 from rallytime/bp-28358
      · 9cacbf582b docstring typo fix - list returners not runners
    * 282be7ba5a Merge pull request #28346 from twangboy/fix_installer
      · f65e3e5275 Updated documentation to reflect the new parameter
      · a0c5223554 Fixes #27923 and #28000
    * 7858f04ebc Merge pull request #28315 from gwaters/update-pillar-doc

        - b15285c0b4 adding a working example of setting pillar data on the cli
    * 45305ccf29 Merge pull request #28211 from terminalmage/legacy_git_pillar-2015.5
        - 0d6a4ac115 Remove non-functional test
        - ab991d61d9 Fix for ext_pillar being compiled twice in legacy git_pillar code (2015.5 branch)
    * a6cc84c407 Merge pull request #28263 from cachedout/issue_26411-1
        - 3b880a5f07 New channel for event.fire_master
        - 29e9533aab Stand up a new channel if using salt-call
    * 788e1463d8 Merge pull request #28293 from cachedout/fix_28271
        - 499ed8519b Minor grammar changes to #28271
    * e178af0b90 Merge pull request #28271 from gwaters/update-tutorial-documentation
        - f96d39483d updated the tutorial with gravyboat's suggestions
        - b1f4a2bdf4 i think i changed the wrong header, updated to fix
        - 846b3aece1 I found you can not run the cp.push commands until after enabling the feature in the conf, so I wanted to update the docs so others who try these commands wont bump into the same issue I had.
    * e3eff9b909 Merge pull request #28280 from 0xf10e/patch-1
        - 6d4316b0ac Correct Jinja function load_* to import_*
    * 909fa3dc97 Merge pull request #28255 from cachedout/cli_opt
        - a2408157de Add __cli opt
    * 0fa094ae11 Merge pull request #28213 from rallytime/boto_route53_state
        - 237d64ff11 If record returned None, don't continue with the state. Something went wrong.
    * 1768014705 Merge pull request #28238 from basepi/fix.schedule.present.28217
        - 087a8dc3c2 Only insert enabled if it's a dict
        - 5b49f41fab Fix schedule comparison to adjust for `enabled' being added in schedule.list
        - 2dc1226ab8 Build new item with `enabled' if available
    * bdd48c92de Merge pull request #28174 from lorengordon/file-replace-multiline
        - acdef2da60 Update docstrings with new guidance
        - 0835b005b7 Use a test that makes the extra file read unnecessary
        - 6d6121a6e5 Use *flags* when checking whether content was added previously
        - b25e609e9e Set *flags=8* since now the file is read as a MULTILINE string by default
        - 89e8dcdffd Use *finally* block to ensure mmap object is closed
        - 5aea6647c9 Add support for multiline regex in file.replace
    * 2225925fb5 Merge pull request #28175 from twangboy/fix_19673
        - ae8fbb208f Fixes #19673

- **ISSUE** #15583: (dr4Ke) state grain.present should accept dict values (isn't it?) (refs: #26945)
- **ISSUE** #11870: (gpkvt) Nested Grain-Support for grains.present / grains.absent (refs: #26945)
- **PR** #28486: (rallytime) Back-port #26945 to 2015.8 @ *2015-11-02 18:43:35 UTC*

  - **PR** #26945: (dr4Ke) Feature state grains support nested and dict (refs: #28486)
  - a25ce38fda Merge pull request #28486 from rallytime/bp-26945
  - 8d26bbd777 grains module and state: documentation fixes
  - df7e936910 grains module and state: use a unique object...
  - df8ec1184c grains module documentation fixes
  - 25e9a5c9ad grains state and module: fix version strings
  - eee2318873 grains state: allow deleting grain with `False' value
  - c92326f5ea grains module: yaml representer for OrderedDict
  - 2c9c8d4073 grains state doc update
  - 576252da05 grains state: list_present, list_absent support nested grain
  - 62a1f37d86 grains state: nested support for grains.append
  - 3019a055c9 grains state: rewrite doc + example
  - c19cff517a grains state: more tests
  - cc844e4a2c grains state tests: test the grain file content as well
  - 1c5cd4c82d grains state: changes comment more accurate
  - 563fd2b56c grains state: use DEFAULT_TARGET_DELIM
  - c63913e602 grains module: simpler comment for already set key
  - 2000180791 grains.present uses grains.set
  - a03c79b13b module grains.set default comment is a string
  - 64e9e2c3b3 grains.absent uses set(None)
  - 6b8c245b87 grains state: new tests for nested grains
- **PR** #28472: (gtmanfred) overwrite more than one value with names @ *2015-11-02 17:56:53 UTC*
  - f3640b3ad6 Merge pull request #28472 from gtmanfred/2015.8
  - 8b90ccedf5 overwrite more than one value with names
- **PR** #28493: (rallytime) Back-port #28492 to 2015.8 @ *2015-11-02 17:54:09 UTC*
  - **PR** #28492: (cedwards) Updated FreeBSD installation docs (refs: #28493)
  - e31ef51053 Merge pull request #28493 from rallytime/bp-28492
  - ffc77259c9 Updated FreeBSD installation docs:
- **PR** #28494: (whiteinge) Fix filter_by passing incorrect parameters to match functions @ *2015-11-02 17:53:55 UTC*
  - 38c77206db Merge pull request #28494 from whiteinge/match-filter_by-argfix
  - e61ac75d6f Fix filter_by passing incorrect parameters to match functions
- **ISSUE** #23685: (Snergster) inotify beacon on file. `change' event to reactor to reset file to known state will cause loop (refs: #28388)
- **PR** #28491: (rallytime) Back-port #28388 to 2015.8 @ *2015-11-02 17:13:23 UTC*
  - **PR** #28388: (cachedout) Beacon state disable (refs: #28491)
  - d19affd44d Merge pull request #28491 from rallytime/bp-28388

  - f740a19477 Working right now
  - 700eaebad0 Disable starting to come to life
  - f8b17748ef More fixing
  - 04585a2878 Documentation for disable_during_state_run
  - dbbd53689d Add documentation note in inotify beacon
  - 40217fe813 More refactoring and add new option to disable during state run
  - 19af5e5ed3 Starting on refactor of beacon config parsing
- **ISSUE** #12363: (joehealy) unable to manage password expiry of windows users (refs: #28465)
- **PR** #28465: (twangboy) Fix #12363: Password Expiration in Windows @ *2015-11-02 17:01:18 UTC*
  - f7042ba967 Merge pull request #28465 from twangboy/fix_12363
  - bcf7d58dbb Fixed array if there's a problem with user.info
  - 4b36cb8b6e Added documentation to win_shadow
  - fc8f197f69 Fix #12363
- **ISSUE** #28484: (nasenbaer13) Elasticcache subnet group creation raises TypeError (refs: #28485)
- **PR** #28485: (nasenbaer13) Fix invalid usage of _get_conn causing #28484 @ *2015-11-02 16:47:52 UTC*
  - ec0cbec00b Merge pull request #28485 from eyj/fix_28484
  - 9d80fb6070 Fix invalid usage of _get_conn causing #28484
- **ISSUE** #28453: (sdm24) Fix Formatting for Nodegroup Targetting Docs (refs: #28454)
- **ISSUE** #28268: (gravyboat) Update nodegroup docs to explain how to target via nodegroups (refs: #28306)
- **PR** #28454: (sdm24) Fixed nodegroup doc formatting to correctly link to pillar_opts in the master config @ *2015-11-02 15:14:40 UTC*
  - **PR** #28306: (sdm24) Updated the Nodegroup docs to include how to target nodegroups in SLS Jinja (refs: #28454)
  - 1116798f21 Merge pull request #28454 from sdm24/fix-formatting-in-nodegroup-docs
  - b968581eb1 Fixed nodegroup doc formatting to correctly link to pillar_opts in the master config
- **PR** #28487: (cachedout) Lint 28456 @ *2015-11-02 14:52:27 UTC*
  - fac7803a59 Merge pull request #28487 from cachedout/lint_28456
  - 58fe15437a Lint #28456
  - 322a28bb06 updated states.virtualenv_mod comments to reflect that some kwargs need `distribute: True'
- **ISSUE** #24775: (ymote) jinja returned host ip address with square bracket (refs: #28457)
- **PR** #28457: (sdm24) Clarified comments for grains/core.py for ip_interfaces, ip4_interfac... @ *2015-11-02 14:47:59 UTC*
  - 22a4f14625 Merge pull request #28457 from sdm24/update-grain-ip-interfaces-comments
  - eb92afe238 Clarified comments for grains/core.py for ip_interfaces, ip4_interfaces, and ip6_interfaces, to explicitly state that the ips for each interface are passed as a list
- **PR** #28473: (anlutro) Show check_cmd output on failure @ *2015-11-02 14:15:30 UTC*
  - 5818b28c85 Merge pull request #28473 from alprs/feature-cmd_check_output

  - a772ce330a fix tests
  - 90b01e9e0d show check_cmd output on failure
- **PR** #28460: (justinta) Skipped wipefs test if wipefs does not exist on OS @ *2015-10-31 04:09:32 UTC*
  - cfe39df7ac Merge pull request #28460 from jtand/wipe_fs_fix
  - 7ca79f1f7b Skipped wipefs test if wipefs does not exist on OS
- **PR** #28426: (terminalmage) pkgbuild.built: make template engine optional @ *2015-10-30 17:13:36 UTC*
  - 9b44b5e347 Merge pull request #28426 from terminalmage/pkgbuild-template
  - 6d32497848 pkgbuild.built: make template engine optional
- **ISSUE** #28123: (hrumph) local.cmd not working for windows minions (refs: #28422)
- **PR** #28422: (cachedout) Handle windows logging on thread_multi [WIP] @ *2015-10-30 17:12:26 UTC*
  - 31777cb4e9 Merge pull request #28422 from cachedout/issue_28123
  - fd3b2a9e20 Handle windows logging on thread_multi
- **ISSUE** #13513: (ironwilliamcash) Windows Registry Key Problem on 64bit Machine (refs: #28425)

  - **PR** #28395: (cedwards) Updating bsd_shadow to match mainline shadow (refs: #28404)
  - 50845a1e91 Merge pull request #28404 from rallytime/bp-28395
  - badcb677e9 Use correct version release number
  - c5c66b8bab Updating bsd_shadow to match mainline shadow
- **PR** #28405: (opdude) Detect legacy versions of chocolatey correctly @ *2015-10-29 15:57:30 UTC*
  - e746b564b4 Merge pull request #28405 from Unity-Technologies/hotfix/choco-version-detect
  - 0076d73872 Make sure we exit out correctly when checking for choco version
  - 157e0f446d Detect legacy versions of chocolatey correctly

- **PR** #28187: (sjansen) fix at.present (refs: #28759) @ *2015-10-29 15:49:18 UTC*
  - 4304001a8f Merge pull request #28187 from sjansen/patch-1
  - 52c915e29d fix at.present
- **PR** #28375: (merll) Merge pillar includes correctly @ *2015-10-29 15:12:48 UTC*
  - 5efac26c10 Merge pull request #28375 from Precis/fix-pillar-include-loop
  - f8e2c26473 Variable err is from previous loop, too.
  - 042314246f Unit test for merging included pillars.
  - a42c51f9bf Do not merge previous values in pillar include loop.
- **PR** #28376: (ryan-lane) Support update of route53 records with multiple values @ *2015-10-29 14:54:47 UTC*
  - **PR** #28374: (ryan-lane) Support update of route53 records with multiple values (refs: #28376)
  - a69b124aaa Merge pull request #28376 from lyft/multivalue-route53-values-2015.8
  - cd221515a1 Support update of route53 records with multiple values
- **PR** #28377: (terminalmage) Deprecate `always' in favor of `force' in pkgbuild.built @ *2015-10-29 14:42:22 UTC*
  - 9e5a510e73 Merge pull request #28377 from terminalmage/force-pkgbuild
  - f18305e19e Add versionadded directive
  - 7046d0d896 Deprecate `always' in favor of `force' in pkgbuild.built
- **PR** #28380: (cro) Add missing call for service provider @ *2015-10-29 14:26:55 UTC*
  - cd632f798d Merge pull request #28380 from cro/sshprox_fix
  - 7bcc275dce Lint + logic error.
  - 92d712a54b Add a missing call for the service provider
- **ISSUE** #28202: (guettli) Docs: Difference between modules.cron.rm_job and modules.cron.rm (refs: #28348)
- **PR** #28348: (jfindlay) salt.utils.alias informs user they are using a renamed function @ *2015-10-28 20:46:36 UTC*
  - e7571e6d61 Merge pull request #28348 from jfindlay/alias
  - 7915d7e5e8 use alias util to formally alias module functions
  - 6a8b61bd12 create function alias to improve api documentation
- **PR** #28364: (justinta) In CentOS 5 the .split() causes a stacktrace. @ *2015-10-28 20:46:02 UTC*
  - 072eb98a26 Merge pull request #28364 from jtand/blockdev_test_fix
  - 3b4d03ff1a In CentOS 5 the .split() causes a stacktrace. Confirmed.split() appears to be unneeded in other OSs.
- **ISSUE** #26415: (CaesarC) salt.wheel.WheelClient doesn't work follow the python api(AttributeError: `NoneType' object has no attribute `get') (refs: #28087)
- **PR** #28361: (rallytime) Back-port #28087 to 2015.8 @ *2015-10-28 20:44:32 UTC*
  - **PR** #28087: (DmitryKuzmenko) Revert ``Update __init__.py'' (refs: #28361)
  - 06b928cfdb Merge pull request #28361 from rallytime/bp-28087
  - 41536e55b9 Revert ``Update __init__.py''
- **PR** #28360: (multani) Various documentation fixes @ *2015-10-28 20:43:20 UTC*

  - d9e5fba9b5 Merge pull request #28360 from multani/fix/docs
  - ed4a54f839 doc: fix warnings in clouds.linode
  - 5a9c4c2d60 doc: simplified states.postgres_tablespace introduction
  - cf38ff1384 doc: fix rendering of titles in the /ref/states/all/ index page
- **PR** #28370: (rallytime) Back-port #28276 to 2015.8 @ *2015-10-28 20:37:49 UTC*
  - **PR** #28276: (plastikos) Correct state pkg.updtodate to succeed when packages are up-to-date (refs: #28370)
  - 4157c8331b Merge pull request #28370 from rallytime/bp-28276
  - 227ddbcb24 Simplify setting success when there are no pkg updates.
  - cd58165138 Correct state pkg.updtodate to succeed when packages are up-to-date
- **ISSUE** #27890: (dkiser) pillar recurse list strategy (refs: #27891)
- **ISSUE** #25954: (tbaker57) [2015.8.0rc2] pillar merge strategy default behaviour change (refs: #28353)
- **PR** #28353: (merll) Consider each pillar match only once. @ *2015-10-28 15:05:21 UTC*
  - **PR** #27891: (dkiser) introduce recurse_list pillar_source_merging_strategy (refs: #28353, #28013)
  - 3942b4d0e6 Merge pull request #28353 from Precis/fix-pillar-sls-matches
  - 2f3f2d6f29 Consider each pillar match only once.
- **PR** #28334: (anlutro) iptables needs -m comment for --comment to work @ *2015-10-28 14:24:52 UTC*
  - 0d8bea6c43 Merge pull request #28334 from alprs/fix-iptables_comment
  - 170ea7c50d iptables needs -m comment for --comment to work
- **ISSUE** #27789: (eduherraiz) UnicodeDecodeError: `ascii' codec can't decode byte in 2015.8.0 (refs: #28340, #27833)

  - 4852c03d08 don't iterate over var that is NoneType
- **PR** #28185: (justinta) Added single package return for latest_version, fixed other bug. *@ 2015-10-26 14:09:40 UTC*
  - 0245820b73 Merge pull request #28185 from jtand/zypper_pkg
  - 457ff5d085 Added back nfo.get lines after finding the problem in them
  - 5cdb15c9e3 Added single package return for latest_version, fixed other bug.
- **PR** #28297: (cachedout) Lint fix proxy junos *@ 2015-10-26 13:59:44 UTC*
  - **PR** #28116: (jejenone) converted junos proxy minion to new __proxy__ global (refs: #28297)
  - 443b486c22 Merge pull request #28297 from cachedout/lint_fix_proxy_junos
  - 5194d9a2ef Lint
  - 28eff3caf2 converted junos proxy minion to new __proxy__ global added cli() in junos.py module to execute arbitrary command
- **ISSUE** #28209: (basepi) Legacy git_pillar configs cause duplicate ext_pillar calls (refs: #28210)
- **PR** #28210: (terminalmage) Fix for ext_pillar being compiled twice in legacy git_pillar code (refs: #28211) *@ 2015-10-26 12:36:58 UTC*
  - c8dd79d683 Merge pull request #28210 from terminalmage/legacy_git_pillar
  - 86f00e71bf Remove non-functional test
  - b80da6e23a Fix for ext_pillar being compiled twice in legacy git_pillar code
- **ISSUE** #28203: (edhgoose) blockdev.formatted failing on 2nd+ run, despite disk already being formatted (refs: #28265)
- **PR** #28265: (jfindlay) fix blockdev execution and state modules *@ 2015-10-26 12:27:36 UTC*
  - 62485e567f Merge pull request #28265 from jfindlay/blockdev
  - 0dc72135de update blockdev exec and state module unit tests
  - 07253cb5fb move fstype checks to blockdev execution module

  - 20ec4a1dc6 move fs create logic from blockdev state to module
  - 613671a85c safer examples in blockdev exec module docs
  - 359df1bcf7 refactor dump in blockdev exec module
  - 88acc9356d check, notify for deps in blockdev exec/state mods
- **PR** #28266: (rallytime) Back-port #28260 to 2015.8 @ *2015-10-26 12:20:56 UTC*
  - **PR** #28260: (justinta) Ioflo lint (refs: #28266)
  - 556d7d583e Merge pull request #28266 from rallytime/bp-28260
  - 03509e60b2 Removed unnecessary blank line
  - 2d06c97879 Moved lint disable to end of offending line
  - d13fe0cf53 Disabled lint check for ioflo
- **PR** #28253: (rallytime) Back-port #28063 to 2015.8 @ *2015-10-23 18:10:56 UTC*
  - **PR** #28063: (SmithSamuelM) Fixes broken Salt Raet. master.flo file path broken (refs: #28253)
  - acd2214c9d Merge pull request #28253 from rallytime/bp-28063
  - db4aa58f7b Changed reference to reflect refactor of ioflo package locations as of ioflo 1.2.3 Deprecated package locations still supported in ioflo for now
  - 87abf84b54 Changed reference to reflect refactor of ioflo package locations as of ioflo 1.2.3 Deprecated package locations still supported in ioflo for now
  - 19a81dcb77 Fixed exception in loader when no file extension
  - 2afbe6803c Raet Salt broken when config moved to package directory The path to the master.flo file no longer worked This fixes
  - a177bf8f47 fixed unittests missing close of roadstack caused error on other tests
- **ISSUE** #28227: (jfindlay) DigitalOcean FreeBSD profile fails with *image: 10.2* (refs: #28231)
- **PR** #28231: (rallytime) Make sure we're compairing strings when getting images in the DO driver @ *2015-10-23 13:49:37 UTC*
  - 570e7faa3b Merge pull request #28231 from rallytime/fix-28227
  - 0985780f12 Make sure we're compairing strings when getting images in the DO driver
- **PR** #28224: (techhat) Optimize create_repo for large packages @ *2015-10-23 13:40:06 UTC*
  - 1c55513ce3 Merge pull request #28224 from techhat/spmoptimize
  - faeef55d2f Optimize create_repo for large packages
- **ISSUE** #27374: (mool) boto_route53 state doesn't create a record (refs: #28214, #28213)
- **PR** #28214: (rallytime) Don't stacktrace if invalid credentials are passed to boto_route53 state @ *2015-10-23 13:37:30 UTC*
  - **PR** #28213: (rallytime) If record returned None, don't continue with the state. Something went wrong (refs: #28214)
  - f269f40905 Merge pull request #28214 from rallytime/fix_boto_route53_stacktrace
  - cdeb8caabe Pylint Fix
  - 11c475b0ad Don't stacktrace if invalid credentials are passed to boto_route53 state
- **PR** #28228: (rallytime) Back-port #27562 to 2015.8 @ *2015-10-23 13:34:42 UTC*

  - **PR** #27562: (techhat) Add dependency resolution to SPM (refs: #28228)
  - 0775d159f8 Merge pull request #28228 from rallytime/bp-27562
  - 847809541e Updates as per @s0undt3ch
  - cf5fefdf5f Add dependency resolution to SPM

- **ISSUE** #28230: (jfindlay) DigitalOcean FreeBSD fails to bootstrap: *Please use the freebsd@ user to access this droplet.* (refs: #28232)
- **PR** #28232: (rallytime) Add documentation to supply the ssh_username: freebsd config to DO docs @ *2015-10-23 13:31:52 UTC*
  - af241dc054 Merge pull request #28232 from rallytime/fix-28230
  - 8b06ab4335 Add documentation to supply the ssh_username: freebsd config to DO docs
- **PR** #28198: (jacobhammons) Added note regarding missing spm exe on Debian/Ubuntu @ *2015-10-22 04:40:18 UTC*
  - 36dc12c62c Merge pull request #28198 from jacobhammons/docs
  - cfadda0c0c Added note regarding missing spm exe on Debian/Ubuntu Minor fixes to spm docs
- **PR** #28182: (erchn) Some fixes for nova driver for Rackspace @ *2015-10-21 21:26:18 UTC*
  - fbad88fb99 Merge pull request #28182 from erchn/fix_nova_rackspace
  - 7b54f04ba2 wrap server_list[_detailed] in try/except block for TypeError
  - b7f8487615 rackconnectv3 default to False, not `False' get private_ips in rackconnectv2 environment and populate data object get public_ips and put in data object before returning ``result'' structure
- **ISSUE** #27454: (MrFishFinger) firewalld returns a dictionary rather than a string in the ret['comment'] (refs: #28181)
- **PR** #28181: (rallytime) Revamp firewalld state to be more stateful. @ *2015-10-21 21:19:18 UTC*
  - a1a924f170 Merge pull request #28181 from rallytime/fix-27454
  - 3e13880af8 Make sure we catch all potential exceptions
  - cb4efa87e8 Make sure state returns False when execution module calls fail
  - 232b2825e4 Revamp firewalld state to be more stateful.
- **PR** #28176: (cro) Add ping function @ *2015-10-21 20:49:54 UTC*
  - d93ad103c7 Merge pull request #28176 from cro/ssh_no_ping
  - 3e05437f15 Add ping function
- **PR** #28167: (The-Loeki) file.serialize needs to add a final newline to serialized files @ *2015-10-21 17:12:33 UTC*
  - 8e08f39381 Merge pull request #28167 from The-Loeki/patch-1
  - 46bf6d4fa3 Update file.serialize test for Python serialized
  - 66831fd087 file.serialize needs to add a final newline to serialized files
- **ISSUE** #27855: (dverbeek84) boto_vpc is not reading availability_zone (refs: #28299, #28168)
- **PR** #28168: (rallytime) Make sure availability zone gets passed in boto_vpc module when creating subnet (refs: #28299) @ *2015-10-21 14:48:03 UTC*
  - 559a517ad6 Merge pull request #28168 from rallytime/fix-27855
  - 50fb77dc50 Make sure availability zone gets passed in boto_vpc module when creating subnet

- **ISSUE** #26107: (thecosmicfrog) Issue targeting nodegroups - Invalid compound target: (L@ ...) (refs: #28148)
- **ISSUE** #24660: (Mrten) nodegroups not backwards compatible (refs: #28148)
- **PR** #28148: (basepi) [2015.8] Only expand nodegroups to lists if there is a nested nodegroup @ *2015-10-21 13:20:06 UTC*
  - dcd90363fe Merge pull request #28148 from basepi/fix.nodegroup.backwards.compat.24660
  - 11d6a2b6ac Add some docs
  - 036d767a98 Keep track of recursive nodegroup_comp calls, keep list format if it's recursing
  - 155634a0aa Finish thought
  - 528b16756b Only expand nodegroups to lists if there is a nested nodegroup
- **PR** #28155: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8 @ *2015-10-20 23:48:41 UTC*
  - 053ad408c7 Merge pull request #28155 from basepi/merge-forward-2015.8
  - c4c889f97b Merge remote-tracking branch `upstream/2015.5' into merge-forward-2015.8
  - ab18dcf637 Merge pull request #28140 from rallytime/bsd-installation-doc
    - 458a544d83 Add OpenBSD installation documentation to 2015.5 branch
  - fad38eb3c3 Merge pull request #28138 from rallytime/bp-28130-sizes-only
    - 6ab31e1886 Pylint
    - 37e4ed58a9 Added missing comma
    - 667f5e669f Added a bunch of instance sizes and updated some outdated ones
  - ce8f858536 Merge pull request #28097 from jacksontj/2015.5
    - 75e04bcbbc For all multi-part messages, check the headers. If the header is not your minion_id, skip the message
  - 9cdb970289 Merge pull request #28117 from rallytime/fix-23655
    - dfb908e405 Clean up stacktrace when master can't be reached in lxc cloud driver
  - bf7ed0a397 Merge pull request #28110 from terminalmage/masterless-mode
    - ed90103124 Add explanation of file_client: local setting masterless mode
  - a569ef4980 Merge pull request #28109 from rallytime/fix-27940
    - 18b2245611 Add created reactor event to lxc cloud driver
  - d4604fdb26 Merge pull request #27996 from rallytime/fix-21845
    - f8380d751e Provide empty string as default stdout instead of None
    - f9406b5828 Don't fail if pip package is already present and pip1 is installed
  - 28b97c514f Merge pull request #28056 from rallytime/bp-28033
    - af2c5ab759 Fixed win_useradd.py
  - dfc3aaec74 Merge pull request #28059 from rallytime/bp-28040
    - 76a0d4937b Revert ``Allow passing in auth_version, defaulting to 2.''
    - 63d5675d34 default auth_version = 2
    - 8072716888 remove extra spaces
    - 9770f56f04 cleanup whitespace, default to None to be consistent with profile

        * f4adfe98c0 Allow passing in auth_version, defaulting to 2.
        * fab1ad39af Rackspace support for switft module.
    - d1fa036b55 Merge pull request #28047 from cachedout/issue_27534
        * 6ea37ddbca Context manager
        * 4d6f6bb371 Lint
        * 59018289dc Restore FTP functionality to file client
    - fd2ca2df1b Merge pull request #28032 from twangboy/fix_win_path
        * 2bcac93314 Fixed win_path.py
    - 88c1770be4 Merge pull request #28037 from rallytime/bp-28003
        * 4fcf51fb1e Fix PR #26336
    - de727d8bd2 Merge pull request #28031 from jacobhammons/relnotes6
        * 05927bb6f0 Updated release notes with additional CVE information
    - 16c0272849 Merge pull request #28008 from jfindlay/host_path
        * 9f7047dd3c platform independent line endings in hosts mod
    - d41018fa8e Merge pull request #28012 from rallytime/fix-28010
        * 0d7059e0c2 Clean up stack trace when something goes wrong with minion output
    - f728307001 Merge pull request #27995 from jacobhammons/pillar-doc
        * 2870af2ba3 added link to grains security FAQ to targeting and pillar topics.
    - efede904a7 Merge pull request #27986 from jacobhammons/dot6
        * bb61c68c11 Changed current release to 5.6 and added CVE to release notes
    - 831ec680d9 Merge pull request #27913 from pass-by-value/proxmox_verify_ssl
        * 0b721efe37 Set default
    - 41cccb3a30 Merge pull request #27876 from terminalmage/git_pillar-AttributeError-2015.5
        * 07794c837a 2015.5 branch: Fix traceback when 2015.8 git ext_pillar config schema used
- **PR** #28149: (pass-by-value) Add clarification to cloud profile doc about host @ *2015-10-20 19:46:05 UTC*
    - 53dd01fc24 Merge pull request #28149 from pass-by-value/proxmox_profile_doc_change
    - bc371c55cd Add clarification to cloud profile doc about host
- **PR** #28146: (cachedout) Lint dracr.py @ *2015-10-20 17:55:07 UTC*

  - 869e212e81 Fix for trace dump on failing imports for win32com & pythoncom 4 win_task
- **PR** #28081: (The-Loeki) fix for glance state trace error on import failure @ *2015-10-19 12:08:47 UTC*
  - 2ac8fd793d Merge pull request #28081 from The-Loeki/fix-trace-on-keystone-state
  - 258e11f754 fix for glance state trace error on import failure
- **ISSUE** #27794: (The-Loeki) Requests backend for HTTP fetches is broken after removing streamed response handlers (refs: #28066)
- **PR** #28066: (jacksontj) Use the generic *text* attribute, not .body of the handler @ *2015-10-18 16:17:12 UTC*
  - a2128c8f80 Merge pull request #28066 from jacksontj/issue_27794
  - b1bf79821d Use the generic *text* attribute, not .body of the handler
- **ISSUE** #27828: (cubranic) Note the version when `user' and `group' became available in docs for archive.extracted (refs: #28019)
- **PR** #28019: (rallytime) Clean up version added and deprecated msgs to be accurate @ *2015-10-17 17:31:50 UTC*
  - 9c974c9a41 Merge pull request #28019 from rallytime/fix-27828
  - aca864643f Clean up version added and deprecated msgs to be accurate
- **PR** #28058: (rallytime) Back-port #28041 to 2015.8 @ *2015-10-17 17:27:19 UTC*
  - **PR** #28041: (gtmanfred) use the correct discover_extensions (refs: #28058)
  - 9adcd3b90d Merge pull request #28058 from rallytime/bp-28041
  - 04ad8dc521 use the correct discover_extensions
- **PR** #28055: (rallytime) Back-port #28043 to 2015.8 @ *2015-10-17 17:26:37 UTC*
  - **PR** #28043: (gtmanfred) the nova driver does not require libcloud (refs: #28055)
  - 6db970c93a Merge pull request #28055 from rallytime/bp-28043

  - 744e556be7 the nova driver does not require libcloud

- **PR** #28046: (pass-by-value) Add pkg install and remove functions @ *2015-10-17 14:56:24 UTC*
  - d7263d2a8e Merge pull request #28046 from pass-by-value/proxy_minion_ssh_example_additions
  - 3435d28fc9 Add pkg install and remove functions
- **PR** #28050: (ryan-lane) Use a better method for checking dynamodb table existence @ *2015-10-17 14:55:52 UTC*
  - dd0fdd827e Merge pull request #28050 from lyft/better-dynamo-exists-check-2015.8
  - 24fff4ea12 Use a better method for checking dynamodb table existence
- **ISSUE** #28038: (gtmanfred) [Docs] the ubuntu repo documentation needs to be fixed (refs: #28042)
- **PR** #28042: (jfindlay) fix repo path in ubuntu installation documentation @ *2015-10-16 19:30:52 UTC*
  - 027092e2fb Merge pull request #28042 from jfindlay/ubuntu_docs
  - ae92a8a1dc fix repo path in ubuntu installation documentation
- **PR** #28033: (twangboy) Fixed win_useradd.py (refs: #28056) @ *2015-10-16 19:19:44 UTC*
  - a3390cfbe6 Merge pull request #28033 from twangboy/fix_win_useradd
  - 2137b5f79a Fixed win_useradd.py
- **PR** #28027: (cro) Make ssh conn persistent. @ *2015-10-16 18:50:51 UTC*
  - 4f81358e9a Merge pull request #28027 from cro/persistent_ssh
  - 8b4067b6db Spelling, lint.
  - 76a93d5922 Spelling.
  - c800f60338 Default multiprocessing to False since anything that needs salt.vt will have trouble with our forking model.
  - cc0ad81b3d Lint, remove debug.
  - e41b677450 Make SSH connection `persistent'. Note that right now this requires `multiprocessing: False' in /etc/salt/proxy.
- **PR** #28029: (jacobhammons) Updated release notes with additional CVE information @ *2015-10-16 16:19:33 UTC*
  - 4dec2f9307 Merge pull request #28029 from jacobhammons/relnotes8
  - 0d1b691549 Updated release notes with additional CVE information
- **PR** #28022: (jacobhammons) Updated Debian and Ubuntu repo paths with new structure for 2015.8.1 @ *2015-10-16 15:31:36 UTC*
  - 5286c01f39 Merge pull request #28022 from jacobhammons/install
  - e4d7df8695 Updated Debian and Ubuntu repo paths with new structure for 2015.8.1
- **ISSUE** #27971: (srkunze) pip.installed returned Result: None (refs: #27983)
- **PR** #27983: (rallytime) Pip state run result should be False, not None, if installation error occurs. @ *2015-10-16 13:37:42 UTC*
  - 340229355c Merge pull request #27983 from rallytime/fix-27971
  - 9855290b99 Maintain stateful output if something went wrong running the pip command
  - 5bcc89bb8e Pip state run result should be False, not None, if installation error occurs.

- **ISSUE** #20678: (damon-atkins) Windows Installer (Separation/Downloader/Contains VC++) (refs: #27991)
- **PR** #27991: (twangboy) Fix for #20678 @ *2015-10-16 13:33:48 UTC*
  - 97d473af0d Merge pull request #27991 from twangboy/fix_20678
  - 5254ba18b3 Fix for #20678
- **ISSUE** #21845: (kitsemets) pip.install: fails in v2015.2.0rc1 when the package is already installed (pip v1.0) (refs: #27996)
- **PR** #27997: (rallytime) Remove note about pip bug with pip v1 vs pip v2 return codes @ *2015-10-16 13:23:58 UTC*
  - **PR** #27996: (rallytime) Don't fail if pip package is already present and pip1 is installed (refs: #27997)
  - bd7b39bc18 Merge pull request #27997 from rallytime/remove-pip-bug-note
  - f08d488313 Remove note about pip bug with pip v1 vs pip v2 return codes
- **PR** #27994: (justinta) Fix schedule_test failure @ *2015-10-16 13:20:56 UTC*
  - 3256e38932 Merge pull request #27994 from jtand/schedule_test-fix
  - cd67843bd0 Fix schedule_test failure
- **ISSUE** #27949: (itsamenathan) Error enabling or disabling a beacon on a minion (refs: #27992)
- **PR** #27992: (cachedout) Make load beacon config into list @ *2015-10-16 12:43:53 UTC*
  - 4a7a25eef7 Merge pull request #27992 from cachedout/issue_27949
  - 8944e1395a Make load beacon config into list
- **ISSUE** #26336: (jfindlay) windows user.present broken (refs: #28003)
- **PR** #28003: (twangboy) Fix #26336 (refs: #28037) @ *2015-10-16 12:43:07 UTC*
  - bae81d3a8d Merge pull request #28003 from twangboy/fix_26336
  - 6c94146d86 Fix PR #26336
- **PR** #27984: (rallytime) Versionadded for clean_file option for pkgrepo @ *2015-10-15 18:57:54 UTC*
  - **PR** #19561: (favadi) add pkgrepo.managed clean_file option (refs: #27984)
  - e15eeee2d3 Merge pull request #27984 from rallytime/version-clean-file
  - b094c8843e Versionadded for clean_file option for pkgrepo
- **PR** #27989: (ryan-lane) Do not try to remove the main route table association @ *2015-10-15 18:57:42 UTC*
  - 6efa71a482 Merge pull request #27989 from lyft/boto_vpc-main-route-association2-2015.8
  - 296931d29f Do not try to remove the main route table association
- **PR** #27982: (pass-by-value) Add example for salt-proxy over SSH @ *2015-10-15 17:27:57 UTC*
  - 7169fad02d Merge pull request #27982 from pass-by-value/proxy_ssh_sample
  - b85f6ab339 Add example for salt-proxy over SSH
- **PR** #27985: (jacobhammons) Changed current release to 8.1 and added CVEs to release notes @ *2015-10-15 17:27:05 UTC*
  - d0be1ab98e Merge pull request #27985 from jacobhammons/dot1
  - 236992b2be Changed current release to 8.1 and added CVEs to release notes
- **ISSUE** #27750: (justyns) Salt-master too sensitive to whitespace in public keys (again) (refs: #27979)

- **ISSUE** #21910: (justyns) Salt-master too whitespace-sensitive when dealing with minion pub keys (refs: #22115)
- **PR** #27979: (cachedout) Fix regression with key whitespace @ *2015-10-15 15:26:08 UTC*
  - **PR** #22115: (douglas-vaz) Strip whitespace characters using strip() for pub key check (refs: #27979)
  - 7e4058605d Merge pull request #27979 from cachedout/issue_27750
  - 12c6bf4358 Fix regression with key whitespace
- **ISSUE** #27712: (eduherraiz) saltutil.sync_all can't sync with the minion (refs: #27977)
- **PR** #27977: (cachedout) Decode unicode names in fileclient/server @ *2015-10-15 15:17:01 UTC*
  - 6f8925ee84 Merge pull request #27977 from cachedout/issuse_27712
  - 5173ef43c8 Decode unicode names in fileclient/server
- **PR** #27981: (justinta) Fixed trailing whitespace lint @ *2015-10-15 15:10:15 UTC*
  - fc1375fc39 Merge pull request #27981 from jtand/cloudstack-lint
  - 5dfad190c2 Fixed trailing whitespace lint
- **PR** #27969: (jeffreyctang) fix parse of { on next line @ *2015-10-15 15:04:33 UTC*
  - 1ae302b202 Merge pull request #27969 from jeffreyctang/logrotate_parse
  - 2c9b2bc367 lint fixes
  - 8c6197d42e fix parse of { on next line
- **PR** #27978: (terminalmage) Add note about dockerng.inspect_image usage @ *2015-10-15 14:54:10 UTC*
  - a4ba982b1d Merge pull request #27978 from terminalmage/dockerng-inspect_image-docstring
  - 595f4a6939 Add note about dockerng.inspect_image usage
- **PR** #27955: (pass-by-value) Bp 27868 @ *2015-10-15 12:43:37 UTC*
  - **PR** #27868: (pass-by-value) Add SSHConnection object
  - bd9d1ed8b5 Merge pull request #27955 from pass-by-value/bp-27868
  - c02ec8b943 Fix pylint errors
  - 6553d135d0 Add SSHConnection object
- **PR** #27953: (The-Loeki) Fix CloudStack cloud for new `driver' syntax @ *2015-10-15 12:38:58 UTC*
  - c50802a80f Merge pull request #27953 from The-Loeki/patch-1
  - f0d5c9f375 Pop deprecated `provider' into new `driver' key
  - 4e6b09edd1 Fix CloudStack cloud for new `driver' syntax
- **PR** #27965: (ryan-lane) Fail in boto_asg.present if alarms fail @ *2015-10-15 12:32:53 UTC*
  - 7006c37627 Merge pull request #27965 from lyft/HOTFIX-boto-asg-fix
  - b8f4079c33 Fail in boto_asg.present if alarms fail
- **PR** #27958: (twangboy) Added new functionality to win_task.py @ *2015-10-15 12:30:31 UTC*
  - 6624ec1f48 Merge pull request #27958 from twangboy/update_win_task
  - 6ecbdba246 Added run_wait function
  - 5731bdcadb Clarified an error

  - 23b9c1c199 Added new functionality

- **ISSUE** #27956: (The-Loeki) Salt-cloud CLI 2015.8 borks out with global name `__opts__' is not defined (refs: #27959)
- **PR** #27959: (techhat) Change __opts__ to self.opts @ *2015-10-14 22:29:13 UTC*
  - 1efa87a964 Merge pull request #27959 from techhat/issue27956
  - bc01c48122 Change __opts__ to self.opts
- **PR** #27943: (rallytime) Back-port #27910 to 2015.8 @ *2015-10-14 20:27:20 UTC*
  - **PR** #27910: (twellspring) htpasswd state add comment about dependency on apache2-utils (refs: #27943)
  - 877e217388 Merge pull request #27943 from rallytime/bp-27910
  - 33b3d8f5b3 Clarify that apache2-utils is for Debian-based distros
  - 8ca0bc823c Add dependency on apache2-utils
- **PR** #27944: (rallytime) Back-port #27909 to 2015.8 @ *2015-10-14 20:26:52 UTC*
  - **PR** #27909: (twellspring) htpasswd module add comment about dependency on apache2-utils (refs: #27944)
  - 5f6edc8ac2 Merge pull request #27944 from rallytime/bp-27909
  - a3401c11b1 Clarify that apache2-utils is for Debian-based distros
  - 08b7bdeb97 Add dependency on apache2-utils
- **PR** #27946: (justinta) Changed grain to look at osmajorrelease instead of osrelease @ *2015-10-14 19:54:08 UTC*
  - f29ca5f87b Merge pull request #27946 from jtand/pkgrepo-fix
  - d88ac2589f Changed grain to look at osmajorrelease instead of osrelease
- **ISSUE** #27815: (tbaker57) Documentation regarding associate_eip for EC2 profiles (refs: #27914)
- **PR** #27914: (rallytime) Use eipalloc instead of eni in EC2 interface properties example @ *2015-10-14 14:37:52 UTC*
  - bb900d428b Merge pull request #27914 from rallytime/fix-27815
  - 13a9bc9053 Use eipalloc instead of eni in EC2 interface properties example
- **PR** #27926: (rallytime) Back-port #27905 to 2015.8 @ *2015-10-14 14:35:37 UTC*
  - **PR** #27905: (itsamenathan) Small documentation error for beacon disable (refs: #27926)
  - 679e603905 Merge pull request #27926 from rallytime/bp-27905
  - 30e6b055ec Small documentation error fixed
- **ISSUE** #27911: (ryan-lane) rules_egress in boto_secgroup should not manage egress rules, if set to None (refs: #27927)
- **PR** #27927: (ryan-lane) Do not manage ingress or egress rules if set to None @ *2015-10-14 14:03:17 UTC*
  - 3b4d86467b Merge pull request #27927 from lyft/boto_secgroup-fixes-2015.8
  - 0fedcc9a0b Update docs
  - 9cc65bba76 Do not manage ingress or egress rules if set to None
- **PR** #27928: (rallytime) Back-port #27908 to 2015.8 @ *2015-10-14 14:00:50 UTC*

  - **PR** #27908: (lathama) Documentation note kwargs for mdadm state already mentioned in module (refs: #27928)
  - b0f9db409d Merge pull request #27928 from rallytime/bp-27908
  - 7febb06223 Sneaky white space
  - 31d54bbe63 Note kwags for mdadm in state
- **ISSUE** #27661: (alf) The dockerng module uses deprecated API in docker-py (refs: #27676)
- **PR** #27676: (ticosax) [dockerng] WIP No more runtime args passed to docker.start() @ *2015-10-14 13:38:41 UTC*
  - 2d0b16559e Merge pull request #27676 from ticosax/no-more-arg-to-docker-start
  - a1d0ba392f fixup! Do not pass any argument to docker.start
  - 8cddbb15c4 prevent potential error while reporting mismatch versions to user.
  - 65c8762e1f Do not pass any argument to docker.start
  - d8cca2a009 docker.version_info is now provided.
- **PR** #27885: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8 @ *2015-10-13 22:44:20 UTC*
  - 722327ee5f Merge pull request #27885 from basepi/merge-forward-2015.8
  - 5ecd5615f2 Remove failing heavily-mocked test
  - 3b5e16db67 Merge remote-tracking branch `upstream/2015.5' into merge-forward-2015.8
    * c9c3b7760e Merge pull request #27726 from jfindlay/hashhosts
      · ebce47de7c add docs to ssh.recv_known_host exec module fcn
      · b6ee16b1e5 deprecate hash_hostname in favor of hash_known_hosts
    * 18e31584b0 Merge pull request #27776 from jfindlay/local_msg
      · 03afa3cffa return message when local jobs_cache not found

      · 8ae9b66fd9 Don't pop `outputter', we expect it further down
    * d178315f93 Merge pull request #27791 from eguven/2015.5-postgres-user-groups-backport
      · 2caf1d21d6 fix test
      · bc90c5bffe improve change reporting for postgres_user groups
      · 8712bce91a backport postgres_user groups
- **ISSUE** #26908: (twangboy) Fix *service.restart salt-minion* for other locales (refs: #27882)

- **ISSUE** #26906: (mblixter) Bug fix #22020 causes a new bug due to the expected date format for the /SD parameter in schtask.exe (refs: #27882)
- **PR** #27882: (twangboy) Created win_task.py module @ *2015-10-13 16:54:13 UTC*
  - 36f05fb526 Merge pull request #27882 from twangboy/win_task_module
  - 56c3f3ebb2 Fixed an egregious error with an import
  - 07939ea29c More lint
  - 14e060ed9c Fixed some tests
  - 1e1bd29426 Fixed some lint
  - 082277a727 Win_service.py to use the new task module
  - 2212b52620 Created win_task.py module
- **ISSUE** #27738: (fphhotchips) Git Pillar locks not managed by fileserver runner (refs: #27802)
- **PR** #27802: (terminalmage) Correct warning logging when update lock is present for git_pillar/winrepo, add runner function for clearing git_pillar/winrepo locks @ *2015-10-13 15:09:11 UTC*
  - 577191696d Merge pull request #27802 from terminalmage/issue27738
  - 1dbc3b5489 Fix comment in docstring that trailed off mid-sentence
  - 94b5fc572f Process both old and ng winrepo configs when clearing git locks
  - 7f4366d42e Add CLI example
  - 3952c66888 Change log message to reflect new runner function
  - c00ef718bf Add cache.clear_git_lock runner function
  - d7ca297f7b Add salt.fileserver.clear_lock()
  - 947ed5f739 Clarify docstring
- **ISSUE** #26632: (ryanwalder) postgres_user crashes when trying to add groups formed in a list (refs: #27886)
- **PR** #27886: (rallytime) Handle group lists as well as comma-separated group strings. @ *2015-10-13 15:00:10 UTC*
  - d655bb3616 Merge pull request #27886 from rallytime/fix-26632
  - d235abf907 Handle group lists as well as comma-separated group strings.
- **ISSUE** #26313: (anlutro) Timezone module error when timedatectl fails to query server (refs: #27746)
- **PR** #27746: (anlutro) timezone module: handle timedatectl errors @ *2015-10-13 14:55:27 UTC*
  - a158cd50e6 Merge pull request #27746 from alprs/fix-timedatectl_failure
  - f616b550b2 lint - use indexed curly brace formatting
  - bc0f167850 update timezone mod unit tests for errors
  - ef26f067b2 timezone module: handle timedatectl errors
- **ISSUE** #27710: (anlutro) salt-ssh and system.reboot/shutdown (refs: #27816)
- **PR** #27816: (anlutro) Make system.reboot use *shutdown -r* when available @ *2015-10-13 14:52:06 UTC*
  - 9dc19caa79 Merge pull request #27816 from alprs/fix-reboot_delay
  - 04ef51e524 make system.reboot use *shutdown -r* when available

- **PR** #27874: (rallytime) Add mention of Periodic Table naming scheme to deprecation docs @ *2015-10-13 14:51:45 UTC*
  - dd92b8a2e3 Merge pull request #27874 from rallytime/deprecation-docs
  - 8c056ba501 Add mention of Periodic Table naming scheme to deprecation docs
- **PR** #27883: (terminalmage) Work around --is-ancestor not being present in git-merge-base before git 1.8.0 @ *2015-10-13 14:51:27 UTC*
  - 7f96ebd69e Merge pull request #27883 from terminalmage/git-merge_base-is_ancestor
  - 45c666e8dd Work around --is-ancestor not being present in git-merge-base before git 1.8.0
  - 38d715ec0a Remove redundant SaltInvocationError raises
- **ISSUE** #24111: (yermulnik) cli option `--summary' got broken after upgrade to 2015.5.1 (refs: #24732)
- **PR** #27877: (rallytime) Back-port #27774 to 2015.8 @ *2015-10-13 14:50:45 UTC*
  - **PR** #27774: (plastikos) Summary is not correctly inspecting return data to identify not responding|connected minions (refs: #27877)
  - **PR** #27099: (plastikos) Fix access to ret parameter of _print_returns_summary() (reverts 54b33dd35948 #24732) (refs: #27774)
  - **PR** #24732: (msteed) Fix stacktrace when *--summary* is used (refs: #27099)
  - 4fb20d9b4f Merge pull request #27877 from rallytime/bp-27774
  - d940d87306 Summary is not correctly inspecting return data to identify not responding|connected minions.
- **ISSUE** #26284: (storner) apache_module.enable fails on SUSE (SLES 11 SP3) (refs: #27878)
- **PR** #27878: (rallytime) Use apache2ctl binary on SUSE in apache module @ *2015-10-13 14:45:56 UTC*
  - 97da0a87e3 Merge pull request #27878 from rallytime/fix-26284
  - 87f0d987a3 Use apache2ctl binary on SUSE in apache module
- **PR** #27879: (cro) Add docs for 2015.8.2+ changes to proxies @ *2015-10-13 14:45:30 UTC*
  - 067968c0e4 Merge pull request #27879 from cro/proxydoc
  - 5b33df9d19 Add docs for 2015.8.2+ changes
- **PR** #27731: (cro) Add __proxy__ to replace opts['proxymodule'] @ *2015-10-12 20:41:22 UTC*
  - 922e2018ef Merge pull request #27731 from cro/dunder_proxy
  - ba3e423b87 Missing object item throws an AttributeError not a NameError.
  - 4cf2b56d5f Lint.
  - dc07245df2 @rallytime is awesome. Moved proxy=None to end of def minion_mods
  - 3152d8ee3f Minor loader fix
  - b15083d719 Flip sense of test for grains load at end of regular minion startup
  - 37c145bcd5 More places where salt.state.State needs a proxy param, sysmod had wrong __proxyenabled__, core grains were checking for proxy the wrong way.
  - ed23f36279 One more check for presence of __proxy__
  - 62d9f5092e what was I thinking?
  - ccf366e1a5 Lint

  - 8aef6e8aa9 Fix comment
  - 48f9755103 Oops, forgot temp var.
  - f0360ca00e More cleanup, found another spot where proxy needed to be passed to a load_modules.
  - 81a4abfe5a __proxy__ is getting nuked somewhere
  - f9461ff298 Add config option so old-style proxymodules will keep loading
  - 3d6ed5b7ff Remove debug statement.
  - b5a19a9740 Enable syncing proxymodules from the master. Proxymodules can go in /srv/salt/_proxy.
  - f878011543 Lint, and some parameter fixes to add proxy= to some overridden load_modules fns.
  - 22f035d8eb Remove debug statement
  - 4432499b45 More progress toward __proxy__
  - 1a229c17b2 Further work on __proxy__
  - 85fd6a41c7 One more check for presence of __proxy__
  - 15e1d3e3df Forgot absolute_import.
  - c5d9d54f19 Fix py3 lint
  - dd50c33543 This module was accidentally overwriting core grains during tests.
  - 525256fa68 Some calls to highstate won't have __proxy__ in scope
  - a615e5a876 what was I thinking?
  - fae3f3ca83 Lint
  - b049377cbe Remove rest_sample_test, it wasn't testing anything
  - 42188480d4 Fix comment
  - 4112c583e4 Oops, forgot temp var.
  - e9b281041c More cleanup, found another spot where proxy needed to be passed to a load_modules.
  - 64f967d731 __proxy__ is getting nuked somewhere
  - bdffb9f57b Add config option so old-style proxymodules will keep loading
  - b79b6a39dd Remove debug statement.
  - 02fc2d9323 Enable syncing proxymodules from the master. Proxymodules can go in /srv/salt/_proxy.
  - 72032650b8 Add __proxy__ to the list of builtins.
  - db4c034596 Lint, and some parameter fixes to add proxy= to some overridden load_modules fns.
  - 1032ad28fc Remove debug statement
  - c41e49d8e5 Make sure that the __proxy__ gets passed all the way into the state system.
  - 4a20d48b35 More progress toward __proxy__
  - d337f4329e Further work on __proxy__

- **ISSUE** #26904: (anlutro) pip install --upgrade with virtualenv.managed? (refs: #27745)
- **PR** #27745: (anlutro) Add pip_upgrade arg to virtualenv.managed state @ *2015-10-12 16:11:02 UTC*
  - 644f003fb2 Merge pull request #27745 from alprs/fix-virtualenv_pip_upgrade
  - 4bd219f8d4 add pip_upgrade arg to virtualenv.managed state, clean up docstring

- **PR** #27809: (ticosax) [dockerng] Remove dockerng.ps caching @ *2015-10-12 16:07:48 UTC*
  - 698f477336 Merge pull request #27809 from ticosax/remove-dockerng.ps-caching
  - 0eb1145856 Remove caching to prevent returning stale data from dockerng.ps
- **PR** #27859: (ticosax) [dockerng] Clarify doc port bindings @ *2015-10-12 16:06:27 UTC*
  - e96d06d71a Merge pull request #27859 from ticosax/clarify-doc-port-bindings
  - 75f7a3ec55 Must be a string
- **ISSUE** #8646: (micahhausler) Make the clean parameter in the file.directory state respect foreign require_in (refs: #27748)
- **PR** #27748: (multani) Fix #8646 @ *2015-10-12 15:55:57 UTC*
  - ba2a39d4b7 Merge pull request #27748 from multani/fix-8646
  - 6d95cbc998 Fix lint errors
  - 4ff9f4be2a Fix file.directory with clean=true and require_in with states ID
  - 0d391275de Test cases to demonstrate bug #8646
- **ISSUE** #27721: (ldobson) boto_cloudwatch_alarm.present returns diff on no change (refs: #27722)
- **PR** #27850: (rallytime) Back-port #27722 to 2015.8 @ *2015-10-12 15:31:58 UTC*
  - **PR** #27722: (ldobson) Sorted compare for alarm actions (refs: #27850)
  - ce1493e06b Merge pull request #27850 from rallytime/bp-27722
  - 33936605a0 Sorted compare for alarm actions
- **PR** #27851: (rallytime) Back-port #27771 to 2015.8 @ *2015-10-12 15:31:06 UTC*
  - **PR** #27771: (srkunze) [VIRTUALENV_MOD] added docs strings to explain parameters (refs: #27851)
  - c95437a710 Merge pull request #27851 from rallytime/bp-27771
  - 144a743503 added docs strings to explain parameters
- **ISSUE** #27789: (eduherraiz) UnicodeDecodeError: `ascii' codec can't decode byte in 2015.8.0 (refs: #28340, #27833)
- **PR** #27833: (jfindlay) decode path before string ops in fileclient @ *2015-10-12 15:26:39 UTC*
  - a41b59bf6e Merge pull request #27833 from jfindlay/path_decode
  - 66c74e591e decode path before string ops in fileclient
- **ISSUE** #27804: (chrismcmacken) cmd.run/cmd.run_all documentation contradictory for python_shell argument (refs: #27837)
- **PR** #27837: (jfindlay) reverse truth in python_shell documentation @ *2015-10-12 15:25:13 UTC*
  - e264db7702 Merge pull request #27837 from jfindlay/true_shell
  - 1c9708a457 reverse truth in python_shell documentation
- **PR** #27860: (flavio) Fix OS related grains on openSUSE and SUSE Linux Enterprise @ *2015-10-12 15:22:59 UTC*
  - faec838744 Merge pull request #27860 from flavio/fix-os-grains-on-suse-and-opensuse
  - fc8d296d72 Fix OS related grains on openSUSE and SUSE Linux Enterprise
- **PR** #27768: (rallytime) Clean up bootstrap function to be slightly cleaner @ *2015-10-12 15:06:54 UTC*
  - 4ac5344c31 Merge pull request #27768 from rallytime/cleanup_bootstrap

  - 9df6e106c3 Clean up bootstrap function to be slightly cleaner
- **PR** #27797: (isbm) Zypper module clusterfix @ *2015-10-12 15:06:02 UTC*
  - e1bd91e392 Merge pull request #27797 from isbm/isbm-zypper-fixes
  - 36281f6b06 Bugfix: crash if no package specified on adding a lock
  - 29806a1af9 Bugfix: crash if no package specified on removing lock
  - 453a18ea15 Return an actual amount of removed locks.
  - eaa6af9898 Bugfix: sometimes error goes to the STDOUT instead of STDERR in the RPM
  - 350340dafa Bugfix: use boolean type instead of string ``Yes'' or ``No'' (NOTE: this was forgotten)
  - decb989eb4 Bugfix and refactor due to the crash on unknown package and incorrect return value
  - a6c285bd12 Initialization fix
  - 510dedd29f Bugfix: newer Zypper includes also a version of installed package
  - f9bef516de Bugfix: broken ``upgrade_available'' and should always return dict.
- **ISSUE** #27821: (leodus) Deploy VM on Proxmox requires `size' configuration setting? Not according the docs! (refs: #27849)
- **PR** #27849: (rallytime) Don't require a size parameter for proxmox profiles @ *2015-10-11 01:33:28 UTC*
  - 286b08a0f5 Merge pull request #27849 from rallytime/fix-27821
  - 1bf17c7d48 Don't require a size parameter for proxmox profiles
- **PR** #27827: (techhat) Add additional error checking to SPM @ *2015-10-09 18:23:09 UTC*
  - 4a69db27cd Merge pull request #27827 from techhat/spmfixes
  - ffc8df223b Add additional error checking to SPM
- **ISSUE** #27825: (martinhoefling) Salt-api is not adding cors headers if auth fails (refs: #27826)
- **PR** #27826: (martinhoefling) Fixes #27825 @ *2015-10-09 16:08:05 UTC*
  - 9bc19ba7d2 Merge pull request #27826 from martinhoefling/fix-27825
  - 401e7de33d Fixes #27825
- **PR** #27824: (techhat) Update Azure errors @ *2015-10-09 15:25:14 UTC*
  - 1e2dede122 Merge pull request #27824 from techhat/azureerrors
  - 5b23ac7099 Update Azure errors
- **PR** #27795: (eguven) better change reporting for postgres_user groups @ *2015-10-08 23:56:53 UTC*
  - ec35666ff2 Merge pull request #27795 from eguven/2015.8-postgres_user-group-change
  - ffffede412 better change reporting for postgres_user groups
- **ISSUE** #27703: (ryan-lane) git.latest seems to ignore the user argument in 2015.8 (refs: #27799)
- **PR** #27799: (terminalmage) Fix usage of identity file in git.latest @ *2015-10-08 23:36:19 UTC*
  - 5420006209 Merge pull request #27799 from terminalmage/issue27703
  - 75d2b07b0c Pass user in calls to git.rev_parse
  - 786786a245 Fix wrong argument name for _git_run()
- **PR** #27717: (pass-by-value) Proxy beacon example @ *2015-10-08 22:58:49 UTC*

  - 0533a2b1dd Merge pull request #27717 from pass-by-value/proxy_beacon_example
  - cac3da1ffa Fix pylint error
  - 7fef5ea08c Make a call to beacon end point
  - 497f965c33 Comment
  - 8ad7082913 Add example beacon that works with salt-proxy
- **PR** #27793: (anlutro) update code that changes log level of salt-ssh shim command @ *2015-10-08 19:20:12 UTC*
  - dd9dba8f59 Merge pull request #27793 from alprs/fix-salt_ssh_b64_log
  - 2597d13fc8 update code that changes log level of salt-ssh shim command
- **ISSUE** #27714: (The-Loeki) 2015.8 git_pillar merge inconsistency/bug (refs: #27761)
- **PR** #27761: (terminalmage) Merge git pillar data instead of using dict.update() @ *2015-10-08 15:00:18 UTC*
  - bccb74ffc5 Merge pull request #27761 from terminalmage/issue27714
  - d149095bb0 Merge git pillar data instead of using dict.update()
- **PR** #27741: (ticosax) [dockerng] pass filters argument to dockerng.ps @ *2015-10-08 03:40:14 UTC*
  - 2ae7ada3c9 Merge pull request #27741 from ticosax/docker.containers-filters
  - 821ed72f37 pass filters argument to dockerng.ps
- **PR** #27760: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8 @ *2015-10-07 19:11:17 UTC*
  - 82a51cebde Merge pull request #27760 from basepi/merge-forward-2015.8
  - 35425b14ad Merge remote-tracking branch `upstream/2015.5' into merge-forward-2015.8
  - b2937b6a16 Merge pull request #27759 from basepi/merge-forward-2015.5
    * 792ee084bb Merge remote-tracking branch `upstream/2014.7' into merge-forward-2015.5
    * d284eb165b Merge pull request #27390 from JaseFace/schedule-missing-enabled
    * 563db71bfd Ensure we pass on the enable setting if present, or use the default of True if not in build_schedule_item() Prior to this, when schedule.present compares the existing schedule to the one crafted by this function, enabled will actually be removed at each run. schedule.present sees a modification needs to be made, and invokes schedule.modify, which does so with enabled: True, creating and endless loop of an `enabled' removal and addition.
  - 4b9128b491 Merge pull request #27732 from jacobhammons/26673
    * 75cc07cf10 noted that __virtual__ can return False and an error string
    * b928e1afa8 update docs for __virtual__ and __virtualname__ Refs #26673
  - a130896d1c Merge pull request #27747 from Sacro/fix-chocolatey-version
    * 8f1fa9e78e Chocolatey doesn't have a help command.
  - 4e48651de0 Merge pull request #27733 from jacobhammons/bug-fixes
    * cbecd4f553 Updated saltstack2 theme to add SaltConf16 banner
    * 117e0c2bcc Added hardening topic based on the information in Refs #27088
  - c58da846bf Merge pull request #27706 from jacobhammons/bug-fixes
    * 76dc8de71b Assorted doc bugs Refs #9051 Refs #13407 Refs #21475 Refs #14876 Refs #27005
  - 43fba89865 Merge pull request #27695 from rallytime/bp-27671

    * 2a88028595 Added skip test_ext_pillar_env_mapping if git module does not exist.

- cb3d92676e Merge pull request #27524 from jfindlay/pkgng_quiet
    * 5e9107b970 parse pkgng output in quiet mode for >= 1.6.0
- 5b88c55cc3 Merge pull request #27686 from rallytime/bp-27476
    * 3e08d3de8a fix for: https://github.com/saltstack/salt/issues/27373
- f9ddd4647f Merge pull request #27684 from rallytime/bp-27656
    * d3780cba00 Fix #27655: handling of success in postgres_local_cache
- 7ca6f854ff Merge pull request #27683 from rallytime/bp-27659
    * 84b6ee0c58 .pub as public key is what we should send to remote
- a0f3e34656 Merge pull request #27682 from rallytime/bp-27566
    * 2a44255748 minor: fix/format doc for returners.local_cache.prep_jid
    * fd485e2396 returners.local_cache: fix endless loop on OSError
- 0b9ba911c4 Merge pull request #27681 from rallytime/bp-25928
    * 17e1ddf137 Fix stacktrace for non-existant states
- 23da0d316a Merge pull request #27680 from rallytime/bp-27535
    * 04aed5e105 Versionadded change since 2015.5.6 has already been tagged
    * 579f2646ba .. versionadded:: 2015.5.6
    * cbaf46e066 python <2.7 compability (pylint issue)
    * ecde499478 s/bin/b to avoid confusion with bin()
    * 4237c5db80 add a __virtual__ to check that daemontools is installed properly
    * 623935a1bc fix doc
    * 573de3abd6 fix pylint issue
    * 5eb6a30d40 fix pep8 issues
    * 298cf4f5c0 import missing logging module
    * fe0ad36609 log was missing
    * e457083465 s/systemd/FreeBSD
    * 3512712e89 forgot service name..
    * 8f193a7bcc fixes #27505
- 7d7b97eab6 Merge pull request #27442 from JaseFace/fix-27391-for-2015.5
    * bfbf63e1cc Ensure we pass on the enable setting if present, or use the default of True if not in build_schedule_item() Prior to this, when schedule.present compares the existing schedule to the one crafted by this function, enabled will actually be removed at each run. schedule.present sees a modification needs to be made, and invokes schedule.modify, which does so with enabled: True, creating and endless loop of an `enabled' removal and addition.
- ccbba8656b Merge pull request #27641 from rallytime/gate-psutil-diskusage
    * da2d93a3dd Gate the psutil import and add depends doc for diskusage beacon
- 09183994f9 Merge pull request #27644 from rallytime/bp-27640

        * a9063a9745 fix typo in default pillar path
    - 27fcecccbe Merge pull request #27612 from rallytime/fix-27609
        * 8dc047dc18 If external_up is set to None, don't stacktrace, just use the private ip.
        * 2ebf790f9f [salt-cloud] gce: don't stacktrace if Ephemeral is given instead of ephemeral
    - c84a1edc1b Merge pull request #27568 from jacobhammons/man-pages-five
        * b59c03d20d regenerated man pages
    - 304dc68f7f Merge pull request #27582 from jfindlay/2015.5
        * 4f0d55cda6 add 2015.5.6 release notes
    - 7201ce71e4 Merge pull request #27557 from jfindlay/mine_doc
        * 3727d79bad edit mine doc for style and markup
        * 7e037a4666 add doc motivating mine vs grains
    - 59c3d5f93e Merge pull request #27515 from jfindlay/suse_fire
        * 4460ad2785 save iptables rules on SuSE
    - 9b26357b19 Merge pull request #27509 from jfindlay/gluster_reason
        * 1ccda538d2 tell the user why the gluster module does not work
    - 989733ea86 Merge pull request #27379 from jfindlay/pip_vars
    - aee51ffdef document and check dict type for pip env_vars
- **ISSUE** #27643: (blueyed) Please document extended return values of __virtual__ (refs: #27724)

- **PR** #27705: (rallytime) Merge #27602 with final pylint fix @ *2015-10-05 23:36:50 UTC*
  - **PR** #27602: (blueyed) dockerng: fix/enhance version warning in __virtual__ (refs: #27705)
  - 2491ce40f1 Merge pull request #27705 from rallytime/merge-27602
  - 81aad83386 Ignore import error
  - 561dc4cf94 dockerng: fix/enhance version warning in __virtual__
- **ISSUE** #13850: (ryan-lane) s3:// urls in file.managed (and likely elsewhere) require s3.key and s3.keyid to be in minion config (refs: #27691)
- **PR** #27691: (notpeter) Faster timeout (3s vs 2min) for instance metadata lookups. #13850. @ *2015-10-05 22:55:52 UTC*
  - b76eb08c68 Merge pull request #27691 from notpeter/iam_fail_faster
  - 3d9483b4e2 Faster timeout (3s vs 2min) for instance metadata lookups. #13850.
- **PR** #27696: (blueyed) loader.proxy: call *_modules_dirs* only once @ *2015-10-05 22:42:32 UTC*
  - fc78f49dc5 Merge pull request #27696 from blueyed/load-proxy-call-_module_dirs-only-once
  - 55a76be6c1 loader.proxy: call *_modules_dirs* only once

- **PR** #27630: (ticosax) Expose container_id in mine.get_docker @ *2015-10-05 21:56:53 UTC*
  - 77516912fa Merge pull request #27630 from ticosax/include-container-id-docker-mine
  - 7293ded2f6 fixup! Expose container_id in mine.get_docker
  - 9e56a7e9db Expose container_id in mine.get_docker
- **PR** #27600: (blueyed) dockerng: use docker.version=auto by default @ *2015-10-05 21:29:14 UTC*
  - 8453cb3eb1 Merge pull request #27600 from blueyed/dockerng-auto-version
  - 53c6e3b3de dockerng: use docker.version=auto by default
- **PR** #27689: (rallytime) Merge #27448 with test fixes @ *2015-10-05 21:17:41 UTC*
  - **PR** #27448: (JaseFace) Ensure we pass on the enable setting if present, or use the default of True if not in build_schedule_item() (refs: #27689)
  - 7a4291008e Merge pull request #27689 from rallytime/fix-tests-27448
  - 05a506ec9f Use correct comment in test
  - 8296fefb31 Merge #27448 with test fixes
  - d9f5e9fd2f Ensure we pass on the enable setting if present, or use the default of True if not in build_schedule_item() Prior to this, when schedule.present compares the existing schedule to the one crafted by this function, enabled will actually be removed at each run. schedule.present sees a modification needs to be made, and invokes schedule.modify, which does so with enabled: True, creating and endless loop of an `enabled' removal and addition.
- **ISSUE** #27520: (rmarcinik) winrepo is unavailable in 2015.8 (refs: #27616, #27693)
- **ISSUE** #23239: (cachedout) [RFC] Deprecate ext_processses (refs: #27693)
- **PR** #27693: (jacobhammons) initial engines topic, updates to windows repo docs @ *2015-10-05 21:05:26 UTC*
  - 4ddc87157a Merge pull request #27693 from jacobhammons/doc-updates
  - 5a3e72fc8e __ops__ to __opts__
  - 5a9867aad1 initial engines topic, updates to windows repo docs Refs #23239 Refs #27520
- **PR** #27601: (blueyed) dockerng: handle None in container.Names @ *2015-10-05 20:32:19 UTC*
  - f7f48d1eef Merge pull request #27601 from blueyed/dockerng-none-names
